INTRODUCTION

Having declared independence, the fledgling American republic began raising the military and naval forces necessary to secure it. This proved no mean feat, seeing that colonial military experience had been more or less restricted to episodic militia actions and periodic privateering. Worse still, whatever forces were raised would be pitted against the British army and Royal Navy, which, man for man, were probably the finest establishments of their kind in the world. American's neophytes endured some very hard knocks at the hands of these highly professional antagonists. Yet, through the inspired leadership of men like George Washington and Nathanael Greene, coupled with a sizable and essential infusion of money, weapons, sea power, and troops from France, Great Britain failed to overcome the revolution and basically abandoned the effort after 1781. The Americans next struggled with exactly what kind of armed establishment they would adopt for their new nation. The initial rush toward complete demobilization of the Continental army and navy was politically appealing but unrealistic, and small standing forces were grudgingly adopted under the new Constitution. Otherwise, America placed its faith in armed citizen soldiers—the militia. A costly process of trial and error ensued, but the nascent U.S. Army finally won its spurs in the Northwest Indian War, 1790–94, while the U.S. Navy performed capably in the Quasi-War with France, 1798–1800, and the Tripolitan War, 1802–05. Still, prevailing political sensibilities continued placing an inordinate emphasis on state levies, volunteers, and privateers, all of which formed the majority of manpower deployed in the second showdown with Great Britain, the War of 1812. As before, this hybrid American army, where both regular forces and militiamen were hastily trained and poorly led, was embarrassingly bested by smaller British forces. It was not until the final year of the conflict that the first manifestations of military professionalism began emerging, although far too late to influence the course of events. Likewise the U.S. Navy, despite an impressive run of individual ship victories, was driven from the sea by the sheer bulk of Royal Navy hulls arrayed against it. The upshot of this second war with England served to underscore the lessons of the first, namely, in

wartime there is no safe substitute for sizable regular forces led by professionally trained officers, naval and military alike. Whatever lip service politicians paid to the militia in the postwar period, after 1815 the American polity displayed increasing tolerance for and acceptance of standing forces on the European model.

Three decades lapsed before the nation's next military contest unfolded, and during this time the U.S. Army was mainly absorbed with frontier garrison duties and an occasional Indian conflict. One of these, the Seminole War of 1835–42, would prove to be the most prolonged struggle of its kind waged by the army, but it handled itself well under extremely trying circumstance. The U.S. Navy was similarly deployed in campaigns against piracy throughout the Caribbean and Mediterranean, acquitting itself capably. Both services shone brightly during the brief but bloody Mexican War, 1846–48, affording convincing proof of what relatively small American forces, backed by sizable bodies of volunteers, could achieve under capable leadership. It was here that graduates of the U.S. Military Academy were in abundance for the first time and made an indelible impact upon American combat performance—a far cry from the poorly trained cadres of 1812. This quest for institutionalized professionalism further extended itself in 1854 following the establishment of the U.S. Naval Academy, just as the newest steam and armament technologies were coming to the fore. Yet neither service could have prepared itself for the struggle that became the Civil War, 1861–65. The sheer magnitude of the theater in question, the length of the coastline covered, and the ultimate manpower totals involved simply dwarfed anything previously experienced by American military planners. In the face of this emergency, North and South alike resurrected the politically expedient practice of recruiting volunteers and state militias to do most of the fighting. However, most of the senior leaders and many regimental-grade officers possessed professional military backgrounds so that, within a year of the war's commencement, Northern and Southern armies were capable of mounting impressive battlefield efforts. Moreover, these were the first military establishments to pioneer new technologies such as locomotives, barbed wire, telegraphs, and—for the first time in America—military drafts on a vast scale. The Union victory was overwhelmingly won by nonprofessional “citizen soldiers,” yet it did not alter the perception that American defense needs were best addressed by small, professional forces in peacetime. These forces could be greatly expanded by drawing upon a vast pool of militia and volunteers in time of war. An American way of war had evolved.

This volume proffers extensive chronological coverage of United States military history from 1775 to 1865, from the Revolutionary War up through the Civil War. Thematically, entries are listed by service, with *Military* denoting U.S. Army, militia, and National Guard, *Naval* for U.S. Navy and privateers, and *Marines* for Continental and U.S. Marines. A handful of other

topical entries such as *Diplomacy* crop up when necessary for clarification. *Aviation* entries speak to individual events, as there was not yet a branch of aviation service. Given the vast geographical expanse covered, this volume also delineates military events by a strictly ordered geographical region (East, South, then West), while naval events are listed by Atlantic, Pacific, then rivers. Most entries cover single events, but where two or more military or naval events fall under a given date, they are listed in this strict geographic order for uniformity. Also, the exact locale is spelled out in each entry for clarity. Moreover, the scope of this series is inclusive, and an “event” might entail coverage of a battle, a noted person’s activities, a congressional law, or policy respecting some facet of the army and navy, like the debut of new technology. Space constraints limit most entries to a few lines at best, but significant events may command up to a paragraph in space according to their significance. The text is further enhanced by over 40 capsule biographies of significant military figures (generals, admirals, officers, Native Americans) who deserve a greater context than these citations allow. Finally, a bibliography of all the latest scholarship on U.S. military history is appended, with subdivisions to promote ease of use. By perusing these pages, even a casual reader can grasp the great complexity and richness of the American military experience, which has done so much to influence the history and politics of the nation and the world at large. I am indebted to my editor, Owen Lancer, for accepting this project at my suggestion; it was an arduous endeavor but also a learning experience for which I am much obliged.

—John C. Fredriksen, Ph.D.

CHRONOLOGY

1775

January 27

MILITARY: Secretary of State for the Colonies William Legge, Lord Dartmouth, instructs General Thomas Gage in Boston to take whatever measures are necessary to enforce the Crown's authority. At this time, Gage commands a garrison force of nine regiments and five Royal Artillery companies, for a total of 4,000 well-trained troops. Four large warships in the harbor contribute a further 460 Royal Marines under Major John Pitcairn.

February 20

MILITARY: The Second Provincial Congress reconvenes at Concord, Massachusetts, and takes positive steps to enhance colonial defenses. These include establishment of a military commissary, the recruitment of Stockbridge Indians, rules for military governance, and an appeal to neighboring colonies for reinforcements and supplies.

February 26

MILITARY: In Boston, General Thomas Gage orders a cache of colonial supplies and cannon stored at Salem, Massachusetts, to be seized by force. The 64th Foot, under Colonel Alexander Leslie, lands at Marblehead, Massachusetts, and proceeds inland. En route, Leslie's path is blocked by irate civilians and militia, who refuse him passage over a drawbridge. Leslie makes preparations to fire on his antagonists when a deputation under Colonel Timothy Pickering agrees to allow the British across, but only on the condition that they examine the building in question, then depart. Leslie, outnumbered and wishing to avoid a fight, complies. The British cross the bridge, examine the building in question, then retire and sail back to Boston. Henceforth the affair is derided by colonials as "Leslie's Retreat," which further emboldens them to confront the Redcoats.

March 23

MILITARY: The extralegal Virginia Convention of Delegates, aroused by recent events in Massachusetts, begins debating defensive measures. At length, outspoken politician Patrick Henry gains appointment as colonel of the 1st Virginia Regiment. He also rails against Governor John Murray, Lord Dunmore's suspension of the assembly and thunders, "Forbid it, Almighty God—I know not what course others may take; but as for me—give me liberty or give me death!"

March 25

MILITARY: In an ominous development for Great Britain, the Virginia Convention mandates that each county will raise, equip, and train a company of infantry or cavalry.

March 30

MILITARY: Royal Governor Thomas Gage sends a brigade of 1,200 British soldiers under Colonel Hugh Percy on a foray out of Boston and along the Charles River in a show of strength. Local militia do not contest this movement but assume defensive positions at the river crossings; the Redcoats, seeking to avoid a fight, simply march back into town without incident.

April

MILITARY: Escalating tensions culminate in creation of the Provisional Army by the extralegal Provincial Congress in Massachusetts. This 30,000-man force is to consist of detachments from all six New England states, supplemented by British cannon seized from various forts. Concord, New Hampshire, is selected as the major entrepot for the force, and detachments begin drifting in from New Hampshire, Connecticut, and Rhode Island.

April 1

MILITARY: The New York assembly requires all males of military age to enlist in the militia.

April 5

MILITARY: The Massachusetts Provincial Congress adopts 52 articles of war, principally derived from the 1765 British Articles of War, in the event of hostilities. The preamble carefully delineates the colony's denial of rebellion or treason and reiterates a long list of complaints against the British government.

April 14

MILITARY: General Thomas Gage again receives positive instructions from Secretary of State for the Colonies William Legge, Lord Dartmouth, authorizing him to employ military force to secure compliance with the Coercive Acts, including the arrest of colonial leaders. However, Gage's request for 20,000 reinforcements has been turned down as impractical at that time.

April 15

MILITARY: General Thomas Gage, declining to arrest colonial leaders, prepares a picked force of 700 light infantry and grenadiers (flank companies) to make another "powder raid" against Concord and Worcester, Massachusetts. He rejects orders to arrest colonial leaders as impractical and opts instead for a preemptive strike against a military objective. The Redcoats are to be conveyed by longboat across the Charles River in darkness and begin their night march in silence. However, colonial intelligence is tipped off as to their arrival and destination, and numerous riders are sent galloping off to arouse the countryside.

April 16

MILITARY: Dr. Joseph Warren readies dispatch rider Paul Revere to gallop from Boston to Lexington, Massachusetts, to warn John Hancock and Samuel Adams

of the British army's approach. The warning eventually spreads to Worcester, where the local militia successfully relocates all military supplies stored there. Revere also arranges for lanterns to be hung from the steeple of the Old North Church to signal the British route taken: one lamp if by land, two if by sea.

April 18

MILITARY: At night, a British column of 70 picked light troops and grenadiers under Lieutenant Colonel Francis Smith and Major John Pitcairn departs Boston, is ferried across the Charles River at Lechmere Point in great secrecy, and begins the overland march toward Concord. The colonists are prepared for such an occurrence, and Paul Revere and William Dawes ride off to warn the militia—and colonial leaders John Hancock and Samuel Adams. Both riders are caught and detained by the British, and it falls upon Dr. Samuel Prescott to deliver the actual message.

April 19

MILITARY: The British column under Lieutenant Colonel Francis Smith trudges along in the darkness from Boston to Concord as church bells peal through the night, denoting their approach. At length, the light infantry is detached ahead of the main force under Major John Pitcairn to scout the village of Lexington, Massachusetts. There they find Captain John Parker's company of 70 minutemen deployed on the local green off to the side. An angry Pitcairn rides up to them and orders them to disperse at once. To defuse a possible confrontation, Parker is in the act of complying when a musket shot suddenly rings out of nowhere. The tired British, feeling themselves under attack, suddenly open fire against orders, killing eight militiamen and wounding nine. It takes Pitcairn several minutes to restore order in the ranks, but a war has begun. The British re-form their ranks and continue on to their objective, six miles distant. Within the hour, the balance of Colonel Francis Smith's column arrives at Lexington and proceeds to its main objective at Concord. There, his grenadiers search the premises for stored weapons, long removed by militia under Colonel James Barrett, and they also set fire to a courthouse and several buildings. Meanwhile, a detachment of light infantry under Captain Walter Laurie, sent to guard the North Bridge, is engaged by colonial militia and driven off, losing three killed and eight wounded. His mission complete, Smith then turns his force around and tramps back to Boston. En route, his march is continually intercepted and assailed by throngs of angry militiamen under General William Heath who rake the column with galling musketry from behind rocks, trees, and all available cover. The British take fearful losses while Smith is wounded and Pitcairn unhorsed. They are almost overwhelmed when a column under Colonel Hugh Percy suddenly reinforces them at Lexington. Percy then skillfully conducts a withdrawal under fire and at the last minute redirects his escape route toward Charleston instead of Cambridge, a ploy that most likely saved his army. The 1,800 British engaged lose 73 killed and 201 wounded on this momentous day; of roughly 3,800 Americans present, the toll reaches 49 dead and 94 injured. The incredible news quickly spreads throughout the colonies, and a violent upheaval against continuing British rule finally congeals.

The first shots of the American Revolution are fired on April 19, 1775, in Lexington, Massachusetts. Painting by Don Troiani (*National Guard Bureau*)

April 20–30

MILITARY: General Artemas Ward assumes command of the Provincial Army gathering at Cambridge, Massachusetts, with Generals William Heath and John Thomas his principal subordinates. Their 13,000 men slowly envelop Boston from the land side, unofficially besieging it. In a celebrated ride, General Israel Putnam gallops in from Connecticut, covering 100 miles in only 18 hours.

April 21

MILITARY: New Hampshire militiamen under Colonel John Stark arrive at Cambridge, Massachusetts, in the wake of Lexington and Concord.

- Retaliating against his rebellious legislature, Governor John Murray, Lord Dunmore, orders Royal Marines to seize colonial stores and supplies held at Williamsburg.
- Colonial forces begin seizing powder supplies and arms from British depots in Charleston, South Carolina.

April 23

MILITARY: The Massachusetts Provincial Congress in Concord calls for a New England “Army of Observation” so as not to appear excessively hostile against the

British Crown. The army has an authorized strength of 30,000 volunteers, including 13,000 local troops under General Artemas Ward, who is joined by Generals William Heath, John Thomas, Joseph Warren, and John Whitcomb. No time is wasted dispatching messengers to neighboring colonies with pleas for immediate reinforcement. Additional forces begin arriving under Generals Nathanael Greene of Rhode Island and Israel Putnam of Connecticut.

- When word of the fighting at Lexington and Concord reaches New York City, a party of militiamen under Lieutenant Colonel Marinus Willet storms the public arsenal and seizes weapons stored there.

April 28

MILITARY: Colonel Ethan Allen and a group of the Green Mountain Boys arrive at Castleton, Vermont, to debate seizing the stores and munitions kept at Fort Ticonderoga, New York.

April 29

MILITARY: Major Benedict Arnold of the Connecticut militia marches into Cambridge, Massachusetts, at the head of his militia company.

May 2

MILITARY: Colonel Patrick Henry directs colonial forces toward Williamsburg, where they recapture powder and other supplies taken from the militia by Governor John Murray, Lord Dunmore. The governor is forced to compensate the colony for any property confiscated.

May 3

MILITARY: Connecticut militia officer Benedict Arnold prevails upon the Committee of Safety in Cambridge, Massachusetts, to provide forces for a preemptive strike against Fort Ticonderoga, New York, and secure a valuable cache of cannon and supplies stored there. Arnold, who is subsequently commissioned a colonel in the Massachusetts militia, receives authority to raise 400 men for the expedition, which promises to net 50 cannon and 20 brass pieces for the Patriot cause.

May 5

NAVAL: The 16-gun sloop HMS *Falcon* under Captain John Linzee captures an American sloop off Martha's Vineyard, Massachusetts. Linzee then anchors at the town of Dartmouth to seize another vessel at dockside, but his presence prompts the townspeople to launch two sloops against him, and both prizes are promptly recaptured. The *Falcon* escapes but loses 15 prisoners.

May 8

MILITARY: A force of 100 Green Mountain Boys under Colonel Ethan Allen departs Castleton, Vermont, intent upon seizing the cannon and stores held at Fort Ticonderoga, New York. When he meets Colonel Benedict Arnold en route, the two headstrong leaders grudgingly agree to coordinate their movements.

- News of the Battles of Lexington and Concord induces the South Carolina assembly to authorize two infantry regiments and a force of rangers.

May 9–10

MILITARY: A colonial force of 83 men under Colonels Benedict Arnold and Ethan Allen crosses Lake Champlain in two barges, under cover of a rainstorm, and

surprises the garrison at Fort Ticonderoga, New York. The Americans quickly clamber over the crumbling southern wall and overpower two sentries. When a British officer, Lieutenant Jocelyn Feltham, 26th Foot, demands to know by what authority the Americans enter His Majesty's fort, Allen bellows, "Come on out of there, you British sons of whores, or I'll smoke you out!" The garrison commander, Captain William De la Place, is badly outnumbered and capitulates without resistance. Thus the unlikely pair of Allen and Arnold successfully conclude America's first offensive operation of the war.

NAVAL: Captain Henry Mowat of the sloop HMS *Canceau* comes ashore to confer with the inhabitants of Falmouth (Portland), Maine, and is taken prisoner. He escapes soon after but will return in a few months with a vengeance.

MARINES: A group of Massachusetts soldiers under Colonel Benedict Arnold seizes a British schooner at Skenesboro (Whitehall), New York, renaming it *Liberty*. Several soldiers then serve on board as marines, the first instance of such troops in the Revolutionary War.

May 11–12

MILITARY: A force of Green Mountain Boys under Lieutenant Colonel Seth Warner moves up from Fort Ticonderoga and captures Crown Point, New York, along with another 100 cannon for the Patriot cause. With the southern portion of Lake Champlain in their hands, the Americans are well poised to launch an expedition northward into Canada.

- Colonial forces storm a Royal magazine and confiscate powder supplies in Savannah, Georgia.

May 13

MILITARY: General Artemas Ward, in a calculated show of force, parades his ragtag "Army of Observation" within gunshot of British lines outside of Boston, eliciting no hostile response. He then provocatively deploys 3,000 men on Charlestown Heights, astride Boston Harbor. Again the British fail to react, so Ward withdraws his men to the mainland without incident.

May 15–16

MILITARY: In Philadelphia, a committee of the Second Continental Congress, of which Virginia delegate George Washington is a member, begins drawing up plans for the defense of New York City. Virginia delegate Henry Lee also proposes the creation of a "Congressional Army."

May 17–18

MILITARY: Colonel Benedict Arnold boards a captured schooner at Skenesboro (Whitehall), New York, and sails to Saint Johns, Quebec, with 50 soldiers. That post and its 15-man garrison quickly succumb, along with the 16-gun sloop HMS *George III* and four boats. Hastening back to Ticonderoga, Arnold encounters Colonel Ethan Allen and 60 Green Mountain Boys headed north, apparently intent upon occupying the fort. Disregarding Arnold's warnings, Allen approaches Fort Saint Johns only to find it hastily reoccupied by 200 British soldiers and six cannon from neighboring Chambly. The Americans are quickly driven off after losing three prisoners.

NAVAL: A British supply sloop captured on Lake Champlain by Colonel Benedict Arnold is christened *Enterprise*; this is the first American vessel to carry that illustrious name.

- Captain James Mugford, commanding the sloop *Franklin*, captures the British transport HMS *Hope* off Boston Harbor. Its cargo of 1,000 barrels of gunpowder and a like number of muskets is hastily forwarded to the “Army of Observation” outside Boston.

MARINES: On Lake Champlain, Lieutenant James Wilson becomes the first known marine officer.

May 21

MILITARY: To alleviate supply shortages, General Thomas Gage authorizes forage parties to land on various islands in Boston Harbor. However, when a party of troops ventures upon Grape Island, many inhabitants gather into three boats and land there to oppose them. The British withdraw before violence flares.

May 25

MILITARY: The British garrison at Boston is reinforced by the arrival of 2,500 men under Generals John Burgoyne, William Howe, and Henry Clinton. General Thomas Gage now commands a highly trained force of 6,500 men, but the presence of three additional generals bespeaks strong government displeasure over his handling of affairs.

May 26

MILITARY: General Artemas Ward orders 30 militiamen under Colonel John Nixon to confiscate livestock on Noddle’s and Hog Islands in Boston Harbor.

May 27

MILITARY: The Continental Congress authorizes General George Washington to appoint a commissary of artillery stores as a means of securing cannon and the requisite supplies.

- Admiral Samuel Graves orders a contingent of 40 Royal Marines to Noddle’s Island, Boston Harbor, to attack the American detachment foraging there. The schooner HMS *Diana* under Lieutenant Thomas Graves, the admiral’s nephew, is also dispatched to cut off the American retreat. Generals Isaac Putnam and Joseph Warren counter by rushing in 1,000 reinforcements of their own and two cannon. Heavy skirmishing results in the destruction of the *Diana* after it runs aground, and the British withdraw. The fracas proves a rather noisy affair, and both sides suffer only four casualties apiece.

May 31

POLITICS: Mayhem erupts in Philadelphia after Congress votes to abandon Forts Ticonderoga and Crown Point, New York, over strenuous objections by delegates from New York and New England. At length they reverse themselves and order the posts held as possible conduits for an invasion of Canada.

June 2

NAVAL: The British cutter HMS *Margaretta* drops anchor off Machias, Maine, while escorting two timber sloops, *Polly* and *Unity*. Their mission is to secure lumber supplies for the British army in Boston. Ichabod Jones, a Loyalist merchant, is then rowed ashore to arrange the purchase. He assures the inhabitants that the wood is not going to be used to build fortifications in Boston, but they remain skeptical and uncooperative.

POLITICS: The Massachusetts Provincial Congress formally requests that the Continental Congress assume command and responsibility for the burgeoning New England army outside Boston, as it has been raised for the benefit of all Americans. Congress dithers on the offer but does muster the resolve to authorize a pay department for the nascent Continental army.

June 5

MILITARY: A mob ransacks the colonial arsenal in Williamsburg, Virginia, making off with 400 muskets.

June 6

MILITARY: Once the British begin evacuating New York, Lieutenant Colonel Marinus Willett, backed by the Sons of Liberty, stops and seizes five wagons suspected of smuggling weapons out of the city. The Provincial Congress, feeling this violates a previous agreement with the British, orders the weapons returned, but the request is ignored.

NAVAL: A rancorous town meeting held at Machias, Maine, votes to allow Loyalist merchant Ichabod Jones to purchase lumber for the British in Boston. To further coax cooperation, Midshipman James Moore maneuvers his four-gun schooner HMS *Margaretta* into a bombardment position offshore.

June 7

MILITARY: American militiamen seize a British magazine at Turtle Bay, New York City, again without authority of the Provincial Congress.

June 9

MILITARY: Guy Carleton, governor-general of Canada, declares martial law in that province, suspends all administrative provisions of the Quebec Act for the time being, and begins recruiting volunteers to augment his understrength forces. Carleton realizes he lacks the resources to deter a serious invasion attempt from the south, so goes on the defensive.

June 10

POLITICS: As military confrontation with Great Britain looks increasingly inevitable, Massachusetts delegate John Adams lends support to creation of a Continental army to expedite the war.

June 11

NAVAL: Loyalist merchant Ichabod Jones again comes ashore at Machias, Maine, to purchase lumber for British troops in Boston. Heated debate continues among the townspeople, who finally agree to sell lumber to Jones. However, when he is suddenly seized and imprisoned by Patriots, Midshipman James Moore anchors HMS *Margaretta* offshore and threatens to bombard the town if Jones is hurt or his vessel attacked. A mob nevertheless seizes the British transports *Unity* and *Polly* and demands that Moore surrender. Instead, he cuts his cable and slips downstream to safety.

June 12

NAVAL: The first naval action of the Revolutionary War occurs when 40 armed lumbermen under Jeremiah O'Brien sail the captured transports *Unity* and *Polly* against HMS *Margaretta* off Machias, Maine. Once adverse winds cripple the

latter's sails, the Americans pull alongside and board, seizing the vessel in a stiff fight. Midshipman James Moore is fatally wounded in the struggle, and the British suffer eight killed and five wounded to an American tally of three killed and two wounded. The *Margaretta* becomes the first Royal Navy vessel captured by the Americans and its guns are transferred to the *Unity*, which is renamed *Machias Liberty*.

- The state of Rhode Island commissions two armed sloops, the first such vessels approved by public authority.

June 14

MILITARY: General Thomas Gage falls under increasing pressure from subordinates William Howe, John Burgoyne, and Henry Clinton to take some kind of offensive action and secure greater “elbow room” for the Boston garrison. He reluctantly agrees to seize strategic Dorchester Heights, still vacant, before moving on to Roxbury and Charlestown Heights. When that is accomplished, the British will be at liberty to launch an overland assault upon rebel headquarters at Cambridge, Massachusetts.

- The Continental Congress votes to raise 10 companies of riflemen, two each from Maryland and Virginia, and six from Pennsylvania. These constitute the nucleus of the rapidly forming Continental army, and a committee, including George Washington and Philip Schuyler, is tasked with drawing up regulations to govern it. Congress also assumes direct control of all colonial forces gathered outside of Boston, at the behest of the Provincial Congress. For all these reasons, this day is considered the birthday of the U.S. Army.

June 15

MILITARY: The extensive network of colonial spies alerts the Committee of Safety in Cambridge, Massachusetts, that General Thomas Gage intends to seize the high ground on Dorchester Heights outside Boston. They react by ordering General Artemas Ward to preempt the move by occupying Bunker Hill on the Charlestown peninsula.

- John Adams of Massachusetts, wishing to cement Virginia to the revolutionary cause, nominates fellow delegate George Washington to serve as “General & Commander in Chief of American forces.” Resplendent in the blue and buff uniform of the Fairfax County militia, the imposing, austere Washington inspires confidence and is one of the few senior leaders with actual military experience. Unknown at the time, this proves to be one of the most fortuitous appointments in military history. Congress also authorizes creation of four major generals and five brigadiers to lead the rapidly forming Continental army.

NAVAL: In another early encounter, two Rhode Island vessels under Captain Abraham Whipple capture a British tender belonging to the frigate HMS *Rose* on the Providence River. Whipple's vessel *Katy* is eventually acquired by the Continental navy and renamed *Providence*.

June 16

MILITARY: Throughout the night, Colonel Richard Gridley, the Continental army's chief engineering officer, directs construction of fortifications on Breed's Hill overlooking Boston Harbor. His men dig furiously, constructing a large redoubt on the

Washington, George (1732–1799)

American military officer, first president of the United States

George Washington was born in Westmoreland County, Virginia, on February 22, 1732, and was a part of the minor landed gentry. Although poorly educated, he found work as a surveyor and land speculator, and in 1753 he commenced his long association with military affairs by gaining a militia commission. In this capacity he helped precipitate the bloody French and Indian War by building Fort Necessity on land claimed by France, then surrendering it to superior forces on May 28, 1754. Washington subsequently accompanied the ill-fated expedition of English general Edward Braddock and survived the crushing defeat on the Monongahela River on July 9, 1755. After the war, Washington married wealthy Martha Custis and entered colonial politics. A moderate by inclination, he opposed the taxation policies of Great Britain and sided with the Patriots when the Revolutionary War broke out in 1775. Washington, by dint of his military experience, commanding figure, and trust-

worthy persona, was chosen to head the new Continental army. He proved successful in forcing the British to evacuate Boston, Massachusetts, but was roundly defeated by them near New York City and forced into a midwinter retreat through New Jersey. It appeared that the Revolution might have ended then and there, but Washington suddenly turned and attacked, defeating the British and their Hessian allies at Trenton and Princeton in December 1776 and January 1777, respectively. Thereafter, while Washington continued to lose a number of battles, he and his men invariably improved their battlefield performance; as long as the Continental army survived intact, so would the American Revolution.

The impasse continued for many years until the summer of 1781, when Washington was apprised that the French navy would be operating in Chesapeake Bay. Assisted by his French ally, the comte de Rochambeau, Washington led a lightning march from

hilltop before the British can react, and are subsequently reinforced by 1,200 men under Colonel William Prescott and General Israel Putnam. In the early morning hours, they are joined by small groups of soldiers under Colonel Thomas Knowlton, Colonel John Stark, and General Seth Pomeroy, all fighting as volunteers.

- George Washington accepts the nomination as commander in chief, but declines a salary, asking only for a stipend to cover expenses. Charles Lee, Israel Putnam, Philip J. Schuyler, and Artemas Ward are also commissioned major generals. Congress concurrently throws itself into formalizing the new Continental army by establishing unit types and strengths, and authorizing the appointment of an engineer, adjutant general, paymaster, commissary general, and quartermaster.

June 17

MILITARY: At dawn, General Thomas Gage is amazed to behold a complex series of earthworks that have miraculously sprung up overnight at Charlestown, Massachusetts. The danger they pose to the Boston garrison finally rouses him to

New York that trapped British forces under General Charles Cornwallis at Yorktown, Virginia, and forced them to surrender on October 19, 1781. Victory here all but ended the war, and afterward Washington, still the nation's most trusted figure, gradually advocated discarding the Articles of Confederation in favor of more centralized governance under the proposed Constitution. This became a reality in 1789, whereupon Washington was elected the nation's first president and commander in chief. Thus situated, he guided the shaky new republic with a firm hand, stabilizing political institutions, and appointed General Anthony Wayne to defeat the Northwest Indians of Ohio. In 1794 he surmounted another military crisis when disgruntled farmers in western Pennsylvania rebelled rather than pay taxes on whiskey. In his farewell address, the lofty leader cautioned against entangling alliances abroad and then retired to his estate at Mount Vernon. Washington died there on December 14, 1799, a capable military leader and widely mourned as the "father of his country."

George Washington was commander in chief of the Continental army and the first president of the United States under the Constitution. (*Independence National Historical Park*)

fight. After further consultation, he resolves that a direct display of British military prowess is necessary to cow the rebels into submission. Gage authorizes 2,200 soldiers under General William Howe to land on the peninsula and drive the rebels off by a frontal assault. Given the low regard that professional British officers hold for their adversaries, no particular difficulty is anticipated. Howe's force then rows across the harbor in barges, and he draws up his command in full battle array before advancing upon the American line as if on parade. Exercising superb fire control, Colonel John Stark and William Prescott allow the vaunted Redcoats to advance within 60 paces before unleashing a devastating, point-blank volley. The attackers are staggered by heavy losses, especially among company-grade officers, and flee back down the slopes. An assault on the American right by General Robert Pigot is likewise rebuffed with many casualties. Stunned by the resistance, Howe rallies the survivors and leads them back up the hill a second time. As before, the precise, closely ordered British lines

approach to within a few yards of American lines before being scythed down by torrents of accurate musketry. Howe's entire staff has been shot down beside him, yet he is miraculously unhurt. He then resolves on a final assault to settle matters with cold steel and orders his men to drop their 80-pound backpacks. He is also reinforced by 400 men under General Henry Clinton and a battalion of Royal Marines under Major John Pitcairn. Once again the British tramp up the steep slopes of Breed's Hill in perfect formation, no mean task considering the steep terrain and intense summer heat, and close with the defenders. By this time the Americans have nearly exhausted their supply of ammunition. Their next volley staggers the attackers but fails to stop them. Howe, sword in hand, then leads them over the parapet and into the redoubt. A vicious hand-to-hand struggle erupts along the line as the American defense collapses under the weight of vengeful bayonets. Clinton, against orders, also pitches into the fray, and General Israel Putnam finally orders a retreat back to the mainland. The fighting suddenly ceases and the exhausted British decline to pursue. Howe has lost 226 killed and 828 wounded, an appalling 48 percent of forces engaged. American losses are noted as 140 dead (including Dr. Joseph Warren) and 271 wounded. An additional 30 prisoners, principally wounded, are also taken. General Henry Clinton, surveying the carnage, considers the battle "a dear bought victory, another such would have ruined us."

June 20–30

MILITARY: General George Washington conducts America's first military review by parading several Philadelphia militia companies. He is then ordered north by the Continental Congress to assume command of all American forces gathered outside Boston. Congress finally approves four individuals—Artemas Ward, Charles Lee, Israel Putnam, and Philip Schuyler—to serve as major generals. Previously, Washington requested and obtained the veteran Horatio Gates to function as his adjutant general.

June 21

MILITARY: An obscure figure, Nathanael Greene, is appointed brigadier general of the Rhode Island militia.

June 22

MILITARY: Daniel Morgan is commissioned captain in one of the new rifle companies recruited in Frederick County, Virginia. They immediately begin a 600-mile trek to join the main army outside Boston, Massachusetts.

June 23

MILITARY: General George Washington and his retinue depart Philadelphia, Pennsylvania, for Cambridge, Massachusetts, where he is to assume command of all American forces besieging Boston.

June 25

MILITARY: The Continental Congress appoints General Philip J. Schuyler as commander of the Northern Department in New York. If practicable, they grant him discretionary authority to mount an invasion of Canada and bring that region into the American fold.

June 26

MILITARY: General George Washington, en route to Boston as commander in chief, declares his intention to resign from the military and live as a private citizen once hostilities cease.

June 30

MILITARY: Congress approves 69 Articles of War, drawn mostly from existing British regulations, to govern, discipline, and administer the Continental army. In contrast with British practices, discipline is somewhat moderated, with punishments restricted to 39 lashes, fines restricted to two months' pay, and prison terms restricted to one month of confinement. The death penalty is reserved only for the most serious crimes, and rank and file are actively encouraged to attend church to promote good behavior and proper morality.

July 3

MILITARY: General George Washington arrives at Cambridge, Massachusetts, and in his first order hopes "that all distinctions of colonies will be laid aside so that one and the same spirit may animate the whole." Washington's first task is to replace Artemas Ward as commander of the Continental army, then keep the 14,000-man force trained and fed. He next tries to impose a greater semblance of military and logistical order on this unruly mob by dividing the army into three wings under Generals Ward, Putnam, and Lee. He then orders the line of fortifications surrounding Boston extended between Dorchester and the Mystic River to further bottle up the British. Washington also takes remedial disciplinary action to transform his armed amateurs into a respectable military force. A barrage of general orders ensues, which instruct the men to promote discipline, improve hygiene, and refine combat effectiveness. But the greatest challenge confronting Washington is expiring enlistments at the end of the year. He will face the daunting prospect of persuading this rather unruly lot to reenlist and submit to the rigors of military life over the next eight years.

July 4

MILITARY: General George Washington issues General Order No. 1, declaring to the troops their complete subordination to the Continental Congress. Some officers, unhappy over the loss of local control, resign rather than submit.

July 5

MILITARY: As a command system with the Continental army consolidates, General George Washington authorizes the adoption of insignia to denote military rank. The first system adopted requires officers of various grades to wear different-colored ribbons and cockades.

July 6

MILITARY: Outside Boston, military discipline begins exerting itself within the Continental army when three soldiers attached to Colonel Richard Gridley's artillery regiment are court-martialed for desertion and theft.

July 8

MILITARY: American forces under Major Benjamin Tupper and Captain John Crane begin probing British defenses by overrunning a small detachment at Boston Neck (Roxbury) and burning a guardhouse.

July 9

MILITARY: At Cambridge, General George Washington convenes a war council to evaluate current affairs. He and his officers decide against fortifying Dorchester Heights for the time being to avoid provoking a sharp military response. Washington feels that his ragtag ensemble is not up to a stand-up engagement with British regulars in the field, so he settles upon a siege for the time being.

July 10

MILITARY: General Horatio Gates, as adjutant general, issues orders forbidding free African Americans from serving with the Continental army. British deserters and youths under 18 are also precluded from the ranks.

- The Americans capture a British supply vessel with 14,000 pounds of gunpowder at Tybee Island, off the mouth of the Savannah River, Georgia.

July 12

MILITARY: South Carolina militiamen under James Mayson seize Fort Charlotte on the Savannah River, becoming the first military action conducted by troops in that state.

July 13

MILITARY: In the continuing war of outposts at Boston, General Henry Clinton probes American defenses at Roxbury, totally dispersing them. Clinton subsequently regrets that he lacked sufficient manpower to launch an all-out assault against his ill-prepared opponents.

July 16

NAVAL: Jeremiah O'Brien entices ashore the officers of two British schooners, HMS *Diligent* and *Tatamagouche*, at Machias, Maine, where they are suddenly seized along with the accompanying vessels.

July 18

MILITARY: General Philip Schuyler arrives at Fort Ticonderoga only to discover it weakly manned and garrisoned by raw troops. Shortly afterward, Congress appoints Schuyler to command the Northern Department (New York). This move initiates a trend toward the creation of regional commands.

July 21

MILITARY: A Massachusetts militia force under Major Joseph Vose raids Nantasket Point in Boston Harbor and also destroys the lighthouse on Great Brewster Island. The Americans suffer two wounded.

July 23

MILITARY: Patriot leader William H. Drayton arrives in the South Carolina backcountry to stir up revolutionary sentiments, but his efforts are thwarted by strong Loyalist sentiment. He consequently orders local militia to begin rounding up and detaining Loyalist leaders.

July 24

MILITARY: In New York, General Philip J. Schuyler dispatches a small reconnaissance party under Major John Brown into Canada to gather intelligence about Montreal and ascertain attitudes of the inhabitants.

July 25

MEDICAL: Dr. Benjamin Church gains appointment as the first surgeon general of the Continental army; this comes over the objections of Paul Revere that he is actually a British spy.

MILITARY: The Continental Congress formally assumes the command and control functions of the Continental army, although General George Washington does most of the actual decision making.

- The Rifle Company, commanded by Captain Michael Doudel of York, Pennsylvania, arrives at Cambridge, Massachusetts. In time, American riflemen become renowned for both superb marksmanship and unrelenting insubordination toward authority.

July 27

MILITARY: Congress founds the Medical Corps under the supervision of Dr. Benjamin Church, a suspected British sympathizer, who acquires the title director general and chief of the Hospital Corps.

- In Dorset, New Hampshire, the Green Mountain Boys nominate Seth Warner to serve as their new lieutenant colonel; the unpopular Ethan Allen is unceremoniously dropped from the roster.

July 29

MILITARY: Congress establishes chaplains, who receive \$20 per month, and also appoints Colonel William Tudor as the first judge advocate general of the Continental army.

July 31

MILITARY: In a sharp skirmish at Nantasket Point, Massachusetts, militiamen under Major Benjamin Tupper attack and disperse a party of Royal Marines, inflicting 12 casualties and taking 33 captives. American losses amount to three.

August 3

MILITARY: General George Washington convenes another war council at Cambridge, Massachusetts, to discuss the dilapidated state of American supplies, especially gunpowder, which are improperly stored under damp conditions and are deteriorating rapidly. They resolve to issue a new appeal to the states for fresh supplies.

NAVAL: A flotilla of American armed galleys under Lieutenant Colonel Benjamin Tupper engages the British frigates HMS *Rose* and *Phoenix* on the Hudson River. The latter vessel sustains serious damage and retreats while the Americans lose four dead and 14 wounded.

August 6

MILITARY: The Virginia Convention appoints Patrick Henry colonel of the 1st Regiment of state militia. However, he will prove completely unsuited for military life and quickly return to politics.

August 8

MILITARY: Captain Daniel Morgan's rifle company ambles into Cambridge, Massachusetts, from Virginia. As a rule, the riflemen are crack shots and notoriously belligerent toward military authority and discipline. Their tenure outside Boston is marked by mutiny and discontent.

August 14

MILITARY: Major John Brown completes a major reconnaissance mission into Canada and reports back to General Philip J. Schuyler at Fort Ticonderoga. Brown declares that the inhabitants are neutral toward the Revolution, while the strategic post of Saint Johns is only lightly garrisoned. Based on this information, Schuyler is encouraged to launch an invasion.

- Thomas Mifflin gains appointment as the first quartermaster general with responsibility for the camps, transportation, troop movements, and purely logistical matters. However, the special needs of artillery logistics are to be handled by an independent commissary of artillery.

August 24

MILITARY: Captain John Lamb and 60 men successfully capture the New York City battery and haul off the cannon despite the presence of the 64-gun HMS *Asia* anchored offshore. When the British send a barge to investigate, they are fired upon and repelled with the loss of a man. The *Asia* consequently unleashes a broadside again the battery, triggering a mass exodus from the city.

MARINES: The sloop *Hannah*, part of General George Washington's "fleet," goes to sea with several Continental soldiers on board serving as marines.

August 26

MILITARY: General John Sullivan dispatches 1,200 men to build fortifications on Ploughed Hill, Boston, from which American artillery can range the harbor. But as Sullivan completes his task, he is in turn bombarded by two British floating batteries. In the exchange that follows, one of the batteries is sunk by American fire while Sullivan incurs three killed and two wounded.

NAVAL: The Rhode Island legislature directs its delegates at the Continental Congress to propose construction of a new Continental navy.

August 28

MILITARY: Brigadier General Richard Montgomery leads 1,200 men from Fort Ticonderoga, New York, on a fateful campaign into Canada. He does so in the absence of his superior, General Philip J. Schuyler, who is incapacitated by illness. Montgomery is especially eager to take advantage of the reputed ill will the inhabitants harbor toward Great Britain. The men will embark at Île-aux-Noix, Quebec, and row northward.

NAVAL: A colonial flotilla, including the armed sloop *Enterprise*, transports 1,000 militia for an amphibious descent down the St. Lawrence River in an expedition against St. Johns, Lower Canada.

August 30

MILITARY: An ailing general Philip J. Schuyler approves General Richard Montgomery's decision to invade Canada and will eventually head north with an additional 500 men to join him.

NAVAL: HMS *Rose* bombards Stonington, Connecticut, for repelling a foraging party, killing two citizens.

September 2

NAVAL: General George Washington charts the schooner *Hannah* of Beverly, Massachusetts, to attack British transports and shipping off Boston. This vessel,

commanded by army officer Nicholas Broughton, is considered the first American warship—and the birth of “Washington’s Navy.”

September 5

MILITARY: American forces under General Philip J. Schuyler assemble at Île-aux-Noix, Quebec, before proceeding down the Richelieu River to Saint Johns, whose defenders consist of 200 British soldiers and some Indians under Major Charles Preston. Having debarked near the fort, an American party is ambushed by Indians, suffering eight dead and nine wounded to a British loss of five dead and five wounded. Discouraged, Schuyler withdraws to Île-aux-Noix for the evening.

- In a major military development, Colonel Benedict Arnold of Connecticut sails from Newburyport, Massachusetts, with 1,054 men and makes for the Kennebec River. Once ashore, he intends to mount an overland campaign through the Maine wilderness that will bring him to the very gates of Quebec City. This mission is undertaken without the prior knowledge or approval of Congress, with a bare minimum of supplies, and inadequate knowledge of the terrain to be surmounted. Arnold’s fabled trek will last 45 days and cover 350 miles—twice as long as anticipated.

NAVAL: The captured fishing schooner *Hannah*, now outfitted with four small cannon, is pressed into service under army officer Captain John Broughton. He is ordered to blockade British forces in Boston; this is also the first warship of the embryonic Continental navy.

September 10

MILITARY: Ailing general Philip J. Schuyler makes another bungled advance against the British garrison at Saint Johns, Quebec, this time at night, and the effort fails when several American columns begin firing at each other in the dark. Schuyler then quits the field, turns operations over to General Richard Montgomery, and departs for New York to convalesce.

- Disgruntled riflemen in the camp outside Boston mutiny at Prospect Hill after one of their number is arrested. General George Washington orders a battalion of 500 men to surround the rebels and march them back to camp, escorted by an additional three regiments. At length, 33 men are court-martialed and fined.

NAVAL: HMS *Nautilus*, grounded off Beverly, Massachusetts, while chasing an American schooner, is subsequently fired on by militia units. The ship eventually frees itself and escapes with several wounded.

September 11

MILITARY: Outside Boston, an increasingly impatient General George Washington convenes another war council to discuss the possibility of carrying the city by a coup de main. His officers, weighing the shabby condition of the army, come down against the plan, and it is dropped for the time being.

September 15

MILITARY: South Carolina militia seize Fort Johnson in Charleston, bringing control of that strategic harbor into American hands. While there, they unfurl an

early American flag consisting of a dark blue background with a white crescent in the upper left corner and the word *Liberty* emblazoned across the flag in white letters. William Campbell, the royal governor, concludes his position is hopeless and hastily retreats to the safety of HMS *Tamar* offshore.

September 16

MILITARY: At Île-aux-Noix, Quebec, General Richard Montgomery's army is reinforced by the arrival of Lieutenant Seth Warner's battalion. The Americans now possess 2,000 weather-beaten men while the British garrison at Saint Johns has been brought up to 500 soldiers. Undeterred, Montgomery elects to commence formal siege operations once Schuyler returns to New York.

September 18

MILITARY: General Richard Montgomery works to cut off the Richelieu River while besieging the British garrison at Saint Johns, Canada. Meanwhile, Major John Brown and 135 Americans ambush a British supply train near Fort Chambly, Quebec. Brown is subsequently reinforced by an additional 500 men under Colonel Timothy Bedel, who helps thwart a British effort to recapture the wagons. General Richard Montgomery deploys 350 men on the Richelieu River to interdict HMS *Royal Savage* from entering Lake Champlain. He then advances his siege of Saint Johns, Quebec, whose fall will open up the road to Montreal.

NAVAL: At Boston, Admiral Samuel Graves orders all merchant vessels searched for flint, a quartz stone used as ballast, which, if found, is to be thrown overboard. Through this expedient, he hopes to deny any possible source of musket flints to the Americans. Graves also learns that he is to be replaced as commander in North America at the end of the year.

September 23

MILITARY: The American expedition under Colonel Benedict Arnold departs Gardiner, Maine, and begins advancing through the wilderness in three divisions, each separated by a one-day interval.

September 25

MILITARY: General Richard Montgomery dispatches Colonel Ethan Allen to Chambly, Quebec, to recruit Canadian volunteers, but while returning Allen encounters the force of Major John Brown. Together they decide to launch a two-pronged assault against Montreal with 200 men. However, Governor-General Guy Carleton detects the weakness of Allen's advance and orders 35 soldiers and 200 Canadians under Captain Walter Butler to sortie against them. Allen is overwhelmed and captured along with 40 soldiers in a swift riposte. They suffer a further seven killed to a British total of three slain and two wounded. Allen thus becomes the first significant American captive of the war, and he is transported and detained in England under harsh conditions.

- In Boston, General Thomas Gage, despised by his soldiers for his lethargic movements and derided as "Granny," is relieved of command and ordered back to Britain for "consultations." He is succeeded by the more aggressive and immensely popular General William "Billy" Howe.

October 3

NAVAL: Rhode Island delegates at the Continental Congress in Philadelphia formally request the construction and funding of a new Continental navy.

October 4

MILITARY: Dr. Benjamin Church, head of the army medical corps, is court-martialed for treason, having corresponded with the enemy, and dismissed. He is the first American soldier so condemned for acting against the United States. However, General George Washington refers the matter of punishment to the Continental Congress. Church is replaced by Dr. John Morgan, an enterprising physician who advocates widespread inoculation of troops against smallpox.

October 5

MARINES: The Continental Congress authorizes General George Washington to recruit marines and sailors for his small fleet of warships off Boston. This is the first instance of “marines” being specifically mentioned by an official body.

October 6

MILITARY: The hard-slogging Canadian expedition of Colonel Benedict Arnold reaches Norridgewock Falls on the Kennebec River, whereupon the men have to portage their vessels and equipment.

October 7

NAVAL: Admiral Thomas Graves authorizes British naval vessels to conduct punitive raids along the New England coast to dissuade privateering operations. A small force under Captain James Wallace then arrives off Bristol, Rhode Island, and bombards the town until it agrees to surrender 40 sheep. The British depart without further incident; two civilian are killed in the action. Such raids lead to increasing antipathy for the Crown and any Loyalist sympathizers in the region.

October 8

MILITARY: A council of general officers declares that African Americans, neither free nor slave, will not be allowed to join the Continental army. Acute manpower shortages will force this policy to change in time.

October 10

NAVAL: Off Beverly, Massachusetts, the American vessel *Hannah* is run aground by the sloop HMS *Nautilus*; it is saved by nearby townspeople manning cannon

October 12

MILITARY: In light of ongoing fiscal problems with Congress, General George Washington cautions members not to reduce soldiers’ pay lest they trigger an angry backlash.

October 13

NAVAL: In light of the push for increased naval resources, Congress authorizes Colonel John Glover, a former sailor, to convert several transports into armed warships. It also approves construction of two formal warships, the nation’s first such vessels. A marine committee consisting of Silas Deane, Christopher Gadsden, and John Langdon is then created to oversee such matters. The U.S. Navy considers this date to be its birthday.

October 17

MILITARY: A force of 625 men, including 350 newly recruited Canadians under Colonels James Livingston and Timothy Bedel, paddles down the St. Lawrence River, bypasses Saint Johns, and invests Fort Chambly, Quebec.

NAVAL: Royal Navy warships HMS *Canceaux* and *Halifax* under Captain Henry Mowat drop anchor off Falmouth (Portland), Maine, demanding the town's surrender. When the inhabitants refuse, Mowat commences bombarding the town for nine hours while landing parties go ashore to further the destruction. By the time Mowat departs, he has destroyed 400 buildings and 15 vessels. It is sweet revenge to that officer, previously captured and held by the town's inhabitants until he escaped. The sheer extent of the destruction enrages New Englanders and further inflames resentment against Britain.

October 18

MILITARY: An American naval unit, assisted by Canadian dissenters, captures the town of Chambly, Quebec, along with 88 prisoners from the 7th Foot and several tons of gunpowder. This victory severs the supply line to the strategic British post of Saint Johns, then besieged by forces under General Richard Montgomery.

October 23

POLITICS: In Philadelphia, the Second Continental Congress expressly forbids African Americans from serving in the Continental army.

October 24–25

MILITARY: British naval forces directed by Governor John Murray, Lord Dunmore, arrives off Norfolk, Virginia, and demand its surrender. However, several units of American riflemen under Colonel William Woodford drive the vessels off, capturing two that run aground.

October 25

MILITARY: The Canadian expedition of Colonel Benedict Arnold struggles to surmount a flooded countryside and freezing weather in the vicinity of Dead River. He also loses the 300-man division of Colonel Roger Enos when they vote to return home.

October 26

MILITARY: General David Wooster reinforces the siege of Saint Johns with 325 Connecticut troops and is soon joined by Major Barnabas Tuthill with an additional 225 New Yorkers.

October 27

NAVAL: A congressional committee recommends the construction or purchase of five frigates of 32 guns, five of 28 guns, and three of 24 guns.

October 28

MILITARY: The expedition of Colonel Benedict Arnold, having endured incredible hardship and a spate of desertions, reaches the divide between the Atlantic and St. Lawrence watersheds. He resolves to press ahead even though his men are reduced to eating dogs and shoe leather.

- General William Howe issues a proclamation forbidding all Boston inhabitants from leaving the city under penalty of death. Henceforth, all men of military age are required to enroll in the local militia for the city's defense.

October 30

MILITARY: Governor-General Guy Carleton, attempting to lift the siege of Saint Johns, pushes 800 men and Indians across the St. Lawrence River at Longueuil, Quebec, where they are engaged by the Green Mountain Boys under Lieutenant Colonel Seth Warner. The attack collapses in the face of accurate musketry; an attempted flanking movement is also thwarted, so Carleton withdraws.

- The Canadian expedition of Colonel Benedict Arnold reaches Sertigan, Quebec, where supplies are purchased for the hungry, half-frozen soldiers.

NAVAL: After some prodding, Congress authorizes construction of two additional frigates, of 36 and of 29 guns, for a total of four vessels. The naval committee is also expanded to include John Adams, Joseph Hewes, Stephen Hopkins, and Richard Henry Lee.

November 2

MILITARY: General Richard Montgomery gains a significant victory by capturing the British garrison of Major Charles Preston at Saint Johns following a grueling siege of 55 days. He seizes 41 cannon and 500 captives, among whom is a youthful Captain John André, later to become a celebrated spy: Montgomery immediately paroles them rather than use up his already scanty food stocks. The advance to Montreal is now open, but the delays incurred at Saint Johns have wasted two months of good weather; the Americans must now conduct operations in the dead of winter.

NAVAL: The naval committee votes to purchase, arm, and rename eight merchant vessels as the core of the new Continental navy. They are the *Alfred*, 24 guns; *Columbus*, 18 guns; *Andrew Doria*, 14 guns; *Cabot*, 14 guns; *Providence*, 12 guns; *Hornet*, 10 guns; and *Fly*, eight guns.

November 4–8

MILITARY: General George Washington, his army about to disband due to expiring enlistments, convinces Congress to extend the period of military service to one year. Congress also sets about reorganizing the Continental army, decreeing that as of January 1, 1776, it will consist of 26 infantry regiments of eight companies each, for a total complement of 728 rank and file. It also prescribes the first official military uniform, consisting of a brown coat with various regiments denoted by collar and cuff colors. Unit esprit de corps is further enhanced by granting each regiment its own distinct set of colors (flags). Total strength is theoretically set at 20,372 soldiers, but the Americans will be lucky to maintain half that in the field at any given time.

November 5

MILITARY: Disregarding the onset of winter, General Richard Montgomery hurriedly presses onward from Saint Johns and marches for Montreal, Quebec.

NAVAL: Congress appoints Esek Hopkins of Rhode Island as first commander in chief of the Continental navy, or commodore. A gruff, imperious, and capable sailor, he apparently received the appointment through the influence of his brother Stephen Hopkins, who sits on the naval committee.

November 7

MILITARY: The Continental Congress amends the articles of war to include treason as a capital offense, punishable by death.

November 9

MILITARY: Colonel Benedict Arnold concludes his remarkable, 350-mile wilderness trek by reaching the St. Lawrence River opposite Quebec City. His command is reduced to 675 men out of the initial 1,000.

- General William Howe is directed by Secretary of the Colonies William Legge, Lord Dartmouth, to consider evacuating Boston to commence offensive operations against New York. Howe, lacking sufficient naval transports to handle both his army and thousands of Loyalists who wish to leave, decides to remain where he is.
- Riflemen under Colonel William Thompson repulse a 500-man British foraging party at Phipp's Farm on Lechmere Point, Boston. The British lose two killed for two Americans wounded but manage to steal 10 cows. The Patriots subsequently mount a battery at this point.

November 10

MARINES: Congress approves creation of two battalions of Continental marines to supplant its embryonic naval force; this is considered the birthday of the U.S. Marine Corps.

November 11

MILITARY: Governor-General Guy Carleton is hotly pursued by American forces at Montreal and hurriedly withdraws down the St. Lawrence River in a small flotilla. Once at the citadel of Quebec, he intends to make a last stand in Canada.

NAVAL: Captain Simon Tuft and the ship *Defiance*, blockading Hog Point near Charleston, South Carolina, are attacked by the British vessels HMS *Tamer* and *Cherokee*. He nonetheless manages to scuttle four hulks in the channel without casualties.

November 12

MILITARY: General George Washington, as commander in chief of the Continental army, prohibits recruiting officers from enlisting African Americans into the army, be they free or slave.

November 13

MILITARY: American forces vigorously led by General Richard Montgomery advance and receive Montreal's surrender. Two small British vessels are subsequently captured on the St. Lawrence River. Simultaneously, Colonel Benedict Arnold's Canadian expedition prepares to cross the St. Lawrence River and assemble outside Quebec in an attempt to cow the defenders into submission.

November 14

MILITARY: Loyalist forces under Governor John Murray, Lord Dunmore, advance from Norfolk to Kemp's Landing on the Elizabeth River and sweep aside a smaller force of riflemen under Colonel William Woodford. The Americans withdraw after losing nine killed and 14 wounded.

November 15

MILITARY: A ragged force of 700 men under Colonel Benedict Arnold finally crosses the St. Lawrence River, assembles on the Plains of Abraham where General James Wolfe stood with six times that number in 1759, and tries to bluff the 1,200-man garrison under Lieutenant Colonel Allan MacLean into surrendering. He refuses and Arnold concludes he needs several cannon and a minimum of 2,000 men to capture the city. The moment of decision is at hand, but the Americans have arrived with too little, too late.

November 17

MILITARY: Colonel Henry Knox succeeds Colonel Richard Gridley as commander of the new Continental Regiment of Artillery, although the latter continues on as chief engineer. More significantly, Knox is dispatched from Boston to Fort Ticonderoga, New York, to retrieve all captured British ordnance stored there.

November 18

MILITARY: Despite attempts at arranging a truce, warfare commences in the South Carolina backwoods when a force of 1,800 Loyalists under Colonel Patrick Cunningham invests the 600 Patriots of Colonel Andrew Williamson at Fort Ninety Six. The contestants spend the next two days pot-shotting each other, with few casualties resulting.

November 19

MILITARY: Americans under Colonel Benedict Arnold withdraw 20 miles from Quebec to avoid a possible sortie by Lieutenant Colonel Allan MacLean. Arnold establishes a new camp at Point aux Trembles and awaits developments as MacLean continues strengthening his defenses.

- The British flotilla under Governor-General Guy Carleton retreats down the St. Lawrence River as far as Sorel, where it is suddenly bombarded by American artillery under Colonel John Brown. Many vessels are either sunk or captured, and Carleton himself makes a hairbreadth escape. However, General Richard Prescott and 145 British soldiers pass into captivity.

MARINES: At Boston, Massachusetts, General George Washington complains to the Continental Congress that supplying soldiers to the newly authorized marine battalions would severely disrupt his Continental army formations.

November 21

MILITARY: Patriot militiamen under Colonel Andrew Williams, having nearly exhausted their gunpowder, conclude a truce with a larger Loyalist force at Fort Ninety Six, South Carolina. Henceforth, the Patriots are to destroy their fortification, release all captives, and return to their homes unmolested. A 20-day cease-fire also ensues to permit the leaders of both factions to confer in Charleston. Of little consequence militarily, the “siege” of Fort Ninety Six marks the beginning of a protracted civil war throughout the South.

November 25

MILITARY: Colonel William Woodford and 300 Virginia militiamen are dispatched toward Suffolk to garrison colonial supplies gathered there. This movement induces Governor John Murray, Lord Dunmore, to march infantrymen who will try to intercept the Americans near Great Bridge on the Elizabeth River.

NAVAL: The Continental Congress authorizes privateering against English shipping by issuing letters of marque and urges creation of admiralty courts in individual colonies to allocate prize money. By 1783 privateers will have accounted for 600 British vessels—three times that taken by the Continental navy.

November 27

NAVAL: Captain John Manley, commanding the armed schooner *Lee*, captures the British ordnance brig HMS *Nancy* off Cape Ann, Massachusetts. The vessel is heavily laden with 2,000 stands of muskets, 30 tons of shot, and a 2,700-pound mortar, which the new owners dub “Congress.” The rich haul is immediately dispatched to the army of General George Washington outside Boston.

November 28

NAVAL: John Adams directs the naval committee to adopt regulations for governing the nascent Continental navy, in effect formally creating that force. This ordinance, entitled *Rules for the Regulation of the Navy of the United Colonies of North America*, prescribes rates of pay, rations, discipline, and division of prize money.

MARINES: Captain Samuel Nicholas, a tavern keeper from Philadelphia, is appointed the first commissioned officer of the Continental marine corps. As senior officer, he is also considered the first commandant.

November 29

MILITARY: A body of American riflemen under Colonel William Woodford, apprised that a large British force under Governor John Murray, Lord Dunmore, is approaching, assumes a strong defensive position at Great Bridge on a bank of the Elizabeth River. In this manner, Woodford hopes he can thwart possible British capture of Suffolk.

December 1

MILITARY: General Richard Montgomery departs Montreal with a small force of 330 men, all he can spare, and sails down the St. Lawrence River to Quebec. There he intends to join forces with Colonel Benedict Arnold’s depleted force at Point aux Trembles and begin siege operations. Both commanders are under an exacting timetable as expiring enlistments, the onset of winter, and endemic supply shortages are all working against them.

December 3

NAVAL: Lieutenant John Paul Jones hoists the 13-stripe Grand Union flag over the converted merchant vessel *Alfred* in Philadelphia. This represents the first time that an American standard has been unfurled atop a warship and is another sign that the Continental navy is slowly acquiring shape.

December 5

MILITARY: After a hard ride, Colonel Henry Knox arrives at Fort Ticonderoga and makes preparations to move an entire artillery train overland in the dead of winter. In military terms, it is an unprecedented feat.

December 7

MILITARY: General Richard Montgomery is promoted by the Continental Congress to major general, although he never lives to accept it.

December 8

MILITARY: Having left Montreal in charge of General David Wooster, General Richard Montgomery arrives with a white flag at Quebec and demands the city's immediate surrender. Governor-General Guy Carleton, surveying the ragtag forces before him, promptly declines the request, at which point the Americans commence an ineffectual bombardment of the town. Carleton's strategy is to allow harsh winter conditions to eviscerate the Americans while awaiting his own reinforcements from Europe.

- Colonel Henry Knox departs Fort Ticonderoga, New York, and begins a perilous midwinter transit back to Boston. At this time, his artillery train consists of 40 sleds drawn by 80 oxen.

December 9

MILITARY: A British force of 600 Loyalists and 200 regulars under Governor John Murray, Lord Dunmore, confronts Colonel William Woodford's 300 American riflemen safely ensconced behind Great Bridge on the Elizabeth River, Virginia. Rather than outflank his adversary, Dunmore impatiently orders Captain Samuel Leslie to storm the bridge head on with his grenadier company. Woodford orders his men to lie low, as if the position is undefended, and the British rush up only to receive sudden and accurate fire from concealed troops. Heavily repulsed, Dunmore orders a second charge, which is also defeated, with a loss of 13 dead and 49 wounded to one American injured. As the British are in the act of withdrawing, Woodford suddenly sorties across the bridge, trapping Dunmore behind some fortifications. The British manage to escape under cover of darkness and head with all speed for Norfolk.

December 10

MILITARY: Expiring enlistments induce many Connecticut soldiers to leave Boston, underscoring a problem that will vex the Continental army throughout the war.

December 13

MILITARY: Colonel William Woodford and his riflemen, flush with success after the victory at Great Bridge, occupy Norfolk, Virginia, and force Governor John Murray, Lord Dunmore, to join his fleet offshore.

December 14

NAVAL: Congress creates a marine committee of 13 members, with one seat for each colony, to augment the naval committee. This body is responsible for acquiring and outfitting all warships authorized by the latter. Congress, acting upon a report issued by the committee, debates construction of 13 frigate-class vessels, although most will be either captured or destroyed.

December 22

MILITARY: A force of 1,400 South Carolina militia under Colonels Richard Richardson, Thomas Polk, Alex Martin, and William Thompson gathers to help quell a growing Loyalist movement. This force surprises and annihilates a smaller Loyalist detachment at Great Cane Brake on the Reedy River, killing six and taking 130 prisoners. Several of the state's most wanted Loyalist leaders are among those apprehended.

NAVAL: The Continental Congress formally authorizes construction of five additional 32-gun frigates, five 28-gun frigates, and three 24-gun frigates. The vessels are to be christened *Hancock*, *Randolph*, *Raleigh*, *Warren*, *Washington*, *Congress*, *Effingham*, *Providence*, *Trumbull*, *Virginia*, *Boston*, *Delaware*, and *Montgomery*. On the balance sheet, this pits a force of 14 vessels and 332 guns against a Royal Navy establishment possessing 89 warships and 2,756 cannon.

- To provide the Continental navy with its initial cadre, Dudley Saltonstall, Abraham Whipple, John B. Hopkins, and Nicholas Biddle are all commissioned captains by Congress. Captain Esek Hopkins of Rhode Island also becomes the first commander in chief of the Continental navy.

December 24

NAVAL: The American schooner *Warren*, cruising the waters off Cape Ann, Massachusetts, apprehends the British brig *Sally*. Its cargo of 153 casks of wine is delivered to General George Washington as a Christmas gift.

December 30

MILITARY: In a desperate gamble, General Richard Montgomery and Colonel Benedict Arnold lay out a plan for attacking Quebec, then garrisoned by 1,800 British troops and militia under Governor-General Guy Carleton. It is a two-pronged affair, with Arnold taking 600 men along the banks of the St. Charles River while Montgomery leads 300 from Cape Diamond down a narrow path south of the city. At a given signal, both columns will simultaneously attack and try to capture the Lower Town, believed to be lightly defended.

December 31

MILITARY: Outnumbered, short on supplies, and faced with expiring enlistments, General Richard Montgomery and Colonel Benedict Arnold launch a desperate attack on the 1,800-man garrison of Governor-General Guy Carleton during a howling blizzard. Montgomery personally leads the charge against a fortified position and is among the first killed by enemy fire; he is the first American general to die in combat. Arnold's 600-man column enjoys better success and overruns several enemy positions, but he is wounded in the leg and evacuated. His successor, Major Daniel Morgan, continues attacking the barricades and enjoys minor success but is ultimately surrounded and forced to surrender. The Americans sustain 30 dead, 42 injured, and 425 captured to a British tally of only five killed and 13 wounded. Arnold then gathers up his surviving soldiers and reestablishes a loose siege of the city.

- General George Washington, faced with expiring enlistments in the Continental army, reverses a long-standing policy and allows recruiting officers to sign up any free African Americans willing to serve. However, he still opposes using slaves as soldiers.

1776

January 1

MILITARY: General David Wooster arrives in Canada to assume temporary command of American forces from Colonel Benedict Arnold.

- At Cambridge, Massachusetts, General George Washington unfurls a new flag with 13 alternating red and white stripes and declares the beginning of a “new army.” The Continental army is also reorganized at this time into three divisions and six brigades, which are composed of the 27 Continental regiments and various state militia formations. Despite the hardships imposed on the military, the enlistment term is allowed to remain for one year only.

NAVAL: A fleet of small British warships under Governor John Murray, Lord Dunmore, anchors off Norfolk, Virginia, and demands its surrender. When the town refuses, he commences a prolonged bombardment and sends out landing parties to complete the destruction. Both sides suffer six killed or wounded.

January 2

MILITARY: By the time that fires are contained, 54 houses are burned by British and Loyalist forces at Norfolk, Virginia. The local committee of safety orders the property of known Loyalists burned as well, and a total of 860 structures is ultimately consumed.

January 3

MILITARY: Secretary of State for the Colonies William Legge, Lord Dartmouth, instructs Royal Governor Josiah Martin of North Carolina to begin raising an army of 20,000 Loyalists, especially from among that colony’s large population of Scottish highlanders. This force is to rendezvous at Brunswick no later than February 15 and prepare to cooperate with a British naval expedition being dispatched to the coast.

January 4

MILITARY: British soldiers uncover the remains of General Richard Montgomery, and he is subsequently interred with full military honors at Quebec. His body reposes in Canada until 1818, when it is reburied at St. Paul’s Church, New York.

- General George Washington writes the Continental Congress and assures them he will attack Boston as soon as the opportunity arises.

January 5

NAVAL: Commodore Esek Hopkins of the Continental navy is instructed by the Continental Congress to depart Philadelphia whenever practicable and sweep the Virginia and Carolina coasts of marauding British vessels. If this proves impractical, he is given discretionary authority to attack the Bahamas instead.

January 6

MILITARY: General William Howe, eager to rid himself of his annoying subordinate, General Henry Clinton, dispatches him on an amphibious expedition from Boston to Cape Fear, North Carolina, to cooperate with a large Loyalist force under Governor Josiah Martin. Once there, he will be joined by another squad-

Richard Montgomery was the first American general to die for his country. (*Independence National Historical Park*)

ron sailing from Cork, Ireland, under Commodore Sir Peter Parker and General Charles Cornwallis. It is anticipated that their combined presence will spark a Loyalist resurgence throughout the region.

- In New York, 19-year-old Alexander Hamilton founds the Provincial Company of Artillery of the Colony of New York with himself as its captain. This will remain the oldest, most continuous unit of the U.S. Army and survives today as Battery D, 1st Battalion, 5th Field Artillery, with the motto “Faithful and True.”

NAVAL: Navy medicine commences this day after the Continental Congress authorizes the appointment of surgeons and surgeon’s mates.

January 8

MILITARY: A raid by Major Thomas Knowlton of Connecticut against Charlestown, Massachusetts, interrupts a performance of General John Burgoyne’s farce *The Blockade of Boston*. The audience, assuming this is part of the play, bursts into laughter, but the Americans subsequently take five prisoners and burn several houses.

January 9

MILITARY: At Cambridge, Massachusetts, the strength of the Continental army has dwindled to 5,582 rank and file owing to death, desertion, and expiring enlistments. General George Washington writes to the governors of the New England colonies for an infusion of 60-day militiamen to bolster his troop strength.

January 10

MILITARY: In recognition for his heroism in Canada, Congress promotes the hard-charging Benedict Arnold to brigadier general. However, issues of rank and seniority will dog Arnold throughout his distinguished military career.

- Governor Josiah Martin of North Carolina, still on board HMS *Scorpion*, urges Loyalists to gather at Brunswick, south of Wilmington, and await a large British naval expedition. Both the governor and the British government harbor unrealistic expectations of raising and equipping a 20,000-man force.

January 12

NAVAL: British forces under Captain James Wallace engage Rhode Island militia in a three-hour contest for possession of Patience, Hope, and Prudence Islands in Narragansett Bay. The British sustain three losses, then withdraw.

January 15

NAVAL: Volunteers out of Newbury, Massachusetts, man three whale boats and capture a British provisions ship.

January 16

MILITARY: Congress, acting upon the advice of General George Washington, votes to allow the enlistment of free African Americans into the Continental army. This is done less for altruistic reasons than to stop the hemorrhaging of troop strength due to expiring enlistments.

January 17

MILITARY: General Philip J. Schuyler and 3,000 New York militiamen advance upon Johnson Hall, home of Sir John Johnson. Johnson has amassed a force

of 700 Loyalists and Iroquois Indians, but surrenders without a shot. Schuyler's quick action eliminates any Loyalist threat emanating from the Albany region.

NAVAL: For the first time, Commodore Esek Hopkins sails his eight-ship flotilla from Philadelphia and down the ice-choked Delaware River, although he is prevented from getting to sea. Captain Samuel Tucker is also commissioned and appointed to command the frigate *Franklin*.

January 19

MILITARY: The Continental Congress votes to send reinforcements to Canada with troops raised from New Hampshire, Connecticut, Pennsylvania, and New Jersey. Colonel Moses Hazen is authorized to raise a regiment of Canadians in Canada.

- Colonel John Haslet is appointed head of the newly raised Delaware Continentals, one of the few American formations to be equipped with bayonets.

January 20

NAVAL: General Henry Clinton departs Boston with 1,200 men on an amphibious expedition to Cape Fear, North Carolina, to join Royal Governor Josiah Martin and provoke a Loyalist uprising. Once reinforced by the squadron under Commodore Sir Peter Parker and General Charles Cornwallis, his next task will be to seize Wilmington as a base of operations.

January 23

NAVAL: The committee of safety in Elizabethtown, New Jersey, is informed that a British supply vessel, HMS *Blue Mountain Valley*, is anchored off the coast. Colonels Williams Alexander and Elias Dayton are then directed to take four boatloads of volunteers 40 miles out from Sandy Hook, New Jersey, and capture the intruder. The unsuspecting British, assuming the approaching craft are fishermen, are quickly subdued and brought into port.

January 24

MILITARY: Colonel Henry Knox arduously transports 44 cannon and 16 mortars from Fort Ticonderoga, New York, to American forces at Cambridge, Massachusetts. He accomplishes this remarkable trek across 300 miles of wilderness in the dead of winter, and his arrival decisively tips the military equation at Boston in favor of the Americans.

January 25

NAVAL: The schooner *Hancock* seizes two British transports off Plymouth Harbor, Massachusetts, and subsequently fends off a British schooner attempting to recapture them.

January 26

MILITARY: Father Louis Eustace Lotbiniere is appointed the first Roman Catholic chaplain in the Continental army and is assigned to the Canadian regiment being raised by Brigadier General Benedict Arnold.

NAVAL: Admiral Molyneux Shuldham arrives at Boston to replace the tottering Admiral Samuel Graves.

January 30

NAVAL: Captain John Manley runs his schooner *Hancock* aground off Plymouth, Massachusetts, to thwart the deeper-draft British brig HMS *Hope* from capturing it. The vessel is refloated and back in service within a few days.

February 4

MILITARY: Continental army forces arrives at New York under General Henry Lee, just as General Henry Clinton's amphibious expedition anchors in the harbor.

February 6

MILITARY: Colonel Robert Howe finishes burning the remaining buildings of Norfolk, Virginia, to deny them to the enemy. This once-thriving port has now been reduced to ashes.

February 15

MILITARY: Lieutenant Colonel Donald MacDonald musters 1,400 Loyalist highlanders at Cross Creek, North Carolina, although only one-third possess fire-arms. He nonetheless begins marching to the coast to join British forces expected there.

February 16

MILITARY: In Cambridge, General George Washington worries over prolonged inactivity and suggests a large-scale attack across the frozen bay with 16,000 men. He then defers to his officers when they suggest that seizing strategic Dorchester Heights and planting Colonel Henry Knox's newly arrived cannon is more expedient. Such a move is calculated to force British general William Howe to either come out and fight in the open or abandon the city altogether.

February 17

NAVAL: Commodore Esek Hopkins directs his small armada, consisting of the frigates *Alfred* and *Columbus*, the brigs *Cabot* and *Andrew Doria*, the sloops *Providence* and *Hornet*, and the schooners *Fly* and *Wasp* into open water. This is the first sortie in strength by the Continental navy on open water, and although Hopkins has been instructed by Congress to scour the southern coastline for British warships, he uses a discretionary clause in his orders to attack Nassau in the Bahamas instead.

February 18

MILITARY: A Loyalist force of 1,500 men under Lieutenant Colonel Donald MacDonald, en route to Brunswick, North Carolina, confronts Patriot forces dug in behind Rockfish Creek. The Loyalists then employ boats to cross upstream and continue on their march.

February 23

MILITARY: Loyalists under Lieutenant Colonel Donald MacDonald advance toward Brunswick, North Carolina, but are blocked by Patriot militia under Richard Caswell at Corbit's Ferry. MacDonald then builds a temporary bridge spanning the Black River and continues on his way. At this juncture, the 80-year-old MacDonald is taken ill and replaced by Captain Alexander Macleod.

February 27

MILITARY: The Continental Congress establishes the Northern, Middle, and Southern Departments for the Continental army.

- A force of 1,900 Americans under Colonels James Moore, Alexander Lillington, John Ashe, and Richard Caswell confronts 1,500 Loyalist Highlanders under Captain Alexander Macleod at Moore's Creek Bridge, North Carolina. Inexplicably, Macleod storms the bridge in full view of the defenders, only to discover that the planks have been removed and the poles greased. The attack flounders, Macleod is killed along with 30 soldiers, and 850 prisoners are secured. The Americans suffer one dead and one injured in the three-minute affair. This reverse thwarts British plans for using nearby Wilmington as a base of operations and also thwarts Governor Josiah Martin's quest to reestablish royal authority.

March 1

NAVAL: The American squadron of Commodore Esek Hopkins rendezvouses off the Bahamian island of Abaco prior to launching a coordinated attack on the capital of New Providence (Nassau). Of the eight vessels that departed Philadelphia in January, the schooners *Fly* and *Wasp* sustain damage in a collision and limp home.

March 2

MILITARY: General George Washington begins enacting a plan to lure British troops out of Boston and then storm the city by a surprise amphibious assault. To accomplish this, American artillery provides a nighttime diversion by bombarding the city from Cobble Hill, Lechmere Point, and Roxbury, while troops simultaneously prepare to occupy strategic Dorchester Heights. British counterfire kills six and wounds five.

March 3

NAVAL: Royal Governor James Wright of Georgia attacks Savannah with naval reinforcements under Commodore Andrew Barkley; 11 merchant vessels are seized in the harbor. General Lachlan McIntosh, shorthanded and tasked with defending the city, does nothing to stop these depredations. However, the marauders are subsequently driven from their base camp on Hutchinson's Island by fire boats launched in their direction. Both sides sustain six casualties.

- The American naval squadron under Commodore Esek Hopkins attacks and captures New Providence on Nassau, the Bahamas, with sailors and 200 marines under Captain Samuel Nicholas. Governor Montfort Browne surrenders after a token defense at Fort Montagu, and no losses are incurred by either side. Hopkins lingers there two weeks, loading 88 cannon, 15 mortars, and quantities of gunpowder. This is the Continental navy's first planned offensive, and all goes smoothly. However, the commodore's dilatory pace of sailing has enabled the governor to remove 150 casks of gunpowder beforehand.

MARINES: A battalion of Continental marines wades ashore on New Providence Island, Bahamas, under the direction of Commodore Esek Hopkins, concluding its first amphibious operation.

March 4

MILITARY: Outside Boston, General John Thomas and engineer Colonel Richard Gridley lead 2,000 men on a nighttime foray to seize Dorchester Heights, concealed by an intense artillery bombardment that also masks the noise of their digging. The men press on diligently, and by daybreak, the British are amazed to behold a complete line of breastworks and artillery emplacements that has literally sprung up overnight. Admiral Molyneux Shuldham, commanding the Royal Navy at Boston, advises General William Howe to either eliminate the threat to his fleet or evacuate the town completely. Howe initially opts for the former and prepares 2,200 men to storm Castle William, but boisterous weather prevents him from moving. He then decides his position is no longer tenable and begins preparing to evacuate the city.

March 9

MILITARY: British and American artillery engage in a lengthy duel at Nook's Hill, Boston, which drives away unsheltered Continental infantry with five dead.

NAVAL: The Maryland warship *Defense*, assisted by two militia companies, attacks and drives off HMS *Otter* from Chariton Creek, Virginia.

March 12

MILITARY: General George Washington creates the elite Commander-in-Chief's Guard, which consists of four tall, well-behaved soldiers from each of the Continental regiments. These will function as a personal escort and headquarters guard.

NAVAL: The British naval expedition under General Henry Clinton arrives off Cape Fear, North Carolina, and awaits promised reinforcements. Clinton then learns of the recent Loyalist defeat at Moore's Creek and begins recalculating his mission.

March 13

NAVAL: In Philadelphia, the brigantine *Wild Duck* is purchased by the Marine Committee of the Continental Congress and renamed *Lexington* after the opening battle of the Revolutionary War; this is the first of five American naval vessels so christened.

March 17

MILITARY: General William Howe concludes an 11-month siege of Boston by evacuating the town, taking 9,000 troops and 1,000 Loyalists onboard 125 ships. He has reached an understanding with General George Washington not to burn the town, provided his withdrawal is not interfered with. Once the British depart, Boston is jubilantly reoccupied by American soldiers under General Artemas Ward. Washington, meanwhile, anticipates that Howe will switch his attention toward New York City and begins shifting men and materiel to that theater.

NAVAL: The squadron of Commodore Esek Hopkins, laden with booty from its conquest of New Providence (Nassau), departs and sails for home.

March 19

NAVAL: The Continental Congress tables a motion by Samuel Chase that would have permitted attacks on British merchant vessels by the Continental navy. Instead, it encourages the practice of privateering.

March 20

MILITARY: The victorious Continental army savors its first victory by occupying Boston, Massachusetts, without firing a shot. But the Americans warily observe the British fleet, anchored five miles distant at Nantasket Roads, as it pauses to take on fresh water and other supplies.

March 23

NAVAL: The Continental Congress formally authorizes privateering against all British shipping and begins issuing general letters of marque and reprisal.

March 27

NAVAL: The last Royal Navy vessel sails out of sight from Nantasket Roads, five miles below Boston, and heads for Halifax, Nova Scotia. Only a few warships will return to maintain a loose blockade of the port.

April 2

MILITARY: General David Wooster marches from Montreal to Quebec City with reinforcements and supersedes General Benedict Arnold as commander. Arnold, meanwhile, falls off his horse and is evacuated.

April 4

NAVAL: Captain Abraham Whipple of the 20-gun frigate *Columbus* captures the six-gun schooner HMS *Hawke* off Block Island, Rhode Island. This is the first prize actually taken at sea by an official American warship.

April 5

NAVAL: The frigate *Alfred* under Commodore Esek Hopkins seizes the British bomb brig HMS *Bolton* under Lieutenant Edward Sneyd.

April 6

NAVAL: The American naval squadron under Commodore Esek Hopkins engages Captain Tryingham Howe and the Royal Navy's 20-gun frigate HMS *Glasgow* off Block Island, Rhode Island, but fails to capture it after a three-hour running battle. The sloop *Cabot* is severely damaged in the chase and hauls off as *Alfred* succeeds it in the van. Howe continues maneuvering brilliantly and severely damages *Alfred's* steering with a lucky shot. He then skillfully eludes his pursuers, which now include the *Andrew Doria* and *Columbus*, and successfully puts into Newport. Hopkins is subsequently censured for his slovenly performance; the Americans lose 10 killed and 14 wounded to British losses of one killed and three wounded.

MARINES: The first marines to die in combat are killed in the running fight between the Continental vessels *Alfred* and *Cabot* and the British frigate HMS *Glasgow* off Block Island, Rhode Island.

April 7

NAVAL: Captain John Barry, cruising with the 16-gun brig *Lexington* off the Virginia Capes, engages and captures the British sloop HMS *Edward* in a four-hour battle. The Americans lose two killed and two wounded to one Briton dead and one injured. This is the first enemy warship actually taken in a formal ship-to-ship encounter.

April 8

NAVAL: The squadron of Commodore Esek Hopkins concludes its only sortie in strength by anchoring at New London, Connecticut. The force is subsequently broken up and never reconstituted due to a lack of trained manpower—the bulk of sailors prefer sailing on better-paying privateers.

April 9

NAVAL: The American schooner *Wasp* seizes the British brig *Betsey* in Christina Creek, Delaware Bay.

April 13

MILITARY: General George Washington arrives in New York City and begins preparing its defenses. He fears that if the city falls to the British, they can disrupt communications between the northern and southern colonies.

**Barry, John (1745–1803)**

American naval officer

John Barry was born in County Wexford, Ireland, on January 1, 1745, and he went to sea as a cabin boy at the age of 10. After settling in Philadelphia in 1761, he gained prominence as a sea captain and acquired a minor fortune. Once the Revolutionary War commenced in April 1775, Barry donated his vessel *Black Prince* to the nascent Continental navy, where it was converted into the armed brig *Alfred*. Barry himself was commissioned a captain in that force as of March 1776, commanding the brig *Lexington*, and with it he secured the tender HMS *Edward* on April 6, 1776—the first victory on blue water for the United States. He then captained a succession of vessels, including the frigate *Effingham*, which he subsequently scuttled to prevent capture. Barry also found time to lead a gun crew at the Battle of Princeton in January 1777, and he later led a boat expedition into Delaware Bay that netted several British supply vessels. In September 1778, Barry embarked on

the frigate *Raleigh*, but he was cornered by two British warships and driven ashore near

American naval officer John Barry won the first American naval combat victory, on April 6, 1776. (Naval Historical Center)

April 15

NAVAL: The warships *Warren* and *Providence* are launched and commissioned at Providence, Rhode Island.

April 18

NAVAL: The vanguard of Commodore Peter Parker's approaching fleet reaches Cape Fear, North Carolina.

April 21

NAVAL: HMS *Scarborough* drops anchor at Halifax, Nova Scotia, and unloads numerous Loyalist refugees, including former royal governor James Wright of Georgia.

May 1

MILITARY: General John Thomas arrives outside Quebec as the new commander in chief of American forces stationed there. After replacing General Wooster,

Penobscot, Maine. He next served capably while commanding a brig in the Pennsylvania state navy while awaiting a new Continental warship to be built. These were in short supply, and it was not until February 1780 that his friend General Henry Knox used his influence to secure the new frigate *Alliance* for him.

Barry's first voyage on the *Alliance* proved memorable; while conveying diplomats Thomas Paine and John Laurens to France, he captured several privateers and prizes en route. On April 2, 1780, during the return leg of the voyage, Barry was attacked by the British privateers *Minerva* and *Mars* and, through adroit maneuvering, captured both. Another stiff action occurred on May 23, 1780, when the British warships *Atalanta* and *Trepassy* were rowed behind the *Alliance*'s stern in a dead wind and raked it repeatedly. Barry, badly wounded yet tenacious as ever, demanded to be carried topside and, when the wind suddenly sprang up, he captured both his antagonists. In the fall of 1781 he was cho-

sen to convey the marquis de Lafayette to France, then provide escort to a merchantman carrying millions of dollars in specie. On March 10, 1783, *Alliance* was attacked by no less than three British vessels, but he completely outsailed his adversaries and badly crippled HMS *Sybil*. This was the last naval engagement of the Revolutionary War and a surprising American triumph. Afterward, Barry resumed his career with the merchant marine until March 1794, when he was commissioned the senior officer of the new U.S. Navy and tasked with overseeing construction of the new 44-gun frigate *United States*. Afterward, he led several cruises of the Caribbean during the Quasi-War with France, and on February 3, 1799, he captured a large privateer off Martinique. Barry finally resigned from active duty in 1801 on the grounds of poor health and retired to Philadelphia. He died there on September 13, 1803, a harsh yet capable naval leader. Like John Paul Jones, Barry shares his reputation as "Father of the U.S. Navy."

he inherits a force of 1,900 ragged, underfed men and prepares to abandon the siege of that city. Governor-General Guy Carleton, meanwhile, bides his time and awaits reinforcements.

May 2

NAVAL: A large fleet of British warships and transports begins ascending the St. Lawrence River for the relief of Quebec. Aboard is a detachment of troops under General John Burgoyne and the first contingent of Hessian mercenaries under General Baron Friedrich von Riedesel.

May 3

NAVAL: The expedition of Commodore Sir Peter Parker and General Charles Cornwallis arrives off Cape Fear, North Carolina, and joins troops already there under General Henry Clinton.

May 6

MILITARY: Ships bearing reinforcements under General John Burgoyne anchor off Quebec City, bringing British garrison strength up to 13,000 men. Thus augmented, Governor-General Guy Carleton launches a 900-man probe of the American encampment outside the city. These men attack and completely rout a 250-man detachment under General John Thomas, but Carleton declines pursuing and continues off-loading the balance of his soldiers from the fleet.

May 8–9

NAVAL: Oar-drawn galleys of the Pennsylvania state navy engage the British warships HMS *Roebuck* and *Liverpool* on Christiana Creek near Wilmington, Delaware. A protracted gun duel ensues, and the British are forced back downstream with minor losses to both sides.

May 10

NAVAL: Lieutenant John Paul Jones steps aboard the 12-gun sloop *Providence*, his first command.

May 16

MILITARY: Major Henry Sherburne leads a column of 150 American soldiers from Montreal to reinforce the small American post at the Cedars, 40 miles distant. The column quickly dwindles to 100 men through desertion.

NAVAL: Captain Thomas Biddle of the 14-gun brig *Andrew Doria* slips out to sea and begins a four-month cruise between the Delaware Capes and Maine; Biddle will seize 10 prizes, including two transports carrying 400 British soldiers.

May 17

MILITARY: An ailing general John Thomas assembles his shattered command at Sorel on the St. Lawrence River and decides to retreat toward Chambly, Quebec.

NAVAL: Captain John Mugford of the schooner *Franklin* attacks and seizes the supply ship HMS *Hope*, with supplies of gunpowder and scores of entrenchment tools. That night a British cutting-out expedition of 200 men in 12 boats attacks the *Franklin* and privateer *Lady Washington* near Nantasket Roads, Massachusetts, but is bloodily repulsed. The Americans sustain two killed, including gallant Captain Mugford; the British admit to seven dead.

May 19

MILITARY: The 50 men of Britain's 8th Foot under Captain George Forster, backed by 200 Indians, attack 400 American militia under Major Isaac Butterfield at the Cedars, halfway between Montreal and Quebec. The militia, abandoned by Colonel Timothy Bedel, initially defends its small wooden post until Forster assures Butterfield that the Indians will not massacre them. They then capitulate.

May 20

MILITARY: An American relief force of 100 men under Major Henry Sherburne is ambushed near Vaudreuil, Quebec, by soldiers and Indians under Captain George Forster, 8th Foot. The Americans lose 28 killed and several wounded before Sherburne surrenders.

May 21

NAVAL: *Raleigh*, the first Continental frigate, is launched at Portsmouth, New Hampshire, and will be captained by John Manley of Boston.

May 24

MILITARY: General George Washington arrives at Philadelphia for high-level strategic discussions with the Continental Congress. The latter is particularly worried at what will happen should New York City fall to the British. Two new committees are also appointed, one to oversee the ensuing campaign and another to explore the possibility of recruiting Native Americans to the war effort.

May 26

MILITARY: Ever-energetic General Benedict Arnold rapidly marches from Montreal and overtakes Major George Forster's British and Indians at Quinze Chiens, Canada. Rather than risk a massacre of 487 American prisoners, the two commanders agree to release all American captives now for a similar number of British captives in the future. This affair partially erases the disgrace of the Cedars seven days earlier.

May 31

NAVAL: Commodore Sir Peter Parker's fleet finally assembles in full strength off Cape Fear and sails for Charleston, South Carolina, in concert with forces under General Henry Clinton.

June 1

MILITARY: A force of 3,000 Americans under General John Sullivan arrives at Saint Johns, Quebec, and Sullivan succeeds the gravely ill general John Thomas as commander. Once further augmented by a Pennsylvania brigade under General William Thompson, Sullivan entertains a second siege of Quebec City. He is completely unaware of the magnitude of British reinforcements before him.

June 2

MILITARY: General John Thomas succumbs to smallpox at Chambly, Quebec.

June 4

MILITARY: General Henry Lee arrives at Charleston, South Carolina, succeeding Colonel William Moultrie as commander. He enters into a sharp dispute with that officer after ordering Fort Sullivan, in the harbor, abandoned. Moultrie prevails

and goes on to finish constructing and arming that fortification in time to repulse any British attack. It is constructed of two walls of palmetto logs separated by 16 feet of beach sand, mounts 31 cannon, and boasts a garrison of 420 men.

June 6

MILITARY: General John Sullivan dispatches General William Thompson and 2,000 Americans from Saint Johns down the St. Lawrence River to Trois-Rivières (Three Rivers), Quebec. Thompson is ordered to capture a strategic fort lying halfway between Montreal and Quebec, then garrisoned by 800 men, and takes with him the brigades of Generals Anthony Wayne, Arthur St. Clair, and William Maxwell.

June 7

NAVAL: The 12-gun American privateer *Yankee Hero* surrenders to the frigate HMS *Medford* under Captain John Burr after a gallant two-hour struggle off Newburyport, Massachusetts.

- The large British amphibious expedition under Commodore Sir Peter Parker and General Henry Clinton appears suddenly off Charleston, South Carolina. They badly outnumber the American defenders but also lack maps and the knowledge of local waters to advance farther. Several days will lapse before the British can mount offensive operations.

June 8

MILITARY: In Canada, General William Thompson's 2,000 Americans land near Trois-Rivières and advance inland toward their objective. En route they are betrayed by their guide, end up in a swamp, and spend several hours extricating themselves. They are also spotted by the British vessel HMS *Martin* and fired upon, which alerts the nearby garrison. Unknown to Thompson, the town is occupied by several thousand newly arrived British regulars under General John Burgoyne. Colonel Anthony Wayne's column makes first contact with the enemy and initially forces them back, but British reinforcements drive the Americans off. Worse, a detachment of light infantry under General Simon Fraser arrives by boat and lands in the American rear, encircling them. Thompson's entire command stampeded into the swamp and retreats in confusion.

June 9

MILITARY: Americans under General William Thompson are hotly pursued from Trois-Rivières back to their original debarkation point and are shocked to learn that their boats have deserted them. Thompson, his situation hopeless, becomes the first American general taken in combat. Meanwhile, General Anthony Wayne cuts his way through to freedom and marches back to Saint Johns with 1,100 men. The entire operation has been a disaster for the Americans, who lose 40 killed and 236 prisoners. British casualties amount to eight killed and nine wounded.

- Facing insurmountable odds, General Benedict Arnold abandons Montreal and marches 300 men for Saint Johns with dispatch. Beforehand, he strips the navy yard of valuable tools and timber, shipping them ahead to Crown Point, New York.

June 12

MILITARY: To better facilitate management of the Continental army, Congress founds the five-man Board of War and Ordnance composed of members drawn from Congress.

June 13

MILITARY: General John Sullivan, in light of the deteriorating situation in Canada, prepares to abandon that province and retreat into northern New York. His army, 8,000 strong, is in tatters, poorly fed, and barely disciplined, no match for the 8,000 British and Hessian veterans bearing down on them.

NAVAL: American artillery under General Benjamin Lincoln drives HMS *Renown* from Boston Harbor, finally breaking the British blockade there.

June 14

MILITARY: Governor-General Guy Carleton advances to Trois-Rivieres with 8,000 veteran troops under Generals John Burgoyne and Friedrich von Riedesel. This move prompts General John Sullivan to begin embarking troops, equipment, and supplies at Sorel for an eventual return to Crown Point, New York. It also signals the conclusion of America's ill-fated invasion of Canada.

June 16

MILITARY: General Benedict Arnold capably conducts a rearguard action at Chambly, New York, while the remaining American forces withdraw safely to Crown Point.

- General Henry Clinton lands 2,000 men on Long Island in Charleston Harbor and orders them to attack the city. The maneuver proves impossible and is halted when the route chosen is found inundated with deep shoals.

NAVAL: Captain Seth Harding, commanding a squadron consisting of the *Lee*, *Franklin*, *Lynch*, *Warren*, and *Defense*, captures the British transports HMS *George* and *Arabella* in Boston Harbor. The *George*, partly manned by soldiers of the 71st Highlanders, resists stiffly and surrenders only after losing 12 killed and 13 wounded. Among the 170 captives taken is Lieutenant Colonel Archibald Campbell, the future conqueror of Georgia. American losses are nine injured.

June 17

MILITARY: Montreal is reoccupied by British and Hessian forces under Governor-General Guy Carleton, who begins preparations for invading northern New York.

- News of the defeat in Canada prompts the Continental Congress to replace General John Sullivan with General Horatio Gates as commander of northern forces.

June 20

MILITARY: American forces under Colonel Rufus Putnam begin construction of Fort Washington on Manhattan's northern end. Though spacious, it remains an open earthwork lacking a palisade, barracks, water supply, or bomb-proof magazines. Its sole defensive virtue is its position at 230 feet above sea level and astride the Hudson River, from which the defenders hope to interdict British passage upstream with cannon.

June 24

MILITARY: The combined forces of Generals John Sullivan and Benedict Arnold cannot contain an advance by Governor-General Guy Carleton at Île-aux-Noix and Sorel, Quebec. Sullivan concedes the inevitable, and the badly hobbled Americans continue falling back on the perceived safety of Crown Point, New York. His men suffer from hunger, disease, and lack of equipment.

June 25

MARINES: Captain Samuel Nicholas, the senior marine officer, gains promotion to major while, back in Philadelphia, Captain Robert Mullan begins recruiting activities at Tun's Tavern. The Continental Marines are slowly taking more permanent shape.

June 26

MILITARY: In New York City, a plot to poison General George Washington collapses after Thomas Hickey, a member of his elite bodyguard, is arrested; he is court-martialed and found guilty of mutiny and sedition. Hickey is publicly hung two days later, before thousands of spectators.

June 28

NAVAL: After innumerable delays due to crossing a sandbar and unfavorable tidal conditions, British naval forces under Commodore Sir Peter Parker begin attacking Charleston, South Carolina. They first engage a small garrison under Colonel William Moultrie on Sullivan's Island in the city's harbor. Parker draws up a double line of eight warships mounting 260 guns and bombards the fort for 10 hours. However, the unique properties of the fort's palmetto logs enable them to absorb the British shot with little harm done to the defenders. When a lucky shot brings down the fort's flagstaff, Sergeant William Jasper bravely mounts the parapet under fire and re-raises the standard. Moultrie's batteries, meanwhile, pour continual hot fire onto the fleet, completely riddling Parker's flagship *HMS Bristol*. This vessel is struck no less than 70 times, its captain killed, and Parker wounded—losing his pants. Worse, when the British attempt to slip three frigates around the fort to enfilade it, they ground in shoal waters. The 20-gun *HMS Actaeon* cannot be refloated and is burned by its own crew. By 9 P.M. Parker concedes defeat and signals his fleet to withdraw. British losses are 64 killed and 161 wounded to an American total of 17 dead and 20 injured. The former royal governor of South Carolina, William Campbell, is also mortally wounded. Moultrie's victory makes him a national hero and, moreover, secures Charleston from British control for another two and a half years.

June 29

NAVAL: A huge combined expedition under Admiral Molyneux Shulldham and General William Howe anchors off Sandy Hook, New York, signaling the start of British offensive operations in that quarter.

- British naval vessels chase the American ship *Nancy* off Cape May, New Jersey, until it grounds. Captain Lambert Wickes then arrives to assist and orders gunpowder supplies opened and the ship set afire. The crew flees as the British board the burning vessel, which suddenly explodes and kills several sailors. The American militia then gathers onshore and fires upon the survivors, who flee.

July 1

MILITARY: Lingering frontier resentment explodes into hostility as the Second Cherokee War erupts along the frontier of Virginia and the Carolinas. Major Andrew Williams of South Carolina, seconded by Captain Andrew Pickens, begins assembling militia forces to counterattack.

July 3

MILITARY: General William Howe begins disembarking 10,000 troops on Staten Island, New York, in preparation for offensive operations against New York.

The British withdraw from Charleston on June 28, 1776, after 10 hours of battle.
(U.S. Army Center of Military History)

July 4

MILITARY: Artillerymen manning the cannon near present-day Fort Hamilton in Brooklyn, New York, fire on and damage the British warship *HMS Asia*; this is the first known instance of American harbor defense.

POLITICS: The Continental Congress passes the Declaration of Independence, taking a stance unthinkable only a year before. The Americans now wage war to secure their own country.

July 5

MILITARY: General Horatio Gates makes for Crown Point, New York, to succeed General John Sullivan as head of the Northern Department.

July 7

MILITARY: In Canada, Loyalist John Johnson is authorized by Governor-General Guy Carleton to begin raising the King's Royal Regiment from among fellow refugees.

- General John Sullivan rows the length of Lake Champlain and finally arrives at Crown Point, New York, with 8,000 exhausted, dispirited men. Because the local fortifications are poorly maintained and unable to withstand an assault, General Philip J. Schuyler subsequently orders the army back an additional 10 miles to the perceived safety of Fort Ticonderoga.

July 8

MILITARY: General Andrew Lewis masses a small force of 10 infantry companies, backed by a battery of 18-pound cannon, in preparation for storming Gwynn Island at the mouth of the Rappahannock River. Since May, this locale has served as the de facto headquarters of Royal Governor John Murray, Lord Dunmore, from which Dunmore has launched numerous raids against the coastline. Dunmore also enjoys the advantage of two small warships, the *Dunmore* and *HMS Otter*, in addition to several artillery pieces, but his men are wracked by disease and in poor shape.

- It falls upon Colonel John Nixon to read aloud the Declaration of Independence to an excited throng at the state house in Philadelphia, Pennsylvania. The public response there is universally favorable.

July 9

MILITARY: Virginia militiamen under General Andrew Lewis bombard Gwynn Island, headquarters for former royal governor John Murray, Lord Dunmore. American artillery forces several British warships to ground themselves and also silences Dunmore's battery on the western end of the island. Murray himself is wounded by cannon fire and decides that the position cannot be held, so he flees with his small fleet up the Potomac River at night. He also abandons 30 African-American soldiers, former slaves fighting for the British but now too ill to move. The island is occupied the following morning by 200 soldiers without incident. One American officer dies when his defective mortar explodes.

July 10

NAVAL: In Philadelphia, the Continental frigate *Randolph* is launched and handed off to Captain Nicholas Biddle.

July 11

NAVAL: Captain Lambert Wickes and the brig *Reprisal* commence a cruise that will seize four British merchantmen by month's end.

July 12

MILITARY: Colonel Elijah Clarke and a detachment of Georgia militia rout a band of Cherokee at the juncture of the Broad and Savannah Rivers, killing four and losing three killed and four wounded.

NAVAL: Admiral Richard Howe arrives off Staten Island with 150 ships conveying 11,000 additional soldiers for his brother, General William Howe. The frigates HMS *Phoenix* and *Rose* are then dispatched up the Hudson River and anchor off Tappan Zee to interdict American communications there. En route, numerous American shore batteries commence firing, killing six and wounding three. Meanwhile, General George Washington arrives back at New York City to confer with Admiral Howe's peace emissaries; these he receives, then politely dismisses.

July 15

MILITARY: American militiamen under Major John Downs successfully defend Lindley's Fort on Rayborn Creek, South Carolina, against marauding Cherokee and Loyalists, the latter being dressed as Indians. Having thwarted their attack, the defenders sortie and scatter their opponents, taking nine captive. Patriot losses are two killed and 13 wounded.

July 16

MILITARY: Governor John Murray, Lord Dunmore, temporarily lands at St. George's Island, Maryland, apparently intending to raid Mount Vernon, Virginia, and capture Martha Washington. However, his force is intercepted by local militia and driven off.

July 20

MILITARY: Cherokee under Chief Dragging Canoe attack Eaton's Station on the Holston River, North Carolina, losing 13 killed before withdrawing. The defenders had been alerted in advance by Nancy Ward, the Cherokee war woman. The Indians also unsuccessfully besiege Fort Caswell (Tennessee), but manage to inflict 40 casualties on the defenders.

July 21

NAVAL: Thoroughly chastised, the squadron of Commodore Sir Peter Parker departs Charleston, South Carolina, and makes for New York.

July 27

NAVAL: The American brig *Reprisal* under Captain Lambert Wickes enters St. Pierre harbor, Martinique, where it is challenged by the British warship HMS *Shark*, whose captain does not recognize the new Grand Union flag. Wickes then responds with a broadside, and fighting commences between the two vessels, assisted by a nearby French fort. The *Shark* then withdraws, and the British government subsequently condemns France's breach of neutrality in this matter.

July 29

MILITARY: General Griffin Rutherford leads an expedition of 2,400 North Carolinians into Cherokee territory, assisted by South Carolina forces under Major Andrew Williamson and Virginians under Colonel William Christiansen.

August 1

MILITARY: Loyalists and Cherokee under Major Alexander Cameron ambush Major Andrew Williamson's South Carolina militia at Seneca, defeating them and a relief force under Colonel Andrew Pickens. However, the militiamen subsequently rally and counterattack, driving back their antagonists. Among the dead is Francis Salvador, the first Jew to hold elected office in America and the first of his faith to die for his country.

NAVAL: The squadron of Commodore Sir Peter Parker arrives at New York and adds the soldiers of General Henry Clinton and Charles Cornwallis to those already present. The total force of 32,000 men under General William Howe is the largest expedition organized in North America to that date and includes the 8,000 Hessians of General Leopold von Heister.

August 4

MILITARY: American militiamen under Major Andrew Williamson attack and burn the Cherokee settlements of Sugar Town, Soconee, and Keowee, South Carolina. Over the next eight days, they reduce eight more villages to ashes.

August 5

MILITARY: General Nathanael Greene advises General George Washington that New York City is probably indefensible and ought to be burned to the ground to deprive the British of a very useful entrepot. Washington declines his advice.

August 8

NAVAL: Lieutenant John Paul Jones is promoted to captain in the Continental navy.

August 11

MILITARY: South Carolina militiamen under Major Andrew Williamson attack and defeat Cherokee warriors guarding the settlement of Tamasee, which is then burned.

August 12

NAVAL: Off the Delaware Capes, the Continental sloop *Sachem* fights and captures the British brigantine *Three Friends* after a two-hour contest.

August 16

NAVAL: Repeated attacks by American fire rafts convince British frigate HMS *Phoenix* to withdraw from Tappan Zee and sail down the Hudson River to New York City.

August 20

MILITARY: General Nathanael Greene falls ill on Long Island and is replaced by the less capable General John Sullivan.

August 21

NAVAL: Lieutenant John Paul Jones and the 12-gun sloop *Providence* depart Delaware on a cruise between the Delaware Capes and Nova Scotia, netting 16 prizes over three months.

August 23

MILITARY: General William Howe commences his long-awaited offensive by landing 8,000 crack troops at Gravesend Bay, Long Island, and advancing inland. General George Washington counters by deploying six additional regiments along Brooklyn Heights and advising General William Heath, stationed in northern Manhattan, to prepare to march south if necessary.

August 24

MILITARY: In a major change of command, General Israel Putnam suddenly replaces General John Sullivan as commander of American forces on Long Island. The defenders then brace themselves for an anticipated British assault upon Brooklyn Heights, but the newly arrived Putnam, unfortunately, knows very little about the surrounding terrain.

NAVAL: General Benedict Arnold assembles a motley collection of schooners, sloops, and gondolas at Crown Point, New York, and sails down Lake Champlain intending to engage superior British naval forces.

August 25–26

MILITARY: Aware of a gap in the American lines, General William Howe sends 10,000 men under General Henry Clinton and Colonel Hugh Percy to turn the Americans' left flank via Valley Grove (Jamaica Pass). These troops advance stealthily through the night and by daybreak have positioned themselves to attack.

August 26

NAVAL: The British frigate HMS *Liverpool* captures the Continental sloop *Warren*; this was one of George Washington's original vessels.

August 27

MILITARY: The Battle of Long Island commences, as British troops under General James Grant launch a diversionary attack upon the American right wing. Meanwhile, the main column under General Henry Clinton expertly turns the American left at Jamaica Pass and takes the division of General John Sullivan from behind. After capturing Sullivan and routing his men, Clinton continues rolling up the American line, while Hessians under General Leopold von Heister pin down American troops in the center. General William Alexander manages to mount a stout defense until he too is taken from behind by Clinton and captured. The surviving Americans hastily scamper back to the fortified position along Brooklyn Heights and brace for the inevitable assault. At this juncture, General William Howe inexplicably stops pursuing and prepares to commence siege operations. Nonetheless, the Americans have been badly trounced with a loss of 1,300 men to 377 British and Hessians.

- To encourage enemy desertion, Congress authorizes distribution of a 50-acre land grant to all British and Hessian officers willing to join the Patriot side; they will also receive automatic citizenship.

August 28

MILITARY: Major Andrew Williamson and General Griffin Rutherford assemble 2,000 North and South Carolina militiamen and march to engage the Cherokee in the western mountains.

- Congress approves the stamp of “USA” as a quality mark on all barrels of gunpowder purchased by private manufacturers and passed by government inspectors.

August 29

MILITARY: General George Washington, desperate not to be pinned in his defenses along Brooklyn Heights, begins evacuating his army to Manhattan during the night. In this he is capably assisted by a regiment of soldier-sailors under Colonel John Glover of Massachusetts. In six hours, 9,500 men and most of their equipment and guns safely make the transit without detection and conveniently covered by an early morning fog. This will be one of the war’s most remarkable escapes and enables the Americans to fight on.

September 3

MILITARY: The Continental Congress instructs General George Washington not to burn New York City if he must evacuate, but the actual decision to withdraw remains with him. In light of the ongoing military crisis and persistent problems with expiring enlistments, they also increase the tenure for “the duration of the war.” This proves unpopular with many prospective recruits, and many units remain understrength for the rest of the war.

NAVAL: Lieutenant John Paul Jones of the 12-gun brig *Providence* again departs Delaware Bay, this time on a cruise near Bermuda that ultimately seizes 16 prizes.

September 5

NAVAL: The Continental Congress issues the first regulation governing naval uniforms for officers and requires blue coats with red lapels, yellow metal buttons, and a red waistcoat. However, wearers are at liberty to enhance their appearance by adding gold embellishments.

MARINES: In Philadelphia, the Continental Congress’s Marine Committee establishes regulations for a marine uniform: green coats with white facings and trousers.

September 7

MILITARY: Rather than evacuate New York City, General George Washington convenes a war council and elects to garrison it with the divisions of Generals Israel Putnam, Nathanael Greene, and William Heath.

NAVAL: Inventor David Bushnell supervises deployment of his experimental submarine *Turtle* against Admiral Richard Howe’s flagship HMS *Eagle*. The actual attack is entrusted to Sergeant Ezra Lee, who is forced to fight strong currents to bring his vessel alongside. He makes several unsuccessful attempts to bore into *Eagle*’s copper-sheathed hull to attach an explosive device. Lee abandons the attack at this point and releases his explosive, which detonates harmlessly on the surface. History’s first submarine attack ends in failure, but it unnerves enemy commanders, who condemn the Americans for toying with “infernal devices.”

September 10

MILITARY: Governor-General Guy Carleton begins advancing his large army of British and Hessian veterans down the Champlain Valley and into northern New York. There is little that the outnumbered troops of General Philip J. Schuyler can do to oppose them should they obtain control of Lake Champlain.

September 12

MILITARY: In the face of a rapidly deteriorating strategic situation, General George Washington opts to abandon Manhattan and commences ferrying his forces to the mainland. Before they depart, Captain Nathan Hale volunteers to remain behind as a spy.

September 15

MILITARY: General William Howe interrupts the American evacuation of New York City by landing his army at Kip's Bay on Manhattan's east side. A total of 4,000 crack troops, covered by five Royal Navy warships, row ashore on flatboats, sweeping aside all militia opposition. General George Washington personally rides up to stem the tide and is nearly captured before General Israel Putnam arrives with help. The shaken Americans then withdraw inland and reestablish their position on Manhattan's west side near Harlem Heights. Meanwhile, General Charles Cornwallis wades ashore with another 9,000 men and attempts to cut off Washington's retreat, but is thwarted by a splendid stand by brigades under Colonels John Glover and William Smallwood. Kip's Bay is a minor disaster for the Patriots, who lose 367 men and 67 cannon; British losses total half that.

September 16

MILITARY: British forces begin pursuing General George Washington's forces up Manhattan, derisively blowing horns as if on a fox hunt. However, as they enter a defile near Morningside Heights, Washington suddenly turns on them and pushes additional men into the fray. The British stop, stand, and then begin withdrawing, hotly pursued by the reinvigorated Americans. The Battle of Harlem Heights proves that Washington's raw troops can fight effectively when well led, and they are treated to the rare sight of British backsides in the process. American losses are roughly 60 men to a British tally of 160. The defeat also forces General William Howe to postpone his offensive for a month.

September 18

MILITARY: The Continental Congress standardizes the Continental army by authorizing 88 battalions of infantry from 13 states, the number of which is levied according to their population.

September 20

MILITARY: In light of recent military reverses, the Continental Congress modifies the Articles of War to better address endemic problems of discipline, administration, and organization within the still shaky Continental army.

September 22

MILITARY: Captain Nathan Hale is hung by the British for espionage. He goes to the gallows calmly, declaring "I regret that I have but one life to lose for my country." Hale becomes the nation's first martyr for independence.

MARINES: The Continental sloop *Providence* and its marine contingent attack Canso Harbor, Nova Scotia, burning several fishing vessels.

October 3

NAVAL: Congress authorizes the purchase of a frigate and two cutters from a European power.

October 4

NAVAL: Governor-General Guy Carleton, commanding 13,000 men, orders his fleet of five warships, 20 gunships, and 28 lesser craft down Lake Champlain. General Benedict Arnold's armada awaits them in the vicinity of Valcour Island.

October 10

NAVAL: The Continental Congress formally institutes the grade of captain within the Continental navy and ultimately commissions 24 officers in that grade.

October 11

MILITARY: General William Howe, ignoring the protests of subordinates, orders 4,000 men loaded onto transports and then to pass through Hell's Gate

The Battle of Valcour Island, October 11, 1776—an American tactical defeat but a strategic triumph (Paul Garnett Studios)

en route to the Bronx, New York. Once ashore, the men will march rapidly eight miles overland to Kingsbridge to cut off the American escape route from Manhattan.

NAVAL: General Benedict Arnold's ramshackle flotilla of 15 small vessels is attacked by a large British armada on Lake Champlain near Valcour Island. Arnold has sequestered his force in shallow water between the island and the shore, where the prevailing wind blows southerly. The British under Lieutenant Thomas Pringle initially sail past the Americans, then have to beat back against the wind in order to engage them. This places them squarely in Arnold's defensive arc, and they are pummeled by cannon fire. The British lose heavily while closing but gradually overpower their opponents, sinking two vessels. Arnold then draws off under the cover of darkness with his remaining 13 craft, having lost 200 men wounded, killed, or captured.

October 12

MILITARY: General Charles Cornwallis lands 4,000 troops at Throg's Neck, New York, in an attempt to outflank American forces still present on Manhattan Island. However, the strip of land chosen is swampy and beset by rising tides. As the British struggle ashore they are attacked by Colonel Edward Hand and his Pennsylvania riflemen, who thwart their attempts to storm across a bridge to the mainland. An additional 1,800 Americans then arrive, bottling up Cornwallis along the beach for the next six days. This action buys General George Washington additional time to evacuate his army from New York City.

October 13

NAVAL: The British Lake Champlain armada under Lieutenant Thomas Pringle catches up to the fleeing remnants of General Benedict Arnold's flotilla at Split Rock. The Americans fight a desperate rearguard action but are gradually overwhelmed by numbers. All 13 of Arnold's vessels are beached and burned while the crews make their way overland to Crown Point. The British have achieved complete control over Lake Champlain—but far too late in the season to facilitate military operations.

October 14

MILITARY: General Benedict Arnold abandons Crown Point to the British and walks overland to join the garrison of Fort Ticonderoga. Governor-General Guy Carleton, meanwhile, cognizant of the lateness of the season, elects to suspend further operations until after winter has passed. This is one of the most telling decisions of the Revolutionary War, for it grants the tottering American defenders an eight-month respite to strengthen themselves. This decision transforms the tactical defeat at Valcour Island into a significant American strategic victory.

October 16

MILITARY: General George Washington convenes a war council, recently joined by General Charles Lee. They decide to evacuate the army from New York to White Plains but leave a 2,000-man garrison behind at Fort Washington to obstruct the Hudson River as long as possible.

NAVAL: The Continental Congress censures Commodore Esek Hopkins for disregarding its wishes and attacking New Providence in the Bahamas. This is despite

the fact that they had previously granted Hopkins discretionary authority to do so in the first place.

October 18

MILITARY: General William Howe, anxious to end the impasse at New York and catch General George Washington in the act of withdrawing, dispatches Generals Henry Clinton and Charles Cornwallis around the American flank by landing at Pell's Point (New Rochelle). Once the British successfully storm ashore, they are met by Colonel John Glover's veteran brigade of 750 men, stoutly posted behind a succession of stone walls. For several hours, every time the British attempt to close, the Americans rise up from behind cover and pour in devastating volleys at close range. The Redcoats fall back in confusion to regroup before pressing ahead. After several hours of combat, Cornwallis finally manages to slip a force around Glover's flank and threaten his rear. The Americans then fall back in good order to Dobb's Ferry and rejoin the main army. Glover's losses are negligible while the British admit to only three killed and 20 wounded. The action at Pell's Point is significant in that it prevents Washington's main force from being attacked as it evacuates New York City; Glover is subsequently thanked by Washington in person for a splendid rearguard action against steep odds.

- Congress commissions Polish army officer Tadeusz Kościuszko as a colonel of engineers; he is immediately dispatched north to assist in the defense of Fort Ticonderoga.

October 22

MILITARY: The Continental army under General George Washington completes an orderly withdrawal to White Plains, New York. En route, they abandon the village of Mamaroneck, which is subsequently occupied by the Queen's Rangers under the celebrated major Robert Rogers. This induces an American force under Colonel John Haslet to suddenly turn and attack the town in an attempt to capture it. They seize Rogers's advance guard but prove unable to overwhelm the defenders and so withdraw. Losses in this sharp little affair are 15 American and 66 Loyalists.

October 27

MILITARY: On Manhattan, British forces heavily probe the defenses of Fort Washington, New York, and are repelled with loss. General William Howe resolves to revisit this post once the main American army has been dispensed with at White Plains.

October 28

MILITARY: General William Howe and 13,500 British and Hessians square off against General George Washington and 14,500 Americans at White Plains, New York. The Americans occupy a three-mile line behind the shallow Bronx River, arrayed in three divisions. Howe promptly advances upon them, driving the advance guard of General Joseph Spencer before him. The British then parade themselves dauntingly before the defenders, whereupon Washington divines that Chatterton Hill, elevated terrain off on his right flank, is the key to the whole position. He quickly rushes 2,000 infantry and engineers there under Colonels Joseph Reed and Rufus Putnam, who begin entrenching themselves. British troops

under General Alexander Leslie try and fail to storm the point, and it is not until Colonel Johann Rall's Hessians turn the American right that the defenders fall back. Washington, at this juncture, falls back in good order to strong positions along White Castle Heights. The victorious Howe, meanwhile, is content to simply occupy the battlefield and he fails to mount a vigorous pursuit. American losses are in the vicinity of 150 killed, wounded, and captured; the British sustain roughly twice that.

October 30

NAVAL: The Continental Congress tries improving the prospects of recruitment for the Continental navy by allowing crewmen to share up to one-half of all prize money taken. Up until now, most seamen have preferred the more lucrative practice of privateering, which affords better living conditions and higher pay.

MARINES: Congress authorizes that the marines will employ similar ranks and titles to those in the Continental army.

October 31

MILITARY: The Continental army under General George Washington finishes entrenching in and around North Castle Heights, New York. British forces under General William Howe remain strangely quiescent and do not advance.

November 1–December 18

NAVAL: Captain John Paul Jones commences an extended cruise aboard the 24-gun sloop *Alfred*, accompanied by the sloop *Providence* under Captain Hoysted Hacker, culminating in the capture of nine prizes off Nova Scotia.

November 2

MILITARY: An American officer deserts to Colonel Hugh Percy on Manhattan, bringing plans that detail the defenses of Fort Washington.

November 4

MILITARY: In one of the Revolutionary War's most momentous decisions, Governor-General Guy Carleton finally abandons Crown Point, New York, and withdraws his large army back to Canada for the winter. Carleton is rightfully concerned about supply difficulties, but his retreat grants the disorganized Americans a badly needed respite to strengthen their defenses.

November 6

NAVAL: In Philadelphia, the Marine Committee creates the Continental Naval Board, composed of three members well versed in the nuances of maritime affairs. They are tasked with supervising the navy's business matters.

November 7

MILITARY: New England militiamen under Colonels John Allen and Jonathan Eddy march from Machias, Maine, over to Fort Cumberland, Nova Scotia, to besiege that isolated post. However, the garrison of 200 regulars under Colonel Joseph Goreham proves defiant.

November 8

MILITARY: In New York, General George Washington complains to General Nathanael Greene over Fort Washington's inability to stop British traffic along the

Hudson River and advises him of the possibility it might have to be abandoned. However, he allows Greene discretionary authority to remain there. Washington then begins ferrying the bulk of his army across the river into New Jersey. However, 5,000 men are to remain in North Castle under General Charles Lee, while an additional 3,200 are deployed to Peekskill under General Edward Heath.

November 12

NAVAL: Captain John Paul Jones of the 24-gun sloop *Alfred* captures the British transport *Mellish* after luring it away from an escorting frigate. Its valuable cargo of 10,000 winter uniforms and other military supplies is hurriedly forwarded to American forces in Pennsylvania.

November 13

MILITARY: General Nathanael Greene prevails on General George Washington to maintain a 2,800-man garrison at Fort Washington, New York, despite mounting doubts that the position can be held.

November 14

MILITARY: Fort Washington, New York, is attacked by superior British forces. Worse, the 2,800-man garrison under Colonel Robert Magaw lacks adequate artillery and an accessible water supply, among other things. General William Howe devises a three-pronged assault that hits the post from two different directions: Troops under General Charles Cornwallis and Colonel Hugh Percy have little difficulty overrunning several satellite fortifications, but General Wilhelm von Knyphausen's Hessians are forced to traverse rough, wooded terrain amply guarded by Pennsylvania riflemen. The Germans charge and are thrown back five times with significant losses; in the course of battle, an American woman, Margaret Corbin, takes her dead husband's place at a cannon until being critically wounded. A final charge by Knyphausen stampedes the defenders back inside the already overcrowded fort, and Magaw finally capitulates at 3 P.M. This proves a stinging reverse for the Americans, who lose nearly 3,000 men in killed, wounded, and captives, in addition to stores of supplies and cannon; British and Hessian losses are around 400. New York City is hereafter firmly in British hands until the end of the war; Fort Washington is subsequently renamed Fort Mifflin in honor of its conqueror.

November 16

NAVAL: At St. Eustatius, West Indies, the guns of the Dutch fort fire as the Continental brig *Andrew Doria* enters the harbor; this is the first recorded salute to a vessel flying the Grand Union flag.

November 18

NAVAL: The Continental Congress authorizes construction of the 74-gun ship of the line *America* and five additional frigates mounting 36 guns apiece. Only two of these will actually be built, and only the frigate *Alliance* will see active duty.

November 19–20

MILITARY: Eager to maintain the initiative, General William Howe dispatches 5,000 infantry on flatboats across the Hudson River under General Charles Cornwallis. Their mission is to pursue and harry the fleeing Americans and capture

as many supplies as possible. At the last moment, General Nathanael Greene is alerted to their approach and he hastily abandons Fort Lee without a fight. Consequently, the British seize many valuable supplies such as tents, flour, and cannon without a struggle. Greene subsequently unites with the main force under General George Washington at Hackensack, New Jersey.

NAVAL: The Continental Congress authorizes construction of the nation's first three 74-gun ships of the line; only one will ever be launched, and it will never serve with the American navy.

November 24

MARINES: Private Harry Hassen receives 71 lashes for desertion and abandoning his post without permission; he is the first marine so sentenced.

November 26

MILITARY: Colonel Charles Harrison's Continental Artillery Regiment is founded by Congress and subsequently assigned to the Southern Department.

November 29

MILITARY: American forces besieging Fort Cumberland, Nova Scotia, are driven back by British reinforcements; over 100 prisoners are captured, and these are promptly paroled and sent home.

NAVAL: The Continental brig *Reprisal* under Captain Lambert Wickes drops anchor at Quiberon Bay, France, with diplomatic envoys Benjamin Franklin, Silas Deane, and Arthur Lee onboard. This is the first American warship to ply European waters; Wickes commences a successful cruise in the Bay of Biscay.

November 30

MILITARY: More than 2,000 New Jersey and Maryland militia abandon General George Washington's army once their terms of enlistment expire. Continually depleted, the Americans continue retiring before the British advance.

December 2

MARINES: Major Samuel Nicholas departs from Philadelphia with three companies of marines in order to reinforce the retreating army of General George Washington.

December 3

MILITARY: Remnants of the Continental army under General George Washington wearily trudge into Trenton, New Jersey, and make preparations to cross the Delaware River into northern Pennsylvania.

December 6

MILITARY: General William Howe catches up to his advance forces under General Charles Cornwallis at New Brunswick, New Jersey, and begins dispersing his troops into winter quarters. However, Cornwallis is dispatched with light troops toward the Delaware River to scour the banks of any remaining Americans.

December 7

NAVAL: Newport, Rhode Island, falls to an expedition of 6,000 men commanded by Commodore Sir Peter Parker and General Henry Clinton.

December 8–9

NAVAL: Off Nova Scotia, Captain John Paul Jones of the 24-gun brig *Alfred* takes the British prize *John* of 10 guns, then relinquishes it to the large British frigate HMS *Milford*.

December 11

GENERAL: Rumors that General George Washington is going to burn Philadelphia to deny it to the British throw the city into a panic, and General Israel Putnam is dispatched there with troops to restore order.

December 12

MILITARY: The Continental Congress founds the Regiment of Light Dragoons under Colonel Elisha Sheldon, thereby establishing the American mounted arm.

December 13

MILITARY: General Charles Lee, having foolishly taken up residence in a tavern three miles from the main American encampment at Morristown, New Jersey, is suddenly captured by a detachment of the 16th Light Dragoons under Lieutenant Colonel Harcourt, his former subordinate. Lee is then succeeded by General John Sullivan.

December 14

MILITARY: General William Howe makes a final disposition of troops for the winter, with large detachments at New York and at Amboy, New Brunswick, Princeton, and Trenton, New Jersey. The forwardmost outposts are manned by veteran Hessian troops under Colonel Karl von Donop.

December 20

MILITARY: General John Sullivan moves 2,000 men across the Delaware River and joins the main American force at Newtown, Pennsylvania.

- General William Howe writes to Lord George Germain and proposes a spring campaign to capture the American capital of Philadelphia. This constitutes a dramatic shift in British strategic thinking since the start of the war, which previously centered upon separating New England from the rest of the colonies.

NAVAL: The Continental brig *Lexington* of 16 guns is captured by the British frigate *Pearle*, 32 gun, and outfitted with a prize crew. That evening the Americans overpower their captors and sail their vessel back to Baltimore; among those taken prisoner is Master's Mate Richard Dale, who is convinced to join the Patriot side.

December 24

MILITARY: General George Washington, cognizant that the "game is nearly up," begins planning for a spectacular coup. He instructs a war council to prepare a midwinter offensive, unheard of at the time, to attack and capture the major Hessian outpost at Trenton. His officers unanimously agree and, to underscore their resolve, "Victory or death" becomes the military password.

December 25

MILITARY: On Christmas night, General George Washington ferries his army across the ice-choked Delaware River in three columns and prepares to attack nearby Trenton. The two supporting columns of General James Ewing and Gen-

General Washington leads a victory over the Hessians in the Battle of Trenton, December 26, 1776. (U.S. Army Center of Military History)

eral John Cadwalader are unable to cross, which means that Washington proceeds with 2,400 shivering men.

December 26

MILITARY: A ragged force of 2,400 Americans under General George Washington surprises the 1,400-man Hessian garrison of Colonel Johann Rall at Trenton, New Jersey. Advancing under the cover of a terrible ice storm, Washington deploys his men into two columns under Generals Nathanael Greene and John Sullivan to hit the defenders from the north and northeast. Rall, caught completely by surprise, attempts to form a perimeter that is blasted by Colonel Henry Knox's cannon and outflanked by General Hugh Mercer's brigade. Rall manages to rally some of his men in an orchard outside of town but is fatally wounded. His men then surrender en masse without further struggle. Hessian losses amount to 1,000 killed, wounded, and captured, while the Americans lose two killed and five wounded. Through this single stroke, brilliantly conceived and masterfully executed, Washington keeps the flagging revolution alive. The victors then hastily escape back across the Delaware River, prisoners and booty in tow.

December 27

MILITARY: General John Cadwalader's column finally crosses the Delaware River, marches inland toward Burlington, New Jersey, and finds it deserted. He hastily informs General George Washington in Pennsylvania that the enemy has contracted their lines since Trenton and urges him to recross and return.

- The ongoing military crisis prompts the Continental Congress to extend General George Washington's emergency powers; he is such a trusted figure that opposition is muted. They also authorize recruitment of 16 additional infantry regiments, distinguished from earlier formations in being identified by their colonel's name. Moreover, in light of recruitment difficulties, Congress reduces the terms of enlistment to three years. Finally, Colonel Henry Knox, in light of his excellent behavior, is promoted to brigadier general.

December 30

MILITARY: Emboldened by success at Trenton, General George Washington recrosses the Delaware River into New Jersey with 2,000 men and reoccupies the town. There he learns that Generals Charles Cornwallis and James Grant have massed 8,000 men at Princeton and are rapidly advancing upon him. Rather than retreat again, Washington orders up General Thomas Mifflin's 1,600 militiamen from Bordentown, Pennsylvania, and then addresses men whose enlistments have expired and implores them to remain under arms for at least another six weeks.

1777**January 1**

MILITARY: General James Grant arrives at Princeton, New Jersey, with 1,000 men and posts an additional 600 there to guard supplies. Meanwhile, General Charles Cornwallis leads 6,000 Redcoats and Hessians toward Assumpink Creek on the Delaware River, where the Continental army is reportedly lurking. General George Washington is aware of the British approach and dispatches a brigade under Colonel Edward Hand to slow their advance while he entrenches.

January 2

MILITARY: General Charles Cornwallis advances upon Trenton, New Jersey, seeking to engage the main body of American troops under General George Washington. En route, he encounters the riflemen of Colonel Edward Hand, who tenaciously resist his advance from the woods. It is 5 P.M. before the British reach Assumpink Creek; Cornwallis, confident he can bag "the Old Fox" on the morrow, calls off his advance. Washington, however, correctly concludes that the British must have stripped the garrisons at Princeton and Brunswick and makes another bold move to attack them. Leaving behind 400 men to stoke camp fires throughout the evening, he orders his 5,500-man army to slip quietly around the unsuspecting British in camp and march rapidly under the cover of darkness toward their objectives. The ploy, well-executed, works perfectly, and Cornwallis remains unaware of the ruse until well after daybreak.

- Chaplain John Rosbrugh is the first religious military figure slain when he is killed by Hessians in a skirmish near Trenton, New Jersey.

NAVAL: Commodore Esek Hopkins learns that the British frigate HMS *Diamond* has grounded itself in Narragansett Bay. He resolves to capture it and commands

the sloop *Providence* and a battalion of militia, trying unsuccessfully to snare his quarry. When the tide rises, the *Diamond* floats free and escapes; Hopkins is severely criticized for his mishandling of this matter.

MARINES: In their first large action ashore, a battalion of marines under Major Samuel Nicholas successfully defends Assumpink Creek against a Hessian thrust.

January 3

MILITARY: With General Charles Cornwallis idle before Trenton, the American army under General George Washington surrounds and gradually envelops the British outpost at Princeton, New Jersey. However, advance troops under General Hugh Mercer and John Cadwalader are roughly handled by the British 17th Foot of Lieutenant Colonel Charles Mawhood, and Mercer is killed. Suddenly, Washington appears on the battlefield with the main force and sweeps the British away; Mawhood manages to cut himself free, but the bulk of his force is cornered and captured. The victorious Americans then abscond with as many British supplies as possible and march off for the safety of Morristown just as the lead elements of General Charles Cornwallis's army enter Princeton. The British commander assumes that Washington is off to raid poorly guarded New Brunswick and hurries all night in that direction. American losses in this handsome little victory are around 40 killed and wounded; the British lose 400, principally captured.

January 4

MARINES: Major Samuel Nicholas's marine battalion remains in the field by bivouacking at Sweets Town, New Jersey, not far from General George Washington's main encampment at Morristown. A month later they relocate to Morristown to function as artillerymen over the winter.

January 6

MILITARY: General George Washington marches his exhausted but victorious force into the Watchung Mountains and an encampment at Morristown, New Jersey, for the winter. This places him menacingly astride British lines of communication, with the enemy's advance posts now restricted to Amboy and New Brunswick. General William Howe, seeking to avoid further losses, orders his lines compacted in and around New York City.

- The Continental army continues to suffer from slow recruitment, despite new inducements of a \$20 bonus and 100 acres after discharge. General George Washington, determined to carefully husband his strength, initiates a large-scale program of smallpox inoculation to prevent the outbreak of disease.

January 15

NAVAL: Captain Lambert Wickes and the 18-gun brig *Reprisal* commence a cruise along the coasts of France and Spain that ultimately nets five prizes. However, Wickes's presence in French waters angers the British government and a diplomatic row ensues, calling to have him removed.

January 18

MILITARY: General William Heath, acting upon orders received from General George Washington, formally invests Fort Independence, New York, with 3,400 men under Generals Benjamin Lincoln, Charles Scott, David Wooster, and

Samuel H. Parsons. However, the garrison of 2,000 crack Hessians is less than impressed by this motley melange, and gamely resists.

January 23

NAVAL: To offset naval losses, Congress approves construction of two more frigates, one of 38 guns and one of 28.

January 25–29

MILITARY: The Hessian garrison at Fort Independence, New York, sorties suddenly and drives off American troops stationed at nearby Lancey's Mills. This action convinces General William Heath that the post cannot be taken with the force he has available, so he concludes the siege. He is harshly reprimanded by General George Washington in consequence.

February 2–4

MILITARY: Fort McIntosh, on the Satilla River, Georgia, is besieged by Tory troops from Florida and forced to surrender.

February 7

NAVAL: Parliament authorizes privateering against American shipping and begins issuing letters of marque and reprisal.

February 19

MILITARY: The Continental Congress awards major-general commissions to William Alexander, Thomas Mifflin, Adam Stephen, Arthur St. Clair, and Benjamin Lincoln. Hard-fighting brigadier general Benedict Arnold angrily tenders his resignation for being overlooked again, but a sympathetic general George Washington persuades him to remain in uniform.

February 25

MILITARY: In London, Lord George Germain appoints General John Burgoyne to share a joint command of troops in Canada with Governor-General Guy Carleton. At this time, Burgoyne carefully outlines his ambitious strategy for separating New England from the rest of the colonies, thereby crushing the rebellion. He will accomplish this by marching south from Canada with a crack force of 8,000 men and capture Albany, New York. To do so, he will require a second column marching eastward from Oswego and up the Mohawk River to join him. Burgoyne also assumes that independent forces under General William Howe will likewise march up the Hudson River Valley and completely encircle the Americans. It is a viable strategy but contingent upon greater cooperation among senior British leadership than they will be capable of mustering.

March 3

MILITARY: In a potentially fatal move, Lord George Germain approves General John Burgoyne's three-pronged strategy to win the war. He also grants General William Howe discretionary permission to capture Philadelphia, but advises him that only 5,000 reinforcements will be forthcoming.

NAVAL: The American brig *Cabot* under Captain Joseph Olney runs aground in Nova Scotia, Canada, while being pursued by the British frigate HMS *Milford*; the crew escapes overland, but *Cabot* becomes the first Continental navy ship lost in combat.

March 14

MILITARY: The Continental army at Morristown precipitously dwindles to 3,000 men as desertions, illness, and expiring enlistments thin its ranks. General George Washington, also facing acute supply shortages, has little recourse but to requisition food from civilians.

March 23–24

MILITARY: A British amphibious force of 500 men sails up the Hudson River and seizes the American supply depot at Peekskill, New York. General Alexander McDougall is powerless to halt the attack until reinforced by Lieutenant Colonel Marinus Willett, who counterattacks and drives the invaders back to their boats. Nonetheless, General George Washington is sufficiently alarmed by this thrust to dispatch General William Heath there with an additional eight regiments.

March 26

MILITARY: Lord George Germain finalizes orders for the upcoming campaign season, instructing Governor-General Guy Carleton to turn over the bulk of his forces to General John Burgoyne and assist him in field operations where necessary.

NAVAL: The Continental Congress, angered by Commodore Esek Hopkins and his disparaging remarks about them, takes steps to dismiss him from the Continental navy, which will lack a senior commander for the remainder of the war.

April 2

MILITARY: General William Howe advises Lord George Germain that manpower shortages preclude an overland advance against Philadelphia, and he proposes transporting his army by sea. This is a sound tactical expedient, but it removes any chance that Howe will be able to cooperate with the army of General John Burgoyne near Albany.

April 7

MILITARY: Nurses accompanying the Continental army receive a raise in pay from \$2.00 to \$8.00 per month.

- In Paris, Silas Deane recruits Marie-Joseph du Motier, Marquis de Lafayette, and Baron Johann de Kalb into the American service. They depart immediately for the United States.

April 11

MILITARY: The Continental Congress appoints Dr. William Shippen as the new director general of the Continental army's medical services, replacing John Morgan. He had previously submitted a detailed plan for reorganizing the department, which met with congressional approval.

April 13

MILITARY: A quick, unexpected attack by British forces under General Charles Cornwallis routs the American detachment of General Benjamin Lincoln at Bound Brook, New Jersey. Lincoln recovers sufficiently to orchestrate a proper withdrawal, and loses six cannon and 26 men. Thereafter, General George Washington redeploys his pickets in mutually supporting distance of one another.

April 14

MILITARY: The Continental Congress establishes a large military magazine at Springfield, Massachusetts, which ultimately evolves into the famous Springfield Arsenal.

April 19

NAVAL: The 28-gun frigate *Trumbull* under Captain Dudley Saltonstall seizes two British transports off New York.

- Congress authorizes creation of the Navy Board of the Eastern Department at Boston, Massachusetts, to supervise and coordinate all naval activities in the New England region. Members answer directly to the Marine Committee in Philadelphia and make significant contributions to the war effort.

April 25–28

MILITARY: General William Tryon, former governor of New York, lands 1,850 men at Compo Beach, Connecticut, and marches against the American depot at Danbury. Resistance proves fleeting and, after burning the town, Tryon marches back to his ships via Ridgefield. The next day, they are intercepted by a body of militiamen under Generals Benedict Arnold, David Wooster, and Gold S. Silliman. Wooster dies in severe fighting, and the British continue marching to their ships. On the third day, Arnold manages to scrape together 3,000 militiamen and attacks Tryon at Compo Beach, pressing him severely until General William Erskine breaks the Americans with a bayonet charge. Tryon's raid concludes with a loss of 200 men and without inflicting much harm on the enemy. American losses are 20 dead and 75 wounded.

May 2

MILITARY: The Continental Congress finally elevates Benedict Arnold to major general but, in another perceived slap, he will have less seniority than the five men promoted ahead of him.

May 3

NAVAL: Captain Gustavus Conyngham of the 10-gun lugger *Surprise* captures the British mail packet *Prince of Orange* in the English Channel, followed by the brig *Joseph* off the Dutch coast, and then tows his prizes back to Dunkirk, France. A strong diplomatic protest and threats of retaliation against French shipping result in Conyngham's arrest.

May 5

MILITARY: General George Washington's efforts at recruiting generally succeed, and the Continental army at Morristown, New Jersey, is built up to 9,000 men. Furthermore, the new troops are buoyed by the first infusion of weapons and other military supplies obtained from France. The five divisions present are commanded by Generals Nathanael Green, Adam Stephan, John Sullivan, Benjamin Lincoln, and William Alexander.

May 7

MILITARY: Finding his command growing boisterous, General George Washington issues a general order banning cards, dice, and other forms of campsite avarice.

May 10

NAVAL: At Portsmouth, New Hampshire, the Continental sloop *Ranger* is launched and handed over to Captain John Paul Jones.

May 17

MILITARY: The southern frontier begins acting up when British and Loyalists under Lieutenant Colonel Thomas Brown and Major James Prevost rout the American detachment of Colonel John Baker at Thomas' Swamp, Florida. The Patriots lose 40 men in a few minutes, and the Indians massacre several captives before order is restored.

May 20

DIPLOMACY: Cherokee under Chief Oconostota cede all their lands in South Carolina in exchange for peace. However, younger and more militant Chief Dragging Canoe refuses to accept the terms and heads south, to possibly join up with the Creek confederation if possible.

May 21

NAVAL: At Boston, Massachusetts, the 24-gun frigate *Boston*, under Captain Hector McNeill, and the 32-gun frigate *Hancock*, under Captain John Maley, embark on an extended cruise of Atlantic waters.

May 28

MILITARY: General George Washington breaks camp at Morristown, New Jersey, and marches south to the Middlebrook Valley in order to watch British movements in and out of New Brunswick.

NAVAL: Captain Lambert Wickes of the 18-gun *Reprisal* departs Nantes, France, in concert with the 16-gun brig *Lexington* and the 10-gun cutter *Dolphin*. Together they constitute the first American naval squadron in European waters and will capture 18 English prizes by June.

June 7

NAVAL: The American frigates *Boston* and *Hancock* under Captains Hector McNeill and John Manley, respectively, engage and capture the 28-gun British frigate HMS *Fox* under Captain Patrick Fotheringham after a long running fight. The prize is subsequently manned and added to the squadron.

June 12

MILITARY: General Arthur St. Clair arrives at Fort Ticonderoga, New York, with 2,500 men in three brigades under Generals Alexis Roche de Fermoy, John Patterson, and Enoch Poor. St. Clair is aghast to find his charge dilapidated and surrounded by nearby hills sufficiently close and high enough for enemy artillery. He erroneously concludes that the largest of these, Mount Defiance, is far too steep and overgrown to be accessible.

June 14

MILITARY: Congress officially sanctions a new national flag consisting of thirteen white stars on a new field in a manner representing a constellation, set against a background of 13 alternating red and white stripes. This date will become popularly known as Flag Day.

NAVAL: Captain John Paul Jones is ordered to take charge of the sloop *Ranger* of 18 guns.

June 17

MILITARY: In a major turn of events, General John Burgoyne orders his fine army of 7,000 veteran soldiers to march south from Saint Johns, Quebec, toward Crown Point, New York. Assisting him in this venture are Generals Simon Fraser, William Phillips, and Friedrich von Riedesel, 400 Indians, 139 cannon, and 28 gunboats. En route, Burgoyne unleashes another of his pompous declarations against the inhabitants, which elicits contempt and ridicule.

June 20

MILITARY: General Philip J. Schuyler holds a war council at Fort Ticonderoga now that the British are on the move in Canada. His officers agree that the fort should hold out as long as possible before being abandoned, in which instance General Arthur St. Clair should evacuate his command by boat to Mount Independence.

- Congress establishes the Corps of Invalids under Major Lewis Nicola; this consists of injured men unfit for active duty but still capable of performing recruitment and guard duties.

June 23

MILITARY: In New Jersey, General William Howe dismisses General Leopold von Heister as commander of his Hessian contingent. He is replaced by the more tractable—and capable—Wilhelm von Knyphausen.

- Colonel Barry St. Leger leads a force of 1,800 British, Loyalists, and Indians from Montreal and across Lake Ontario to Fort Oswego, New York. It is anticipated that St. Leger's diversion up the Mohawk River Valley will distract American attention from General John Burgoyne's activities farther north. However, having been informed that the only real obstacle in his path, Fort Stanwix, is in a state of disrepair, St. Leger forgoes the inconvenience of lugging heavy siege artillery along.

June 26

MILITARY: The British advance guard under General Simon Fraser decamps from Crown Point, New York; the main body under General John Burgoyne follows close at hand. The American army at Fort Ticonderoga, directly in their path, is bracing for an attack it cannot possibly withstand.

- In New Jersey, General William Howe concludes an intricate series of feints and maneuvers calculated to lure General George Washington out into the open. The division of General William Alexander, having successfully withstood a heavy assault at Woodbridge, New Jersey, convinces the British to halt their offensive. Howe then pulls his army back to the shoreline and begins embarking it for Staten Island, New York.

June 27

NAVAL: The American squadron under Captain Lambert Wickes concludes a successful foray into the English Channel and returns to Nantes, France, with 18 prizes. En route to port, Wickes is accosted by the much larger ship of the line HMS *Burford* and is forced to throw all his cannon overboard to lighten the *Reprisal* and escape.

June 28

NAVAL: In Delaware, the Continental brig *Nancy* is run aground to escape several pursuing warships. The crews of the Continental navy ships *Reprisal* and *Lexington* reach *Nancy* first and remove 286 barrels of gunpowder. A charge is then set, which explodes as the British clamber aboard to claim the vessel.

July 4

MILITARY: Having encamped within three miles of Fort Ticonderoga, British forces under General John Burgoyne push American defenders from a series of hills around the fort. General William Phillips then audaciously hauls his cannon up the steep, wooded slopes of Mount Defiance to bombard the defenders into submission. General Arthur St. Clair, recognizing the dangers, prepares to evacuate the post with all haste.

NAVAL: At Portsmouth, New Hampshire, Captain John Paul Jones unfurls the new “Stars and Stripes” flag onboard the Continental sloop *Ranger* for the first time.

July 7

MILITARY: The American garrison under General Arthur St. Clair successfully abandons Fort Ticonderoga and escapes by water to Castleton, Vermont. However, his rear guard under Colonel Seth Warner disobeys orders and encamps at Hubbardtown, unaware of observation by General Simon Fraser’s British forces. At daybreak, Fraser attacks the American encampment, surprising them. The more numerous defenders rally and begin pressing back upon the British until the King’s men are rescued by the sudden appearance of General Friedrich von Riedesel’s Hessians. Though roughly handled, the Americans escape intact, defeating Fraser’s objective. Losses are roughly 350 Americans to 150 British and Germans.

NAVAL: A British squadron consisting of HMS *Rainbow*, 44 guns under Commodore George Collier; *Flora*, 32 guns; and *Victor*, 10 guns, gives chase to the American 32-gun frigate *Hancock* and the prize ship *Fox* off Halifax, Nova Scotia. Captain John Manley possesses a faster sailing vessel and should have easily outrun his pursuers, but his mishandling of matters leads to the *Hancock*’s surrender. His escort, the 24-gun frigate *Boston* under Captain Hector McNeill, sails away, unwilling to assist; McNeill is thereafter dismissed from the service. Meanwhile, the *Hancock* is taken into British service as HMS *Iris* and acquires a distinguished reputation.

July 8

MILITARY: American and British forces skirmish heavily outside Fort Anne (Skeensboro), New York, until British reinforcements under General William Phillips arrive and drive the defenders out.

NAVAL: General William Howe begins embarking his army onto the British fleet at Staten Island, New York, in preparation for an amphibious descent upon Philadelphia.

July 9

MILITARY: General John Burgoyne arrives with the bulk of his army at Skeensboro, Vermont, although from this point on his movements will be hampered by increasingly wooded terrain.

- Major William Barton leads a raiding party of 40 men into Newport, Rhode Island, and captures British general Richard Prescott in his bed. Prescott, safely trundled back to Providence at night, will be exchanged for General Charles Lee, then in captivity.

July 17

MILITARY: John Stark is commissioned a brigadier general of militia by the New Hampshire General Court; he serves with the understanding that he will summarily ignore any orders given by either the Continental Congress or Continental army officers. Within a week 1,500 militiamen flock to his colors.

NAVAL: Captain Gustavus Conyngham sails the *Revenge* from Dunkirk harbor and commences a profitable cruise of the North and Irish Seas that will claim 20 prizes. For this reason he becomes reviled as the “Dunkirk Pirate.”

July 22

MILITARY: Congress commissions French officer Louis Le Bègue de Presle Duportail as senior engineering officer in the Continental army.

July 23

MILITARY: Polish cavalry leader Count Kazimierz Pulaski arrives at Marblehead, Massachusetts, with a letter of introduction from Benjamin Franklin.

NAVAL: The amphibious expedition of General William Howe departs Staten Island, New York, and sails south for the Pennsylvania coast. By doing so, Howe eliminates any chance that his 18,000-man army can cooperate with General John Burgoyne’s offensive in northern New York. As soon as American military intelligence apprises General George Washington of the move, he begins deploying his forces for the defense of the American capital.

July 25

MILITARY: Faced with a British juggernaut, General Philip J. Schuyler, with 2,600 men under Brigadier Generals John Nixon and Arthur St. Clair, decides that Fort Edward cannot be held and withdraws deeper down the Lake Champlain Valley.

POLITICS: The Continental Congress votes Colonel William Barton an elegant sword for his capture of British general Richard Prescott.

July 26

MILITARY: The column of Lieutenant Colonel Barry St. Leger, 1,800 strong, begins marching up the Mohawk River Valley from Oswego, New York. His first objective is the American outpost at Fort Stanwix (Rome), New York, reputed to be in a state of bad repair.

July 27

MILITARY: Indians attached to the army of General John Burgoyne capture and murder settler Jane McCrea, fiancée of a Loyalist officer. Her death spurs intense resentment toward the British and boosts Patriot recruitment efforts.

- In the face of superior British numbers, General Philip Schuyler orders Fort Edward, New York, abandoned without a fight.

July 30

MILITARY: Colonel Nicholas Herkimer is advised by Oneida Indian scouts that a large British force is rapidly approaching up the Mohawk Valley toward Fort

Stanwix; he hurriedly starts mobilizing the Tryon County militia and assembling a relief expedition at Fort Dayton, New York.

July 31

MILITARY: The 19-year-old Gilbert du Motier, marquis de Lafayette, is commissioned a major general by action of the Continental Congress. He is the youngest general in American military history, but remains without a command or pay. He subsequently volunteers his services to General George Washington as an aide-de-camp.

August 1

MILITARY: General John Burgoyne's army reaches the left bank of the Hudson River, having been slowed by woods and felled obstacles to a few miles a day. He makes preparations to ferry his 7,000 veterans to the other side for a final descent upon Albany.

August 2

MILITARY: Colonel Peter Gansevoort, commanding the 3rd New York Infantry at Fort Stanwix, receives timely reinforcements in the form of 200 men under Lieutenant Colonel Marinus Willett. The latter arrives minutes before 1,800 British, Loyalists, and Indians, under Lieutenant Colonel Barry St. Leger, surround the fort. The British demand the fort's surrender at the risk of an Indian massacre, but Gansevoort, noticing their lack of artillery, refuses.

August 4

MILITARY: Colonel Nicholas Herkimer departs Fort Dayton, New York, in an attempt to relieve the siege of Fort Stanwix. However, his movements are keenly observed by Molly Brant, sister of Mohawk chief Joseph Brant, and she dispatches an Indian messenger to warn the British of his approach.

- The Continental Congress, anguished by General Philip J. Schuyler's inability to stop a large British invasion, appoints General Horatio Gates to succeed him as head of the Northern Department.

August 6

MILITARY: General Nicholas Herkimer and 800 militiamen are effectively ambushed by Loyalists and Indians under Sir John Johnson, Cornplanter, and Joseph Brant at Oriskany Creek, six miles from Fort Stanwix. The Americans have carelessly entered into a defile with high ridges on either side, and are close to panicking. Herkimer, however, is a study in self-control; despite serious injuries, he calmly puffs on his pipe, reorganizes his line, and beats off several determined attacks. After six hours of fighting and heavy losses to both sides, the Indians grow discouraged and withdraw. Oriskany Creek will be one of the bloodiest encounters of the entire Revolutionary War, with American losses totaling 400, the Indians possibly as high as 150.

- While the battle rages, Lieutenant Colonel Marinus Willett leads a desperate sortie from Fort Stanwix into the thinly guarded British camp of Lieutenant Colonel Barry St. Leger. The Americans overrun the camp, capture five flags, 21 wagons of supplies, and also burn Indian tents without the loss of a man. St. Leger's native allies, totally discouraged by the day's events, begin deserting him in droves.

August 10

MILITARY: General Philip J. Schuyler dispatches a second relief column to Fort Stanwix under Generals Benedict Arnold and Ebenezer Learned. The decision is not without risk, as Burgoyne's main body hovers only 29 miles distant at Fort Edward.

August 11

MILITARY: Mounting supply shortages induce General John Burgoyne to detach 800 Hessians and Loyalists under Lieutenant Colonel Friedrich Baum to Bennington, Vermont, to procure horses and supplies. Baum has been assured that the region is friendly to the Crown and that he can expect Loyalist reinforcements to join him there. Unknown to the British, a large body of New Hampshire militia under General John Stark is also headed to the same destination.

**Brant, Joseph (ca. 1742–1807)**

Loyalist Mohawk chief

Joseph Brant (Thayendaneagea) was probably born around 1742 in New York, a member of the Wolf clan of the Mohawk nation. He spent his youth near the household of Sir William Johnson, superintendent of Indian affairs, was baptized into the Anglican Church, and assumed the Christian name of Joseph Brant. He was well-educated at the Indian school of Reverend Eleazar Wheelock at Lebanon, Connecticut, becoming fluent in English. Brant first saw fighting under Johnson at Lake George in 1755, and in 1763 he also fought on behalf of Britain throughout Pontiac's rebellion. Around this time Johnson married Joseph's sister Molly Brant, further cementing his ties to England. Afterward, Brant assisted the missionary efforts of Reverend John Stewart by translating religious tracts into the Mohawk tongue. Once the American Revolution commenced in 1775, Brant ventured to England with Sir Guy Johnson as his personal secretary.

Mohawk warrior and ardent Loyalist, Joseph Brant continually sought unity among the Six Nations of the Iroquois. (Fenimore Art Museum, Cooperstown, New York)

August 16

MILITARY: General John Stark, his numbers boosted to 2,000 men following the arrival of Colonel Seth Warner, attacks the Hessian encampment at Bennington, Vermont. He employs an intricate series of double envelopments that strip away Loyalists on the perimeter before driving home on the Hessians' main defensive works. Lieutenant Colonel Friedrich von Baum, expecting a friendly reception from Loyalists reputedly in the region, is unprepared for the onslaught but nevertheless fights back dutifully. He engages the Americans for two hours until his ammunition gives out and then, rather than surrender, leads a charge down the hillside with his dismounted dragoons. It is a brave, if futile, gesture, as Baum is killed and the majority of his command captured. For the loss of 30 casualties, Stark kills, wounds, or captures 900 of the enemy, robbing General John Burgoyne of valuable, trained manpower at a critical time.

There he was feted at the court of King George III, had his portrait painted by Sir Joshua Reynolds, and was commissioned a captain of Indians. He returned to New York fully committed to the British cause, but other members of the Six Nations Iroquois under Cornplanter urged caution and neutrality. But Brant, by dint of stirring oratory, convinced the majority of tribesmen to side with England, and only the Oneida and Tuscarora fought for the United States. In the summer of 1777, Brant commanded Mohawks as part of Colonel Barry St. Leger's column and distinguished himself at the Battle of Oriskany. Here, Indians ambushed and mauled American militia under Colonel Nicholas Herkimer, although both sides lost heavily.

In the wake of Britain's defeat at Saratoga in October 1777, the Indians had little recourse but to maintain military pressure on American settlements by raiding. Brant personally led or accompanied many such forays, which culminated in the destruction of Cherry Valley, New York, in November

1778. On July 22, 1779, Brant also cleverly ambushed a pursuing militia force at Minisink, nearly wiping it out. On August 26, 1781, his warriors destroyed a body of Pennsylvania militia on the banks of the Ohio River. However, the success and terror of Indian raids prompted a major American counterattack, and in the summer of 1779 General John Sullivan's troops ravaged the Iroquois homeland. Brant also had to resist the moderates like the Seneca Red Jacket, who urged making peace with the United States before all was lost. He nevertheless resumed his destructive raids until the end of the war, which became a time of reckoning for the Six Nations. The victorious Americans appropriated most of their land in New York, forcing Brant to revisit London and appeal for land grants in Upper Canada to settle his displaced people. He spent the remainder of his life helping the Mohawk readjust to a new life in Canada and there founded the first Anglican church for Native Americans. Brant died at his estate on November 24, 1807, a noted tribal leader.

August 19

MILITARY: General Horatio Gates arrives at Stillwater, New York, supplanting General Philip J. Schuyler as commander of the Northern Department. He brings with him reinforcements that boost American strength there to 4,500. Schuyler, slighted over being replaced, subsequently demands a court of inquiry to clear his name.

August 22

MILITARY: General George Washington obtains positive intelligence that the British fleet has entered Chesapeake Bay, ostensibly to threaten Philadelphia. He thereupon orders the divisions of Generals John Sullivan and Francis Nash to concentrate at nearby Chester as a precaution.

August 23

MILITARY: General Benedict Arnold's relief column nears Fort Stanwix, precipitating a panic in Lieutenant Colonel Barry St. Leger's camp. Previously, Arnold had dispatched the half-witted Hon Yost Schuyler into the Indian camp with tales that the Yankee force approaching them "is more numerous than the leaves on the trees." After hearing this, the few remaining warriors in camp completely desert their British allies, and St. Leger makes preparations to flee for Oswego. This completely neutralizes the left wing of General John Burgoyne's offensive and deprives him of needed manpower. Arnold, meanwhile, quickly retraces his steps back to Stillwater with 1,200 men.

August 25

MILITARY: General William Howe debarks 15,000 men at Head of Elk, Maryland, after spending 32 days at sea. His force is quite emaciated by the experience, so he allows them three days of rest before resuming his drive inland against Philadelphia.

August 31–September 1

MILITARY: Colonel William Sheppard and 42 militiamen at Fort Henry (Wheeling, West Virginia) are suddenly besieged by a large Loyalist/Indian force under noted turncoat Simon Girty. The force successfully massacres a detachment attempting to reach the fort but cannot dislodge the defenders inside. At one point, Major Samuel McCulloch escapes on horseback and spurs his mount down a steep cliff to bring reinforcements. The following day a relief column of 40 mounted riflemen arrives and drives off the attackers; American losses are 23 killed and injured.

September 2–4

NAVAL: The 32-gun frigate *Raleigh* under Captain Thomas Thompson and the 24-gun frigate *Alfred* under Captain Elisha Hinman are cruising the West Indies when they happen upon and seize the British transport *Nancy*. The two ships then shadow a British convoy for several days but fail to break through its escort.

September 3

MILITARY: General William Howe commences his Philadelphia campaign by brushing aside a force of American light infantry at Cooch's Bridge, Delaware. The defenders under General William Maxwell stand their ground effectively

until Hessian jaegers (riflemen) turn their position; they fall back to White Clay Creek. For the United States, this is the first skirmish fought under the new Stars and Stripes flag.

September 11

MILITARY: General William Howe advances into Pennsylvania and encounters General George Washington's army of 14,000 men directly in his path and strongly deployed behind Brandywine Creek. Howe then discovers that the American left flank is not covered, so he dispatches General Charles Cornwallis and 9,000 men to turn it at Chadd's Ford. Meanwhile, a large Hessian contingent under General Wilhelm von Knyphausen demonstrates before Washington's center to distract him. As anticipated, Washington does not notice the turning movement until it is nearly too late. He then dispatches a succession of infantry formations from his center to his left in an attempt to stem the flow. No sooner has this position stabilized than Knyphausen launches a full-scale attack against the newly weakened center, breaks through, and threatens the entire American force. Washington manages to withdraw from the field in good order, although he loses an entire artillery battery in the process. Howe is once again triumphant, having inflicted 1,200 casualties on the Americans while sustaining 600 of his own. The road to Philadelphia is now open, but Washington has again slipped out of the noose and lives to fight another day.

September 12

MILITARY: General Horatio Gates pushes his reinforced army of 6,000 forward to Bemis Heights, New York, only 24 miles north of Albany and 10 miles away from the British encampment of General John Burgoyne. He then orders newly arrived Polish engineer Colonel Tadeusz Kościuszko to construct an intricate line of fortifications and redoubts along the position.

September 14

NAVAL: Captain Lambert Wickes is released from imprisonment in France and allowed to depart St. Malo aboard the *Reprisal*.

September 15

MILITARY: General John Burgoyne, having ferried his men across the Hudson River, advances southward to Fishkill, New York, within five miles of the American position at Bemis Heights. Once in position, he desires to launch a powerful reconnaissance in force to ascertain General Horatio Gates's defenses and possibly overrun them.

- In its quest to import European military professionalism, Congress commissions Baron Johann de Kalb as a major general and Count Kazimierz Pulaski as a brigadier general.

September 18

MILITARY: Prior to evacuating Philadelphia, American soldiers help secure and remove the famous Liberty Bell from that city and secretly transport it to safety at Allentown, Pennsylvania.

September 19

MILITARY: General John Burgoyne orders a full-scale advance upon the American lines at Freeman's Farm, New York. To accomplish this, he draws his army

up into three columns: the right flank of 1,800 men under General Simon Fraser, the center of 1,100 men under General James Hamilton, and the left of 1,000 Hessians under General Friedrich von Riedesel. The entire force must traverse rather hilly, heavily forested land in order to reach its objective, a large eminence on the American left for mounting artillery. The attack kicks off as planned, then stalls as Fraser encounters riflemen and light troops under Colonel Daniel Morgan, who fight them to a standstill. The British center then butts up against the brigade of General Enoch Poor, and a seesaw battle of attrition unfolds. General Benedict Arnold, watching from afar, finally prevails upon General Horatio Gates to commit more troops to the center, and General Ebenezer Learned's brigade charges into the fray. This move forces General William Phillips to march forward with the British reserves and rescue the 62nd Foot from being engulfed. Arnold then disregards Gates's orders and charges forward with additional troops, threatening to crack Burgoyne's center. At this juncture, General Friedrich von Riedesel makes a sudden appearance on the American right, causing them to retreat. The Hessians' quick marching saves the day for Burgoyne, who has held the field amid heavy carnage he could scarcely afford. British casualties total more than 500 men, including several regimental commanders deliberately picked off by marksmen. American losses are roughly half that amount. General Fraser, in light of his losses, prevails upon Burgoyne not to renew the attack on the following day.

NAVAL: In an embarrassing upset, the 16-gun American brig *Lexington* under Captain Henry Johnson is captured by the smaller 10-gun cutter HMS *Alert* of Lieutenant John Bazley after the former vessel runs out of ammunition off Ushant, France.

September 21

MILITARY: To clear the way to Philadelphia, General William Howe decides to eliminate an American force under General Anthony Wayne that is shadowing his advance. He selects the highly capable General Charles Grey to attack the enemy encampment at night with cold steel only. Grey expertly steals upon the sleeping Americans and charges them at Paoli, Pennsylvania, routing them. Wayne loses 250 men, mostly bayoneted, for a handful of British casualties. After this sharp and successful night attack, Grey will go by the nickname "No Flint," a reference to the practice of removing musket flints to prevent accidental discharges at night.

September 23

MILITARY: The British army under General William Howe steals a march on General George Washington by countermarching at night and crossing the Schuylkill River at Flatland's Ford, thus interposing British troops between Washington and the city of Philadelphia.

September 26

MILITARY: British troops under General Charles Cornwallis reoccupy Philadelphia, Pennsylvania, to the cheers of Loyalist inhabitants. General George Washington, philosophical about the loss, positions his army at Germantown, six miles away, and awaits an opportunity to strike.

September 27

NAVAL: The brand-new, 24-gun Continental frigate *Delaware*, under Captain Charles Alexander, bombards British positions at Philadelphia, Pennsylvania, only to run aground. The British bring up artillery, at which point the vessel strikes its colors.

October 1

NAVAL: The dashing captain Lambert Wickes is lost at sea when his ship *Reprisal* flounders and sinks in a storm off Newfoundland.

October 2

MILITARY: With Philadelphia in hand, General William Howe begins clearing the banks of the Delaware River of American fortifications, to use that body of water as a supply route. This day, the famous 42nd Black Watch Highlanders attacks and takes Billingsport, New Jersey, without a fight. Meanwhile, General George Washington continues watching these developments closely and prepares for a counterattack.

October 3

MILITARY: In New York, General Henry Clinton marches 4,000 men up the Hudson River and into the New York highlands in support of General John Burgoyne. However, this action is intended as a diversion only, and Clinton has no intention of linking up with Burgoyne.

October 4

MILITARY: Judging the moment right, General George Washington masses his army, reinforced to 11,000 men, and strikes at the dispersed British forces of General William Howe at Germantown. He advances in three columns commanded by Generals John Sullivan, Anthony Wayne, and Nathanael Greene, hoping to surprise and overpower the defenders in camp. The attack, aided by a morning fog, commences well and drives the British back in confusion. Washington then hits an insurmountable obstacle—the stone house of Loyalist Benjamin Chew, garrisoned by the 40th Foot under Lieutenant Colonel Thomas Musgrave. The Americans, lacking artillery, waste valuable time trying unsuccessfully to dislodge the defenders, and the brigade of General William Maxwell suffers heavy losses. Washington then decides to bypass the house completely. Further confusion breaks out when the division of General Adam Stephan marches out of line and mistakenly fires into Anthony Wayne's forces. Howe, meanwhile, has collected his infantry and begins counterattacking across the line. The Americans slowly yield the battleground to the victorious Howe, who came very close to being destroyed in detail—one piece at a time. American losses are 900 men (including General Francis Nash killed) to 500 British casualties, but Washington has handled his forces adroitly, despite his overcomplicated strategy, and retires in good spirits.

October 6

MILITARY: General Henry Clinton's expedition up the Hudson River captures both Verplanck's Point and Fort Clinton on either bank. The defenders under General George Clinton fight stubbornly but are finally ejected by a column commanded by Lieutenant Colonel Archibald Campbell. Casualties are nearly equal at 250 men apiece, but the British also seize 67 valuable cannon.

NAVAL: The uncompleted American frigates *Congress* and *Montgomery*, first authorized in December 1775, are burned on the Hudson River to prevent capture.

October 7

MILITARY: General John Burgoyne, outnumbered and running low on supplies, launches another reconnaissance in force against the American right flank at Bemis Heights, New York. The British are drawn up into three columns, with their right commanded by General Simon Fraser, the center under General Friedrich von Riedesel, and the left flank held by a single grenadier battalion under Major John Dyke-Acland. All told, Burgoyne possesses only 1,500 men for this perilous operation. As they advance, they are observed by General Horatio Gates who, in a rare moment of initiative, orders a prompt counterattack. General Enoch Poor's brigade closes upon Dyke-Acland's grenadiers, dispersing them, while Colonel Daniel Morgan routs an assortment of Canadians and Indians protecting the British right. Only in the center, where von Riedesel's stout Hessians hold their ground against steep odds, does Burgoyne's strategy appear to be working. The tipping point arrives when General Benedict Arnold, acting without orders, leads General Ebenezer Learned's brigade in a series of successful charges that dislodge the Hessians from several strong points. The gallant General Fraser, valiantly leading the rear guard, is singled out and shot down by rifleman Timothy Murphy, depriving the British of their best tactician. Arnold, meanwhile, gathers up additional troops and attacks the remaining Hessian redoubts; he is wounded in the leg again, but the defenders are routed and flee to the rear. Burgoyne at this moment judges the day lost and orders a retreat, preparing to make a last stand at his grand redoubt. Fortunately, nightfall terminates the contest. The British losses total near 600 men and 10 cannon, while the Americans have lost 200 killed and wounded. Burgoyne has little recourse but to withdraw toward Saratoga, pursued by a force three times his size.

October 8

MILITARY: British forces under General Henry Clinton drive Americans under Generals George and James Clinton away from the Hudson River, and the two fall back upon New Windsor, New York. The British, having occupied Constitution Island, opposite West Point, suddenly halt their successful offensive. General Henry Clinton then writes General John Burgoyne and informs him that he has no authority to unite their respective commands in any capacity—such an order can come only from General William Howe. Daniel Taylor, a Loyalist, is directed to take the message northward inside a hollowed-out silver bullet.

October 10

MILITARY: In Pennsylvania, British artillery is brought to bear on the American defenders of Fort Mifflin, a mud-walled position in the middle of the Delaware River. The garrison of 400 men under Lieutenant Colonel Samuel Smith has no choice but to endure a tremendous bombardment, but does so stoically and with great heroism.

October 12

MILITARY: As General John Burgoyne begins entrenching himself in and around Saratoga, New York, he is slowly being engulfed by superior forces under General

Horatio Gates. This day, General John Stark's brigade of 1,100 New Hampshire militiamen arrives north of Burgoyne's camp, completely cutting off his escape route.

- In Pennsylvania, General Thomas Conway begins surreptitiously writing letters critical of General George Washington to General Horatio Gates, suggesting that Gates should replace the commander in chief. This is the start of the so-called Conway Cabal.
- Lieutenant Colonel Samuel Smith and his 400 men continue defending Fort Mifflin in the Delaware River, although a sortie they launch upon the British land batteries is repulsed.

October 13

MILITARY: With the British army under General John Burgoyne outnumbered, out of supplies, and completely cut off, a board of officers votes unanimously to commence negotiating for surrender. Meanwhile, the Americans capture Loyalist Daniel Taylor and acquire his hollowed-out silver bullet with the message from General Henry Clinton; he is hung as a spy.

October 15

MILITARY: The defenders of Fort Mifflin are further rattled when the warships HMS *Roebuck* and *Valiant* slip into point-blank range on the Delaware River and add to the iron onslaught. Lieutenant Colonel Samuel Smith continues hunkering down behind his muddy walls and endures.

October 16

DIPLOMACY: Generals Horatio Gates and John Burgoyne, Englishmen fighting on opposite sides of the same cause, arrange a convention to discuss the latter's surrender. By the terms of their "Convention," they agree that Burgoyne's army will be allowed to march to Boston, embark on ships for England, and never return to America.

October 17

MILITARY: General John Burgoyne surrenders 5,728 men, 5,000 muskets, and 37 cannon to General Horatio Gates under terms of the "Convention of Saratoga." The staffs of both armies then engage in a bit of fraternization, with mutual toasts to General George Washington and King George III. Such amicability cannot disguise the fact that, for the first time in history, an entire British army has been captured. More significantly, victory at Saratoga demonstrates the viability of the American Revolution, prompting the French government to tender formal diplomatic relations and switch from covert to overt military assistance.

October 22

MILITARY: Colonel Karl von Donop and his force of 1,800 Hessians cross the Delaware River, intending to attack the American post of Fort Mercer, New Jersey. The 1,000-man garrison under Colonel Christopher Greene, having strengthened the works, calmly allows the enemy to approach to within range. Von Donop forms his men into two columns and then charges the northern and southern faces of the fort. They are readily shot down by the defenders, who are assisted by gunboats operating in the river. The Hessians continue attacking bravely until Von Donop is mortally wounded and then finally withdraw. Hessian losses are nearly 500; Greene loses only 35 men.

The fighting at Saratoga goes on for weeks between the Americans and the British, until a turning point arrives with the death of Britain's General Fraser, causing Burgoyne to withdraw and the Americans to proclaim victory on October 17, 1777. (U.S. Army Center of Military History)

October 23

NAVAL: Admiral Richard Howe orders a large portion of his fleet to sail up the Delaware River and bombard the still-defiant Fort Mifflin into submission. Six warships comply, but they are attacked in turn by 12 armed galleys under Commodore John Hazelwood of the Pennsylvania state navy. The 64-gun HMS *Merlin* and the 19-gun *Augusta* are run aground and burned to prevent capture.

October 26

NAVAL: At Marblehead, Massachusetts, the Continental schooner *Lee* completes its final cruise. This is the last survivor of "George Washington's Navy," and it has netted 19 prizes during its service.

October 28

MILITARY: Captain James Wilkinson, aide-de-camp to General Horatio Gates, arrives at York, Pennsylvania, to announce the victory of Saratoga to the Continental Congress. He also broaches to an aide of General William Alexander a

confidential letter of General Thomas Conway, which thoroughly denigrates the leadership abilities of General George Washington.

November 2

NAVAL: Captain John Paul Jones sails from Portsmouth, New Hampshire, with the 18-gun sloop *Ranger* and makes for France. He carries dispatches bearing news of the victory at Saratoga, which will be personally delivered to the American minister, Benjamin Franklin.

- Following the capture of Philadelphia, General George Washington orders the uncompleted Continental frigate *Effingham* burned in the Delaware River to prevent capture.

November 5

MILITARY: It comes to the attention of General George Washington that Brigadier General Thomas Conway has harshly criticized his leadership in a letter to General Horatio Gates. Washington then composes a stinging rebuke to Conway, who promptly tenders his resignation to the Board of War.

November 6

MILITARY: The Continental Congress appoints General Thomas Mifflin, Colonel Timothy Pickering, and Colonel Robert H. Harrison to the newly created Board of War. Neither Mifflin nor Pickering are ardent admirers of General George Washington.

November 10

NAVAL: When the Delaware River inadvertently opens up a new channel, the British rush up floating batteries and additional warships to continue pounding Fort Mifflin into submission. Lieutenant Colonel Samuel Smith, commanding the 400-man garrison, is seriously wounded and is replaced by Major Simeon Thayer.

November 14

MILITARY: The ever-tenacious defenders of Fort Mifflin are strengthened by the arrival of 450 men under General James M. Varnum. Despite a terrific pounding, their counterfire manages to sink a British floating battery in the Delaware River.

November 15

NAVAL: The Royal Navy again slips several large warships to within point-blank range of Fort Mifflin on the Delaware River, dropping 1,000 heavy balls on it every 20 minutes. At this juncture, Major Simeon Thayer decides his position is hopeless and orders an evacuation of the post that evening. The gallant American stand has incurred over 300 casualties but has delayed the British advance upstream by several weeks.

November 18

MILITARY: General Charles Cornwallis crosses the Delaware River with 6,000 men and begins advancing upon Fort Mercer, New Jersey. Previously, General James M. Varnum and Colonel Christopher Greene had decided that this position could not be held and withdrew the garrison intact. Commodore John Hazelwood of the Pennsylvania state navy is also forced to burn several of his armed galleys to prevent their capture.

November 21

MILITARY: In his first independent action, the marquis de Lafayette leads 300 men into a heavy skirmish against a larger Hessian detachment at Gloucester, New Jersey, defeating them.

December 1

MILITARY: The former Prussian officer, Baron Friedrich von Steuben, arrives at Portsmouth, New Hampshire, with a letter of introduction from Benjamin Franklin.

December 2

NAVAL: Captain John Paul Jones of the 18-gun sloop *Ranger* drops anchor at Nantes, France, having taken two British prizes while crossing the Atlantic.

December 5

MILITARY: General William Howe marches from Philadelphia to Whitemarsh in an attempt to surprise General George Washington in the field, but his intentions are detected by American light dragoons under Captain Allan McLane. The Americans have also been forewarned by the heroic actions of spy Lydia Darragh; the British attack fails in its objective.

December 7–11

MILITARY: Generals William Howe and George Washington spar inconclusively at Whitemarsh, Pennsylvania, for several days, but the Americans prove able to circumvent defeat.

December 13

POLITICS: The Continental Congress authorizes two inspectors general for the Continental army who are independent of the commander in chief and answer only to the Board of War.

December 14

POLITICS: The Board of War ignores General Thomas Conway's previous resignation and appoints him inspector general of the army—another direct slap at General George Washington. Thus situated, he reports directly to General Horatio Gates instead of the commander in chief. Moreover, he is chosen over the heads of 23 other generals enjoying greater seniority.

December 19

MILITARY: The 9,000 exhausted men of the Continental army, driven from Philadelphia, stagger into winter quarters at Valley Forge, Pennsylvania. Located only 20 miles from the city, the site affords General George Washington the ability to monitor British movements closely while also protecting his supply routes. However, a severe trial by cold and deprivation will ensue, and upward of 2,500 men, one-third of the force, will perish from exposure or hunger. Worse, an anonymous pamphlet entitled *Thoughts of a Freeman* makes its appearance among soldiers and highly criticizes Washington's leadership.

December 23

MILITARY: General George Washington, wary of recent congressional probes into his military affairs, invites several delegates to his headquarters at Valley Forge

to discuss leadership issues. At the heart of concern is the alleged attempt by General Thomas Conway to have him replaced by General Horatio Gates. In time, fortunately, the so-called Conway Cabal will fail to trigger any congressional motions for Washington's dismissal, and the conspirators are ultimately disgraced.

1778

January 2

MILITARY: Colonel George Rogers Clark confers with Virginia governor Patrick Henry about the necessity of seizing the Mississippi-Ohio River Valley from the British. Such a move would thwart the prospect of Shawnee attacks along the frontier and facilitate land speculation. It will also prevent settlers under Daniel Boone from declaring Kentucky independent. Governor Henry acquiesces and Clark, to disguise his real purpose, declares his intention to protect Kentucky settlements. He is then commissioned a colonel in the Virginia militia and proceeds to recruit seven rifle companies needed for the expedition.

NAVAL: Commodore Esek Hopkins is finally and formally removed as commodore of the nascent Continental navy; no successor is ever appointed.

January 5

NAVAL: American inventor David Bushnell floats numerous mines down the Delaware River, one of which explodes and kills several British sailors. Consequently, the Royal Navy expends a lot of ordnance firing at and detonating mines—and anything else that floats within range. This incident inspires American poet Francis Hopkinson to compose his satirical work, "Battle of the Kegs."

January 8

MILITARY: In an attempt to shore up declining morality in the Continental army, General George Washington prohibits gambling with cards or dice in camp.

POLITICS: The Continental Congress accuses General John Burgoyne of failing to abide by the terms of his surrender convention, further delaying the departure of his captive army.

January 10

MARINES: Naval captain James Willing commands a company of marines onboard the gunboat *Rattlesnake* during an expedition down the Mississippi River to New Orleans.

January 13

MILITARY: His army withering away from exposure and malnutrition at Valley Forge, Pennsylvania, General George Washington appeals to the Continental Congress for immediate supplies of food and clothing.

January 20

MILITARY: Captain Henry Lee, whose troopers are scouting British outposts near Valley Forge, is suddenly attacked by 200 enemy dragoons. He and seven men seek refuge in Spread Eagle Tavern and noisily trick the British into thinking that American reinforcements are arriving; they hastily depart. For this quick-witted action, Lee is promoted to major by Congress.

January 22

MILITARY: Oblivious to the suffering at Valley Forge, the Continental Congress begins contemplating a new expedition into Canada. The Board of War appoints the youthful marquis de Lafayette to lead the effort, seconded by General Thomas Conway.

January 25

MILITARY: General George Washington orders the strategic position at West Point, on the Hudson River, fortified against possible attack. This remains today the oldest, most continuously occupied military post in the United States, as well as the site of the U.S. Military Academy, founded in 1802.

January 27

NAVAL: Captain John P. Rathbun of the Continental sloop *Providence* recaptures New Providence Island (Nassau) in the Bahamas. He also seizes five vessels, captures 1,200 pounds of gunpowder, and releases 20 American captives.

MARINES: Marines attached to the Continental sloop *Providence* storm ashore on New Providence Island, Bahamas, and raise the Stars and Stripes flag on a foreign shore for the first time.

January 28

POLITICS: The marquis de Lafayette flatly refuses to serve with General Thomas Conway in any capacity and expresses his contempt to the president of Congress, Henry Laurens. Laurens, a strong ally of Washington, now suspects the entire Board of War of complicity in the so-called Conway Cabal.

February

MILITARY: To offset long-standing manpower shortages, the Rhode Island General Assembly authorizes recruitment of 300 African-American slaves to serve in a special light-infantry battalion. By war's end, the Rhode Island Light Infantry will be acknowledged as one of the most outstanding units in the Continental army.

February 4

MILITARY: Baron Friedrich von Steuben arrives at York, Pennsylvania, still lacking a military commission, and volunteers to serve as an unpaid aide to General George Washington.

February 6

DIPLOMACY: After surviving three years of warfare, the United States finally enters into a military alliance with France, which now intends to contribute ships and soldiers directly to the cause of American independence. The Revolutionary War is now assuming global significance.

February 7

MILITARY: Noted frontiersman Daniel Boone and 27 other men are captured by the hostile Shawnee chief, Black Fish, along the Lower Blue Licks, Kentucky. Boone is subsequently adopted into the chief's family at Chillicothe, Ohio, and treated with great kindness—he will leave them only with reluctance.

February 9

POLITICS: General George Washington pens an angry missive to General Horatio Gates, rebuking him for his ambiguous posturing throughout the "Conway Cabal."

This note apparently ends any attempt by Gates and his cohorts to have Washington replaced as commander in chief; the matter subsides quietly.

February 14

NAVAL: As the Continental warship *Ranger* under Captain John Paul Jones sails into Quiberon Bay, France, it is saluted by guns of a nearby fort and the warship *Robuste*. This is regarded as the first “official” salute from a sovereign nation.

February 15

NAVAL: John Adams and his son John Quincy Adams sail from Boston onboard the Continental frigate *Boston*, en route to France. This becomes the first vessel to carry two future presidents of the United States on a single voyage.

February 23

MILITARY: The American encampment at Valley Forge has been bolstered by the arrival of former Prussian officer Baron Friedrich von Steuben, who institutes the first systematic training routine in American military history. Steuben, who misrepresented his credentials and is neither an aristocrat nor a general, proves instrumental in transforming the hobbling Continental army into a precision military force.

MARINES: On the Mississippi River, a contingent of marines from the gunboat *Rattlesnake* captures the British sloop *Rebecca*, clearing the way for their voyage to New Orleans.

February 26

MILITARY: Pressed for manpower, Congress passes a resolution encouraging states to institute drafts of militia for nine months of service in the Continental army. Few states actually comply, and the American army remains a bare-bones force for the entire war.

NAVAL: Captain John Barry leads a cutting-out expedition on the Delaware River that captures the British schooner HMS *Alert* and four transports.

March 2

MILITARY: Prodded by pressing necessity, Congress revamps the army’s logistics and accepts General George Washington’s recommendation that General Nathanael Green be appointed quartermaster general.

March 7

MILITARY: After much consideration, Lord George Germain appoints the highly capable, but widely disliked, General Henry Clinton to serve as commander in chief of British forces in North America. Clinton will serve longer in this capacity than any other officer.

NAVAL: Captain Nicholas Biddle, commanding the 32-gun frigate *Randolph*, encounters and fights the much larger 64-gun HMS *Yarmouth* off Barbados. The two vessels close in the darkness and fight fiercely for 20 minutes until the *Randolph* apparently receives a magazine hit and explodes. Biddle and 311 of his men die; only four survivors are rescued by the British. Among the slain is an entire company of the 1st South Carolina Regiment, which was serving on board as marines. Collectively, this will constitute the single largest loss of naval personnel until the sinking of the battleship *Arizona* in December 1941.

March 8

MILITARY: In light of the new French alliance, General Henry Clinton receives permission to begin planning for another amphibious assault against Charleston, South Carolina, decisively shifting the locus of the war southward.

March 9

NAVAL: In another naval humiliation, Captains Elisha Hinman and Thomas Thompson, leading the large frigates *Alfred* and *Raleigh*, respectively, engage the British sloops HMS *Ariadne* and *Ceres* in the West Indies. The British should have been immediately overpowered, but the Americans are outmaneuvered in a lengthy contest, and Hinman's *Alfred* strikes its colors with 181 captives.

March 13

MILITARY: Loyalists under Lieutenant Colonel Thomas Brown attack Fort Barrington, Georgia, taking 23 captives. The southern frontier will remain a hotbed of Loyalist activity for the rest of the war.

**Steuben, Friedrich von (1730–1794)**

Prussian military officer

Friedrich Wilhelm Ludoff Gerhard Augustin von Steuben was born in Magdeburg, Prussia (Germany), on September 30, 1730, the son of an army officer. He joined the famous Prussian army at the age of 17, fought capably, and rose to the rank of captain before being discharged in 1763. Thereafter, Steuben worked for several petty princes in various capacities, especially as chamberlain. Around this time he also began calling himself “baron” and also affixed the aristocratic title “von” to his last name, despite a common origin. In 1776 he departed Germany and traveled to France, where American agents were known to be hiring experienced military officers. He presented his credentials to Benjamin Franklin as a late lieutenant general of King Frederick the Great, and Franklin produced a letter of introduction to the Continental Congress. This was despite the fact that Steuben, fluent in German and French, did not speak a word of English. He nonetheless arrived at Portsmouth, New

Hampshire, in December 1777, introduced himself to Congress at York, Pennsylvania, and next found himself at General George Washington’s camp at Valley Forge. Washington was impressed by his military bearing and appointed him inspector general. It was in this capacity that Steuben made history by introducing a simplified version of the fearsome Prussian drill system to the ragtag Continentals. Acting as drillmaster—and swearing profusely—Steuben trained a model company by himself, then made its members drillmasters with companies of their own. The system was repeated continuously all winter, and by the time Washington’s army emerged from Valley Forge that spring, it exhibited a discipline and efficiency previously lacking. The fruit and genius of his labors were made manifest at the Battle of Monmouth in August 1778 when, for the first time in the Revolutionary War, the Americans proved able to withstand their professional British adversaries in the field.

March 18

MILITARY: British light troops under Colonel Charles Mawhood and Major John G. Simcoe surround and eliminate a militia picket at Quintin's Bridge, New Jersey, inflicting 40 casualties for a loss of one man.

- At Valley Forge, Pennsylvania, Baron Friedrich von Steuben commences his celebrated training regimen to turn men of the rough-hewn Continental army into professional soldiers. He does so by selecting 120 men as a model company and training them thoroughly in his simplified version of the famous Prussian drill until they are completely proficient. The men are then broken up and redistributed to their own units to serve as drillmasters. The entire process is continuously replicated and, by the time the army emerges from its winter quarters, it possesses a discipline and precision heretofore conspicuously lacking. He also instructs the American army to fight in two lines instead of the traditional three, which increases unit firepower. Von Steuben's contributions will prove a major factor in the ultimate American victory.

Steuben continued performing staff functions until November 1780 when, after lobbying hard for a field command, he joined the marquis de Lafayette in Virginia as his subordinate. However, he failed to distinguish himself in a war of outposts and, on April 25, 1781, Steuben was outmaneuvered at Point of Fork and duped into abandoning valuable supplies. Despite his lackluster performance, Steuben subsequently commanded one of three American divisions at Yorktown, where the war effectively ended in October 1781. He next served as a military adviser to Washington until March 24, 1784, when he was finally discharged. Steuben accepted American citizenship and resided in New York City, where his extravagant lifestyle drove him into poverty until Congress voted him an annual pension of \$2,800. Steuben finally settled down on a farm at Remsen, New York, where he served as president of the conservative-minded Society of the Cincinnati. The self-styled "baron" died at Remsen on November 28, 1794, having infused the fledgling American army with its first taste of military professionalism.

Baron von Steuben used Prussian drill systems to train the ragtag and poorly organized Continental army, a tactic that enabled the soldiers to hold their own against the highly trained British. (*National Archives*)

March 21

MILITARY: British light infantry under Colonel Charles Mawhood and Major John G. Simcoe attack and eliminate an American militia picket at Judge Hancock's house, near Hancock's Bridge, New Jersey. The British eliminate sentries, rush inside, and bayonet all 30 defenders to death—including two prominent Loyalists by mistake.

March 27

NAVAL: The Continental frigate *Columbus* under Captain Abraham Whipple grounds at Point Judith, Rhode Island, while being pursued by British warships; it is burned to prevent capture.

March 28

MILITARY: The Continental Congress authorizes General Kazimierz Pulaski to raise his own cavalry force, the "Pulaski Legion." This formation will consist of 200 light infantry and 68 light cavalry equipped with lances.

March 31

NAVAL: In another embarrassing setback for the Continental navy, the new 28-gun frigate *Virginia* under Captain James Nicholson runs aground in Chesapeake Bay and is set upon by HMS *Emerald* and *Conqueror*. Nicholson promptly abandons his vessel, rows to shore, and orders Lieutenant Joshua Barney to surrender his vessel for him.

April 9

MILITARY: The Continental Congress appoints Jeremiah Wadsworth to serve as the new commissary general of purchases and overhaul the inefficient Commissary Department.

April 10

POLITICAL: President of Congress Henry Laurens receives an appeal from General George Washington that endorses pensions and widow benefits for all Continental army officers. This issue is hotly debated for several weeks.

NAVAL: Captain John Paul Jones departs Brest, France, with the 18-gun sloop *Ranger* on an extended raid into English home waters.

April 13

NAVAL: Anticipating war with Great Britain, the French government dispatches Admiral Comte Charles d'Estaing with the Toulon Squadron of 11 ships of the line to North America.

April 22

NAVAL: Captain John Paul Jones, commanding the 18-gun sloop *Ranger*, lands 31 men ashore and briefly seizes the British town of Whitehaven. Crew members then spike cannon in a local fort, burn several vessels, and return to their ship. This act constitutes the first hostile invasion of British soil since 1667.

April 23

NAVAL: Captain John Paul Jones of the *Ranger* accosts the small British island of St. Mary's, intending to kidnap the earl of Selkirk as a hostage, but finds him absent from his estate. Lady Selkirk's family silver is seized instead, but Jones will later return it with an apology.

April 24

NAVAL: Captain John Paul Jones and the 18-gun sloop *Ranger* encounter the 20-gun sloop HMS *Drake* off Carrickfergus, Ireland, capturing *Drake* in a sharp action. For a loss of six men killed and wounded, Jones takes 150 prisoners.

- In another embarrassing loss, the Continental sloop *Independence* under Captain John Young runs aground off Ocracoke Inlet, North Carolina, and is wrecked.

April 27

NAVAL: In light of continual ship losses, the Continental Congress votes to purchase 12 additional warships.

April 29

NAVAL: After much debate, Prime Minister Lord Frederick North elects to reinforce the British fleet of Admiral Richard Howe with 12 additional warships under Admiral John Byron. This is to counter a French fleet known to be approaching America under Admiral Comte Charles d'Estaing.

May 1

MILITARY: British light infantry under Colonel Robert Abercrombie and Major John G. Simcoe attacks an American militia outpost under General John Lacey at Crooked Billet, Pennsylvania. The surprised Lacey is nearly surrounded before fighting his way out with a loss of 60 men. The adroitly handled British lose only nine.

May 5

MILITARY: The Continental Congress appoints General Friedrich von Steuben inspector general of the Continental army upon the recommendation of General George Washington. In this capacity, he composes the *Blue Book*, the first American drill manual, which will be further refined by aides Alexander Hamilton and John Laurens.

May 6

MILITARY: The Continental army stages its first large-scale review at Valley Forge in many months, displaying greatly improved precision in its movements and military deportment thanks to the efforts of General von Steuben.

May 8

MILITARY: General Henry Clinton arrives at New York as the new British commander in chief.

NAVAL: Captain John Paul Jones of the *Ranger* docks at Brest, France, with the captured *Drake* and 200 prisoners.

May 12

MILITARY: Colonel George Rogers Clark departs the Redstone Settlement on a voyage down the Monongahela River to rendezvous with reinforcements gathering at the falls of the Ohio River.

May 19–20

MILITARY: The 20-year-old marquis de Lafayette, on his first independent action, takes 2,200 men on a reconnaissance mission between the Delaware and Schuylkill Rivers. When General William Howe is informed of the move at Phila-

delphia, he detaches General James Grant and 5,000 troops to catch the youthful leader at Barren Hill, Pennsylvania. Howe leads the remaining 6,000 men out of the city as a distraction. However, when cavalry scout Allan McLane perceives the British maneuver, he alerts Lafayette of the impending trap before it is sprung. Lafayette, though badly outnumbered, cleverly conceals his men around Barren Hill until Grant approaches in force, then aggressively deploys his men as if ready to attack. Grant is stymied and assumes the defensive, during which time the Americans slip from his grasp and back to the safety of the Schuylkill River. His clever ploy foiled by Grant's ineptitude, Howe retraces his steps back to Philadelphia, empty-handed.

May 20

MILITARY: Major General Charles Lee, recently exchanged as a prisoner, arrives at Valley Forge and seeks a new command.

- On the Georgia frontier, General Robert Howe arrives at the Altamaha River with 550 men, intending to attack General Augustin Prevost at St. Augustine, but his plans go awry when his militia refuses to follow orders.

May 24

MILITARY: Following two years of capable, if controversial, service in America, General William Howe sails back to England.

May 27

MILITARY: The Continental Congress overhauls the organization of the Continental army while adding a Marechaussee Corps (provost guard) to enforce discipline, along with three engineering companies.

May 28

MILITARY: Colonel George Rogers Clark disembarks at the Falls of the Ohio River to discover that promised reinforcements have failed to materialize. He is greeted only by a handful of new volunteers and will stop to train his entire force on Corn Island before proceeding farther.

- In a fateful move, General George Washington appoints General Benedict Arnold to serve as future governor and garrison commander of Philadelphia.

May 29

MILITARY: In Kentucky, a small blockhouse is spared from a serious Indian attack through the efforts of Dick Pointer, an African-American slave. Pointer is subsequently granted his freedom by the Virginia Assembly.

May 30

MILITARY: Mohawks under Chief Joseph Brant burn the settlement of Cobleskill, New York, killing many settlers and capturing others. This attack initiates a long series of frontier raids—the only viable British tactic in New York after Saratoga.

June 16

MILITARY: General Henry Clinton, fearful that an appearance by the French fleet might cut off his army in Philadelphia, prepares to evacuate that city and return to New York. Two days later, he marches 10,000 soldiers northward, while a further 3,000 Loyalists embark with Admiral Richard Howe's fleet. A

quick raid by Captain Allan McLane's cavalry nets 32 British stragglers outside the city.

June 17

DIPLOMACY: Following a skirmish in the English Channel between French and British warships, the French government officially enters the Revolutionary War on behalf of the struggling United States.

June 19

MILITARY: General George Washington reacts to the British abandonment of Philadelphia by rousing the Continental army from its encampment at Valley Forge and maneuvering to intercept General Clinton's retreating army with 14,500 men.

- General Benedict Arnold arrives at Philadelphia as its garrison commander; he becomes entirely distracted after meeting Margaret "Peggy" Shippen, the beguiling daughter of a prominent Loyalist.

June 26

MILITARY: Colonel George Rogers Clark shoots the rapids of the Ohio River with 175 men in flatboats and sails west toward the Illinois Territory.

June 28

MILITARY: General George Washington strikes at the withdrawing British army of General Henry Clinton by attacking its rear guard at Monmouth Court House. The American advance forces are carelessly handled by General Charles Lee, who causes a near rout by ordering his men to retreat, and Clinton swiftly counterattacks. The situation is saved only when Washington suddenly appears at the head of his men, rallies them, and deploys his troops defensively. He also confronts the tottering Lee and relieves him of command after a blistering dressing-down. At this point, the British make several determined attacks but are blasted back by the well-trained Americans, who can now fight their professional adversaries on equal terms for the first time in the war. The divisions of Generals Anthony Wayne, Nathanael Greene, and William Alexander hold their ground, while the artillery of General Henry Knox assails the British flanks. It is at this critical juncture that Mary Ludwig Hayes (Molly Pitcher) replaces her husband as part of a gun crew and mans a cannon. Clinton, convinced the battle is a draw, retires from the field in good order and continues marching for New York. Both sides lose roughly 400 men apiece, with many falling in consequence of the intense summer heat. However, Monmouth Court House is the first time that the Americans successfully engage the British in an open field.

July 2

MILITARY: General Frederick Haldimand replaces General Guy Carleton as governor-general of Canada.

July 3–4

MILITARY: A force of Loyalists under Captain Walter Butler and of Seneca under Cornplanter attack American settlements in the Wyoming Valley of Pennsylvania. When the defenders under Colonel Zebulon Butler sortie from Fort Mifflin and

Lafayette, Marquis de (La Fayette) (1757–1834)

French military officer

Marie Joseph Yvest Roch Gilbert du Motier, Marquis de Lafayette, was born at Chavaniac, France, on September 16, 1757, the scion of one of France's most distinguished families. Orphaned at an early age, he joined the army at 13 and later married into the influential Noailles family. Lafayette seemed destined to enjoy the life of a wealthy nobleman, but he was struck by the idealism of the American Revolution and determined to offer the young nation his services. When his family refused to condone this decision, he chartered a boat for America at his own expense and was subsequently declared an outlaw by King Louis XVI. Lafayette and his faithful friend and mentor, Baron Johann de Kalb, eventually made their way to Philadelphia, where they presented their credentials to the Continental Congress. Whatever the youthful marquis lacked in meaningful military experience he more than compensated for with boundless enthusiasm for the American cause, and General George Wash-

ington appointed him to his military family. Lafayette soon proved his worth by fighting valiantly at Brandywine and other severe engagements, sustaining a leg wound. On May 28, 1778, he cleverly outmaneuvered British forces at Barren Hills, Pennsylvania, avoiding a snare set for him by General William Howe. Lafayette then served as a military liaison with the French expedition of Admiral Comte Charles d'Estaing throughout the ill-fated Rhode Island campaign. He returned to France in January 1779, where he was briefly arrested, then released, by the king. Lafayette remained a year in Paris pleading the American cause at the court, and rejoined Washington at a time when American military fortunes appeared at their nadir.

Lafayette received his first independent command in 1781, when he led light troops in Virginia against the wily general Charles Cornwallis. However, once the British had entrenched themselves at Yorktown, he

pursue the attackers, they walk right into a devastating ambush. The raiders then promptly charge and rout the militia, killing and scalping 227 men. Butler will go on to burn eight forts and 1,000 homes and steal 1,000 head of cattle. The Wyoming Valley massacre is one of the war's biggest frontier atrocities.

- Colonel George Rogers Clark and his 175 men surround the distant post of Kaskaskia, Illinois, at the confluence of the Mississippi and Kaskaskia Rivers, and peacefully obtain its surrender. Clark is careful to inform the French inhabitants of the recent treaty of alliance with that nation, and they promptly switch sides and join the Americans.

July 4

MILITARY: General Charles Lee, angered by his treatment after he mishandles troops at Monmouth, composes two insulting letters to General George Washington and demands a court of inquiry. Washington responds by having Lee arrested

securely besieged them until Washington could come down from New York with the main army. Lafayette subsequently commanded a division during the rest of the siege and contributed to the decisive American victory there. He returned to France in December 1781, imbued with a new sense of republicanism, and thereafter championed social and political reforms at home. Lafayette commanded the National Guard during the French Revolution, but was forced to flee to Austria in 1797, and was imprisoned. Napoléon freed him in 1800 and offered him a military position, but he retired as a private citizen. With the fall of the Empire in 1815, Lafayette resumed his crusade for liberty by serving in the Chamber of Deputies. In 1824, he embarked on a sentimental tour of the United States, receiving thunderous applause from a grateful nation. Back home, he served as a tireless advocate of political freedom until his death in Paris on May 20, 1834. Lafayette, a child of privilege, remains an enduring symbol of friendship between France and the United States, and a military hero on two continents.

Marquis de Lafayette was declared an outlaw by King Louis XVI for his decision to join the Continental army as a general. (*Independence National Historical Park*)

and charged with disrespect and disobedience. His trial will be held at White Hart Tavern in New Brunswick, New Jersey.

July 5

NAVAL: The British army of General Henry Clinton is finally ferried over to New York from Sandy Hook by Admiral Richard Howe's fleet.

- The 15-ship fleet of Admiral Comte Charles d'Estaing arrives off of the Delaware Capes, but too late to intercept Admiral Richard Howe's warships. The French sail north to New York, seeking a confrontation.

July 8

MILITARY: Hot on the heels of the retreating British, General George Washington establishes West Point, New York, as the site of his new military headquarters. From this position, he will orchestrate a loose blockade of New York City over the next three years; the war will be won elsewhere.

July 11–16

NAVAL: The 15-ship French squadron under Admiral Comte Charles d'Estaing, anchors off New York to coax the British fleet under Admiral Richard Howe out into the open. Howe, somewhat outgunned, declines the invitation and positions his vessels around New York harbor so as to rake the French should they elect to enter. When it becomes obvious that French vessels draw too much water to enter the harbor safely, the admiral begins casting around for another target.

July 20

MILITARY: The forces of Colonel George Rogers Clark peacefully occupy the French settlements of Vincennes (Indiana) thanks to the support of a local priest, Father Pierre Gibault.

July 22

NAVAL: General George Washington confers with French Admiral Comte Charles d'Estaing, and concludes that the waters of New York Harbor are too confined to allow combined operations. Washington then suggests that the French sail to Newport, Rhode Island, and the comte agrees. General John Sullivan is subsequently dispatched there with 1,000 men to begin allied operations.

July 29

NAVAL: The French squadron of Admiral Comte Charles d'Estaing arrives off Newport, Rhode Island, and confronts the 6,700-man British garrison of General Robert Pigot. There is very little the French can do until the army of General John Sullivan arrives to begin siege operations.

August

MILITARY: The western frontier of Pennsylvania is augmented by the arrival of General Lachlan McIntosh, who commands the 8th Pennsylvania and 14th Virginia Regiments. The troops settle in at Fort Pitt prior to construct additional fortifications farther west.

August 3

NAVAL: Off Newfoundland, Canada, the Continental brig *General Gates* engages in a slugfest fight with the British brigantine HMS *Montague*; Captain John Skimmer dies in battle but forces the British vessel to strike its colors.

August 6

NAVAL: General Henry Clinton, informed of French naval operations off Newport, Rhode Island, orders the fleet of Admiral Richard Howe to engage them. Howe has recently been reinforced by the squadron of Admiral John Byron and now possesses 20 warships to d'Estaing's 15.

August 12

NAVAL: As General John Sullivan's 10,000 men prepare siege positions outside Newport, Rhode Island, the fleets of Admirals Richard Howe and Comte Charles d'Estaing, spar for advantage offshore. Suddenly they are beset by a squall that scatters and heavily damages both.

August 20

NAVAL: The wind-damaged fleet of Admiral Comte Charles d'Estaing sails from Newport, Rhode Island, to Boston for repair, abandoning the army of General

John Sullivan to its fate. They take with them a 3,000-man land contingent that had been operating ashore, which further weakens the Americans.

August 29

MILITARY: As the division of General John Sullivan attempts to retreat from Newport, Rhode Island, they are set upon by aggressive general Robert Pigot, commanding the British garrison there. An attack develops at Butt's Hill when General Francis Smith, his subordinate, advances upon the veteran brigade of General John Glover and is handily repulsed. Pigot then directs a large force of Hessians to storm Quaker Hill on his right, but the attack founders in the face of determined resistance by the Rhode Island Light Infantry, composed mainly of African Americans. A prompt counterattack by General Nathanael Greene drives the Germans off. Pigot then suspends the action and Sullivan continues retreating. Both sides lose approximately 300 men apiece in the Revolutionary War's largest battle waged on New England soil.

August 31

NAVAL: A relief expedition of 5,000 British under General Henry Clinton arrives at Newport, Rhode Island, but too late to influence the outcome of events. Clinton then detaches General Charles Grey to attack and raid Martha's Vineyard and the Massachusetts coast.

September 1

NAVAL: Captain Gustavus Conyngham and his 14-gun cutter *Revenge*, kicked out of Spanish waters by the government, drop anchor at Martinique on the voyage home. His cruise of European waters has been spectacularly successful and has resulted in 60 prizes.

September 7–16

MILITARY: Shawnee and Chippewa war parties under Chief Black Fish attack the settlement of Boonesborough, Kentucky. Fortunately, Boonesborough has been warned in advance by Daniel Boone himself, who escaped Indian captivity to relay the news. The Indians finally withdraw after heavy rain collapses a tunnel they have been digging under the walls.

September 11

NAVAL: Admiral James Gambier arrives at New York to replace Admiral Richard Howe as commander of Royal Navy forces in America. His tenure proves brief and uneventful.

September 13

MILITARY: A force of 450 Indians and Loyalists under Chief Joseph Brant and Captain William Caldwell attacks and ravages the settlement of German Flats (Herkimer), New York, along the Mohawk River. The 700 settlers are tipped off in advance and seek refuge in nearby forts, but the raiders will go on to burn and loot 100 buildings before departing.

September 26

MILITARY: The Continental Congress appoints General Benjamin Lincoln to succeed General Robert Howe as commander of the Southern Department. The decision is made without first consulting General George Washington.

September 27

NAVAL: Captain John Barry, commanding the 32-gun frigate *Raleigh*, is accosted off the Maine coast by British warships *Experiment*, 50 guns, and *Unicorn*, 28 guns. Barry fights well for several hours but loses his mainmast and deliberately grounds his vessel on an island and burns it to prevent capture. He escapes back to Boston on foot with 85 crewmen while another 135 are taken prisoner.

September 28

MILITARY: General Charles Grey, in a repeat of his effective performance at Paoli, Pennsylvania, in 1777, advances upon a detachment of American soldiers at Old Tappan, New Jersey. The 100 sleeping men of the 3rd Continental Dragoons under Lieutenant Colonel George Baylor are taken completely by surprise and dispersed. The Americans lose 50 men killed and wounded at no cost to the British; Baylor is among those fatally wounded by a bayonet.

NAVAL: The Continental frigate *Raleigh* is run ashore at Wooden Ball Island, Maine, by British vessels HMS *Experiment* and *Unicorn*; the crews escape overland, but *Raleigh* is raised and impressed into the Royal Navy.

October 1

MILITARY: In Pawling, New York, the court-martial of General Philip Schuyler gathers to ponder his loss of Fort Ticonderoga; he is acquitted but never again receives a command.

October 5

MILITARY: A small force of British infantry under Captain Patrick Ferguson attacks an American encampment on Mincock Island, New Jersey, abetted by the lack of sentries. They then surprise a detachment of cavalry under Colonel Kazimierz Pulaski, inflicting 30 casualties before withdrawing with a loss of six.

October 7

MILITARY: Lieutenant Colonel Henry Hamilton sets out from Detroit with 225 soldiers, French militia, and some Indians to recapture the distant settlement of Vincennes (Indiana). He is heartened to learn that Colonel George Rogers Clark has since withdrawn most of the garrison.

October 28

NAVAL: Continental army major Silas Talbot, commanding the sloop *Hawke*, carefully approaches the British schooner HMS *Pigot* on the Sakonnet River, Rhode Island. He had previously mounted a kedging anchor to the bowsprit of his vessel, intending to rip away the *Pigot's* antiboarding nets as *Hawke* passed by. The ploy works perfectly, and Talbot boards his adversary so quickly that the crew is driven below deck without loss. Both the *Pigot* and 45 captives are taken.

November 4

MILITARY: General Henry Clinton, pursuant to instructions from London, dispatches General James Grant and 5,800 men from New York to the West Indies. The rapidly expanding war in America is forcing the British to spread their resources thin.

NAVAL: Admiral Comte Charles d'Estaing departs Boston with his fleet, neglecting to inform General George Washington. The fledgling Franco-American alliance has achieved little thus far beyond ruffling many feathers.

November 11

MILITARY: A combined Indian/Loyalist force under Chief Joseph Brant and Captain Walter Butler attacks the American settlement at Cherry Valley, New York, under the cover of a rainstorm. The garrison of Fort Alden, consisting of the 7th Massachusetts Regiment, successfully defends its post, but Colonel Ichabod Alden is slain, along with 30 to 40 settlers. This raid will prompt General George Washington to mount a large-scale, punitive action against the Indians the following summer.

November 27

MILITARY: Lieutenant Colonel Archibald Campbell boards 3,500 men onto ships of Commodore Hyde Parker in New York and prepares to sail southward to the Georgia coast. There he intends to link up with British forces under General Augustin Prevost for an attack upon Savannah, Georgia.

NAVAL: Admiral Richard Howe concludes his service in America by sailing home for England; he is briefly succeeded by Admiral John Byron.

December 4

MILITARY: General Benjamin Lincoln arrives at Charleston, South Carolina, as head of the Southern Department. He begins preparations for driving the British out of neighboring Georgia.

December 11

MILITARY: General George Washington directs the winter deployment of the Continental army at Middlebrook, New Jersey, from which vantage point he can rapidly advance into Delaware to counter any possible thrust against Philadelphia.

December 17

MILITARY: The combined British/Indian column of Lieutenant Colonel Henry Hamilton recaptures the distant settlement of Vincennes (Indiana) from Captain Leonard Helm. Hamilton intends to attack Kaskaskia in the spring and drive away Colonel George Rogers Clark. He will mistakenly dismiss his Indian contingent and allow most of his militia to depart.

December 23

MILITARY: A British squadron under Commodore Hyde Parker lands 3,500 soldiers under Lieutenant Colonel Archibald Campbell on Tybee Island at the mouth of the Savannah River. Meanwhile, General Robert Howe collects 700 soldiers and 150 militiamen at Sunbury and marches to the defense of the city.

December 29

MILITARY: Lieutenant Colonel Archibald Campbell, informed that American reinforcements under General Benjamin Lincoln are far off in South Carolina, elects to attack Savannah, Georgia, before they arrive. He then leads 3,500 men against General Robert Howe, who has collected 1,200 soldiers along the Girardeau Road, a strong position with swamps on either flank and a stream to Howe's front. but Campbell is informed by a local slave of an obscure path around the rear; he deploys his light infantry down the secret trail while his artillery bombards the camp from the front. They charge at a given signal and the American position, struck from front, flank, and behind, crumbles. Howe loses nearly 550

killed, wounded, and captured to a British tally of 13. The road to Savannah is now clear, and it will remain in British hands until the end of the war. Campbell appoints himself governor of the only colony reconquered by the British.

1779

January 1

MILITARY: General George Washington warns Congress not to become ensnared in a new campaign against Canada, fearing that France will ultimately gain control of the region.

January 9

MILITARY: A British force under General Augustin Prevost captures Fort Morris, Georgia, from the Americans, along with 220 prisoners. Following the conquest of Savannah, this victory places eastern Georgia completely under British control.

January 11

NAVAL: The American-built frigate *Alliance* departs Boston under Captain Pierre Landais and conveys the marquis de Lafayette back to France. This is the only warship jointly commanded by the allies. En route, a part of the crew of British and Irish deserters plots a mutiny but is foiled.

January 23

MILITARY: Beset by chronic manpower shortages, the Continental Congress accepts General George Washington's recommendation and authorizes a \$200 bounty to both new recruits and soldiers who reenlist.

January 29

MILITARY: Lieutenant Colonel Archibald Campbell marches up the road from Savannah to Augusta, Georgia, where he is ambushed by militia under General Samuel Elbert and Colonel John Twiggs. Campbell brushes aside his antagonists and occupies the abandoned town. For several months Augusta will serve as a rallying point for Loyalists seeking to join the British cause. Moreover, Patriots living throughout the region are forced to take an oath of allegiance or have their property confiscated.

February 3

MILITARY: General William Moultrie takes up defensive positions at Beaufort (Port Royal Island), South Carolina, in anticipation of a British attack there. When two companies of British under Major William Gardiner appear and attack, they are easily repulsed with loss.

- Congress is alerted to alleged profiteering by General Benedict Arnold, military governor of Philadelphia. Arnold angrily demands an official inquiry.

February 4

MILITARY: The Continental Congress endows General George Washington with authority to take whatever measures he deems necessary to enhance and improve the Continental army. He is also allowed to resolve all disputes involving rank below that of brigadier general.

NAVAL: In France, Captain John Paul Jones receives command of a beat-up French merchant ship, the *Duc de Duras*, which he promptly renames *Bonhomme Rich-*

ard in honor of Benjamin Franklin. Jones will spend the next six months scouring the country for guns and other naval implements to outfit his charge.

February 5

MILITARY: Colonel George Rogers Clark, informed of Vincennes's recapture by Lieutenant Colonel Henry Hamilton, hastily collects 127 frontiersmen and sets off from Kaskaskia in midwinter. What unfolds will be one of the most grueling displays of endurance in the entire war. Clark also dispatches Lieutenant Colonel John Rogers and the armed galley *Willig* down the Mississippi River to circumvent any British movements there.

- Colonel John Boyd departs Spartanburg, South Carolina, with a detachment of 600 newly recruited Loyalists and takes up a line of march for Augusta, Georgia. There he hopes to augment the garrison of Lieutenant Colonel Archibald Campbell.

February 10

MILITARY: Patriot militia under Colonels Andrew Pickens, John Dooly, and Elijah Clarke besiege a party of Loyalist cavalry at Carr's Fort, Georgia. They cut the fort's water supply and are making preparations to burn it down when intelligence is received that Colonel John Boyd's column of Loyalists is approaching. Pickens immediately disengages and redeploys to meet the intruders.

February 11–12

MILITARY: Colonel John Boyd's Loyalists attempt to cross the Savannah River into Georgia at Cherokee Ford, only to encounter stiff resistance from Captain James Little's 47 militiamen at McGowan's Blockhouse. Unable to overcome the defenders, Boyd marches his men five miles downstream, constructs rafts, then crosses at Vann's Creek. Little's American militia follows and attempts to obstruct Loyalist progress here as well but is defeated with a loss of 32 men.

February 13

MILITARY: Lieutenant Colonel Archibald Campbell, alarmed by word of General Benjamin Lincoln's approach, abandons Augusta, Georgia, and marches hurriedly for Savannah. En route he is trailed closely by American militiamen under General John Ashe.

February 14

MILITARY: Colonel John Boyd's Loyalists encamp at Kettle Creek for the evening, unaware that the British garrison at Augusta has pulled out. Meanwhile, Patriot militia under Colonels Andrew Pickens and Elijah Clarke quietly surround Boyd's camp unobserved and deploy to its rear. They suddenly lead 350 men in a concerted attack from three directions. Boyd's Loyalists fight well initially but are gradually overwhelmed and routed with a loss of 40 killed and 70 captured. Pickens loses only 32 men but declines to occupy Augusta and withdraws to the interior.

February 18

MILITARY: Colonel George Rogers Clark and his weary little band arrive at the Wabash River in midwinter. They repose briefly and then push across 10 miles of flooded, icy plains before reaching their final objective at Vincennes (Indiana).

- In an attempt to better regulate army administration, Congress founds the position of army inspector general, a noncommand staff position that reports directly to General George Washington.

February 23

MILITARY: Colonel George Rogers Clark's expedition traverses icy, flooded ground and arrives at Horseshoe Plain prior to pushing on to Vincennes. There he learns from a prisoner that Lieutenant Colonel Henry Hamilton is unaware of his approach and holds the settlement with a small garrison. Encouraged by this positive intelligence, Clark instructs his men to noisily encircle the fort to give an impression of much greater numbers. To underscore his determination, Clark also executes and scalps four Indians in full view of the garrison. Hamilton refuses to surrender, so the Americans commence peppering the defenders with accurate rifle fire, killing several artillerymen.

February 25

MILITARY: The Continental Congress votes to raise five companies of rangers for defense of the Pennsylvania frontier.

- After a daylong siege by American militia, Lieutenant Colonel Henry Hamilton concludes his position is hopeless and surrenders 79 men to Colonel George

George Rogers Clark tricked Lieutenant Colonel Henry Hamilton into surrendering Fort Sackville at the Battle of Vincennes by having his soldiers wave many flags to give the appearance of a larger force. (U.S. Army Center of Military History)

Rogers Clark. This is Clark's consummate contribution to the Revolutionary War and ensures American control of the entire Illinois Territory. By war's end, an estimated 20,000 settlers will have migrated to the region.

February 26

MILITARY: General William Tryon launches another punishing attack by landing 600 troops at Horseneck Landing, Connecticut, and dispersing the 150 militiamen under General Israel Putnam. Putnam barely escapes by dramatically spurring his horse down a steep hill. Tryon then proceeds to burn a nearby village before withdrawing to his ships.

March 3

MILITARY: American soldiers and militia under General John Ashe and Colonel Samuel Elbert stop pursuing the British from Augusta, Georgia, and encamp along Briar Creek. They then begin repairing the newly burned bridge and await reinforcements before marching on Savannah. They are unaware that 900 British under Lieutenant Colonel James Prevost have arrived nearby and are quietly deploying around the American rear. At a given signal, Prevost charges and routs the 1,200 defenders, who lose 300 men. British losses total 15. The debacle at Briar Creek ends the American reconquest of Georgia for the time being.

March 11

MILITARY: The Continental Congress authorizes creation of a corps of engineers within the Continental army.

March 13

NAVAL: A squadron consisting of the *Warren*, 32 guns, under Captain John B. Hopkins, the *Queen of France*, 28 guns, under Captain Joseph Onley, and the *Ranger*, 18 guns, under Captain Thomas Simpson, sails from Boston on a cruise of the eastern seaboard. This is one of the largest formations deployed by the Continental navy in its home waters.

March 29

MILITARY: To ameliorate continuing manpower shortages, Congress writes to the legislatures of South Carolina and Georgia and suggests that they consider the enlistment of slaves in the militia. They maintain that owners would be compensated for their losses and the slaves would be manumitted at the end of their service. Neither state accepts the proposal.

April 1

MILITARY: The continuing Cherokee raids by Chief Dragging Canoe prompt a punitive, month-long expedition into Tennessee by Colonel Evan Shelby.

NAVAL: A Continental squadron under Captain John B. Hopkins, consisting of frigates *Queen of France* and *Warren*, plus the sloop *Ranger*, captures seven British vessels. One of them is carrying provisions and equipment for a British dragoon regiment.

April 21

MILITARY: Continental infantry under Colonel Gose Van Schaick attack and destroy the main Onondaga village after a 180-mile march.

April 23

MILITARY: Governor John Rutledge of South Carolina uses his emergency powers to raise 4,000 militiamen and assist the army of General Benjamin Lincoln. Thus augmented, Lincoln finally crosses the Savannah River and advances upon Augusta.

April 29

MILITARY: General Augustin Prevost launches a British offensive by crossing 2,500 men over the Savannah River and advancing upon Charleston, South Carolina. This move induces Colonel Alexander McIntosh to abandon Purysburg and withdraw his 220 men to Black Swamp, where he will unite with 1,000 soldiers under General William Moultrie. The combined Patriot forces then fall back again toward Cossahatchie Bridge.

May 7

NAVAL: Off Cape Cod, Massachusetts, the Continental sloop *Providence* under Captain Hoysted Hacker trades broadsides with the British brig *Diligent*, finally capturing it after a stiff engagement.

May 9–11

NAVAL: A combined British expedition of 1,800 men under Commodore George Collier and General Edward Mathew anchors off Portsmouth, Virginia, intending to attack Fort Nelson. The 100-man American garrison retreats beforehand and the invaders march unopposed into nearby Gosport and Norfolk, burning both. By the time the raiders withdraw, they have sunk 28 vessels and absconded with 1,000 hogsheads of tobacco.

May 10

MILITARY: Philadelphia Loyalist Joseph Stansbury, a prominent merchant, contacts Major John André in New York on behalf of General Benedict Arnold. It appears that Arnold is considering switching his allegiance to the British.

May 11

MILITARY: General William Moultrie force-marches to Charleston, South Carolina, one step ahead of British forces under General Augustin Prevost. Assisted by Governor John Rutledge, Moultrie adds another 600 militiamen to his tally and rejects Prevost's surrender summons. Suddenly, General Kazimierz Pulaski mounts a cavalry sortie on his own initiative at Haddrells' Point, unsupported by Moultrie. The Americans are badly repulsed, losing 300 men as casualties or captives. Prevost, however, concludes he is badly outnumbered and withdraws to James Island and thence to Stono Ferry, which he fortifies against General Benjamin Lincoln's advancing army.

May 23

MILITARY: To demonstrate his sincerity in defecting, General Benedict Arnold forwards detailed information about American defenses at West Point, New York, to British general Henry Clinton.

May 24

NAVAL: The British amphibious expedition of Commodore George Collier and General Edward Mathew concludes at Portsmouth, Virginia. In a three-week

period, they have sunk 150 vessels of various sizes, freed 90 Loyalist prisoners, and liberated 500 African-American slaves.

June 1

MILITARY: Generals Henry Clinton and John Vaughan lead 6,000 soldiers up the Hudson River against the American positions at Stony Point and Verplanck's Point. The small American garrisons hastily flee, leaving the British in control of King's Ferry, an important chokepoint on the river, only 12 miles south of strategic West Point.

June 6

NAVAL: The 32-gun frigate *Confederacy* under Captain Seth Harding, accompanied by the 24-gun frigate *Boston* under Captain Samuel Tucker, captures the British privateer *Pole* while cruising Delaware waters.

June 12

MILITARY: General George Washington, alarmed by British incursions 12 miles below his headquarters at West Point, New York, dispatches Major Henry Lee to ascertain their positions.

June 16

MILITARY: General Augustin Prevost withdraws from Stono Ferry, South Carolina, leaving behind a rear guard of 700 men under Lieutenant Colonel John Maitland.

NAVAL: General Francis McLean sails from Halifax, Nova Scotia, with 700 men to establish a fort on the Bagaduce Peninsula, Maine. From here he will be able to secure a steady supply of lumber for the Royal Navy as well as dispatch raiding parties into the neighboring countryside. He is ably assisted by Captain Henry Mowat and three Royal Navy sloops mounting 54 cannon.

June 20

MILITARY: General Benjamin Lincoln leads 1,400 men across Ashley River. He attacks the British rear guard at Stono Ferry, South Carolina, consisting of 900 soldiers under Lieutenant Colonel John Maitland. Anticipating a coordinated assault in conjunction with General William Moultrie, who never appears, Lincoln pushes forward his left and right wings under Generals Jethro Sumner and Isaac Huger, who drive back men of the 71st Highlanders. The Americans then encounter an abatis, which they are unable to cut through, and are further thwarted by fierce Hessian resistance. Lincoln, judging the battle lost, withdraws and is briefly pursued by Maitland. It is a humiliating defeat for the Americans, who lose 300 men to a British tally of 125. The victorious Maitland begins withdrawing toward Beaufort.

June 21

DIPLOMACY: The government of Spain declares war on Great Britain, although it withholds direct military aid and recognition from the United States.

June 23

MILITARY: General John Sullivan begins massing troops in the Wyoming Valley of Pennsylvania prior to launching a massive, punitive expedition against the heartland of the Iroquois Six Nations. Concurrently, General James Clinton

departs Canajoharie, New York, and begins marching toward Otsego Lake to join Sullivan.

July 2

MILITARY: Captain Allan McLane ably reconnoiters Stony Point, New York, under a flag of truce, and his report convinces General George Washington that it is vulnerable to a night assault. To facilitate this task, General Anthony Wayne receives command of the elite Light Infantry Regiment.

- British cavalry under Lieutenant Colonel Banastre Tarleton surprise Colonel Elisha Sheldon and the 2nd Continental Dragoons at Poundridge, New York. The heavily outnumbered Americans manage to extricate themselves with the loss of their flag before the British finally withdraw.

July 5

MILITARY: General William Tryon lands a hand-picked force of 2,500 men in New Haven harbor, Connecticut, pushing aside American militiamen under General Andrew Ward. Both sides lose about 50 men apiece, then Tryon orders the town burned before reembarking.

July 6

MILITARY: General George Washington makes a personal reconnaissance of Stony Point, New York, and remains convinced it can be stormed at night.

July 7

NAVAL: Lieutenant Colonel Silas Talbot, commanding the 12-gun sloop *Argo*, captures the British privateer *Lively* after a five-hour battle. He will bag two merchant vessels shortly afterward.

July 8

MILITARY: General William Tryon lays waste to the coastal community of Fairfield, Connecticut, burning 83 houses, 100 barns, and numerous churches and schools.

July 9

MILITARY: The Spanish government authorizes Don Bernardo de Gálvez, governor of Louisiana and Florida, to capture British possessions up the Mississippi River and along the Gulf of Mexico.

July 10

MILITARY: Colonel John Bowman conducts 250 men on a raid against the Shawnee stronghold at Chillicothe, Ohio, burning many homes and despoiling crops. Chief Black Fish, who had adopted Daniel Boone into his family, is among those slain.

July 11

MILITARY: General William Tryon's forces descend upon Norwalk, Connecticut, burning another 130 homes, 100 barns, and several vessels. Satisfied by this latest round of punitive actions, Tryon boards his ships and returns to New York.

July 15–16

MILITARY: The British bastion at Stony Point, New York, falls to an ingenious nighttime assault by General Anthony Wayne. The 1,350 Americans attack in

two columns under Wayne and Colonel Richard Butler, while a third column under Major Hardy Murfee mounts a diversion. Taking a page from his own bitter experience at Paoli, Pennsylvania, Wayne orders his men to remove their musket flints and rely on cold steel throughout the action. A moonless night and the lack of sentries allow the Americans to approach undetected to within the last few yards, where they begin chopping through the abatis. The 600-man British garrison under Lieutenant Colonel Henry Johnson is then fooled by Murfee's diversion and sorties after him in the dark. This leaves the fort poorly defended and it is successfully stormed by Wayne and Butler in vicious, hand-to-hand fighting. Thus Stony Point, hailed by the British as "Little Gibraltar," falls in only 30 minutes with a loss of the entire garrison. Wayne's losses amount to 100 men killed and wounded.

July 17

MILITARY: An exultant General George Washington, personally inspecting the defenses of Stony Point, New York, declares it indefensible and orders it stripped and abandoned. General Henry Clinton, meanwhile, is hastily assembling an expedition to retake it.

July 18

NAVAL: While cruising in a fog off Newfoundland, Commodore Abraham Whipple's squadron, consisting of the frigates *Providence* and *Queen of France*, and sloop *Ranger*, stumbles into a 150-ship British convoy. Whipple, masquerading as a British warship, takes several unsuspecting vessels captive, as does Captain John P. Rathbun of the *Ranger*. The Americans seize a total of 11 ships with cargos valued at \$1 million and manage to convey nine of them safely back to Boston. This is one of the most daring and successful American naval attacks of the war.

July 19

NAVAL: The Massachusetts state government, alarmed by the establishment of a British fort on the Bagaduce Peninsula, Maine, assembles an amphibious expedition to capture it. This consists of 1,600 men, 19 armed vessels, and 24 transports under Commodore Dudley Saltonstall, assisted by Generals Solomon Lovell and Peleg Wadsworth of the state militia. The celebrated rider, Colonel Paul Revere, is also on hand commanding the artillery. This is the largest expedition of its kind ever mounted by the Americans, employing three Continental vessels and virtually the entire Massachusetts state navy. It is also undertaken as a private venture, without notifying Congress.

July 22

MILITARY: American militiamen, pursuing Mohawk and Loyalists under Mohawk chief Joseph Brant, are subsequently ambushed by them while crossing the Delaware River near Minisink (Port Jervis), New York. Of 150 men present, only 30 survive.

July 24

NAVAL: The American naval expedition under Commodore Dudley Saltonstall arrives off the Penobscot River, Maine, and maneuvers to begin siege operations against nearby Fort George, then a crude dirt fortification. He briefly engages

the three-ship squadron of Captain Henry Mowat and concludes that the confined waters of Penobscot Bay will not allow him to maneuver advantageously. Thereafter he will decline further naval support until the militia has dealt with Mowat's vessels.

MARINES: The marine detachment from the Massachusetts state ship *Tyrannicide* performs a reconnaissance mission ashore at Penobscot Bay (Maine).

July 26

MILITARY: Lieutenant Colonel Francois Louis Teisseidre becomes the first foreign soldier decorated by Congress—for his heroic performance during the storming of Stony Point, New York.

MARINES: Marine detachments land at Penobscot Bay, Maine, and erect an artillery battery to drive off nearby British vessels.

July 28

MILITARY: American militiamen under General Solomon Lovell land on the western face of the Bagaduce Peninsula and prepare to storm British positions. The ensuing attack is spearheaded by a contingent of Continental marines, who drive the British up the slopes and back within Fort George. With the high ground secure, the Americans begin digging siege fortifications. Both sides lose 40 men apiece in this sharp little action.

MARINES: Marine detachments spearhead the American attack against British positions at Penobscot Bay, Maine, forcing their way up a steep slope and establishing a lodgement.

July 30

MILITARY: A force of 240 Kentucky militia under Colonel John Bowman attacks the Indian settlement of Chalahgawtha, Ohio, but is unable to dislodge the 40 or so warriors defending it. As the Americans withdraw, they are pursued by the Indians, who shoot down several stragglers. An exasperated Bowman finally orders a charge upon the snipers, who return to their village after killing 30 militia and wounding 60.

July 31

MILITARY: A war council at Penobscot, Maine, weighs its options and objectives. General Solomon Lovell suggests that the fleet of Commodore Dudley Saltonstall attack and destroy three British sloops in the harbor. However, Saltonstall withholds all naval support until the guns of nearby Fort George are captured. The impasse continues for several days as American morale plummets.

- In Pennsylvania, General John Sullivan marshals 2,500 crack troops and commences a massive sweep against Indian settlements in central and western New York. He is assisted by Generals William Maxwell and Enoch Poor, and will shortly be joined by a brigade under General James Clinton.

August 2–24

NAVAL: An American squadron consisting of the 32-gun frigate *Deane* under Captain Samuel Nicholson, the 24-gun frigate *Boston* under Captain Samuel Tucker, and the 16-gun sloop-of-war *Thorn* under Lieutenant William Wardlow begins a cruise of Chesapeake Bay that eventually nets eight prizes.

August 3

NAVAL: Commodore George Collier sails from New York with a small fleet and 1,500 men to rescue the garrison of Fort George, Maine. He is gambling that by arriving quickly, he can trap the entire American expedition in Penobscot Bay.

August 5

MILITARY: American cavalry under General John Glover attack and defeat Loyalists under Oliver De Lancey at Morrisania (Bronx), New York.

August 7

MILITARY: With affairs at Penobscot ground to a halt, and Commodore Dudley Saltonstall and General Solomon Lovell at loggerheads over the issue of cooperation, both men agree to petition authorities in Boston for reinforcements and suggestions.

NAVAL: Lieutenant Colonel Silas Talbot and the 12-gun *Argo* engage the 14-gun privateer *Dragon* off Rhode Island. A four-hour battle ensues until the latter loses its mainmast and surrenders. Shortly after, the British privateer *Hannah* hoves into view and is likewise attacked and captured by Talbot.

August 9

MILITARY: General James Clinton departs Otsego Lake, New York, and marches for Tioga to join the main American force under General John Sullivan.

August 11

MILITARY: General Solomon Lovell directs 250 Massachusetts militia to occupy an abandoned battery and lure out the British defenders of Fort George. The latter respond by dispatching 55 soldiers, who charge and easily rout the militiamen.

- Colonel Daniel Brodhead departs Pittsburgh with 600 militiamen and marches up the Allegheny River to attack Indian villages in northern Pennsylvania. Meanwhile, General John Sullivan's army marches into Tioga to await the arrival of General James Clinton.

August 12

MILITARY: American forces at Penobscot, Maine, receive positive instructions from the Massachusetts War Board in Boston directing Commodore Dudley Saltonstall to attack and sink all British vessels anchored in the harbor. The Americans then prepare to make an all-out assault upon Fort George, but it is too late for them.

August 13

NAVAL: Commodore George Collier enters Penobscot Bay with 10 vessels and 1,600 soldiers, lifting the American blockade there. This appearance induces Commodore Dudley Saltonstall to sail upriver and unceremoniously burn all his vessels. Over the next three days, Collier's mere presence leads to the elimination of Saltonstall's entire squadron of 43 ships, with damages estimated at \$8 million. This will prove to be the largest American naval defeat of the war.

August 14

NAVAL: Commodore John Paul Jones, commanding the *Bonhomme Richard*, departs L'Orient, France, accompanied by French vessels *Alliance*, *Pallas*,

Vengeance, and *Le Cerf*. Jones intends to make a destructive raid in British home waters.

August 15

MILITARY: Noted scout Captain Samuel Brady, commanding an advanced detachment of Colonel Daniel Brodhead's army, ambushes a party of hostile Indians on the Upper Allegheny River, killing the noted chief Bald Eagle and several warriors.

August 16

NAVAL: An amphibious expedition of 4,000 men under Admiral Comte Charles d'Estaing departs Saint Domingue (Haiti) and sails for Savannah, Georgia, to commence siege operations there.

August 17

MILITARY: Don Bernardo de Gálvez of Louisiana departs New Orleans with several hundred Acadian militia, African-American volunteers, and pro-Spanish Choctaw on an expedition against Fort Bute and Baton Rouge, Louisiana.

August 18–19

MILITARY: Major Henry Lee deploys 300 Virginia and Maryland troops to attack Paulus Hook, the last British outpost in New Jersey. This is defended by 350 British and Hessians under Major William Sutherland. Lee carefully reconnoiters his objective beforehand, with the help of noted scout Captain Allan McLane, and detaches 200 soldiers from his 2nd Partisan Corps to do the task. These men are then divided into three groups but, en route, half become lost in the dark and the attack is delayed for four hours. The British sentries are alert and fire upon the approaching columns, but Lee finally manages to get his men over a ditch, through a palisade, and into the fort. The ensuing bayonet attack succeeds in overrunning the garrison, save for 50 Hessians in a blockhouse who refuse to surrender. Lee then withdraws, prisoners in tow and closely pursued by Loyalists under Colonel Abraham Van Buskirk. His retreat is endangered when boats expected to ferry them across the Hackensack River fail to materialize, which adds another 14 miles to the march. The Loyalists finally overtake the exhausted Patriots at Liberty Pole Tavern but are in turn driven off by additional forces under General William Alexander. This sharp little action costs the British 200 casualties and captives to an American loss of 12; the Continental Congress subsequently strikes Lee a gold medal in his honor.

- General James Clinton and his 1,500 men trudge into Tioga to join the main American force under General John Sullivan. Both men have been greatly delayed by endemic supply shortages.

August 25

NAVAL: Admiral Marriot Arbuthnot drops anchor at New York to succeed Admiral John Byron as commander of Royal Navy forces. He also brings along 3,000 soldiers as reinforcements for General Henry Clinton.

August 29

MILITARY: General John Sullivan directs an attack against 1,200 Indians and Loyalists guarding the settlement of Newtown (Elmira), New York. The Americans march inadvertently into an ambush staged by Captain Walter Butler and Chief

Joseph Brant; then General Enoch Poor works his brigade behind the defenders, scattering them. The Americans lose 36 men; Indian and Loyalist losses are unknown but probably as large. No quarter is shown by either side.

August 31

NAVAL: The French fleet under Admiral Comte Charles d'Estaing arrives off the coast of Georgia from Caribbean waters and maneuvers to assist the ongoing siege of Savannah.

September 3

NAVAL: Commodore John Paul Jones lets his squadron cruise along the eastern coast of England, intent on raiding the port cities of Leith, Edinburgh, and Newcastle-upon-Tyne.

September 4–5

MILITARY: General John Sullivan's army burns large Indian villages at Catherine's Town and Kindaia, New York. Resistance to his overpowering force is scattered at best.

September 5

MILITARY: Major Benjamin Tallmadge and 150 dismounted dragoons embark from Shippan Point, Connecticut, cross Long Island Sound, and surprise 500 Loyalists at Lloyd Neck, New York. The bulk are captured and Tallmadge returns to Shippan Point without loss.

September 6

NAVAL: Continental frigates *Deane* and *Boston* drop anchor in Boston Harbor, Massachusetts, completing a successful cruise that accounted for eight prizes and 250 prisoners.

September 7

MILITARY: General John Sullivan's division falls upon the Indian settlement of Kanadaseagea, burning it along with crops.

- The remote British outpost of Fort Bute (Manchac), Louisiana, falls to a Spanish expedition under Don Bernardo de Gálvez. This grants him control of the waterways down the Amite River and Lakes Maurepas, Pontchartrain, and Borgne and into the Gulf of Mexico. The Spanish then press on to their next objective at Baton Rouge.

September 10

MILITARY: The Indian settlement of Canandaigua falls into the hands of General John Sullivan's troops; it is so large that two days are required to burn it.

September 11

NAVAL: The French fleet of Admiral Comte Charles d'Estaing, consisting of 22 ships of the line, 10 frigates, and 4,000 men, approaches Savannah, Georgia. He begins landing troops at Beaulieu's Plantation eight miles south of the city, and establishes contacts with a group of Americans under General Kazimierz Pulaski.

September 12

MILITARY: Don Bernardo de Gálvez, with 1,000 men and 13 cannon, surrounds and invests the 300-man British garrison at Baton Rouge. When Colonel

Alexander Dickson refuses to surrender, the Spanish commence bombardment and the digging of siege trenches.

September 13

MILITARY: Indians and Loyalists under Captain Walter Butler ambush a militia detachment under Lieutenant Thomas Boyd near the village of Geneseo, New York, killing 22 men and torturing two to death. Americans retaliate by capturing Geneseo.

September 14

MILITARY: The punitive expedition of General John Sullivan lays waste to the Indian capital of Geneseo, New York, torching 40 Seneca and Cayuga villages in the immediate vicinity. This marks the high tide of Sullivan's offensive, for he fails to press an attack against Fort Niagara, an important Loyalist entrepot and staging area for raiding activities. The raiders are thus enabled to regroup at a future date and resume their destructive activities.

- Colonel Daniel Brodhead concludes his 400-mile campaign against Indian villages in northern Pennsylvania and returns to Pittsburgh.

September 16

MILITARY: General Benjamin Lincoln marches down from Charleston, South Carolina, and arrives at Savannah, Georgia, with 1,500 troops to assist siege efforts there. Meanwhile, Admiral Comte Charles d'Estaing demands the surrender of the city in the name of King Louis XVI but then grants General Augustin Prevost's request for a 24-hour truce to consider terms. Prevost uses the interval to rush up 800 reinforcements under Lieutenant Colonel John Maitland and otherwise strengthen his defenses.

September 17

NAVAL: Lieutenant Colonel Silas Talbot resigns from the Continental army and is commissioned a captain in the Continental navy. He is the only army officer in this conflict so disposed.

September 21

MILITARY: Spanish forces under Don Bernardo de Gálvez capture the remote British post at Baton Rouge, Louisiana, along with 300 British prisoners under Colonel Alexander Dickson. Spanish control does not extend to Natchez and other points along the Mississippi River.

September 22

NAVAL: Commodore John Paul Jones's squadron captures two British ships off Flamborough Head, England, and then spies a large convoy anchored at the mouth of the Humber River.

September 23

MILITARY: As French and American soldiers commence digging trenches outside Savannah, Georgia, their officers begin squabbling among themselves over how to conduct the siege. The onset of hurricane season is at hand and necessitates an early departure by the French fleet.

NAVAL: Commodore John Paul Jones, commanding the 42-gun *Bonhomme Richard* while sailing off the British coast near Flamborough Head, has encountered

Engagement between the *Bonhomme Richard* and the *Serapis*, 23 September 1779
(Naval Historical Foundation)

a 40-ship convoy escorted by two British warships: the new, copper-bottomed 44-gun frigate HMS *Serapis* under Captain Richard Pearson and the 20-gun sloop *Countess of Scarborough*. The Americans are assisted by the smaller French vessels *Alliance*, *Vengeance*, *Le Cerf*, and *Pallas*. Pearson orders the convoy into port, then bravely interposes his vessel between them and the enemy squadron. It is late in the evening before Jones can close with his quarry, and a desperate engagement begins. The creaking *Bonhomme Richard* and the smartly handled *Serapis* trade broadsides for several hours in the moonlight, with the Americans getting the worse of it. Suddenly, Pearson loses the headwind while attempting to rake and Jones rams his stern. As the two vessels become snared in each other's rigging, the fighting continues at close quarters for two more hours. Finally, a grenade is dropped down a hatch on the *Serapis* by Lieutenant Nathaniel Fanning, which ignites an ammunition chest and convinces Pearson to strike. The Americans then board and the British colors are struck by Lieutenant Richard Dale. American casualties are 150 out of 237 present; the British suffer 170. The *Countess of Scarborough* surrenders to the French 10 minutes later, but *Bonhomme Richard* is so riddled that it will sink two days later.

- In recognition of having waged one of the stoutest ship-to-ship encounters in naval history, John Paul Jones is made a chevalier of the French Order of Military Merit, while Captain Richard Pearson is knighted by the British Crown.

Jones, John Paul (1747–1792)

American naval officer

John Paul was born in Kirkcudbrightshire, Scotland, on July 6, 1747, and he went to sea at an early age. A skilled mariner, he commanded his own vessel at the age of 21, but in 1770 he faced murder charges for flogging a carpenter to death. Jones was cleared by an admiralty court, but in 1773 he killed another sailor during a mutiny and fled to Virginia under the assumed name of Jones. When the Revolutionary War commenced, he was living in Philadelphia and received a lieutenant's commission in the Continental navy. Jones first accompanied Commodore Esek Hopkins on a raid to Nassau in the spring of 1776 on board the brig *Alfred*, then received command of the sloop *Providence* later in the year. He subsequently completed several successful cruises on numerous warships, and in June 1777 he hoisted his flag on the new 18-gun sloop *Ranger*. Jones now daringly took the war into English waters by seizing the 20-gun sloop HMS *Drake* off the Irish coast. He continued successfully

raiding European waters until September 1779, when he accepted command of a former French merchant vessel, which he christened *Bonhomme Richard* in honor of Benjamin Franklin's famous *Poor Richard's Almanac*. In truth, this decrepit hulk was so worn down that several weeks of repair were necessary before it was seaworthy. Jones remained undeterred. On September 23, 1779, he engaged the spanking new frigate HMS *Serapis* under Captain Richard Pearson in one of history's hardest-fought ship-to-ship encounters. The Americans took a pounding from their crack British adversary through most of the nighttime battle, and Pearson demanded that Jones surrender. "I have not yet begun to fight!" came the forceful reply, and the Americans struggled on until Pearson finally struck his colors.

Afterward, Jones returned to America commanding the borrowed warship *Ariel*, then visited France in 1781 to negotiate

September 24

MILITARY: British forces defending Savannah, Georgia, launch a determined sortie against French siege positions, losing 20 men but inflicting at least 70 casualties.

September 30

MILITARY: General John Sullivan marches his 3,500 men back from Indian territory to Fort Sullivan, Pennsylvania. In four months he has torched over 40 Indian settlements along with 160,000 bushels of corn. Moreover, he has dislocated many Iroquois Indians, forcing them to spend the winter months half-starved and exposed to the elements. Their discomfiture places an enormous logistical burden on the British at Fort Niagara.

- The remote British garrison at Natchez, Louisiana Territory, falls to Spanish forces under Don Bernardo de Gálvez.

claims to his numerous prizes. At that time, King Louis XVI made him a chevalier of France and gave him an elaborate sword. The Continental Congress also struck a gold medal in his honor, with Jones being the only Continental navy officer so honored. After the Revolutionary War ended in 1783, Congress began selling off its warships and Jones was forced to look for work overseas. In 1788 he tendered his services to Czarina Elizabeth II of Russia, who made him an admiral, and he won several notable victories over the Turks before losing his command to court intrigues. Jones then retired from active duty and lived in Paris. He died there in relative obscurity on July 18, 1792, and was interred in an unmarked grave. It was not until 1905 that his remains were positively identified and he was reburied in the chapel at the U.S. Naval Academy in Annapolis, Maryland, with military honors befitting a national hero. Along with John Barry, Jones is considered to be a founding father of the U.S. Navy who bequeathed to that service traditions of aggressive leadership and victory.

American naval officer John Paul Jones is considered one of the founders of the United States Navy and was the only officer of the Continental navy to receive a congressional gold medal. (*Independence National Historical Park*)

October 2

MILITARY: The Continental Congress mandates that blue cloth will replace green and buff as the official color of Continental army uniforms. The respective services are trimmed in specific colors: scarlet facings for artillery, white facings for light dragoons, and white, buff, red, or blue facing in the infantry.

October 3

NAVAL: The victorious squadron of Commodore John Paul Jones reaches Texel, the Netherlands, skillfully evading pursuit by eight British warships.

October 4

MILITARY: Indian and Loyalist forces under Simon Girty ambush Colonel David Rogers at the confluence of the Licking and Ohio Rivers, killing 57 men out of 70. They also capture a shipment of 600,000 Spanish dollars destined for New Orleans.

- French and American leaders reject a truce proposed by General Augustin Prevost so that he can evacuate women and children from Savannah. That same day allied cannon commence a steady but ineffectual bombardment of British defenses.

October 8

MILITARY: The allied siege of Savannah, Georgia, progresses steadily, but Admiral Comte Charles d'Estaing grows impatient and wishes to settle the matter quickly by a coup de main. General Benjamin Lincoln initially demurs, but eventually plans are drawn up to have militia forces under General Isaac Huger feint across the line while the main allied column of 4,000 men attacks the Spring Hill redoubt. Unfortunately for the allies, General Augustin Prevost has been informed of their plans by a deserter and stations his best troops there to receive the attack.

October 9

MILITARY: At dawn Franco-American forces under Admiral Comte Charles d'Estaing and General Benjamin Lincoln storm the British fieldworks surrounding Savannah, Georgia. However, the expected diversion by militia under General Isaac Huger fails to materialize when they get lost in a swamp, as do three out of four assault columns. The only force to proceed is 1,200 French and Continentals under General Lachlan McIntosh, which charges repeatedly against the Spring Hill redoubt. They are as often repulsed, although Colonel Francis Marion manages to plant his standard on the parapet before being driven off. General Kazimierz Pulaski then leads an ill-advised cavalry charge against British artillery and is mortally wounded. Admiral d'Estaing is himself twice wounded, rallying his men and leading them back into the fray before the effort finally collapses. Combined allied losses are nearly 1,000 while the British sustain only 155 casualties. The French-American alliance, already tenuous, suffers another heavy blow.

October 11

MILITARY: General Henry Clinton orders that the British base at Newport, Rhode Island, be abandoned and its 3,000-man garrison withdrawn to support impending actions in the south.

October 17

MILITARY: General George Washington orders the Continental army to assume its winter quarters at Morristown, New Jersey.

October 19

NAVAL: The French fleet of Admiral Comte Charles d'Estaing departs Savannah, Georgia, and sails for the West Indies to avoid the hurricane season. General Benjamin Lincoln's army, now outnumbered, falls back to Charleston, South Carolina.

October 23

NAVAL: The Royal Navy quickly and efficiently removes the 3,000-man British garrison at Newport, Rhode Island, and transports it back to New York. These troops will bolster upcoming operations against Charleston, South Carolina.

October 26

MILITARY: The celebrated light infantry leader, Lieutenant Colonel John G. Simcoe of the noted Queen's Rangers, is ambushed and captured at South River Bridge, New Jersey, by American militiamen. He is exchanged shortly after.

October 28

MILITARY: General Benjamin Lincoln ends the siege of Savannah and begins withdrawing to Charleston, South Carolina.

NAVAL: The Continental Congress replaces the Marine Committee with a five-man Board of the Admiralty, composed of two members of Congress and three commissioners; they are tasked with overseeing naval matters.

November 7

MILITARY: French-born colonel Charles Armand, marquis de Rouerie, succeeds the fallen Kazimierz Pulaski as head of the Pulaski Legion. In this capacity he captures a small Loyalist detachment under Major Mansfield Bearmore at Jeffers's Neck, New York.

NAVAL: The Continental frigate *Confederacy*, conveying John Jay to serve as America's first minister to Spain, is nearly dismasted by a storm but manages to put into Martinique for repairs.

November 20

NAVAL: Commodore Abraham Whipple's squadron, consisting of the frigates *Boston*, *Providence*, and *Queen of France*, and the sloop *Ranger*, is ordered south to aid in the defense of Charleston, South Carolina.

December 1

MILITARY: General George Washington completes deploying 12,000 men in their winter quarters at Morristown, New Jersey. This proves to be another harsh season of deprivation, exposure, death, and desertion, and the army will be greatly weakened by the time it emerges in the spring.

December 23

MILITARY: The court-martial of General Benedict Arnold convenes in Philadelphia, although he is charged with relatively minor offenses.

December 26

NAVAL: General Henry Clinton boards 8,700 men onto a fleet of 90 transports under Admiral Marriot Arbuthnot at New York. He is determined to capture Charleston, South Carolina, which eluded him in 1776 and whose fall would decisively alter the balance of power in the south. Clinton also places the 10,000-man New York garrison under General Wilhelm von Knyphausen, the first time a foreigner has been entrusted with such an important command.

1780**January 1**

MILITARY: A mutiny occurs at the West Point, New York, garrison, and 100 members of a Massachusetts regiment are allowed to depart. They are subsequently rounded up by force, pardoned again, and allowed to rejoin the army. The ring-leaders are lightly punished.

January 2

MILITARY: The Continental army at Morristown, New Jersey, endures great suffering and deprivation in winter, owing to extremely low temperatures and a lack of blankets, shelter, and clothing.

January 8

NAVAL: Captain John Barry sails with the 32-gun frigate *Alliance* on an Atlantic cruise that will net three merchantmen.

January 9

MILITARY: Alarmed for the well-being of his troops, General George Washington makes an emergency appeal to states bordering New Jersey to provide his hungry, shivering troops with food and clothing. He also reorganizes the requisition system by dividing each state into districts and assigning individual officers to oversee collection in each district. This new system will ameliorate supply shortages somewhat.

January 10

MILITARY: General Charles Lee, having written an offensive letter denouncing the Continental Congress, is summarily dismissed from the service; he retires to his estate and plays no further role in the war.

NAVAL: The Continental navy acquires the sloop *Saratoga*, the first of six ships that will bear that name.

January 15

MILITARY: Braving frigid weather, General William Alexander moves 2,500 men from Elizabeth Point, New Jersey, across the channel ice, on sleighs, against Staten Island. The British are alert for such a movement and fall back behind prepared positions that the Americans are unaware of. After a day of plundering and fruitless marching, Alexander returns to New Jersey with 17 captives and little else.

January 25

MILITARY: British forces on Staten Island retaliate for the recent raid by seizing and burning the New Jersey settlements of Newark and Elizabethtown.

January 26

MILITARY: General Benedict Arnold is court-martialed for financial speculation and malfeasance while commanding the garrison at Philadelphia and found guilty of two minor specifications. He is then mildly reprimanded by General George Washington and fumes indignantly over the sentence.

January 27

MILITARY: To alleviate the suffering of his troops, General George Washington drastically overhauls supply procedures in New Jersey, dividing that state into 11 districts and requisitioning specific food allotments from each. The scheme works well, and the new influx of food and supplies boosts the health and morale of the men.

February 1

MILITARY: A British amphibious force of 14,000 men under Admiral Marriot Arbuthnot and General Henry Clinton arrives at Tybee Island off Savannah,

Georgia, for a brief rest and refit. Meanwhile, the American garrison at Charleston, South Carolina, musters only 3,200 men under General Benjamin Lincoln. He desires to remove his army from danger but is pressured by Governor John Rutledge and city officials to stay put.

February 3

MILITARY: A British/Hessian force of 550 men under Lieutenant Colonel Chapple Norton departs Fort Knyphausen (Fort Washington), New York, and advances against an American outpost at nearby Mt. Pleasant. His target is 450 Continentals of the 10th Massachusetts under Lieutenant Colonel Joseph Thompson, billeted in and around Young's House. Norton gains their rear and charges, scattering them with a loss of 125 killed, wounded, and captured. British losses are 25.

February 9

MILITARY: A Spanish military expedition under Don Bernardo de Gálvez reaches Mobile Bay, where he disembarks 750 soldiers. Lieutenant Governor Elias Durnford, meanwhile, elects to defend Fort Charlotte and await reinforcements as the Spanish begin digging siege entrenchments.

February 10

NAVAL: The very large amphibious expedition of Admiral Marriot Arbuthnot and General Henry Clinton drops anchor off Charleston, South Carolina. Clinton is determined to avenge his 1776 humiliation here.

February 11

MILITARY: The combined forces of Admiral Marriot Arbuthnot and General Henry Clinton enter the North Edisto Inlet and land troops on John's Island. This places the enemy only 30 miles south of Charleston, but the Americans under General Benjamin Lincoln fail to react.

February 14

MILITARY: General Henry Clinton occupies Stono Ferry and James Island near Charleston, South Carolina, in order to entrap the American garrison within their works. Again, General Benjamin Lincoln does not interfere but only strengthens his fortifications.

February 23

MILITARY: The soon to be much-feared British Legion under Lieutenant Colonel Banastre Tarleton overruns a patrol of South Carolina militia near Charleston, killing 10 and capturing 14.

February 24

MILITARY: In a swift riposte, American cavalry under Colonel William Washington engage and repel the British Legion of Lieutenant Colonel Banastre Tarleton along the Ashley River, South Carolina. Washington subsequently withdraws to Monck's Corner to await developments.

March 3

MILITARY: General Benjamin Lincoln, commanding the American garrison at Charleston, South Carolina, is reinforced by the arrival of 700 Continental soldiers from North Carolina. However, fearful militiamen continue streaming out of the city with their families.

March 14

MILITARY: Don Bernardo de Gálvez and 1,400 men attack Fort Charlotte (Mobile), the capital of British West Florida. Two days later, the 300-man garrison under Lieutenant Governor Elias Durnford capitulates when a promised relief column from Pensacola fails to materialize in time.

NAVAL: Spanish efforts at Mobile are assisted by the American sloop *West Florida* under Captain William Pickles.

March 20

NAVAL: Commodore Abraham Whipple, commanding naval units at Charleston, South Carolina, withdraws his small squadron up the Cooper River and sinks several ash hulks to obstruct the passage of British warships. Admiral Marriot Arbuthnot, meanwhile, begins maneuvering his fleet into bombardment positions off the coast by slipping five frigates over the sandbar.

March 21

MARINES: Marine detachments culled from the Continental Squadron at Charleston, South Carolina, are sent ashore to man several artillery positions.

March 22

MILITARY: General Wilhelm von Knyphausen, commanding the New York garrison, leads a small raid against Hackensack, New Jersey, to obtain supplies. He returns without incident and begins to feel that the defenses and morale in that state are rather low.

March 23

MILITARY: In another spritely encounter, cavalry under Colonel William Washington and Lieutenant Colonel Banastre Tarleton clash indecisively at Pon Pon, South Carolina. The Americans incur 10 casualties, then withdraw unmolested.

March 25

MILITARY: General Henry Clinton's army at Charleston, South Carolina, is augmented by the arrival of Major Patrick Ferguson, a talented light infantry leader.

March 26

MILITARY: In another head-on encounter, Colonel William Washington bests the British Legion under Lieutenant Colonel Banastre Tarleton at Rantowles, South Carolina, taking seven prisoners.

March 29

MILITARY: General Henry Clinton marches 7,000 men across the Ashley River and commences the siege of Charleston, South Carolina. With British forces positioned across the neck of the Charleston peninsula, the American garrison of General Benjamin Lincoln is effectively sealed off.

April 1

MILITARY: The British make good progress in their siege and break a parallel trench within 800 yards of Charleston's defenses.

April 3

MILITARY: General George Washington, alarmed over developments in the Southern Department, orders the veteran general Johann de Kalb to Charles-

ton, South Carolina, with a small but rugged brigade of Maryland and Delaware Continentals.

April 6

MILITARY: By dint of hard slogging, General William Woodford evades British forces and slips into Charleston, South Carolina, with 750 Virginia Continentals.

April 8

NAVAL: Admiral Marriot Arbuthnot runs seven frigates and several troop transports past the guns of Fort Moultrie, Charleston harbor, further tightening the noose around the city.

April 10

MILITARY: Discounting the danger to his army, General Benjamin Lincoln declines escaping from Charleston, South Carolina, by crossing Biggin Bridge over the Cooper River. This day, the first series of parallel trenches is completed by the British, and General Henry Clinton calls upon the garrison to surrender; Lincoln refuses.

April 13

MILITARY: British artillery and warships commence a month-long bombardment of Charleston, South Carolina, as their siege trenches are pushed ever closer to the city.

April 14

MILITARY: Although Charleston, South Carolina, is closely invested, there remains an obscure but viable escape route across the Cooper River leading to Monck's Corner, 30 miles distant. It is garrisoned by 500 militia and cavalry under General Isaac Huger, who also guards a large train of supplies intended for the city's defenders. This day, however, a roving column of 1,400 cavalry, accompanied by mounted infantry under Lieutenant Colonel Banastre Tarleton and Major Patrick Ferguson, gallop outside the American camp. Pressing forward, Tarleton surprises American pickets and charges directly into Huger's camp. Ferguson then follows up with a savage bayonet attack and the defenders, who fail to make a coordinated stand, are routed. Huger and his usually capable second in command, Colonel William Washington, barely escape. The Americans lose 100 men killed, injured, and taken, along with 200 horses and 42 wagons of supplies captured, to three British wounded. The only remaining communication route out of Charleston, South Carolina, is now closed.

April 16

MILITARY: A detachment of the 3rd Pennsylvania Regiment under Major Thomas L. Byles is captured by 300 Hessians directed by Colonel Johann Du Puy at Paramus, New Jersey. The Americans suffer 50 men seized.

April 18

MILITARY: Lieutenant Colonel Francis Rawdon arrives at Charleston, South Carolina, with additional forces, bringing British troop strength up to 10,000.

April 20

MILITARY: With British siege trenches barely 250 yards from the defenses of Charleston, South Carolina, General Benjamin Lincoln summons another war

council. His officers ponder capitulation, but Lieutenant Governor Christopher Gadsden urges them to fight on, promising a civilian uprising if they try to surrender.

April 21

MILITARY: General Benjamin Lincoln parleys with General Henry Clinton and requests to surrender with the honors of war, which is refused.

April 24

MILITARY: A sortie by 200 Virginia troops storms the first line of British siege works at Charleston, South Carolina, but they withdraw after failing to inflict substantial damage.

April 25

MILITARY: British forces under General Henry Clinton commence a third series of parallel trenches only 30 yards from Patriot defenses at Charleston, South Carolina.

April 28

MILITARY: The marquis de Lafayette returns to Boston after a year's absence, bearing commissions of lieutenant general and vice admiral for General George Washington.

May 4

NAVAL: Congress promulgates the first official navy seal.

May 5

MILITARY: In a sign of things to come, American partisans capture 18 British soldiers after a brief skirmish at Wambaw, South Carolina.

May 6

MILITARY: Lieutenant Colonel Banastre Tarleton and 150 troopers of the British Legion pounce on 350 militiamen under Colonel Abraham Buford at Lenud's Ferry, South Carolina. The Americans are in the act of uniting with a third force under Colonel Anthony White when the British suddenly appear, scattering all three. The Americans lose nearly 100 men captured while Tarleton releases 18 soldiers seized on the previous day.

May 7

MILITARY: Fort Moultrie, guarding the entrance to Charleston, South Carolina, surrenders to the British with a loss of 200 men. Sullivan's Island is completely occupied the following morning, placing the entire harbor under British control.

May 11

MILITARY: British siege guns are so close to Charleston, South Carolina, that they begin firing hot shot directly into the town. The ferocity of the bombardment finally convinces civilian authorities to ask General Benjamin Lincoln to surrender rather than risk complete destruction.

May 12

MILITARY: General Benjamin Lincoln surrenders 5,400 men, 6,000 muskets, and 400 cannon to General Henry Clinton at Charleston, South Carolina, fol-

lowing a six-week siege. The militia are paroled and allowed to return home, but the Continentals pass into captivity. Commodore Abraham Whipple, the frigates *Providence*, *Boston*, and the sloop *Ranger* are also lost. In the course of the siege, Lincoln has sustained only 200 casualties while inflicting 250 on the British. The victorious Clinton, his “southern strategy” off to a successful start, makes preparations to return to New York while the aggressive General Charles Cornwallis is appointed theater commander in his stead. Charleston will be the biggest disaster to befall the United States in the Revolutionary War and also one of the largest American capitulations until the fall of Bataan in April 1942.

May 14

MILITARY: Colonel Abraham Buford retreats toward Hillsboro, North Carolina, being the last organized American force left in South Carolina.

May 18

MILITARY: General Charles Cornwallis marches inland with 2,500 veteran troops to stamp out all remaining Patriot resistance in South Carolina.

May 21

MILITARY: Sir John Johnson and Chief Joseph Brant lead a combined Loyalist/Indian force of 600 men that attacks settlements at Johnstown, New York, killing scores and taking 40 captives.

May 22

MILITARY: Sir John Johnson dispatches half his raiding force of 400 Loyalists and 200 Indians against the village of Caughnawaga, which is burned.

May 23

MILITARY: Having conducted another destructive foray through the Mohawk Valley, Loyalists and Indians under Sir John Johnson attack and burn Johnstown, New York, and then retire unmolested.

May 25

MILITARY: Two Connecticut regiments, subsisting on one-eighth of their assigned rations while also being five months arrears in pay, finally mutiny at Morristown and ignore all appeals by Colonel Return J. Meigs. The rebellion is subsequently quashed by Pennsylvania troops, but the incident underscores the widespread deprivation suffered by the army, as well as Congress’s inability to either fund or feed the troops.

- British captain Henry Bird departs Detroit at the head of 250 French militiamen and Great Lakes Indians to attack the American garrison at the Falls of the Ohio River (Louisville, Kentucky). En route he is joined by an additional 700 warriors.

May 26

MILITARY: Captain Fernando de Leyba and the 310-man Spanish garrison at St. Louis repulse an attack by 300 British soldiers and 900 Indians under Captain Emanuel Hesse.

May 27

MILITARY: General Charles Cornwallis, unable to overtake fleeing Americans by marching, sends 170 cavalry and 100 mounted infantry under Lieutenant Colonel

Banastre Tarleton ahead of the main column. His orders are to pursue, find, and destroy Colonel Abraham Buford before he reaches the safety of North Carolina. Tarleton drives his men mercilessly over dusty roads under a blazing sun, covering 105 miles in only two days. En route he almost captures Governor John Rutledge, who has recently escaped the surrender of Charleston, South Carolina.

- The remote outpost of Cahokia, Illinois Territory, repulses an attack by Indians and Loyalists.

May 29

MILITARY: British forces under Lieutenant Colonel Banastre Tarleton encounter an American force under Colonels Abraham Buford and William Washington at Waxhaws Creek, South Carolina. Buford, with 300 men of his 3rd Virginia Continentals, refuses an offer to surrender and draws his men up in a single line while his baggage train and artillery leave the field. Though outnumbered two to one, the British commander decides to attack the American left and center frontally while simultaneously turning their right. Buford then erroneously instructs his men to hold their fire until the British horsemen are at 10 paces: this enables Tarleton to reach the single row of infantry intact and crash through it. A wild melee ensues as the troopers begin slashing and sabering the fleeing survivors until Tarleton's horse is killed under him. Enraged British and Loyalists, thinking he has been killed, begin bayoneting several captives before order is restored. Buford's unit ceases to exist, with losses of 113 killed, 150 wounded, and 203 captured. The heavy death toll generates accusations of atrocity and the ominous charge of "Tarleton's Quarter" is born. The British sustain only three killed and 12 wounded, having crushed the last organized resistance in South Carolina.

June 1

NAVAL: A bloody, drawn battle ensues north of Bermuda between the 28-gun frigate *Trumbull* under Captain James Nicholson and the 32-gun British privateer *Watt* under Captain John Coulthard. In one of the most protracted fights of the war, Nicholson batters the British hull with several telling broadsides while Coulthard concentrates on American masts and rigging. Combat ceases after several hours, and both vessels limp home to safety. The Americans lose 48 men to a British loss of 92.

June 3

MILITARY: A victorious General Henry Clinton proclaims to the residents of South Carolina that all men of military age must actively declare their allegiance to the Crown and enlist in the local militia or be considered rebels.

NAVAL: The American privateer *Pickering* under Captain Jonathan Haraden, while cruising off the Spanish city of Bilbao, encounters an unidentified vessel in the darkness. This turns out to be the larger 22-gun privateer *Golden Eagle*, which he quickly storms and captures. Upon entering Bilbao harbor, Haraden runs headlong into the larger 42-gun privateer *Achilles*. However, he cleverly drops anchor near the shoals, forcing his adversary to approach head-on under accurate gunfire. At length, *Achilles* is seriously damaged and retreats while hundreds of milling Spanish laud the victors ashore.

June 6

MILITARY: Encouraged by reports of extreme duress in the American camp at Morristown, General Wilhelm von Knyphausen, commanding the New York garrison, sorties with 6,000 men and advances into New Jersey. He is counting on the alleged dissatisfaction of Continental troops to carry the day.

June 7

MILITARY: Colonel Elias Dayton, commanding the 3rd New Jersey Regiment and some militia, engages 2,500 Hessians and British under General Wilhelm von Knyphausen at Connecticut Farms, New Jersey. The militia perform with surprising audacity this day but are slowly driven back until reinforced by General William Maxwell's Continental brigade. Knyphausen, taken aback by the sheer number of militia flocking to oppose him, assumes he cannot safely cross the Rahway River bridge and withdraws. American losses are 65 men killed and wounded; Hessian losses are unknown, but British general Thomas Sterling is among those slain. Rather than retreat to New York, Knyphausen entrenches at De Hart's Point to maintain a presence in New Jersey.

June 8

MILITARY: Satisfied with the progress of the war in the south, General Henry Clinton sails back to New York. Any further campaigning will be conducted by the talented and aggressive General Charles Cornwallis.

June 9

MILITARY: British captain Henry Bird arrives at the Ohio River with 900 militia and Indians, but his native allies refuse to march farther to attack settlements near the falls (Louisville, Kentucky). Instead they persuade him to raid less-heavily defended areas along the Licking River.

NAVAL: The 26-gun Massachusetts frigate *Protector* under Captain John F. Williams engages and defeats the 32-gun privateer *Admiral Duff* under Captain Richard Stranger off Newfoundland. American losses are one killed and five wounded; only 55 British are saved after the prize suddenly explodes.

June 13

MILITARY: The Continental Congress appoints General Horatio Gates, victor of Saratoga, as the new head of the Southern Department. Again, this is accomplished without consulting General George Washington.

- Colonel John Moore begins rallying 1,300 North Carolina Loyalists to support the royal cause at his home near Ramsour's Mills. He seeks ultimately to join and support the army of General Charles Cornwallis, then in South Carolina.

June 20

MILITARY: Colonel Francis Locke leads 1,200 American militia against a Loyalist force of comparable size under Colonel John Moore at Ramsour's Mills, North Carolina. The Loyalists deploy along the crest of a nearby ridge, which affords them an excellent field of fire, but the Patriots begin infiltrating the woods around their flanks. A stiff fight then ensues between poorly trained amateurs on both sides; the bloody impasse continues until Locke manages to outflank his

opponent. Moore is subsequently routed and flees the field. Both sides suffer 150 casualties apiece in this costly and clumsily managed affair, but the American victory serves to dampen Loyalist enthusiasm for supporting the British.

June 21

MILITARY: General Johann de Kalb arrives at Hillsboro, North Carolina, at the head of 1,400 crack Continentals under Colonels William Smallwood and Mordecai Gist. His appeals for food and supplies from the local populace go ignored.

June 22

MILITARY: A British/Indian expedition under Captain Henry Bird attacks Ruddle's Station, Kentucky, with 1,000 men, mostly Indians. A few shots from Bird's artillery convince the 300 settlers to surrender, but as soon as the gates are opened the warriors rush inside, massacring several.

- After enduring an exceptionally harsh winter at Morristown, New Jersey, General George Washington moves the Continental army back into the field.

June 23

MILITARY: A combined British/Hessian expedition under General Wilhelm Knyphausen advances from Elizabethtown, New Jersey, and attacks American positions at Springfield. They immediately encounter stout resistance from the New Jersey militia under General Philemon Dickinson at Galloping Hill Road bridge, which further stiffens upon the arrival of General William Maxwell's Continental brigade. A determined frontal assault fails to dislodge the defenders, so Knyphausen resorts to an enveloping movement. When this maneuver also recoils, Knyphausen simply brings his superior numbers to bear against the regiments of Colonels Elias Dayton and Israel Angell, forcing them back from Springfield. Simultaneously, another British column hits Americans under Colonel Henry Lee defending a bridge on the Vauxhall Road. Again, British numbers prevail and General Nathanael Greene finally orders his men withdrawn to the safety of Short Hills. But Knyphausen, though victorious, is stunned by the extent of American resistance and questions the wisdom of continuing further. That evening, he orders a retreat to the coast and is harried by New Jersey militia every step of the way until the British and Hessians are ferried back to Staten Island. The defense of Springfield costs the Americans around 60 men; enemy losses are unknown but presumed to be in the vicinity of 300.

July 11

MILITARY: A 5,500-man French expedition under General Comte Jean de Rochambeau lands at Newport, Rhode Island, and finds the place nearly deserted. General William Heath eventually arrives from Boston to greet him.

July 12

MILITARY: An American militia force of 90 men under Colonels William Hull and Thomas Neal surprises and annihilates a 115-man detachment of the hated British Legion at Williamson's Plantation in South Carolina. Loyalist captain Christian Huck, having pitched his camp between two rail fences, is unable to maneuver and his men are cut down. The Patriots inflict 90 killed and wounded for the loss of one dead.

July 13

MILITARY: American militia under Colonels Elijah Clarke and John Thomas wipe out a Loyalist detachment at Cedar Springs, North Carolina, killing 35. American losses are put at four dead and 23 wounded.

NAVAL: A British fleet under Admiral Thomas Graves anchors off Sandy Hook, New Jersey, to reinforce Admiral Marriot Arbuthnot.

July 16

MILITARY: British and Indian raiders surprise Captain William Philip and his ranger company at Fisher Summit, Bedford County, Pennsylvania. They kill 10 Americans and capture their commander.

July 19

NAVAL: The British fleet under Admiral Marriot Arbuthnot anchors off Newport, Rhode Island, and blockades French ships and soldiers positioned there.

July 20

MILITARY: Partisans under Colonel William R. Davie defeat a larger Loyalist force under Major John Carden at Flat Rock, South Carolina.

July 21

MILITARY: General Anthony Wayne is dispatched with 2,000 Pennsylvania Continentals to reduce a 70-man British stockade at Bull's Ferry, New Jersey. He bombards the enemy with four 6-pounder cannon, which prove too light to inflict serious damage, then fails to evict the garrison. Word of approaching British reinforcements induces Wayne to cancel the attack, and he hastily falls back to Totowa. American casualties in this affair total over 60.

July 25

MILITARY: General Horatio Gates assumes command of the Southern Department at Coxe's Mill, North Carolina, succeeding General Johann de Kalb. The latter reverts to his nominal position as commander of the Delaware and Maryland Continentals.

July 27

MILITARY: General Horatio Gates orders an advance against the important British supply depot at Camden, South Carolina. At the time, he has only a brigade of Delaware and Maryland Continentals under General Johann de Kalb and the mounted Pulaski Legion under Colonel Charles Armand. Moreover, Gates, against the advice of his officers, deliberately chooses a barren, direct route to Camden over a circuitous approach via Salisbury and Charlotte that would entail an additional 50 miles of marching but would take the soldiers though a friendlier, well-stocked region. The path Gates chooses, while shorter, is strongly Loyalist in tenor, barren, and poorly suited for feeding an army already low on supplies.

July 30

MILITARY: A 600-man militia force under Colonels Isaac Shelby, Elijah Clarke, and Charles McDowell convinces Colonel Patrick Moore and the Loyalist garrison of Thickety Fort (Fort Anderson), South Carolina, to surrender without a fight. The militia seize 93 captives.

August 1

MILITARY: Chief Joseph Brant and his Mohawks raid the settlement at Canajoharie, New York, killing 15, capturing 50, and burning 53 buildings. He declines to attack Fort Plank, occupied by a regiment under Colonel Peter Gansevoort, and withdraws with his booty and captives in tow.

- General Thomas Sumter and 600 militia unsuccessfully besiege a Loyalist outpost at Rocky Mount, South Carolina. Lacking artillery, Colonel Thomas Neal charges but fails to evict 150 defenders under Lieutenant Colonel George Turnbull. The Americans, completely rebuffed, withdraw with a loss of 12 men.
- American militia under Colonel Elijah Clarke engage a force of 210 Loyalists at Green Springs, South Carolina. The Loyalists have been dispatched there by Major Patrick Ferguson with orders to hunt down Clarke and capture him. Clarke thoroughly routs this adversary in a sharp engagement of 15 minutes. Both sides lose 30 men apiece, but the Loyalist dead are left on the ground.
- American militia under Majors Tristan Thomas and James Gillespie attack a mixed British/Loyalist flotilla under Colonel Ambrose Mills as it floats down the Pee Dee River at Hunt's Bluff, South Carolina. The Americans also deploy a "Quaker" cannon made from a hollowed log, which tricks the enemy into surrendering. A British supply vessel moving upstream is subsequently taken.
- Colonel George Rogers Clark leads 1,000 Kentucky militia across the Ohio River on an extended raid against Shawnee settlements at Chillicothe and Piqua.

August 2

MILITARY: Chief Joseph Brant, commanding 50 Loyalists and Indians, attacks Fort Plank (Canajoharie), New York, but fails to dislodge the defenders and withdraws.

August 3

MILITARY: General Francis Marion and 20 guerrillas join General Horatio Gates as his army crosses the Pee Dee River en route to Camden, South Carolina. Gates, who has no use for irregulars, promptly sends them off on an extended scouting mission.

August 4

MILITARY: The British expedition of Captain Henry Bird concludes when he arrives back at Detroit with 150 American captives. An equal number have been callously murdered by his Indian allies en route, which will lead to retaliatory raids into Shawnee territory.

August 5

MILITARY: General Benedict Arnold lobbies hard to become commander of strategic West Point, New York, and is finally appointed by General George Washington. Unknown to all, Arnold is intending to betray that post to the British.

- General Richard Caswell and 2,000 North Carolina militia join General Horatio Gates's army at Lynches Creek, South Carolina. The famished men gorge themselves on green peaches and corn en route, which results in extreme gastronomical distress.

August 6

MILITARY: A militia band under General Thomas Sumter attacks the 500-man Loyalist outpost under Major John Carden at Hanging Rock, South Carolina, in concert with forces under Colonel William R. Davie. The 800 Americans are initially successful on the left and center but then pause to loot the enemy camp. This delay allows Connecticut Loyalist infantry to form a square, supported by two small cannon, and beat back successive attacks. The approach of the British Legion from nearby Rocky Mount induces Sumter to call off the attack and retire. The Americans nonetheless inflict 192 casualties for a loss of 12 killed and 41 wounded. Hanging Rock is subsequently abandoned as an outpost.

August 8

MILITARY: Colonel George Rogers Clark and 1,000 men pursue the Shawnee from their main settlement at Chillicothe, Ohio, to the fortified town at Piqua. There he attacks and heavily defeats the Indians, killing 73 in exchange for 20 dead and 40 wounded of his own.

- Militia commanded by Colonels Elijah Clarke and Isaac Shelby are ambushed by Loyalist forces under Major Patrick Ferguson at Cedar Springs, South Carolina. However, the Americans quickly turn the tables on their antagonists, driving them off for a loss of four dead and 23 injured.

August 9

MILITARY: Colonel George Rogers Clark defeats Shawnee warriors on the Little Miami River, Ohio, and torches their village.

- A British column under General Charles Cornwallis departs Charleston, South Carolina, and hurriedly marches to reinforce Lieutenant Colonel Francis Rawdon at Camden. He takes with him 2,200 battle-hardened veterans.

August 11

MILITARY: General Horatio Gates, while crossing Lynches Creek, skirmishes with British light troops under Lieutenant Colonel Francis Rawdon. The Americans flank Rawdon's position by fording the creek downstream, and he withdraws in good order. This places Gates only 15 miles northeast of Camden, South Carolina.

August 14

MILITARY: General Horatio Gates reaches Rugeley's Mills, South Carolina, where he is reinforced by 800 Virginia militia under General Edward Stevens and continues marching toward Camden. He also dispatches 400 men to join the partisans of General Thomas Sumter, who intends to raid a British supply train.

August 15

MILITARY: General Horatio Gates receives additional reinforcements in the form of 100 Maryland Continentals and 300 North Carolina militia. However, he errs in issuing molasses rations, which play havoc on the digestive tracts of his men. Ironically, as the Americans proceed down the road to Camden, they collide head on with General Charles Cornwallis moving up the same path. A skirmish ensues in the predawn darkness, and then both sides establish camps and await daybreak.

- American militia and Continentals under Colonel Thomas Taylor are detached by General Thomas Sumter to attack Fort Carey (Wateree Ford), South Carolina. Taylor is successful, capturing Colonel Isaac Carey, 30 prisoners, and 36 wagonloads of provisions. They then retire to Sumter's camp, snaring an additional 70 British and eight wagons en route.

August 16

MILITARY: General Horatio Gates prepares to engage British forces under General Charles Cornwallis at Camden, South Carolina. The battlefield is an open meadow surrounded on either flank by swamps and pine forests. Gates has slightly fewer than 4,000 soldiers, mostly militia but built around a solid nucleus of Delaware and Maryland Continentals under General Johann de Kalb. Colonel William Smallwood commands the 1st Maryland Regiment in reserve while the Pulaski Legion under Colonel Charles Armand covers the left flank. Gates errs grievously by placing all his Virginia and North Carolina militia along his center and left flank, where they confront the best regiments in the British army. Cornwallis, true to his European training, deploys his elite units, such as the crack Royal Welsh Fusiliers, on his right flank, the traditional "post of honor." His left consists of regulars and Loyalists under Lieutenant Colonel Francis Rawdon, with the British Legion under Lieutenant Colonel Banastre Tarleton in reserve. After a brief artillery exchange, the British advance and Colonel Otho H. Williams, sensing some disorder in their approach, suggests an immediate attack on their right. Gates complies, but his raw militiamen receive one volley from the British, then flee the field en masse. North Carolina levies holding the center likewise depart, and in short order only de Kalb's Continentals hold their position. These troops withstand several attacks until Cornwallis wheels his entire right flank upon the unsuspecting Americans, covered in smoke and unaware they stand alone. By the time de Kalb realizes the danger it is too late, and his Continentals are nearly surrounded. He goes down fighting, fatally injured by 11 wounds as his remaining soldiers break and flee. Gates himself spurs his horse and ignominiously gallops off at the first sign of disaster, not stopping until he reaches Charlotte, 60 miles distant. Only 700 survivors join him there three days later. American losses are around 250 dead and 800 wounded and prisoner; Cornwallis sustains around 300. This severe defeat literally erases all organized American resistance in South Carolina and in most of the south. Cornwallis subsequently orders Tarleton's cavalry to hunt down the partisan band of Thomas Sumter, then operating in the same area.

August 18

MILITARY: Lieutenant Colonel Banastre Tarleton catches the guerrillas under General Thomas Sumter off guard at Fishing Creek, South Carolina, routing them. Sumter's force, exhausted by a forced march and laden with wagons and prisoners, is unable to outpace its pursuers. Worse, Sumter inadvertently allows them to encamp and repose at Fishing Creek with minimal safeguards, blissfully ignorant that Tarleton is nearby, watching their movements. The British Legion suddenly charges into the American camp, coming between the militia and their stacked arms, routing them. For a loss of 16 men, the British kill 150 Americans and capture 300 more. Sumter barely escapes the disaster yet immediately begins

rallying the survivors to fight again. In concert with Camden, this defeat eliminates organized resistance to British rule in South Carolina.

- American militia under Colonels Isaac Shelby, Elijah Clarke, and James Williams are sent to attack a British/Loyalist force under Colonel Alexander Innes encamped near Musgrove Mill, South Carolina. An advance guard of 25 men attacks the camp and entices the enemy to pursue and charge headlong into a devastating ambush. The Americans inflict 63 killed, 90 wounded, and 70 captured with a loss of four dead and eight injured. This is the first American triumph since the defeat at Camden and partially boosts morale.

August 20

MILITARY: General Francis Marion surprises a British detachment under Captain Jonathan Roberts at Great Savannah (Nelson's Ferry), South Carolina. The British had apparently bivouacked on the plantation of General Thomas Sumter, well-known to the Americans, who soundly defeat Roberts. Marion takes 24 captives and also repatriates 150 American prisoners.

September 4

MILITARY: General Francis Marion, with 50 militiamen, routs a detachment of 250 Loyalists under Major Micajah Ganey at Blue Savannah, South Carolina. He allows the enemy to walk into a carefully staged ambush, which routs the advance guard, then charges full tilt into their ranks. Such aplomb unnerves Ganey's men, and the majority drop their weapons and flee into the swamps along Little Pee Dee River. Marion loses three men wounded.

September 9

MILITARY: Defying the orders of his superior, General Charles Cornwallis begins his invasion of North Carolina by advancing upon Charlotte. This constitutes a major departure from the systematic southern strategy outlined by General Henry Clinton and imperils British chances for victory.

September 12

MILITARY: Major Patrick Ferguson, pushing into western North Carolina, engages an American force at Cane Creek. This marks the farthest extent of the British advance.

September 14–18

MILITARY: A body of 430 American militiamen under Colonels Elijah Clarke and James McCall besieges Loyalists and Indians under Colonel Thomas Brown at Augusta, Georgia. The Americans charge and displace the Indians from several outposts until they run headlong into a fortification called the White House. The Loyalist garrison steadily repels them, inflicting 60 casualties, and the Americans finally withdraw in the face of a relief column marching from Fort Ninety Six. Brown subsequently hangs 13 wounded Patriots from a staircase for violating their parole.

September 20–22

MILITARY: General George Washington and General Comte Jean de Rochambeau conduct a preliminary strategy conference at Hartford, Connecticut. Washington strongly suggests attacking New York, but the French demur until they have a

larger fleet in the area. Rochambeau also favors a campaign in the Chesapeake region, but nearly a year passes before this is manifested.

September 21

MILITARY: General Benedict Arnold decides to betray strategic West Point to the British and secretly meets with Major John André. When André's ship *HMS Vulture* sails off, Arnold is stranded behind enemy lines and spends the night at the home of a local Loyalist.

- A force of 150 militia under Colonel William R. Davie surprises a 60-man detachment of the British Legion under Major George Hanger at Wabab's Plantation, North Carolina. Noting a lack of sentries, Davie sends several marksmen into a nearby building to distract the British. He then leads a mounted charge down a lane traversing the plantation, routing Hanger's command. The entire detachment is nearly annihilated, losing 12 killed and 47 wounded. Davis sustains one man wounded.

September 23

MILITARY: Major John André dons civilian garb and attempts to pass through American lines. He carries concealed in his boot information about West Point's defenses provided by General Benedict Arnold. After approaching an American checkpoint, André is apprehended by three militiamen, who uncover the secret documentation in his boot heel. Word of his arrest is quickly passed to Arnold's headquarters, at which point his treacherous plot begins unraveling.

September 25

MILITARY: His perfidy unmasked, General Benedict Arnold flees to the British warship *HMS Vulture*, anchored in the Hudson River, and formally joins the British side. The captive major John André is slated to be tried as a spy.

September 26

MILITARY: A large gathering of "Over the Mountain Men" (frontier militiamen) occurs at Sycamore Shoals (Johnson City, Tennessee) as Colonels Isaac Shelby and John Sevier prepare to confront the Loyalists of Major Patrick Ferguson. In time they are joined by 400 Virginians under Colonel William Campbell, 160 North Carolinians under Colonel Joseph McDowell, and additional soldiers under Colonel Benjamin Cleveland.

- American militia under Colonel William R. Davie engage the advance guard of General Charles Cornwallis's army at Charlotte, North Carolina. The British Legion under Major George Hanger trots into town and confronts 20 militiamen behind a stone wall. Davie and his small command, backed by 70 riflemen under Major Joseph Graham, withstand two determined charges. Cornwallis then arrives on the scene, berates his embarrassed troopers, and orders light infantry under Lieutenant Colonel James Webster to turn the American right. Davie then withdraws in good order, losing six killed and 13 wounded; British losses are around 22.

September 27

MILITARY: Major Patrick Ferguson, aware that the western militia is pulling together in strength to oppose him, withdraws from the Catawba River, North Carolina, and marches for the perceived safety of King's Mountain, South Carolina.

September 29

MILITARY: General Francis Marion and 50 militiamen engage a Loyalist contingent of similar size under Colonel John Ball at Black Mingo Creek, South Carolina. After an initial repulse, Marion rallies his men and routs the enemy, killing and capturing 20 of them. American losses are two killed and eight wounded, while the Loyalists incur 16 casualties. Victorious Marion withdraws to his enclave in the swamps of eastern South Carolina.

October 1

MILITARY: Colonel William Campbell of Virginia accedes to the command of a large force of western militia gathering at Gilbert Town, North Carolina, to oppose Major Patrick Ferguson's Loyalists. Campbell is then seconded by Colonels Isaac Shelby and John Sevier.

October 2

MILITARY: Major John André is hung as a spy at Tappan, New York. Like Nathan Hale, his calmness and stoicism at the gallows impresses the American officers present.

- Colonel Daniel Morgan arrives at Hillsboro, North Carolina, in response to an appeal from General Horatio Gates. He also receives command of a light corps consisting of light infantry and light dragoons under Lieutenant Colonel William Washington.

October 3

MILITARY: The Continental Congress reduces the standing establishment of the Continental army to 58 regiments of infantry, four of artillery, and four of cavalry.

October 7

MILITARY: The Continental Congress, finally acting upon the advice of General George Washington, appoints General Nathanael Greene commander of the Southern Department.

- Patriot militia forces under Colonels William Campbell, Isaac Shelby, Benjamin Cleveland, and John Sevier entrap a large body of Loyalists under Major Patrick Ferguson at King's Mountain, South Carolina. Ferguson arrays his King's American Rangers, 900 strong, along the top of a wooded eminence whose slopes are heavily forested and afford the Patriots cover as they approach. The frontiersmen, numbering 1,100 men, quickly surround Ferguson's position and begin working their way up the slopes, Indian style. The Loyalists respond with several downhill bayonet charges that roll the attackers back but expose the rangers to highly accurate rifle fire from the front and flanks. Within the hour, Shelby forces his way up the southern crest, pushing Ferguson back upon his main encampment. Surrounded and with men falling fast around him, Ferguson rallies a few mounted men and tries escaping but is pierced by six bullets and killed. The Loyalists then try to surrender but receive a taste of "Tarleton's Quarter" until the colonels can restore order. Ferguson's entire force is annihilated, with 157 dead, 163 wounded, and 698 captured. The Americans lose only 28 killed and 64 wounded in this very lopsided encounter. This disaster strips General Charles Cornwallis of his best light infantry, and he will consequently suspend his invasion of North

Carolina for several months. It also revives American hopes while dashing those of regional Loyalists.

October 9

NAVAL: The Continental sloop *Saratoga* under Captain John Young captures three British brigs before vanishing without a trace off the Delaware Capes.

October 10

MILITARY: A quick raid by 770 Loyalists and Indians under Major Christopher Carleton nets the entire 75-man garrison of Fort Anne, New York, under Captain Seth Sherwood.

October 11

MILITARY: Loyalists and Indians under Sir John Johnson and Chief Joseph Brant capture Fort George, New York, then raid settlements in the vicinity of southern Lake George.

October 13

MILITARY: The Continental Congress promotes Daniel Morgan of Virginia to brigadier general at Hillsboro, North Carolina.

October 14

MILITARY: General Charles Cornwallis, now deprived of light infantry, withdraws to Winnsboro, South Carolina, to rest and refit over the winter.

October 15

NAVAL: General Alexander Leslie sails with 2,500 men from New York on an extended raid in Virginia to support the efforts of General Charles Cornwallis in North Carolina. His orders are to raid the coastline, wreck forts, and capture supplies. General Henry Clinton also weighs the possibility of seizing Portsmouth and establishing it as a permanent base of operations against Richmond and the interior.

- Don Bernardo de Gálvez sails from Havana, Cuba, with 3,800 men en route to Pensacola.

October 16–19

MILITARY: A force of 800 Loyalists and Indian settlers under Sir John Johnson and Chief Joseph Brant attack the Schoharie Valley settlements, New York, burning several buildings. However, they are unable to dislodge the 200-man garrison at Middle Fort. When Major Melancthon L. Woolsey attempts to surrender, he is forced by noted marksman Timothy Murphy and others to fight on.

October 19

MILITARY: Sir John Johnson, with a mixed force of 1,000 Loyalists and Indians, attacks and defeats a body of 130 militiamen under Colonel John Brown at Fort Keyser, New York. They then lay waste to the nearby village of Stone Arabia. However, the militiamen subsequently regroup around reinforcements brought up by General Robert Van Rensselaer, who pursues and counterattacks the raiders at Klock's Field. The vengeful Patriots brush aside some Mohawks and Hessians but cannot dislodge Johnson's main force, sequestered behind improvised breastworks. The presence of a small Loyalist cannon dissuades Van Rensselaer from attacking further, and Johnson beats a hasty retreat after abandoning his guns and baggage.

October 20

MILITARY: General George Washington solicits a volunteer from Major Henry Lee's Partisan Corps to locate and abduct the renegade general Benedict Arnold. Sergeant Major John Champe will "defect" to the British that evening.

October 21

MILITARY: After heated debate, Congress finally agrees to grant Continental officers half-pay for life in retirement, and an end-of-service payment for enlisted ranks. This represents a major victory for General George Washington, who lobbied heavily for these provisions.

October 22

MILITARY: Captain Walter Vrooman, leading a 60-man detachment, pursues the raiding force of Sir John Johnson until he is ambushed at Kanadesaga, New York, losing four dead and 56 captured.

October 25

MILITARY: General Francis Marion and 150 partisans surprise Loyalists under Colonel Samuel Tynes at Tearcourt Swamp, South Carolina. Attacking simultaneously in three columns, they rout their opponents, killing three, wounding 14, and capturing 23 without loss. Marion also seizes 80 horses and many valuable supplies.

October 26

MILITARY: Militia under Colonel Francis Marion lead a successful attack near Tearcoat Swamp, South Carolina, capturing several horses and supplies.

November 8

MILITARY: General Charles Cornwallis dispatches Major James Wemyss of the 63rd Foot from Winnsboro, South Carolina, to hunt down troublesome partisans under General Thomas Sumter. Wemyss commands 210 mounted infantry of his own regiment and 40 additional dragoons from the British Legion.

November 9

MILITARY: A British raiding column of 250 men of the 63rd Regiment under Major James Wemyss surprises 60 Americans under General Thomas Sumter at Fishdam Ford, South Carolina. The British charge directly into the American camp undetected but, highlighted by campfires, they sustain heavy losses. Sumter is roused from his sleep only moments before a party of British dragoons push into his tent, looking for him. The British overrun the encampment and are on the verge of pushing the Georgia militia into the river, when South Carolina troops under Colonel Thomas Taylor hit them with enfilade fire. After a hard fight the British gradually withdraw with seven dead and 25 captured, including Wemyss. Sumter, lucky to have lost only four killed and 14 wounded, likewise beats a hasty retreat to Hawkins Mill on the Tyger River.

November 15

MILITARY: After fruitless campaigning, General Alexander Leslie concludes his Virginia raid and departs Portsmouth for New York. The damage he inflicted is less than hoped for and does little to assist the major British effort farther south.

- American militiamen under General Francis Marion attempt to seize Georgetown, South Carolina, which is defended by an 80-man British garrison recently reinforced by 200 Loyalist militia. The two sides skirmish briefly at White's Bridge, and Marion concludes he lacks sufficient strength to attack and so withdraws. He loses two killed and three wounded but secures 12 British captives.

November 20

MILITARY: Hotly pursued, General Thomas Sumter and Colonel Elijah Clark take 1,000 men and make a determined stand against 400 British dragoons and infantry under Lieutenant Colonel Banastre Tarleton at Blackstock's Plantation, South Carolina. The Patriots are strongly posted, with the Tyger River guarding their rear and right flank, while several plantation buildings on a nearby hill form their left. Additional troops lie in the nearby woods and await the British advance. Tarleton first commits the 63rd Foot to a frontal assault that drives the militia up the hill, from which the Americans spring an ambush from the buildings. As this drama unfolds, a body of mounted militia manages to slip around the rear of the British dragoons and deliver a point-blank volley that empties many saddles. Tarleton, his army suddenly crumbling around him, orders his cavalry forward. They are badly repulsed, but at this critical juncture Sumter is seriously wounded and disabled. The British hurriedly withdraw from the field, and the Americans pursue them briefly, returning with several captured horses. Tarleton admits to a loss of 50 men while the Americans sustain three killed and four wounded. Sumter, while victorious, is out of action for several weeks.

November 22–23

MILITARY: A party of 80 dismounted troopers from the 2nd Continental Dragoons under Major Benjamin Tallmadge embarks at Fairfield, Connecticut, and crosses Long Island Sound at night. They storm Fort St. George (Brookhaven), New York, guided by Tallmadge, a native of the town. The Americans kill seven and seize 54 prisoners for one man wounded. They also burn 300 tons of hay intended as forage before falling back.

November 30

MILITARY: Major Henry Lee gains promotion to lieutenant colonel and receives a legion of 300 dragoons and three companies of picked, light infantry. He then drills them into one of the most feared and effective formations in the Continental army.

December 3

MILITARY: General Nathanael Greene arrives at Charlotte, North Carolina, assuming command of the Southern Department from General Horatio Gates. With only 2,500 Continentals and militia at hand, he boldly initiates offensive operations against superior British forces.

December 4

MILITARY: Colonel William Washington employs a pine log, or "Quaker gun," to dupe Colonel Henry Rugeley and 155 Loyalists into surrendering at Rugeley's Mill, South Carolina.

December 8

MILITARY: Colonel John Sevier and 250 North Carolina militiamen heavily defeat the Cherokee at Boyd's Creek along the French Broad River, losing only one man.

December 11

MILITARY: Sergeant Major John Champe, having surreptitiously "defected" to General Benedict Arnold's Loyalist force, fails to kidnap the renegade general and returns to American lines in Virginia.

December 18

NAVAL: Captain John Paul Jones departs France in the 14-gun sloop-of-war *Ariel*; en route he meets and subdues the British privateer *Triumph*, Jones's final action in the Continental navy.

December 19

MILITARY: Disregarding the risks, General Nathanael Greene daringly splits his forces by sending General Daniel Morgan and 600 light troops on a wide sweep through South Carolina. He is at liberty to attack the rear of General Charles Cornwallis's army but is also instructed to rejoin Greene at Cheraw if the British move against American forces gathered there. Greene also directs Colonel Tadeusz Kosciuszko to begin building light, mobile boats for fording rivers.

December 26

MILITARY: The army of General Nathanael Greene establishes a base camp at Cheraw, South Carolina, to gather in local recruits and possibly strike at General Charles Cornwallis's army should he advance into North Carolina.

December 28

MILITARY: A force of 280 American cavalry and mounted infantry under Colonels William Washington and James McCall routs a body of Loyalists of comparable size under Colonel Thomas Waters at Hammond's Store (Abbeville), South Carolina, killing or wounding 150 and taking 40 prisoners. The Patriots lose one man and inflict another crippling blow to Loyalist interests. General Charles Cornwallis, angered by the extent of this partisan attrition, prepares to dispatch Lieutenant Colonel Banastre Tarleton after the raiders.

December 30

MILITARY: General Benedict Arnold, now fighting for the British, lands at Hampton Roads, Virginia, and commences a lengthy raid up the James River.

1781**January 1**

MILITARY: Congress authorizes a reorganization plan for the Continental army that calls for 49 infantry regiments, one regiment of Canadians, four artillery regiments, four mixed infantry/cavalry legions, two partisan corps, and one corps of artificers.

- A mutiny among the Pennsylvania line erupts at Mount Kemble, New Jersey, over expiring enlistments. Roughly 2,000 men leave camp determined to march on Philadelphia and present their grievances to the Continental Congress.

General Anthony Wayne, who sympathizes with the soldiers, harangues them to return to camp but is ignored.

- A British expedition of 1,800 men under General Benedict Arnold brushes aside 200 American militia near Jamestown, Virginia, and prepares to march on Richmond.

January 2

MILITARY: A Spanish expedition consisting of 60 militia and 60 Indians under Captain Eugene Pourre departs St. Louis (Missouri) and marches for the British-held outpost of Fort St. Joseph, Michigan.

January 3

NAVAL: A British expedition of 100 regulars and 500 Indians under Colonel Johann von Hanxleden sails from Pensacola to attack Spanish forces defending Fort Charlotte at Mobile.

January 4

MILITARY: The marquis de Lafayette, Arthur St. Clair, and John Laurens approach mutinous troops at Princeton, New Jersey, but fail to persuade them to ground arms. In New York, General Henry Clinton, now apprised of difficulties in the American camp, dispatches agent John Mason to solicit defections.

January 5

MILITARY: General Benedict Arnold and Lieutenant John G. Simcoe scatter 200 Virginia militia guarding Richmond. They then offer to spare the city if the troops are allowed to confiscate tobacco supplies, but Governor Thomas Jefferson refuses. For two days, Arnold's men plunder and burn several buildings before finally withdrawing unmolested to Portsmouth.

January 6

MILITARY: Colonel James Reed, representing the Continental Congress, arrives at Maidenhead, New Jersey, to confer with mutineers at Princeton. British agent John Mason also clandestinely arrives to begin secret negotiations with the soldiers.

- General Charles Cornwallis, apprised that General Nathanael Greene has split his forces in two, does likewise and orders Lieutenant Colonel Banastre Tarleton and 1,100 men to pursue the light force commanded by General Daniel Morgan. Specifically, Tarleton is to destroy the Americans before they can reunite with their main force under Greene.

January 7

MILITARY: A 150-man Spanish garrison under Lieutenant Ramón del Castro repulses a determined attack upon Mobile by a British force commanded by Colonel Johann von Hanxleden. Spanish losses are 14 killed and 23 wounded while the attackers sustain 38 casualties.

January 8

MILITARY: Mutinous Pennsylvania soldiers accept Colonel James Reed's offer of amnesty and his pledge that the Continental Congress will honor all its promises to them. The mutiny then collapses and those soldiers eligible for discharge are allowed to leave.

- Lieutenant Colonel John G. Simcoe and 40 mounted rangers are dispatched to Westover, Virginia, to disperse 150 American militia gathered at Charles City Court House, Virginia. Simcoe surprises his quarry in a well-executed night attack, killing 20 and capturing eight; British losses are one dead and three injured.

January 10

MILITARY: A Large raiding force under General Benedict Arnold departs Westover, Virginia, on a plundering expedition down the James River.

January 11

MILITARY: British agent John Mason, caught soliciting defections among American mutineers, is hung as a spy at Princeton, New Jersey.

January 14

MILITARY: A Patriot militia detachment under Colonel Peter Horry fights a confused skirmish with Loyalists under Lieutenant Colonel William Campbell of the Queen's Rangers at Waccamaw Neck, South Carolina. The Americans lose one wounded to a Loyalist tally of three dead and two injured.

January 16

MILITARY: The British Legion of Lieutenant Colonel Banastre Tarleton steals a march on the light forces of General Daniel Morgan by crossing the Pacolet River at night and advancing rapidly upon Morgan's camp. The Americans hastily scamper off, abandoning their breakfast to the enemy, and fall back until reaching a meadow locally known as Hannah's Cowpens. Morgan does not dare risk crossing the nearby Broad River with enemy troops at his back, so that night he devises a bold plan to defeat the impetuous Tarleton. He ingeniously arrays his men into three distinct lines: the first, composed of Georgia riflemen, is instructed to fire two volleys at the oncoming British, paying particular attention to British officers, then retire. The second line, militiamen from North and South Carolina under General Andrew Pickens, is likewise ordered to fire two volleys and then retreat. Morgan's third and final line consists of redoubtable Delaware and Maryland Continentals under Colonel John E. Howard, who are to stand fast on the hilltop and swap volleys with the enemy while the cavalry under Colonel William Washington strikes Tarleton's flank. It is a perilous prospect, considering that any possible American withdrawal is cut off by the river in their rear. Morgan is gambling that his adversary's famed impetuosity will carry the day for the Americans.

January 17

MILITARY: After a dogged chase, Lieutenant Colonel Banastre Tarelton and, 1,100 British troops catch up with General Daniel Morgan's fleeing forces at Cowpens, South Carolina. As anticipated, he immediately attacks without proper reconnaissance and plunges headlong into the trap laid for him. The first and second lines of Morgan's force fire two well-aimed volleys apiece, toppling many officers, then quickly withdraw to the rear. The British, though staggered, surge forward to engage the veteran Continentals of Colonel John E. Howard, who suddenly feign a retreat and give ground. At a given signal, Morgan has his regulars suddenly turn around to deliver a point-blank volley into their disorganized pursuers, stunning them. Colonel William Washington then spurs his dragoons forward, charges

The Battle of Cowpens is a major tactical victory for the Americans, January 17, 1781. (*U.S. Army Center of Military History*)

over the hill, and takes Tarleton in the flank, as does the newly re-formed militia on the other side of the ridge. It is a superbly executed double-envelopment, and the British army literally disintegrates. After trading sword cuts with Washington, Tarleton ignominiously flees the field after his surviving cavalry refuses to charge. Cowpens is an American tactical masterpiece and a crushing blow to General Charles Cornwallis, who has now lost his remaining light troops. British casualties total 110 killed, 229 wounded, and 600 captured—out of 1,100 men. Morgan loses only 12 killed and 61 wounded.

January 19

MILITARY: The raiding expedition of General Benedict Arnold, having plundered Cobham and Smithfield, Virginia, next defeats a militia force gathered at Hood's landing and takes up winter quarters at Portsmouth to await reinforcements.

- General Charles Cornwallis, once informed of the disaster at Cowpens, begins arduously pursuing American forces under General Nathanael Greene across the northernmost reaches of North Carolina. By dint of rapid marching, he hopes to engage and destroy either Greene or General Daniel Morgan before they can unite.

January 20–27

MILITARY: New Jersey troops at Pompton, New Jersey, mutiny and march out of camp, ignoring their officers' pleas to negotiate. The men get as far as Chatham when they confront General Robert Howe's division and are persuaded to ground arms and return.

January 21

MILITARY: General George Washington dispatches General Robert Howe with 500 soldiers to suppress the rebellious New Jersey soldiers.

January 22

MILITARY: American forces under Lieutenant Colonel William Hull attack a Loyalist outpost at Morrisania (Bronx), New York, under Lieutenant Colonel James De Lancey. The Americans are rebuffed and withdraw after inflicting 100 casualties while suffering only 18 men of their own.

January 24

MILITARY: Cavalry and partisan forces under Colonel Henry Lee and General Francis Marion raid Georgetown, South Carolina, 60 miles north of Charleston. The attack flounders, but the Americans capture Colonel William Campbell and several ranking officers sleeping in a tavern. However, lacking the manpower to storm a nearby fort, Lee and Marion withdraw.

January 25

MILITARY: In a daring move, General Charles Cornwallis lightens his force by burning his baggage and supplies at Ramsour's Mill, North Carolina. He then resumes doggedly pursuing American forces under General Nathanael Greene.

January 26

MILITARY: General Robert Howe suppresses the mutiny of New Jersey troops with 600 loyal soldiers; two of the ringleaders are subsequently executed, and the rebellion ends.

January 30

MILITARY: The forces of General Nathanael Greene and General Daniel Morgan unite along the Catawba River, North Carolina, hotly pursued by the British under General Charles Cornwallis.

February 1

MILITARY: General Charles Cornwallis, while attempting to cross Cowan's Ford on the Catawba River, North Carolina, is obstructed by 300 militia under General William L. Davidson on the opposite bank. For a few tense moments, Generals Charles O'Hara and Alexander Leslie are thrown from their horses and nearly drown in the strong current. Fortunately for them, the British find another ford downstream and cross to take the Americans from behind. Meanwhile, the elite Coldstream Guards claw their way onto the bank and charge the defenders from the front. Davidson is killed attempting to rally his men, who scatter. Total American losses are four dead and three injured; the British sustain four killed and 36 wounded.

- British cavalry under Lieutenant Colonel Banastre Tarleton cross the Catawba River, North Carolina, ride 10 miles to Tarrant's Tavern, and engage a body of

American militia gathered there. Tarleton's quick approach apparently surprises the militia for, after fighting briefly, they turn and run. Both sides incur roughly 120 casualties apiece, but the defeat discourages other militiamen from stepping forward.

- Wilmington, North Carolina, is occupied by 450 British soldiers under Major James Craig, and Loyalists begin rallying there.

February 3

MILITARY: General Daniel Morgan, ailing from arthritis, quits the army and returns to Virginia. Command of the light troops then passes to Colonel Otho H. Williams, while the American army continues retreating toward the Dan River.

February 7

MILITARY: The Continental Congress replaces the Board of War with the Department of War, but proves unable to find a compromise candidate to serve as secretary.

NAVAL: The office of secretary of marine is created by Congress to administer affairs previously handled by the Board of Admiralty.

February 9

MILITARY: The army of General Nathanael Greene reaches Guilford Courthouse, North Carolina, closely pursued by British troops under General Charles Cornwallis. Greene subsequently holds a war council, and the majority of officers favors retreating until more militia swell their ranks.

February 12

MILITARY: The 120-man Spanish force under Captain Eugene Pourre surrounds the British outpost at Fort St. Joseph, Michigan, and obtains its surrender. They are assisted by the sudden appearance of 200 Potawatomie Indians, eager to share in the spoils of conquest. Pourre departs for St. Louis a day later.

February 13

MILITARY: Colonel Henry Lee and his legion suddenly turn upon pursuing British forces under Lieutenant Colonel Banastre Tarleton at Dix's Ferry, North Carolina, routing them in a swift action and killing 18. American losses are one dead.

- General Nathanael Greene, hotly chased by General Charles Cornwallis for 200 miles, quickly slips across the Dan River on boats previously placed for his utilization and reaches the safety of Virginia. The British, lacking oars and engineers, finally quit. Cornwallis controls all of North Carolina, but his lines of communication back to the coast are perilously stretched and susceptible to roving bands of guerrillas.

February 18

MILITARY: General Charles Cornwallis abandons his chase and trudges back toward Hillsboro, North Carolina. Colonels Otho H. Williams and Henry Lee immediately recross the Dan River to begin harrying his rear guard and outposts.

February 19

MILITARY: General Thomas Sumter marshals his men for an attack against Fort Granby on the Congaree River, South Carolina. Major Andrew Maxwell and

his British garrison of 300 soldiers are prepared for the strike and repulse the Americans, who then begin siege operations. Once Sumter learns that Lieutenant Colonel Francis Rawdon has dispatched a battalion to reinforce the garrison, he immediately withdraws.

February 21

MILITARY: Partisans under General Thomas Sumter attack a British garrison at Belleville, South Carolina. The Americans, lacking artillery, are forced to engage in a sniping contest with the defenders. Sumter, meanwhile, moves off with part of his command to ambush a 20-wagon British supply convoy. However, when word is received of a relief column marching from Camden, Sumter again abandons the effort and withdraws.

February 22

MILITARY: General Charles Cornwallis raises the royal standard and summons regional Loyalists to rally under him at Hillsboro, North Carolina. One of the first units to respond is a 300-man infantry battalion under Colonel John Pyle of Chatham County, who is ordered to rendezvous with the cavalry of Lieutenant Colonel Banastre Tarleton.

February 23

MILITARY: General Nathanael Greene, rested, rearmed, and reinforced by 600 Virginia militia, crosses his army over the Dan River into North Carolina and advances upon Hillsboro.

February 25

MILITARY: The marquis de Lafayette departs Peekskill, New York, with 1,200 picked infantry to try to halt British depredations in Virginia. He will be assisted there by an additional 1,200 French infantry who will arrive by sea.

- American partisans under General Francis Pickens and Colonel Henry Lee unexpectedly encounter a 300-man Loyalist force under Colonel John Pyle at Haw River, North Carolina. Pyle mistakes Lee's cavalry for Lieutenant Colonel Banastre Tarleton's British Legion and allows it to approach and intermingle with his men. At a given signal, Pickens, hiding in the nearby woods, opens fire and the American troopers join in the fray. They quickly cut down 93 men and take 200 captive. This defeat has an immediate dampening effect on Loyalist sympathies in the region.

February 28

MILITARY: General Thomas Sumter frontally assaults strongly held Fort Watson, South Carolina, and is bloodily repelled, with 18 killed and 38 captured. This is his third straight defeat in one month, which undermines the morale of his guerilla band and encourages desertions.

NAVAL: Previously delayed by a storm, Don Bernardo de Gálvez again sails from Havana with 1,500 men for Pensacola, East Florida.

March 2

MILITARY: Cavalry and mounted infantry under Colonel Henry Lee skirmish with Lieutenant Colonel Banastre Tarleton at Clapp's Mill, North Carolina. The Americans sustain eight casualties to the British 21.

March 3

NAVAL: The marquis de Lafayette reaches Head of Elk, Maryland, and embarks on boats for Annapolis. Once there, he expects to be reinforced by French troops arriving by sea.

March 6

MILITARY: General George Washington arrives at Newport, Rhode Island, to confer with General Comte Jean de Rochambeau over strategy. Despite ongoing events in the south, Washington remains transfixed by an all-out assault against New York City.

- The British advance guard under Lieutenant Colonels James Webster and Banastre Tarleton attacks an unguarded militia camp under Colonel William Campbell at Wetzell's Spring, North Carolina. As the Americans withdraw across the stream, they are reinforced by cavalry under Colonels Henry Lee and William Washington. The Coldstream Guards then stall while pursuing them under heavy fire, until small parties ford farther downstream and strike the American flanks. Campbell again withdraws until reinforced by Continentals under Colonel John E. Howard. At this juncture, Webster disengages and the fighting stops. Both sides suffer roughly 30 casualties each but, more significantly, the light troops of Colonel Otho H. Williams, shadowing the main British body under General Charles Cornwallis, slip across the Haw River to safety.
- General Thomas Sumter attacks a party of Loyalists under Major Thomas Fraser at Radcliffe's Bridge on the Lynches River, South Carolina. The Patriots drive their adversaries hard, backing them into a swamp, then withdraw. Sumter's losses are 10 killed and around 40 wounded.
- Partisans under Colonel Francis Marion fight off a mixed British/Loyalist detachment under Lieutenant Colonel John Watson at Wiboo Swamp, South Carolina. The Americans lose six killed and 12 wounded.

March 8

NAVAL: A French squadron under Admiral Chevalier Charles-René Destouches leaves Rhode Island conveying 1,300 reinforcements for the marquis de Lafayette in Virginia. They are subsequently pursued by Admiral Marriot Arbuthnot.

March 9

NAVAL: Don Bernardo de Gálvez arrives at Pensacola with an armada of 35 ships and 7,000 men. He there confronts a small but determined garrison of 1,600 under General John Campbell behind stout fortifications.

March 14

MILITARY: General Nathanael Greene, augmented by militia drafts to 4,400 men, assumes a strong defensive position at Guilford Courthouse, North Carolina, and awaits the approaching British. Taking a leaf from General Daniel Morgan at Cowpens, he also posts his army in three distinct lines. The first consists of North Carolina militia behind a rail fence, who are to loose two volleys and then retire. These are further buttressed by the presence of two small cannon in the center of their line. The second line is composed of Virginia militia and riflemen positioned in a dense wood, supported on either flank by cavalry under Colo-

Greene, Nathanael (1742–1786)

American military officer

Nathanael Greene was born in Warwick, Rhode Island, on August 7, 1742, part of a Quaker household. Although he worked in his father's foundry, Greene developed an interest in military affairs and was consequently expelled from the Society of Friends. He was then elected to the colony's general assembly in 1772, where his grounding in martial matters resulted in an appointment as brigadier general of militia. In this capacity, Greene led Rhode Island forces to Boston in the spring of 1775, where he befriended General George Washington. He handled himself capably, and the following June Greene was made brigadier general in the Continental army, becoming its youngest field officer. He missed the disastrous Battle of Long Island that August on account of illness, then gave Washington disastrously bad advice leading to the capture of Fort Washington, New York, in November. Greene redeemed himself by fighting well at Trenton, Princeton, Brandywine, and Germantown over the next few months. In March 1778, he unwillingly served as quartermaster general at a time when the army's supply functions seemed on the verge of collapse. Fortunately, Greene displayed a talent for logistics and he saved American forces from impending starvation. More importantly, he gained first-hand experience victualing an army in the field, which paid dividends once he acquired his own independent command.

In the fall of 1780, when American hopes for independence reached their nadir, Greene became commander of the Southern Department to succeed the recently

Brigadier General Nathanael Greene assumed command of the Southern Department in 1780 and successfully campaigned against British forces, although he lost every battle.
(Independence National Historical Park)

disgraced General Horatio Gates. Having reassembled and refitted his tattered forces, he surprisingly took to the offensive against the smaller but highly professional forces of General Charles Cornwallis. Greene did so to maintain the strategic initiative and keep the British so preoccupied with chasing him that they could not invade elsewhere. After dodging a close pursuit across the Dan

(continues)

(continued)

River to Virginia, and the stunning upset victory of General Daniel Morgan at Cowpens, Greene fought Cornwallis to a narrow loss at Guilford Courthouse on March 19, 1781. British losses proved so heavy that they had no recourse but to withdraw into Virginia, leaving Greene at liberty to attack British outposts throughout the Carolinas. At Hobkirk's Hill and Eutaw Spring, April and September 1781, Greene fought and lost two more engagements, yet so badly damaged his adversaries that they were compelled to retreat. By Decem-

ber, Greene's strategy had reduced British influence in the Carolinas to a handful of enclaves along the coast—a feat he accomplished by losing all his battles! His brilliant success established him, after Washington, as one of America's most capable military strategists. After the war, Greene settled at Savannah, Georgia, where he perpetually grappled with debt, especially after Congress failed to compensate him for money he spent out of his own pocket supporting the troops of his command. Greene died in Savannah on June 19, 1786, aged only 44 years, a major factor behind victory in the Revolutionary War.

nels Henry Lee and William Washington. Greene's final line consists of 1,400 veteran Maryland and Virginia Continentals under Colonels Otho H. Williams and Isaac Huger.

March 15

MILITARY: General Charles Cornwallis finally confronts more numerous American forces under General Nathanael Greene at Guilford Courthouse. The British, mustering only 1,900 veteran bayonets, march 12 miles to the battlefield and immediately deploy around 1:30 P.M. The right wing consists of two regiments under General Alexander Leslie, the left of two regiments under Lieutenant Colonel James Webster, and the Guards and reserves under General Charles O'Hara. The British advance upon Greene's first line, taking heavy losses but routing them. Sorting themselves out, the redcoats proceed next upon the Virginians in the woods, who resist stoutly before being overpowered. The American cavalry on each flank hold firm, however, forcing Cornwallis to wheel his men left and right to negate their enfilade fire. O'Hara and the Guards are then brought up in the center to clinch the deal. Fighting on the flanks forms two separate actions as the remaining British march on ahead. Cornwallis, sensing victory in his grasp, enthusiastically advances upon Greene's veteran Continentals on the hilltop, who respond with crushing volleys of their own and a bayonet charge. The British are then staggered in their tracks and nearly routed when Colonel Washington's cavalry assail their flanks. Cornwallis, however, instantly orders his own artillery to fire grapeshot directly into the struggling mass, killing soldiers on both sides. The antagonists then separate in confusion, but the highly disciplined British rally first and resume advancing. Greene, rather than

risk having his army destroyed, signals to withdraw and the Americans retreat intact. Like Bunker Hill, Guilford Courthouse is a dearly bought British victory; Cornwallis loses 93 killed and 439 wounded, one-fourth of his manpower. American losses are 78 dead, 185 injured and 2,046 missing, mostly militia who deserted at the last minute. The British are unable to sustain such attrition, and Cornwallis abandons his conquest of North Carolina. He spends the next several days tending to his wounded.

March 16

NAVAL: The Battle of Cape Henry is waged as Admiral Chevalier Charles-René Destouches arrives off Chesapeake Bay with 1,300 reinforcements for the marquis de Lafayette. There he encounters a British fleet under Admiral Marriot Arbuthnot, whose copper-bottom ships give them a slight speed advantage and allow them to arrive first. Both sides possess eight warships apiece, with the British enjoying superiority in the amount of metal thrown. The battle unfolds in heavy seas as the contestants run past each other, trading broadsides. British superiority in gunnery is neutralized once rough water compels them to keep their lower gun ports closed. Arbuthnot also fails to signal for close action; consequently his van drifts from the battle line and is roughly handled. After one hour's fighting, Destouches timidly withdraws from the scene and returns to Rhode Island with a loss of 72 killed and 120 wounded. Arbuthnot loses 30 killed and 73 wounded, but his rigging is badly cut, and he declines to pursue. Nonetheless, the French surrender control of Chesapeake Bay to the British and fail to reinforce Lafayette. Arbuthnot is thereby able to supply and assist the army of General Benedict Arnold in Virginia as needed.

March 18

NAVAL: The 18-gun Continental sloop *Saratoga* under Captain John Young vanishes in the wake of a storm off Cape Francois, Haiti.

March 19

MILITARY: General Charles Cornwallis, his conquest of North Carolina thwarted by heavy losses, marches his surviving soldiers back to Wilmington, 200 miles distant.

March 20

MILITARY: British general William Phillips arrives at Portsmouth, Virginia, with 2,000 men and orders to take command of forces presently under General Benedict Arnold. His strategy is to do as much damage as possible to the tobacco-based Virginia economy and deprive the Americans of a valuable source of income.

March 22

NAVAL: The main French fleet of Admiral Comte Francois de Grasse departs Brest with 20 ships of the line, three frigates, and 150 transports carrying 5,000 soldiers. He sails immediately for the West Indies.

March 24

MILITARY: Colonels Elijah Clarke and James McCall engage and destroy a band of Loyalists under Major James Dunlap at Beattie's Mill, South Carolina. The Loyalists lose 35 killed and 40 taken prisoner; Dunlap, a particularly treacherous partisan, is murdered while in captivity.

March 26

MILITARY: The marquis de Lafayette marches from Annapolis to Head of Elk, Maryland, without his promised reinforcements.

April 1

MILITARY: General Nathanael Greene, reduced by desertion to 1,500 soldiers, breaks camp at Ramsey's Mills, North Carolina, and resumes offensive operations against Lieutenant Colonel Francis Rawdon, commanding British field forces in North and South Carolina. The British are now scattered throughout the countryside in isolated outposts, and Greene intends to reduce them one by one.

April 2

NAVAL: Captain John Barry, commanding the 36-gun frigate *Alliance*, is accosted by British privateers *Mars* and *Minerva* off the French coast; he captures both in a striking display of seamanship.

April 7

MILITARY: General Charles Cornwallis and 1,425 soldiers wearily trudge into Wilmington, North Carolina, to rest, refit, and be resupplied by the Royal Navy.

April 11

MILITARY: Patriot partisans under Colonel William Harden capture the garrison at Fort Balfour, South Carolina, taking 90 captives.

April 14

NAVAL: The Confederation Congress votes Captain John Paul Jones and his men its thanks, and he appears in person to accept the accolades.

April 15

NAVAL: The 32-gun frigate *Confederacy* under Captain Seth Harding is cornered by British frigates HMS *Orpheus*, 32 guns, and *Roebuck*, 44 guns, off the Delaware Capes and surrenders without a fight. The vessel is subsequently taken into British service as HMS *Confederate*.

April 16

MILITARY: Resurgent American militia under General Andrew Pickens and Colonel Elijah Clark surround and besiege Augusta, Georgia, in the absence of British forces. The Loyalist garrison under Colonel Thomas Brown grimly determines to resist as long as possible.

April 18–30

MILITARY: General Benedict Arnold sorties from Portsmouth, Virginia, with 2,500 men on another raid.

April 19

MILITARY: General Nathanael Greene and 1,550 men occupy the old battlefield of Camden, South Carolina, prior to marching on Charleston.

April 23

MILITARY: Eager to resume offensive operations, General Charles Cornwallis departs Wilmington, North Carolina, and advances into Virginia with 1,500 men. In his absence, Lieutenant Colonel Francis Rawdon is appointed commander of remaining British field forces in the Carolinas.

- General Francis Marion and Colonel Henry Lee continue attacking Fort Watson, South Carolina, despite their lack of artillery. The problem is partially solved when Colonel Hezekiah Maham proposes building a log-crib platform so that riflemen can deliver a plunging fire into the British camp. The garrison then surrenders 144 men while American losses total two killed and six wounded. Thereafter, constructing “Maham towers” becomes a standard American tactic.

April 24

MILITARY: General Nathanael Greene encamps 1,500 veteran soldiers at Hobkirk’s Hill, South Carolina, two miles south from the main British position at Camden. He fully expects to rest his men a few days before proceeding to attack Lieutenant Colonel Francis Rawdon.

April 25

MILITARY: General Benedict Arnold, reinforced by 2,000 troops under General William Phillips, attacks 1,000 militia under General John Peter Gabriel Muhlenberg at Petersburg, Virginia. Muhlenberg puts on a good front and deploys his men along Blandford Hill as if inviting a frontal assault. The British, advancing in two columns under Colonels Robert Abercrombie and John G. Simcoe, have little difficulty driving the militia from their position but they withdraw in good order. Both sides lose a total of 10 men apiece.

- Rather than wait to be attacked, Lieutenant Colonel Francis Rawdon scrapes together 900 men at Camden and advances upon General Nathanael Greene at Hobkirk’s Hill, South Carolina. Rawdon deliberately avoids the roads and takes a line of march through the woods to avoid detection until nearly upon his quarry. The Americans are cooking at the time but assume strong defensive positions as the British/Loyalist force approaches. Seeing that Rawdon is attacking along a very narrow front, Greene orders part of his Maryland and Virginia Continentals under Colonels Otho H. Williams and Isaac Huger to advance and envelop the British from both flanks. The Americans are making good progress when Rawdon’s second line steps up, extends its own flanks—and ends up outflanking the Americans. At this juncture, the usually solid 1st Maryland Regiment under Colonel John Gunby inexplicably bolts from the field, and panic ensues along the American line. As the Continentals fall back to redress their ranks, Rawdon sounds the charge and the Americans scatter. Worse, Greene’s artillery is threatened, and only direct intervention by the general saves it from capture. The sudden appearance of cavalry under Colonel William Washington prevents the withdrawal from becoming a rout, and the Americans depart in good order. Greene’s losses are 19 dead, 115 wounded, and 136 missing; Rawdon loses 38 dead and 220 injured, one-fourth of his army. He consequently declines to pursue and simply holds the field.
- Don Bernardo de Gálvez begins a formal siege of Pensacola, West Florida, defended by 1,600 English and Hessians under General John Campbell.

April 27

MILITARY: General Benedict Arnold scatters American militia at Osborne’s, on the James River, Virginia, and engages the 20-gun ship *Tempest*, the 26-gun *Renown*, and the 14-gun *Jefferson* offshore. A chance shot cripples the *Tempest*, and when

its crew abandons ship, the others do likewise. Arnold ultimately burns 24 small ships collected at Hampton Roads and confiscates a large store of tobacco.

- British forces under General William Phillips destroy Chesterfield Court House, Virginia, burning various buildings and supplies.

April 29

MILITARY: The marquis de Lafayette arrives at Richmond with 1,200 men to reinforce the beleaguered defenders. He succeeds Friedrich von Steuben and is ordered to keep the town from being recaptured.

April 30

MILITARY: Generals Benedict Arnold and William Phillips, wary of recent American reinforcements, retire back to their main encampment at Portsmouth, Virginia.

May 4

MILITARY: General Thomas Sumter and 50 partisans lay siege to Fort Granby, South Carolina, defended by Major William Maxwell and 300 soldiers. Sumter does so in defiance of orders from General Nathanael Greene, who requests his troops as reinforcements. He subsequently departs with some men on another raid toward Orangeburg, leaving the siege to be conducted by Colonel Thomas Taylor.

May 7

MILITARY: Lieutenant Colonel Francis Rawdon receives 50 reinforcements at Camden, South Carolina, and again takes the offensive against the army of General Nathanael Greene. The Americans, anticipating the move, withdraw nine miles back to a strong fortified position that dissuades Rawdon from attacking. The British then retrace their steps back to Camden.

May 8

MILITARY: Partisan forces under General Francis Marion surround the fortified mansion of Rebecca Motte and demand the Loyalist garrison's surrender. After they refuse, the two sides will exchange shots over the next four days.

May 9

MILITARY: Don Bernardo de Gálvez, commanding 7,000 Spanish troops, captures Pensacola, West Florida, from General John Campbell after touching off his main powder magazine with a lucky cannon shot. The Spanish are initially repulsed but subsequently occupy part of the ruined fortification, prompting a British surrender. For a cost of 74 dead and 198 wounded, de Gálvez inflicts 105 casualties, secures 1,100 prisoners, and acquires ample supplies of guns and ammunition. He now enjoys undisputed possession of West Florida, which will remain in Spanish hands until 1819.

May 10

MILITARY: Lieutenant Colonel Francis Rawdon abandons Camden, South Carolina, and withdraws toward Charleston. He also orders all British outposts in the interior evacuated, save for Fort Ninety Six.

May 11

MILITARY: The garrison at Orangeburg, South Carolina, surrenders 15 British and 70 Loyalist prisoners to General Thomas Sumter.

May 12

MILITARY: The British garrison at Fort Motte, South Carolina, under Lieutenant Charles McPherson, surrenders 150 men to Colonel Henry Lee and General Francis Marion following a four-day siege. To accelerate the capitulation, the Americans assault the fort with fire-tipped arrows. The elderly widow Rebecca Motte, who owns the mansion, has not only agreed to the tactic, but also produces the bows and arrows for the attack! The Americans sustain two dead.

May 13

MILITARY: The talented British general William Phillips dies suddenly of typhoid fever at Petersburg, Virginia, and command of British forces there reverts to General Benedict Arnold.

May 14

MILITARY: A Loyalist raiding party under Colonel James de Lancey surprises an American outpost at Croton River, New York, killing Colonel Christopher Greene and wounding 42 soldiers.

May 15

MILITARY: Colonel Henry Lee captures Fort Granby, South Carolina, and takes 352 British and Hessian prisoners under Major Andrew Maxwell. He had first tried coaxing their surrender with generous terms, including full honors of war, but it is his firing of a single cannon shot that convinces the garrison to yield. Moreover, Maxwell, a notorious plunderer, is allowed to carry off two wagonloads of booty. American militia under Colonel Thomas Taylor are so enraged by the terms that at one point they threaten to kill their prisoners.

May 20

MILITARY: General George Washington confers with his French counterpart, General Comte Jean de Rochambeau, in Wethersfield, Connecticut. Both agree upon a joint operation against New York City, hopefully in concert with Admiral Comte Francois de Grasse's powerful fleet, then cruising the West Indies. Washington also dispatches General Anthony Wayne with 1,000 men to reinforce the marquis de Lafayette in Virginia.

- General Charles Cornwallis slogs into Petersburg, Virginia, and is strengthened to 7,200 men by detachments under General Benedict Arnold. Arnold is then dismissed and ordered back to New York.

May 21

MILITARY: Colonel Henry Lee captures two companies of Loyalists and needed supplies at Fort Galpin, South Carolina, securing 126 prisoners for a loss of one man. Because this outpost serves as a depot for the superintendent of Indian affairs, many valuable trading goods are also confiscated. Its capture signals that the noose around Augusta is tightening.

May 22

MILITARY: General Nathanael Greene besieges Fort Ninety Six, South Carolina, one of several large British posts still dotting the interior. However, he is down to fewer than 1,000 men and lacks heavy artillery, while the 550 Loyalists under Colonel John Cruger remain determined to resist. Worse, Colonel Tadeusz

Kościuszko initially digs his trenches too close to the fort and the defenders periodically sortie and disrupt them. New trenches will be constructed farther back, along with a “Maham tower” allowing riflemen to shoot into the camp.

May 23

MILITARY: Colonel Henry Lee, assisted by militia under Colonel Elijah Clarke, captures Fort Grierson in Augusta, Georgia, killing or capturing the entire 80-man Loyalist garrison. The commander, Colonel James Grierson, a particularly brutal partisan, is murdered in captivity. Lee then proceeds to besiege nearby Fort Cornwallis.

May 24

MILITARY: General Charles Cornwallis departs Petersburg, Virginia, and marches toward Richmond while General Benedict Arnold is ordered back to New York.

May 26

MILITARY: General Anthony Wayne, en route to Virginia from York, Pennsylvania, quells a minor mutiny among his troops by executing seven ringleaders, and proceeds without further delay.

May 28

MILITARY: The approach of General Charles Cornwallis at the head of 7,000 British veterans forces the evacuation of Richmond, Virginia.

NAVAL: The 36-gun frigate *Alliance* under Captain John Barry, returning from a diplomatic mission to France, is attacked in calm waters by the 16-gun HMS *Atalanta* and the 14-gun *Trepassy*. Using sweeps, the British ships row themselves into raking position near Barry’s stern, and he is wounded by grapeshot. He is then carried below deck, seriously injured but, after crewmen mention surrendering, Barry orders them to carry him topside. Shortly afterward, the wind springs up and *Alliance* easily outmaneuvers its antagonists, capturing both. The Americans lose eight killed and 19 wounded to a British tally of 12 dead, 29 injured, and 169 captured.

June 1

MILITARY: General Henry Clinton, incensed that General Charles Cornwallis has disobeyed orders and invaded Virginia, now suggests that he either advance into the Delaware region or withdraw by sea back to New York. But Cornwallis, enjoying the political support of Lord George Germain, disobeys orders again and intends to campaign where he is.

June 3

MILITARY: General Henry Clinton receives intercepted dispatches by General George Washington to Congress, outlining his intention to gather strength and attack New York. The messages are false and intended to dupe the British.

- Lieutenant Colonel Banastre Tarleton takes 180 troopers of his British Legion and 70 men of the 23rd Royal Welsh Fusiliers on a raid against Charlottesville, Virginia, in an attempt to snare Governor Thomas Jefferson and his legislature.

June 4

MILITARY: Lieutenant Colonel Banastre Tarleton attacks Charlottesville, Virginia, after tearing across 70 miles in only 29 hours. His sudden appearance causes Governor Thomas Jefferson and the legislature to flee for their lives, having been

warned moments before by militia captain John Jouett. Jefferson himself departs only minutes ahead of Tarleton's cavalry, which captures military stores and tobacco. They also seize seven tardy legislators, including Daniel Boone. Meanwhile, the assembly relocates to Staunton, 40 miles to the west.

June 5

MILITARY: Lieutenant John G. Simcoe directs a raid of 400 men against Point of Fork (at the confluence of the Fluvanna and Rivanna Rivers), Virginia, that tricks General Friedrich von Steuben into retreating. The British then double back and capture badly needed supplies along with 30 prisoners.

- American militia under General Andrew Pickens and Colonel Henry Lee capture Fort Cornwallis outside Augusta, Georgia, after three failed assaults. Lee had ordered a Maham tower built, which allowed for plunging rifle fire directly into the enemy camp. He then chimed in with a small cannon, at which point the Loyalists lost heart and capitulated. The Americans inflict 52 killed and take 334 prisoners for a loss of 40 men. They also capture Colonel Thomas Brown, a talented and heartily despised Loyalist partisan leader.

June 6

MILITARY: An American militia detachment under Colonel Isaac Hayne, having seized Loyalist general Andrew Williamson, is attacked and defeated by Loyalist cavalry under Major Thomas Fraser. The Americans lose 15 casualties and Hayne is captured.

June 8

MILITARY: General Nathanael Greene, besieging Fort Ninety Six, is reinforced by soldiers under General Andrew Pickens and Colonel Henry Lee. Loyalists under Colonel John Cruger sortie the following morning, seizing a cannon and wounding several soldiers. Meanwhile, Lieutenant Colonel Francis Rawdon is collecting three regiments to form a relief expedition.

June 9

MILITARY: The French army of General Comte Jean de Rochambeau marches from Newport, Rhode Island, toward New York.

- A 400-man British raiding force under Lieutenant Colonel John G. Simcoe attacks Seven Islands, Virginia, sacking and burning several tobacco warehouses.

June 10

MILITARY: General Anthony Wayne arrives in Virginia with his brigade of 1,000 men to reinforce the marquis de Lafayette and General Friedrich von Steuben in Virginia. The Americans now possess 4,500 veteran soldiers in the field.

June 12

MILITARY: The marquis de Lafayette assumes strong defensive positions along Mechunck Creek to forestall a British offensive against Charlottesville. General Charles Cornwallis declines to attack and falls back upon Richmond.

June 13

NAVAL: In the Atlantic, American privateers *Pilgrim* and *Rambler* snare the British 12-gun sloop *Snake*.

June 18

MILITARY: Having completed a third parallel, American forces under General Nathanael Greene assault Fort Ninety Six, South Carolina. His objectives are Fort Holmes and its attendant star redoubt. The Americans are initially successful and clear the abattis, but are driven back by a determined Loyalist sortie. Greene, aware of a British relief column headed his way, will abandon the siege.

- As Lieutenant Colonel Francis Rawdon marches to the relief of Fort Ninety Six, he is closely shadowed by militiamen under Colonel Charles Myddleton. As soon as the Americans begin to harass his rear guard, the aggressive Rawdon suddenly turns on his antagonists, routing them.

June 19

MILITARY: General Nathanael Greene abandons the siege of Fort Ninety Six, South Carolina, ahead of a British relief column under Lieutenant Colonel Francis Rawdon. The Americans sustain 55 killed, 70 wounded, and 20 captured to a Loyalist tally of 27 killed and 58 injured. This has been one of the longest conventional sieges of the war, having commenced May 22.

June 24

MILITARY: General George Washington marches his army to Peekskill, New York, awaiting the arrival of General Comte Jean de Rochambeau.

June 26

MILITARY: A party of 40 American soldiers under Captain Amos Morse is ambushed and captured by British forces at Rahway Meadow, New Jersey.

- The marquis de Lafayette decides to attack and destroy a British raiding column commanded by the noted light infantry leaders, Lieutenant Colonel John G. Simcoe and a Hessian, Major Johann Ewald. The British are surprised in camp at Spencer's Tavern by a cavalry charge under Major William McPherson, which stuns the defenders but fails to rout them. British troopers counterstrike the Americans in the flank just as Ewald deploys his jaegers to meet an oncoming rush by their riflemen. Following an intense exchange of fire between the competing marksmen, the Hessians charge through the woods and force the Americans back. Pressing ahead, Ewald next encounters Continental infantry under Colonel Richard Butler and pauses to regroup. At this juncture Simcoe, sensing he is badly outnumbered, retreats and abandons his wounded on the field. The allies speedily withdraw in good order back to Williamsburg, six miles distant, where the main force under General Charles Cornwallis reposes. An aroused Cornwallis hurriedly sorties in strength back to the battlefield only to find the Americans gone and returns to camp. Lafayette's gambit has failed to destroy Simcoe's elite force, but both sides conducted themselves admirably throughout a hard-fought action. American losses are given as nine killed, 14 wounded, and 14 missing; the British admit to 10 killed and 23 wounded.

June 29

MILITARY: Lieutenant Colonel Francis Rawdon orders Fort Ninety Six abandoned and withdraws the garrison to the coast.

July 3

MILITARY: When General Benjamin Lincoln fails to receive French reinforcements at King's Bridge, New York, he refuses to attack the strong post at Fort Mifflin. Hessians there under Lieutenant Colonel Ernest von Poeschen sortie briefly and some skirmishing ensues, but the attackers withdraw to their fortifications. Cavalry under Colonel Duc Armand-Louis de Lauzun arrive too late to participate, and Lincoln retreats with a loss of six killed and 52 wounded.

July 4

MILITARY: General Charles Cornwallis crosses the James River at Jamestown Ford and advances toward Williamsburg, Virginia, with 7,000 men. He anticipates that the youthful marquis de Lafayette will be tempted to interfere with his crossing and makes preparations to surprise him at Green Spring. Several "deserters" are then dispatched to the American camp to inform them that only the British rear guard remains on the north bank.

NAVAL: Admiral Thomas Graves supersedes Admiral Marriot Arbuthnot as commander of the Royal Navy in American waters.

July 5

MILITARY: The marquis de Lafayette, deceived by "deserters" sent into his camp by General Charles Cornwallis, is convinced that the British rear guard is marooned and unsupported on the north bank of the James River at Green Spring, Virginia. He dispatches General Anthony Wayne and 900 men from his camp at Tyree's Plantation to investigate; the marquis has also received word that the British army is lurking in the nearby woods and advises caution.

July 6

MILITARY: The armies of Generals George Washington and Jean, comte de Rochambeau, unite at Dobbs Ferry, New York. There the highly professional, spit-and-polish French regulars look aghast at their scarecrow-like and tattered American allies.

- General Charles Cornwallis, having lured an American force under General Anthony Wayne into an ambush at Green Spring, Virginia, prepares to spring the trap. He judiciously entices his quarry across the river while the bulk of his army deploys in the woods surrounding the causeway. Once the attack is signaled, Cornwallis is stunned to find that Wayne has ordered his 900 men to attack the much larger force head on. For several tense moments, the Americans trade volleys with the entire British army before launching a desperate bayonet charge that momentarily halts their opponents. The marquis de Lafayette also shows up with some light infantry at the last possible moment and assists, as Wayne successfully extricates his command. Cornwallis, dismayed to see his quarry slip through his fingers, cancels the action and withdraws across the James. The Americans suffer 28 dead, 99 injured, and 12 missing to a British tally of 75.

July 9

MILITARY: Loyalists under John Doxtader attack Currytown, New York, burning houses and taking several prisoners.

- General Charles Cornwallis dispatches cavalry under Lieutenant Colonel Banastre Tarleton from Cogham, Virginia, on an extended raid into the state's heartland.

July 10

MILITARY: American militia under Colonel Marinus Willett attack John Doxtader's 300 Loyalists at Sharon Springs Swamp, New York. After preliminary skirmishing, he lures Doxtader into a crescent-shaped ambush, routing him and inflicting 40 casualties. Willett loses five killed and nine wounded.

July 17

MILITARY: A British detachment of 600 men under Colonel John Coates, 19th Regiment, is attacked by partisans under General Francis Marion, Colonel Henry Lee, and Thomas Sumter at Quimby's Bridge, South Carolina. Ignoring the advice of Marion and Lee, Sumter orders Colonel Thomas Taylor to frontally assault a strong position; he is repulsed with heavy losses. Other attacks elicit similar results and, at length, the Americans are obliged to withdraw. They incur 60 casualties while inflicting six dead and 38 injured. Sumter's mishandling of affairs causes hard feelings among his men; Taylor bitterly swears never to serve under him again.

July 20

MILITARY: General Charles Cornwallis is ordered by General Henry Clinton to depart Richmond, Virginia, and march back to Williamsburg on the coast. There he is to establish a strong base from which his army can be supplied and reinforced by sea. Receipt of these instructions will become a tipping point in the campaign and the war.

July 21

MILITARY: Generals George Washington and Jean, Comte de Rochambeau, reconnoiter the outskirts of New York, concluding that they lack the numbers and equipment necessary for a successful siege. Stalemate in the northern theater continues.

July 24

MILITARY: A hard-riding cavalry column under Lieutenant Colonel Banastre Tarleton, having raided across 400 miles of the Virginia interior, rejoins the main British army at Suffolk. It was a spectacular, dashing endeavor in the spirit of their leader, but has inflicted only minor damage upon the Americans and wears out many valuable horses.

July 25

MILITARY: British forces burn Georgetown, South Carolina, just ahead of advancing American forces.

July 26

MILITARY: Engineering general Louis Duportail advises General George Washington that a minimum of 20,000 men is probably necessary to attack New York City with any prospect of success. This represents one-third more manpower than the allies can muster at the time, so the prospects of a southern campaign appear increasingly attractive. The only catalyst required is word from Admiral Comte Francois de Grasse's French fleet, then cruising the West Indies.

August 1

MILITARY: General Charles Cornwallis arrives at Yorktown at the tip of the Virginia peninsula, astride the York River, and orders his 7,000 men to begin entrenching. He also fortifies Gloucester Point on the opposite shore, entrusting its defense to Lieutenant Colonel Banastre Tarleton.

- A force of 280 British and 80 Loyalists under Major James Craig marches from Wilmington, North Carolina, on a 75-mile raid against New Bern.

August 4

MILITARY: South Carolina militia officer Isaac Hayne is hung by Lieutenant Colonel Francis Rawdon for violating his parole. His death sparks an outcry among the people and further hardens attitudes toward the British.

August 5

NAVAL: Admiral De Grasse sails north from Cap François, Saint Domingue, and dispatches a fast frigate to alert General George Washington that he is bound for Chesapeake Bay. This proves the catalyst that will make American victory at Yorktown possible.

August 6

MILITARY: A force of 60 Loyalists and Indians under Donald McDonald raids Shell's Bush, New York, but proves unable to pry John Christian Shell, his wife, and six sons from their two-story blockhouse. The Shell family peppers their antagonists with musket fire and McDonald suffers a mortal leg wound while prying a door open. The raiders sullenly withdraw, losing 11 killed and six wounded.

August 9

NAVAL: Captain James Nicholson surrenders the 28-gun frigate *Trumbull* to the 32-gun HMS *Iris* and 18-gun brig *General Monck* after three-fourths of his crew, British deserters, refuse to fight. Nicholson, assisted only by Lieutenants Richard Dale and Alexander Murray, and a handful of men, stoutly resists for half an hour before being overwhelmed. Ironically, the captors are both former American warships, *Hancock* and *General Washington*. Nicholson loses five killed, 11 wounded, and 175 prisoners.

August 13

MILITARY: A force of 200 partisans under General Francis Marion, having marched 100 miles to join forces with Colonel William Hardin at Parker's Ferry, South Carolina, sets an ambush for 200 British dragoons under Major Thomas Fraser. After deploying his men along a causeway, Marion lures the enemy into attacking, and they are repelled by a galling discharge. Fraser rallies and charges two more times before finally withdrawing, losing around 100 men to no American losses.

August 14

MILITARY: Generals George Washington and Jean, Comte de Rochambeau, receive electrifying news from Admiral Comte Francois de Grasse of his impending arrival in Chesapeake Bay. His missive occasions a joyous outburst from the nominally taciturn Washington, and he immediately proposes altering allied

strategy. Previously fixated upon New York, he now favors rapidly marching to Virginia and entrapping General Charles Cornwallis at Yorktown. Rochambeau concurs completely, and the allies make preparations to expedite their 400-mile trek in secrecy.

August 19

MILITARY: A British raiding force of 250 soldiers and 80 Loyalists under Major James Craig, marching from Wilmington, arrives at New Bern and torches the town.

August 21

MILITARY: Generals George Washington and Jean, Comte de Rochambeau, carefully decamp and head south to Virginia with 6,000 men. They leave 2,500 soldiers behind under General William Heath to deceive General Henry Clinton into thinking that New York is about to be attacked. Furthermore, false orders are written and allowed to fall into enemy hands while the construction of bread-baking ovens in New Jersey gives the impression of a permanent French presence there. Clinton is completely taken in by their subterfuge.

- Mohawk raiders under Chief Joseph Brant and Simon Girty capture three American scouts on the Great Miami River, Ohio. From them, they learn of the approach of 107 Pennsylvania militiamen under Colonel Archibald Lochry. Brant sends runners to Scioto Falls requesting reinforcements as he prepares to ambush the unsuspecting Americans.

August 22

MILITARY: New York militia under Colonel Albert Pawling defeat a large party of Loyalists and Indians under Captain William Caldwell at Warwarsing, Ulster County, New York, inflicting three killed and four wounded.

August 23

MILITARY: General Nathanael Greene, having rested his men after the rigors of Fort Ninety Six, decamps from High Hills along the Santee River and advances upon British forces garrisoned at Eutaw Springs, South Carolina.

August 24

MILITARY: Colonel Archibald Lochry's detachment of Pennsylvania militia lands on the banks of the Great Miami River, Ohio. Suddenly they are ambushed and destroyed by Indians under Chief Joseph Brant, who kills or captures the entire force. American losses are 36 killed and 55 taken captive. The latter's fate will remain unknown for two years until survivors are finally paroled at Quebec.

NAVAL: A French squadron carrying 1,000 troops departs Newport, Rhode Island, under Admiral Comte Jacques de Barras and makes for Chesapeake Bay.

August 27

NAVAL: Admiral Samuel Hood arrives at Chesapeake Bay with 14 ships of the line and spoiling for a fight, but finding the waters devoid of enemy ships, he sails for New York to join the main fleet under Admiral Thomas Graves.

August 29

NAVAL: Congress, unable to find a compromise candidate to fill the post of secretary of marine, opts to establish the office of agent of marine.

August 30

NAVAL: A French fleet of 24 ships of the line under Admiral Comte François de Grasse arrives off the Virginia Capes, securing all water approaches to Yorktown, and begins transferring 3,000 crack soldiers to the marquis de Lafayette at Jamestown, Virginia.

August 31

NAVAL: Admiral Thomas Graves, reinforced by the squadron of Admiral Samuel Hood, departs New York with 19 ships of the line and makes for Chesapeake Bay. He has no idea that a large French fleet is already there awaiting him.

September 2

MILITARY: General Henry Clinton, finally cognizant of American intentions, alerts General Charles Cornwallis of an impending attack in Virginia. Wishing to provide a diversion on his behalf, Clinton orders General Benedict Arnold on an amphibious expedition against New London, Connecticut, to capture military stores gathered there. Arnold then embarks with 1,732 soldiers of the 38th, 40th, and 54th Regiments of Foot and various Loyalist detachments.

- The combined forces of Generals George Washington and Jean, comte de Rochambeau, file through Philadelphia in an impressive military display. There, Washington allows several long-suffering units, their pay months in arrears, to petition the Confederation Congress for redress. Robert Morris then arranges a loan from Rochambeau to comply, and the army resumes marching to Elk Head, Maryland.

September 5

NAVAL: The fleets of Admirals Comte François de Grasse and Thomas Graves clash over control of Chesapeake Bay. The French muster 24 ships of the line (1,788 guns), while the British possess only 19 (1,402 guns). As the battle unfolds, the British hold the weather gauge, but Graves refuses to depart from traditional fighting instructions and maneuvers slowly and cautiously. He further errs by allowing the French to depart the bay singly and form their line of battle instead of defeating them piecemeal as Admiral Samuel Hood suggests. Both fleets approach in light wind that allows only eight British and 15 French vessels of the van to engage. These warships are pummeled after a two-and-a-half-hour struggle that concludes with nightfall. The British van, badly outgunned, is severely cut up, as is Graves's own flagship, HMS *London*. French losses amount to 220; the British around 300. This erstwhile, inconclusive engagement nevertheless exerts strategic significance, for General Charles Cornwallis, still sequestered at Yorktown, has not been relieved.

September 6

MILITARY: General Benedict Arnold leads 1,732 soldiers on a punitive raid against New London, Connecticut. Dividing his force into two columns, the first easily storms an unfinished battery at Fort Trumbull on the west bank of the Thames River. Across the river, Fort Griswold is defended by 158 men under Lieutenant Colonel William Ledyard of the militia. The British form up their assault columns and charge uphill under a galling fire, gaining the southern and northeastern walls. However, Lieutenant Colonel Edmund Eyre falls at their head, along with

Second Battle of the Chesapeake (Battle of the Virginia Capes), 5 September 1781. Painting by V. Zveg (Naval Historical Foundation)

several ranking British officers, for a total of 48 killed and 145 wounded. At this point, Ledyard attempts to surrender but is run through with his own sword by enraged British soldiers, who subsequently bayonet 85 defenders to death. An additional 35 are wounded and 37 captured. After burning 143 buildings in New London and Groton, the raiders embark. The extent of American losses further blackens Arnold's reputation.

NAVAL: The 24-gun privateer *Congress* under Captain George Geddes engages the 16-gun sloop HMS *Savage* under Commander Charles Stirling off Charleston, South Carolina. After a four-hour battle, the British vessel is badly damaged and is boarded by marines under Captain Allan McLane as Stirling strikes his flag.

September 7

MILITARY: Indians surprise and wipe out an American detachment under Lieutenant Solomon Woodworth at Fort Plain, New York. American losses are 26 killed and four wounded.

NAVAL: Superintendent of Finance Robert Morris of Pennsylvania is finally appointed agent of marine and tasked with controlling naval affairs.

September 8

MILITARY: The Franco-American army reaches Head of Elk, Maryland, and prepares to embark on a sealift provided by the French fleet.

- George Washington, en route to Williamsburg, stops overnight to sleep at Mount Vernon, his first time at home in six years.
- As General Nathanael Greene approaches Eutaw Springs, South Carolina, with 2,450 men, he encounters a slightly smaller force of 1,800 under Lieutenant Colonel Alexander Stewart of the 3rd Foot (Irish Buffs). The Americans approach his encampment stealthily, surprising and capturing a party of 40 foragers. Minutes later, a party of Loyalist cavalry also goes into the bag, although Major John Coffin escapes and alerts Stewart to the danger. The British are consequently drawn up in battle array when Greene attacks them in three lines. American militia in the first rank fight exceptionally well and loose no less than 17 volleys before yielding to a counterattack. The British then charge directly into Greene's second line, composed of veteran Virginia and Maryland Continentals under Colonel Jethro Sumner, then fall back in confusion. Greene orders a counterattack across the line, and the Americans surge victoriously through Stewart's camp. Greene seems poised to finally win a battle when his soldiers begin plundering the campsite. Meanwhile, a picked body of British light infantry and grenadiers under Major John Majoribanks assumes defensive positions in a thicket off to the right and defies all American attempts to dislodge them. Colonel William Washington's cavalry tries and is repelled, with Washington captured. Majoribanks subsequently joins Stewart's men in a fortified brick house to the rear, from which they continue pouring a heavy fire upon the milling Americans. Gauging the time right, Stewart next orders a charge across the field, and the disorganized Americans give way. The heroic Majoribanks is killed, but Greene, wishing to avert disaster, orders his army to disengage, and the British keep the field. Eutaw Springs is one of the hardest-fought actions of the war, producing the highest proportional casualties of any battle. Greene loses 138 killed, 375 wounded, and 41 missing, while Stewart suffers 85 killed, 351 wounded, and 257 missing, a loss rate of 42 percent. Furthermore, British losses are irreplaceable, so Stewart orders an immediate withdrawal to Charleston. Greene has lost his final encounter, but the Carolina interior is now largely free of British influence.

September 10

NAVAL: A squadron of eight ships of the line and numerous transports under Admiral Jacques-Melchior de Saint-Laurent, comte de Barras slips by Admiral Thomas Graves's British fleet and arrives in Chesapeake Bay, delivering badly needed French siege artillery. His arrival also brings the strength of the French fleet to 36 ships of the line to a British count of 19. Admiral Comte François de Grasse now enjoys uncontested control of the Chesapeake; he also seizes British frigates HMS *Iris* and *Richmond* as they attempt to join Graves.

September 12

MILITARY: A force of 1,000 Loyalists under Colonels David Fanning and Hector McNeill surprises a Patriot detachment at Hillsboro, North Carolina, capturing Governor Thomas Burke and several ranking legislators. As the Loyalists withdraw, they are attacked in turn by 400 soldiers under General John Butler at Cane Creek. Fanning drives off assailants but suffers 40 killed and 92 wounded. The Patriots have 40 killed, 210 captured, and 100 injured.

NAVAL: Admiral Thomas Graves, after loitering in the vicinity of Chesapeake Bay for several days, concludes that he is badly outgunned by the French and departs for New York to gather reinforcements. This singular act forfeits control of the sea to the allies: the army of General Charles Cornwallis is now sealed within its trenches at Yorktown, Virginia, by Admiral Comte François de Grasse.

September 14

MILITARY: Advance elements of the combined armies of Generals George Washington and Jean, comte de Rochambeau, reach Williamsburg on French naval vessels.

- General Charles Cornwallis is assured by General Henry Clinton that an expedition is assembling in New York for his immediate relief and should arrive no later than October 5. This letter, despite the growing allied force before him, dissuades Cornwallis from cutting his way out of the peninsula and escaping into the interior before siege lines are established.

September 15

MILITARY: The allies stage an impressive review of 17,000 men at Williamsburg, Virginia. Present are the divisions of the marquis de Lafayette, Friedrich von Steuben, and Benjamin Lincoln. The French army has likewise assembled seven crack infantry regiments assisted by engineering, cavalry, and artillery units. Within the redoubts of Yorktown, General Charles Cornwallis can muster scarcely half that total.

September 17

MILITARY: General George Washington, accompanied by Generals Henry Knox and Louis Duportail, confers with Admiral Comte François de Grasse on board his flagship *Ville de Paris* of 110 guns, then the world's biggest warship. A detailed strategy is finalized whereby the French navy will contribute several heavy artillery pieces from the fleet. Ultimately, seven redoubts and six batteries will be brought to bear on the British position. Washington's return to the army is delayed by adverse winds until September 22.

September 23

MILITARY: Trapped at Yorktown, General Charles Cornwallis contacts General Henry Clinton in New York and prepares him to "hear the worst" if reinforcements are not quickly forthcoming.

September 28

MILITARY: The massed Franco-American army advances from Williamsburg, marches 12 miles, and formally invests British positions at Yorktown, Virginia. In response, General Charles Cornwallis abandons his outer works and retires to fortifications nearer the town. In doing so, he wishes to spare as many of his troops' lives as possible until General Henry Clinton arrives to relieve him.

September 30

MILITARY: The allies readily occupy the outer ring of General Charles Cornwallis's defenses at Yorktown, Virginia, which accelerates their timetable for planting siege artillery and digging trenches. Meanwhile, Lieutenant Colonel Banastre Tarleton defends the British toehold at Gloucester, across the bay, from French

forces under the comte de Choisy and Colonel Duc Armand-Louis de Lauzun. His men surprise and defeat an American reconnaissance party under Colonel Alexander Scammell, who is mortally wounded while in British custody.

October 1

MILITARY: American batteries planted in the captured British outerworks begin pounding General Charles Cornwallis's army at Yorktown, Virginia.

October 3

MILITARY: Cavalry under Lieutenant Colonel Banastre Tarleton and Colonel Duc Armand-Louis de Lauzun collide at Gloucester, Virginia, across the bay from Yorktown. During the melee, Tarleton seeks to engage Lauzun in a personal duel but is accidentally unhorsed. Lauzun then tries capturing the fallen leader but is blocked by several members of the British legion. Tarleton escapes unharmed, but the French seize his horse and drive the remaining British back to their own lines. A standoff also develops between a portion of the crack 23rd Royal Welsh Fusiliers and a select Virginia militia battalion under General George Weedon. Fighting eventually peters out, and the British withdraw in good order back to safety. The allies lose five killed and 27 wounded to a British tally of 13 dead and wounded.

October 6

MILITARY: General George Washington symbolically breaks the ground for the first parallel trench at Yorktown, Virginia. Within days, 1,500 sappers and engineers are hard at work digging their trench, 2,000 yards long and only 600 yards from the British outer defenses.

- A quick raid by American partisans upon the British depot at Monck's Corner, South Carolina, nets 80 captives.

October 9

MILITARY: Massed firepower from 100 French and American cannon begins relentlessly pounding British defenses at Yorktown, Virginia, burning the frigate HMS *Charon* and several transports anchored in the nearby York River.

October 10

MILITARY: Major Lemuel Trescott and 100 men of the 2nd Continental Dragoons capture Fort Slongo (Treadwells Neck), Long Island, along with 21 Loyalist prisoners.

October 12

MILITARY: The initial allied trench at Yorktown is completed and a second one is commenced only 300 yards from British defenses. Because the fatigue parties are under artillery fire from British-held redoubts Nos. 9 and 10, plans are drawn up to storm the redoubts.

October 14

MILITARY: At 8 P.M., a combined assault under Colonels Alexander Hamilton and Guillaume de Deux-Ponts captures redoubts Nos. 9 and 10 in Yorktown's defensive perimeter. Hamilton's 400 picked troops go forward without flints and use bayonets only. They quickly scramble over the parapet, seizing redoubt No. 10 in only 10 minutes. Deux-Ponts has a much rougher go at redoubt No. 9, taking

General Washington and naval forces of the comte de Grasse surrounded British forces under General Cornwallis at Yorktown, leading to the eventual surrender of Cornwallis and a decisive victory for the Americans in their Revolution. (*U.S. Army Center of Military History*)

30 minutes and sustaining more casualties. Both positions are subsequently incorporated into allied siege lines, allowing additional cannon to be mounted at even closer range. American losses are nine killed and 31 wounded; the French lose 15 killed and 77 wounded. The British tally is 18 killed and 73 captured.

October 16

MILITARY: General Charles Cornwallis, in a desperate attempt to buy time, launches a sortie by 350 men under Lieutenant Colonel Robert Abercrombie. The British initially overrun a French battery and spike the cannon but are driven back with eight killed and 12 captured. That evening, an attempt by Cornwallis to ferry his entire force across the York River to Gloucester is foiled by bad weather.

October 17

MILITARY: With no succor in sight, a drummer boy mounts the British parapet and beats for a parley. A British officer is then blindfolded and brought into the headquarters of General George Washington with a request to negotiate terms.

October 18

MILITARY: A military commission under Colonel John Laurens and Viscount Louis-Marie Noailles meets with a British deputation about surrender terms. General George Washington insists on unconditional surrender and adamantly refuses to allow the British honors of war—the exact terms imposed on General Benjamin Lincoln at Charleston in May 1780. The British have no choice but to submit.

October 19

MILITARY: General Charles O'Hara formally surrenders 8,081 officers and men of the Yorktown, Virginia, garrison. General Charles Cornwallis, shamed by defeat and feigning illness, declines to be present. O'Hara approaches a group of French officers and attempts to tender Cornwallis's sword to General Comte Jean de Rochambeau, but is curtly redirected to the American side. General George Washington also refuses to accept the sword from a subordinate, and insists that it be handed to his own second in command, General Benjamin Lincoln. The British bands then strike a tune appropriately titled "The World Turned Upside Down," as the defenders dejectedly file out between the assembled allied armies, and stack arms. British combat losses at Yorktown total 156 killed, 326 wounded, and 70 missing. The French lose 60 killed and 197 wounded; the American tally is 23 dead and 56 injured. All senior British officers are subsequently paroled and sent by ship to New York. This capitulation, an even bigger disaster for the British than General John Burgoyne's at Saratoga in 1777, concludes major military operations. Yorktown will devastate British political will to continue the struggle.

October 21

MILITARY: In South Carolina, a group of Maryland Continentals is being lectured about lax discipline when Timothy Griffin, a drunken soldier, begins shouting at the men to disobey orders. The following day Griffin is tried for encouraging mutiny and executed.

NAVAL: The American privateer *Indian* captures the British vessel *Venus*, the first of seven that will be seized on a productive Atlantic cruise.

October 22

MILITARY: Philadelphia erupts into euphoric celebration as Colonel Tench Tilghman hurriedly arrives with news of the British surrender at Yorktown, Virginia.

October 24

MILITARY: A 750-man Loyalist/Indian force under Major John Ross attacks and burns the settlement at Warrenbush, New York.

October 25

MILITARY: A force of 750 Loyalists and Indians under Major John Ross, ravaging the Mohawk Valley, is attacked by 400 New York militiamen under Colonel Marinus Willett at Johnstown Hall, New York. Wavering on Willett's flanks allows the raiders to escape under cover of darkness, but they suffer 65 casualties to an American loss of 35. Willett vigorously pursues the marauders.

October 27

NAVAL: A combined amphibious force of 7,000 men under Admiral Thomas Graves and General Henry Clinton makes its belated appearance off Chesapeake Bay,

then promptly returns to New York after learning of General Charles Cornwallis's surrender. However, General George Washington fails to convince either General Comte Jean de Rochambeau or Admiral Comte Francois de Grasse to accompany him back to New York for a proposed attack there.

October 30

MILITARY: Colonel Marinus Willett, heading 400 New York militiamen and 60 Oneida warriors, overtakes a body of Loyalists and Indians at West Canada Creek (Jerseyfield), New York. The Americans attack and rout the rear guard, killing the hated major Walter Butler and wounding seven more. Like so many of his victims, Butler was scalped as he lay wounded. This proves to be the last hostile incursion in the region.

- Congress appoints General Benjamin Lincoln to serve as the nation's first secretary of war. His new War Department consists of four clerks and replaces the former Board of War.

November 5

NAVAL: The French fleet of Admiral Comte François de Grasse, whose presence at Yorktown proved decisive, departs Chesapeake Bay and makes for the West Indies.

November 6

MILITARY: Colonel Elijah Clarke and his militia ambush a party of pro-British Indians in Wilkes County, Georgia, killing 40 and capturing 40.

November 7

MILITARY: A body of 300 Loyalists under William Cunningham massacres a detachment of 30 American militiamen under Captain George Turner at Cloud's Creek, South Carolina. During surrender negotiations, a young soldier shot a Loyalist and slaughter ensued.

November 10

MILITARY: A division of men under General Arthur St. Clair marches down from Yorktown, Virginia, to reinforce General Nathanael Greene in North Carolina.

November 18

MILITARY: Sensing the change in military fortunes, British forces under Major James Craig evacuate Wilmington, North Carolina, removing all Loyalists who care to depart with them.

November 27

MILITARY: American militia under Colonels Isaac Shelby and Hezekiah Marham capture Fairlawn, South Carolina, from the British.

December 1

MILITARY: Major John Doyle, commanding 850 men at Fort Dorchester, South Carolina, abandons his post to advancing forces under General Nathanael Greene. Unknown to Doyle at that time, the Americans number only 400.

December 22

MILITARY: His mission to America complete, the youthful marquis de Lafayette embarks at Boston and sails back to France.

December 28–29

MILITARY: Colonel Henry Lee is rebuffed in his attempt to storm Johns Island, South Carolina, then defended by British regulars under Major James H. Craig. Colonel John Laurens is supposed to attack with one column, but a second force under Major James Hamilton fails to cross the Wapoo Creek, and the operation miscarries.

December 31

NAVAL: Despite a handful of inspiring ship-to-ship victories, the year ends with only two ships of the Continental navy, frigates *Alliance* and *Deane*, still in commission.

1782**January 5**

MILITARY: British forces begin evacuating Wilmington, North Carolina, and American forces converge on it from the interior.

January 12

MILITARY: The army of American general Anthony Wayne, now reinforced by General Arthur St. Clair, crosses the Savannah River and commences marching across Georgia.

January 23

MILITARY: General Anthony Wayne's army, having crossed the Savannah River into Georgia, is attacked in camp by several hundred Creek warriors under Chief Guristersigo. The Indians are badly repulsed with 18 killed, and Wayne personally slays the chief in combat.

February 25

MILITARY: General Francis Marion, of "Swamp Fox" lore, attacks a British force under Colonel Benjamin Thompson at Wambaw Creek Bridge, South Carolina, but is repulsed after losing 32 men.

March 4

MILITARY: A raid conducted by Lieutenant Colonel William Hull at Morrisania, New York, nets 52 Loyalist prisoners and suffers 25 casualties.

March 7–8

MILITARY: Colonel David Williamson leads a party of vengeful frontier militia who corral and massacre 96 peaceful Delaware Indians residing at the mission of Gnadenhutten, Ohio, with blunt instruments. On the following day, additional Moravian Indians are rounded up and similarly dealt with. The Pennsylvania assembly subsequently votes to condemn the act as "disgraceful to Humanity."

March 19

MILITARY: Colonel Benjamin Logan dispatches 40 horsemen under Captain James Estill from Estill's Station (Kentucky) in pursuit of Wyandot raiders who have savaged the settlement of Strode's Station.

March 22

MILITARY: A party of 25 Kentucky cavalry under Captain James Estill surprises a band of Wyandot warriors at Little Mountain, Kentucky. Their initial volley cuts down a chief and several warriors; a bitterly contested firefight ensues, with additional losses to either side. The surviving seven militiamen are then outflanked and withdraw; Estill is among the dead. Monk, an African-American slave who fought with distinction and saved several white comrades, is manumitted for his bravery.

March 24

NAVAL: A British naval/Loyalist force of 120 men attacks the privateering center at Tom's River, New Jersey, driving off the local militia company and burning several homes. American losses are seven dead, four injured, and 13 captured to two British killed and two wounded.

April 1

MILITARY: General George Washington relocates his military headquarters to Newburgh, New York, while his officers and men, their pay several months in arrears, start grumbling about congressional neglect.

POLITICS: Prime Minister Charles Watson-Wentworth, Marquis of Rockingham, reappoints General Sir Guy Carleton as governor-general of Canada. He is then carefully instructed to avoid offensive operations where possible, prepare to evacuate American territory, and make accommodations for all Loyalists wishing to relocate.

April 8

NAVAL: Captain Joshua Barney of the sloop *Hyder Ally* is chased by the brig HMS *General Monk* and the privateer *Fair American* into the restricted waters of Delaware Bay. Badly outgunned, Barney quietly orders his helmsman to do the opposite of whatever commands he yells. The British vessels, listening intently, incorrectly shadow his moves until *Hyder Ally* suddenly crosses their bows, delivering a fatal broadside. The *General Monk* surrenders with a loss of 53 men killed and wounded; the victorious Barney loses 15.

April 12

MILITARY: Captain Joshua Huddy, a New Jersey militia officer captured in March, is hung by Loyalists for the death of Philip White. General George Washington orders retaliation by selecting a captive British officer, Captain Charles Asgill, to hang as well.

April 23

MILITARY: In a cost-cutting measure, Congress votes to reduce the number of officers in each regiment, along with numerous staff and support positions.

April 24

MILITARY: American forces under Captain Ferdinand O'Neal wage a fierce and unsuccessful skirmish with British troops at Dorchester, South Carolina, losing nine men as captives.

May 9

MILITARY: General Guy Carleton arrives at New York and replaces General Henry Clinton as British commander in chief in North America. He will begin orchestrating the complete withdrawal of all British forces.

May 22

MILITARY: At Newburgh, New York, General George Washington angrily dismisses a suggestion from Colonel Lewis Nicola that he install himself as king of the newly independent nation. “Banish these thoughts from your mind,” the general insists, “and never communicate as from yourself, or anyone else, a sentiment of the like nature.” Taken aback by this rebuke, Nicola is profusely contrite and writes three letters of apology.

May 25

MILITARY: A party of 480 militia under Colonel William Crawford departs Mingo Town, Pennsylvania, on a raid through the Sandusky region of Ohio.

June 4–6

MILITARY: A detachment of 480 Pennsylvania militiamen under Colonel William Crawford conducts an ill-fated campaign against Indians in the upper Ohio River Valley. En route, they are ambushed at Sandusky by a mixed Indian/Loyalist force under Captain William Caldwell. These manage to scrape together 100 men from Butler’s Rangers, some artillery, and large numbers of Great Lakes Indians and Shawnee under noted scout Simon Girty, whose arrival tips the balance. The fighting will last two days, before the Americans are finally surrounded and defeated. A detachment under Major David Hamilton manages to cut through the encirclement and escape. The Americans nonetheless lose eight killed, 27 wounded, and several prisoners. These include Colonel Crawford, who is slowly tortured to death over a fire. British and Indian losses are five killed and 11 wounded.

June 13

MILITARY: Survivors of the recent expedition to Sandusky arrive back at Mingo Town, Pennsylvania, under Colonel David Williamson. He has survived one of the bloodiest frontier setbacks the Americans will suffer during this war.

June 24

MILITARY: A former captive, Lieutenant Colonel Henry Hamilton, is appointed lieutenant governor of Canada.

July 11

MILITARY: British forces commanded by former governor James Wright evacuate 4,000 Loyalists and 5,000 former African-American slaves from Savannah, Georgia, concluding two and a half years of occupation.

July 13

MILITARY: Mohawks under Chief Joseph Brant raid the village of Hannastown, Pennsylvania, but fail to carry the stockade or its defenders.

July 29

MILITARY: The mother of the captured British officer, Captain Charles Asgill, who is scheduled to be executed for the death of an American prisoner in April, visits Paris and pleads with French foreign minister Charles Gravier, comte de Vergennes, for help in sparing his life. Vergennes, visibly moved, informs King Louis XVI and the queen, who authorize him to appeal to General George Washington for clemency. The Confederation Congress subsequently votes for Asgill’s release.

August 7

MILITARY: At Newburgh, New York, General George Washington institutes the Badge of Military Merit (or Purple Heart) to signify distinguished military service to the country. Three soldiers are the initial recipients.

- Congress orders further reductions to the Continental army by disbanding understrength units and distributing their manpower to other regiments.

August 8

NAVAL: A small British garrison at Fort Prince of Wales, Hudson Bay, surrenders to a squadron of three French warships.

August 14–17

MILITARY: A mixed Loyalist/Indian raiding party of 340 men under Simon Girty and Captain William Caldwell besieges Bryan's Station, Kentucky, but is repulsed. A relief column is then roughly handled by the Indians, but 17 troopers manage to reach the defenders inside the fort. The Americans suffer four killed and three wounded. Girty and Caldwell then call off their attack, with a loss of five Indians slain and many more wounded, and fall back to the ruins of Ruddle's Station, ransacked the previous year. While withdrawing, they also deliberately mark their trail, as if inviting the Americans to follow.

August 18

MILITARY: An American relief column of 182 men under Colonel Hugh McGary departs Bryan's Station and pursues Simon Girty's raiding party across the Licking River, despite signs of impending ambush. Daniel Boone, the noted scout, is familiar with the area and advises McGary against crossing directly. Instead, he proposes dividing the force and sending half to ford the river several miles downstream and catch the raiders from behind. He also implores his commander to await reinforcements under Colonel Benjamin Logan. But McGary, having been accused of cowardice by some for delaying, resolves to attack.

August 19

MILITARY: Colonel Hugh McGary divides his force of 182 mounted Kentuckians into three columns and surges across the Lower Blue Licks. Assembling on the opposite bank, they begin ascending the high ground when Simon Girty's Indians suddenly rise from cover, fire a devastating volley, then charge. McGary's right and center quickly collapse, while his leftmost column under Daniel Boone struggles to hold its ground. The surviving Kentuckians then flee across the river in panic, leaving the Indians to scalp and mutilate their dead and wounded. The Americans lose 77 men in 15 minutes, while a further seven are taken alive and slowly burned to death. Among the slain is Boone's youngest son, Israel Boone. Girty reports seven killed and 10 wounded.

August 24

MILITARY: Colonel Benjamin Logan and 470 mounted Kentuckians arrive at the Blue Licks battlefield and spend several hours interring the dead. Colonel Daniel Boone recovers his son's remains and conveys them back to Boone's Station for burial.

August 27

MILITARY: General Mordecai Gist leads American light troops into action at Combahee Ferry, South Carolina, being roughly handled by the larger number of British forces. The Patriots sustain a loss of 21 men, including Colonel John Laurens, son of politician Henry Laurens, among the dead. The British return to Charleston unimpeded.

August 29

MILITARY: American militia under Colonel Francis Marion ambush and defeat 200 British dragoons at Fairlawn, South Carolina; the “Swamp Fox” has waged his final battle.

September 2

NAVAL: In Boston, the Americans turn over the new 74-gun ship of the line *America* to France as compensation for a similar vessel, the *Magnifique*, which previously sank in the harbor.

September 10

MILITARY: General Andrew Pickens leads 316 South Carolina militiamen on a second foray against the Cherokee. He will enter Georgia and be joined by additional militia under Colonel Elijah Clarke.

September 13

MILITARY: Fort Henry, (West) Virginia, is unsuccessfully besieged for three days by 300 Indians and Loyalists. The attackers then try to improvise a cannon out of a hollow log, but it explodes harmlessly. After trying to scale the walls at night and being rebuffed, the attackers draw off.

September 20

MILITARY: American militia under Colonel John Sevier defeat the Cherokee of Dragging Canoe at Lookout Mountain, Tennessee. This action will finally convince the Indians to seek peace.

September 24–28

NAVAL: Captain John Barry and the 32-gun frigate *Alliance* capture four heavily laden British merchant ships bound for Jamaica.

September 30

NAVAL: In one of the final actions of the war, six British barges attack the Maryland barge *Protector* off Tangier Sound, Chesapeake Bay, capturing it and 80 prisoners, along with Commodore Hezekiah Whaley.

October 5

MILITARY: General Horatio Gates returns to active duty at Newburgh, New York, and resumes plotting against General George Washington.

November 4

MILITARY: American and British forces wage a final skirmish near Johns Island, South Carolina, which causes the death of Captain William Wilmot, 2nd Maryland Continentals, and four soldiers. Wilmot is the last army officer to fall in this war.

November 10

MILITARY: General George Rogers Clark leads 1,500 mounted riflemen on a punitive expedition against Shawnee villages around present-day Piqua, Ohio, killing 10 Indians and wounding 10. This is most likely the last land engagement of the Revolutionary War.

December 14

MILITARY: British general Alexander Leslie evacuates Charleston, South Carolina, taking along 3,800 Loyalists and 5,000 former African-American slaves. The city is promptly occupied by American troops under General Nathanael Greene.

December 20

NAVAL: The American 40-gun frigate *South Carolina* under Captain John Joyner surrenders to the 54-gun HMS *Diomed* of Captain Thomas L. Frederick and the 40-gun HMS *Quebec* off the Delaware Capes. American losses are six killed and wounded along with 450 prisoners.

December 24

NAVAL: General Comte Jean Baptiste de Rochambeau embarks his army at Boston and sails away for the West Indies. Under his sound leadership and open willingness to cooperate with General George Washington, the United States has been enabled to win its independence.

1783**January 6**

MILITARY: General Alexander McDougal, Colonel John Brooks, and Colonel Matthias Ogden petition the Confederation Congress for back pay and other amenities. There is a growing sense among military officers that the Congress cannot discharge its obligations to the army or the nation.

March 10–12

MILITARY: The Newburgh Conspiracy unfolds as Major John Armstrong anonymously circulates letters complaining about the Confederation Congress's failure to honor its promises to the army. His missive demands direct action and implores that all officers convene to discuss the problem on the following day.

NAVAL: Captain John Barry and his 36-gun frigate *Alliance* have the honor of fighting the last American naval action of the war. En route from France and accompanying the French frigate *Duc de Lauzun* under Captain John Green, they are set upon by the British frigates HMS *Alarm*, 32 guns, and *Sybil*, 28 guns, and the 18-gun sloop *Tobago* off Florida. Barry coolly closes with the *Sybil* under Captain James Vashon and withholds firing until within pistol shot. He then unlooses a devastating broadside that cripples the British ship. *Sybil* is dismasted and helpless, but Barry moves off to cover the *Duc de Lauzun*, then transporting half a million dollars in specie. The Americans lose one killed and nine wounded; British losses are unknown but presumed heavier.

March 11

MILITARY: General George Washington, alarmed by implied threats against the Congress as suggested by the Newburgh Conspiracy, forbids a gathering of officers this day and, instead, summons his men for a general meeting on the 15th.

March 12

NAVAL: The Continental navy vessel *George Washington* docks at Philadelphia, bearing a copy of the peace treaty with Great Britain.

March 15

MILITARY: At Newburgh, New York, General George Washington harangues his officers about duty and honor, strongly denouncing any threats by the military against lawful authority. He personally promises that all issues will be addressed by that body at the appropriate time. Swayed by his example, the officers vote to disavow their actions at Newburgh and reaffirm their loyalty to the American government.

March 24

NAVAL: The Confederation Congress instructs Agent of Marine Robert Morris to recall all armed vessels, navy and privateer alike.

April 15

NAVAL: The Continental Congress orders all naval captives held by the United States to be released.

April 17

MILITARY: A party of 100 Loyalists and 50 Indians under Captain James Colbert attacks Fort Carlos, Arkansas, seizing 11 captives, but is unable to evict the remaining 40-man garrison under Captain Raymondo Du Breuil.

April 19

MILITARY: At Newburgh, New York, General George Washington announces a congressional proclamation declaring the end of hostilities with Great Britain. Prayers are then offered along with an extra ration of liquor to the troops. It has been exactly eight years to the day since the Revolutionary War commenced at Lexington and Concord.

April 24

MILITARY: Captain James Colbert abandons the siege of Fort Carlos, Arkansas, and releases his prisoners after hearing of the peace treaty.

May 2

MILITARY: A congressional committee headed by Alexander Hamilton is tasked with drawing up plans for a peacetime military establishment. He adopts General George Washington's suggestion for a small but professional force of four infantry and one artillery regiments. A national military academy is also suggested, but Congress is indifferent to military matters at this juncture.

May 3

MILITARY: At Newburgh, New York, General George Washington presents Sergeants Elijah Churchill, William Brown, and Daniel Bissell the first and only Badges of Military Merit.

May 13

POLITICS: The Society of the Cincinnati, an influential veteran's group consisting of conservatively minded officers, is founded at Newburgh, New York. Over 2,000 officers join, and George Washington is elected the first president-general.

May 26

MILITARY: The bulk of the Continental army demobilizes, save for a small formation retained to observe the British evacuation of New York. The soldiers return home without pay but are granted a three-months equivalent in promissory notes to be redeemed at a later date. The men are also allowed to take home their muskets.

June 6

MILITARY: General George Washington's elite Commander-in-Chief's Guard is demobilized while the small Marechaussee Corps is retained to serve as mounted couriers.

June 13

MILITARY: Disgruntled members of a Pennsylvania regiment protest their lack of pay and threaten to march on Philadelphia to underscore their discontent. Secretary of War Benjamin Lincoln appeals to the mob for calm but is ignored.

June 14

MILITARY: Faced with the prospect of confronting angry Pennsylvania troops in Philadelphia, the Confederation Congress votes to adjourn and flee to Princeton, New Jersey. General George Washington, meanwhile, dispatches troops from Newburgh, New York, in their support.

June 15

POLITICS: The Confederation Congress, beset by ranks of angry soldiers, is allowed to depart Philadelphia by passing through their serried ranks.

June 17

POLITICS: The Confederation Congress votes to reconvene at Princeton, New Jersey, while mutinous soldiers in Philadelphia disband without further protest.

August 17

MILITARY: General George Washington departs Newburgh, New York, and turns over command of the remaining forces there to General Henry Knox. The commander travels to Congress to prepare his final reports and formally resign.

September 3

DIPLOMACY: The Treaty of Paris is formally concluded between the United States and Great Britain in Paris, ending the Revolutionary War after eight years of strife. America acquires independence and now controls a huge swath of land east of the Mississippi River up to the Great Lakes region. The British subsequently sign separate treaties with France and Spain.

September 30

MILITARY: Tempestuous brigadier general John Stark of New Hampshire, who contributed significantly to the American victory, finally receives his belated promotion to brevet major general.

October 18

MILITARY: Congress orders that all remaining officers and soldiers of the Continental army be "absolutely discharged" from active service. Meanwhile, General

George Washington issues orders to departing soldiers of the Continental army at Rocky Hill, New Jersey, bidding them an affectionate farewell. He is especially keen to solicit their support for the federal government, whatever form it ultimately assumes.

October 29

MILITARY: Secretary of War Benjamin Lincoln, lacking any troops to command, resigns from office. No new secretary will be appointed over the next two years.

November 2

MILITARY: General George Washington issues his final orders to the remaining soldiers of the Continental army, exhorting them to “carry with them into civil society the most conciliating dispositions; and that they should prove themselves not less virtuous and useful as citizens, than they have been persevering and victorious as soldiers.”

November 3

MILITARY: The Continental army is formally disbanded by congressional fiat. All that remains are 500 infantry and 100 artillerymen who are consolidated into a single battalion commanded by Colonel Henry Jackson. For many years thereafter, defense of frontier settlements rests entirely in the hands of state militias.

November 25

MILITARY: The last remaining British soldiers embark on transports in New York and are immediately replaced by American forces under General George Washington. This concludes a seven-year hostile occupation, and the sense of relief is immediate.

December 3

MILITARY: General George Washington finalizes the demobilization of the Continental army by authorizing retention of only 500 soldiers to guard military stores and West Point and Pittsburgh.

December 4

MILITARY: British forces are withdrawn from Staten Island, New York. George Washington subsequently takes leave of his officers in a tearful ceremony at Fraunces Tavern in New York City. He departs on his final visit to Congress.

December 23

MILITARY: General George Washington, having led his country to victory and independence, and pursuant to the wishes of Congress, resigns as commander in chief at Annapolis, Maryland, and tenders his sword to President Thomas Mifflin. Despite many offers to do so, Washington is the man who will not be king. Henry Knox succeeds him as the nation’s senior military leader.

1784

January 1

MILITARY: The Continental army is largely disbanded save for Jackson’s Regiment, 500 men strong, which is divided between garrisons at West Point, New York, and Fort Pitt, Pennsylvania.

April 8

DIPLOMACY: The British government violates the Treaty of Paris by specifically ordering Governor-General Sir Frederick Haldimand of Canada not to withdraw garrisons from land delegated to the United States until conditions requiring payment of prewar debts and compensation for Loyalists are met. This decision is also taken in response to the pleas of Canadian fur traders who wish to sustain their profitable ventures as long as possible. Over the decade, these outposts will serve as centers of Indian resistance to American expansion in the Old Northwest.

NAVAL: In Philadelphia, Agent of Marine Robert Morris advises the Continental Congress to sell off all existing Continental navy warships to help pay down the national debt.

April 15

MILITARY: Major General von Steuben, the army inspector general, tenders his resignation and Congress rewards him with an elaborate ceremonial sword for his services.

June 2

MILITARY: The military establishment is reduced again by disbanding Jackson's regiment of Continentals to a command of 80 men. Captain John Dougherty (now the army's senior officer) commands the largest contingent of 55 soldiers at West Point, New York, while the remaining 25 are garrisoned at Fort Pitt, Pennsylvania. This is achieved regardless of continuing Indian raids along the frontier and the presence of British forces at Detroit and elsewhere. After second thoughts, Congress establishes the 1st Regiment at a strength of 700 men divided into eight infantry and two artillery companies, the men of which enlist for a period of 12 months. Once recruited from New York, Pennsylvania, New Jersey, and Connecticut, the unit will be scattered across the western frontier in company-sized detachments.

June 20

MILITARY: General Henry Knox, the nation's most accomplished artilleryman, resigns from active duty and returns to Boston.

August 12

MILITARY: Distinguished wartime veteran Josiah Harmer gains appointment as lieutenant colonel-commandant of the 1st Regiment and also assumes the title "Commander of the army." He then relocates to Fort Pitt, Pennsylvania, to join his regiment. His principal activity that winter will be to rebuild and regarrison Fort McIntosh on the Ohio River.

October 22

DIPLOMACY: Americans and representatives of the Iroquois (Six Nations) meet at Fort Stanwix (Rome, New York) to effect a peace treaty. Of the Six Nations, only the Oneida and Tuscarora, who sided with the United States, will be spared from the inevitable land concessions. The ensuing Second Treaty of Fort Stanwix will require the four tribes who sided with Great Britain to relinquish claims to all lands north of the Ohio River. This comes as somewhat of a surprise to the Shawnee and Delaware already living there, who will maintain that the Six Nations had no business yielding it in the first place. Because of this treaty, a loose tribal

confederation gradually begins coalescing under Miami chief Little Turtle to keep settlers out of the Ohio River Valley.

December

MILITARY: In an attempt to shore up western defenses, Colonel Josiah Harmar leads 200 men out of Fort Pitt, Pennsylvania, and commences rebuilding Fort McIntosh, 30 miles distant.

1785

January 21

DIPLOMACY: Lieutenant Colonel Josiah Harmar concludes a treaty with the western Indians at Fort McIntosh, Ohio. The agreement forces the tribesmen to abandon land south of the Great Lakes in exchange for a stipend, but the Shawnee remain hostile and continue raiding.

February 2

MILITARY: Counterfeit army pay certificates are condemned by Congress, and it offers a \$500 reward for offenders.

March 8

MILITARY: Congress appoints former general Henry Knox to serve as secretary of war; his coterie consists of three clerks and a messenger. He accepts responsibility for military and naval matters, Indian relations, and land grants for veterans.

April 12

MILITARY: With the 1st Regiment due to be discharged on account of expiring enlistments, Congress authorizes recruitment of the same 700 men, this time for three years. Few volunteers step forward, and the regiment remains understrength.

June 3

NAVAL: Congress orders the 36-gun frigate *Alliance* sold to rid itself of the final Continental navy warship. The United States will lack any semblance of naval power for the next nine years.

July 25

MILITARY: The Army Quartermaster Department is abolished by Congress; henceforth, civilian contractors will handle the matter of provisioning and clothing soldiers. This grossly corrupt and inefficient system will nearly hamstring army efficiency.

NAVAL: Algerian pirates seize the American vessel *Maria* and hold the crew for ransom. The four Barbary states along the North African coast—Morocco, Algiers, Tunis, and Tripoli—have been preying on western shipping for centuries; now that the Americans lack the protection previously accorded them by the Royal Navy, they are considered fair game by the pirates. This act commences a decade-long diplomatic struggle to stop the practice, an impossible stance considering America's lack of standing naval forces.

July 30

NAVAL: Marauding Barbary pirates seize a second American vessel, the *Dauphin*, and hold the crew for ransom.

August 1

NAVAL: Congress finally rids itself of the frigate *Alliance*, the last vessel operated by the Continental navy.

Fall

MILITARY: Colonel Josiah Harmar continues his frontier construction program by building additional forts along the Ohio River: Fort Finney on the Great Miami River, Fort Steuben (Steubenville), and Fort Harmar (Marietta). The hostile Shawnee under Blue Jacket and the Miami under Little Turtle are not impressed and continue their raiding activities.

December 8

DIPLOMACY: A memorial delivered by John Adams formally demands British evacuation of their posts in the northwest, including Oswego, Niagara, Detroit, and Michilimackinac, consistent with terms outlined in the Treaty of Paris. However, the American government's intrinsic inability to force states to honor treaty commitments respecting the rights of Loyalists and the collection of all pre-Revolutionary War debt removes all incentives for British compliance.

1786**January**

MILITARY: Lieutenant Colonel Josiah Harmar's 1st Regiment has withered to 200 enlistees after the states fail to meet their recruitment quotas. Meanwhile, Shawnee under Chief Blue Jacket and Miami under Chief Little Turtle continue raiding American settlements deep in Kentucky.

February 28

DIPLOMACY: Lord Carmarthen brusquely informs Minister John Adams that Britain will not comply with certain provisions of the Treaty of Paris until the Americans do likewise. Specifically they will not evacuate military posts around the Great Lakes (Article 7) until all prewar debts have been honored (Article 4). Congress, under the Articles of Confederation, will prove unable to secure unanimous permission from the states to do so. Thus the posts at Oswego, Niagara, Detroit, and Michilimackinac remain garrisoned by British troops. It will become a major sore point between the two nations.

July

MILITARY: Secretary of War Henry Knox informs Congress that the military establishment is down to 518 rank and file, a perilous situation considering ongoing frontier hostilities.

September

MILITARY: The vaunted frontier figure, General George Rogers Clark, prepares to undertake his final campaign against Indians living in the Indiana and Ohio territories. His plan is to lead a column of 1,200 mounted militia up the Wabash River to attack Miami settlements while a second force of 800 soldiers under Colonel Benjamin Logan deals with the Shawnee.

September 26

MILITARY: Former army veteran Daniel Shays leads 500 disgruntled farmers in an uprising in western Massachusetts and forces the court in Springfield to adjourn.

The rebels are determined to prevent additional foreclosures of farmers' property. In response, Governor James Bowdoin dispatches militia under General William Shepherd to Springfield to safeguard state courts there.

October

MILITARY: General George Rogers Clark endures a setback in his final foray against the Miami when his force mutinies only two days out of Vincennes, Indiana Territory. He is forced to turn back, but the column of Colonel Benjamin Logan manages to burn several Shawnee settlements.

October 20

MILITARY: Faced with intractable Indian hostility on the frontier, Congress increases the size of the military establishment to 1,340 men. The two artillery companies already present in the 1st Regiment are combined with two new companies to form a battalion under Captain John Dougherty. However, recruitment remains unenthusiastic and few volunteers step forward.

- Word of Samuel Shays's rebellion in Massachusetts and the rebel march on the federal arsenal at Springfield prompts Congress to authorize Secretary of War Henry Knox to raise 1,340 men. To placate political opposition to standing armies, this is done ostensibly for the purpose of frontier service against the Indians.

November 30

MILITARY: Massachusetts militiamen arrest rebel leader Job Shattuck, and rebellion against authority collapses in the eastern half of the state.

December 26

MILITARY: Rebellious Daniel Shays assembles 1,200 "Regulators" (poor farmers) and marches onto Springfield, Massachusetts, to disrupt court proceedings and possibly seize the state arsenal there. This act induces an alarmed governor James Bowdoin to mobilize 4,400 state militia for a period of 30 days to cope with the emergency.

1787

January

MILITARY: Despite a major recruitment effort, the military establishment remains 840 men below authorized strength. Congress also drops the enlistment period to one year for new enlistees. However, the government will lack the funds to pay its soldiers for the next two years.

January 18–19

MILITARY: Governor James Bowdoin requests former general Benjamin Lincoln to come out of retirement and help suppress Shays's Rebellion. Lincoln agrees and rides to Springfield, Massachusetts, to command militia forces gathering there.

January 21

MILITARY: A group of 300 rebels under Daniel Shays begins surrounding the Springfield armory, Massachusetts, with a view to storming it. Another 1,000 angry farmers take up blocking positions at Palmer to the east, cutting off the approach of any Hampshire County militiamen.

January 25

MILITARY: Under former army captain Daniel Shays, 1,200 rebellious farmers make an ill-fated attempt to storm the government armory under General William Shepherd at Springfield, Massachusetts, but are driven off by cannon fire after losing three men killed and 20 wounded. Among the rioters is one Moses Sash, an African-American veteran of the Revolutionary War, who is now indicted for stealing firearms.

January 27

MILITARY: A large militia contingent under General Benjamin Lincoln marches into Springfield, Massachusetts, and secures the government arsenal. Meanwhile, Daniel Shays and his band of rebels have scattered into the countryside.

January 28

MILITARY: General Benjamin Lincoln's militia forces push rebellious farmers toward Amherst, Massachusetts, while rebel leader Luke Day escapes to New Hampshire.

February 3

MILITARY: General Benjamin Lincoln orders a midwinter night march to surprise rebel forces gathered at Petersham under former army captain Daniel Shays.

February 4

MILITARY: Massachusetts militiamen under General Benjamin Lincoln surprise rebel forces under Daniel Shays, dispersing them at Petersham and ending the rebellion. Lincoln takes 140 prisoners, but Shays escapes across state lines to Vermont. The insurrection fails in its purposes but does convince the legislature to lower court costs, not impose direct taxes, and exempt household goods and tools from debt-related confiscations. The entire episode is a powerful reminder of how powerless individual states are when left to confront civil violence by themselves.

- The greatest efficacy of Shays's "rebellion" is in adding greater impetus and urgency to the creation of a stronger central government capable of defending itself. This feeling dovetails conveniently with a host of other factors leading to the Constitutional Convention in Philadelphia that May.

May 13

MILITARY: Former general George Washington makes a rare public appearance by arriving in Philadelphia, Pennsylvania, as part of the Constitutional Convention held there. En route, he is greeted by throngs of well-wishers and escorted by a troop from the City Light Dragoons. Despite America's distrust of military forces, Washington remains a thoroughly popular figure.

June

MILITARY: Major John Hamtramck takes three companies of the 1st Regiment and begins construction of Fort Knox at Vincennes, Indiana Territory. Fort Steuben, Ohio, is abandoned.

July 13

MILITARY: Former major general Arthur St. Clair is called from retirement and appointed governor of the Northwest Territory.

July 31

MILITARY: Colonel Josiah Harmar is promoted to brigadier general, the only officer of such rank in military service.

October 3

MILITARY: Shaken by Shays's Rebellion and increasing Indian hostility, Congress backtracks and allows recruits to enlist for three years of service. This brings manpower ceilings to 840 of all ranks. Congress also stipulates that the army will retain troops already under arms rather than recruit untrained men.

October 5

MILITARY: Former general Arthur St. Clair is formally appointed governor of the Northwest Territory and also superintendent of Indian affairs for the region. Winthrop Sargent becomes his secretary. He receives authority to raise militia and wage war in order to secure the territory from hostile tribesmen. St. Clair will also be responsible for removing squatters from Indian land to preclude expanding hostilities.

October 16

NAVAL: Congress unanimously votes to present Captain John Paul Jones with a gold medal; he is the only Continental navy officer so honored.

1788**April 15**

NAVAL: Captain John Paul Jones accepts an admiral's commission in the Russian navy at the behest of Czarina Catherine the Great. He will perform useful service against the Turks in the Black Sea but is ultimately done in by court intrigue.

May

MILITARY: In an attempt to stave off white encroachment against Indian land, Creek leader Alexander McGillivray starts a brief but internecine frontier war with Georgian settlers.

June

MILITARY: Arthur St. Clair arrives on the frontier to begin serving as territorial governor. One of his first actions is to invite several Indian chiefs to a peace conference, which breaks down after attacks on army supply convoys.

October 2

MILITARY: The contractor tasked with providing the army with uniforms and other accouterments fails to provide the goods as promised, so soldiers at distant outposts are forced to improvise with on-hand supplies. Congress also fails to provide the military with pay.

1789**April 30**

POLITICS: In New York City, former general George Washington is inaugurated as the first president of the United States. His responsibilities include those of commander in chief of all army, navy, and militia forces. As president, Washington is

at liberty to select senior military leaders, subject to congressional approval, but militia leadership remains a state prerogative.

August

MILITARY: In Ohio, hostile Wea villages are attacked and burned by 200 Kentucky militiamen under Major John Hardin.

August 7

MILITARY: The War Department is created by Congress, with Henry Knox to be appointed secretary of war a month later. Thus situated, he is responsible for both military affairs and Indian relations, and will be the first military figure to suggest creation of a national military academy. The army at this time consists of fewer than 1,000 men who guard public property and garrison the Indian frontier.

NAVAL: Congress entrusts all naval matters to the new secretary of war's office.

August 8

MILITARY: In his first military report to President George Washington, Secretary of War Henry Knox declares the army's strength at only 672 soldiers, with the bulk of them serving at posts in the Ohio Valley.

September 29

MILITARY: Mindful of the dangers posed to liberty by a standing professional military, Congress fixes the size of the United States Army at 1,000 men, who are divided into eight infantry and four artillery companies. This is all that remains of the once impressive Continental army that fought and won the American Revolution. Its work completed, Congress votes to adjourn.

- Congress passes the first piece of veterans' legislation by authorizing pensions for disabled soldiers and sailors.

1790

April 4

NAVAL: Congress proposes the Revenue Marine Service (Coast Guard), as part of the Treasury Department, for the purpose of suppressing smuggling and increasing revenue.

April 30

MILITARY: In light of continuing Indian hostilities, Congress authorizes a slight increase in the size of the army, raising manpower ceilings to 1,273 rank and file. The length of service terms are set at three years for soldiers and officers alike. However, the monthly pay for privates is cut from \$4.00 to \$3.00 per month.

July

MILITARY: An undeclared war breaks out between the United States and the Indian coalition led by the Miami chief Little Turtle in Ohio. Brigadier General Josiah Harmar is authorized to lead a two-pronged offensive against the warring tribes, with him taking a large column out from Fort Washington (Cincinnati) while Major John Hamtramck leads a smaller effort from Fort Knox.

August 4

NAVAL: The Revenue Cutter Service is formally established with the purchase of 10 small boats; it will gradually evolve into the U.S. Coast Guard by 1848.

August 7

INDIAN: Secretary of War Henry Knox and Creek chief Alexander McGillivray sign the Treaty of New York, in which the Creek recognize U.S. sovereignty over parts of tribal territory. McGillivray is also commissioned a brigadier general, but soon after he intrigues with the Spanish to resist the Americans.

August 27

MARINE: Major Samuel Nicholas, regarded as the first commandant of the Marine Corps, dies in Philadelphia.

September 24

MILITARY: General Josiah Harmar, commanding only 353 regular troops, dispatches his militia forces from Fort Washington and into Indian Territory. He intends to follow as soon as his supply situation shores up.

September 30

MILITARY: General Josiah Harmar finally joins and commands his expedition of 353 soldiers and 1,100 Kentucky militia out of Fort Washington (Cincinnati), Ohio, on a punitive expedition against hostile Shawnee and Miami Indians.

October 14–17

MILITARY: Having destroyed an abandoned Indian village, General Josiah Harmar dispatches a column under Colonel John Trotter to survey the surrounding region. Trotter returns after completing a half-hearted effort and is relieved of command by Harmar. Major John Hardin is dispatched on a scouting expedition.

October 19

MILITARY: Major John Hardin leads his remaining militiamen out of the American camp (the majority have deserted), and they are ambushed by Indians near a swamp. A company of 30 regulars under Captain John Armstrong rushes up to assist and extricate the levies, but only seven survive the encounter. The remainder withdraw to the American camp at nightfall.

October 21–23

MILITARY: Miami and Shawnee under Little Turtle and Blue Jacket defeat an American militia force under General Josiah Harmar near Fort Wayne, Indiana. Harmar had previously dispatched 400 militia to a large Indian village and then marched out in search of the warriors. Little Turtle then attacked, routing the militia from the field and massacring the regulars under Major John Wyllys where they stood. Only 10 soldiers survive; Harmar, bested in two skirmishes, finds himself low on supplies and begins withdrawing to Fort Washington (Cincinnati).

November 3

MILITARY: The survivors of General Josiah Harmar's army straggle back into Fort Washington, having lost 400 men to hostile Indians. Harmar considers leveling charges against the militia commanders but, in the end, does nothing. The Indians under Little Turtle, emboldened by their victory, will continue raiding.

December

MILITARY: The national government, including the War Department, relocates from New York City to Philadelphia, Pennsylvania, where it will remain until 1799.

1791

January

MILITARY: General Josiah Harmar is retained as military commander of the Northwest Territory, although his army is badly weakened by defeats, sickness, and desertion. Meanwhile, a force of 200 Shawnee warriors attacks and besieges Dunlap's Station, Ohio, for a week.

January 6

NAVAL: The Senate Committee on Mediterranean Trade reports that American commerce in that region requires the protection of a naval force. Up until now, American shipping has been subject to harassment by the Barbary powers of North Africa—Morocco, Algiers, Tunis, and Tripoli—who have been seizing ships and exchanging them for tribute.

March 3

MILITARY: In light of Harmar's defeat, Congress authorizes creation of the 2nd Infantry, pegged at a strength of 995 men. It also proffers a bounty of \$6.00 to stimulate recruiting efforts. Veteran Continental officer Richard Butler becomes "Major General of Levies" with authority to raise 2,000 six-month volunteers; he will be the only officer so appointed.

March 4

MILITARY: Governor Arthur St. Clair is promoted to major general and replaces the inept Josiah Harmar as commander of the Northwest Territory. He is also tasked with assembling and leading a 3,000-man expedition into the heart of Indian territory in July. Harmar, stung by his dismissal, demands a court of inquiry to clear his name.

March 21

NAVAL: President George Washington signs his first military commission by issuing one to Captain Hopley Yeaton of the revenue cutter *Scannel*.

May 15

MILITARY: General Arthur St. Clair rides into Fort Washington to find only 85 soldiers of the 1st Infantry on station. He spends the next six weeks cobbling together a force of 427 soldiers drawn from the two regiments to serve as the nucleus of his new army.

May 20–23

MILITARY: Brigadier General Charles Scott leads 800 mounted Kentuckians on a raid against hostile Kickapoo villages along the Wabash River. They are accompanied by General James Wilkinson of the Kentucky militia.

July

MILITARY: At Fort Washington, General Arthur St. Clair has assembled hundreds of newly recruited soldiers for his two army regiments. However, his force suffers from continual supply shortages, owing to the incompetence of Quartermaster General Samuel Hodgson; the troops also endure antiquated arms and moldy gunpowder.

August 1–21

MILITARY: Brigadier General James Wilkinson conducts a mounted raid against the Miami village of L'Anguille; he completes his mission with the loss of two men, then returns.

August 7–29

MILITARY: General Arthur St. Clair, feeling pressure by the government to move, departs Fort Washington and marches his recruits six miles into Indian territory. No fighting occurs but a lack of discipline among the troops becomes readily apparent.

August 16

MILITARY: The American army in the Northwest is joined by Lieutenant William Henry Harrison, 1st Infantry.

September 15–24

MILITARY: General Josiah Harmar receives his court-martial at Fort Washington and is exonerated after nine days. However, Harmar will never receive another military command and finally resigns in January 1792.

September 17

MILITARY: General Arthur St. Clair, governor of the Northwestern Territory, formally leads his large expedition from Fort Washington, Cincinnati, and marches 18 miles to the Great Miami River. There he spends two weeks constructing Fort Hamilton in order to secure his lines of communication. Ultimately, St. Clair constructs Forts Hamilton, St. Clair, Jefferson, Greenville, and Recovery, each fort successively deeper in hostile territory. He presently commands 320 soldiers and 1,100 poorly trained militia, although more are expected to arrive.

October 4–13

MILITARY: General Arthur St. Clair marches from Fort Hamilton with an army of 2,300 men, the largest American force assembled since the Revolutionary War. This breaks down into the 1st and 2nd Regiments of infantry, both grossly understrength, 80 volunteers, and 600 militiamen. Moreover, the whole are raw and poorly armed and equipped. They continue for 30 miles, then stop to build a fortification.

October 14–23

MILITARY: The American army finishes construction of Fort Jefferson, Indian Territory, although the troops continually suffer from a lack of winter clothing and adequate rations. The hardships and deprivations lead to increasing desertion rates that sap General Arthur St. Clair's strength.

October 24

MILITARY: Despite worsening weather and supply shortages, General Arthur St. Clair leads his ragged force out from Fort Jefferson and continues slogging into hostile territory. Many disgruntled soldiers and militiamen take the opportunity to desert.

October 30

MILITARY: As General Arthur St. Clair advances into Indian territory, a body of 70 militia deserters gathers to plunder his supply train as it comes along. To

prevent such outrages, St. Clair dispatches Major John Hamtramck and part of the 1st Infantry to guard it.

October 31–November 4

MILITARY: The Northwest Army, braving cold weather, rampant desertion, and food shortages, marches deeper into hostile territory and finally arrives on the banks of the Wabash River. The troops, cold and exhausted by their exertions, are unable to fortify their campsite and simply sleep on the ground.

November 4

MILITARY: Ailing general Arthur St. Clair, commanding 1,400 militia and soldiers, is disastrously defeated by the Miami under Chief Little Turtle near Fort Wayne, Indiana. The Americans are alerted to the presence of Indians near their camp at dawn, but Colonel William Oldham, when ordered to send out patrols, does nothing. Sensing indecision on St. Clair's part, Little Turtle takes the extraordinary move of charging directly into the American camp, scattering the defenders. The 2nd Regiment makes a gallant stand but is gradually overwhelmed. The survivors withdraw to Fort Jefferson, having sustained 600 dead and 276 wounded; this becomes the worst defeat ever suffered at the hands of Native Americans.

November 4–8

MILITARY: General Arthur St. Clair leads his demoralized forces past Fort Jefferson, which contains no food, and continues marching to the perceived safety of Fort Washington. Having arrived, the militia is discharged without pay and St. Clair dispatches Major Ebenezer Denny to report the disaster to Secretary of War Henry Knox in Philadelphia.

December 19

MILITARY: In Philadelphia, President George Washington is outraged by the extent of St. Clair's defeat on the banks of the Wabash River, Ohio. Congress is likewise shocked and orders the entire affair to be investigated by a select committee.

1792

January

MILITARY: General Arthur St. Clair arrives in Philadelphia to confer with President George Washington, who demands his resignation. Meanwhile, General James Wilkinson attempts to lead a mounted raid against the Miami villages, but is thwarted by intense cold and deep snow; he returns without effecting anything.

March 5

MILITARY: General Arthur St. Clair resigns his commission and is replaced by General "Mad Anthony" Wayne as military commander of troops in the Northwest Territory. Congress, finally cognizant of the struggle it faces, votes to enlarge the military establishment to 5,120 men by strengthening the existing two infantry regiments and artillery battalion, and adding three more infantry regiments, along with four troops of dragoons. These are organized as "The Legion of the United States," each a self-contained force with infantry and organic cavalry and artillery attached.

Little Turtle (ca. 1752–1812)

Miami chief

Little Turtle (Michikinikwa) was born near the Eel River in the vicinity of present-day Fort Wayne, Indiana, around 1752. His father was a Miami chief but, because his mother was a Mahican, custom dictated that he could not inherit a leadership position. Nonetheless, Little Turtle displayed fine qualities as a warrior, and he was eventually made chief of the Miami by tribal elders. He was also pro-British in outlook, and in 1780 his warriors attacked a French-Illinois expedition under Colonel Augustin de la Balme. After the Revolutionary War, Little Turtle became a leading spokesman for armed resistance against white encroachment north of the Ohio River and, in concert with noted Shawnee chief Blue Jacket, formed an anti-American coalition. In 1787 Congress assured the tribes that their hunting grounds would be respected, but within three years a rash of illegal settlements sparked a fierce frontier war. In 1790, the American government dispatched an armed expedition of 1,400 militia under Colonel Josiah Harmar to punish the tribes for their resistance. Little Turtle, however, lured the invaders deeper and deeper into Indian territory, then ambushed and defeated them that October. Success here served as a rallying point for other tribes, and soon the Miami and Shawnee were joined by the Pottawatomie and Ojibwa. Little Turtle had become the locus of Native American resistance, much in the manner that his predecessor, Pontiac, tried to be, so President George Washington ordered that an even larger military effort be mounted.

In September 1791, General Arthur St. Clair marched into the Ohio territory with 2,600 soldiers and militia. As the raw Americans advanced, sickness and desertion caused their numbers to dwindle to 1,500 men. Little Turtle watched these developments closely and decided to attack the Americans directly in their camp. This was a dangerous expedient, rarely attempted by Native Americans, but under Little Turtle's inspired leadership, St. Clair was completely surprised on November 4, 1791, and routed. More than 600 soldiers were killed or wounded, making this the largest defeat ever suffered by the U.S. Army at the hands of Native Americans. Still, within three years the Americans rebuilt their army under the aegis of veteran general "Mad Anthony" Wayne, who finally cornered and defeated the Indians at Fallen Timbers on August 20, 1794. Little Turtle had cautioned the tribes to make peace with this new invader and was relieved of command; the following year he submitted to the Treaty of Greenville and thereafter swore his allegiance to the United States. In 1797 he ventured to New York City to confer with President Washington, and Indiana territorial governor William Henry Harrison also built a home for him along his beloved Eel River. When the War of 1812 broke out, the aged chief offered to fight on behalf of the United States before dying at the Fort Wayne Indian agency on July 12, 1812. As a military leader, Little Turtle was one of the most accomplished of Native American chieftains.

March 27–May 8

MILITARY: A committee in the House of Representatives investigating St. Clair's defeat concludes that the blame could be ascribed to inadequate forces, mismanagement of supplies by contractors, and a lack of proper discipline among the levies. General Arthur St. Clair, however, is cleared of all blame and continues on as territorial governor.

May 8

MILITARY: Faced with a protracted Indian war and endemic manpower shortages for the U.S. Army, Congress seeks to buttress national defense by passing the Militia Act, which authorizes states to draft eligible males aged 18 to 45 into state service as needed. Volunteer cavalry and artillery units are also authorized, although members must provide themselves with guns and mounts at their own expense. However, because enforcement of the act is entirely left up to the states, the results will be less than uniform.

June

MILITARY: Newly appointed general Anthony Wayne arrives at Pittsburgh, where he takes command of all military forces in the Northwest. He encamps at Fort Fayette and begins assembling his new force as recruits are obtained. As he does so, the Indians murder Colonel John Hardin and Captain Alexander Trueman, who had arrived in their camp as peace negotiators.

July 18

NAVAL: Revolutionary War hero John Paul Jones dies at Paris, France, in relative obscurity. His body will lie in an unmarked grave until it is rediscovered in 1905.

September 4

MILITARY: At Fort Fayette, Pennsylvania, General Anthony Wayne begins assembling his new force, the Legion of the United States, into four self-contained units. Each consists of 1,280 men organized into two battalions of infantry, one battalion of riflemen, a company of light dragoons, and a company of horse artillery. The 1st and 2nd Infantries are redesignated the 1st and 2nd Sublegions, respectively.

September 30

MILITARY: A body of Creek, Cherokee, and Chickamauga warriors attacks Buchanan's Station near Nashville, Tennessee, precipitating a southern Indian war. Andrew Jackson, a prominent local attorney, will be pressed into service as a militia captain over the next two years.

October 7

MILITARY: General "Mad Anthony" Wayne marches into the Ohio Territory at the head of 2,600 soldiers and militia, determined to crush Indian resistance. Unlike in earlier attempts, the troops are now highly disciplined, motivated, and led by an extremely aggressive commander.

November 30

MILITARY: General Anthony Wayne relocates his main camp to Legionville, 22 miles down the Ohio River from Pittsburgh, Pennsylvania. Here he establishes a strict camp of military instruction, utilizing Baron Von Steuben's *Blue Book*

from the Revolutionary War. Moreover, discipline is rigidly enforced, and several soldiers are executed for major offenses. This proves to be the birthplace of a revitalized American army.

December 5

MILITARY: President George Washington is handily reelected to a second term as chief executive and commander in chief.

1793

February

MILITARY: In the absence of other qualified candidates, General Anthony Wayne appoints General James Wilkinson, a figure he distrusts heartily, to be his deputy commander with a rank of brigadier general, U.S. Army. Meanwhile, his four legions, which are not authorized to have colonels, fall under the purview of their senior majors. At full strength, Wayne's legion musters nearly 5,500 officers and men.

April 7

MILITARY: The Legion of the United States under General Anthony Wayne relocates to a new camp, which he labels "Hobson's Choice," outside of Fort Washington. There he will continue training his men hard, honing them to a fine edge. The troops will be taught to actively patrol and, more importantly, to entrench their positions every night, like Roman legions of old, to thwart a surprise attack on the camp. Meanwhile, the devious General James Wilkinson continues scheming against his superior, who deems him irrelevant and largely ignores him.

April 22

NAVAL: President George Washington, in light of Barbary depredations against American commerce in the Mediterranean, recommends a force of six frigates to counter the piracy.

October 8

NAVAL: The American merchant vessels *Dispatch*, *Hope*, and *Thomas* are seized by Algerian pirates and held for ransom. The United States, lacking a naval establishment, is powerless to respond.

October 14

MILITARY: General Anthony Wayne advances six miles north from Fort Jefferson, Ohio, and begins construction of a new encampment, Fort Greenville, to shelter his troops over the winter. Despite harsh living conditions, training continues without interruption.

October 17

MILITARY: A military convoy carrying supplies for Fort Greenville is ambushed by Indians and several soldiers are killed.

December 24

MILITARY: On Christmas eve, General Anthony Wayne marches six companies from Fort Jefferson to the site of St. Clair's defeat. Burial details are assigned to inter the found remains of American soldiers while the general supervises construction of Fort Recovery on the old battlefield.

1794

January

MILITARY: The U.S. Army begins accepting the ubiquitous “Springfield muskets” made at the noted Springfield Armory in western Massachusetts.

January 2

NAVAL: Congress passes a resolution to protect American commerce abroad by creating a naval service. Despite its obvious merits, many politicians view standing naval establishments as overly expensive and dangerously aristocratic in tenor.

March 27

NAVAL: The Naval Act of 1794 authorizes the construction of three 44-gun frigates and three 36-gun frigates; these vessels will form the nucleus of a nascent U.S. Navy. This is undertaken to stop depredations committed against American commerce by the pirates of Algiers, although provisions are made to cancel the warships if a peace treaty can be reached. The act also makes provision for army officers to survey locations for 24 coastal fortifications, which are generally known as the “First American System.”

MARINES: The Naval Act of 1794 establishes the United States Marines Corps to replace the Continental Marines, which were disbanded at the end of the Revolutionary War.

April 2

MILITARY: Congress votes to enlarge the military’s weapons procurement system by providing money for constructing two more arsenals. One of them is at Harper’s Ferry in western (now West) Virginia. Inventor Eli Whitney, who has pioneered the process of interchangeable parts in muskets, is tendered the position of superintendent but declines to accept.

May 9

MILITARY: Congress authorizes creation of the Corps of Artillerists and Engineers to help garrison the new coastal fortifications under construction. A school of engineering instruction is also established at West Point, New York.

June 1

NAVAL: Britain’s Admiral Lord Richard Howe attacks a French fleet escorting numerous American cargo ships bound for France. The French are handily defeated in this encounter, celebrated by Britain as the “Glorious First of June,” but the American ships escape damage and make landfall.

June 5

MILITARY: Determined to enforce American neutrality, Congress passes legislation that forbids all citizens from enlisting in the ranks of foreign armies or navies. Furthermore, the act forbids the arming or provisioning of all armed foreign vessels in American ports.

NAVAL: Six naval captains are appointed by President George Washington in concert with the Naval Act of 1794: Joshua Barney, John Barry, Richard Dale, Samuel Nicholson, Silas Talbot, and Thomas Truxtun.

June 12

MILITARY: Fort Massac, located on the strategic Ohio River, is rebuilt under the aegis of Major Thomas Doyle and his legion infantry.

June 28

NAVAL: In Philadelphia, Pennsylvania, shipwright Joshua Humphreys is contracted to construct two classes of frigate for the nascent United States Navy. Among the vessels he designs, in conjunction with draftsman William Dougherty and English immigrant Josiah Fox, are the famous vessels *Constitution*, *United States*, and *Constellation*.

June 30–July 1

MILITARY: The American garrison at Fort Recovery, consisting of 140 riflemen and dragoons under Captain William Eaton, is heavily attacked by an estimated 1,200 warriors led by Little Turtle and Blue Jacket. The defenders throw back several daylight assaults and inflict heavy losses before the discouraged Indians finally withdraw.

July 16–August 8

MILITARY: The Whiskey Rebellion breaks out in the Monongahela Valley of western Pennsylvania to protest the federal excise tax on liquor and stills. Consequently, tax officials have their houses burned while revenue officials are tarred and feathered. Alexander Hamilton is eager to use the rebellion to test the power of the federal government.

August 7

MILITARY: President George Washington issues a proclamation ordering the so-called Whiskey rebels to return home. He also mobilizes 13,000 militia from Maryland, New Jersey, Pennsylvania, and Virginia to suppress the uprising.

August 8

MILITARY: In a final spurt of construction activity, General Anthony Wayne erects strongly posted Fort Defiance as a forward base.

August 15–18

MILITARY: General Anthony Wayne, enlarged by the addition of Kentucky militia and assisted by Chickasaw and Choctaw scouts, crosses the Maumee River and begins his final advance into the heart of hostile Indian territory. Unlike the previous efforts, his army is tough, highly disciplined, and led by one of the most aggressive officers in the U.S. Army. Sagacious chief Little Turtle, having watched Wayne's activities for two years, pronounces him "the chief that does not sleep" and advises his fellow Miami to make peace. He is removed from command in consequence, and Blue Jacket is chosen to lead the warriors into battle.

August 20

MILITARY: General Anthony Wayne and 3,500 well-drilled soldiers and militia defeat a 2,000-man Indian coalition under Blue Jacket at the Battle of Fallen Timbers in northwest Ohio. The battle takes place over an area devastated by tornados, and the Americans, having foiled an Indian ambush, attack the mill-

ing warriors in a well-executed bayonet charge, routing them. Wayne's losses are 33 killed and 140 wounded; Indian losses are presumed to be lighter but still significant. The Indians flee to the walls of British-held Fort Miami, whose commander refuses to offer aid or shelter. This victory clears the way for continued and unobstructed migration into the Old Northwest.

August 24

MILITARY: Concerns about the loyalty of Pennsylvania militia induce President George Washington to muster additional Virginia troops under his two Revolutionary War compatriots, Daniel Morgan and Henry Lee.

September 6

MILITARY: A mounted raid by 550 cavalry under Major James Ore hits the Indian settlements of Nickajack and Running Water, inflicting heavy casual-

Wayne, Anthony (1745–1796)

American military leader

Anthony Wayne was born in Waynesboro, Pennsylvania, on January 1, 1745, the son of a tanner. He worked as a tanner and served in the colonial legislature before joining the 4th Pennsylvania Regiment, Continental army, in January 1776. Though lacking formal military instruction, Wayne proved a quick study in war and fought well in Canada and at Fort Ticonderoga, rising to brigadier general by February 1777. That fall he performed conspicuously in the American defeat at Brandywine and was detailed to serve as General George Washington's rear guard outside Philadelphia. However, he was surprised in camp by British general Charles "No Flint" Gery at Paoli, in a nighttime bayonet attack that scattered the Americans with loss. Wayne took the lesson to heart and determined to avenge his defeat. His chance came on July 16, 1779, when he conceived and successfully executed a daring night attack upon Stony Point, New York, which was stormed entirely with cold

steel. By this time, Wayne's fearlessness under fire and indifference to danger had garnered him the nickname "Mad Anthony." In 1781 he campaigned in Virginia under the youthful marquis de Lafayette, and on July 6, 1781, he stumbled into a well-laid British snare at Green Spring. Wayne suddenly found himself confronting the entire British army under General Charles Cornwallis but, rather than retreat, he attacked, confounding his enemy, and extricated his force from destruction. He advanced to brevet major general before mustering out of service in October 1782.

Wayne retired from the army after the war and returned to farming and politics, but failed at both and was nearly imprisoned for debt before George Washington, now president, called him back into military service in 1792. His mission was to help end a bloody Indian war in Ohio that had occasioned several American defeats and hundreds of deaths. Wayne took nearly

ties. Losses here induce tribal chiefs to end the Chickamauga War against Tennessee.

September 9–24

MILITARY: President George Washington, using his authority as commander in chief, nationalizes the militias of Pennsylvania, New Jersey, Maryland, and Virginia, and calls out 15,450 men for the first time. However, all four states experience extreme difficulty mustering their troops and properly equipping them for service in the Whiskey Rebellion.

September 12–24

MILITARY: General Anthony Wayne marches his victorious legion to the site of Miami Town, razes it, and erects a new fortification to establish Fort Wayne. It will be eventually garrisoned by six companies of infantry under Major John Hamtramck.

two years assembling and training an army from scratch; then, commencing in the fall of 1793, he began systematically advancing into Indian territory by building forts. Concurrently, numerous mounted raids were directed by Generals James Wilkinson and Charles Scott at numerous Indian settlements to increase their discomfiture. Little Turtle of the Miami watched these developments with alarm and pronounced Wayne the “chief that does not sleep.” He also advised his cohorts to make peace, but instead they gave battle at a place called Fallen Timbers on August 20, 1794. This was so-named due to a recent tornado that had laid bare a field of trees, and the Indians attempted to ambush the oncoming Americans. Wayne’s crack forces routed the warriors in a single bayonet charge, and the chiefs ultimately signed the Treaty of Greenville in 1795, turning over all their lands in Ohio to the United States. That winter, the ailing general accepted possession of British forts acquired by the recently signed Jay Treaty, then died of illness at Presque Isle (Erie), Pennsylvania, on December 15, 1796.

Brigadier General Anthony Wayne led the Americans to success at the Battles of Monmouth and Stony Point. (*Independence National Historical Park*)

By dint of his effective drill and aggressive tactics, Wayne helped restore the postwar American army to military effectiveness.

September 24

MILITARY: President George Washington instructs General Henry Lee to march against the tax rebellion in western Pennsylvania.

October 4

MILITARY: The newly raised “Army of the Constitution,” numbering 11,000 militiamen, takes to the field under President George Washington (now acting general). The force is divided into two wings under Generals Henry Lee and Daniel Morgan at Carlisle and Cumberland, Pennsylvania, respectively. This is Washington’s last foray into the field as a commanding general.

October 22–31

MILITARY: The two columns of the “Constitution Army” begin marching westward, intending to unite at Parkinson’s Ferry on the Monongahela River.

November 2–17

MILITARY: General Henry Lee conducts some predawn raids against the “Whiskey rebels,” netting several hundred prisoners. The remainder surrender voluntarily and the “rebellion” collapses. The majority of the “Constitution Army” then disbands and marches home, but General Daniel Morgan remains in western Pennsylvania for several months with a considerable force to maintain order. Ultimately, 200 rebels are detained, 25 are tried, and two are convicted of treason but subsequently pardoned.

December 31

MILITARY: Henry Knox, having served as commander of the army and secretary of war under both the Articles of Confederation and the Constitution, resigns from office.

1795**January 2**

MILITARY: Federalist Timothy Pickering, former postmaster general, replaces Henry Knox as secretary of war.

February 23

NAVAL: The Office of Purveyor of Supplies, a precursor to the Supply Corps, is founded by Congress.

March

DIPLOMACY: The Jay Treaty is ratified by Congress, whereby the British are obliged to abandon several posts in the Northwest Territory south of the Great Lakes. The U.S. Army accepts responsibility to oversee the transfer of all fortifications and provide garrisons.

May 1

MILITARY: Kentucky militiaman Meriwether Lewis, a future explorer of note, is commissioned an ensign in the 2nd Sublegion.

June

MILITARY: General Daniel Morgan begins disbanding his militia force in western Pennsylvania, convinced that the region is finally reconciled to a federal tax on whiskey. This act concludes his 40 years of military service.

June 16–August 3

INDIAN: General Anthony Wayne and numerous chiefs of the Delaware, Shawnee, Wyandot, and Miami conclude the Treaty of Greenville, whereby they cede the eastern portion of their lands (including the areas of Detroit and present-day Chicago) to the United States in return for a \$10,000 annuity. Indian resolve has been further weakened by the fact that the British, bound by terms of the Jay Treaty, have begun evacuating the region. The Old Northwest is now ready for expanded white settlement.

June 24

MILITARY: At West Point, New York, the Regiment of Artillerists and Engineers is organized under Lieutenant Colonel Stephen Rochefontaine, a former French officer. He also establishes a rudimentary school of instruction for prospective engineering officers.

July 11

MILITARY: Captain Moses Porter accepts possession of Fort Detroit from the British and raises the American flag over the Michigan Territory for the first time. The initial garrison consists of his 65-man company.

November 6

MILITARY: Ensign Meriwether Lewis, having been court-martialed for drunkenness and acquitted, is transferred to the “Chosen Rifle Company” by General Anthony Wayne. There he encounters Lieutenant William Clark and the two becomes fast friends.

December 10

MILITARY: Timothy Pickering resigns from the post of secretary of war.

December 14

MILITARY: At Fort Greenville, Ohio, General Anthony Wayne bids farewell to his legion and rides east to confer with Congress. He is succeeded by the duplicitous general James Wilkinson, who is a Spanish spy.

1796**January 27**

MILITARY: Maryland Federalist James McHenry succeeds Timothy Pickering as secretary of war.

March 2

DIPLOMACY: The United States concludes a treaty with the dey of Algiers, whereby he agrees to stop seizing American vessels in the Mediterranean in return for \$1 million in ransom and tribute. Work on the six frigates under construction ceases. Due to the complete lack of naval power, this is the best accommodation the nation can hope for.

March 15

NAVAL: Despite provisions in the Navy Act of March 27, 1794, President George Washington urges Congress to continue funding the six frigates under construction.

April 20

NAVAL: The Naval Act of 1796 is passed by Congress; this compromise legislation allows completion of three of the frigates authorized by the Naval Act of 1794. Work on the remaining three remains suspended following the signing of a peace treaty with Algiers.

May 1

MILITARY: Lieutenant William Clark, a future explorer of note, resigns from the army to live in Kentucky.

May 30

MILITARY: Congress, having found the prevailing legion structure overloaded with brigadier generals but without colonels, votes to abolish it and resume the prior regimental structure.

July 14

MILITARY: General Anthony Wayne returns to Fort Washington, Ohio, after consultations with Congress, and he succeeds General James Wilkinson. Wilkinson, under mounting suspicion that he is in Spanish employ, seeks to divert attention from himself by accusing Wayne of improper conduct.

August 14

MILITARY: General Anthony Wayne ventures to Fort Detroit, now commanded by Major John Hamtramck. Though not in the best of health, he will remain on station for the next three months.

September 11

MILITARY: In accordance with the Jay Treaty, the British relinquish control of Fort Mackinac, Michigan Territory, to Major Henry Burbeck's company of artillerists.

November 1

MILITARY: The army is reorganized into four infantry regiments, numbered 1 to 4, two companies of light dragoons, and the Corps of Artillery and Engineers. Only one major general and one brigadier general are allowed, along with one paymaster general and one quartermaster general.

December 7

NAVAL: President George Washington, in his last annual message to Congress, supports the gradual creation of a standing navy to both protect American commerce and ensure respect for the flag abroad.

December 15

MILITARY: General Anthony Wayne, whose aggressive disposition has earned him the sobriquet "Mad Anthony," ventures to Presque Isle (Erie), Pennsylvania, and dies there of illness. The duplicitous brigadier general James Wilkinson becomes the army's senior military leader.

1797***February***

MILITARY: In Philadelphia, Captain William H. Eaton, waiting for his resignation to be confirmed, is tapped by Secretary of State John Pickering to engage

in a bit of subterfuge. Posing as a recently court-martialed officer, he approaches Dr. Nicholas Romaine—suspected of being a Spanish spy—in New York City and seeks to sell information relative to the sensitive Florida-Georgia border. When Romaine offers money for the information, Eaton arrests him and escorts the prisoner back to Philadelphia.

February 27

NAVAL: Secretary of State Timothy Pickering issues a report detailing the extent of French depredations against American shipping, primarily in the Caribbean region.

March–May

MILITARY: Captain William H. Eaton is requested by President John Adams to promote disinformation to the Spanish government for national security reasons. He next approaches and befriends the deputy minister of the Spanish legation in Philadelphia, and warns him of secret American forces waiting to pounce if Spain were to attack the Georgia border. The information is relayed back to the Spanish government, which responds by tendering a treaty of friendship with the Americans. As a reward, Adams appoints Eaton the new consul-general to Tunis.

March 3

MILITARY: Congress reestablishes the office of judge advocate and hands it off to Captain Campbell Smith, the first such officer since the Revolutionary War.

March 4

MILITARY: John Adams is inaugurated as the nation's second president and commander in chief of the army. However, the appointment of army officers will be caught up in the increasing ideological struggle between Federalists and Jeffersonian Republicans.

March 7

DIPLOMACY: The government of revolutionary France declares that any American vessel lacking official documents and clearances for cargo and crew is subject to seizure as a legal prize. The net effect is a virtual declaration of war against American shipping.

May–June

MILITARY: Increasing hostility among the Creek in Florida and Georgia convinces American authorities that Spain is planning to annex the region. Consequently, Colonel Thomas Butler is dispatched to Nashville with the 4th Infantry, some artillery, and dragoons. These are subsequently reinforced by part of the 3rd Infantry under Captain Isaac Guion.

May 10

NAVAL: The new 44-gun frigate *United States*, designed by Quaker shipwright Joshua Humphreys, is launched in Philadelphia. It is the first official warship of the new U.S. Navy and also the largest vessel of its class in the world. Command will be awarded to Revolutionary War hero Captain John Barry.

May 16

NAVAL: President John Adams, a vocal supporter of American naval power, declares to Congress that a navy is essential for defending national sovereignty.

He also seeks to allow American merchant vessels to arm themselves and calls for completion of all previously approved warships.

June 7

MILITARY: Congress decrees that a soldier's pay may never be more than two months late, but this proves impossible to enforce. Consequently, many soldiers stuck in remote outposts turn to farming their own food supplies and begin to neglect their duties.

June 24

MILITARY: Congress, anticipating an outbreak of war with France, authorizes recruitment of 80,000 militia as a national contingency. The engineers also receive considerable funding to enlarge and enhance existing harbor defenses.

July 1

NAVAL: Heeding President Adams's call for naval power to defend American commerce against French privateers, Congress consents to recruit crews for the frigates *Constitution*, *Constellation*, and *United States*. They also pass the first set of "Navy Regulations" to govern the service.

MARINES: Regulations affecting the size of marine detachments, pay scales, and enlistment terms are signed into law by President John Adams.

July 4–October

MILITARY: Captain Isaac Guion and his detachment of the 3rd Infantry arrive at Chickasaw Bluffs, Tennessee, and commence the construction of Fort Adams. The balance of the regiment under Major William Kersey arrives soon after, and Guion proceeds to Natchez to enforce order until a territorial government is established.

July 11

NAVAL: In Philadelphia, the huge 44-gun frigate *United States* is commissioned as the nation's first warship, with Captain John Barry at the helm.

August 14

DIPLOMACY: By terms set forth in the treaty with Tunis, the United States agrees to pay the pasha \$107,000 not to attack American shipping.

August 24

MARINES: Marines are prescribed a new uniform, consisting of a blue coat and red lapels, by the secretary of war, who oversees matters pertaining to the navy.

September 7

NAVAL: The 36-gun frigate *Constellation* is launched at Baltimore, Maryland, as the new United States Navy begins acquiring real combat capabilities. It will be captained by Thomas Truxtun.

October 21

NAVAL: The 44-gun frigate *Constitution* is launched at Boston with Captain Samuel Nicholson at the helm. This is the second vessel of its class acquired by the nascent United States Navy and will become America's most celebrated warship. It is still in commission today.

1798

January

MILITARY: At New Haven, Connecticut, Eli Whitney perfects his revolutionary concept of interchangeable parts while constructing firearms for the U.S. Army. His idea will facilitate factory production, along with repairs in the field, and embodies America's burgeoning role in the nascent Industrial Revolution. However, Whitney, who has promised the government to construct 10,000 muskets in only two years, lacks a factory and will miss his deadline by several years.

January 27

DIPLOMACY: The government of revolutionary France declares that all vessels caught trading with Great Britain are liable for seizure.

March 27

NAVAL: Recent maritime tensions with France prompt Congress to authorize three frigates completed in 1797 to be outfitted for active duty at sea.

April 27

MILITARY: In light of ongoing hostilities with France, Congress enlarges the existing Corps of Artillerists and Engineers by authorizing recruitment of a separate regiment of three additional battalions. A further 10,000 men are to be enlisted to form a "Provisional Army" that will serve three years.

NAVAL: Congress authorizes President John Adams to purchase 12 armed vessels to protect American shipping against French depredations.

April 30

NAVAL: To further strengthen the defensive capability of the nation, President John Adams prevails upon Congress to create the Department of the Navy under a secretary of the navy. This new entity will oversee naval administration previously handled by the Department of War, which retains responsibility for Indian Affairs, land grants, and military issues.

May 3

NAVAL: In Philadelphia, the merchant ship *Ganges* is purchased by government agents, becoming the first armed vessel ready for deployment in the so-called Quasi-War with France. It heads to sea shortly after under the command of Captain Richard Dale.

May 4

NAVAL: Congress authorizes President John Adams to purchase or construct an additional 10 armed vessels to assist in the war against French privateers.

May 21

NAVAL: Benjamin Stoddert is appointed the first secretary of the navy by President John Adams, and he oversees a tiny naval establishment hovering on the cusp of war with France.

May 24

NAVAL: Captain Richard Dale guides the armed vessel *Ganges* out of Philadelphia, Pennsylvania, initiating the first armed cruise of the so-called Quasi-War with France.

May 28

MILITARY: Congress passes a bill mandating recruitment of a 10,000-man army for three years.

NAVAL: Congress authorizes President John Adams to order naval commanders to engage any French vessel attempting to seize or harass American commerce at sea. This is the start of an undeclared naval war.

June 18

NAVAL: Former Continental army officer Benjamin Stoddert is sworn in as the nation's first secretary of the navy.

June 23

NAVAL: Captain Samuel Nicholson takes the frigate *Constitution* on its first cruise out of Boston, Massachusetts, and it scouts the East Coast for French privateers.

June 25

NAVAL: In light of hostilities with France, Congress authorizes the arming of merchantmen for their own defense against French privateers.

June 30

NAVAL: Congress authorizes President John Adams to obtain 12 additional armed vessels by gift or loan to the U.S. Navy.

MARINES: Marine Corps strength stands at 25 officers and 58 enlisted men.

July 2

MILITARY: Former president George Washington gains appointment as commander of the three-year provisional army with a rank of lieutenant general; this is the first time that rank has been authorized, and it will not appear again until 1864. Alexander Hamilton is made his second-in-command and inspector general with a rank of major general. Revolutionary veteran Charles C. Pinckney is made the second major general. Washington, a thoroughly trusted figure, is the only man that the American polity would be comfortable with holding such rank.

July 7

DIPLOMACY: The United States unilaterally cancels all existing treaties with France.

NAVAL: Captain Stephen Decatur, Sr., commanding the 20-gun sloop *Delaware*, captures the 14-gun French privateer *La Croyable* off Great Egg Harbor, New Jersey; this is the first prize of the Quasi-War, and it will be recommissioned at Philadelphia as the *Retaliation*.

July 9

NAVAL: President John Adams signs legislation allowing American warships and privateers to actively seek out and engage French vessels; 365 letters of marque and reprisal will be issued over the next nine months.

July 11

MARINES: The U.S. Marine Corps is formally established by Congress, being an outgrowth of the Continental Marines raised during the Revolutionary War. The Marine Corps Band also comes into being and will become known as "The

President's Own" for traditionally providing musical entertainment at the White House.

July 12

MARINES: William Ward Burrows is commissioned a major and selected as the second commandant of the Marine Corps. Authorized strength of his command is set at 33 officers and 848 men.

July 16

MILITARY: Congress enlarges the existing army structure by adding 39 officers and 704 soldiers to the four regiments extant. It also authorizes recruitment of an additional 12 infantry regiments and six troops of light dragoons, but these are never formed.

NAVAL: Congress reverses itself and allows the construction of three remaining frigates (*Congress*, *Chesapeake*, and *President*), first authorized in 1794, to continue.

July 22

NAVAL: The frigate *Constitution* sets sail from Boston, Massachusetts, under Captain Samuel Nicholson on a lengthy cruise of the Caribbean. It is the first extended mission of "Old Ironsides."

July 29

NAVAL: The British schooner HMS *Mosquito* mistakenly fires upon the American schooner *Unanimity*, believing it to be French. The *Unanimity* is driven onto a sandbar at Dewee's Inlet, South Carolina, but diplomatic damage between the two nations is minimal.

July 30

NAVAL: Secretary of the Navy Benjamin Stoddert, believing that the "best defense is a good offense," outlines his naval strategy to President John Adams. Stoddert intends to deploy American naval assets directly in the Caribbean, in effect, taking the war to the enemy.

August 8

NAVAL: The secretary of the navy forbids the service of African Americans aboard U.S. Navy warships, reversing a trend in effect since the Revolutionary War.

August 22

NAVAL: The frigate *United States* under Captain John Barry chases the French schooner *Sans Pareil* for 10 hours between Dominica and Martinique before capturing it. This is the first enemy vessel bagged by an American frigate and the first taken in Caribbean waters.

September 8

NAVAL: Captain Samuel Nicholson and the *Constitution* detain the British vessel *Niger* off Cape Hatteras, North Carolina, only to find it has a French captain commanding. It is taken back to shore as a prize.

September 30

NAVAL: As the sloop *Baltimore* and frigate *Constellation* escort a convoy of 47 merchant vessels from Havana, Cuba, they are infiltrated by the British schooner

Nancy, seeking protection. The intruder is discovered and expelled, but not before several American crewmen serving on the British ship transfer their services to the *Baltimore*.

November 16

NAVAL: British warships accost the 20-gun American sloop *Baltimore* on the high seas and remove five crewmen, suspected British deserters, for impressment purposes. Captain Isaac Phillips is cashiered for failing to defend the American flag. Hereafter, all U.S. Navy warships are expressly ordered to use force and resist such aggression.

November 20

NAVAL: The schooner *Retaliation* under Lieutenant William Bainbridge is seized by the French frigates *L'Insurgente* and *Volontaire* off the Carribean Island of Guadalupe; the 250-man crew will remain in captivity until February 1799. This will be the only American warship lost during the "Quasi-War."

- To enhance American naval strength, Secretary of the Navy Benjamin Stoddert suggests building 12 ships of the line, 12 frigates, and 20 smaller vessels.

December 29

NAVAL: Secretary of the Navy Benjamin Stoddert submits his first annual report to Congress, a practice that will continue until 1948.

1799

January 16

NAVAL: Captain Samuel Nicholson and the frigate *Constitution* pursue and capture a French vessel near Bermuda, only to learn that it is a British ship captured by the French. Nicholson, lacking any authority to liberate English shipping, decides to release the ship in charge of a prize crew.

January 17

NAVAL: Captain Thomas Truxtun leads an American squadron into St. Kitts, Lesser Antilles, which subsequently serves as the navy's main base of operations in the Caribbean.

February 3

NAVAL: The frigate *United States* chases and sinks the French privateer *L'Amour de la Paris*, rescuing 58 crew members aboard as prisoners; they are subsequently exchanged for American prisoners held at Guadeloupe.

February 8

NAVAL: Off Cuba, a convoy escorted by Captain Stephen Decatur, Sr., of the *Delaware* is accosted by the British warship HMS *Solebay*, which fires shots and demands the right of search. Decatur refuses and keeps on sailing.

February 9

NAVAL: In a smart action off the island of Nevis, Captain Thomas Truxtun of the 38-gun frigate *Constellation* captures the 40-gun French frigate *L'Insurgent*; losses in this lopsided affair are two Americans dead and three wounded to 29 French dead and 41 injured. Lieutenant John Rodgers and Midshipman David Porter are subsequently detailed to sail their prize into St. Kitts with 173 prisoners.

This is the first significant victory of the U.S. Navy during the so-called Quasi-War with France.

February 21

NAVAL: British-born Captain Thomas Tingey, commanding the *Ganges*, is accosted by the British vessel HMS *Surprise* off Hispaniola, whose captain demands all English subjects serving on board. Tingey bristles at the thought and threatens to fight the larger vessel, even if it means losing, at which point the *Surprise* sails away.

February 25

NAVAL: Congress authorizes construction of six ships of the line and six sloops of war, but these vessels will not be built.

March 2

MARINES: The strength of the Marine Corps is increased and fixed at one major/commandant, 40 officers, and 1,044 enlisted men; presently they muster around 350 men of all ranks.

March 2–3

MILITARY: Congress authorizes creation of a Medical Department headed by a physician general officer. Meanwhile, the Corps and Regiment of Artillerists and Engineers are renamed the 1st and 2nd Regiments of Artillerists and Engineers. All ranks are to receive higher pay but smaller whiskey rations.

March 5

NAVAL: Captain Stephen Decatur, Sr., leading the frigates *Baltimore* and *General Greene*, captures the French privateer *le Marsouin* off Havana; the French vessel tried to slip away by masquerading as an unarmed merchantman.

March 12

NAVAL: The secretary of the navy orders all U.S. warships to search any suspicious French vessel within their grasp and retake any armed prizes.

May 12

NAVAL: Captain Alexander Murray completes the most impressive Caribbean cruise of any American leader, seizing two French ships, convoying 100 merchant ships, and dropping anchor at all four American operating stations in the theater.

May 20

NAVAL: The new frigate *Boston* is launched at Boston, Massachusetts, commanded by Captain George Little.

May 28

NAVAL: Dissatisfaction with Samuel Nicholson as captain of the *Constitution* leads to his replacement by Captain Silas Talbot, a distinguished veteran of the Revolutionary War.

June 5

NAVAL: The frigate *John Adams* launches at Charleston, South Carolina, with George Cross as its captain.

June 8

NAVAL: The frigate *Adams* is launched at New York; Captain Richard V. Morris will gain command of the vessel.

June 26

NAVAL: The embargo of Santo Domingo, Hispaniola, is lifted by President John Adams; trade resumes, but this creates the need for additional naval protection for American shipping.

June 28

NAVAL: The American brig *Merrimack* dispatches the French schooner *Magicienne* with a single broadside; this victory restores a former American vessel, *Retaliation*, to American service.

July 27

NAVAL: The frigate *General Greene* drops anchor at Newport, Rhode Island, following an extended cruise of Cuban waters. However, an outbreak of yellow fever has killed 20 crew members and incapacitated 37 others.

August 1

NAVAL: Captain Thomas Truxtun, angered by a presidential decision to rank him below Captain Silas Talbot, resigns from the naval service.

August 14

NAVAL: The frigate *Insurgent*, recently captured from France and impressed into the U.S. Navy, sets sail for Gibraltar with Captain Alexander Murray at the helm.

August 15

NAVAL: After five years of off-again, on-again construction, the frigate *Congress* is finally launched at Portsmouth, New Hampshire, under Captain James Sever.

September 30

NAVAL: The frigate *Essex*, which was paid for by the inhabitants of Essex County, Massachusetts, launches at Salem, Massachusetts, with Captain Edward Preble at the helm.

October 2

NAVAL: The Washington Navy Yard, today the U.S. Navy's oldest shore facility, is established.

November 3

NAVAL: Peace envoys Oliver Ellsworth and William Richardson embark at Newport, Rhode Island, on board the frigate *United States* and make for France.

November 18

NAVAL: In the waters off Guadeloupe, the American brig *Pickering* under Lieutenant Benjamin Hillar is attacked by the large French corsair *l'Egypte Conquise*; while outgunned, it forces the enemy vessel to strike its colors.

December 2

NAVAL: The frigate *Chesapeake* launches at Gosport, Virginia, and will eventually be placed under the command of Captain Samuel Barron.

December 14

MILITARY: George Washington dies at Mount Vernon, Virginia, still holding his commission as a lieutenant general. Congress subsequently abolishes that rank, but Alexander Hamilton, the senior major general, becomes the military's leading figure.

1800

January 1

NAVAL: In the early morning hours off St. Marc, Haiti, the American armed schooner *Experiment* is mistaken for a merchantman and attacked by several hundred pirates; the *Experiment* expertly repels the attack, sinking two small pirate craft.

January 5

MILITARY: Secretary of War James McHenry recommends to Congress that it create a national military academy and five subordinate schools for the instruction of both army and naval officers.

February 1

NAVAL: The 38-gun American frigate *Constellation* under Captain Thomas Truxtun defeats the 50-gun French frigate *La Vengeance* off Guadeloupe following a day-long chase. Superior American gunnery forces their adversary to twice strike its colors, but smoke obscures its capitulation, and *La Vengeance* goes on fighting. The French vessel escapes after Truxtun's ship loses its mainmast. American losses total 14 dead and 25 injured; the French sustain an estimated 50 killed and 110 wounded.

February 7

NAVAL: The frigate *Essex* under Captain Edward Preble becomes the first American warship to dip below the equator as it sails to the East Indies.

February 27

NAVAL: The American frigate *General Greene* under Captain Christopher R. Perry lends fire support to Haitian rebels under General Toussaint Louverture, and several French forts are successfully stormed on Hispaniola. Toussaint is effusive in his praise for Perry and his crew.

March 28

NAVAL: The frigate *Essex* under Captain Edward Preble becomes the first American warship to round the Cape of Good Hope, South Africa, and sail into the Indian Ocean.

March 30

MILITARY: The army institutes a metal branch insignia for the light dragoons, the nation's first.

March 31

MARINES: A marine barracks will be constructed in Washington, D.C., for the protection of the navy yard.

April 5

NAVAL: The new frigate *Philadelphia* is christened at the city bearing its name and is placed under the command of Captain Stephen Decatur, Sr.

**Truxtun, Thomas (1755–1822)***American naval officer*

Thomas Truxtun was born on Long Island, New York, on February 17, 1755, the son of an English barrister. He went to sea as a cabin boy at the age of 12 and served three years before being impressed aboard HMS *Prudent*, a British warship. Truxtun performed so admirably in this capacity that his captain offered him a midshipman's commission in the Royal Navy, but his family secured his release beforehand. He then returned to the merchant marine and was commanding his own vessel at the age of 20. When the Revolutionary War broke out in 1775, Truxtun captained a merchant ship in the Caribbean, and he was seized by British officials and held for nearly a year before being exchanged. Thereafter he joined the Patriot cause and commanded a succession of privateers over the course of the conflict. He made many daring captures in the Azores and English Channel, and so skillful was he at running sorely needed supplies to the Continental army that General George Washington once toasted his service as equal to a regiment's. His most celebrated mission involved transporting the American consul general to France onboard the privateer *St. James*; en route, Truxtun was accosted by a British frigate, but he skillfully disabled it in a running fight and proceeded to France without further delay. After the war, Truxtun commanded the merchant vessel *Canton*, and in 1785 he became one of the first Americans to drop anchor in Chinese waters.

Continuing tension with the Barbary pirates of North Africa induced Presi-

dent John Adams to establish the U.S. Navy in 1794, the same year that Truxtun wrote and published *Remarks, Instructions, and Examples Relating to Latitude and Longitude*, a standard naval text. In 1798, when hostilities with France culminated in the undeclared Quasi-War, Truxtun became one of the six original captains commissioned in the U.S. Navy. In this capacity, he oversaw construction of the 38-gun frigate *Constellation* at Baltimore, Maryland, while also authoring *Instructions, Signals, and Explanations Offered for the U.S. Fleet*. Truxtun next guided the *Constellation* on several cruises through the French-dominated Caribbean Sea, and on February 9, 1799, he engaged and defeated the frigate *L'Insurgente*. Owing to Truxtun's strict instruction on sailing and gunnery, the enemy vessel struck in an hour's time, losing 29 killed and 44 wounded; American losses were two dead and three injured. On February 1, 1800, Truxtun fought the larger frigate *La Vengeance* near Guadalupe, roughly handling his adversary until a lucky shot toppled his mainmast. Smoke prevented Truxtun from seeing the French vessel had surrendered twice already, and he fought on. The badly damaged French ship escaped, but Truxtun returned a national hero and received a gold medal from Congress. The hot-tempered captain resigned his commission in 1802 in a dispute regarding seniority, and died in Philadelphia on May 5, 1822. He was one of the early U.S. Navy's most significant leaders.

April 10

NAVAL: The 44-gun frigate *President* launches at New York with a newly restored Commodore Thomas Truxtun at its helm; this is the last of the original six frigates.

April 22

MARINES: Congress institutes a new rank of lieutenant colonel commandant as head of the Marine Corps.

May 1

MARINES: Commandant William Ward Burrows becomes the first marine officer to become a lieutenant colonel.

May 7

MILITARY: Former army captain William Henry Harrison gains congressional appointment as the first territorial governor of the western Indiana Territory. Governor Arthur St. Clair also remains in power, although heading the eastern Ohio Territory.

May 11

NAVAL: In a startling action, Lieutenant Isaac Hull leads a boarding party to the vessel *Sally*, then pulls alongside the French privateer *Sandwich* off Puerto Plata, Santo Domingo. They quickly sortie and capture their quarry; Hull triumphantly sails off without loss.

MARINES: Captain Daniel Carmick commands a detachment of 100 marines that storms the French privateer *Sandwich* off Puerto Plata, Santo Domingo. They subsequently storm a land battery and spike the guns.

June

MILITARY: The Department of War relocates from Philadelphia, Pennsylvania, to the new federal capital at Washington, D.C.

June 12

NAVAL: The U.S. Navy buys land for its first shipyard in Portsmouth, New Hampshire. The 60-acre plot sets the taxpayers back \$5,500 and is still in service.

June 13

MILITARY: Samuel Dexter replaces James McHenry as the nation's fourth secretary of war. He is also the first secretary to lack military experience.

NAVAL: The frigate *John Adams* seizes the French schooner *Decade* while cruising the West Indies; this is that vessel's ninth capture.

June 15

MILITARY: With the threat of war with France dissipating, Congress discharges all new recruits with three month's pay; army strength consequently drops to 3,429 men of all ranks. Once Alexander Hamilton and Charles C. Pinckney resign their commissions, Brigadier General James Wilkinson once again reigns as the military's senior officer.

July 1

NAVAL: Captain Edward Preble, commanding the 32-gun frigate *Essex*, conducts the U.S. Navy's first convoy by escorting 14 merchantmen through the Sunda Strait, Dutch East Indies.

July 4

MARINES: At Tun's Tavern, Philadelphia, a traditional recruiting ground for marines, the U.S. Marine Corps band debuts during patriotic festivities.

July 12

MARINES: The Marine Corps continues taking on permanent form with the arrival of Lieutenant Colonel Commandant William Ward Burrows in Washington, D.C. Even though his staff sets up a temporary headquarters at nearby Georgetown, this is the start of Headquarters, Marine Corps (HQMC).

August 3

NAVAL: The sloop of war *Trumbull* seizes the French schooner *Vengeance*, taking with it several French officers and their families fleeing Haiti.

August 8

NAVAL: Captain William Bainbridge directs the sloop *George Washington* from Philadelphia for Algeria, where he is to deliver a store of lumber and goods as tribute to the local dey. His becomes the first American warship to ply the Mediterranean, although those that follow will be less accommodating to pirate demands.

- The late French frigate *Insurgent*, now sailing under Captain Patrick Fletcher, is lost with all hands while en route to the West Indies.

August 20

NAVAL: Lieutenant B. Hillar and the revenue cutter *Pickering* depart New Castle, Delaware; *Pickering* disappears at sea with all hands.

September 23

NAVAL: The American sloop *Patapsco* anchors in St. Ana Bay, Curacao, and bombards French forces besieging a Dutch fort. The French evacuate the island a day later and it is secured by a party of marines and sailors.

September 30

DIPLOMACY: United States commissioners conclude the Convention of 1800 with the French government under First Consul Napoléon Bonaparte, thereby ending the Quasi-War with that nation. The treaty itself will not be ratified by the U.S. Senate until February 3, so fighting at sea continues.

October 1

NAVAL: In the waters off St. Barts, the schooner *Experiment* is set upon by two French vessels, when it suddenly turns and attacks the schooner *Diana*, forcing *Diana* to strike after a single broadside. Among the captives is French general André Rigaud.

October 12

NAVAL: The 28-gun frigate *Boston* under Captain George Little engages and captures the 24-gun corvette *Le Berceau* during an intense night battle 600 miles off the coast of Guadeloupe. French losses are 34 men killed and 18 wounded. This becomes one of eight vessels captured by the *Boston*; neither vessel is aware that a peace treaty has been signed.

October 19

NAVAL: In an egregious national insult, Captain William Bainbridge is ordered by the dey of Algiers to convey his emissary to Constantinople (Istanbul) aboard the

warship *George Washington*. Bainbridge angrily refuses at first but is convinced by American consul Richard O'Brien that the dey might otherwise resume attacks on American shipping. Bainbridge is also forced to present gifts to the Ottoman government and to fly the Ottoman flag from his masthead, although the Sublime Porte in Constantinople treats him with extreme politeness.

November 28

NAVAL: The frigate *Essex* drops anchor at New York after an 11-month sojourn to the Indian Ocean, becoming the first American warship to twice round the Cape of Good Hope in one cruise.

1801

January 1

MARINES: Guests visiting the White House in Washington, D.C., are serenaded by the Marine Band for the first time.

February 3

DIPLOMACY: The Senate ratifies the Convention of 1800 (Treaty of Mortefontaine), which finally ends the so-called Quasi-War with France. The nascent U.S. Navy's 16 vessels have performed impressively, capturing 86 French privateers for a loss of one sloop.

February 18

NAVAL: Benjamin Stoddert tenders his resignation as secretary of the navy; nearly five months will elapse before a replacement can be found.

February 29

MILITARY: Captain Meriwether Lewis, a former neighbor of president-elect Thomas Jefferson, is invited to Washington, D.C., and to serve as Jefferson's personal secretary; he accepts.

March 3

NAVAL: The Peace Establishment Act is signed into law by President John Adams. While it mandates retention of 13 warships for the U.S. Navy, only six of these are to be kept on active duty. Similar restrictions are placed upon the officer corps, which is also reduced.

MARINES: A sum of \$20,000 is appropriated by Congress to construct a marine barracks in Washington, D.C.

March 4

MILITARY: In Washington, D.C., Thomas Jefferson is inaugurated as the third president and commander in chief. In a major ideological shift, Jefferson, who embraces the idea of a smaller military establishment, begins purging the officer corps of Federalists and replacing them with Republicans.

March 5

MILITARY: Former Revolutionary War hero Henry Dearborn replaces Samuel Dexter as the fifth secretary of war.

March 31

MARINES: Lieutenant Colonel Commandant William Ward Burrows accompanies President Thomas Jefferson as they scout the Washington, D.C., region for a suit-

able spot to build a marine barracks. The site selected is at the corner of 8th and I Streets; it will be purchased for \$6,247.18.

April 1

MILITARY: Captain Meriwether Lewis reports for duty as President Thomas Jefferson's personal secretary; his first task is to evaluate the professional and political status of the entire officer corps, with a view toward recommending either retention or discharge.

April 30

MILITARY: In an attempt to cultivate a "more republican" outlook in the military, the traditional long hair of soldiers, tied in a queue, is eliminated in favor of short hair. The new regulations are resented by many traditionalists and result in the court-martial of at least one colonel.

May 10

DIPLOMACY: Determined to secure increased tribute payments, Yusuf Karamanli, the dey of Tripoli, declares war on the United States; the ensuing struggle will last five years and take scores of lives.

May 20

NAVAL: The War Department instructs Commodore Richard Dale to form a squadron consisting of the frigates *Essex*, *Philadelphia*, and *President*, accompanied by the schooner *Enterprise*, to show the flag in the Mediterranean. In the event war breaks out with the Barbary States of North Africa, he is authorized to blockade the port of Tripoli.

May 22

NAVAL: At Hampton Roads, Virginia, Captain Richard Dale succeeds the venerable Thomas Truxtun as commander of the frigate *President*.

May 29

NAVAL: The squadron assembled by Captain Richard Dale sails from Hampton Roads, Virginia, bound for the Mediterranean. The United States is about to flex its small but potent naval muscles.

June–December

MILITARY: General James Wilkinson is authorized to serve as a peace commissioner among the Choctaw and Chickasaw nations; they grant his troops permission to start building a road, the Natchez Trace, from Natchez, Mississippi Territory, to Nashville, Tennessee.

June 10

MILITARY: In an early display of inter-service cooperation, two batteries of artillerymen are assigned to the U.S. Navy as part of the squadron sailing against the Tripolitan pirates.

NAVAL: The warship *Ganges*, a former merchant craft that captured 11 French vessels, is sold in accordance with the Peace Establishment Act.

July 4

MARINES: In Washington, D.C., President Thomas Jefferson reviews the Marine Corps Band on the White House grounds; this is the first instance where a commander in chief has paraded a body of regular troops at that official residence.

July 17

NAVAL: The squadron of Commodore Richard Dale arrives off Tripoli and imposes a blockade. Meanwhile, the American consul there, James Cathcart, tries in vain to have Pasha Yusuf Karamanli reduce his tribute amounts from \$250,000 and annual payments of \$20,000 thereafter.

July 27

NAVAL: Maryland politician Samuel Smith is sworn in as the second secretary of the navy.

August

NAVAL: In France, American inventor Robert Fulton creates his viable submarine *Nautilus* and offers it to Napoléon, who remains skeptical and disinterested.

August 1

NAVAL: In an early naval encounter off Malta, the brig *Enterprise* under Lieutenant Andrew Sterrett engages and captures the 14-gun North African vessel *Tripoli*, killing 30 Algerians and taking 30 captive. No Americans are harmed. Because Sterrett has not been ordered to take prizes, his catch is disarmed and allowed to sail home.

August 4

MARINES: The Marine Band plays and marches at ceremonies in honor of President Thomas Jefferson.

September 29

NAVAL: American frigates *Essex* and *Philadelphia* fire upon Tripolitan gunboats as they enforce the blockade off Tripoli.

December 14

MILITARY: Major Jonathan Williams, a respected scientist and nephew of Benjamin Franklin, takes charge of the small engineering school at West Point, New York.

1802**February 6**

NAVAL: Congress recognizes that a state of war exists with Tripoli and lifts all restrictions inherent in the Peace Establishment Act by voting to allow the president to man, equip, and deploy any number of armed vessels he deems necessary for protecting American commerce.

March

MILITARY: In Knoxville, Tennessee, attorney Andrew Jackson is appointed a major general of Tennessee militia.

March 3

NAVAL: Commodore Thomas Truxtun is offered command of a second American squadron for service in the Mediterranean, yet he resigns his commission over a minor tiff with the secretary of the navy.

March 10

NAVAL: Commodore Richard Dale sails out from Gibraltar and returns from the Mediterranean after nine months of fruitless blockade duty against Tripoli. In

truth, his force was too small to effectively blockade Tripoli city and too weak to decisively bombard it.

March 16

MILITARY: True to his Republican precepts, President Thomas Jefferson begins reducing the size of the U.S. Army by eliminating the dragoon regiment and eliminating two infantry regiments. Brigadier General James Wilkinson is retained as the army's commanding general, although many Federalist officers are discharged with considerable bitterness.

- A bill authorizing the United States Military Academy at West Point, New York, passes Congress, and a 16,000-acre campus is appropriated for that use. In promoting its creation, President Thomas Jefferson has two goals in mind: to acquire a cadre of professionally trained military engineers whose talents in surveying and bridge and road building will facilitate frontier settlement, and also to afford political indoctrination for the officer class, rendering them favorably disposed toward democratic republicanism.

April 1

MILITARY: In another major shake-up, both regiments of artillerists and engineers are broken up, with the former being consolidated into the Regiment of Artillery and the latter becoming the Corps of Engineers. In a move of extreme economy, the gunners are not authorized the horses to pull their cannon; they will either drag them themselves or employ oxen.

April 27

NAVAL: At Hampton Roads, Virginia, Commodore Richard V. Morris sails with the frigate *Chesapeake* to Tripoli, there to assume control of the blockading squadron deployed outside the port. Once on station, he will gradually assemble his own squadron there.

May 10

NAVAL: The frigate *Boston* engages a flotilla of Tripolitan gunboats, forcing at least one to ground itself.

June 22–August 16

NAVAL: The sultan of Morocco informs James Simpson, the U.S. consul at Tangiers, of his decision to declare war on the United States. News of the impending arrival of Commodore Richard V. Morris's squadron prompts his majesty to reverse course and accept a peace settlement arranged by Simpson.

July 4

MILITARY: The United States Military Academy at West Point, New York, is officially opened. This marks the genesis of military professionalism in the U.S. Army. Major Jonathan Williams, a nephew of Benjamin Franklin, becomes the first superintendent. However, because Secretary of War Henry Dearborn feels that engineers should command only their own members, the artillery company at West Point remains under the jurisdiction of Captain George Izard.

July 22

NAVAL: Captain Alexander Murray and the frigate *Constellation*, 36 guns, engage several Tripolitan vessels and sink two gunboats.

October 12

MILITARY: Joseph G. Swift and Simon M. Levy, who had been taking courses of instruction, are the first two graduates of the U.S. Military Academy, West Point. Both are commissioned second lieutenants and assigned to the Corps of Engineers.

December 3

MILITARY: To denote their elite status, members of the Corps of Engineers receive new uniforms of blue jackets with gold-embroidered collars and cuffs. The new motto engraved on their buttons, "Essayons," is retained to the present day.

December 15

NAVAL: To facilitate the preservation of inactive warships, President Thomas Jefferson calls upon Congress to construct a dry dock at the Washington Navy Yard; the proposal will never be acted upon.

1803**January 18**

MILITARY: President Thomas Jefferson, eager to strengthen American claims to territory as far west as the Pacific Northwest, requests Congress to supply \$2,500 for a secret exploring/reconnaissance expedition. He appoints Captain Meriwether Lewis to head up the endeavor.

February 28

NAVAL: President Thomas Jefferson approves a congressional measure to build gunboats for the purpose of enforcing trading rights on the Mississippi River.

March 9

MILITARY: To enhance American influence among Indians and in the fur trade, Major John Hamtramck is ordered to dispatch troops from Fort Detroit and across Lake Michigan to the mouth of the Chicago River.

March 15

MILITARY: Captain Meriwether Lewis begins drawing supplies for his proposed western expedition, including 15 new Harpers Ferry Model 1803 rifles, the army's first standard-issue weapon.

March 19

MILITARY: Captain Meriwether Lewis writes to his old friend, William Clark, and invites him to serve as co-commander. He will be restored to rank and receive regular army pay and veteran's land grants.

May 12

NAVAL: In a swift action, the frigate *John Adams* under Captain John Rodgers captures the Tripolitan vessel *Meshuda* as it attempts to enter Tripoli harbor flying the Moroccan flag.

May 20

NAVAL: At Boston, Massachusetts, Commodore Edward Preble, a stern disciplinarian, assumes command of the frigate *Constitution*. He wields a profound impact on the embryonic officer corps under his command.

May 22–26

NAVAL: The frigates *John Adams*, *New York*, and *Adams*, accompanied by the schooner *Enterprise*, take up blockading positions off Tripoli; the latter ves-

**Preble, Edward (1761–1807)**

American naval officer

Edward Preble was born in Portland, Maine (then administered by Massachusetts), the son of a merchant marine captain. In 1779 he ran away from home and joined a privateer of the Massachusetts state navy and cruised for prizes during the Revolutionary War. Preble served with distinction on several vessels and was captured briefly in 1781, but the following year was commanding his own sloop. After the war, he continued on with the merchant marine, gaining a reputation as a fine mariner and a strict disciplinarian. In 1794 Preble joined the nascent U.S. Navy as a lieutenant. In this capacity, he fought in the Quasi-War against France, 1798–1800, as part of Commodore John Barry's West India Squadron. After capturing the French privateer *L'Egypte Conquise*, he assumed command of the frigate *Essex*, sailed off to the East Indies, and took a further 14 prizes. His was the first American warship to enter East Asian waters, and he also rescued a number of American vessels from captivity. Preble returned home in the fall of 1800 and was offered command of the frigate *Adams*, but declined on account of poor health. However, in 1801, the dey of Tripoli declared war on the United States in an attempt to gather larger tribute payments, and President Thomas Jefferson countered by dispatching several naval squadrons to deal with the pirates.

In May 1803 Preble accepted command of a squadron destined for Tripoli, and he arrived off the coast the following November. Unlike previous commanders, he was

extremely aggressive and, upon learning that the pasha of Morocco had also declared war on the United States, he sailed his squadron directly to Tangiers and persuaded officials there to renew their peaceful relations. Preble then imposed a tight blockade on Tripoli, which he punctuated by periodic bombardment of the city and its defenses. The Americans lacked the resources to inflict critical damage, but Preble insisted on making their presence felt. To this end, he went so far as to approach the Kingdom of the Two Sicilies and rent several gunboats. In February 1804 he authorized Lieutenant Stephen Decatur to undertake a daring mission to burn the captured frigate *Philadelphia*, which was successfully accomplished. Another aggressive scheme, that of blowing up the captured ketch *Somers* near Tripoli's defenses, came to grief when the ship exploded prematurely, killing its crew and Lieutenant Richard Somers. Preble rotated out of the Mediterranean in September 1804 and returned home. He felt his mission had been a failure and was utterly surprised to learn that Congress had voted him a gold medal for his sterling leadership. In 1806 President Jefferson offered him the post of secretary of the navy, but Preble declined, citing poor health. He died in Portland on August 25, 1807, having schooled an entire generation of young naval officers in the art of command. Many subordinates trained under his harsh regimen went on to enjoy distinguished naval careers during the War of 1812.

sel chases an enemy vessel into the harbor before being hotly engaged by land batteries.

May 23

NAVAL: Captain Edward Preble, a stern, no-nonsense disciplinarian, is appointed commodore of the Mediterranean Squadron. His aggressive brand of leadership will prove infectious to all ranks.

- A landing party of 50 sailors and marines under Lieutenant David Porter of the frigate *New York* steals ashore west of Tripoli city, sets fire to a dozen feluccas (armed as gunboats) on a beach, then retires with 15 casualties.

May 27

NAVAL: In a stout night action, the frigates *John Adams*, *New York*, and *Adams* trade fire with nine gunboats escorting a 14-gun xebec (gunboat) into Tripoli harbor. The enemy vessels manage to elude capture.

May 31–June 7

NAVAL: Growing bolder, the American blockading squadron off Tripoli harasses 10 Tripolitan merchantmen and prevents them from unloading their cargoes. At length, two of the enemy ships are captured and burned.

June 7

DIPLOMACY: Commodore Richard V. Morris and six officers land at Tripoli under a flag of truce to propose a peace settlement, but the dey finds their terms unacceptable.

June 21

NAVAL: A 22-gun Tripolitan vessel (a polacre) is sunk by the frigate *John Adams* and the schooner *Enterprise*; this victory allows the blockading squadron to refocus its attention toward the offending states of Tunis, Algiers, and Morocco.

- Secretary of the Navy Samuel Smith, angered by Commodore Richard V. Morris's unwillingness to communicate his intentions and movements, takes steps to replace him as head of the Mediterranean squadron.

June 26

NAVAL: Commodore Richard V. Morris, rather than stir up additional trouble with Morocco, lifts the naval blockade of Tripoli.

July 5

MILITARY: Captain Meriwether Lewis, acting upon presidential authority, begins organizing the "Corps of Discovery," better known as the Lewis and Clark Expedition. More than simply a military reconnaissance, it bears witness to the lucid mind of Thomas Jefferson by addressing numerous scientific, botanical, and geographical purposes.

July 13

NAVAL: A new navy squadron headed by Commodore Edward Preble is ordered to relieve Commodore Richard V. Morris's ships off Tripoli harbor; the latter will be directed to sail promptly for home.

July 29

MILITARY: William Clark decides to join the proposed western expedition of Captain Meriwether Lewis, then outfitting at Pittsburgh, Pennsylvania. Lewis is

behind schedule, awaiting delivery of specially designed, 55-foot-long keel boats for river travel.

August 17

MILITARY: Captain John Whistler marches his company of the 1st Infantry to the site of present-day Chicago, Illinois, and commences construction of Fort Dearborn.

August 26

NAVAL: Captain William Bainbridge of the frigate *Philadelphia* attacks and captures the Moroccan warship *Mirboka*, freeing its American prize, the brig *Celia*. The crew of the latter was being held in irons below deck on the *Mirboka*; both vessels will be taken to Gibraltar.

August 31

MILITARY: The first government-sponsored exploring expedition, headed by army captain Meriwether Lewis, departs down the Ohio River. Meanwhile, Captain William Clark is gathering additional volunteers and supplies at his brother's home in Clarksville, Indiana Territory, and will join Lewis en route. They will not return from their epic voyage for three years, and intend to greatly enhance the scientific and geographical knowledge of the American interior. President Thomas Jefferson, desiring to lessen the influence of commercial elites along the east coast, feels that settlement of the frontier will lead to a dominant, agrarian-based, yeoman farmer class; hence the region they inhabit will become "the bulwark of Liberty."

September 14

NAVAL: At Gibraltar, Commodore Edward Preble assembles the third American squadron in the Mediterranean, consisting of the frigates *Constitution*, *John Adams*, *New York*, and *Philadelphia*, assisted by schooners *Nautilus* and *Vixen*—an aggregate of 168 guns. Previously, Preble had informed Consul James Simpson of his intention to seize any vessel belonging to the sultan of Morocco.

September 17

NAVAL: U.S. consul James Simpson informs Commodore Edward Preble of the Moroccan seizure of an American vessel at the port of Mogador, and Morocco's declared intention to take other ships at sea.

September 20

NAVAL: Lieutenant Isaac Hull arrives at Gibraltar commanding the schooner *Enterprise*.

October 1

NAVAL: The brig *Syren* under Lieutenant Charles Stewart drops anchor at Gibraltar.

October 12

DIPLOMACY: At Tangiers, Mulai Suleiman, sultan of Morocco, ratifies a peace treaty with the United States first signed in 1787. Commodore Edward Preble is conspicuously present during these proceedings.

October 14

MILITARY: Captains Meriwether Lewis and William Clark are reunited at Clarksville, Indiana Territory, for the first time in seven years.

October 15

MILITARY: Nine enlisted men are sworn in as part of the newly formed “Corps of Discovery” as the Lewis and Clark Expedition begins to unfold.

October 31

NAVAL: Disaster strikes in the Mediterranean when the frigate *Philadelphia* under Captain William Bainbridge grounds in Tripoli harbor while chasing an enemy vessel. He tries to refloat his vessel while under fire from numerous shore batteries, but is soon surrounded by gunboats and forced to surrender. Bainbridge and his entire crew of 307 are interred as prisoners of war.

November 11

MILITARY: The small Corps of Discovery under Captains Lewis and Clark pauses at Fort Massac, Illinois Territory, to gather up their strength and additional supplies. Here they also hire two soldiers from the garrison as well as George Drouillard, a local guide. Two days later they move onto the Mississippi River and the tempo of exploration increases.

November 12

NAVAL: The American naval squadron under Commodore Edward Preble establishes a blockade of Tripoli harbor and warns neutral vessels to steer clear.

November 25

NAVAL: A passing British warship informs Commodore Edward Preble of the frigate *Philadelphia*'s capture; he immediately begins devising a plan to destroy the vessel at its moorings.

December

MILITARY: The Corps of Discovery under Lewis and Clark winters at Dubois Wood on the Wood River (Illinois), accepts a handful of volunteers, and sends the first scientific samples back to a waiting president Thomas Jefferson.

December 20

MILITARY: Brigadier General James Wilkinson arrives at New Orleans with three artillery companies commanded by Lieutenant Colonel Constant Freeman. Once there, they accept the transfer of the Lower Louisiana District from France to the United States. This move comes in response to the Louisiana Purchase.

1804**February 2**

NAVAL: From Syracuse harbor on the east coast of Sicily, Lieutenant Charles Stewart and the brig *Syren* escort Lieutenant Stephen Decatur, Jr., and the captured ketch *Intrepid* on an unknown mission.

February 16

NAVAL: In a stunning naval upset, Lieutenant Stephen Decatur leads a cutting-out expedition that recaptures the 38-gun frigate *Philadelphia* in Tripoli harbor, then burns it under the city's cannon. Decatur sails into the harbor with only

60 sailors and marines on board the captured Tripolitan ketch *Intrepid*, pulls alongside *Philadelphia*, then quickly storms his objective without loss of life. Britain's Admiral Horatio Nelson will declare it the boldest act of his day, and it establishes Decatur as the doyen of the naval officer corps for the next two decades. He also gains promotion to captain at the age of 25, becoming the youngest officer of that grade in U.S. Navy history.

March 7

MARINES: William Ward Burrows, citing poor health, resigns as lieutenant colonel commandant of the U.S. Marine Corps.

March 9–10

MILITARY: The formal transfer of Upper Louisiana is effected by Captain Amos Stoddard, Regiment of Artillery, who accepts ownership from the local Spanish

Decatur, Stephen (1779–1820)

American naval officer

Stephen Decatur was born in Sinepuxent, Maryland, on January 5, 1779, part of a seafaring family. He briefly attended the University of Pennsylvania before joining the merchant marine, and in 1798 he received a midshipman's commission in the fledgling U.S. Navy. Decatur flourished in this role throughout the Quasi-War with France, 1798–1800, rising to lieutenant by 1803. That same year, he accompanied an American squadron to the Mediterranean to combat the Barbary pirates of North Africa. On the night of February 16, 1804, Decatur led a daring cutting-out expedition that boarded the captured frigate *Philadelphia*, burned it at its moorings in Tripoli harbor, then escaped with the loss of only one man wounded. This singular act captured the country's imagination, secured Decatur's reputation as a daring naval officer, and resulted in his promotion to captain at the age of 24. Until hostilities finally ceased in 1804, Decatur continued distinguishing

himself in hand-to-hand combat with pirates and furthered his reputation. When the War of 1812 commenced, he was commanding the large, 44-gun frigate *United States* and, on October 12, 1812, he confronted the slightly smaller 38-gun warship HMS *Macedonian*. Using superb sailing skills, Decatur expertly devastated his opponent with 70 broadsides, gaining a surprise second victory over the heretofore unbeatable Royal Navy. Still, the British fleet gradually enveloped the American coastline through blockades, and Decatur proved unable to get to sea for two years. It was not until January 15, 1815, that he slipped the large frigate *President* out of New York Harbor—only to ground on a sandbar during a sudden squall. Decatur, his ship already badly damaged, was then set upon by a squadron of British ships. He beat off the nearest of these but, after a hard pounding, surrendered to the remaining three.

commander. Stoddard will function as acting governor until a civilian replacement can be found that summer.

March 26

NAVAL: Congress levies additional import duties, money from which will go toward equipping and sustaining naval activities in the Mediterranean, along with acquiring several small vessels.

March 31

MILITARY: At Wood River, Illinois Territory, Captains Lewis and Clark make final selections for their 33-man Corps of Discovery, now consisting of three squads, each headed by a sergeant.

April 1

MARINES: In Washington, D.C., Captain Franklin Wharton is selected as third commandant of the Marine Corps.

Defeat did not diminish Decatur's stature as a national hero, and in the summer of 1815 he led a nine-ship squadron back to the Mediterranean to halt Algerian depredations against American shipping. In a short and brilliant campaign, he captured two Muslim warships, then forced the pashas of Algiers, Tunis, and Tripoli to sign peace treaties and pay indemnities. His activity finally ended the scourge of Mediterranean piracy, and he sailed home to additional laurels. In November 1815, Decatur won a position on the new navy Board of Commissioners to help modernize administration of that service. He also gained a degree of notoriety by proffering the oft-quoted toast "Our country! In her intercourse with foreign nations may she always be in the right, but right or wrong—our country!" Decatur performed capably over the next five years but entered into a fatal controversy in 1820 by voting to deny Captain James Barron a promotion. Barron had earlier been disgraced by the 1807 *Chesapeake-Leopard* Affair; he blamed Decatur for conspiring behind his back, then challenged him to

Stephen Decatur (*Library of Congress*)

a duel. Decatur was fatally wounded at Bladensburg, Maryland, and died there on March 22, 1820, the naval doyen of his age.

April 20

MILITARY: A company of the 1st Infantry under Captain Edward Turner occupies a Spanish fort at Natchitoches, western Louisiana Territory, accepts its transfer, and renames it Fort Claiborne.

April 29

NAVAL: The Mediterranean Squadron under Commodore Edward Preble captures two small Tripolitan warships.

May

MILITARY: General James Wilkinson, long in Spanish employ, alerts his paymasters of the Lewis and Clark expedition; the Spaniards will then dispatch cavalry patrols along the Plate and Missouri River valleys looking to intercept them.

May 6

MILITARY: While at St. Louis, Missouri, William Clark is commissioned a 1st lieutenant, not a captain, as promised. Captain Meriwether Lewis assures his friend that they will continue as co-commanders. However, the error will not be completely rectified until 2000, when Congress finally promotes Clark to captain.

May 13

NAVAL: Commodore Edward Preble prevails upon the king of Naples to lend him six gunboats and two mortar vessels for use against the Tripolitan pirates. Thus augmented, he prepares for immediate offensive action against the Barbary pirates.

May 14

MILITARY: The Lewis and Clark expedition of 33 men departs St. Louis, Missouri Territory, in a keelboat and two pirogue boats, and begins paddling up the Missouri River toward the interior of the continent. However, Private John Collins is found drunk beforehand and is sentenced to receive 100 lashes.

May 21–June 29

MILITARY: The Lewis and Clark expedition arrives at the home of frontier legend Daniel Boone in Missouri, then passes by La Charette, the last white settlement, and makes for the wild frontier. Private John Collins is again found drunk and receives another 100 lashes.

July

MILITARY: The U.S. Military Academy, West Point, accepts its first-ever Native American cadets; one of them, Charles Gratiot, who is half-white, will be commissioned and serve with distinction for 32 years, rising to chief of the Corps of Engineers.

July 7

NAVAL: A Tripolitan vessel races past the brigs *Argus*, *Scourge*, and *Syren*, only to be run aground; the Americans attempt to capture it with small boats but are driven off by gunfire.

August 3

MILITARY: The Corps of Discovery under Captains Lewis and Clark encounters Oto Indians at Council Bluffs and parleys with them. The tribesmen, curious about their visitors, ask for gunpowder and whiskey, then allow them to move on.

Battle off Tripoli involving Commodore Edward Preble's U.S. squadron, 3 August 1804
(Naval Historical Foundation)

NAVAL: In Tripoli harbor, the frigate *Constitution*, assisted by six Neapolitan gunboats and two mortar vessels, engages a number of Tripolitan gunboats. Boarding crews under Captain Stephen Decatur, Jr., capture two small ships, sword in hand, killing 33 and wounding 19 Tripolitans. In return, Decatur's younger brother James is killed in action and three others are wounded.

August 7

NAVAL: Commodore Edward Preble takes the unprecedented step of arranging his Mediterranean Squadron in bombardment positions and shelling the port city of Tripoli. His nine ships and nine gunboats engage nine Tripolitan shore batteries, yet the Americans manage to sink three gunboats and capture four at a cost of 54 casualties, principally after one of the captured gunboats explodes. This day Preble's squadron is joined by the 28-gun frigate *John Adams* under Master Commandant Isaac Chauncey, who informs him that four war frigates are being dispatched under Captain Samuel Barron, his replacement.

August 11–24

NAVAL: Commodore Edward Preble, determined to secure some kind of decisive victory before his relief arrives, commences six additional bombardments of Tripoli city in an attempt to cow its defenders.

August 20

MILITARY: The Corps of Discovery suffers its first and only fatality when Sergeant Charles Floyd dies from a burst appendix. He becomes the first U.S. Army soldier to die west of the Mississippi River and is buried on a nearby bluff.

August 27

NAVAL: Commodore Edward Preble again directs his squadron to take up bombardment positions off Tripoli harbor, and continue firing for two hours. Pasha Yusuf Karamanli dispatches a message through French consul Bonaventure Beaussier that he is not impressed by the American effort.

September 2

NAVAL: Commodore Edward Preble orders his gunboats and the frigate *Constitution* into bombardment range, where they engage various land batteries and fortifications. This is his last attempt to shell the city, but no serious damage is inflicted.

September 3

NAVAL: The captured brig *Intrepid*, manned by Lieutenant Richard Somers and 13 sailors and packed with explosives, sails into Tripoli harbor at night with a view toward destroying some enemy gunboats. However, its cargo of gunpowder is accidentally detonated, killing everyone on board.

September 9

NAVAL: Commodore Edward Preble, an aggressive, headstrong officer, is relieved from command of the Mediterranean Squadron by Commodore Samuel Barron on the 44-gun frigate *President*.

September 23–25

MILITARY: Captains Lewis and Clark come upon two villages of Teton Sioux on the Bad River. The two groups meet peacefully until some excited Indians try to seize one of the pirogues, but the issue is resolved peacefully. The Americans will remain several days at the village before moving on to the Arikara tribes nearby.

October 16

MILITARY: An army sergeant and 12 privates escort a party of 12 scientists on an expedition up the Ouachita River (Arkansas); the endeavor will successfully conclude without incident four months later.

October 20

MILITARY: Private Pierre Cruzatte of the Corps of Discovery has a close encounter with a grizzly bear, the first encountered so far; he is lucky to escape intact.

October 27–December 31

MILITARY: Captains Lewis and Clark reach a village of the Mandan Indians (North Dakota), where they encounter Toussaint Charbonneau, a French trader and translator. They hire him and one of his wives, the Shoshone woman Sacagawea.

November 2

MILITARY: The Lewis and Clark expedition winters near the site of present-day Bismarck, North Dakota. They encamp at a village of friendly Mandan Indi-

ans along the banks of the Upper Missouri River, having successfully negotiated treacherous waters on the Missouri and an encounter with hostile Sioux Indians.

November 29

MARINES: Seven marines land at Alexandria, Egypt, under Lieutenant Presley O'Bannon, to serve as the nucleus of a mercenary army destined to assist the deposed brother of the bashaw of Tripoli.

1805

January 11

MILITARY: William Hull, a distinguished Revolutionary War veteran and a major general in the Massachusetts militia, gains appointment as first governor of the Michigan Territory.

March 2

NAVAL: In a major policy departure, President Thomas Jefferson signs a bill mandating the construction of 25 additional gunboats for the protection of American harbors and commerce. Jefferson prefers the smaller gunboats to bigger, ocean-going vessels for reasons of economy. He also distrusts naval establishments as aristocratic by nature and fears that they will drag the nation into useless conflicts abroad.

March 3

NAVAL: Commodore Edward Preble is somewhat surprised to learn that Congress is voting him a gold medal for his aggressive actions against Tripoli.

March 6

MILITARY: A remarkable and improbable military campaign unfolds as American consul William Eaton and Lieutenant Presley O'Bannon, U.S.M.C., commence marching from Alexandria, Egypt, with seven marines and 400 Arab and Greek mercenaries. They are determined to storm the Tripolitan city of Derna, 600 miles distant on the North African coast, and place Hamet Karamanli, elder brother to the present pasha, on the throne.

March 26

MILITARY: The newly acquired Louisiana Purchase is divided into the Territory of New Orleans (administered from New Orleans) and the Louisiana Territory (administered from St. Louis). General James Wilkinson, commanding all military forces in the former, is also appointed governor.

April 7

MILITARY: The Lewis and Clark expedition decamps from its Mandan Indian village and resumes paddling up the Missouri River, assisted by the 16-year-old Shoshone guide, Sacagawea. A detachment is also sent back east to President Thomas Jefferson with samples, specimens, and several lengthy reports. The Corps of Exploration now consists of 28 men in six canoes and two large pirogues.

April 26

MILITARY: The Lewis and Clark expedition arrives at the mouth of the Yellowstone River.

April 27

MARINES: A small American expedition commanded by United States consul William Eaton and Marine Corps lieutenant Presley O'Bannon captures the port city of Derna from Tripolitan forces, assisted by gunfire from the brigs *Nautilus*, *Hornet*, and *Argus* under Lieutenant Isaac Hull. The victors suffer 14 casualties, including one dead marine. Hamet Karamanli, brother of Pasha Yusuf, is then placed on the throne as an opposition figure. This is the first real victory in the war against the Barbary pirates and also the first time an American flag is hoisted over enemy fortifications.

May 13

MARINES: The mercenary/Marine Corps force led by Consul William Eaton and Lieutenant Presley O'Bannon repels an attack by 1,200 Tripolitan cavalry outside Derna.

May 22

NAVAL: Commodore Samuel Barron is relieved from command of the Mediterranean Squadron by Commodore John Rodgers.

May 26

MILITARY: The Lewis and Clark expedition attempts to cross the Rocky Mountains down the Jefferson River, but is thwarted. They elect to proceed on foot through Lemhi Pass and across the continental divide.

NAVAL: Commodore John Rodgers parades his blockade squadron, consisting of four frigates, three brigs, one sloop of war, three schooners, two bomb vessels, and nine gunboats, outside Tripoli harbor. The pasha of Tripoli is sufficiently impressed to finally conclude peace negotiations with the Americans.

June 3

DIPLOMACY: William Eaton, the U.S. agent in Tripoli, concludes a peace treaty with the pasha, ending the so-called Barbary War. In exchange for \$60,000 to release the *Philadelphia's* crew, the pasha waives any claim to future tribute payments. Moreover, the United States will continue to maintain a naval presence in the Mediterranean to protect its own commerce.

June 3–July 14

MILITARY: The Lewis and Clark expedition discovers the Marias River, which unfortunately contains five falls. Rather than run the risk of continuing, the men land and portage (drag) their vessels a total of 18 miles around obstacles. This consumes an entire month and places them a month behind schedule.

June 4

DIPLOMACY: A peace agreement is reached between the United State and the Barbary state of Tripoli; henceforth, the Americans pay a one-time \$60,000 ransom to release Captain William Bainbridge and 306 sailors of the captured *Philadelphia*, but thereafter commerce is assured free passage throughout the Mediterranean Sea without further tribute payments.

June 11

MILITARY: The Lewis and Clark expedition catches its first glimpse of the Great Falls of the Missouri River.

June 12

NAVAL: Royal Navy warships board *Gunboat No. 6*, commanded by Lieutenant James Lawrence, off Cadiz, Spain, and impress three sailors.

July 23

MILITARY: Lieutenant Colonel Jacob Kingsbury, 1st Infantry, oversees construction of Fort Bellefontaine, the first military post west of the Mississippi River. Among its many functions, the fort will serve as a government factory for dealing with the valuable Indian trade.

July 25–August 8

MILITARY: The Lewis and Clark expedition reaches the three forks of the Missouri River, naming the branches the Jefferson, Bankhead, and Beaverhead Rivers. The exhausted explorers go ashore to rest and look for Indians from whom to acquire horses.

July 31

NAVAL: Commodore John Rodgers assembles his Mediterranean squadron off the entrance to the Bay of Tunis, an act inducing the bey of Tunis to conclude a peace treaty with the United States.

August 9

MILITARY: Lieutenant Zebulon M. Pike is ordered by General James Wilkinson to seek out the source of the Mississippi River within territory acquired by the Louisiana Purchase. He is also authorized to order off any British traders they may encounter. This day Pike departs St. Louis with 20 men bound for Fort Bellefontaine.

August 12–18

MILITARY: A small party of soldiers under Captain Meriwether Lewis marches overland to a Shoshone camp, at which point the chief recognizes Sacagawea as his long-lost sister. At this point, the Americans have reached the continental divide near the Bitterroot Range.

September 9

MILITARY: Lieutenant Zebulon M. Pike and 20 men depart Fort Bellefontaine, Missouri, to locate the source of the Mississippi River.

September 11

MILITARY: Captain William Clark, braving the first snowfall of the expedition, departs the American camp in the Bitterroot Mountains and proceeds to a Nez Perce village to barter for food.

September 23–25

MILITARY: Pushing along the Upper Mississippi River, Lieutenant Zebulon M. Pike encounters some Sioux villages. He holds a council, distributes gifts and whiskey, and concludes the first Indian treaty in the Louisiana Territory. He also purchases a small plot of land at the mouth of the Minnesota River, which will serve as the basis of Fort Snelling two decades hence.

October

MILITARY: First Lieutenant James B. Wilkinson, 2nd Infantry, is dispatched by his father, General James Wilkinson, down the Missouri River to build a fort along

the Platte River. His 40-man detachment ventures 300 miles downstream before being attacked by hostile Indians, losing one killed. The expedition is canceled.

October 1

MILITARY: The Lewis and Clark expedition concludes a harsh overland trek through the Bitterroot Mountains and places its canoes in the waters of the Clearwater River.

October 7

MILITARY: The Corps of Discovery under Captains Lewis and Clark resumes its trek in canoes down the Clearwater River, intent upon reaching the Pacific.

October 16

MILITARY: Lieutenant Zebulon M. Pike reaches the Swan River and then proceeds to Leech Lake, which he mistakenly construes as the source of the mighty Mississippi River. He also alerts several British traders that they are trespassing on American soil and orders them off.

November 7–15

MILITARY: The Corps of Discovery of Lewis and Clark paddles downstream until they reach the Columbia River. A storm delays them for nearly a week before they continue another 20 miles and reach the Pacific Ocean.

December 7

MILITARY: Captains Lewis and Clark winter among the Clatsop Indians and construct a small fort, which they call Fort Clatsop. They will winter there among the tribesmen, hunting, fishing, and collecting scientific samples for the return home next spring.

1806

March 23

MILITARY: The Corps of Discovery departs Fort Clatsop and begins its wilderness trek back to civilization.

March 25

NAVAL: Congress appropriates funding for new coastal fortifications and additional gunboats, but a request for six 74-gun ships of the line is defeated. This leaves the U.S. Navy with nothing heavier than frigates.

April 10

MILITARY: The Articles of War are revised by Congress, which institutes two levels of court-martial. These are general and garrison (or regimental), each requiring a different board of officers, and each of which can impose differing levels of punishment. However, militiamen can be tried only by boards consisting of militia officers.

April 19–June 2

MILITARY: In the New Orleans Territory, a detachment of the 2nd Infantry under Captain Richard Sparks escorts the Red River expedition of Thomas Freeman and Peter Curtis.

April 17

NAVAL: The peace treaty with Tripoli is ratified by the U.S. Senate and includes a sum of \$600,000 for releasing all American citizens and sailors held captive.

April 21

NAVAL: A new peacetime establishment is fashioned by Congress; the navy is now restricted to 113 captains, nine master commandants, 72 lieutenants, and 925 sailors.

April 26

NAVAL: In waters off New York City, the British frigate HMS *Leander* fires across the bow of the American merchantman *Richard*, accidentally killing one sailor. Consequently, President Thomas Jefferson orders all British warships out of New York Harbor.

April 30

MILITARY: Lieutenant Zebulon M. Pike concludes his expedition to the Upper Mississippi and returns safely to St. Louis.

EXPLORING: The expedition headed by Lieutenant Zebulon M. Pike returns to St. Louis after eluding—mistakenly—the source of the Mississippi River in present-day Minnesota.

June 2

EXPLORING: Captain Richard Sparks, 2nd Infantry, departs his camp in Natchitoches, Louisiana, in search of the sources of the Red River.

June 15

MILITARY: The Lewis and Clark expedition ascends the Rocky Mountains to begin its return voyage to St. Louis.

June 30–July 3

MILITARY: The Corps of Discovery, assisted by Nez Perce guides, threads its way across the Bitterroot Mountains in winter. Captains Meriwether Lewis and William Clark then decide to split their party in two parts to explore the Yellowstone River region in greater detail.

July 13

MILITARY: Lieutenant Zebulon M. Pike departs Fort Bellefontaine, Missouri Territory, with 23 soldiers to explore and chart parts of the Old Southwest (New Mexico and Colorado). He is officially instructed by General James Wilkinson to avoid violating Spanish territory.

July 26

MILITARY: Captain Meriwether Lewis and three soldiers defeat an attempt by eight Blackfoot Indians to steal their guns and horses; two Indians die in the struggle.

July 29

MILITARY: Captain Richard Sparks, 2nd Infantry, encounters Spanish troops along the Red River; the two sides parley under a flag of truce and the Americans agree to withdraw downstream.

September

MILITARY: General James Wilkinson makes an unscheduled stop at Natchez to confer with Spanish authorities and establishes a 100-mile buffer zone along the Sabine River. He does so without authority from the government.

Pike, Zebulon M. (1779–1813)

Army officer/explorer

Zebulon Montgomery Pike was born in Trenton, New Jersey, on January 5, 1779, the son of a Continental army officer. He subsequently entered his father's company of the 2nd U.S. Infantry at the age of 15 and served capably under General Anthony Wayne in the Northwest Indian War of 1790–94. Pike's education to this point had been meager; nevertheless, he possessed considerable drive and taught himself mathematics, science, and Spanish. Afterward, he performed garrison duty at Kaskaskia, Illinois, and came to the attention of General James Wilkinson, commanding general of the Louisiana Territory. This huge expanse had been acquired from France in 1803 and remained largely unexplored. Therefore, Wilkinson ordered Pike to outfit an expedition to establish friendly contacts with Native-American tribes, report on the activities of British traders, identify the source of the Mississippi River, and provide detailed

cartographic and geologic information. Pike departed St. Louis on August 9, 1805, with 20 soldiers, and ascended the Mississippi River in a 20-foot keelboat. Venturing far upstream, he established first contacts with the Sioux, purchased the future site of Fort Snelling, Minnesota, and explored the adjacent region by sled. Pike also encountered Leech Lake, which he wrongly reported as the Mississippi's source. Pausing only to warn British traders off American territory, Pike returned to St. Louis on April 30, 1806, having covered 5,000 miles in nine months. His efforts contributed greatly to knowledge of the American interior and established him as a skilled explorer.

In July 1806, Wilkinson ordered Pike on another foray, this time along the southwestern fringes of the Louisiana Purchase to trace the source of the Red River. He was also to gather military intelligence as to Spanish forces guarding the region.

September 3–October 28

MILITARY: The expedition of Lieutenant Zebulon M. Pike encounters Pawnee along the Republican River who declare that parties of Spanish soldiers are out looking for him. Pike nonetheless continues ahead to seek out headwaters of the Arkansas River.

October 8

MILITARY: Former vice president Aaron Burr contacts General James Wilkinson and informs him of his plan to recruit an armed force on the frontier, attack Mexico, and carve out an independent republic. Burr wants Wilkinson to serve as his deputy.

October 21

MILITARY: The duplicitous General James Wilkinson, in an attempt to save his own skin, writes President Thomas Jefferson and informs him of Aaron Burr's plan to establish his own independent country on the frontier.

Pike departed and explored the region of modern-day Colorado, and was among the first white men to behold a 14,000-foot-high mountain in the hazy distance—Pike's Peak. In January 1807 he turned his expedition south toward the Red River and accidentally entered Spanish territory, where he and his men were arrested and brought to Mexico City for questioning. Pike was subsequently released and arrived back at Natchitoches, Louisiana, where he was apprised of the Aaron Burr conspiracy and Wilkinson's possible complicity. Pike, however, was cleared of any duplicity, and furthermore, his endeavors, along with those of Meriwether Lewis and William Clark, made possible the wave of western migration that followed in subsequent decades. Pike remained in the military, rising to brigadier general in March 1813, and was tasked with outfitting an amphibious expedition on Lake Ontario. His objective was to capture the Canadian provincial capital of York (Toronto), Upper Canada, which

General Zebulon M. Pike (*Library of Congress*)

was successfully stormed on April 27, 1813. Unfortunately, a British powder magazine exploded immediately after the town's surrender, and Pike was struck and fatally injured by a falling rock.

October 23

MILITARY: The Corps of Discovery under Captains Lewis and Clark terminates in St. Louis at noon, whereupon Lewis works on his final report to President Thomas Jefferson before sending it off.

October 27

MARINES: Commandant Franklin Wharton is directed to dispatch four officers and 74 marines to New Orleans to help guard against possible Spanish actions.

November 15

MILITARY: While exploring the Southwest, Lieutenant Zebulon M. Pike espies in the distance a large mountain, soaring 18,000 feet in height; it will subsequently be christened Pike's Peak in his honor.

November 25

MILITARY: In New Orleans, General James Wilkinson imposes martial law and begins arresting alleged supporters of Aaron Burr in the city and at Fort Adams.

November 27

MILITARY: President Thomas Jefferson, tipped off by General James Wilkinson, issues orders to state militia and army units to stop the conspiracy of former vice president Aaron Burr.

1807

January 7

MILITARY: The small expedition of Lieutenant Zebulon M. Pike suffers heavily in the winter weather and several soldiers experience frozen feet. Pike nonetheless will push ahead until he reaches the Conejos River a month later.

February 18

MILITARY: At Fort Stoddard, Lieutenant Edmund P. Gaines is informed that fugitive Aaron Burr, wanted on an indictment for treason, is nearby. Gaines rounds up several soldiers, arrests Burr, and brings him back to the fort.

February 26

MILITARY: Lieutenant Zebulon M. Pike's small expedition is accosted by Spanish cavalry along the Rio Grande River, then taken into armed custody to Santa Fe to be questioned further. Pike swears to his captors that he never intentionally violated their territory and thought that he was at the Red River.

February 28

MILITARY: Captain Meriwether Lewis and Lieutenant William Clark resign their army commissions. Rewarded by President Thomas Jefferson, Lewis becomes governor of the Louisiana Territory, headquartered at St. Louis, while Clark is appointed that region's superintendent of Indian affairs and a militia general.

April

MILITARY: Lieutenant Zebulon M. Pike, having been closely interrogated by Spanish authorities for several weeks, is released and ventures back to the United States. However, he is viewed in some circles as a confidant of General James Wilkinson and possibly culpable in Aaron Burr's conspiracy.

May 8

MARINES: Charleston, South Carolina, is the site of a new marine barracks.

June

MILITARY: In Richmond, Virginia, General James Wilkinson testifies at the trial of Aaron Burr. Burr, meanwhile, tries to discredit the general by charging him with illegally arresting citizens and obtaining statements without proper authority. Chief Justice John Marshall, the presiding jurist, dismisses all charges against the general.

June 22

NAVAL: The 52-gun British warship HMS *Leopard* under Captain Salisbury P. Humphreys, cruising the American coast in search of British deserters, accosts the smaller 39-gun American frigate *Chesapeake* three miles off Norfolk, Virginia. The British captain demands the right to search the vessel for deserters; when Commodore James Barron refuses, *Leopard* pours several broadsides into the unprepared Americans. Three American sailors are killed and 18 wounded, while

four alleged British deserters are removed; one is subsequently hung. Word of the affair triggers intense anti-British activity nationwide, and Commodore Barron is court-martialed and suspended for five years for failing to be at battle stations.

July 2

NAVAL: In light of the *Chesapeake-Leopard* incident, President Thomas Jefferson orders all Royal Navy warships in American waters to depart immediately. Jefferson hopes that peaceful coercion will avert war and result in improved British behavior.

July 6

MILITARY: In Virginia, Winfield Scott, an aspiring attorney, unofficially joins a Norfolk cavalry unit that then surrounds and captures a party of British sailors who have come ashore looking for supplies. A long and illustrious military career commences.

August 27

NAVAL: Captain Stephen Decatur, wary of a British squadron anchored off Hampton Roads, Virginia, attempts to cobble together a squadron consisting of the frigate *Chesapeake* and several gunboats, but is unable to muster sufficient manpower to set sail.

November 11

NAVAL: The British government issues new Orders in Council that forbid neutral shipping from trading with France, unless such vessels first obtain a license from England.

December 11

NAVAL: Napoléon promulgates his Milan Decree, which stipulates that any neutral vessel submitting to the British Orders in Council will be considered an enemy. The United States is being squeezed between dueling economic rivalries.

December 18

NAVAL: Congress authorizes construction of a further 188 gunboats for coastal defense. President Thomas Jefferson prefers these smaller, less expensive vessels to formal warships.

December 22

MILITARY: Congress passes the Embargo Act against trading with England, and the army becomes responsible for shoring up civilian authority in what will become a never-ending struggle against smuggling along the Canadian border. Resentment runs high against enforcement, and soldiers are routinely insulted and threatened.

1808

April 11

MILITARY: In a major move, Congress expands the size of the U.S. Army, adding five new infantry regiments (numbered 3rd to 7th), a regiment of riflemen, a regiment of light dragoons, and a battery of horse (or “flying”) artillery. Provisions are also made to create two additional brigadier generals. Finally, the elite Corps of Engineers is expanded by a further 18 soldiers.

April 17

DIPLOMACY: Emperor Napoléon I promulgates the Bayonne Decree authorizing the seizure of any American vessel in violation of President Thomas Jefferson's Embargo Act. In terms of harassing American commerce, the French are as rapacious as the British.

April 19

MILITARY: In light of rampant smuggling in New England, President Thomas Jefferson declares that region to be in a state of insurrection. He then reinforces local authorities by dispatching an artillery company, armed as infantry, to assist law enforcement efforts.

May–June

MILITARY: The U.S. Army begins experimenting with its first mounted battery of horse artillery. This is a French military concept intended to increase the mobility of field pieces and allow them to maneuver with cavalry units. Captain George Peter is selected to command the first company so equipped, and he will successfully put his two 6-pounder cannon and two 5.5-inch howitzers through their paces at numerous public demonstrations.

May 8

MILITARY: Winfield Scott, a six-foot-six-inch-tall former law student, is commissioned a captain in the elite Regiment of Light Artillery. He will remain on active duty until 1861, 53 years hence.

September

MILITARY: Troops of the 1st Infantry commence construction of Fort Osage, 300 miles up the Missouri, and Fort Madison, across the Mississippi River, in present-day Iowa. The latter post is poorly situated and will be subject to frequent attacks by hostile Sac and Fox Indians.

December 2

MILITARY: General James Wilkinson is ordered by the War Department to return to New Orleans and take command of the 3rd, 5th, and 7th Infantries, along with the Rifle Regiment, and several Light Artillery companies. This is one of the largest concentrations of military force assembled in recent years.

1809***February 15***

MILITARY: Wade Hampton of South Carolina and Peter Gansevoort of New York are promoted to brigadier general. However, General James Wilkinson remains the military's senior brigadier.

March 3

MARINES: Manpower ceilings in the Marine Corps are raised to 46 officers and 1,823 enlisted men. The enlistment period is also extended from three to five years.

March 4–7

MILITARY: James Madison is inaugurated as the nation's fourth president and commander in chief. Three days later he selects Dr. William Eustis to serve as his secretary of war.

May 15

NAVAL: Paul Hamilton, formerly governor of South Carolina, gains appointment as the third secretary of the navy.

May 29

MILITARY: In New Orleans, General James Wilkinson ignores orders to redeploy his sickly troops north to Fort Adams, and instead chooses an even unhealthier venue, Terre-aux-Boeufs, 12 miles south of the city. The troops, stuck in the midst of a swampy region, begin dying off in large numbers. Captain Winfield Scott is so disgusted by Wilkinson's neglect that he tenders his resignation and returns to Virginia.

June 22

MILITARY: When reports of conditions at Terre-aux-Boeufs reach Secretary of War William Eustis, he immediately orders General James Wilkinson to relocate them to Fort Adams near Natchez. Wilkinson, with barely 600 men fit for duty, continues dithering while his command suffers.

July

MILITARY: Having rethought his decision, Captain Winfield Scott writes the War Department to retract his resignation. He is allowed to remain on active duty.

September

MILITARY: General James Wilkinson finally begins transferring his command from Terre-aux-Boeufs, Louisiana, northward to Fort Adams. At this time he has barely 414 soldiers fit for duty and is ordered back to Washington, D.C., to answer for his neglect. He is succeeded by General Wade Hampton, soon to become a vitriolic personal enemy.

- Secretary of War William Eustis, in a move calculated to save the government money, orders the Regiment of Light Artillery to sell off its horses. He also insists on personally approving all expenditures over \$50.

November

MILITARY: Captain Winfield Scott resumes active duty at Fort Adams, Natchez, where he is accused of making derogatory remarks about General James Wilkinson and will face court-martial charges because of it.

1810**January 10**

MILITARY: Captain Winfield Scott undergoes a court-martial at Fort Adams for slandering General James Wilkinson in public. The most serious charges are dropped, but he is found guilty of "un-officer like conduct" and sentenced to a 12-month suspension from pay. Scott will subsequently duel with his accuser and both men miss; he returns to Virginia.

February

NAVAL: Off the mouth of the Mississippi River, the armed ketch *Vesuvius* under Lieutenant Benjamin Reed spends an entire month chasing pirate vessels, and catches three.

February 22

NAVAL: A bill allowing for the construction of naval hospitals passes Congress at the behest of Secretary of the Navy Paul Hamilton.

September 26

MILITARY: American settlers in West Florida rebel against Spain, seize the fort at Baton Rouge, and then declare themselves the “Independent Republic of West Florida.” Their ultimate goal is annexation by the United States.

October 27

MILITARY: The Spanish province of West Florida is overthrown by American settlers residing there, who have seized the capital at Baton Rouge. They formally petition President James Madison for army troops to help annex the region to the United States.

1811**January**

MILITARY: In a major armament breakthrough, inventor John H. Hall designs and builds the first American breech-loading carbine with a higher rate of fire than conventional, muzzle-loading muskets. However, the conservatively minded U.S. Army displays little interest in such novelties, and only a handful will be procured prior to the War of 1812.

January 9

NAVAL: Lieutenant Oliver Hazard Perry, commanding the schooner *Revenge* off Newport, Rhode Island, runs his vessel aground and it sinks. He is subsequently exonerated by a court-martial when the ship’s pilot is found at fault.

January 10

SLAVERY: A large revolt by African Americans occurs in Louisiana when 400 slaves kill a plantation owner’s son, then march en masse into New Orleans. Army troops under Colonel Wade Hampton are called in to suppress the uprising and 75 slaves are killed; their heads are subsequently placed along the road from New Orleans to the plantation as a warning to prospective rebels.

January 11

MILITARY: Winfield Scott, residing at home in Virginia, passes his time studying and inculcating professional military texts. However, upon hearing that his old regimental commander has died, he writes the War Department and asks to be reinstated as the senior captain. The request is denied and he continues studying.

January 15

MILITARY: Congress surreptitiously authorizes the Madison administration to dispatch army troops to seize control of Spanish-held East Florida. The elite Regiment of Riflemen under Lieutenant Colonel Thomas Adams Smith, assisted by a small party of light dragoons and Georgia militia, is dispatched to the region.

January 22

NAVAL: Secretary of the Navy Paul Hamilton, a wealthy slave owner, instructs naval vessels posted in the waters off Georgia and South Carolina to stop and

search any vessel suspected of engaging in the African slave trade. The practice has been outlawed since 1808.

May 1

NAVAL: The 38-gun British frigate HMS *Guerriere* accosts the American merchant brig *Spitfire* off Sandy Hook, New Jersey, and impresses an American seaman. A public outcry ensues and prods the government into action.

May 4

MARINES: A post is established by marines on Cumberland Island, off the southeastern coast of Georgia, to interdict smuggling from Spanish East Florida.

May 6

NAVAL: In light of British harassment of American shipping, Captain John Rodgers is dispatched in the 44-gun frigate *President* to patrol the waters off Sandy Hook, New Jersey. A confrontation seems in the offing.

May 16

NAVAL: The 44-gun frigate *President* under Captain John Rodgers, cruising off Sandy Hook, New Jersey, to protect American commerce from British depredations, encounters an unidentified vessel in the dark. Shots ring out and broadsides are exchanged before his antagonist is identified as the 22-gun corvette HMS *Little Belt* under Commander Arthur B. Bingham. The British suffer 13 killed and 19 wounded in this one-sided exchange and are allowed to limp off. The action is hailed throughout the nation as revenge for the British attack on the *Chesapeake* in 1807.

June 1

MILITARY: In Washington, D.C., General James Wilkinson is hauled before a general court-martial; he faces eight charges and 25 specifications relating to his alleged associations in the Burr conspiracy. Congress will also investigate his mishandling of events at Terre-aux-Boeufs and the deaths of several hundred soldiers.

July 8

INDIAN: Shawnee chief Tecumseh meets with Governor William Henry Harrison at Vincennes, Indiana Territory, to denounce the Treaty of 1809. He next travels south to solicit Creek help in his Indian coalition. Before departing, he warns his brother, Tenskwatawa, not to seek a fight with the Americans. Meanwhile, Harrison, sensing that a fight is brewing, requests that Secretary of War William Eustis dispatch Colonel John P. Boyd's 4th Infantry to Vincennes to serve as the nucleus of his frontier army.

July 31

MILITARY: Frontier settlers in the region of Vincennes, Indiana Territory, call upon federal authorities to uproot an illegal Indian community established along Tippecanoe Creek by the Shawnee prophet, Tenskwatawa.

August 7–September 11

NAVAL: Gunboat *No. 162*, commanded by Midshipman Francis H. Gregory, begins actively patrolling the Gulf of Mexico to deter pirate activities.

Tecumseh (ca. 1768–1813)

Shawnee chief

Tecumseh (“Shooting Star”) was born near Piqua, Ohio, around 1768, a member of the Shawnee Panther clan. His father apparently died during Lord Dunmore’s War in 1774, and from that period on Tecumseh expressed undying hatred for whites. He also proved himself an able warrior and distinguished himself under Miami chief Little Turtle while fighting Colonel Josiah Harmar and General Arthur St. Clair, 1790–91. Tecumseh was present at Fallen Timbers for the defeat of General Anthony Wayne in 1794, but refused to sign the Treaty of Greenville and left Ohio for Indiana. After a decade of peace, William Henry Harrison became governor of the new Indiana Territory, and he began forcing Indians to sell their lands to the United States. Tecumseh, backed by his religiously inspired brother Tenskwatawa (“The Prophet”), began cobbling together an anti-American coalition to oppose all future land sales without the

consent of all tribes. Harrison conferred with the chief on several occasions and remarked how he was struck by the latter’s

Tecumseh (*Library of Congress*)

August 10

NAVAL: Midshipman Francis H. Gregory and Gunboat *No. 162* seize the pirate schooner *Santa Maria* near Mobile, West Florida (Alabama).

September 11

NAVAL: On a good hunting day, Midshipman Francis H. Gregory and Gunboat *No. 162* seize three pirate vessels between Brassia and Barataria, Louisiana.

September 19

MILITARY: Having cobbled together a force of 900 army regulars and militia, Governor William Henry Harrison departs from Vincennes, Indiana Territory, and marches along the Wabash River toward the illegal Indian settlement at Prophetstown on Tippecanoe Creek.

September 26

MILITARY: Indiana territorial governor William Henry Harrison continues marching a force of 900 soldiers and militia toward the Indian encampment at the confluence of the Wabash and Tippecanoe Rivers. He does so taking advantage

bearing, eloquence, and dignity. However, relations between the two groups deteriorated and, in November 1811, Harrison defeated the Prophet at Tippecanoe while his brother was south, recruiting among the Creek. Tecumseh felt he had no recourse but to solicit aid from the British in Canada, and his repeated trips there were cited by American politicians as proof that England was behind Indian unrest in the Northwest. Politicians cited this as a major cause behind a new military confrontation, the War of 1812.

Tecumseh fought with distinction in several battles and he joined forces with the celebrated General Brock in the capture of Detroit. He was less successful in preventing his warriors from slaughtering American captives, which he feared would spark an angry backlash. The chief was particularly livid over General Henry Procter's indifference to the lives of American captives during the siege of Fort Meigs, a turning point in the war. As he feared, General Harrison

was able to recruit a new army and he began pursuing the British and Indians across Lake Erie and into western Upper Canada (Ontario). Unwilling to retreat farther, Tecumseh prevailed on Procter to make a stand along the Thames River on October 5, 1813. Harrison, enjoying a complete superiority in numbers, boldly attacked and routed the British but had a much harder time subduing Tecumseh's warriors in the woods. Combat proved intense and forced the Kentuckians to dismount and fight on foot, at which point Tecumseh was apparently slain. His body was then spirited off by several warriors and buried in an unmarked grave. Yet, while he lived, the eloquent Shawnee mounted the most effective resistance to white encroachment since the days of Pontiac, a cause that would not be repeated until the Black Hawk War of 1832. Tecumseh's cause ultimately failed, but he remained admired by friends and enemies alike for his bravery, vision, and strength of character.

of the absence of Tecumseh, who has ventured south to solicit Creek membership in his anti-American coalition.

October

MILITARY: Captain Winfield Scott is ordered to Baton Rouge to head up a court-martial of Colonel Thomas H. Cushing, 2nd Infantry. Cushing, a Wilkinson protégé, is found guilty of reading General Wade Hampton's private correspondence, but he is retained in service.

October 1–27

MILITARY: Governor William Henry Harrison constructs Fort Harrison (Terre Haute) in the Indiana Territory to serve as his base of supplies. He is also reinforced by a detachment of mounted Kentucky riflemen under Major Joseph H. Daviess, and forges ahead with 950 men.

November 6–7

MILITARY: The Battle of Tippecanoe, Indiana Territory, unfolds as the army of General William Henry Harrison encamps near the makeshift Indian village of

Prophetstown. At dawn, Indians under Tenskwatawa, the Shawnee prophet–Tecumseh’s brother–storm into the American camp, nearly overrunning it, but are gradually repulsed by accurate musketry. At dawn, a surprise charge by mounted troops finally disperses the attackers. The victorious Americans then occupy and burn Prophetstown before withdrawing to safety. Harrison’s losses are 66 killed and 151 wounded, a loss rate of nearly 25 percent; Indian casualties are unknown but presumed equally heavy.

December

MILITARY: Congress reverses an 1809 freeze on military recruiting and authorizes six companies of mounted rangers for the defense of the western frontier.

1812

January 2–12

MILITARY: Congress passes another expansion act for the U.S. Army, adding 10 infantry regiments, 8th to 17th, a second regiment of light dragoons, two artillery regiments numbered 2nd and 3rd, and six additional companies of rangers. Provisions are also made to add two major generals and seven brigadier generals.

January 27

MILITARY: Henry Dearborn, former secretary of war and a Revolutionary War veteran of note, is appointed the army’s senior major general; he commands the Northern Department along the Canadian frontier.

February–March

MILITARY: Congress passes legislation authorizing the recruitment of 30,000 federal volunteers, although states are responsible for choosing the officers. Funding is also provided to purchase adequate horses for the artillery, although shortages will persist throughout the coming war.

February 14–22

MILITARY: The court-martial of General James Wilkinson votes to acquit him, while the congressional investigation of the Terre-aux-Boeufs affair adjourns without further deliberation; the general returns to his command in New Orleans.

March

MILITARY: Congress approves several new staff positions and field officers: Revolutionary War veteran Thomas Pinckney becomes the second major general in charge of the Southern Department. Morgan Lewis gains appointment as the new quartermaster general, while Joseph Bloomfield, James Winchester, and Thomas Flournoy become brigadier generals. A Commissary General of Purchases is also created, but its duties are poorly defined and the position will remain unfilled for several months.

March 12

MILITARY: Georgia militiamen under Colonel Lodowick Ashley occupy Amelia Island off the Florida coast to prevent its possible occupation by British forces.

March 14

MILITARY: The nation begins girding for war as Congress authorizes the first U.S. war bonds, worth \$11 million; six more issuances will follow over the next two and a half years.

March 14–17

MILITARY: Georgia militia general George Matthews, acting as President James Madison's personal agent, is convinced that the Spanish cannot be coerced into surrendering East Florida. He then organizes an army of 250 self-styled "Patriots" from Georgia and Florida volunteers, at Point Peter along the St. Mary's River. Mathews then orders his force to seize the Spanish fort on Fernandina Island, which is accomplished without bloodshed. That post is then turned over to Lieutenant Daniel Appling of the Regiment of Riflemen.

March 18

MILITARY: U.S. Army troops and militia under Lieutenant Colonel Thomas Adams Smith move down the St. Mary's River, Florida, and gradually besiege Spanish-held St. Augustine, in a half-hearted attempt to capture that province. The ensuing fiasco, conducted with shoestring forces, will be known as the "Patriot War" and ultimately end in failure.

April

MILITARY: President James Madison approves a plan for conquering Canada as conceived by Secretary Henry Dearborn. This is a four-pronged effort involving American thrusts across Lake Champlain to Montreal, Lower Canada; across the Niagara River to York, Upper Canada; from Sackett's Harbor, New York, to Kingston, Upper Canada; and from Detroit, Michigan Territory, into westernmost Upper Canada. Army troops are still being assembled and trained for the endeavor, but Madison orders the 4th Infantry from Vincennes, Indian Territory, to Detroit, Michigan Territory, to assist the war effort there.

- After their defeat at Tippecanoe the past November, Native Americans in the Old Northwest commence an undeclared border war against frontier settlements in Missouri, Indiana, and Illinois. Both sides realize that a new war with Great Britain will precipitate all-out conflict in the region, and the tribesmen begin contacting British authorities in Canada.

April 8

MILITARY: William Hull, governor of the Michigan Territory, accepts an appointment as brigadier general in the U.S. Army. He is tasked with organizing an expedition from Detroit against Malden, Upper Canada, with one army regiment and three Ohio militia regiments. Hull, cognizant that success here is predicated on American control of Lake Erie, insists on, and is promised, increased naval support.

April 10

MILITARY: In a sign of growing bellicosity, Congress authorizes President James Madison to mobilize up to 100,000 state militia for up to six months, as per the Militia Act of 1792. Secretary of War William Eustis informs all 17 states of their requisite manpower quotas, but the governors of several New England states, citing constitutional principles, decline to comply. Meanwhile, recruitment goals for the regular U.S. Army remain sluggish; there is apparently little enthusiasm for war, and the polity still distrusts standing professional forces.

April 23

MILITARY: Congress enhances the army by adding a new civilian-dominated Corps of Artificers under the quartermaster general; they are to perform specific

labors such as carpentry, blacksmithing, and masonry for the army. A new company of “Bombardiers, Sappers, and Miners” is also authorized for the Corps of Engineers.

April 29

MILITARY: In light of the mounting possibility of war with Great Britain, the U.S. Military Academy at West Point, New York, is enlarged by adding professors and engineering officers, along with a new library with the latest military texts. The number of cadets presently stands at 250.

May 14

MILITARY: Congress legislates the Department of Ordnance into existence; it is to be headed by a colonel under the title of commissary-general of ordnance.

June 1

MILITARY: In his message to Congress, President James Madison explains the necessity of going to war with Great Britain, citing insults to the American flag at sea (impressment) and the arming and agitating of Indians along the frontier.

- In Ohio, the three militia regiments destined as part of General William Hull’s Northwest Army begin their trek toward Detroit. They will have to negotiate their way through dense, swampy land, cutting a trail that becomes known as “Hull’s Trace.”

June 3

INDIAN: Feeling that war with the United States is inevitable, Governor-General Sir George Prevost of Canada arranges a meeting with Shawnee chief Tecumseh at Amherstburg, Ontario.

June 9

MILITARY: The 4th Infantry under Lieutenant Colonel James Miller arrives at Urbana and joins the main column under General William Hull; the forced march leaves them exhausted and in need of several days of rest to recover.

June 15

MILITARY: The Northwest Army of General William Hull resumes its march from Ohio to Detroit, after the three militia regiments clamor loudly about not being paid. An armed demonstration by the 4th Infantry mutes their protest, and the advance resumes through difficult terrain.

June 17

NAVAL: In one of the biggest ironies of a very ironic war, the British Parliament revokes the Orders in Council to avert the possibility of conflict with the United States. However, word of the deed arrives too late to thwart hostilities.

June 18

MILITARY: At the commencement of the War of 1812, the U.S. Army consists of only 6,700 newly recruited soldiers, whose training is problematic. Nonetheless, American leaders hope that the new soldiers, once backed by thousands of militiamen, can easily overwhelm the 4,500 British in Canada.

NAVAL: Congress formally declares war against Great Britain, citing impressment at sea and the arming of Indians as its underlying causes. This pits the young U.S.

Navy of 17 warships, 447 guns, and 5,000 men against the veteran Royal Navy, touting 1,048 vessels, 27,800 guns, and 151,500 men.

June 23

NAVAL: A four-ship American squadron headed by the frigate *President* under Commodore John Rodgers attacks the frigate HMS *Belvidera* in the North Atlantic, but the British vessel escapes. Rodgers sustains a broken leg when a cannon bursts near him.

Rodgers, John (1771–1838)

Naval officer

John Rodgers was born in Havre de Grace, Maryland, on August 1, 1771. He went to sea as a youth and by the age of 20 was commanding his own vessel. Rodgers joined the U.S. Navy in March 1798 as a lieutenant and served with Commodore Thomas Truxtun throughout the Quasi-War with France. He particularly distinguished himself in combat during the battle between the frigates *Constellation* and *L'Insurgente* on February 9, 1799, and received command of the captured warship. Rodgers rose to captain the following month and he subsequently served under Commodore Richard V. Morris during the Tripolitan War in 1803, capturing the Muslim frigate *Mashuda*. Rodgers rose to commodore in 1805 and succeeded to command of the Mediterranean Squadron. Two years later he served as president of the court-martial that convicted Captain James Barron of neglect for his role in the *Chesapeake-Leopard* Affair. In 1810 Rodgers assumed command of the large, 44-gun frigate *President* and spent months patrolling the nation's coastal waters to protect American sailors from being impressed by British warships. On May 16, 1811, Rodgers engaged in a brief ship-to-ship combat at night with HMS *Little Belt* off Cape Henry, Virginia,

inflicting heavy damage and receiving official approbation for the act. The deed was also viewed as just revenge for the attack upon the *Chesapeake* and served to harden attitudes between the United States and Great Britain, preparing the way for a renewal of hostilities.

When the War of 1812 commenced on June 15, 1812, Rodgers led a squadron of four warships out of New York City and, on June 23, 1812, he fired the first shot of the war by chasing the frigate HMS *Belvidera*, which escaped. Thereafter, he conducted a lengthy cruise of the English Channel, seizing 12 prizes on the way out and a further 11 on the way back home. However, his squadron was then broken up by the secretary of the navy, who felt that the navy lacked the resources for such concentrated formations, and instituted individual ship cruises in its place. Rodgers remained at Philadelphia, Pennsylvania, supervising construction of the new frigate *Guerriere*, which never got to sea during the war. However, when British forces attacked Washington, D.C., in August 1814, he led a detachment of 300 sailors that harassed enemy shipping along the Potomac River. After the

(continues)

(continued)

war ended, Rodgers, now the navy's senior officer, served as head of the new Board of Naval Commissioners, with Captain Isaac Hull and David Porter, to facilitate administrative affairs and the introduction of new technologies. He served in this capacity for 22 years, making indelible contributions

to the service. In 1827, Rodgers took leave of his board activities to visit the Ottoman Empire and conclude the first U.S. commercial treaty with the sultan. He finally resigned in 1837 on account of poor health and died in Philadelphia on September 13, 1838, a significant figure in U.S. Navy history. Several of his 11 children also became distinguished naval officers.

June 26

MILITARY: In Ohio, General William Hull receives dispatches alerting him of the declaration of war against Great Britain, a week after the fact. Hull had previously placed the bulk of his papers and baggage aboard the transport *Cuyahoga* and ordered it to sail to Detroit.

- Congress again enlarges the U.S. Army, adding eight more infantry regiments, numbered 18th to 25th, each consisting of 10 90-man companies. The authorized strength of the military stands officially at 35,603, but the total number of recruits constitutes barely a third of that. The majority of citizens prefer to join the local militia.

June 30

MARINES: Marine Corps strength at the commencement of the War of 1812 is only 10 officers and 483 enlisted men.

July

MILITARY: Recent additions to the U.S. Army necessitate additional senior leaders, so Thomas H. Cushing, John Armstrong, Alexander Smyth, and John Chandler are commissioned brigadier generals.

July 1

NAVAL: British and Indian forces on the Detroit River capture the transport *Cuyahoga*, which carries General William Hull's personal papers. These are forwarded to General Isaac Brock, who will know the exact strength, composition, and strategy of the American invaders.

July 2

MILITARY: Federalist governor John Cotton of Connecticut declares his intention not to provide the federal government with militia forces. This recalcitrance removes a relatively well-trained pool of manpower from the war effort.

July 3–September 7

NAVAL: Master Commandant David Porter sails from New York with the 32-gun frigate *Essex* on a cruise of the North Atlantic.

July 5

MILITARY: The Northwest army under General William Hull slogs into Detroit, Michigan Territory, where he is gradually joined by additional territorial militia. He now has a force of 2,000 largely ill-trained men and scanty naval support in the form of the brig *Adams* under Captain Henry Brevoort, 2nd Infantry.

July 12

MILITARY: A force of 1,500 militia and regulars under General William Hull crosses the Detroit River from Michigan and occupies Sandwich, Ontario. The Americans are counting on rumors of Canadian discontent to produce a large number of deserters, but few are forthcoming. Nearly 200 Ohio militia rest behind their constitutional scruples and refuse to cross.

July 16

MILITARY: A force of Ohio militia under Colonel Lewis Cass, assisted by a company of the 4th Infantry under Captain Josiah Snelling, easily vanquishes the British picket guarding a bridge over the Aux Canard River. General William Hull, however, lacks heavy artillery and uses this as a pretext to halt his offensive before attacking the main fortified position at Fort Malden.

July 17

MILITARY: A surprise raid by 600 British, Canadians, and Indians under Captain Charles Roberts on the 61-man American garrison of Lieutenant Porter Hanks at Fort Mackinac, Michigan, results in the fort's surrender. Porter, unaware that war has been declared, surrenders without a shot, and he and his company are paroled and released. This bloodless victory will encourage increasing numbers of Native Americans to join the British. Their growing activity further unnerves General William Hull at Detroit.

NAVAL: The American brig *Nautilus*, commanded by Lieutenant William Crane, runs afoul of a British squadron consisting of the ship of the line HMS *Africa* and frigates *Shannon* and *Aeolus* off New York City. Badly outgunned, Crane surrenders; his is the first American naval vessel lost in the War of 1812.

July 17–20

NAVAL: The frigate *Constitution* under Captain Isaac Hull endures a harrowing pursuit by a five-vessel British squadron off New York but, by dint of splendid seamanship, he escapes undamaged to New York. At one point, Hull orders rowboats to drop fettered anchors in front of his vessel ("kedges") and tows the *Constitution* ahead of its pursuers. The exciting chase lasts 66 hours.

July 19

NAVAL: Ships of the Canadian Provincial Marine attack the American port of Sacketts Harbor, New York, only to be driven off by artillery from the *Oneida*, commanded by Lieutenant Melancthon T. Woolsey. Among his cannon is a 32-pound howitzer nicknamed "Old Sow," which fires back spent British cannon balls at the enemy.

August 3–19

MILITARY: General Henry Dearborn, acting without authorization, accepts a two-week truce proffered by British authorities in Canada. This provides the defenders

with a badly needed respite in which to shift forces to the thinly held Detroit theater. Dearborn also places a militia general, Stephen Van Rensselaer, in charge of military operations along the Niagara frontier.

August 4–7

MILITARY: General William Hull, fearing that his lines of communication below Detroit are threatened, dispatches a militia force southward to escort a supply train waiting at the River Raisin. En route they are ambushed at Brownstown by Indians under Tecumseh and scattered, with a loss of 17 dead and 11 wounded. At this time, Hull learns that British reinforcements have arrived under General Isaac Brock, and he orders an immediate withdrawal back to Detroit.

August 5

MILITARY: Federalist governor Caleb Strong of Massachusetts joins Connecticut by refusing to provide the federal government with militia forces necessary to invade Canada, then declares a day of prayer and fasting. Furthermore, public hostility is openly directed at Major General Henry Dearborn, tasked with defending Boston and the New England coastline.

August 8

MILITARY: General William Hull, feeling threatened by the approach of British reinforcements under General Isaac Brock, rapidly abandons Canada and withdraws into the confines of Detroit. This movement surrenders all strategic initiative to Brock, who intends to make effective use of it.

- Mexican revolutionary Bernardo Gutierrez de Lara, assisted by 150 American filibusters under Augustus W. Magee, crosses the Sabine River from Louisiana into Texas, intending to overthrow the Spanish regime.

August 9

MILITARY: General William Hull again seeks to send troops to escort a supply train from the River Raisin; this time he dispatches Lieutenant Colonel James Miller and his 4th Infantry. Fourteen miles south of Detroit, Miller encounters a force of British and Indians under celebrated chief Tecumseh at Maguaga and receives heavy fire. However, the Americans rout their opponents in a determined bayonet charge, losing 18 dead and 64 wounded. This is the first American land victory of the war; Hull subsequently orders Miller back to Detroit.

NAVAL: A British squadron briefly bombards Stonington, Connecticut; little damage results.

August 13

NAVAL: The 32-gun frigate *Essex* under Captain David Porter engages and captures the 20-gun British sloop *HMS Alert* in a contest of only 18 minutes. This is the first British vessel taken in the War of 1812.

August 14

MILITARY: It is a sign of declining morale among the militia when General William Hull orders an Ohio regiment to link up with a supply train to the south; they comply sullenly and are eventually ordered back to Detroit.

August 15

MILITARY: A force of 400 Potawatomie massacre the small American garrison of Captain Nathan Heald at Fort Dearborn (Chicago), Illinois Territory, after the Americans were ordered to evacuate that post by General William Hull. The Americans fight valiantly but in vain, losing 53 soldiers, women, and children. Among those lost are the noted scout, Captain William Wells, who had been raised by Chief Little Turtle, and Lieutenant George Ronan, the first West Point graduate to fall in combat. The victorious Indians burn the fort.

August 15–16

MILITARY: General Isaac Brock issues a surrender demand to General William Hull, insisting that he cannot control his Indian allies should fighting break out. Hull initially rejects the offer and an artillery duel ensues. The next day, roughly 700 British and Canadians cross over the Detroit River and surround the fort. Hull, convinced he is outnumbered and fearing an Indian massacre, timorously surrenders Detroit and 2,000 men to a decidedly smaller force. The surprisingly easy victory gives heart to Native American tribes throughout the region and they begin flocking to the British standard. Brock has managed to extend British influence and prestige throughout the Great Lakes region. Detroit remains the only American city captured by an enemy, and its loss greatly shocks public opinion.

August 19

NAVAL: In a startling naval upset off Nova Scotia, the 44-gun American frigate *Constitution* under Captain Isaac Hull defeats the 38-gun frigate HMS *Guerriere* of Captain James R. Dacres in a half-hour battle. Losses are seven Americans killed and seven wounded to 15 British dead and 64 wounded. The British vessel is so shattered by *Constitution*'s firepower that it has to be sunk. Moreover, the American frigate's stout oak sides are seen to repel British cannonballs, giving rise to the nickname "Old Ironsides." Hull is the nephew of defeated General William Hull, and his victory does much to restore American morale.

August 23

MILITARY: British general Isaac Brock departs on a quick transit from Detroit to Fort George on the Niagara frontier, in preparation for repelling another American invasion. Across the Niagara River, General Stephen Van Rensselaer struggles to assemble a mixed force of untrained soldiers and equally raw militia.

August 29

NAVAL: The cruise of a four-ship American squadron under Commodore John Rodgers concludes with seven British merchant vessels seized. Such poor results induce Secretary of the Navy Paul Hamilton to abandon the notion of squadron-level cruises; thereafter, he dispatches warships out individually as commerce raiders.

September 3

NAVAL: Captain Isaac Chauncey receives orders to relocate from New York City to Sacketts Harbor on strategic Lake Ontario. There he will be responsible for constructing fleets for that body of water and for distant Lake Erie, farther west.

Hull, Isaac (1773–1843)

Naval officer

Isaac Hull was born in Derby, Connecticut, on March 9, 1773. Orphaned at an early age, he became the ward of his uncle, the future general William Hull. Hull went to sea as a cabin boy at the age of 12, took readily to maritime life, and by the age of 20 commanded his own merchant vessel. However, having been accosted twice by French privateers in the West Indies, he joined the nascent U.S. Navy on March 9, 1798, as a lieutenant, and was assigned to the frigate *Constitution* under Captain Silas Talbot. Hull performed well in this capacity and, in May 1800, he led a party of sailors and marines that captured the privateer *Sandwich* at Puerto Plata harbor, Santo Domingo. After the war, Hull was retained in the peacetime establishment as the navy's second-ranking lieutenant, and in 1803 he commanded the sloop *Argus* within Commodore Edward Preble's squadron during the war with Tripoli. On April 27, 1805, he led a small squadron of

warships that assisted "General" William Eaton in the capture of Derna, Libya, and the following year he rose to captain of his old charge, the famous 44-gun frigate *Constitution*. Hull conveyed Ambassador Joel Barlow to France and had just returned to Boston, Massachusetts, for a refit when the War of 1812 commenced. On July 12, 1812, he sailed from Annapolis, Maryland, to join the squadron of Commodore John Rodgers, but was intercepted off Egg Harbor, New Jersey, by five British warships. Over the next five days and braving light winds, Hull displayed considerable nautical ingenuity by catching every available breeze and staying slightly ahead of his pursuers. He consequently escaped through this classic display of American sailing prowess.

Hull remained in Boston until August 1812, when he set sail for the Gulf of St. Lawrence to look for prizes. Moving on to Bermuda, he encountered the crack British frigate *HMS Guerriere* under Captain James

September 4

MILITARY: The garrison of Fort Harrison, Indiana Territory, is suddenly attacked by large numbers of Shawnee. The garrison commander, Captain Zachary Taylor, orders his company of the 7th Infantry to hold its ground at all costs, and beats off the attack.

September 5

MILITARY: A force of 200 Winnebago attack the American garrison at Fort Madison, Iowa Territory. The garrison, consisting of one company of the 1st Infantry, repels several assaults, and the Indians gradually abandon their siege.

September 11

MILITARY: Creek and Seminole warriors, assisted by escaped African-American slaves, ambush a supply detachment of U.S. Marines at Twelve Mile Creek outside St. Augustine, Florida. Captain John Williams and a marine private are mortally wounded and six others are injured, but the supply train is saved.

Dacres on August 19, 1812, and gave battle. The enemy vessel was systematically shot to pieces by *Constitution's* larger armament and, when British cannonballs rebounded off its stout oak sides, *Constitution* gained the famous nickname of “Old Ironsides.” This was the first naval victory of note in the War of 1812, and the first of three stunning ship-to-ship frigate victories for the United States. Hull, for his part, returned in triumph to Boston, where he received a congressional gold medal; his victory also helped take the sting out of his uncle’s surrender at Detroit. In 1815 Hull was appointed to the new Board of Naval Commissioners, although he resigned in favor of heading the Charleston Navy Yard in Boston. Over the next three decades, he capably held down a number of important assignments, both at sea and ashore, before heading up the Washington Navy Yard, 1829–35, and commanding the Mediterranean Squadron, 1838–41. Hull died in Philadelphia on January 13, 1843, a bluff, good-natured sailor who helped establish America’s reputation as a world naval power.

Captain Isaac Hull. Painting by Gilbert Stuart in the Boston Museum of Fine Arts. The vignette below the painting is an original sketch made under the direction of Captain Hull. (Naval Historical Foundation)

September 17

MILITARY: Former Indiana territorial governor William Henry Harrison is commissioned a major general of Kentucky militia and tasked with retaking Detroit, Michigan, at the earliest possible opportunity.

September 20–21

MILITARY: Captain Benjamin Forsyth takes his company of the Regiment of Riflemen from Sacketts Harbor, New York, and crosses by boat to Upper Canada. There they surprise the British supply depot at Gananoque, taking several Canadian militia prisoners before returning safely.

September 24

MILITARY: A party of 100 Georgia militia is ambushed by Seminoles and escaped African-American slaves near the Indian village of Alachua, East Florida. The Americans are forced to barricade themselves and withstand a six-day siege before a relief column can arrive.

September 28

NAVAL: Lieutenant Thomas Macdonough is ordered to take charge of the small naval station on Lake Champlain.

October 4

MILITARY: British forces under aged Colonel Lethbridge launch a haphazard boat attack on Ogdensburg, New York. They are met on the shoreline by militia and artillery under militia general Jacob Jennings Brown, who easily repulses them. For Brown, this is the start of a highly successful military career.

October 8

NAVAL: On Lake Ontario, Commodore Isaac Chauncey and the 16-gun brig *Oneida* chase the 22-gun British sloop *Royal George* into Kingston harbor, where it grounds itself under artillery batteries to prevent capture.

- Navy lieutenant Jesse D. Elliot, assisted by army captain Nathan Towson, 2nd Artillery, attacks and captures the British brigs *Detroit* and *Caledonia* as they lie anchored near the Niagara River and Buffalo, New York. One ship grounds and is burned, but all the raiders escape with their prisoners.

October 13

MILITARY: The Battle of Queenstown Heights transpires when a mixed force of 1,300 U.S. Army troops and New York militia under General Stephen Van Rensselaer attempts to cross the Niagara River. General Isaac Brock meets the invaders head on with 1,000 troops and Indians and is killed in action, but the Americans fail to receive promised reinforcements from the New York side. A brigade of regulars under Brigadier General Alexander Smyth, who refuses to take orders from a militiaman, remains idly by. General Roger Hale Sheaffe then arrives with British reinforcements, and the invaders under Lieutenant Colonel Winfield Scott are forced to surrender. American losses are 240 killed and wounded and 958 captured; British losses are 14 killed, 77 wounded, and 21 missing, including the irreplaceable Brock.

October 16

MILITARY: General Stephen Van Rensselaer, humiliated by his defeat at Queenstown Heights, resigns his command. General Alexander Smyth, an eccentric braggart, is appointed to succeed him and carry the war into Canada.

October 17–30

MILITARY: A force of militia and U.S. rangers under Illinois territorial governor Ninian Edwards attacks hostile Kickapoo villages near Lake Peoria. Resistance is slight, the villages are burned, and the Americans conclude their escapade without further incident.

October 18

NAVAL: Having sailed five days from the Delaware River, Captain Jacob Jones of the 18-gun sloop *Wasp* engages and captures the 18-gun British brig *Frolic* with a loss of 10 Americans to 90 Britons. At one point Lieutenant James Biddle boards the British vessel and personally strikes the enemy colors. Both vessels are dismasted in the combat and recaptured a few hours later by the 74-gun ship of the line HMS *Poictiers*.

October 25

NAVAL: In the war's second naval upset, Captain Stephen Decatur and the 44-gun frigate *United States* capture the 38-gun frigate HMS *Macedonian* under Captain John S. Carden off the Madeira Islands. The heavier American vessel pounds its adversary into submission in only 30 minutes. Decatur's losses are five killed and seven wounded to a British tally of 36 dead and 68 injured. The prize is then towed intact to New London, Connecticut, where it enters American service as the USS *Macedonian* and serves until 1828.

October 27

NAVAL: Captain David Porter and the 32-gun frigate *Essex* depart the Delaware Capes on a voyage around Cape Horn and into the Pacific. The enterprising Porter is determined to destroy the British whaling fleet operating there, and possibly as far as the Indian Ocean.

November

NAVAL: Royal Navy warships begin a blockade of the Delaware River and Chesapeake Bay.

November 9

NAVAL: On Lake Ontario, a squadron of seven small armed vessels under Commodore Isaac Chauncey bombards British fortifications at Kingston, Upper Canada, then withdraws at the onset of bad weather.

November 19

MILITARY: Lieutenant Colonel Winfield Scott, a prisoner in Quebec, learns that the British have arrested several Irish deserters serving in the American army and intend to hang them. Scott protests the move and, following his parole, will call the captives' plight to American authorities.

November 19–23

MILITARY: General Henry Dearborn leads a force of barely trained U.S. troops and raw militia north from Plattsburg, New York, intending to capture the strategic city of Montreal. Once they reach the Canadian border, Dearborn's militia refuses to cross, pursuant to their legal rights, and the invasion is cancelled. The only fighting occurs when the 15th Infantry under Colonel Zebulon M. Pike is fired on by American troops in the dark. The two columns continue firing, causing several casualties. All told, another ignominious display of incompetence.

November 21

MILITARY: The garrisons of Fort George and Fort Niagara, facing each other across the Niagara River, begin a protracted artillery duel. At one point, Betsy Doyle, a soldier's wife, helps man one of the guns when her husband is wounded.

November 22

NAVAL: Lieutenant George W. Read, commanding the 12-gun schooner *Vixen*, is captured in the West Indies by Captain James L. Yeo of HMS *Southampton*, 32 guns.

November 27

NAVAL: Buoyed by the surprising string of victories at sea, Congress authorizes construction of six new 44-gun frigates—none of which will be completed in time for the war.

November 28

MILITARY: American forces under General Alexander Smyth begin offensive operations by crossing the Niagara River. A force under Lieutenant Colonel Charles Boerstler, 14th Infantry, manages to effect a landing and seize a bridge, then returns to the American side. His hasty departure maroons a party of infantry and sailors under Captain William King, which manage to capture two British batteries before being overrun. A second wave led by Colonel William H. Winder tries to rescue the stranded party, but meets with stiff resistance while crossing and retreats. Smyth vows to try the operation again.

November 30

MILITARY: General Alexander Smyth makes a second, fumbling attempt to cross the Niagara River; he orders his troops to their boats but is dissuaded by driving rain and calls the operation off. Chaos breaks out in the American camp as militia-men run amok, firing their guns in the air, and Smyth is forced to run for his life.

December 3

MILITARY: Secretary of War William Eustis, under extreme criticism for the recent spate of military disasters, resigns from office and is temporarily succeeded by Secretary of State James Monroe.

December 17

MILITARY: Braving deep snow and intense cold, a column of Kentucky and army regulars under Lieutenant Colonel John B. Campbell, 19th Infantry, attacks the Miami villages along the Mississinewa River, Indiana Territory. Resistance is slight, although several Indians are shot down in cold blood and scalped. After burning the village, the Americans withdraw several miles, then encamp by the river bank.

December 18

MILITARY: At dawn, the camp of Lieutenant Colonel John B. Campbell is heavily attacked by vengeful Miami warriors along the Mississinewa River. His infantry holds the perimeter against several attacks, and at dawn a cavalry charge disperses the attackers. American losses are eight dead and 48 wounded, but all ranks suffer from the intense cold.

December 20

MILITARY: Intent on retaking Detroit, General William H. Harrison orders the left wing of his army under Brigadier General James Winchester to advance to the Maumee Rapids. Winchester complies, but the intense cold affects his troops, still clad in summer garments, and their numbers dwindle from 2,500 to half that.

December 26

NAVAL: The British Admiralty declares Chesapeake Bay and the Delaware River under a state of blockade. Perhaps as a sop to antiwar Federalists, New England and New York waters are unmolested for the time being; as the war continues, the blockade will extend from Maine to Georgia.

December 29

NAVAL: The Americans score a third naval upset when the 44-gun frigate *Constitution* under Captain William Bainbridge engages and defeats the 38-gun British

Bainbridge, William (1774–1833)

Naval officer

William Bainbridge was born into a prominent New Jersey family on May 7, 1774, and he joined the merchant marine at the age of 15. He proved himself a natural sailor and at one point single-handedly suppressed a mutiny threatening his captain. Bainbridge received command of his own vessel at the age of 19, but in 1798 he joined the U.S. Navy as a lieutenant, fought in the Quasi-War against France, and suffered the indignity of being captured by two larger vessels off Antigua. Bainbridge was subsequently retained in the peacetime establishment, and in May 1800 he rose to captain. That same year, he took the frigate *George Washington* on a tribute-bearing mission to Algiers, and suffered the additional humiliation of being forced to carry presents to the sultan of the Ottoman Empire at Constantinople while flying an Ottoman flag. He next fought in the Tripolitan conflict as part of Commodore Edward Preble's squadron, but in 1803 his frigate *Philadelphia* grounded in Tripoli harbor. Bainbridge and his crew endured several months of deprivation and captivity before regaining their freedom, but no stigma was attached to him. Back home, financial hardship induced Bainbridge to find employment with the merchant marine for three years, but he hastened back to naval service in 1808 when it appeared that war with Great Britain was imminent. He next assumed command of the Charleston Navy Yard, Boston, Massachusetts, until the eve of the War of 1812. Then, in concert with Captain Charles Stewart, he persuaded Congress not to lay up the

Captain William Bainbridge with USS *Constitution* and HMS *Java* in the background (Naval Historical Foundation)

small U.S. Navy in wartime but to allow it to fight the enormously larger Royal Navy on the open sea.

In the fall of 1812, Bainbridge succeeded Captain Isaac Hull as commander of the famous frigate *Constitution*. He then sailed for the coast of Brazil where, on December 29, 1812, he met and engaged the fine British frigate HMS *Java* in close combat. Bainbridge was wounded in action and his steering wheel was shot away, but the *Java* gradually crumbled under the

(continues)

(continued)

weight of *Constitution*'s heavier fire-power and thus handed the United States its third consecutive frigate victory of the War of 1812. He returned in triumph to Boston and received a gold medal from Congress, while the British Admiralty forbade its ships from engaging their American counterparts in single-ship actions. Bainbridge remained in Boston for the rest of the war, where he supervised construction of the new ship of the line *Independence*. He then sailed it against the Algerian pirates in 1815, only

to find that they had already submitted to a peace treaty dictated by Commodore Stephen Decatur. Bainbridge subsequently organized the first school for naval officers in Boston, and in 1820 he served as Decatur's second in the latter's duel with Captain James Barron. He then fulfilled various useful capacities over the next decade, including a stint as head of the Board of Naval Commissioners, before dying in Philadelphia on July 27, 1833. While never as glamorous as many contemporaries, Bainbridge was an accomplished officer and sailor of the early republic period.

frigate HMS *Java* off Brazil. The Americans sustain nine dead and 25 wounded (including Bainbridge) to a British tally of 48 killed and 102 wounded. The *Java* is so gutted that it has to be sunk at sea.

December 31

NAVAL: Secretary of the Navy Paul Hamilton, faced with charges of alcoholism and incompetence, resigns from office.

1813

January 2

NAVAL: Buoyed by the recent spate of naval victories, Congress authorizes construction of four 74-gun ships of the line, although none will see service during this war.

January 7

MILITARY: In Nashville, Tennessee, Major General Andrew Jackson leads a force of 2,500 militiamen to New Orleans. There they will assist General James Wilkinson in the capture of Spanish-held West Florida. Wilkinson, however, is a personal enemy of Jackson—and has other ideas. He asks the War Department to rescind Jackson's orders.

- Patriot forces in Spanish East Florida are reinforced by the arrival of 350 Tennessee volunteers under Colonel John Williams. They join riflemen under Lieutenant Colonel Thomas Adams Smith and commence a three-week campaign to burn Seminole villages.

January 10

MILITARY: The left wing of the Northwest army under General James Winchester reaches the Maumee River and assumes a defensive posture. Resistance from the British and Indians is nonexistent, which encourages the general.

- Lieutenant Colonel Winfield Scott, now paroled, arrives in Washington, D.C., and informs President James Madison of the plight of Irish deserters in British hands and facing execution. Madison vows to execute a like number of British soldiers in retaliation if the Irish are killed.

January 13

MILITARY: Brigadier General John Armstrong, scheming author of the 1783 Newburgh Addresses against Congress and a former minister to France, is barely confirmed as the new secretary of war.

NAVAL: A British squadron under Rear Admiral Sir George Cockburn arrives off Chesapeake Bay and begins enforcing the blockade announced the previous December.

January 17

NAVAL: Lieutenant John D. Henley and his 10-gun brig *Viper* are captured off Belize, Honduras, by HMS *Narcissus*, 38 guns.

January 18–19

MILITARY: The left wing of the Northwest army under General James Winchester departs the Maumee River and makes for the settlement of Frenchtown, Michigan Territory, to rescue civilians threatened by Indian attack. He does so without authority but routs a body of British and Canadians guarding them. Winchester then takes no special precautions against attack, even though strong British forces are garrisoned at Detroit.

January 19

NAVAL: William Jones is sworn in as the fourth secretary of the navy.

January 22–23

MILITARY: The Battle of Frenchtown (or River Raisin), Michigan Territory, occurs when 1,000 Americans, mostly half-frozen Kentucky militia under General James Winchester, are overrun by a similar force of British and Native Americans commanded by Colonel Henry A. Procter. Winchester's entire force is captured at a loss of 24 British dead and 158 wounded. The Indians, greatly emboldened by the easy victory, take to drinking and massacre around 60 wounded prisoners on the following morning. Thereafter, "Remember the Raisin!" becomes the battle cry of the Kentuckians.

January 23–February 1

MILITARY: News of the River Raisin disaster prompts General William Henry Harrison to retreat from the Maumee River and fall back to Maumee Rapids, Ohio. There he begins construction of Fort Meigs, a spacious fortification designed by engineer captain Eleazar D. Wood, a West Point graduate.

February 4

NAVAL: Lieutenant James Lawrence, commanding the brig *Hornet*, captures the English brig *Resolution*; it is found to be carrying \$23,000 in specie. Once the cargo is removed, the prize is burned at sea as the Americans lack sufficient manpower to man it.

February 6–7

MILITARY: Major Benjamin Forsyth's rifle company makes a determined dash across the St. Lawrence River and captures the Canadian settlement of Elizabeth-

town. The raiders empty the jail of prisoners, then retire back to Ogdensburg on the American side; Forsyth will gain promotion to brevet lieutenant colonel.

February 9

MARINES: In Florida, a punitive raid is launched by marines, soldiers, and militiamen against the Indian village responsible for the ambush of a supply column the previous September.

February 14

NAVAL: The frigate *Essex* under Captain David Porter rounds Cape Horn at the tip of South America, becoming the first American warship to operate in the Pacific Ocean.

February 17

NAVAL: Master Commandant Oliver Hazard Perry, commanding the gunboat station at Newport, Rhode Island, is ordered to join the Lake Ontario squadron of Commodore Isaac Chauncey.

February 21–22

MILITARY: British forces mount a sharp counterattack on American forces garrisoning Ogdensburg, New York, driving the rifle company of Brevet Lieutenant Colonel Benjamin Forsyth before them. Forsyth retires to Sacketts Harbor while the victorious British plunder Ogdensburg.

February 24

NAVAL: The 18-gun American sloop *Hornet* under Master Commandant James Lawrence captures the 20-gun sloop HMS *Peacock* of Captain William Peake off British Guiana, South America; the British vessel sinks immediately thereafter. The Americans lose four killed and four wounded to a British tally of five dead (including Captain Peake) and 33 wounded.

March 3

MILITARY: Congress passes another expansion of the U.S. Army, adding 18 new infantry regiments numbered 26th to 44th. In New Orleans, Brigadier General James Wilkinson is promoted to major general, as are William Henry Harrison, Wade Hampton, and Morgan Lewis. Moreover, the youthful George Izard, Zebulon Pike, William H. Winder, Duncan McArthur, and Lewis Cass become brigadier generals. Izard's departure from the 2nd Artillery allows Winfield Scott to advance to colonel, aged 26 years.

NAVAL: With the urging of Secretary of the Navy William Jones, Congress assents to funding construction of six sloops of war similar to the victorious but ill-fated *Wasp*.

March 4

NAVAL: The squadron of Admiral Sir George Cockburn sails into Chesapeake Bay and begins launching numerous, if small-scale, amphibious attacks that terrorize coastal communities.

March 5

NAVAL: The frigate *Essex* under Captain David Porter, having become the first American warship to sail around Cape Horn, South America, makes its way up the Chilean coast; it is the first American vessel to dock there.

March 15

MILITARY: General Andrew Jackson's militia force arrives at Natchez, where he receives orders from Secretary of War John Armstrong cancelling orders to reach New Orleans. Worse, he has to discharge his entire force without pay or supplies. Jackson angrily complies, taking special care to transport all his sick and injured troops through harsh winter conditions. His insistence on strict discipline gains him the moniker of "Old Hickory."

March 25

NAVAL: Captain David Porter orders the frigate *Essex* to engage and capture the Peruvian privateer *Nereyada* after two American prisoners are discovered in its hold. This is the first American naval victory in the Pacific Ocean.

March 27

NAVAL: Captain Oliver Hazard Perry arrives at Presque Isle (Erie, Pennsylvania) to oversee construction of an American fleet on Lake Erie. This will ultimately consist of two brigs, a schooner, and three gunboats constructed from the nearby woods and from materials hauled overland from Pittsburgh. To do so, he supersedes Captain Jesse Duncan Elliott as station commander, gaining Elliott's lasting enmity.

April

NAVAL: At Vergennes, Vermont, Lieutenant Thomas Macdonough lacks trained seamen to man his embryonic fleet, so he appeals to local army and militia units to provide individuals with sailing experience. Secretary of the Navy William Jones will order him to desist, as naval regulations outlaw this practice.

April 2

MILITARY: In Americus, New York, a detachment of 50 light dragoons under Lieutenant Loring Austin arrests several smugglers. Outraged town officials have sheriffs release the captives and arrest Austin; he is released only after General Zebulon M. Pike posts his bail.

April 9

NAVAL: Off the southern Atlantic coast, Sailing Master James Mork and the 14-gun schooner *Nonsuch* capture the British privateer *Caledonia*.

April 12–15

MILITARY: American military and naval forces under General James Wilkinson seize and occupy Mobile, Alabama, displacing the Spanish garrison at Fort Charlotte without a shot. Colonel John Bowyer then begins construction of a new fortress to guard the entrance of Mobile Bay, which he christens Fort Bowyer. Soon the region between the Pearl and Perdido Rivers is under United States control.

April 27

MILITARY: York (Toronto), Ontario, the provincial capital of Upper Canada, falls to a combined amphibious force of 1,700 men under Commodore Isaac Chauncey and General Henry Dearborn. The actual fighting is accomplished by General Zebulon M. Pike, the noted explorer, who expels 700 British defenders under

General Roger Hale Sheaffe, only to die in a British magazine explosion. American losses are 54 dead and around 200 wounded; the British tally is 62 dead, 34 wounded, and 50 missing. Afterward, discipline breaks down and the Americans, assisted by Canadian prisoners, burn and loot the settlement.

NAVAL: Commodore Isaac Chauncey assists the army of General Henry Dearborn in the capture of York, the provincial capital of Upper Canada. This is the first combined amphibious assault in American history and goes off remarkably well.

April 28–May 9

MILITARY: The American position at Fort Meigs, Maumee River, Ohio, is besieged by British and Indian forces under Brigadier General Henry Procter. The 1,000 defenders under General William Henry Harrison are expecting the arrival of a Kentucky militia brigade under General Green Clay, at which point a sortie is planned.

April 29

NAVAL: The frigate *Essex* under Captain David Porter employs small boats to capture the British warship *Montezuma* and the privateers *Policy* and *Georgiana*. Among those present is 12-year-old David G. Farragut, a future Civil War admiral.

April 29–May 6

MILITARY: A marauding British fleet enters Chesapeake Bay and begins raiding American settlements along the shoreline with relative impunity. This is an ominous sign of things to come.

May 1

MILITARY: Secretary of War John Armstrong authorizes publication of the *Rules and Regulations of the Army of the United States*, the first attempt to systematize military administration in this war. Matters such as recruitment, training, payment, and discipline are all addressed. The War Department also issues new guidelines for army uniforms; henceforth, the standard blue coat is to be stripped of all red collars and cuffs. The old “tar-bucket” shako also gives way to a new “Belgic” design with a high false front, very similar to what British units are presently equipping themselves with in Europe.

May 4–5

MILITARY: General William Henry Harrison, once reinforced by Kentucky militia under General Green Clay, sorties from Fort Meigs, Ohio, and captures the British siege battery. The militia, however, are lured inland by the Indians, who then surround and massacre them. Chief Tecumseh roundly castigates General Henry Procter for failing to stop the atrocities. The siege lifts four days later, and Procter returns to Upper Canada. American losses are 200 killed and 500 captured.

May 15

MILITARY: In East Florida, the so-called Patriot War ignominiously ends after Congress refuses to approve annexation; General Thomas Pinckney is ordered to evacuate all American forces back to Georgia.

May 16

MILITARY: Congress abolishes the practice of flogging in the U.S. Army, although the practice will be resurrected in 1833.

May 26

NAVAL: The British Admiralty extends its blockade of the American coast from Chesapeake Bay as far south as the Mississippi River, including the ports of Charleston, South Carolina, and Savannah, Georgia. The Royal Navy also begins systematically raiding along the coastline.

May 27

MILITARY: The Battle of Fort George, Upper Canada, unfolds when a combined amphibious force under General Henry Dearborn and Commodore Isaac Chauncey attacks and captures the noted British post. General Winfield Scott and 200 picked artillerymen acting as infantry lead the actual attack. The British under General John Vincent resist handily but are smothered by American firepower; they are chased inland by Scott until General Morgan Lewis erroneously halts the pursuit. Vincent consequently escapes in the direction of Burlington Heights and will fight another day.

NAVAL: Commodore Isaac Chauncey's Lake Ontario squadron, consisting of nine vessels, provides covering fire for an amphibious attack against Fort George, Upper Canada. Master Commandant Oliver Hazard Perry also fights with distinction and leads a naval party ashore under the command of Colonel Winfield Scott.

MARINES: A detachment of marines from the Lake Ontario squadron wades ashore during the attack on Fort George, Upper Canada.

May 28

NAVAL: In the Pacific Ocean, Captain David Porter, commanding the frigate *Essex* and prize vessel *Georgiana*, quickly captures four British whaling vessels. His cruise proves highly destructive to British commercial enterprises.

May 28–29

MILITARY: The Battle of Sacketts Harbor, Lake Ontario (New York), occurs when Governor-General Sir George Prevost and Commodore Sir James Lucas Yeo make a surprise attack on this strategic American port while Commodore Isaac Chauncey is at Fort George. The 1,200 British initially scatter 500 militia commanded by General Jacob J. Brown but prove unable to carry the main works garrisoned by 250 regulars. These recruits, led by Major Thomas Aspinwall, 9th Infantry, and Captain Isaac P. Hayne, 1st Light Dragoons, resist doggedly and throw back several determined assaults. Once Brown rallies the militia in Prevost's rear, the governor-general is unnerved and sounds the retreat. The British fall back intact to their fleet and sail away, although considerable damage has been inflicted to American naval stores. Prevost's losses are about 260 men; Brown sustains 23 dead and 114 wounded, mostly among the militia. For his role in the victory, he will receive a brigadier general's commission in the regular army.

June 1

MILITARY: Colonel Richard Mentor Johnson leads his newly recruited regiment of mounted Kentucky riflemen to Ohio, where it joins the army of General William

Brown, Jacob J. (1775–1828)

Army general

Jacob Jennings Brown was born in Bucks County, Pennsylvania, on May 9, 1775, the son of Quaker farmers. He was by turns a teacher, a surveyor, and one-time secretary to Alexander Hamilton before moving to upstate New York to farm and serve as a county judge. After President Thomas Jefferson declared an embargo in 1808, Brown took readily to smuggling potash into Canada. However, he also displayed a genuine interest in military affairs and in 1809 gained appointment as colonel of the Jefferson County militia. In this capacity he spent the first months of the War of 1812 guarding a 200-mile strip of land stretching from Lake Ontario and down the St. Lawrence River, New York. Brown, unlike many contemporaries, proved himself an active and energetic leader. On October 4, 1812, he assembled militia and cannon to defeat a British cross-river raid against Ogdensburg, New York. A year later, he surmounted a more serious matter when a British expedition under

Governor-General Sir George Prevost made an amphibious attack against Sackets Harbor, home port of the Lake Ontario fleet. Brown's militia were routed in the initial charge, but he rallied them inland and led them back against the British rear. Prevost was so unnerved that he fell back to the fleet and returned to Canada. As a reward for this dramatic victory, Brown was commissioned a brigadier in the U.S. Army effective July 19, 1813. He subsequently accompanied the ill-fated St. Lawrence Campaign of General James Wilkinson, commanding a brigade. He handled his affairs competently, and was one of the few senior officers to escape disgrace. Secretary of War John Armstrong consequently promoted him to major general on January 24, 1814, and tasked him with leading an invasion of the Niagara Peninsula that summer.

Brown, assisted by noted Generals Winfield Scott and Eleazar W. Ripley, crossed the Niagara River on July 3, 1814, and

Henry Harrison. As militia forces go, they are exceptionally well-trained and eager to fight.

NAVAL: The 38-gun American frigate *Chesapeake* under Captain James Lawrence, with a new and largely inexperienced crew, engages the crack British frigate HMS *Shannon* under Captain Philip B. V. Broke outside Boston Harbor. In spite of great bravery and sacrifice, the Americans are defeated in a bloody, 15-minute engagement in which Lawrence is mortally wounded and Broke critically. American losses are 62 killed and 58 injured to a British tally of 33 killed and 42 wounded—marking it as one of the bloodiest encounters in the Age of Sail. Lawrence's dying command of "Don't give up the ship!" subsequently passes into U.S. Navy tradition as a battle cry.

- A squadron consisting of the frigates *United States* and *Macedonian*, escorted by the brig *Hornet*, drops anchor at New London, Connecticut, hotly

two days later his Left Division won the Battle of Chippewa against veteran British forces. However, his offensive stalled when the Lake Ontario squadron under Commodore Isaac Chauncey failed to rendezvous as promised, and British reinforcements arrived under General Gordon Drummond. Brown and Drummond then clashed at Lundy's Lane on July 25, 1814, which was the hardest-fought engagement of the war. Each side incurred 900 casualties, and Brown was wounded and spent several weeks recuperating before resuming command at Fort Erie. On September 17, 1814, he orchestrated a surprise sortie that nearly routed Drummond's besieging army. In light of his exemplary conduct, Brown became one of two major generals retained in service after the war. In 1821 he became commanding general of the army and acted in concert with vigorous secretary of war John C. Calhoun to pass badly needed reforms. Brown continued advising Presidents James Monroe and John Quincy Adams on military affairs until his death in Washington, D.C., on February 24, 1828.

Major General Jacob Brown (Library of Congress)

pursued by a British squadron. The two frigates will remain blockaded there for the remainder of the war, but the *Hornet* will manage to evade British vessels in 1814.

MARINES: The marine detachment on board the *Chesapeake*, which mustered 44 men, loses 14 dead and 20 wounded in the fight against HMS *Shannon*.

June 3

NAVAL: In something of a minor disaster, the American sloops *Growler* and *Eagle* are trapped in the Sorel River, at the northern end of Lake Champlain, which will tip the balance of power on Lake Champlain in favor of the British for several months.

June 5

NAVAL: The British make an amphibious assault against the town of Hampton, Virginia, which they sack and burn before departing.

June 6

MILITARY: The Battle of Stoney Creek, Upper Canada, unfolds when 700 British troops under General John Vincent and Colonel John Harvey attack an American force of 1,600 encamped nearby. American security is lax, few sentries are posted, and the British are upon them in force before an alarm is sounded. Generals John Chandler and William H. Winder stumble into enemy lines in the darkness and are seized, but the British take heavy losses and are gradually driven off by daylight. The senior American officer present, Colonel James Burn, 2nd Light Dragoons, decides to fall back upon Fort George to regroup. This withdrawal marks the end of General Henry Dearborn's offensive and is also a high-water mark of the war in Canada, for no sizable American force will penetrate as far into the the Niagara Peninsula for the remainder of the war. American losses are 17 dead, 30 injured, and 99 missing, while the British sustain 23 killed, 136 wounded, and 55 captured.

June 18–August 24

NAVAL: Lieutenant William Henry Allen and the 16-gun brig *Argus* sail for France while conveying U.S. Minister William H. Crawford on board. That accomplished, Allen commences a spectacular raid into the English Channel.

June 22

MILITARY: In Chesapeake Bay, a British squadron disembarks troops intending to attack Craney Island off Norfolk, Virginia. They are met by intense artillery fire from batteries designed by Captain Sylvanus Thayer, Corps of Engineers, and are forced to retreat with loss.

NAVAL: During the attack on Craney Island, a 50-man marine detachment from the nearby frigate *Constellation* mans artillery batteries and helps drive off the British.

June 24

MILITARY: An American military expedition of 600 men under Colonel Charles G. Boerstler, 14th Infantry, comes to grief at Beaver Dams (Thorold), Upper Canada, when it is surrounded by smaller numbers of British light troops and Indians under Lieutenant James Fitzgibbon. Fitzgibbon bluffs Boerstler into believing that he in fact possesses 1,700 men and demands his surrender. The American commander, fearing an Indian massacre, timidly complies.

June 27

MILITARY: Maryland militia general Samuel Smith, who is also an influential congressman, arranges for Captain George Armistead, 3rd Artillery, to become garrison commander of Fort McHenry, Baltimore harbor. The two men immediately begin strengthening that position, and Armistead, desiring a conspicuous national standard to fly above the ramparts, contracts with Mrs. Mary Pickersgill to sew a larger flag.

July 6

MILITARY: On the Niagara frontier, General Henry Dearborn, whose slow movement and lethargic activity will bequeath him the nickname "Granny," is replaced by the ever-scheming General James Wilkinson. Meanwhile, Wilkinson's arch-enemy, General Wade Hampton, assumes command of troops at Plattsburgh,

New York. As for Dearborn, he is reassigned to quiet sectors at New York and Boston for the remainder of the war.

July 10

MILITARY: Colonel Winfield Scott, tired of garrison duty at Fort George, boards 250 soldiers on Commodore Isaac Chauncey's Lake Ontario squadron and recaptures York, the provincial capital of Upper Canada. Some military supplies are confiscated, then the invaders depart.

July 14

MARINES: In the Pacific, Lieutenant John M. Gamble becomes the first Marine Corps officer to captain a vessel when he takes charge of the captured British whaler *Greenwich* and assists in taking the British privateer *Seringapatam*.

July 20

NAVAL: The brig *Argus*, commanded by Lieutenant William Henry Allen, departs L'Orient, France, and begins a highly destructive foray into the English Channel, seizing 19 prizes in 22 days.

July 20–28

MILITARY: Fort Meigs, Ohio, is the subject of a second siege by British and Indian forces under Brigadier General Henry Procter. The garrison, commanded by General Green Clay, fails to be fooled by a sham battle waged outside the fort, and the British gradually withdraw.

July 27

MILITARY: Tensions between American settlers and Creek Indians boil over at Burnt Corn Creek when a detachment of Mississippi militia under Colonel James Caller attacks a body of Indians returning from Florida with Spanish arms and gunpowder. The militant "Red Sticks" repel the attack and drive the Americans off. This action will signal the start of the brief but bloody Creek War.

July 29

MILITARY: Brigadier General Henry Procter, being goaded by Shawnee chief Tecumseh, decides to attack the small Fort Stephenson on the Sandusky River, Ohio. When General William Henry Harrison learns of the plan, he orders the garrison immediately evacuated, but Major George Croghan, commanding 160 soldiers from the 17th and 24th Infantry, determines to defend his post to the last.

August 1

MILITARY: General Henry Procter briefly bombards Fort Stephenson, Ohio, then attacks in broad daylight. He is roundly repulsed by a smaller garrison under Major George Croghan: Previously the defenders had masked their only cannon, "Old Betsy," and allowed the British to approach to within point-blank range before firing grapeshot into their densely packed column. Procter's failure disheartens his Indian allies, and he falls back into Canada. British losses are 90 killed and wounded to an American tally of one dead and seven injured. Croghan will receive a brevet promotion to lieutenant colonel and become a national hero.

August 4

NAVAL: The British Lake Erie squadron under Captain Robert H. Barclay momentarily abandons its blockade of Presque Isle (Erie), Pennsylvania. During his absence, Commodore Oliver Hazard Perry rapidly disarms his vessels, passes them over the sandbar blocking the harbor, then painstakingly rearms and begins cruising Lake Erie in search of the enemy.

August 7–11

NAVAL: The American Lake Ontario squadron of 13 vessels under Commodore Isaac Chauncey spars with a British force of six vessels under Commodore Sir James L. Yeo in a protracted running fight. However, Chauncey loses the schooners *Scourge* and *Hamilton* to stormy weather on August 8 and another two gunboats when they are cut off and captured.

August 9–10

MILITARY: The town of St. Michaels, Maryland, conducts the first “blackout” in American history following the approach of a British squadron at night. By extinguishing all city lights and placing lamps in trees and on the masts of vessels, the townsfolk fool the British gunners, who fire too high and miss the town.

August 14

NAVAL: The 20-gun American sloop *Argus* under Captain William H. Allen is captured by the 21-gun British brig HMS *Pelican* under Captain John F. Maples; Allen is mortally wounded in combat. American losses are 10 dead and 14 injured to two dead British and five wounded. Prior to its capture, *Argus* had accounted for 27 British vessels since leaving the United States in July.

August 18

MILITARY: In Texas, Spanish forces under General Joaquin de Arredondo attack and scatter a mixed Mexican/American force of 1,300 filibusters at the Medina River. The rebels are quickly pursued back to San Antonio, and Spanish control is reasserted over the entire province.

August 20–September 4

MILITARY: At Sacketts Harbor, New York, Major General James Wilkinson arrives to take charge of the Northern Army and an ambitious fall offensive. He intends to lead his 7,000 recruits down the St. Lawrence River while another force of 3,000 men under General Wade Hampton marches up the Champlain Valley; the two forces will converge in Canada before pressing on to their ultimate objective, Montreal.

August 30

MILITARY: A disgruntled force of 800 Creek warriors under Chief William Weatherford (Red Eagle) attacks and surprises Fort Mims, Alabama Territory, massacring nearly 500 inhabitants. The extent of the disaster galvanizes the Americans and occasions the rise of General Andrew Jackson to national prominence.

September 3

MILITARY: Sac Indians again attack poorly situated Fort Madison, Iowa, and are rebuffed by a small garrison consisting of 50 men of the 1st Infantry.

September 5

MILITARY: Secretary of War John Armstrong arrives at Sacketts Harbor, New York, to confer with General James Wilkinson about his forthcoming St. Lawrence campaign against Montreal. Wilkinson greatly resents such meddling, but preparations continue apace.

NAVAL: The 14-gun brig *Enterprise* under Lieutenant William Burrows defeats the 14-gun British brig HMS *Boxer* of Captain Samuel Blyth off Portland, Maine. Both Burrows and the British commander are killed in action and buried in Portland with honors of war. American losses are 13 wounded to a British tally of 28 dead and 14 injured.

September 7

MILITARY: The expression “Uncle Sam” to denote the United States government first appears in an issue of the Troy (New York) *Post*. It is apparently drawn from the practice of having all government property stamped “U.S.,” as well as from the name of a local military supplier, “Uncle Sam” Wilson.

September 10

NAVAL: The Battle of Lake Erie transpires when an American squadron of 10 vessels under Commodore Oliver Hazard Perry seeks out and engages a smaller British force of six warships under Commodore Robert Heriot Barclay. As Perry closes, his flagship *Lawrence* becomes separated from the main body and bears the brunt of the entire British squadron’s firepower. At length his ship is forced to strike its colors, but Perry heroically transfers his command by rowboat to the *Niagara* and resumes fighting. Barclay, seriously wounded and his vessels heavily damaged, lowers his flag—the first time that an entire British squadron is captured. “We have met the enemy,” Perry writes laconically, “and they are ours.” Casualties in this three-hour slugfest are 27 Americans killed and 96 wounded to 41 British killed and 94 injured. This is one of the few decisive encounters in the War of 1812 and will facilitate an American invasion of Upper Canada.

September 11

NAVAL: Compared to events on Lake Erie, Commodore Isaac Chauncey conducts an inconclusive, long-range bombardment of his British counterpart on Lake Ontario.

September 18

MILITARY: General Henry Procter, reacting to the recent loss of Lake Erie to the Americans, orders an evacuation of Detroit, Michigan, and Malden, Ontario. He begins withdrawing his force to the Niagara frontier over the protests of Chief Tecumseh and his Indian allies.

September 20–25

MILITARY: As General William Henry Harrison prepares to cross Lake Erie in pursuit of the fleeing British, he dispatches Colonel Richard M. Johnson’s mounted Kentuckians on an end run around the lake to recapture Detroit.

September 22

NAVAL: Commodore John Rodgers and the 44-gun frigate *President* seize the British tender *High Flyer* in the mid-Atlantic.

Perry, Oliver Hazard (1785–1819)

Naval officer

Oliver Hazard Perry was born in South Kingston, Rhode Island, on August 20, 1785, the son of a Revolutionary War veteran. He joined the U.S. Navy as a midshipman in 1799 and sailed with his father onboard the ship *Nathanael Greene* throughout the Quasi-War with France. Perry subsequently accompanied Commodore John Rodgers on a cruise of the Mediterranean, where he rose to lieutenant in 1802. In 1807 he returned to Rhode Island to command a gunboat and help enforce the unpopular embargo of President Thomas Jefferson. Disaster struck in January 1811, when Perry's vessel ran aground and sank off Westerly, Rhode Island, but he was investigated and cleared by a court of inquiry. He gained promotion to master commandant shortly after the War of 1812 commenced and, bored by gunboat service, requested a combat assignment. In February 1813, Perry was ordered to Lake Ontario, New York, as part of Commodore Isaac Chauncey's squadron. In this capac-

ity he fought at the May 17, 1813, capture of Fort George, Upper Canada, and was also ordered to take command of American naval forces on Lake Erie. This assignment bought him into direct conflict with Lieutenant Jesse D. Elliott, who had commanded at Presque Isle (Erie), Pennsylvania, since the previous winter, and the two officers were never reconciled. Nonetheless, Perry began an ambitious shipbuilding campaign to wrest Lake Erie from British control, and by late summer of 1813 he had an assortment of 10 armed vessels of varying sizes. His Royal Navy opponent, Captain Robert H. Barclay, could assemble only six, but he blockaded Perry's vessels at Erie for several weeks. Barclay then inexplicably departed, at which point Perry ordered his vessels stripped of all armament, floated over the sand bar blocking the harbor, and then re-armed on open water.

On September 10, 1813, Perry located Barclay's squadron on Lake Erie and

September 26

NAVAL: Commodore John Rodgers, commanding the frigate *President*, anchors at Newport, Rhode Island, following a successful, five-month cruise that netted 12 English prizes.

September 27–29

NAVAL: The squadron of Commodore Oliver Hazard Perry transports 4,500 men of General William Henry Harrison's army across Lake Erie, landing them below Fort Malden, Upper Canada.

September 28

NAVAL: In a second encounter, the Lake Ontario squadron of Commodore Isaac Chauncey has the better of Commodore James L. Yeo's British force, driving them headlong into Burlington Bay, Ontario, but failing to destroy them.

immediately gave battle. Perry's flagship, the *Lawrence*, flew a flag with Captain James Lawrence's dying words, "Don't Give Up the Ship," to inspire his men. However, in rushing to engage, Perry became separated from his vessels and was pounded by Barclay's entire force. For reasons that have never been sufficiently explained, Elliott, his second-in-command, made no attempt to assist him. The *Lawrence* was eventually pounded into submission, but Perry, undeterred, simply hopped in a boat, rowed to the brig *Niagara*, and rushed back into battle. This new influx of firepower induced Barclay to strike his colors and, for the first time in history, an entire British squadron was forced to surrender. Perry next served at Baltimore, Maryland, where he assisted in the defense of the city. He became a national hero, and after the war he sailed to the Mediterranean in the new frigate *Guerrière* as part of Commodore Stephen Decatur's expedition against Algiers. Perry died of yellow fever on August 23, 1819, while conducting a diplomatic mission up the Orinoco River

Commodore Oliver H. Perry, 1813, in dress uniform. Engraved by Henry Meyer from an original painting by John W. Jarvis. (Naval Historical Foundation)

of Greater Colombia (Venezuela). He was one of the outstanding naval figures from the War of 1812.

October 1

MILITARY: With Detroit secure, General William Henry Harrison departs Fort Malden and energetically pursues British forces under General Henry Procter up the Thames River Valley. His 3,500 men are spearheaded by Colonel Richard M. Johnson's mounted Kentuckians.

October 4

NAVAL: Captain John Cahoone and the revenue cutter *Vigilant* seize the British privateer *Dart* off Newport, Rhode Island.

October 5

MILITARY: The Battle of the Thames unfolds when 3,000 pursuing Americans under General William Henry Harrison overtake the fleeing British and Indians under General Henry Procter and Chief Tecumseh. Vengeful Kentuckian cavalry

easily disperse the 900-man 41st Regiment in a spirited charge, but have a harder time dislodging 1,000 Indians from nearby woods. In the fight, Colonel Richard M. Johnson is toppled from his horse and wounded, but Tecumseh is killed and resistance dwindles. Harrison, facing expiring enlistments, orders his victorious army back to Detroit. American losses are 12 dead and 22 wounded to a British tally of 12 killed, and 600 captured. Moreover, the British presence in western Ontario is almost completely diminished.

NAVAL: On Lake Ontario, the pendulum swings in favor of the Americans when Lieutenant Arthur Sinclair of the 24-gun brig *General Pike* captures four British schooners.

October 11

MILITARY: General Andrew Jackson, still hobbled by wounds incurred in a street duel with the Benton brothers, leads his brigade of Tennessee volunteers toward the Coosa River and into the heart of Creek country. General Thomas Pinckney, empowered by Secretary of War John Armstrong to direct overall operations of the Creek War, decides upon a three-pronged approach to crush the insurrection. While one column under Andrew Jackson descends from Tennessee, additional troops will advance from Georgia under General John Floyd while a third column, under General Ferdinand L. Claiborne, marches from the Mississippi Territory.

October 24

MARINES: A marine barracks is constructed at Portsmouth, New Hampshire.

October 25

NAVAL: The frigate *Essex* under Captain David Porter drops anchor off the Marquesas Islands in the Pacific for some badly needed repairs. Local tribesmen resent the intrusion and begin harassing the Americans.

October 26

MILITARY: The Battle of Chateauguay, Lower Canada, occurs when a division of 4,000 Americans under General Wade Hampton advances up the Lake Champlain corridor against Montreal and encounters a force of 1,700 entrenched British, Canadians, and Indians under Lieutenant Colonel Charles De Salaberry. The Americans make a half-hearted attempt to flank the defenders through a swamp, suffering a handful of casualties; then Hampton calls off the entire invasion and falls back to New York. The retreating force is expertly covered by General George Izard's brigade.

October 29

MILITARY: Brigadier General Lewis Cass is appointed governor of the Michigan Territory, which office he will hold for nearly two decades.

November 3

MILITARY: A force of 900 Tennessee cavalry under General John Coffee surrounds and destroys the Creek Indian village of Tallushatchee. The victorious Americans kill 186 warriors and take 86 captives at a cost of five killed and 40 wounded. Among the participants is a very young scout named Davy Crockett; an orphaned Indian child found on the battlefield is subsequently adopted by General Andrew Jackson.

November 9

MILITARY: General Andrew Jackson, leading a force of 2,000 Tennessee militia, attacks and destroys the Indian village of Talladega, Mississippi Territory. The Indians are surrounded and nearly destroyed before they escape through a gap in Jackson's line. Creek losses are 299 warriors left dead on the field while the Americans incur 17 killed and 82 wounded. Food shortages will force Jackson back to his main base at Fort Strother.

November 11

MILITARY: The Battle of Crysler's Farm transpires when General James Wilkinson takes 2,400 men from his St. Lawrence expedition, advances inland, and attacks an 800-man British force shadowing his advance. Their commander, Colonel Joseph W. Morrison, proves tactically astute and skillfully repulses several uncoordinated American thrusts against his line. General Leonard Covington is killed before Wilkinson finally calls off the battle and withdraws to the river to embark. The much-vaunted American attempt to capture Montreal has ended in defeat and disaster. British losses are 22 dead, 148 wounded, and nine missing to an American tally of 102 killed, 237 wounded, and 100 missing. This concludes operations in Lower Canada, and Wilkinson enters winter quarters.

November 13

MILITARY: General James Wilkinson lands his chastised force at the Salmon River, New York, where they make their way overland to French Mills to construct quarters for the winter.

- In the Mississippi Territory, Brigadier General Ferdinand L. Claiborne leads a militia column against the Creek village of Econochaca, or "Holy Ground." He is assisted by the presence of the 3rd Infantry, which bolsters his untrained militia levies.

November 16

NAVAL: British admiral John Borlase Warren declares the American seaboard, from New York to the Mississippi River, to be under a state of blockade. Federalist New England, still hostile to the War of 1812, remains unaffected.

- The British Admiralty extends the blockade northward from Chesapeake Bay and the Delaware River up to Long Island. Only the New England ports still conduct commercial activity.

November 17–18

MILITARY: At Fort Strother, Mississippi Territory, General Andrew Jackson successfully weathers a mutiny by his Tennessee levies. The matter is brought on by endemic supply shortages and hungry troops. After a supply train arrives, the men are finally fed but insist on leaving. Jackson deploys a company directly in their path, threatening to shoot anyone who makes the attempt. Much grumbling ensues, but order is restored.

November 19

NAVAL: In the Pacific, Captain David Porter of the *Essex* claims the Marquesas chain for the United States, renaming the biggest island Madison Island. More

**Wilkinson, James (1757–1825)***Army general*

James Wilkinson was born in Calvert County, Maryland, where he studied medicine. Following the onset of the Revolutionary War in 1775, he joined the Continental army as a lieutenant and within a year functioned as aide-de-camp to General Horatio Gates. Wilkinson proved himself adept as an officer but exhibited a penchant for intrigue, and by January 1778 he was a central figure in the so-called Conway Cabal, a plot intending to replace General George Washington with Gates. When the conspiracy was exposed, Wilkinson was among those disgraced, and he ended the war as a brigadier general of Pennsylvania militia. He subsequently moved to Kentucky to embroil himself in other frontier schemes, and in 1787 he made the fateful decision to become a spy in the employ of Spain. In 1792 he rejoined the U.S. Army to serve as second-in-command under General Anthony Wayne, whom he despised and constantly sought to undermine, and received little credit for victory over the Indians in 1794. However, following Wayne's death in 1796, Wilkinson became the military's de facto senior officer, a post he would hold for nearly two decades. In this capacity he served along the southwestern frontier, all the while informing Spanish authorities of American territorial intentions. During 1804–05, Wilkinson also entered into a harebrained scheme with former vice president Aaron Burr to detach the frontier states and form an independent republic under Spanish protection, but he unhesitatingly betrayed Burr to authorities when he felt the plot

was about to implode. In 1809 Wilkinson further sullied his reputation by encamping his small army at Terre-aux-Boeufs, Louisiana, a swampy region that killed nearly half his troops before he finally moved to higher ground. All the while, Wilkinson survived several court-martials and courts of inquiry, which accused him of misdeeds but never possessed the evidence necessary to convict him.

Wilkinson was serving as commander of the New Orleans garrison when the War of 1812 broke out, and in 1813 he orchestrated the capture of Spanish-held Mobile in West Florida (Alabama). He was then summoned north to head up the ambitious 1813 St. Lawrence Campaign, which was launched far too late in the year to enjoy any prospect of success and came to grief at the Battle of Crysler's Farm on November 11, 1813. Wilkinson, who was ill at the time, had no recourse but to encamp his men for the winter at French Mills, New York, where they suffered terribly through his neglect. Wilkinson then compounded his difficulties by leading a winter attack against the fortified British post at LaColle Mills, Quebec, in March 1814, which was roundly repulsed. He was finally removed from command and tried for incompetence and neglect, but again escaped a guilty verdict. After the war, Wilkinson penned a vindictive set of memoirs, in which he castigated all his political adversaries, then ventured to Mexico in pursuit of land grants. He died there on December 28, 1825, a scurrilous figure of American military history.

pressing is the need to effect repairs of his vessel, but the resident tribe, the Typees, do not appreciate visitors and remain hostile; minor clashes ensue. Moreover, Congress will never recognize the claim.

November 29

MILITARY: A detachment of 950 Georgia militia under General John Floyd and 400 allied Creek under Chief William McIntosh engage and defeat a large party of hostile Red Sticks at Autosee, Mississippi Territory. Both sides sustain considerable losses after hard fighting; Floyd suffers 11 killed and 54 wounded to an Indian loss estimated at 200. After burning the nearby village, the Americans withdraw to the Chattahoochee River.

December

MILITARY: The bulk of American forces under General James Wilkinson establish a winter camp at French Mills, New York. Incompetence and dishonesty in the Quartermaster Department, and Wilkinson's own indifference to the plight of his men, result in deprivation and suffering on a scale comparable to Valley Forge. Several hundred deaths are incurred through sickness, frostbite, and malnutrition.

December 9–12

MILITARY: General Andrew Jackson incurs another mutiny at Fort Strother, this time brought on by expiring enlistments. When he learns that the men intend to depart en masse at night, he parades them in front of two armed cannon and vows that not a man will leave the encampment until reinforcements arrive. At length, new troops arrive but, because their own terms end shortly, he will send the whole ensemble home save for some willing volunteers.

December 10

MILITARY: General George McClure of the New York militia hastily evacuates Fort George, Ontario, in the face of a possible British attack; before doing so he burns the Canadian village of Newark to deny it to the enemy.

December 18

MILITARY: British forces under newly arrived General Gordon Drummond surprise and capture Fort Niagara, New York, from recruits of the 24th Infantry, setting the stage for intense retaliatory action along the American side of the Niagara River. The fort's commander, Captain Nathaniel Leonard, 1st Artillery, is also taken, and his troops suffer 65 dead, 15 wounded, and 350 captured; British losses are negligible by comparison, six dead and five wounded.

December 23–24

MILITARY: A mixed force of militia and army troops under General Ferdinand L. Claiborne attacks and defeats the Creek at Econochaca (Holy Ground), Mississippi Territory. Indian resistance is fanatical, stoked by medicine men whose spells supposedly will protect the warriors from the white man's bullets. Claiborne clinches the battle with a bayonet charge by the 3rd Infantry, killing 30 Indians and almost capturing Chief William Weatherford, who jumps off a high bluff and into the waters of the Tallapoosa River below. American losses are one killed and 20 wounded.

December 24

MARINES: In the Pacific, a detachment of marines and sailors under Lieutenant John M. Gamble comes ashore at Nuka Hiva, Marquesas Islands, to impress the natives with American power and maintain order.

December 25

NAVAL: Captain Thomas Hall and his 14-gun brig *Vixen* (II) are seized in mid-Atlantic by the British frigate HMS *Belvidere*.

December 29–30

MILITARY: British and Indian forces under General Phineas Riall systematically burn American settlements along the Niagara River region, including Black Rock and Buffalo, New York. The militia under General Amos Hall is unable to mount effective resistance and flees the battlefield. For a loss of 112 men, Riall inflicts 30 dead, 40 wounded, and 69 captured. The entire Niagara frontier is now systematically laid waste.

NAVAL: The schooners *Chippewa*, *Little Belt*, and *Trippe*, all formerly part of Commodore Oliver Hazard Perry's Lake Erie *squadron*, are burned by British forces at Buffalo, New York.

1814**January 22**

MILITARY: A force of 850 newly recruited Tennessee militia under General Andrew Jackson marches from Fort Strother, Mississippi Territory, against a large Indian encampment at Emuckfau Creek. However, the Indians strike first and rout his left flank commanded by General John Coffee. After severe fighting, Jackson extricates his command with a loss of 25 dead and 75 wounded, and falls back upon Fort Strother.

January 24

MILITARY: Secretary of War John Armstrong initiates badly needed reforms by establishing military districts and purging the senior officer corps of its deadwood. Younger, more energetic officers like Jacob Brown and George Izard advance to major general while Winfield Scott, Eleazer W. Ripley, Alexander Macomb, Edmund P. Gaines, Thomas Adams Smith, and Daniel Bissell become brigadiers. The average age of American leadership has suddenly dropped to a very energetic 36 years, with Scott the youngest at 28.

- General Andrew Jackson's rear guard is again roughly handled and withdraws in a panic across Entitachopco Creek. Only Jackson's personal intervention prevents the retreat from dissolving into a rout. American losses are considerable, but Jackson manages to keep his command intact. The Tennessee militia are suffering from low morale, food shortages, and their raw, undisciplined nature. Jackson will spend the next several weeks properly training his charge and will also be assigned the new 39th Infantry.

January 27

MILITARY: Congress raises the U.S. Army manpower ceiling to 67,773 men, although only half that amount will ever be recruited. They vote down a proposal by President James Madison to raise 100,000 men.

- General John Floyd and 1,300 Georgia and South Carolina militia, backed by 400 allied Creek, encamp at Calabee Creek in the Alabama Territory. That evening they are assailed by Chief William Weatherford, commanding as many as 1,800 braves, and the Americans are hard pressed to maintain their position. The Creek are finally driven off by artillery fire at dawn; enemy losses are estimated at around 200 while Floyd loses 17 dead and 132 wounded. The extent of casualties induces the Americans to withdraw to Fort Mitchell, Georgia.

February 2

NAVAL: Lieutenant Lawrence Kearny wrecks his eight-gun schooner *Ferret* at Stono Inlet, North Carolina, without loss of life.

February 10

MILITARY: Congress approves another expansion of the U.S. Army, this time authorizing another four infantry regiments, numbered 45th to 48th. However, manpower will remain a pressing problem and most formations will be skeletal, being half-strength or less.

February 25

NAVAL: In the Caribbean, brigs *Enterprise* and *Rattlesnake* catch three prizes, then are forced to separate when chased by a British frigate. The *Enterprise* subsequently throws most of its armament overboard to escape.

March 24

MILITARY: General James Wilkinson is sacked as senior commander along the Northern frontier, and replaced by General George Izard, who assumes command of troops at Plattsburg, New York. Meanwhile, General Jacob Brown is ordered to take charge of affairs along the Niagara frontier.

March 26

MILITARY: Former general William Hull is court-martialed for treason, found guilty, and sentenced to death for his August 1812 surrender of Detroit; in light of his service in the Revolutionary War, he is pardoned by President James Madison.

March 27

MILITARY: The Battle of Horseshoe Bend, Alabama Territory, is won by 2,700 American troops under General Andrew Jackson. Jackson was confronted by a large Creek force of 1,300 men and women strongly fortified behind the bend of the Tallapoosa River; after artillery bombardment proves useless, he attacks at bayonet point with the 39th Infantry. Resistance is fierce and Lieutenant Sam Houston is severely wounded, but the Indians are gradually crushed and driven into the river. Across the river, friendly Creek and Cherokee warriors swim to the hostile side and make off with Red Stick canoes. This victory decisively ends the Creek War and makes Jackson a national hero. American casualties are 47 dead and 159 wounded while allied Creek and Cherokee suffer an additional 23 killed and 47 wounded. Creek losses are estimated at 1,000 or more.

March 28

MILITARY: American forces under General Andrew Jackson commence cutting a wide swath of destruction through the heart of Creek territory, burning villages

Engagement between USS *Essex* and the HMS *Phoebe* and the *Cherub*, 28 March 1814, off Valparaíso, Chile
(Naval Historical Foundation)

and crops. Resistance has all but collapsed, but Jackson will refuse all peace overtures until Chief William Weatherford surrenders.

NAVAL: The 38-gun American frigate *Essex* under Captain David Porter, having lost its topsail in a storm, is attacked and defeated by British warships HMS *Phoebe* and *Cherub* off Valparaíso, Chile. American losses are 58 dead, 31 drowned, and 66 wounded to five British killed and 10 injured. Prior to this lopsided engagement, Porter was the first American naval officer to scour the Pacific Ocean for British commerce, and he captured or destroyed nearly 40 whaling vessels. One of the battle's survivors, 13-year-old midshipman David G. Farragut, subsequently rises to admiral during the Civil War.

March 30

MILITARY: At French Mills, New York, General James Wilkinson and 4,000 of his soldiers brave freezing weather to attack the stone fortification at LaColle Mill, Quebec. The small British garrison refuses to budge and easily withstands a bombardment by Wilkinson's light cannon. The Americans incur 254 casualties before the action is suspended. This is one of the most demoralizing setbacks of the war and leads directly to Wilkinson's dismissal.

April 2

MILITARY: In order to compile better scientific information relative to the health of the troops, Physician and Surgeon General of the Army James Tilton orders all medical staff to keep detailed meteorological observations on a daily basis.

**Porter, David (1780–1843)***Naval officer*

David Porter was born in Boston, Massachusetts, on February 1, 1780, the son of a distinguished Revolutionary War sea captain. In 1796 he accompanied his father on a merchant ship to the West Indies, but was accosted by a British warship and briefly impressed. Porter escaped his captors, however, and in 1798 he joined the nascent U.S. Navy as a midshipman. He was assigned to the frigate *Constellation* under Captain Thomas Truxtun and returned to the Caribbean for service during the Quasi-War with France. Porter fought so well during the capture of the frigate *L'Insurgente* that Truxtun appointed him one of the prize masters. He subsequently commanded the schooner *Enterprise* and with it seized the French privateer *Diane*. Porter next fought against the Barbary pirates of North Africa, although he was captured on board the frigate *Philadelphia* when it grounded in Tripoli harbor in October 1803. He was released two years later, rose to master commandant the following year, and in 1808 took charge of the gunboat station at New Orleans, Louisiana. There he adopted his famous stepson, David G. Farragut, and exposed him to the rigors of naval life. Porter's next assignment was leading the 32-gun frigate *Essex*, and in July 1812 he was promoted to captain just as the War of 1812 was commencing.

Porter's first cruise in the *Essex* took him to Nova Scotia and Newfoundland where, on August 13, 1812, he secured the 20-gun sloop HMS *Alert*, the first Royal Navy vessel taken in this conflict. However, the following October Porter made naval history by sailing the *Essex* around

Cape Horn, at the tip of South America, and becoming the first American warship to reach the Pacific Ocean. Porter's task was to destroy the British whaling industry operating there, and he inflicted an estimated \$2.5 million in damage. He also claimed the isle of Nuka Hiva in the Marquesas Island for the United States, renaming it Madison Islands in honor of President James Madison. However, his epic journey came to grief on March 28, 1814, when the *Essex*, which had lost its topmast to a storm, was attacked by HMS *Phoebe* and *Cherub* outside of Valparaiso, Chile, and captured. Porter returned home a national hero and took part in the defense of the nation's capital in August 1814. After the war, he briefly captained Robert Fulton's steam warship *Demologos* at New York, and subsequently joined the new Board of Naval Commissioners to facilitate better administration of the navy. In 1823 he advanced to command the famous "Mosquito Squadron" in the West Indies and patrolled against pirates, but his most notorious act was seizing the Spanish town of Farhardo, Puerto Rico, over an alleged insult to the flag. A court of inquiry leveled a six-month suspension on him, but the hot-tempered Porter resigned his commission to serve as commander in chief of the Mexican navy. In 1830 President Andrew Jackson appointed him a consul general, and he died in that capacity at Constantinople on March 3, 1843. Porter was a skilled sailor who was first to make American sea power felt in the distant reaches of the Pacific.

April 6

MILITARY: Emperor Napoléon I of France is overthrown by an allied coalition; his defeat will make available 14,000 veteran British soldiers, “Wellington’s Invincibles,” for service in America. The War of 1812 is taking a very serious turn for the worse.

April 7

NAVAL: British raiding parties hit Pettipaug, Connecticut, destroying several craft.

April 14

NAVAL: Sailing under a flag of truce, the frigate *John Adams* safely conveys peace commissioners Henry Clay and Jonathan Russell to Wargo Island, Norway.

April 18–19

MILITARY: The Creek War having ended, General Andrew Jackson is ordered by Major General Thomas Pinckney to march the bulk of his force back to Tennessee for immediate discharge. Jackson also receives promotion to brigadier general in the U.S. Army and command of the 7th Military District, replacing an uncooperative General Thomas Flournoy.

April 20

NAVAL: In the Florida Straits, the sloop-of-war *Frolic* under Master Commandant Joseph Bainbridge evades the British frigate *Orpheus* and schooner *Shelburne* for six hours before finally being cornered and forced to surrender.

April 25

NAVAL: Eager to increase economic pressure upon the United States, the British Admiralty extends its blockade to include all of New England. The Royal Navy is becoming a major factor in the near-collapse of the American economy, which finds itself suffering from high inflation, severe shortages, and virtual bankruptcy.

April 29

NAVAL: The American sloop *Peacock* under Master Commandant Lewis War-rington defeats the brig HMS *Epervier* of Captain Richard W. Wales off Cape Canaveral, Florida. The British vessel, conveying \$120,000 in specie, loses eight dead and 15 injured to two American wounded; for his lopsided victory, War-rington receives a congressional gold medal.

May 1

MILITARY: At Plattsburg, New York, the efficient, spit-and-polish general George Izard assumes command of the Right Division. Izard is unique among senior American field commanders in being the only one to have obtained professional military instruction in France. He immediately begins reconstructing an army from the rabble he inherited.

NAVAL: The newly launched sloop of war *Wasp* departs Newburyport, Massachusetts, for a celebrated cruise to the English Channel.

May 6

NAVAL: A quick raid by British land and naval forces under Commodore Sir James Lucas Yeo and General Gordon Drummond on Lake Ontario captures the American depot at Oswego, New York. The British incur heavy losses, while

their objective, several heavy cannon intended for the American fleet at Sacketts Harbor, has already been moved upstream by Lieutenant Colonel George E. Mitchell, 3rd Artillery.

May 11

MILITARY: General William Henry Harrison, angered by the interference of Secretary of War John Armstrong, tenders his resignation. Command of the Northwest Army reverts to Brigadier General Duncan McArthur.

May 12

MILITARY: In a major reorganization, the three regiments of artillery are consolidated into a single Corps of Artillery, consisting of 12 independent battalions of four companies apiece. The two cavalry units are also brought together into a single Regiment of Light Dragoons, while three additional rifle regiments, numbered 2nd to 4th, are also created.

May 22

MILITARY: For his outstanding successes in the Creek War, Andrew Jackson is commissioned a major general in the U.S. Army and receives command of all military forces in the South. This proves to be one of the most fateful appointments in American military history. Moreover, feeling that General Thomas Pinckney would be too generous in his negotiations with the defeated Creek Indians, Jackson arranges for Pinckney's transfer back to South Carolina, while he serves as the chief peace negotiator. In this capacity, he imposes the harsh Treaty of Fort Jackson on the tribes, obtaining millions of acres for the United States.

May 30

MILITARY: A detachment of riflemen under Major Daniel Appling ambushes and captures a large detachment of British sailors and Royal Marines at Sandy Creek, New York. For the loss of one man wounded, the Americans kill, wound, and capture 140 British. The British Lake Ontario fleet, deprived of badly needed manpower, will be forced to relinquish its blockade of Sacketts Harbor. Moreover, a valuable shipload of heavy cannon, destined for Commodore Isaac Chauncey's squadron, remains in American hands.

June 8–10

NAVAL: At St. Leonard's Creek, Maryland, the Chesapeake Bay flotilla of 13 gunboats under Captain Joshua Barney repulses an attack by British barges and runs an enemy schooner aground, raking it severely.

June 12

MARINES: In Maryland, Captain Samuel Miller leads a small force of marines to guard approaches to Washington, D.C., from the Patuxent River.

June 19

NAVAL: On Lake Ontario, Lieutenant Francis H. Gregory and three boatloads of sailors daringly attack and capture the British gunboat *Blacksnake*.

June 22

NAVAL: Off Nova Scotia, the 14-gun brig *Rattlesnake* under Lieutenant James Renshaw is captured by the British frigate HMS *Leander*.

June 26

NAVAL: The Chesapeake Bay flotilla of Captain Joshua Barney, consisting of the cutter *Scorpion*, 13 barges, two gunboats, and one galley, engages the British frigates HMS *Loire* and *Narcissus* on the Patuxent River, Maryland. Despite their superior firepower, both British vessels are obliged to withdraw downstream.

June 28

MILITARY: Lieutenant Colonel Benjamin Forsyth, 1st Regiment of Riflemen, a notorious raider, is killed in a minor skirmish near Odelstown, New York. Apparently, he refused to retreat and lure British light troops into an ambush; instead he stood and fought, being fatally shot by an Indian.

NAVAL: The new 18-gun sloop *Wasp* under Master Commandant Johnston Blakely engages and defeats the 18-gun British brig HMS *Reindeer* under Captain William Manners in a 19-minute action. The Americans sustain five dead and 21 wounded to a British tally of 25 killed and 42 wounded. *Reindeer* is badly damaged and deliberately sunk by the victors.

July 1

NAVAL: On Lake Ontario, daring Lieutenant Francis H. Gregory and his crew land at Presque Isle (Erie), Pennsylvania, and burn a 10-gun schooner on the stocks, and then escape.

July 3

MILITARY: The Left Division under General Jacob Brown crosses the Niagara River and captures Fort Erie, Ontario.

- Lieutenant Colonel George Croghan sails from Detroit, Michigan Territory, with 700 men drawn from the 17th, 19th, and 24th Infantries; they make for strategic Mackinac Island, which has been in British hands since August 1812.

NAVAL: A small squadron under Captain Arthur Sinclair is assigned to transport troops from Detroit, Michigan, to Mackinac Island on Lake Michigan.

July 5

MILITARY: The Battle of Chippewa is won by the Americans when British forces under General Phineas Riall attack General Jacob Brown's encampment behind Chippewa Creek, Ontario. The British light troops have no difficulty stampeding the militia brigade of General Peter B. Porter; then they encounter the crack brigade of General Winfield Scott and a formal engagement unfolds. Riall, noticing that Scott's men are dressed in gray cloth, assumes they, too, are militia, but the Americans quickly outmaneuver and outflank their veteran adversaries. The Americans lose 60 dead and 235 wounded to a British tally of 148 killed and 321 wounded. This is the first triumph of American forces over the British on an open field and is proof of America's growing military professionalism.

July 14

NAVAL: In a rare victory, gunboat *No. 88* under Sailing Master G. Clement, attacks and captures the British schooner *Chebacque* off the New England coast.

July 19

MILITARY: On the Mississippi River, a flotilla of small craft under Captain John Campbell, 1st Infantry, comes under heavy attack from Indians lining the shore.

Campbell's 33-man detachment, assisted by 66 U.S. Rangers, uses swivel guns on their boats to repel their antagonists, but are forced back to St. Louis with more than 30 killed and wounded. Campbell had earlier been dispatched to assist the garrison of Fort Shelby, Wisconsin Territory.

July 20

MILITARY: Fort Shelby, constructed at distant Prairie du Chien, Wisconsin Territory, surrenders to British and Indian forces after a three-day siege. To prevent any Indian atrocities against prisoners, Lieutenant Joseph Perkins, 24th Infantry, is paroled and allowed to depart with his company under a Canadian escort.

NAVAL: Commodore Arthur Sinclair leads a small amphibious expedition from Detroit, Michigan, and on to Lake Huron. His goal is to recapture the strategic fur trading post of Mackinac, lost in the early days of the war; but on this day, he burns the British trading post at St. Joseph's.

July 25

MILITARY: The Battle of Lundy's Lane is fought between the divisions of General Jacob Brown (2,800 men) and General Sir Gordon Drummond (3,200). The engagement commences when the brigade of General Winfield Scott attacks Lundy's Lane, driving back the force of General Phineas Riall but running afoul of reinforcements brought up by Drummond. The Americans then take a pounding until Brown brings up the rest of his force, the regular brigade of General Eleazar W. Ripley and militia under General Peter B. Porter. Ripley manages to storm the British battery at the top of the lane, and a swirling fight continues around it. At length, both sides withdraw with heavy losses, although Drummond will manage to return at daybreak and claim the victory. The Americans lose 171 dead, 571 wounded, and 110 missing to a British tally of 84 killed, 559 injured, and 235 captured. Lundy's Lane is another fine performance by the Americans, but they cannot replace their losses as readily as Drummond. Brown, seriously wounded, orders a withdrawal to Fort Erie.

July 31

NAVAL: Master Commandant Jesse D. Elliott, directing the 16-gun schooner *Sylph*, runs the British schooner *Magnet* ashore on Lake Ontario, burning it.

August 3

MILITARY: To facilitate the capture of Fort Erie, General Gordon Drummond orders 700 picked light infantry to cross the Niagara River at night and capture the main American depot at Buffalo, New York. En route, the raiders encounter Major Ludowick Morgan, commanding 300 elite riflemen from the 1st and 4th Regiments, who handily repulse them at Conjocta Creek. The British incur 30 casualties before withdrawing at sunrise.

August 4

MILITARY: Lieutenant Colonel George Croghan disembarks his 700 men on Mackinac Island and advances inland, meeting stiff resistance from British, Canadians, and Indians. The Americans suffer heavy casualties, then withdraw to their boats. Mackinac will remain in British hands until the end of the war.

August 9

INDIAN: By the terms of the Treaty of Fort Jackson, the Creeks end their war and cede 23 million acres of land to the United States. Unfortunately, the treaty terms also apply to the friendly Indians who fought on behalf of the Americans.

August 12

NAVAL: On Lake Erie, just outside of Fort Erie, Upper Canada, a British cutting-out expedition under Captain Alexander Dobbs successfully storms the American schooners *Somers* and *Ohio*, and sails them off. A third vessel, the *Porcupine*, cuts its cables and drifts to safety. However, this success removes potent American firepower from the right flank of British land forces operating on the shore and induces General Gordon Drummond to assail the fort.

August 14

MILITARY: British forces under General Gordon Drummond besiege Fort Erie, Ontario, then attack in force at night. The Americans, commanded by General Edmund P. Gaines, are alert for such a move and heavily repulse the attacking columns. Disaster strikes when British troops storm the fort itself and accidentally touch off a gunpowder magazine. The ensuing explosion completely ends Drummond's attack. British losses are nearly 1,000—the Americans suffer less than 100 killed and wounded.

NAVAL: A second British naval squadron under Admiral Sir Alexander Cochrane, escorting transports carrying 5,400 Napoléonic war veterans under Major General Robert Ross, enters Chesapeake Bay and prepares for an amphibious descent on the American capital.

August 19

MILITARY: A British army of 4,000 men under General Robert Ross lands unopposed at Benedict, Maryland, before proceeding overland to Washington, D.C. Ross's first goal is to attack and destroy the gunboat flotilla of Commodore Joshua Barney, presently anchored in the Patuxent River, before pressing on to the American capital.

August 22

NAVAL: Commodore Joshua Barney blows up his Chesapeake Bay Flotilla on the Patuxent River, Maryland, to prevent its capture by British forces. His 400 sailors and marines subsequently join land forces defending Washington, D.C.

August 24

MILITARY: The Battle of Bladensburg turns into a disastrous defeat for the Americans under General William H. Winder. Winder possesses 7,000 poorly trained and positioned militia, which crumple under an assault by 4,000 of General Robert Ross's veteran troops. Only a small contingent of U.S. Marines and sailors under Commodore Joshua Barney makes effective resistance before being overrun. American losses are 12 dead and 40 wounded to 249 for the British. The result is so disgraceful that the conflict will become derided as the "Bladensburg Races." The American capital now lays at the mercy of the invader, and President James Madison becomes the first commander in chief exposed to enemy gunfire.

NAVAL: British-born captain Thomas Tingey sets fire to the Washington Navy Yard rather than have it fall to advancing British forces. The fires consume frigates *Boston*, *Columbia*, *General Greene*, and *New York*, along with two ships under construction.

MARINES: The only high point in the disaster at Bladensburg is when a battery manned by 103 marines under Captain Samuel Miller makes a valiant stand, after the militia flees, and repels several British advances before being overrun. Their commander, Commodore Joshua Barney, is wounded and captured.

August 25

MILITARY: British forces under General Robert Ross burn all public buildings in Washington, D.C., ostensibly for the destruction of York, Ontario, in April 1813. They then withdraw unmolested to Admiral George Cockburn's waiting fleet.

August 26

MILITARY: In one of the war's major miscalculations, Secretary of War John Armstrong orders General George Izard to march his Right Division from Plattsburg, New York, to the Niagara frontier to assist the Left Division of General Jacob J. Brown besieged at Fort Erie. Izard protests the order, fearing that Governor general Sir George Prevost is about to invade from Canada, but he has little choice but to comply. This move effectively neutralizes the largest body of U.S. Army regulars trained during the war: 4,500 men. Plattsburg is now defended by 1,500 soldiers and invalids under General Alexander Macomb, who begins soliciting militia troops from neighboring Vermont.

NAVAL: A British squadron passes up the Potomac River and bombards Fort Warburton, Maryland. The outgunned garrison evacuates the post and a lucky shot touches off its gunpowder magazine, destroying the fort.

August 27

MILITARY: President James Madison and some of the American government drift back into the burned-out remains of Washington, D.C. Secretary of War John Armstrong, who is held largely responsible for the debacle, is soon forced from office and replaced by James Monroe.

August 28

MILITARY: British forces land and occupy Alexandria, Virginia, then offer the town a truce in exchange for ransom and supplies. City officials readily acquiesce and even demand that militia reinforcements en route to them remain out of town until the enemy withdraws.

August 30

MILITARY: British forces under General Robert Ross march overland and return unopposed to Benedict, Maryland, where they reembark on the waiting fleet.

- A British naval detachment from the frigate HMS *Menelaus* encounters the 21st Maryland Infantry at Caulk's Field and attacks in the darkness. The militia, well commanded by Colonel Philip Reed, responds with musketry and artillery fire and the British withdraw with heavy loss, including their commander, Captain Sir Peter Parker.

August 31

MILITARY: Governor-General Sir George Prevost leads 8,000 crack British troops from Canada and down the Lake Champlain Valley. This is the largest military endeavor on the northern frontier, and the Americans are ill-prepared to contain it.

September 1

MILITARY: British amphibious forces land at and occupy the mouth of the Castine River, Maine, then march overland to capture Castine and Bangor. They easily brush aside local militia and chase Captain Charles Morris and the 28-gun frigate *Adams* upstream to Hampden.

NAVAL: The *Wasp* under Captain Johnston Blakeley engages and sinks the 18-gun British brig HMS *Avon* at night in the mid-Atlantic. Blakeley loses two dead and one wounded; British casualties are 10 killed and 12 wounded.

MARINES: Batteries manned by marines and sailors at White House, Virginia, bombard a British squadron as it passes leisurely down the Potomac River.

September 3

NAVAL: Captain John Morris is forced to burn the 28-gun frigate *Adams* at Hampden, Maine, in order to prevent its capture. His crew will escape overland back to Boston.

- A British cutting-out expedition under Lieutenant Wolseley captures the American schooners *Tigress* and *Scorpion* on Lake Huron.

September 5–6

MILITARY: On the Mississippi River, Major Zachary Taylor lands 350 men of his 7th Infantry on Credit Island to sit out a storm, ignorant of the 1,200 Sac and Fox under Chief Black Hawk lurking in the nearby woods. At dawn on the 6th, the Indians attack the unsuspecting Americans and drive them back downstream with the assistance of some British artillery.

September 6

MILITARY: A force of 250 soldiers under Major John Ellis Wool, 29th Infantry, assisted by 100 riflemen under Lieutenant Colonel Daniel Appling, 1st Regiment of Riflemen, engages a large British column marching south along the Beekmantown Road, New York. The Americans are gradually forced back by sheer numbers, but not before inflicting several casualties on their antagonists.

September 10

MILITARY: At Plattsburgh, New York, Captain George McGlassin leads a party of 60 volunteers from his 15th Infantry and boldly attacks a British rocket battery across the Saranac River. The defenders scatter, the battery is gutted, and McGlassin completes his mission without a single casualty.

September 11

MILITARY: A force of 1,500 regulars and a similar number of militia under General Alexander Macomb make a gallant stand at Plattsburgh, New York, against 8,000 Spanish Peninsula War veterans under Governor-General Sir George Prevost. The Americans put up fierce resistance from their forts but are on the verge

Print depicting the Battle of Lake Champlain (Battle of Plattsburgh) (*Library of Congress*)

of being outflanked when Prevost, informed of his defeat upon Lake Champlain, cancels the attack.

NAVAL: The Battle of Lake Champlain unfolds as a large British squadron under Captain George Downie rounds Plattsburgh Bay and sails directly into a clever ambush set by Master Commandant Thomas Macdonough. Downie is killed early on and Macdonough is twice knocked unconscious by falling debris before he orders his entire force rotated by spring lines, which brings the undamaged sides of his warships to bear. For the second time in the war, an entire British squadron has been captured. American losses are 52 dead and 59 wounded to a British tally of 84 killed and 100 wounded. Downie's loss is also a considerable strategic victory for the United States in that it forces Governor-General Sir George Prevost to withdraw his invading army into Canada.

September 13–14

MILITARY: The Battle of Baltimore begins as General Robert Ross is shot down by snipers while advancing upon the city, and the British attack is then commanded by Colonel Arthur Brooke. American militia under General John Stricker then make a determined stand at North Point for several hours before being driven into the city's fieldworks. The victorious 4,500 British are badly outnumbered by 15,000 defenders under General Samuel Smith, and Brooke declines to press the attack. He then orders his army withdrawn to their fleet.

NAVAL: Warships of Admiral Sir George Cockburn's armada slip into bombardment positions off Baltimore and pour a heavy fire into Fort McHenry, garrisoned

**Macdonough, Thomas (1783–1825)***Naval officer*

Thomas Macdonough was born in New-castle, Delaware, on December 31, 1783, and he joined the U.S. Navy as a midshipman in February 1800 at the age of 16. He subsequently completed several Caribbean cruises on board the ship *Ganges* during the Quasi-War with France and assisted in capturing three enemy vessels. Macdonough was retained in the peacetime establishment and was further tutored in the art of command by Captain Alexander Murray of the frigate *Constellation*. He next fought in the Tripolitan War and, on February 16, 1804, assisted Lieutenant Stephen Decatur storm and burn the captured vessel *Philadelphia*. Macdonough finally rose to lieutenant in 1807 and spent several years constructing gunboats at Middletown, Connecticut, before obtaining a furlough in 1810 to sail a merchant ship to the West Indies. He resumed active duty just shortly before the War of 1812 commenced. He served variously at the Washington Navy Yard and the Portsmouth Navy Yard, but in October 1812 received the fateful assignment as commander of naval forces on Lake Champlain. From his headquarters at Shelburne, Vermont, Macdonough was tasked with building and equipping a squadron of warships from scratch to keep control of the strategic waterway out of British hands. However, in the spring of 1813 the sloops *Eagle* and *Growler* were lost in combat and gave the British de facto control of the lake. Undeterred, Macdonough set about constructing new vessels and, throughout the summer

of 1814, Lake Champlain was the scene of a heated construction contest.

In the fall of 1814, the Champlain region became the focus of a huge British invasion of New York by Governor-General Sir George Prevost and 8,000 veterans of the Napoléonic wars. The effort was backed by a large British squadron commanded by Captain George Downie of the 37-gun frigate *Confiance*, whose total force mustered three vessels, 13 galleys, and an aggregate of 95 guns. Macdonough, by comparison, could muster only four smaller vessels and 10 galleys mounting 85 guns, so he prepared an elaborate ambush for his adversary. He determined to fight Downie within the confines of Plattsburgh Bay, where British vessels could not maneuver to advantage; also, he equipped his vessels with “springs” that enabled them to rotate on their anchors, thereby bringing undamaged portions of each warship to bear. When the Battle of Lake Champlain unfolded on September 11, 1814, Downie fell into the American trap and the British were completely defeated. This was only the second time in history that an entire British squadron surrendered and was one of the War of 1812’s few strategic victories, for it forced Prevost to withdraw his army back into Canada. Macdonough continued serving capably until his death at sea on November 10, 1825. His victory on Lake Champlain saved the United States from the ravages of invasion and is regarded as one of history’s most decisive naval engagements.

by 1,000 troops and militia under Major George Armistead. He commands a mixed force of detachments drawn from the 12th, 14th, 36th, and 38th Infantries, along with gunners of the Corps of Artillery. The attack proves ineffectual, and by dawn of the next day the garrison's huge American flag is seen waving defiantly in the distance. Despite having over 1,000 rounds fired at him, Armistead's loss is only four killed and 20 wounded. On an important side note, Francis Scott Key, a lawyer visiting the British fleet to release a prisoner, is so moved by the bombardment of Fort McHenry, and the striking imagery it presents, that he composes the poem "Star Spangled Banner" on the back of an old envelope. It will eventually be set to music and later adopted as the national anthem.

September 16

MILITARY: Major William Lawrence, commanding Fort Bowyer, Mobile Bay, with its garrison of 160 soldiers of the 2nd Infantry, engages a British squadron sailing into gun range. The ships are badly bested by the American gunners, losing the sloop HMS *Hermes* in a one-sided exchange.

NAVAL: In Baratavia Bay, Louisiana, Commodore Daniel T. Patterson's squadron, consisting of the schooner *Carolina* and six gunboats, attacks the holdout of notorious pirate Jean Lafitte at Grand Terre. The pirates flee into the surrounding swamp and 11 of their vessels are captured.

September 17

MILITARY: A sortie from Fort Erie occurs when General Jacob J. Brown, having recovered from wounds received at Lundy's Lane, decides to attack the British siege positions. He details several columns of regulars and militia under General Peter B. Porter to move forward under cover of a rainstorm, and they successfully storm three of four British batteries. General Sir Gordon Drummond then counterattacks and drives the Americans back into the fort, but the damage is done. Losses are roughly 600 British to 500 American, but Brown has lost the talented engineering officer, Brevet Lieutenant Colonel Eleazar D. Wood. The weather worsening, Drummond makes preparations to abandon the siege.

September 21

NAVAL: The American sloop *Wasp* under Captain Johnston Blakeley captures the British brig *Atalanta* at sea; this is the first of 15 prizes taken before the *Wasp* will suddenly vanish at sea.

September 24

NAVAL: Lieutenant Isaac McKeever, commanding gunboat *No. 5*, captures a pirate vessel off Southwest Pass, Louisiana.

September 25–26

NAVAL: A British squadron en route to New Orleans, consisting of HMS *Plantagenet*, 74 guns, *Rota*, 38 guns, and *Carnation*, 18 guns, decides to attack the 8-gun American privateer *General Armstrong*, anchored at Fayal in the neutral Azores. Captain Samuel Chester Reid, however, is well prepared and repulses several boat attacks with heavy losses. Hopelessly outnumbered, Reid then scuttles his ship rather than surrender. The damage inflicted detains the British force for several weeks, hindering its offensive against New Orleans.

September 27

MILITARY: In Washington, D.C., John Armstrong resigns as secretary of war for failing to adequately prepare the capital for attack. Secretary of State James Monroe once again fills in as acting secretary.

- At Mobile, Alabama Territory, General Andrew Jackson requests that the governors of Tennessee, Mississippi, and Kentucky call up their militia in anticipation of a major British offensive, most likely from Pensacola, Florida. Runners are also sent to friendly Creek, Choctaw, and Cherokee tribes, soliciting the use of warriors.

October 5–16

MILITARY: The militia brigade of Brigadier General John Coffee travels 220 miles from Tennessee and arrives at Camp Gaines, Mississippi Territory, in only 10 days. Finding his men raw, he trains them en route before joining General Andrew Jackson's main army.

October 9

NAVAL: Master Commandant Johnston Blakeley and the sloop of war *Wasp* vanish in the Atlantic after hailing a Swedish vessel.

October 17

MILITARY: General Duncan McArthur departs Detroit, Michigan, at the head of 650 mounted Kentuckians, rangers, and Indians, intending to raid western Upper Canada as far as the Grand River. He seeks to provide a useful diversion to assist General George Izard's division at Niagara.

October 19

MILITARY: The 900-man brigade of General Daniel Bissell advances down Chippewa River as far as Lyon's Creek, Ontario, where it is attacked by 750 British commanded by Lieutenant Colonel Christopher Myers. Bissell, by dint of adroit maneuvering, forces his opponent back, burns nearby Cook's Mills, and retires to Fort Erie. American losses are 12 dead and 55 wounded to a British tally of one dead and 35 injured. Significantly, this is the last clash between regular forces in Canada and a modest American victory.

October 29

NAVAL: Robert Fulton launches the *Demologos* ("Voice of the People"), history's first armored, steam-powered warship, at New York City. It is 153 long, 56 feet across the beam, and weighs 2,475 tons. It is actually a catamaran with two hulls joined together and a steam paddle mounted between them; it also mounts 30 32-pound cannon and two 100-pound Columbiads (super-heavy cannon). The vessel is subsequently christened *Fulton the First* to honor the inventor after he dies the following spring. This visionary vessel will remain on the navy list until June 1829, when it is destroyed by a fire.

November 5

MILITARY: General George Izard orders Fort Erie, Upper Canada, blown up while American forces evacuate Canadian soil and cross the Niagara River back to Buffalo, New York. This formally signals the end of campaigning in Canada. Izard will be savaged in the press for abandoning enemy soil.

November 6

MILITARY: The roving cavalry column of General Duncan McArthur, alerted that General George Izard has crossed back to New York, turns south from the Grand River and makes for Malcolm's Mills, Upper Canada. There his troopers disperse a large body of Canadian militia, taking several prisoners at the cost of one dead. After burning some local mills and grain supplies, he spurs his horses back to Detroit, arriving there on November 17.

November 7–8

MILITARY: Acting against the wishes of Secretary of War James Monroe, General Andrew Jackson attacks and captures Pensacola, Florida, from Spanish forces. He commands a mixed force of militia and regulars, including elements of the 3rd, 39th, and 44th Infantries. Resistance is timorous, and the Americans sustain only five killed and 11 wounded. Jackson's victory forces British warships in the harbor to demolish two local forts and immediately put to sea.

November 15

NAVAL: A sweeping naval reorganization scheme advanced by Secretary of the Navy William Jones calls for construction of several ships of the line, standardization of ordnance and equipment, a draft for seamen, a board of inspectors, and a national naval academy.

November 22

MILITARY: General Andrew Jackson, convinced that New Orleans is the actual target of a British offensive, hastily departs Pensacola, West Florida, and marches for that city. En route he instructs newly released Brigadier General James Winchester to reinforce Mobile with the 2nd, 3rd, and 39th Infantries.

November 26

NAVAL: A British fleet conveying 7,500 veterans of the Napoléonic Peninsula War under General Edward Pakenham, the duke of Wellington's brother-in-law, departs Jamaica for New Orleans, Louisiana, whose capture would ensure British control of the Mississippi River—and a stranglehold on the American economy.

December 1

MILITARY: American forces under General Andrew Jackson, marching hastily from Pensacola, Florida, arrive at New Orleans, Louisiana, slightly ahead of the British.

NAVAL: William Jones, pleading exhaustion, resigns as secretary of the navy.

December 8

MILITARY: In a final swipe at hostile Creek, Major Uriah Blue takes part of the 39th Infantry on a raid against Indian villages in West Florida. Little resistance is encountered and the Americans retire without incident.

NAVAL: A huge British armada under Admiral Sir Thomas Cochrane anchors off Chandeleur Island near the mouth of the Mississippi River. On board he conveys the 8,000-man army of General Sir Edward Pakenham, destined for New Orleans.

December 13

MILITARY: General Andrew Jackson declares martial law in Louisiana upon learning of the British approach through Lake Borgne.

NAVAL: On Lake Borgne, Louisiana, Sailing Master William Johnson burns his tender *Sea Horse* after repelling an attack by seven British barges.

December 14

NAVAL: A British force of 42 armed boats, crammed with troops, attacks the six gunboats of Lieutenant Thomas ap Catesby Jones on Lake Borgne, Louisiana, capturing them. The Americans resist tenaciously but are gradually overwhelmed with a loss of six dead, 35 wounded, and 86 captured, including Jones. British casualties total 17 killed and 77 wounded; the extent of these losses delays their approach to New Orleans by nine days.

December 19

NAVAL: Benjamin W. Crowninshield of Salem, Massachusetts, is sworn in as the fifth secretary of the navy.

December 23–24

MILITARY: An American force of 2,000 regulars and militia under General Andrew Jackson attacks 1,600 British encamped along Villere's Plantation, Louisiana, at night. The attack is fiercely pressed but darkness, confusion, and a prompt response from crack British troops push the Americans back. British general John Keane is nonetheless convinced that he is badly outnumbered and suspends his advance upon New Orleans until reinforcements arrive. This respite allows Jackson to perfect his defenses below New Orleans and await their approach. Losses are 215 Americans and 275 British killed, wounded, and captured.

NAVAL: Master Commandant John T. Henley and his 14-gun schooner *Carolina* drop down the Mississippi River and bombard the British encampment at Villere's Plantation, Louisiana. Shooting at camp fires, his heavy fire and good marksmanship sow confusion in the enemy's ranks.

MARINES: A company of marines is in the thick of the fighting at Villere's Plantation; at one point they charge to save the American artillery from capture.

December 24

DIPLOMACY: American and British diplomats conclude the Treaty of Ghent, which ends the War of 1812 and restores all captured territory. The matter of impressment, irrelevant since the fall of Napoléon Bonaparte, remains unmentioned. However, news of the signing will not reach New York for another seven weeks, so fighting continues on land and at sea.

December 27

NAVAL: British gunners firing red-hot shot manage to sink the 14-gun schooner *Carolina* in the Mississippi River, further clearing their way to advance upon New Orleans.

December 28

MILITARY: British forces outside New Orleans begin probing General Andrew Jackson's line along the Rodriguez Canal and are thrown back by accurate rifle and artillery fire.

December 29–31

NAVAL: Commodore Daniel T. Patterson directs that cannon from his remaining vessel, the 16-gun sloop *Louisiana*, be landed on the west bank of the Mississippi, opposite General Andrew Jackson's defensive line.

1815

January 1

MILITARY: At New Orleans, British artillery under General Sir Edward Pakenham again begin bombarding American defenses under General Andrew Jackson. They are eventually bested after a lengthy, four-hour exchange, then cease fire.

January 2

MILITARY: A brigade of poorly trained and equipped Kentucky militia arrives to reinforce General Jackson at New Orleans. They are posted on the opposite bank of the Mississippi River, seemingly out of harm's way.

January 5

MILITARY: In Washington, D.C., General Winfield Scott gains appointment as head of a new tactical board tasked with compiling a standardized system of military drill, which has been conspicuously lacking in the War of 1812. Within a month, they promulgate a treatise entitled *Rules and Regulations for the Field Exercise and Maneuvers of Infantry*. This constitutes the first official drill manual since von Steuben's *Blue Book* of the Revolutionary War.

January 6

NAVAL: A 38-man boat party under Sailing Master William Johnson attacks and captures the British 4-gun brig HMS *Cyprus* on Lake Borgne, Louisiana, capturing clothing intended for the army of General Edward Pakenham.

January 8

MILITARY: The Battle of New Orleans unfolds when British forces under General Sir Edward Pakenham attack the entrenched American position under General Andrew Jackson and are bloodily repulsed. British forces on the west bank enjoy better success and completely scatter Kentucky militia gathered there, but the victory comes too late to help the main assault. Pakenham is killed and nearly 2,000 of his men become casualties in a few minutes; incredibly, Jackson suffers only 13 killed, 39 wounded, and 19 missing. This is the largest battle of the War of 1812, although it transpires two weeks after the Treaty of Ghent has been signed. The British are allowed to withdraw through the swamps unmolested.

January 9–18

MILITARY: The American garrison of Fort St. Phillip, on Plaquemmes Bend, 70 miles below New Orleans, withstands a rigorous bombardment by a strong Royal Navy squadron. The British toss nearly 1,000 projectiles at the defenders, who suffer only two dead and seven wounded.

January 13

MILITARY: A force of Royal Marines and a West Indian regiment land at Point Petre, Georgia, driving off an American garrison consisting of 80 men of the 1st Regiment of Riflemen and a company of the 42nd Infantry. The victorious British spike several cannon, then withdraw to their ships.

January 13–15

NAVAL: The 44-gun American frigate *President* under Captain Stephen Decatur is accosted by a four-ship British squadron 50 miles off Sandy Hook, New Jersey. Decatur's ship has been badly damaged after a storm at sea and was repeatedly

Jackson, Andrew (1767–1845)

Army general, president

Andrew Jackson was born in Waxhaw, South Carolina, on March 15, 1767, the son of an impoverished Irish immigrant. He sided with the Patriots during the American Revolution and was captured; after refusing to shine a British officer's boots, he was slashed across the head with a sword. Thereafter Jackson harbored an inveterate hatred of all things British. Orphaned at 14, he relocated to Tennessee, studied law, and established a successful practice. Jackson also evinced interest in military affairs, so in 1802 he served as a major general of militia. When the War of 1812 commenced, he readily offered his services to President James Madison, but a proposed expedition to Spanish West Florida was cancelled due to the intrigues of General James Wilkinson; Jackson was forced to return to Tennessee, angry and embittered. He also became embroiled in a duel with the Benton brothers and was badly wounded in a street brawl. However, once the Creek War

erupted in August 1813, Jackson ignored his wounds and took to the field. A lion in combat, he orchestrated two crushing defeats of the Indians at Tallusahatchee and Talledega that November, but his offensive stalled due to supply shortages and a threatened mutiny. His attempt to resume campaigning was rebuffed at the Battles of Emuckfau and Enotachopco in January 1814, and he spent the next two months gathering more men and supplies. Jackson finally cornered the Creek at Horseshoe Bend on March 27, 1814, crushing them and imposing the harsh Treaty of Fort Jackson upon them, whereby they ceded 23 million acres of land to the United States. In light of his sterling service, Jackson was also made a major general in the U.S. Army and placed in command of the 7th Military District, headquartered at New Orleans.

By December 1814, Jackson was apprised that the British intended a major

hurlled against a sand bar. He nonetheless manages to defeat and disable HMS *Endymion* before finally succumbing to three additional warships. Decatur's losses are 24 dead and 56 wounded; the British sustain 25 casualties.

January 19–21

NAVAL: Purser Thomas Shields, commanding a force of six boats and 50 men, captures two British schooners and several small craft on Lake Borgne, Louisiana.

January 23

MILITARY: General Andrew Jackson marches his victorious army back to New Orleans, although celebrations are muted when he maintains martial law through March.

January 29

NAVAL: Lieutenant Lawrence Kearny, commanding 25 men and three barges, attacks and captures a British tender off North Edisto, North Carolina.

amphibious assault against New Orleans to gain control of the Mississippi River. He then learned that British troops had occupied Villere's Plantation, 12 miles north of the city, and on the night of December 23, 1814, Jackson launched a vicious night attack that was repelled but forced the British commander to pause. This gave Jackson's militiamen enough time to regroup and occupy the Rodriguez Canal near the city, assisted by pirates under Jean Lafitte. On January 7, 1815, the main British force under General Edward Pakenham directly assaulted Jackson's line and was badly repulsed, losing 2,000 men in under an hour. This was the biggest American victory of the War of 1812, although the conflict had ended two weeks earlier with the signing of the Treaty of Ghent. Nonetheless, Jackson became a national hero, and in 1828 and 1832 he parlayed his popularity into victorious presidential campaigns. This gave rise to the so-called Jacksonian Era, or Age of the Common Man, in which popular democracy flour-

Andrew Jackson (*Library of Congress*)

ished. Jackson died on his plantation in Tennessee on June 8, 1845, a frontier icon to a generation of Americans.

February 7

NAVAL: A three-man board of naval commissioners is created by Congress to assist the secretary of the navy in administering his charge. They are to help build, equip, and repair all naval vessels. The three senior officers chosen, Isaac Hull, David Porter, and John Rodgers, are all confirmed by the Senate.

February 8–12

MILITARY: In Washington, D.C., Congress passes legislation authorizing a colonel of the Ordnance Department to begin inspection procedures on all weapons acquired by the U.S. Army.

- The survivors of General Edward Pakenham's army land outside Fort Bowyer on Mobile Bay, Alabama Territory, and commence siege operations. Major William Lawrence, commanding 370 men of his 2nd Infantry, is vastly outnumbered and finally surrenders once the British trenches are within a few yards of the

fort. On the following day, news of peace will arrive and all prisoners will be exchanged.

February 11

DIPLOMACY: Word of the Treaty of Ghent, signed the previous Christmas eve, finally reaches the United States and causes wild outbursts of celebration.

February 15

NAVAL: With peace at hand, Secretary of the Navy Benjamin Crowninshield cancels a second steam-powered warship.

February 17

DIPLOMACY: The Treaty of Ghent is formally ratified by the Senate, leaving President James Madison to declare that the War of 1812 is over. Impressment, the leading cause of that conflict, is never mentioned.

February 20

NAVAL: Unaware of peace, the 44-gun American frigate *Constitution* under Captain Charles Stewart engages and artfully defeats and captures the British warships HMS *Cyane* and *Levant* off Madeira. American losses are three dead and 12 wounded, while the British lose 19 killed and 42 wounded.

February 21

MILITARY: At Mobile, Alabama Territory, six mutinous Tennessee militiamen are shot by firing squad with the approval of General Andrew Jackson. Their deaths serve as a potent political issue when Jackson runs for the presidency in 1824 and 1828.

February 27

NAVAL: As part of peacetime entrenchment, Congress orders the navy's gunboat flotilla sold off while all warships on the Great Lakes are docked and placed in ordinary (storage).

March 2

DIPLOMACY: The United States declares war against Algiers over its resumption of attacks upon American commerce in the Mediterranean. The dey has resumed his depredations to secure larger tribute from the Americans.

MILITARY: Acting Secretary of War James Monroe, who is concurrently secretary of state, resigns from office and is replaced by Secretary of the Treasury Alexander J. Dallas.

March 3

MILITARY: President James Madison had previously requested a peacetime establishment of 20,000 men, but Congress approves a new force only half that size, 10,000, under two major generals and four brigadier generals. Only eight infantry regiments, a regiment of riflemen, and the Corps of Artillery are retained, but represent twice the authorized manpower of Thomas Jefferson's day and signal an increased political accommodation of the army. The Regiment of Light Dragoons is abolished completely, and the army will not possess a standing cavalry unit until 1833.

NAVAL: Congress, angered by depredations against American commerce by the dey of Algiers, authorizes the use of naval force against that kingdom. Apparently

the dey feels that he has not been receiving adequate levels of tribute from the United States and has resumed seizing ships and crews.

March 23

NAVAL: The 18-gun American sloop *Hornet* under Captain Thomas Biddle attacks and captures the 19-gun British sloop HMS *Penguin* off Tristan da Cunha in the South Atlantic. Word of peace has yet to reach the combatants; American losses are one dead and one injured to 10 British killed and 28 wounded.

April 15

NAVAL: Secretary Benjamin W. Crowninshield orders Commodore Stephen Decatur, Jr., to assemble a squadron, sail it to the Mediterranean, and capture any Algerian ships within his grasp.

May 1

MILITARY: The country is organized into northern and southern military divisions, headed by Major Generals Jacob J. Brown and Andrew Jackson, respectively.

May 10

NAVAL: Commodore Stephen Decatur assumes control of a nine-ship armada (three frigates and six smaller vessels) tasked with ending piratical raids by the rulers of Algiers. His mission is to establish peace in the Mediterranean with force, if need be.

May 20

NAVAL: Fully outfitted, Commodore Stephen Decatur, Jr., sails from New York at the head of a nine-ship squadron and makes directly for the Mediterranean to deal with the Algerian pirates.

June 17

NAVAL: The American squadron of Commodore Stephen Decatur, Jr., captures the 44-gun Algerian frigate *Mashuda*, killing Admiral Rais Hamida and 30 Muslim sailors in the process; another 406 become captives. The navy is assisted by Captain Samuel B. Archer's company, Corps of Artillery, serving aboard Decatur's flagship *Guerriere* as gunners.

June 19

NAVAL: The 22-gun Algerian brig *Estido* falls prey to the Mediterranean Squadron under Commodore Stephen Decatur, Jr., losing 23 dead and eight captured.

June 28–30

NAVAL: Commodore Stephen Decatur, Jr. arrives at Algiers at the head of his squadron and comes ashore to assist American consul-general William Shaler in commencing peace negotiations. The dey, awed by American strength, agrees to release all prisoners and vessels, renounce any claim of tribute from the United States, and pay a \$10,000 indemnity.

June 30

NAVAL: The last action of the War of 1812 unfolds when the 18-gun sloop *Peacock* under Master Commandant Lewis Warrington engages and defeats the 14-gun East India Company brig *Nautilus* in the Straits of Sunda (Indonesia). Once War-

rington is informed that hostilities have ceased, he releases the *Nautilus*; British losses are six killed and eight injured.

July 3

NAVAL: Commodore William Bainbridge departs Boston, Massachusetts, at the head of a nine-ship squadron and sails for the Mediterranean to relieve Commodore Stephen Decatur, Jr.

July 9

MILITARY: In a quest to further enhance professionalism, the government dispatches Brevet Major General Winfield Scott to Europe, where he will study and report on military establishments observed there.

July 14

NAVAL: The brig *Epervier* under Lieutenant John T. Shubrick passes Gibraltar on its voyage back to the United States and disappears shortly afterward.

July 26–30

NAVAL: The Mediterranean Squadron of Commodore Stephen Decatur drops anchor at Tunis harbor, where he forces the dey to sign an agreement to stop harassment of American commerce at sea. Tunis is also forced to pay \$46,000 in restitutions for allowing the British to seize American vessels in its waters during the War of 1812.

August 1

MILITARY: Acting Secretary of War Alexander J. Dallas resigns and is replaced by Georgia politician William H. Crawford.

August 5–9

NAVAL: Commodore Stephen Decatur and his Mediterranean Squadron make a port call at Tripoli and induce the pasha to sign a treaty that halts attacks on American shipping, frees all hostages without ransom, and ends all tribute payments. Tripoli also pays \$25,000 in compensation for vessels it allowed Great Britain to seize in its waters during the War of 1812.

September

MILITARY: Colonel Thomas Adams Smith transfers his elite Regiment of Riflemen to St. Louis, Missouri Territory, where it will figure prominently in exploration and fort building along the western frontier.

November 12

NAVAL: Commodore Stephen Decatur, Jr.'s squadron returns in triumph to New York, having finally ended all disruptive behavior from the Barbary States of North African shipping. In his own words, he extracted treaties "dictated at the mouth of the cannon."

November 20

NAVAL: The newly established Board of Navy Commissioners issues its first report, calling for reorganization of the U.S. Navy. This report suggests a reduction in navy yards, construction of dry docks, naval hospitals, a naval ordnance department, and an annual expenditure for shipbuilding. Adopting the rank of admiral is strongly recommended. Only a few of the board's suggestions will be considered.

1816

April

MILITARY: Brigadier General Thomas Adams Smith arrives at Cantonment Davis with most of the Regiment of Riflemen, prior to pushing on to Rock Island, Illinois, to establish Fort Armstrong.

April 24

MILITARY: The army general staff is increased with the addition of an inspector general and several topographical engineers.

April 29

NAVAL: Having been seriously outgunned by the Royal Navy in the War of 1812, Congress passes a \$1-million naval appropriations bill, which authorizes construction of nine 74-gun ships of the line, the first such vessels in U.S. Navy history, along with 12 44-gun frigates. From a design standpoint, the Americans are beginning to reach parity in firepower with their Royal Navy counterparts.

May

MILITARY: Brigadier General Alexander Macomb, acting upon instructions from the War Department, commences building a road from Detroit, Michigan, to Fort Meigs, Ohio, 70 miles distant. Work continues over the next two years.

May 10

MILITARY: Soldiers are ordered to Green Bay, Wisconsin Territory, to construct Fort Howard; in time it will function as a major center of the fur trade.

May 17

MILITARY: Zachary Taylor, having resigned to protest a reduction in rank, is recommissioned a major in the 3rd Infantry.

June

MILITARY: Lieutenant Colonel Duncan L. Clinch takes several companies of the 4th Infantry to the Flint River, Georgia, where he begins construction of Fort Scott. This post is intended to protect the southern frontier from hostile Creek and Seminole crossing over from East Florida.

June 8

NAVAL: The new 74-gun ship of the line *Washington* sails for the Mediterranean as part of Commodore Isaac Chauncey's squadron.

June 20

MILITARY: A detachment of the Regiment of Riflemen reoccupies the War of 1812-vintage Fort Shelby at Prairie du Chien, Wisconsin Territory. They then commence construction of a new outpost, Fort Crawford, to confirm American control of the Upper Mississippi region.

July 4

MILITARY: A detachment of the 3rd Infantry slogs into Fort Dearborn, Chicago, and commences rebuilding that post, destroyed in 1812. A new Indian trading post is also built.

July 27

MILITARY: American troops and gunboats under Lieutenant Colonel Duncan L. Clinch attack Fort Apalachicola, Spanish East Florida, garrisoned by fugitive slaves and hostile Seminole Indians. A lucky cannon shot ignites their powder supply, killing 270 defenders.

August

MILITARY: Four companies of the 3rd Infantry, two companies from the Regiment of Riflemen, and some artillery under Colonel John Miller arrive at Green Bay, Wisconsin Territory, for the purpose of constructing Fort Howard at the mouth of the Fox River.

NAVAL: Commodore Stephen Decatur addresses a banquet held in his honor by thundering, "Our country! In her intercourse with foreign nations may she always be in the right; but right or wrong, our country!" It becomes his signature toast.

October 22

MILITARY: At the War Department, William H. Crawford resigns as secretary of war while George Graham, his chief clerk, becomes acting secretary.

1817**March 3**

MARINES: The Peace Establishment Act passes Congress and sets manpower ceilings for the Marine Corps at 50 officers and 942 enlisted men.

March 4

MILITARY: James Monroe is sworn in as the fifth president and commander in chief of the army.

April 22

MILITARY: An angry General Andrew Jackson ignores War Department orders sent to his subordinates and insists that any such directives be sent to him directly. Congressmen threaten to charge him with insubordination, at which point he threatens to resign altogether.

June

MILITARY: A report reflecting the poor overall health of troops on the frontier is compiled by Army Hospital Surgeon Joseph Lovell; his critique will form the basis for medical reforms in the military.

- General Andrew Jackson begins construction of a road stretching from Nashville, Tennessee, to New Orleans, Louisiana, a distance of 200 miles. Work will continue on it for three years.

July 28

MILITARY: In a major development with far-reaching consequences, Captain Sylvanus Thayer replaces Captain Alden Partridge as superintendent of the U.S. Military Academy at West Point, New York. Thayer immediately institutes reforms aimed at modernizing the curriculum and also toughens disciplinary standards.

September

MILITARY: Army troops under Majors Stephen H. Long and William Bradford begin construction of Fort Smith on the Osage River, Arkansas Territory. The post

is intended to prevent hostilities between the Osage and newly arriving Cherokee being relocated to the region.

October 8

MILITARY: Congressman John C. Calhoun is appointed secretary of war; although not considered a prestigious appointment, especially considering the disarray of the military establishment, Calhoun functions as one of the most effective and efficient secretaries in American history. He performs competently while putting U.S. Army administration back on an even keel.

November 16

NAVAL: Captain John D. Henley of the frigate *John Adams* is authorized by President James Monroe to employ armed force in the suppression of pirates operating off Amelia Island, Florida. A day later his orders are expanded to include the Gulf of Mexico as far west as Galveston.

November 20

MILITARY: The First Seminole War commences as Indian warriors, upset over the loss of life at the destruction of Fort Apalachicola in 1816, begin raiding American settlements along the south Georgia border. Many Americans believe that Spanish authorities have been inciting the Indians toward hostility.

November 21

MILITARY: The first attack of the new Seminole conflict commences when Mikasukis warriors strike at a column of 250 soldiers drawn from the 1st, 4th, and 7th Infantries under Major David E. Twiggs at Fowltown, Georgia. Five Indians are slain but their leader, Chief Neamathla, escapes.

November 30

MILITARY: Vengeful Seminole ambush a boatload of U.S. Army troops belonging to the 4th and 7th Infantries on the Apalachicola River, Florida, killing 36 soldiers, including Lieutenant Richard W. Scott, seven women, and four children.

December 22

NAVAL: Captain John Henley and the frigate *John Adams* attack and capture Amelia Island, East Florida, depriving pirates of their principal base.

December 23

DIPLOMACY: The United States and Algiers conclude a final peace treaty, ending the wars with the Barbary pirates.

MILITARY: General Edmund P. Gaines directs a small force that recaptures Amelia Island, off the East Florida coast; this had functioned as a haven for pirates and slave traders.

MARINES: Various marine detachments come ashore to assist army and militia units to seize the pirate stronghold of Amelia Island, Florida.

December 26

MILITARY: General Andrew Jackson succeeds General Edmund P. Gaines as commander of American forces combating hostile Seminole in northern Florida. Secretary of War John C. Calhoun authorizes him to use whatever force he deems necessary to bring the contest to a speedy conclusion.

1818

MILITARY: General Andrew Jackson writes President James Monroe through Tennessee congressman John Rhea that he is able to capture all of Spanish Florida in only two months if granted permission. When Monroe fails to respond to the missive, Jackson interprets his silence as approval to proceed.

TECHNOLOGY: The West Point Foundry, a small forge capable of producing cannonballs and other military ordnance, opens at Cold Spring, New York. By the time of the Civil War it will have manufactured more than 1.6 million shells and 3,000 artillery pieces.

January

MILITARY: General Andrew Jackson asks for 1,000 Tennessee volunteers to support his small force of regulars in the First Seminole War. He aims his appeal at veterans of his campaigns against the Creek in 1813–14.

January 6

MILITARY: General Andrew Jackson, anticipating favorable orders, attacks Seminole Indians in Spanish-held Florida. Previously he had written to President James Monroe that he could secure the area within two months, but now proceeds without proper authorization.

March 9–10

MILITARY: General Jackson and 1,000 Tennessee volunteers force-march their way to Fort Scott, Georgia, covering 450 miles in only 36 days. Here they join 500 men collected from the 1st, 4th, and 7th Infantries. Jackson does not wait for supply wagons; instead he draws three-days' rations for his army and marches immediately south into Florida.

March 15–26

MILITARY: General Andrew Jackson, ignoring the fact that he has no authority, arrives at Prospect Bluff, East Florida, and commences building a fort to guard his line of communications. Entrusted to Lieutenant James Gadsden, it becomes known as Fort Gadsden. Jackson then pushes on to St. Marks, where British agents and Spanish authorities are reputedly providing Seminole and escaped slaves with firearms.

March 18

MILITARY: Lifetime pensions are authorized by Congress for veterans of the Revolutionary War; this amounts to \$20.00 per month for officers and \$8.00 per month for privates.

April 6

MILITARY: A fast-moving column of American infantry and volunteers under General Andrew Jackson seizes St. Marks, Florida, without fighting. Jackson is joined en route by 1,500 Creek warriors, bringing his total manpower up to 4,000 men. His next objective is the village of Chief Billy Bowlegs on the Suwannee River, 100 miles distant.

April 7

MILITARY: General Andrew Jackson's capture of St. Marks, Florida, includes the capture of two English traders, Alexander Arbuthnot and Robert Ambris-

ter. Jackson has both men tried for arming and inciting the Seminole toward violence.

April 8

MILITARY: Secretary of War John C. Calhoun, a far-sighted reformer, appoints Dr. Joseph Lovell to serve as the first army surgeon general; this is a civilian appointment endowed with military rank.

April 12

MILITARY: General Andrew Jackson storms into Natural Bridge, East Florida, killing 37 Seminole and freeing a captured army wife taken the previous November.

April 14

MILITARY: Congress authorizes creation of the Army Medical Corps headed by a surgeon general. Dr. Joseph Lovell eventually gains appointment and will hold that post for the next 18 years.

April 15–29

MILITARY: General Andrew Jackson's little army advances upon the main Seminole village along the Suwannee River, seizing it without serious resistance. More importantly, the two British agents captured, along with incriminating evidence, prove to Jackson that Great Britain is fomenting frontier violence against the United States.

April 29

MILITARY: British traders Alexander Arbuthnot and Robert Ambrister are executed by General Andrew Jackson at St. Marks, Florida, for arming and agitating the Seminole into violence against the United States. His harsh treatment triggers a public outcry from Great Britain; in light of his popular reception at home, no action is taken to censure him.

May

MILITARY: Colonel Thomas Sidney Jesup, a distinguished veteran of the War of 1812, gains appointment as the first quartermaster general of the army, with a rank of brigadier general; he will remain in office over the next 42 years.

May 24–27

MILITARY: American forces under General Andrew Jackson seize the Spanish-held town of Pensacola, effectively ending the First Seminole War. A quick bombardment induces a nearby Spanish fort to surrender, and Colonel William King is appointed governor of Pensacola.

July 24

MILITARY: The first group of 24 cadets trained under the new regimen of Superintendent Sylvanus Thayer graduates from the U.S. Military Academy. The practice of ranking lieutenant's commissions and army seniority relative to academic performance is initiated.

August 19

NAVAL: Captain James Biddle of the sloop *Ontario* arrives at Cape Disappointment on the Columbia River for the first time. There he claims the Oregon Territory

for the United States; however, the region will be jointly occupied with Great Britain.

MARINES: It falls upon Marine sergeant McFadian to raise the Stars and Stripes over the Columbia River, Oregon Territory, claiming it for the United States.

August 30

MILITARY: Six keelboats conveying 350 men of the Regiment of Riflemen ascend the Missouri River under Lieutenant Colonel Talbot Chambers. Their mission is to proceed to the Yellowstone River and establish a fort near its mouth.

September 2

NAVAL: Captain John Downes of the frigate *Macedonian* is instructed to patrol the Pacific Ocean to protect the American whaling fleet and merchant commerce from piracy.

September 11

MILITARY: Garrisons at western army posts are directed to engage in farming activities and grow their own crops to supplement their usual rations, for economic as well as health reasons. The program will prove extremely popular with the troops.

September 16

MARINES: Brevet Major Archibald Henderson succeeds Lieutenant Colonel Franklin Wharton, who has died in office, as acting commandant.

October

MILITARY: U.S. troops found Cantonment Martin on Isle du Vache, Kansas Territory, becoming the first military post in the region.

October 31

MILITARY: The last American troops are withdrawn from Spanish territory in East Florida, officially concluding the First Seminole War. Of the roughly 8,000 regulars and militia deployed there, 47 died in action and 36 were wounded.

1819

MILITARY: Former army officer and West Point commandant Alden Partridge establishes Norwich University at Northfield, Vermont, as the first private military college in the country. Partridge, fearing that an elite officer corps constitutes a danger to democracy, wishes to impart military skill across a broader cross section of American society. This is the precursor of the Reserve Officer Training Corps (ROTC), now a standard fixture at many colleges and universities.

January 1

NAVAL: Smith Thompson is sworn in as the sixth secretary of the navy; in time, he gains appointment as a U.S. Supreme Court justice.

February 26

NAVAL: Congress passes legislation authorizing the navy to take direct action against piracy, especially in the Caribbean. Hereafter, navy vessels will commence convoy operations in threatening areas and recapture any vessel unlawfully taken.

March–May

MILITARY: In response to continuing Indian attacks along the western frontier, the 5th and 6th Infantries are marched to Missouri to reinforce the Regiment of Riflemen.

March 3

NAVAL: Congress passes legislation authorizing navy warships to take an active role in the suppression of the slave trade off West Africa. This leads to the genesis of the African Squadron, which will also be tasked with assisting the newly formed nation of Liberia, colonized by former slaves.

- President James Monroe signs legislation allowing the navy to “declare war” against incipient piracy in the Caribbean, organize convoys, and protect American commerce.
- Congress adopts the first official naming policy for navy warships. Henceforth, ships of the line will be named after states, frigates will be named after rivers, and sloops of war after cities.

MARINES: Brevet Major Anthony Gale is appointed the fourth lieutenant colonel commandant of the Marine Corps.

March 15

NAVAL: The frigate *Macedonian* under Captain John Downes becomes the first navy warship to be regularly deployed in what becomes known as the Pacific Station.

June 6

MILITARY: Army topographical engineer Major Stephen H. Long is commissioned by Secretary of War John C. Calhoun to lead an expedition from Pittsburgh, Pennsylvania, to the region south of the Missouri River. The effort will last two years and thoroughly examine the eastern Rocky Mountains and the area known as the “Great American Desert.”

June 14

MILITARY: At St. Louis, Missouri, Lieutenant Colonel Talbot Chamber leads part of the Regiment of Riflemen in five armed keelboats up the Missouri River as part of the Yellowstone Expedition.

June 21

MILITARY: Major Stephen H. Long, Topographic Bureau, leads a group of scientists up the Missouri River in the steamboat *Western Explorer*; this is the first time such technology has been employed this far west.

July 4–5

MILITARY: Eight companies of the 6th Infantry, arrayed in three steamboats, ascend the Missouri River as the final phase of the Yellowstone Expedition.

August

MILITARY: Lieutenant Colonel Henry Leavenworth leads 16 boatloads of his 5th Infantry to the confluence of the Missouri and Mississippi Rivers, where they stop to construct a fort (Fort Snelling, Minnesota). This post, constructed on land purchased from the Sioux by Lieutenant Zebulon M. Pike in 1804, is the army’s northernmost military post.

**Long, Stephen H. (1784–1864)***Army officer*

Stephen Harriman Long was born in Hopkinton, New Hampshire, on December 30, 1784, and in 1809 he graduated Phi Beta Kappa from Dartmouth College. After teaching mathematics in Germantown, Pennsylvania, he befriended Colonel Joseph G. Swift who, in December 1814, arranged his second lieutenant's commission in the elite Corps of Engineers. Long next taught mathematics at the U.S. Military Academy, West Point, but in 1816 he also became one of the first six officers in the newly established Corps of Topographical Engineers. The following year he arrived in St. Louis, Missouri, to accompany an army expedition to the Fox and Wisconsin Rivers and, en route, became convinced that newly developed steamboats could successfully navigate western waterways. Back in Washington, Long convinced Secretary of War John C. Calhoun to fund such a venture, and in 1819 the First Yellowstone Expedition was outfitted with steamboats under Colonel Henry Atkinson. Long accompanied the expedition as far as Council Bluffs, and in 1820 he was detached to explore the headwaters of the Platte, Arkansas, and Red Rivers. Accompanied by 19 men, he retraced the route of Captain Zebulon M. Pike and became the first party of white men to scale Pike's Peak in Colorado. Long returned to Fort Smith, Arkansas, in the fall of 1820, where he reported that western settlement would be blocked by what he deemed the "Great American Desert." This was construed as an obstacle to crop-raising settlements until John C. Frémont finally

dispelled the myth in 1846. It is estimated that Long's misjudgment may have delayed southwestern settlement by two decades, but otherwise he made major contributions to the understanding of the topography, geography, and natural resources of the West.

In 1823, Long directed his final expedition northward to the Minnesota River, where he surveyed along the U.S.-Canadian boundary near the Great Lakes. This concluded his frontier activities and he spent the next four decades on routine engineering assignments throughout the West. In this capacity he performed useful services like dredging river channels and flattening sandbars; Long also served as chief engineer to a number of early railroads. He subsequently penned the first treatise on railroad construction, designed wooden railroad bridges, and established mathematical curves and grades for laying down tracks. He advanced to major in 1838, and spent the following decade constructing numerous hospitals in Kentucky, Mississippi, and Arkansas, as well as dams and harbor improvements. After the Civil War commenced in 1861, he was recalled to Washington, D.C., as colonel of Topographical Engineers; two years later, when his command was absorbed into the Corps of Engineers, he concluded 49 years of dedicated service by resigning. Long died in Alton, Illinois, on September 4, 1864, having contributed greatly to the knowledge and settlement of America's western frontier.

August 13

NAVAL: Captain Oliver Hazard Perry, hero of the Battle of Lake Erie in 1813, dies of yellow fever while commanding the schooner *Nonsuch* on a diplomatic mission to Trinidad. He is only a few days short of his 34th birthday.

September 16

MILITARY: In Washington, D.C., the U.S. Patent Office issues Thomas Blanchard a patent for his “turning machine,” a specially designed lathe for mass-producing gunstocks. It proves a milestone in facilitating both production of weapons and interchangeable parts.

September 29

MILITARY: Members of the Yellowstone Expedition under Colonel Henry Atkinson halt at Council Bluffs, present-day Iowa, to construct a post that they christen Camp Missouri. Meanwhile, engineers attached to the expedition begin surveying a 330-mile road back to St. Louis, Missouri.

1820**March**

MILITARY: In Congress, there are rumblings relative to abolishing the U.S. Military Academy out of fear of promoting elitism in the U.S. Army. No action is taken, although a committee does investigate Captain Sylvanus Thayer’s recent reforms and willingness to dismiss any cadet who does not measure up academically.

March 22

NAVAL: At Bladensburg, Maryland, Commodore Stephen Decatur dies from wounds received in a duel with a fellow officer, Captain James Barron. Their fatal quarrel stems over recriminations dating back to the 1807 *Chesapeake-Leopard* Affair. He is only 41 years of age; Barron, the senior American naval officer, is effectively blacklisted and will never secure a sea command again.

April

MILITARY: Secretary of War John C. Calhoun, in light of congressional budget cuts, orders the Yellowstone Expedition to halt where it is (Council Bluffs, Iowa) and construct a fort. Lieutenant Colonel Talbot Chambers then selects high ground upon which Fort Atkinson will be built.

April 5–12

MARINES: Marines from the corvette *Cyane*, Captain Edward Trenchard commanding, assist in the capture of seven vessels engaged in the slave trade off West Africa (Liberia). This is the first success of the newly formed African Squadron.

May 16

NAVAL: Captain John D. Henley departs Hampton Roads, Virginia, in the 36-gun frigate *Congress* and makes for China. His vessel will become the first American warship to visit the Middle Kingdom that December.

June 6

MILITARY: Major Stephen H. Long’s expedition departs Pittsburgh and makes for the Missouri River.

July 14–15

MILITARY: Major Stephen H. Long's exploring expedition reaches the eastern Rocky Mountains (Colorado), and a team under Edwin James ascends Pike's Peak for the first time.

July 24

MILITARY: Captain John R. Bell, having explored the base of the Rocky Mountains and made the first ascent of Pike's Peak, next directs a group of scientists down the Arkansas River. Major Stephen H. Long, meanwhile, sets out down the Canadian River, formally ending this phase of the Yellowstone Expedition.

October 16

MARINES: Lieutenant Colonel Anthony Gale is court-martialled for drunkenness, relieved as commandant, and dismissed from the Marine Corps.

November 20

NAVAL: The frigate *Macedonian* evacuates American and British citizens from Lima, Peru, then escorts a convoy of American and British merchantmen from Callao, Peru.

December 12

MILITARY: Secretary of War John C. Calhoun, responding to congressionally mandated cuts in the defense budget, submits a plan for reducing the military establishment from 8,000 to 6,000 men. In it, he calls for an "expandable" force by keeping the same number of regiments and companies with fewer soldiers, but the same number of officers. In wartime, the army could be expanded simply by fleshing it out with new recruits.

1821

January 2

MARINES: Brevet Major Archibald Henderson gains appointment as the fifth lieutenant colonel commandant of the Marine Corps by President James Monroe. He will enjoy a surprising longevity in office—almost four decades.

January 21

NAVAL: Lieutenant J. R. Madison and the schooner *Lynx* depart St. Mary's, Georgia, bound for the West Indies, and are never heard from again.

March 2

MILITARY: Ignoring the secretary of war's advice, Congress reduces the standing military establishment from 8,000 men to 6,126, with the 8th Infantry, the Light Artillery Regiment, and the Regiment of Riflemen all abolished. The Corps of Artillery is also consolidated into four artillery regiments, numbered 1 through 4.

March 16

NAVAL: With Spanish Florida firmly in the hands of General Andrew Jackson, the brig *Hornet* is ordered to convoy captured Spanish soldiers back to Cuba.

March 19

NAVAL: The far-ranging frigate *Macedonian* is relieved from the Pacific Station by the *Constellation* and returns to the United States. Its two-year, nine-month sojourn has covered 58,878 miles and cost the lives of 26 sailors.

March 27

MILITARY: Congress specifically orders that blue be the official color of all U.S. Army uniforms, regardless of branch. The color has been used before, by various branches, but now it is official.

April 15

MILITARY: President James Monroe appoints General Andrew Jackson as governor of the new Florida Territory.

May 17–25

NAVAL: Lieutenant Robert F. Stockton, commanding the schooner *Alligator*, seizes four French slave vessels off the Gallinas River, West Africa. He subsequently conducts negotiations with local tribal leaders to acquire land upon which the new nation of Liberia will be founded.

June 1–15

MILITARY: Reductions in the size of the army require fewer generals in service, so Jacob J. Brown is retained as the sole major general with the title of commanding general of the army; Andrew Jackson resigns rather than face demotion. Winfield Scott and Edmund P. Gaines are retained as brigadiers, Alexander Macomb is reduced in rank to colonel and chief army engineer, while Eleazar W. Ripley resigns his commission.

July 1

MILITARY: Former major general Andrew Jackson is formally installed as governor of the Florida Territory, recently sold to the United States by Spain. He has probably received the appointment as a sinecure in light of his impressive military reputation.

August

MILITARY: Lieutenant Colonel Zachary Taylor and his men of the 8th Infantry are transferred en masse to the 7th Infantry prior to their redeployment from Georgia to the southwest frontier.

October 11

NAVAL: The new ship of the line *Franklin* sails from New York for the Pacific Ocean where, in concert with the schooner *Dolphin*, it will form the nucleus of the Pacific Squadron. Naval vessels are increasingly required to protect American commercial interests from Latin American revolutionary movements.

October 16

NAVAL: Lieutenant Lawrence Kearny of the brig *Enterprise* attacks and captures two pirate vessels and burns two more in a single action off Cape San Antonio, Cuba. He caught them in the act of plundering several American merchantmen.

October 29

NAVAL: Captain Robert Henley, commanding the brig *Hornet*, captures a pirate vessel off Santo Domingo.

November 5

NAVAL: In the central Atlantic, Lieutenant Robert F. Stockton of the schooner *Alligator* engages the Portuguese vessel *Marianno Flora* for 90 minutes before the latter strikes. The Portuguese had fired first, but the secretary of the navy admonishes Stockton's aggressiveness and hereafter restricts him to guarding against the slave trade.

November 8

NAVAL: Lieutenant James Ramage of the schooner *Porpoise* seizes a pirate vessel off Cape San Antonio, Cuba.

December 21

NAVAL: The brig *Enterprise* under Lieutenant Lawrence Kearny continues to campaign against Caribbean piracy by seizing a vessel off Cape San Antonio, Cuba, then going ashore and burning a pirate base and five vessels.

1822**January 7**

NAVAL: Lieutenant James Ramage, commanding the brig *Porpoise*, lands sailors and marines ashore at Bahia Honda on the Cuban coast, destroying a pirate base and six vessels.

- In the West Indies, a Dutch sloop captured by pirates is recaptured by Lieutenant John H. Elton of the brig *Spark*, who then sails the vessel to Charleston, South Carolina, where the violators face trial.

March–June

MILITARY: Lieutenant Colonel Zachary Taylor constructs Fort Jesup between the Sabine and Red Rivers, Louisiana. Ongoing friction with the colonel of the 7th Infantry will result in Taylor's subsequent transfer to the 1st Infantry.

March 7

NAVAL: Lieutenant G. W. Hamersley and the schooner *Revenge* seize a pirate barge in the West Indies.

March 8

NAVAL: Lieutenant Lawrence Kearny of the brig *Enterprise* seizes seven pirate vessels off Cape San Antonio, Cuba.

MARINES: A landing party of marines from the *Enterprise* goes ashore at Cape San Antonio, Cuba, in pursuit of pirates and burns their base camp.

March 25

NAVAL: Lieutenant Matthew C. Perry, commanding the schooner *Shark*, drops anchor at Key West, Florida, and claims that archipelago for the United States.

March 26

NAVAL: In an effort to better coordinate antipiracy efforts, the embryonic West India Squadron begins forming under Commodore James Biddle. He is tasked

with suppressing unlawful activities off Cuba, Puerto Rico, and the coast of Central America.

April 30–May 1

NAVAL: Schooners *Alligator* and *Grampus*, assisted by the chartered vessel *Jane*, corner and capture four pirate vessels near the Windward Islands, freeing one prize.

May 6

INDIAN: Congress orders the commanders of all army posts to check the goods and packages of all Indian traders to halt the flow of alcohol to the Indians. They are also instructed to limit settlers from cutting down timber on tribal lands.

June 6

MILITARY: An army surgeon, Dr. William Beaumont, makes medical history by working on Alexis St. Martin, who was wounded by a shotgun blast and has an unhealed hole on the side of his stomach. Beaumont uses this access to study his subject's stomach fluids and conducts the first-ever experiments and observation of the human digestive tract.

July

MILITARY: To obviate long-standing recruiting problems for the army, General Jacob J. Brown instructs General Winfield Scott to establish three centralized recruiting stations within his jurisdiction as an experiment.

July 6

MILITARY: The venerable colonel Hugh Brady of the 2nd Infantry begins construction of Fort Brady at Sault Ste. Marie, Michigan Territory, as part of Secretary of War John C. Calhoun's military construction program.

August 16

NAVAL: Lieutenant Francis H. Gregory, a future admiral, directs the schooner *Grampus* while capturing the pirate vessel *Palmyra* off Puerto Rico.

September 28–30

NAVAL: The sloop of war *Peacock* under Captain Stephen Cassin, assisted by the revenue cutter *Louisiana*, storms a pirate stronghold at Bahia Honda, Cuba, seizing five vessels and releasing a prize ship.

November 9

NAVAL: Lieutenant William Allen of the schooner *Alligator* is killed in a fight with pirates off Matanzas, Cuba. His men capture the pirate vessel and kill 14 of its crew; five American merchantmen are also freed.

November 19

NAVAL: Lieutenant W. W. McKean and the schooner *Alligator* are wrecked on Carysfort Reef, Florida, without loss of life.

December

MILITARY: The experiment with centralized recruiting proves successful, and more than 600 recruits have signed on in less than six months. The new system gradually gains adoption as the General Recruiting Service.

December 21

NAVAL: Commodore David Porter replaces Commodore James Biddle as commander of the West India Squadron.

1823

February 1

MARINES: A naval station and a marine barracks are established at Key West, Florida, as a base of operations against pirates operating in the Gulf of Mexico.

February 14

NAVAL: The *Sea Gull*, a former Hudson River steamer and the navy's second steam-powered vessel, leaves Norfolk, Virginia, and makes for the West Indies under Lieutenant William H. Watson. It is the first such warship in the U.S. Navy inventory.

March 6

NAVAL: At San Juan, Puerto Rico, Spanish forces inexplicably fire upon the schooner *Fox*, fatally wounding Lieutenant William H. Cocke. The Spanish government issues a formal apology but the incident goes unexplained.

April 8

NAVAL: The barges *Mosquito* and *Gallinipper*, covered by guns of the sloop *Peacock* under Captain Stephen Cassin, capture a pirate vessel off Havana, Cuba.

MARINES: A marine detachment from the sloop *Peacock* goes ashore at Havana, Cuba, in search of pirates.

May 22

NAVAL: Lieutenant Francis H. Gregory and the schooner *Grampus* capture two pirate vessels off Campeche, Mexico.

June 22–23

MILITARY: Colonel Henry Leavenworth sorties from Fort Atkinson with six companies of the 6th Infantry, some scouts, and light artillery on a punitive raid against local Arikara Indians. The action is in response to recent attacks against traders and constitutes the army's first military action west of the Mississippi River.

July

NAVAL: The barges *Gallinipper* and *Mosquito* under Lieutenants William H. Watson and W. T. Inman, respectively, attack the pirate stronghold at Sigaumpa Bay, Cuba, killing or capturing 75 pirates along with their leader, Diabloleto.

July 9

MILITARY: Major Stephen H. Long commences his second exploration by departing Fort Snelling to explore and find the source of the Minnesota River. The task will last until October, cover 5,400 miles, and help to delineate the boundary between the United States and Canada.

NAVAL: The veteran brig *Enterprise* under Lieutenant Lawrence Kearny is lost after it breaks up on Little Curacao Island, West Indies.

July 22

NAVAL: The schooner *Greyhound* under Lieutenant Lawrence Kearny, acting in concert with the schooner *Beagle* under Lieutenant J. T. Newton, shells a pirate stronghold on Cape Cruz, Cuba, as a diversion while landing parties come ashore.

MARINES: Sailors and marines from the schooners *Greyhound* and *Beagle* land under Lieutenant David G. Farragut to suppress pirates at Cape Cruz, Cuba. The village is taken along with eight armed vessels.

August 1

NAVAL: The Philadelphia Navy Yard hosts that service's first unofficial naval medical school, directed by Dr. Thomas Harris, who will run the venture until it finally closes in 1843.

August 9–14

MILITARY: A force of 1,000 American infantry, scouts, and artillery engages hostile Arikara Indians in their two fortified villages. After bombarding them for several days, Leavenworth attempts to negotiate a settlement, but the Indians escape at night.

September 16

NAVAL: Secretary of the Navy Smith Thompson resigns from office to become a U.S. Supreme Court justice and is replaced by Samuel Lewis Southard; he becomes the seventh individual so appointed.

November 18

NAVAL: The schooner *Alligator* is wrecked after running aground on Corysfort Reef, West Indies. The crew survives, then burns the vessel to prevent its capture by pirates.

December 2

DIPLOMACY: President James Monroe breaks with isolationism by declaring the so-called Monroe Doctrine, whereby the United States will not allow foreign powers to colonize the Western Hemisphere. The United States Navy is destined to play a bigger role in policing the area, assisted by ships of its former adversary, the Royal Navy.

1824**March**

MILITARY: As part of the ongoing frontier construction program, two companies of the 7th Infantry construct Fort Towson roughly five miles from the Red River. They are there to patrol the area between the resident Pawnee and newly arriving Cherokee and Choctaw experiencing forced relocation.

March 12

MARINES: Marines are detached from the Boston Navy Yard and help restore order at the state prison in Boston following a riot.

April

MILITARY: Part of the Fort Smith garrison pushes up the Arkansas River and formally occupies Fort Gibson to help maintain and enforce peace between various Indian tribes.

May 4

MILITARY: Congress passes legislation mandating civil works by the U.S. Army Corps of Engineers, mostly navigation, flood control, and harbor dredging activities.

May 24

MILITARY: President James Monroe signs a bill authorizing the U.S. Army Corps of Engineers to build dams, dredge harbors, and engage in other construction with civilian applications.

- Secretary of War John C. Calhoun founds the Artillery School of Practice at Fortress Monroe, Virginia. This is the army's first professional school of instruction, and West Point cadets will perform a one-year tour of duty here before joining their assigned regiments.

August 17–26

NAVAL: The schooner *Terrier* under Lieutenant Thomas Paine, Jr., executes a patrol of Cuban waters, capturing a pirate launch and a schooner.

October 20

NAVAL: Lieutenant Charles W. Skinner, commanding the schooner *Porpoise*, captures a pirate schooner off Matanzas, Cuba. He receives assistance from five small boats directed by Lieutenant William M. Hunter.

October 27

NAVAL: Lieutenant Charles Platt anchors the schooner *Beagle* off Fajardo, Puerto Rico, to investigate claims of stolen American property being stored there. He then goes ashore with Midshipman Robert Ritchie to discuss the matter with local authorities and is arrested by them.

October 28

NAVAL: The schooner *Wildcat* under Midshipman L. M. Booth sinks with all hands somewhere between Cuba and Thompson's Island in the Caribbean.

November 14

NAVAL: Commodore David Porter, responding to an alleged Spanish insult to the American flag a few weeks previously, lands a force of marines and sailors at Fajardo, Puerto Rico, and storms a Spanish battery without loss. The defenders then offer the requisite apology, at which point Porter embarks and leaves, but he will subsequently be suspended and court-martialed for his overly aggressive actions.

December 27

NAVAL: Commodore David Porter is succeeded as head of the West Indies Squadron by Captain Lewis Warrington.

1825**February 4**

NAVAL: The schooner *Ferret* sinks in a storm off the Cuban coast; five men are lost and the remainder are rescued the following day by the schooner *Jackal*.

February 12

MARINES: The marine detachment on board the *Grampus* goes ashore on St. Thomas, Virgin Islands, to fight a fire.

March 3

NAVAL: Congress, recognizing the need for small, swift vessels to help combat piracy, authorizes construction of 10 new sloops of war.

- Congress also passes legislation approving construction of a naval yard and depot at Pensacola, Florida.

March 4

NAVAL: Lieutenant John D. Sloat of the schooner *Grampus* captures a pirate sloop off Ponce, Puerto Rico, and is thanked by the governor of that island.

March 7

MILITARY: In Washington, D.C., James Barbour replaces John C. Calhoun as the 11th secretary of war.

March 25

NAVAL: Lieutenant Isaac McKeever of the barge *Gallinipper* joins British vessels HMS *Dartmouth*, *Lion*, and *Union* in a combined assault upon a pirate base at Rio Sagua la Grande near Matanzas, Cuba.

September 8

NAVAL: The aged marquis de Lafayette, completing his triumphal tour of the United States, departs Washington, D.C., for France in the frigate *Brandywine*.

1826**January**

MILITARY: General Winfield Scott convenes the “Cavalry Tactics” board to update drill manuals, regulations, and tactics for the mounted arm and artillery.

January 9

NAVAL: Lieutenant John Percival and the schooner *Dolphin* become the first Americans to drop anchor at the Sandwich Islands (Hawaii); Percival will soon be chasing mutineers who have seized the whaling vessel *Globe*.

February 17

MILITARY: Governor George M. Troup of Georgia, determined to prevent the arrival of federal troops in the western part of his state, calls up the state militia.

March 4

MILITARY: Brigadier Generals Henry Atkinson and Edmund P. Gaines select a new site for a fort to replace Fort Bellefontaine at St. Louis, Missouri, and settle on a site overlooking the Mississippi River 10 miles from the city.

July 1

NAVAL: Commodore David Porter, incensed by his treatment over the so-called Foxardo Affair, angrily ends his 28-year career in the U.S. Navy by resigning. He soon gains appointment as commander in chief of the Mexican Navy.

August 6

NAVAL: Master Commandant Thomas ap Catesby Jones arrives at Matavia Bay, Tahiti, in the sloop *Peacock*, and negotiates a treaty with local chieftains for the protection of American commerce in their waters.

August 16

MARINES: At Tahiti, marines from the sloop *Peacock* board the whaling vessel *Fortune* and apprehend six sailors responsible for a mutiny there.

September 3

NAVAL: The frigate *Vincennes* under Master Commandant William B. Finch sails from New York on a four-year mission to circumnavigate the globe for the first time. He will return five years later.

September 19–October 23

MILITARY: Colonel Henry Leavenworth and four companies of the 3rd Infantry establish a new post called Cantonment Miller, better known as the Jefferson Barracks and home to the “Infantry School of Practice.” This is the first permanent army facility west of the Mississippi River and the largest; it will serve mainly as a training facility until being deactivated in 1946.

December 22

NAVAL: Master Commandant Thomas ap Catesby Jones negotiates a treaty with the tribes of Hawaii; it protects American commerce and grants favored-nation status to the United States for trading purposes.

1827**February 17**

MILITARY: U.S. Army troops are dispatched to Creek lands in Georgia to prevent premature surveying of tribal lands, yet Governor George M. Troup mobilizes the state militia to oppose them. The transfer of land stipulated in the Treaty of Washington, signed the previous January, has not yet occurred.

February 27

MILITARY: The U.S. Supreme Court decides the case of *Martin v. Mott*, whereby it confirms that the president, as commander in chief, has the sole authority to call out the militia. Moreover, the decision is not subject to judicial review and is binding on all state authorities in question.

March 3

NAVAL: Congress votes to fund two dry docks at Boston, Massachusetts, and Norfolk, Virginia.

March 7

MILITARY: Colonel Henry Leavenworth is directed by the War Department to locate a new fort farther west of the Mississippi River; he begins scouting up the Missouri River for a proper venue.

March 27

MILITARY: A pay scale known as “command pay,” fixed at \$10 a month by Congress, is implemented for all officers commanding companies. The rate will henceforth also apply to senior lieutenants in the absence of a captain.

April 2

NAVAL: Work commences on the first U.S. naval hospital at Portsmouth, Virginia; construction will continue through 1833.

**Leavenworth, Henry (1783–1834)***Army general*

Henry Leavenworth was born in New Haven, Connecticut, on December 10, 1783, and in 1804 he was admitted to the New York State bar. He quit his law practice following onset of the War of 1812 to become a captain in the 25th Infantry. In the spring of 1814 Leavenworth advanced to major and received command of the 9th Infantry as part of General Winfield Scott's 1st Brigade at Buffalo, New York. Thus situated, his unit endured 10 hours of drill a day and was further strengthened by the addition of several companies from the 22nd Infantry. Leavenworth subsequently fought at the July 5, 1814, Battle of Chippewa, whereby American units outmaneuvered and outfought their veteran British counterparts for the first time. Leavenworth was conspicuous in directing his composite battalion under fire, winning promotion to brevet lieutenant colonel. Three weeks later the 9th infantry was closely engaged at the Battle of Lundy's Lane, July 25, 1814, where Scott's brigade suffered heavily from British artillery fire posted on the lane. Leavenworth assumed command once Scott fell wounded and helped direct the repulse of several determined British attacks until the army was ordered back to Fort Erie. In this contest he was severely wounded, winning his second brevet promotion to colonel.

After the war, Leavenworth left military service to serve in the New York legislature, but in 1818 he returned as lieutenant colonel of the 5th Infantry under Colonel Josiah Snelling. For the next 16

years he rendered useful service along the northwestern and southwestern frontiers, constructing forts and concluding treaties with the various tribes residing there. In 1819 he founded Fort Snelling, Minnesota, and subsequently commanded Fort Atkinson, Nebraska, with the 6th Infantry. In June 1823 Leavenworth waged the first Indian war west of the Mississippi when he was ordered to chastise the Arikara, who had murdered several white traders. Assisted by several hundred Sioux warriors, he surrounded their camp and bombarded it with cannon, but the Indians escaped at night and the campaign ended inconclusively. No blame was attached to Leavenworth, however, and he advanced to brevet brigadier general in 1824. He continued commanding at Green Bay, Wisconsin, for several months before relocating to St. Louis, Missouri, in 1827 as colonel of the 3rd Infantry. There Leavenworth directed construction of the famous Jefferson Barracks, which functioned as the army's only infantry school for many years, and also founded the cantonment that served as the basis for present-day Fort Leavenworth, Kansas. In 1834 he accompanied Colonel Henry Dodge and the newly raised 1st Dragoon Regiment on its maiden expedition into the Southwest. En route, Leavenworth fell off his horse while buffalo hunting and died of his injuries on July 21, 1834. Along with General Henry Atkinson, Leavenworth is regarded as one of the most accomplished frontier officers of his day.

April 17

MILITARY: Colonel Henry Leavenworth is joined by four companies of the 3rd Infantry under Captain William G. Belknap, whereupon the site for Cantonment Leavenworth is chosen in present-day Kansas. It is founded to improve caravan security along the Santa Fe Trail into Mexican territory.

May 26

MILITARY: Future literary great Edgar Allan Poe enlists in the U.S. Army under the assumed name of Edgar Allan Perry; over the next two years, he capably rises to sergeant major before being honorably discharged.

June 24

MILITARY: The Winnebago, responding to rumors that two of their members have been jailed by army authorities, attack settlers and military keelboats. Governor Lewis Cass mobilizes the Michigan militia while General Henry Atkinson prepares to march with the 6th Infantry from Jefferson Barracks, Missouri.

June 29–28

MILITARY: General Jacob J. Brown makes an inspection tour of the Infantry School of Practice, Jefferson Barracks, Missouri, which is now home to several companies drawn from the 1st, 3rd, and 6th Infantries.

July 15–29

MILITARY: Army troops under General Henry Atkinson sail up the Mississippi River on steamboats as far as Prairie du Chien, Wisconsin Territory. Other detachments of the 3rd and 5th Infantries are en route from Forts Howard and Snelling, respectively, while the Illinois and Michigan militias gather at Peoria and Galena, Illinois.

September 2–33

MILITARY: Realizing that they are badly outgunned and outnumbered, emissaries from the Winnebago bring a white flag to the camp of Major William Whistler, 3rd Infantry, at Prairie du Chien, Wisconsin Territory. Requesting peace, they also hand over two tribal members who had attacked white settlers. Other members of the tribe slowly drift in and, at length, General Henry Atkinson allows them to return home.

October 4

NAVAL: Master Commandant Lawrence Kearny and the sloop of war *Warren* capture a pirate vessel in the Mediterranean that had preyed upon American and Greek shipping near the Cyclades Islands.

October 16

NAVAL: In the Adriatic Sea, Lieutenant Benjamin Cooper of the schooner *Porpoise* dispatches four boats full of sailors and marines who recapture a merchant ship from pirates, inflicting 40 casualties on them.

October 25

NAVAL: A spate of recent pirate attacks on the merchant ships *Cherub* and *Rob Roy* induces the sloop *Warren* under Master Commandant Lawrence Kearny to pursue a renegade brig onto the shore of the Mediterranean island of Argenteria, where landing parties scuttle it.

October 29–November 2

NAVAL: The sloop *Warren* under Master Commandant Lawrence Kearny captures a 40-oared pirate galley off Mykonos in the Cyclades Islands of the Aegean Sea, Greece, then puts into the harbor to rescue stolen goods from American vessels and arrests five pirates. The vessel *Cherub* is also recaptured.

November 7

MARINES: In another significant action, marines from the sloop *Warren* storm ashore at Andros Island, Greece, capture two pirate vessels, and burn a third.

1828

NAVAL: The navy establishes a recruiting office at Carlisle, Pennsylvania, the first time the naval arm has tried to enlist men who are not from coastal cities.

February 24

MILITARY: Commanding General of the Army Jacob Jennings Brown dies in Washington, D.C.; his passing sets off a bitter personal struggle, based on competing claims of seniority, between Generals Winfield Scott and Edmund P. Gaines to succeed him.

May 23

MILITARY: In Washington, D.C., Peter B. Porter is appointed the 12th secretary of war by President John Quincy Adams.

May 29

MILITARY: President John Quincy Adams passes over feuding Winfield Scott and Edmund P. Gaines by appointing Alexander Macomb as the new commanding general of the army; an angry Scott tenders his resignation, but it is not accepted. He is ordered back to Jefferson Barracks in Missouri to cool off.

July 7

MILITARY: Congress instructs the Corps of Engineers to begin surveying possible routes for the new Baltimore and Ohio Railroad; when completed, this entity will provide the nation's first passenger rail service.

December 14

MILITARY: General Winfield Scott's continual complaints about not becoming commanding general of the army result in his removal from the Western Department and placement on the "waiting orders" list. He is succeeded by Brevet Brigadier General Henry Atkinson of the 6th Infantry.

1829**March 2**

MILITARY: *A System of Exercise and Instruction of Field Artillery* is published by the army; it is the first such document to employ the precise terms "field," "light," and "horse," to denote specific types of ordnance.

March 3

NAVAL: Secretary of the Navy Samuel Southard resigns from office; under his aegis, the U.S. Navy has increased in size to 52 vessels and 5,600 men.

March 4

MILITARY: In Washington, D.C., Andrew Jackson is inaugurated as the seventh president and commander in chief of the army.

March 9

MILITARY: In Washington, D.C., John H. Eaton is appointed the 13th secretary of war by President Andrew Jackson.

NAVAL: Former North Carolina senator and governor John Branch is sworn in as the eighth secretary of the navy.

May 4–14

MILITARY: Captain Bennet Riley is dispatched from Jefferson Barracks, Missouri, with several companies of the infantry in order to provide the first military escorts along the Santa Fe Trail. Recent attacks by Kiowa and Comanche warriors have prompted an outcry for help from traders.

June 4

NAVAL: The *Demologos*, the world's first steam warship and better known as *Fulton the First*, catches fire and burns in New York harbor; 24 people are killed and another 19 are injured. Despite its revolutionary nature, the vessel performed only minor service as a receiving ship.

June 5–July 1

MILITARY: The caravan guard commanded by Captain Bennet Riley is continually attacked by Comanche after it encamps on Chouteau's Island in the Arkansas River.

July 18

MILITARY: At Fort Crawford, Wisconsin Territory, Major Stephen Watts Kearny is superseded by Lieutenant Colonel Zachary Taylor, 1st Infantry. Taylor is under orders to construct a new post above a nearby river flood plain.

August 13

MILITARY: To ameliorate long-standing confusion relative to the issue of seniority, the War Department issues new regulations regarding brevet promotions. Henceforth, all officers serving 10 years in one service grade will automatically receive brevet promotion to the next rank, although to actually wield authority in that rank requires permission from the War Department.

August 16

NAVAL: The sloop *Hornet* under Lieutenant O. Norris is lost at sea off Tampico, Mexico, with all hands.

November 8

MILITARY: The military escort of Captain Bennet Riley finally returns to Cantonment Leavenworth, having suffered four dead in combat with Comanche raiders. His subsequent report outlines the disadvantages infantrymen suffer when dealing with mounted warriors and will stimulate the rebirth of cavalry in the U.S. Army.

November 23

MILITARY: General Winfield Scott returns from an extended furlough in Europe and withdraws his resignation. Thereafter he trades command of the Western Department for the Eastern Department, with bitter rival Edmund P. Gaines.

1830

May 28

INDIAN: The Indian Removal Act is passed by Congress, authorizing the forced relocation of specific tribes to new homes west of the Mississippi River. It falls upon the army to organize, assist, and escort Native Americans undergoing this harsh activity.

June 8

NAVAL: The sloop *Vincennes* under Master Commandant William B. Finch returns to New York after a four-year hiatus, becoming the first U.S. warship to successfully circumnavigate the globe.

September 16

NAVAL: In an attempt to prevent the aged frigate *Constitution*, “Old Ironsides” of lore, from being sold and broken up, Oliver Wendell Holmes writes and published the poem “Old Ironsides” in the Boston *Daily Advertiser*. His effort proves so popular that the Navy Department rescinds its order to mothball the vessel.

September 27

INDIAN: The government concludes the Treaty of Dancing Rabbit Creek with the Choctaw Nation, which requires the army to assist them in relocating west of the Mississippi River. Commissary General of Subsistence colonel George Gibson becomes responsible for orchestrating the actual move.

December 6

NAVAL: The secretary of the navy, acting upon the advice of Lieutenant Louis M. Goldsborough, authorizes creation of the Depot of Charts and Instruments in Washington, D.C., to store charts, sailing directions, and navigation instruments. It subsequently becomes better known as the U.S. Naval Observatory.

December 8

MILITARY: Order No. 72 of the Adjutant General’s Office ceases the military’s traditional gill of whiskey issued to the troops as part of daily rations. Sugar and coffee are added as a supplement.

1831

February

NAVAL: Pirates operating from the Sumatran island of Quallah Battoo board the American merchant vessel *Friendship*, kill three crewmen, and plunder its hold. This act will set in motion the first U.S. armed intervention in Asia.

February 3

NAVAL: Congress authorizes construction of three new sloops to be christened *Experiment*, *Enterprise*, and *Boxer*.

February 8

MILITARY: The War Department issues a new regulation requiring all cantonments and fortifications to receive the official designation of “fort.”

May 23

NAVAL: In Washington, D.C., Levi Woodbury is sworn in as the ninth secretary of the navy. He was formerly part of the Senate Naval Affairs Committee.

June 15

NAVAL: In an attempt to reduce sailors' affection for grog (rum), the reform-minded secretary of the navy offers each sailor a payment of six cents for every ration declined; the order is largely ignored.

June 18

MILITARY: Secretary of War John H. Eaton resigns from office after his wife, a former barmaid, is rejected by Washington, D.C.'s high society. President Andrew Jackson subsequently appoints him governor of the Florida Territory while Secretary of the Navy Levi Woodbury temporarily assumes the functions of his office.

**Black Hawk (ca. 1767–1838)***Sac and Fox chief*

Black Hawk (Makataimeshekikiak) was born near Rock Island, Illinois, around 1767, into the Thunder clan of the Sac and Fox Indian nation. He matured into an outstanding warrior and by 1788 was functioning as a minor chief. By this time, the tribe had established friendly relations with the United States, although relations soured after 1804 when U.S. efforts to have them sell their traditional hunting grounds accelerated. Black Hawk, in particular, refused to move from his village at Saukenuk and continually declined Indiana territorial governor William Henry Harrison's offer of compensation. When the War of 1812 erupted, Black Hawk readily joined Tecumseh's pan-Indian coalition against the United States, defeating American troops in several actions. His most successful battle occurred in September 1814 when his braves attacked Major (and future president) Zachary Taylor's small force on the Rock River (Illinois), forcing them to

retreat. It was not until 1816, a year after the Treaty of Ghent had been signed, that Black Hawk finally and sullenly made peace with his hated adversary. An uneasy truce prevailed for the next two decades, but in 1829 the Illinois state government under Governor John Reynolds began pressing Black Hawk's tribe to migrate across the Mississippi River. The old chief refused, and in 1831 the local militia was assembled to evict them by force. Black Hawk, wishing to avoid hostilities, slipped quietly across the river into present-day Iowa, which seemed to defuse the crisis for the moment.

The Sac and Fox spent an uncomfortable winter in their new homes, nearly starving to death. To circumvent further suffering, on April 5, 1832, Black Hawk ordered his 1,400 tribesmen back across the Mississippi to reoccupy their old homeland. A party of two Indians was sent ahead under a white flag to assure whites

June 27–30

INDIAN: Black Hawk, paramount chief of the Sac and Fox and a distinguished warrior in the War of 1812, reluctantly agrees with General Edmund P. Gaines to relocate his people from their traditional homeland in Illinois and across the Mississippi River to new homes in Iowa. They will nearly starve in Iowa over the winter, and acute deprivation will prompt an unexpected exodus back to their former abode.

June 30

MILITARY: Brigadier General George H. Steuart of the Maryland militia conducts 100 militiamen by railroad to Sykes Mill for the purpose of quelling a railroad strike. This is the first recorded instance of soldiers using rail transport.

August 1

MILITARY: In Washington, D.C., Lewis Cass of Ohio gains appointment as the new secretary of war.

that they meant no harm, but when militiamen killed the messengers, Black Hawk declared war. Costly skirmishes ensued over intervening weeks as General Henry Atkinson collected troops and militia to deal with the intruders. On May 12, 1832, the Indians were soundly defeated by Atkinson at the Battle of Bad Axe, principally by the armed steamboat *Warrior*. Black Hawk's band scattered and he was eventually captured and taken to Fortress Monroe, Virginia, by Lieutenant Jefferson Davis. The chief was cordially introduced to President Andrew Jackson before being released into the custody of Keokuk, a rival chief far more amicably disposed toward the Americans. While in captivity, Black Hawk dictated his memoirs to Indian agent Antonine LeClaire, which were published in 1833 and became a best-seller. In them, the old chief excoriated the whites for their injuries against Native Americans and carefully recounted his numerous victories over them in the field. Black Hawk continued living quietly at Keokuk's village in Iowa until his death on October 3, 1838. Signifi-

Black Hawk (*Library of Congress*)

cantly, the so-called Black Hawk War, to which his name is indelibly associated, was the last act of Native American resistance in the Old Northwest.

August 28

NAVAL: In response to the attacks by Sumatran pirates on American shipping in the East Indies, President Andrew Jackson orders Captain John Downes of the frigate *Potomac* to undertake punitive actions against them.

September 24

NAVAL: Secretary of the Navy Levi Woodbury, who opposes flogging, orders that such punishment can take place only in the presence of a ship's captain and under his explicit orders.

November 1

MILITARY: In light of increasing pressure for the army to patrol and protect vast reaches of the western frontier, Secretary of War Lewis Cass calls for the mounted arm to be reconstituted.

1832**January 1**

MARINES: The sloop *Lexington* under Master Commandant Silas Duncan dispatches marines and sailors ashore to the Falkland Islands to rescue three American whaling vessels illegally detained by Argentinian authorities.

February 6

NAVAL: Captain John Downes of the *Potomac* launches a landing party against pirates at Quallah Battoo, Sumatra. The Americans destroy four forts, kill 150 pirates, including Rajah Po Mahomet, in exchange for two dead and 11 wounded. The surviving Malays are cowed into relinquishing further attacks upon American vessels.

MARINES: The frigate *Potomac* lands 250 marines ashore at Quallah Battoo, Sumatra, capturing pirate forts and burning their settlement. This is the first major American land engagement in Asia.

March 8

NAVAL: Captain David Geisinger of the sloop *Peacock* and Edmund Roberts, a State Department official, leave Boston, Massachusetts, to conclude the first commercial treaty between the United States and several Far Eastern nations.

April 5

MILITARY: A separate Ordnance Department is established by Congress under the aegis of Colonel George Bomford.

April 6–11

MILITARY: Chief Black Hawk suddenly moves his Sac and Fox tribes back across the Mississippi River to traditional hunting grounds in Illinois. Frightened farmers fire on a group of Indians bearing a white flag, and Black Hawk orders them killed. The so-called Black Hawk War ensues, and among those called to serve are Abraham Lincoln and Jefferson Davis.

April 16

MILITARY: In light of rising tensions with the Sac and Fox Indians, Governor John Reynolds mobilizes 1,700 Illinois militia under Brigadier General Samuel White-

side; one company is commanded by an aspiring attorney, Captain Abraham Lincoln. The men are then marched to St. Louis to receive supplies.

May 1

MILITARY: Captain Benjamin L. E. Bonneville leads a large wagon train from Fort Osage, Missouri, as far as the Columbia River, Oregon. He then goes off on his own with 100 volunteers to explore the West for an additional three years, bringing back useful information about Nez Perce and Flathead tribes residing there.

May 7–8

MILITARY: Zachary Taylor is promoted to colonel of the 1st Infantry and Brevet Brigadier General Henry Atkinson orders him to take charge of all troops and militia at Fort Armstrong, Illinois.

May 9–10

MILITARY: Brevet Brigadier General Henry Atkinson commences operations against Black Hawk by ordering the militia under General Samuel Whiteside to scour the south bank of the Rock River while regulars under Colonel Zachary Taylor move along the north bank. Their objective is to locate the Indian camp.

May 11–15

MILITARY: A battalion of mounted Illinois volunteers under Major Isaiah Stillman discovers Black Hawk's camp at Sycamore Creek, Illinois, and Stillman is approached by a truce party bearing a white flag. Suspecting a ruse, the militiamen fire at the party, killing several Indians and then pursuing them. They are routed in turn by an Indian ambush, and the entire rear guard of 12 men is killed while allowing the rest of the battalion to flee back to Dixon's Ferry.

May 19–29

MILITARY: Soldiers and militiamen under Brevet Brigadier General Henry Atkinson begin pursuing renegade Indians under Black Hawk, but the general is forced to discharge all but 300 of his volunteers once their enlistment expires.

June

MILITARY: Brevet Brigadier General Henry Atkinson waits for a new draft of militia to bring his strength up to 3,400 men before he can resume pursuit of the elusive Black Hawk and his band of followers.

June 11

MILITARY: The War Department issues General Order No. 50, which mandates an eagle insignia to denote the rank of colonel; it is still in use today.

June 15

MILITARY: A band of mounted Michigan volunteers under Colonel Henry Dodge engages a party of Sac and Fox at the Pecatonica River, killing 11 Indians.

June 15–28

MILITARY: Increasing activity of the army on the frontier requires Congress to authorize selective enlargement. Hence, the Medical Department receives another 69 surgeons and assistants. More importantly, a battalion of Mounted Rangers, consisting of 660 men and 25 officers, is created. This is the first cavalry unit in service since 1815 and is commanded by Colonel Henry Dodge.

June 16

MILITARY: President Andrew Jackson, angered by General Henry Atkinson's lack of results against Black Hawk, orders General Winfield Scott to proceed from the Eastern Department to Illinois and assume command of operations. Several more companies of infantry and artillery are also dispatched to the theater.

June 26

MILITARY: A skirmish between Mexicans and Texans in the Battle of Velasco results in the first bloodshed between the opposing groups.

July 1–10

MILITARY: As soon as four steamships carrying 1,000 troops under General Winfield Scott pass Detroit, an outbreak of cholera occurs and ravages the soldiers. Scott takes great care of the soldiers at risk of infection; nonetheless, more than 200 die and the rest are incapacitated.

July 18–21

MILITARY: Mounted troops under Colonel Henry Dodge locate Black Hawk's band at Wisconsin Heights, Michigan; the Indians fight a skillful delaying action as they escape across the Wisconsin River.

July 27–31

MILITARY: A force of 1,700 regulars and militiamen under Brevet Brigadier General Henry Atkinson pursue Black Hawk's band to within 20 miles of the Mississippi River. The Indians are preparing to cross en masse.

August 1–2

MILITARY: General Henry Atkinson, assisted by the steamboat *Warrior*, decisively defeats the Sac and Fox Indians under Black Hawk at the Battle of Bad Axe River, Michigan Territory. The Indians lose an estimated 150 dead and 50 captured in exchange for 24 American casualties. This engagement concludes the final episode of Native American resistance in the Old Northwest.

August 7–25

MILITARY: Hostilities with Black Hawk wind down and finally end once the chief is seized by Winnebago and handed over to the Americans. He is then bound over to Lieutenant Jefferson Davis and transported to Jefferson Barracks, Missouri. Total army casualties for this conflict are five soldiers killed and one wounded.

- Four companies of mounted rangers are initially deployed at Fort Armstrong, Illinois, to patrol a region still wracked by Indian violence.

September 14

MILITARY: At Fort Gibson, Arkansas River, a company of mounted rangers arrives under the command of Captain Jesse Bean. He is tasked with making long patrols of the Pawnee and Comanche territories to enforce the peace.

September 21

INDIAN: General Winfield Scott negotiates a treaty at Fort Armstrong to formally end the Black Hawk conflict. It requires the Indians to cede most of present-day Wisconsin and Iowa to the United States. The surviving Sac and Fox Indians

Atkinson, Henry (1782–1842)

Army general

Henry Atkinson was born in North Carolina in 1782, and in 1808 he joined the U.S. Army as a captain in the 3rd Infantry. He fulfilled various capacities throughout the War of 1812 and by 1815 had risen to colonel of the 6th Infantry. Atkinson remained at Plattsburgh, New York, until 1819, when Secretary of War John C. Calhoun ordered him on an expedition to the Great Plains for the purpose of impressing Native Americans living there with the power of the United States. This was also intended as the first military expedition outfitted with new steamboat technology and much was expected from its use. In July of that year, Atkinson shepherded nearly 1,000 men up the Missouri River from St. Louis, but mechanical difficulties forced him to stop and winter at Council Bluffs, Nebraska. He subsequently received command of the 9th Military District, headquartered at St. Louis, from which he orchestrated the construction of roads and forts to facilitate frontier exploration and migration. In 1820 Atkinson dispatched Major Stephen H. Long on his noted expedition to the Rocky Mountains and across the great “American desert.” In 1825 he advanced to brigadier general and conducted a second foray north to the mouth of the Yellowstone River (Wyoming), and there concluded the first treaties with tribes inhabiting that region. In this manner, trade and peaceful relations were greatly facilitated. That same year, Atkinson chose the site for the celebrated Jefferson Barracks in St. Louis, which for many years housed the army’s only school

for infantry. In 1827 he also dispatched Lieutenant Colonel Henry Leavenworth into the Kansas Territory to establish a small cantonment, which evolved into Fort Leavenworth, a significant frontier post.

The western frontier at this time could be a violent, dangerous place, and in 1827 Atkinson accompanied troops to Wisconsin to contain a revolt by the Winnebago tribe. Affairs became even more violent in 1832 when a dissident band of Sac and Fox Indians under Chief Black Hawk abrogated an agreement to relocate across the Mississippi River and returned to their native homelands in Illinois. Once fighting broke out, Atkinson began assembling troops and militia to confront the Indians, whom he badly defeated at the Battle of Bad Axe on August 2, 1832. The Americans vigorously pursued the fleeing Indians to the banks of the Mississippi River, using the steamship *Warrior* to bombard them. The tribesmen were completely defeated in this, the last gasp of Native American resistance in the old northwest, and Black Hawk’s people were forcefully relocated to Iowa. President Andrew Jackson was thus enabled to accelerate his timetable for Indian removal on a wider scale. In 1837 and 1840 Atkinson helped relocate the Potawatomi and Winnebago tribes, respectively, to new homes farther west before he died of illness on June 14, 1842. His lengthy career marks him as an important military and administrative figure throughout the middle plains region; Fort Atkinson, Iowa, is named in his honor.

under Chief Keokuk readily sign it, which also reaffirms a treaty first signed in 1804. Chief Black Hawk denounces both as fraudulent.

November 5

MILITARY: The War Department issues General Order No. 100, which terminates the whiskey ration in soldiers's diets and replaces it with coffee and sugar. However, months of hard service at isolated outposts will contribute to endemic alcoholism among the rank and file.

November 26

MILITARY: In light of the Nullification Crisis with South Carolina, General Winfield Scott arrives at Charleston, ostensibly to inspect coastal defenses and arsenals. He then requests reinforcements from General Andrew Jackson and receives five additional companies of artillery from Fortress Monroe, Virginia. Jackson has threatened to employ military force if the state attempts to secede from the Union.

1833

February

MILITARY: At Fort Leavenworth, a mounted ranger company under Captain Matthew Duncan arrives. It is tasked with accompanying members of the 6th Infantry on a patrol down the Santa Fe Trail.

March

MILITARY: Congress, in an attempt to combat ongoing problems with desertion, raises the pay of soldiers to \$6 per month and reduces the term of enlistment from five to three years. However, whipping is reinstated as official punishment for deserters.

March 2

MILITARY: Congress authorizes creation of the 1st Dragoon Regiment, the first such mounted regulars since 1815. Henry Dodge is appointed colonel and he commands 749 officers and men. Stephen Watts Kearny transfers from the infantry to serve as his lieutenant colonel.

March 20

NAVAL: Captain David Geisinger of the *Peacock* and Edmund Robert of the State Department conclude a commercial treaty between the United States and the Kingdom of Siam. It is the nation's first such agreement with a Far Eastern nation and proof of the growing importance of the Pacific region to American trade.

April 10

MARINES: The Marine Corps uniform of blue jackets and scarlet facings is replaced by one of green and buff as per orders of President Andrew Jackson.

June 17

NAVAL: In Norfolk, Virginia, the ship of the line *Delaware* enters dry dock for the first time in navy history, despite that facility's unfinished condition. Commodore Lewis Warren, determined to have the Norfolk facility become operational ahead of a similar facility in Boston, has ordered the vessel ashore, regardless.

June 24

NAVAL: In Boston, Massachusetts, the venerable old warrior *Constitution* becomes the first vessel to use the new dry dock facility there. Vice President Martin Van Buren and Secretary of the Navy Levi Woodbury are on hand to witness the occasion.

October 31

MARINES: A U.S. Navy squadron disgorges marines and sailors at Buenos Aires, Argentina, to protect American lives and property at a time of political unrest.

November 20–December 14

MILITARY: Colonel Henry Dodge arrives at Jefferson Barracks, Missouri, with five companies of recruits for his new 1st Dragoons. After they have been suitably trained, he leads them on a 500-mile winter march to Fort Gibson.

1834**January 29–March 22**

MILITARY: At Williamsport, Maryland, two companies of the 1st Artillery are deployed to maintain peace between rival groups working on the Chesapeake and Ohio Canal. This marks the first intrusion of army troops in labor affairs.

June 17–July 4

MILITARY: From Fort Gibson, Brevet Brigadier General Henry Leavenworth leads eight companies of the 1st Dragoons on their first foray to the upper Red River Valley to arrange treaties with Indians living in that region. He is accompanied by noted artist George Catlin, who will record what he sees with vivid imagery.

June 30

INDIAN: The Indian Department is established within the War Department by Congress.

NAVAL: In a highly significant move, Congress approves a sum of \$5,000 for conducting experiments with steam engines for naval vessels. Within a decade, innovations here will revolutionize this sail-oriented service.

MARINES: The Act for the Better Organization of the United States Marine Corps is passed by Congress, stating that the marines remain under naval jurisdiction unless detached by the president to serve with an army command. Its present assigned strength is 63 officers and 1,224 rank and file.

July 1

NAVAL: In Washington, D.C., Mahlon Dickerson is sworn in as the 10th secretary of the navy.

July 4

MILITARY: The first dragoon expedition is nearly sidelined by illness and heat exhaustion, and 200 soldiers, including Brevet Brigadier Colonel Henry Leavenworth, remain behind at the Washita River. However, Colonel Henry Dodge, who arrives to take command, leads several companies to the Pawnee and Comanche villages.

July 19

MARINES: Local marines deploy from the Brooklyn Navy Yard to prevent looting in New York City following a large fire there.

July 21

MILITARY: Brevet Brigadier Henry Leavenworth, a distinguished veteran of the War of 1812 and a capable frontier administrator, dies of injuries sustained in a riding accident near the Washita River. He is the first general to die west of the Mississippi River.

August 15

MILITARY: Colonel Henry Dodge leads the survivors of the first dragoon expedition back to Fort Gibson. He has lost more than 100 men to sickness and heat exhaustion.

1835

May 29

MILITARY: At Fort Gibson, Colonel Henry Dodge and the 1st Dragoons commence a 1,600-mile expedition to the Platte River, then down to Pueblo, New Mexico. His purpose is to negotiate trade treaties with local tribes and impress upon them the power of the United States.

June 30

MILITARY: The attempts at greater centralization by Mexican dictator Santa Anna lead to increasing friction between that ruler and American settlers in what is Texas. Colonel William B. Travis and a group of armed colonists take control of a Mexican fort at Anahuac in protest while other Texans skirmish with Mexican cavalry near Gonzales.

August 22

MILITARY: Former army captain Benjamin L. E. Bonneville returns from three years in the field and composes a highly detailed account of his sojourn. He then applies for reinstatement of his rank but is refused by Secretary of War Lewis Cass.

September 16

MILITARY: Riding the Sante Fe Trail, Colonel Henry Dodge leads the 1st Dragoons back to Fort Leavenworth, concluding a 1,600-mile expedition into the heart of Indian country.

October 2

MILITARY: A party of Texas volunteers defeats a detachment of Mexican cavalry near the Guadalupe River in central Texas; this is the opening round of the Texas Revolution.

October 29

NAVAL: Commodore Alexander J. Dallas receives orders for his West India Squadron to deploy along the west coast of Florida and assist in the removal of Seminole Indians there.

November 1

INDIAN: Large portions of the Seminole tribe under Chief Osceola steadfastly refuse to be relocated from Florida and threaten to resist by force; this defiance precipitates the Second Seminole War. Nonetheless, Brigadier General Duncan L. Clinch orders tribal leaders to begin assembling their people for relocation to the West.

November 19

NAVAL: The sloop *Vincennes* under Commander John A. Aulick pays the first visit to Guam by an American warship.

December 8–9

MILITARY: Texan forces drive a Mexican force under General Martin Perfecto Cos out of San Antonio after three days and nights of intense fighting.

December 17

MARINES: Landing parties from the frigate *Brandywine* go ashore at Lima, Peru, to protect American lives and property.

December 18–25

MILITARY: In Florida, hostilities flare anew as Seminoles attack tribal members friendly to the United States at Black Swamp. A battalion of mounted militiamen is then raised by the governor, but its baggage train is attacked by warriors under Osceola. The Americans lose six dead and eight injured.

December 23–27

MILITARY: An army column of 100 men from the 2nd and 3rd Artilleries departs Fort Broke, Florida, under Major Francis L. Dade. They are marching to reinforce the garrison at Fort King, but are watched closely by Seminole lurking nearby.

December 28

MILITARY: The Second Seminole War begins as Indian Agent Wiley Thompson is murdered at Fort King, Florida, by a war band headed by Chief Osceola. Meanwhile, a patrol headed by Major Francis L. Dade is ambushed outside Fort Brooke near Wahoo Swamp, losing 110 men killed, Dade among them. Three soldiers survive the attack; two of these die of wounds.

December 29–31

MILITARY: Brigadier General Duncan L. Clinch advances to the Withlacoochee River, Florida, intending to attack an Indian camp with 250 soldiers and 560 mounted militiamen. No sooner does the force ford the river than it comes under heavy fire from the woods and Clinch sounds a retreat. The Americans lose four dead and 51 wounded.

1836**January 1**

NAVAL: Lieutenant Edward T. Dougherty, responding to pleas from Florida governor John Eaton, marches from Pensacola with 29 sailors and marines to patrol the stretch of land near Tampa Bay and search for recalcitrant Seminole.

January 17

MILITARY: In Florida, the Volunteer St. Augustine Guards are roughly handled by a war band of Seminole and retreat after losing nearly half their number. The Indians are on a raiding spree and burn numerous plantations.

January 21

MILITARY: General Winfield Scott is authorized to take command of all military forces in Florida. His adversary, General Edmund P. Gaines, is ordered to remain

Osceola (ca. 1804–1838)

Seminole chief

Osceola was probably born around 1804 along the Tallapoosa River on the Georgia-Alabama border, part of the Lower Creek nation. This group had been under duress in the face of white encroachment, and many had relocated to Florida in concert with escaped African-American slaves to be assimilated by the Seminole nation. Little is known of his youth, but Osceola's name is probably a corruption of the phrase "asi yohola" or "black drink crier," a term with religious connotations. He apparently matured into a fine warrior with a commanding presence and around 1832 was first noticed as a "tustenugge," or war chief. In this capacity Osceola railed against the continuing loss of tribal land to the United States. Two years earlier, Congress had approved the Indian Removal Bill, which mandated the forced relocation of Native Americans across the Mississippi River to new homes in Oklahoma. However, this was done in violation of an earlier treaty,

Osceola (Library of Congress)

at New Orleans, Louisiana, but he departs for Florida with troops of his own before the order arrives.

NAVAL: Commodore Alexander J. Dallas of the West India Squadron receives orders to blockade southern Florida to keep Spanish arms and ammunition out of Seminole hands. The blockade remains in force throughout the war.

January 22

MARINES: Detachments of marines from the frigate *Constellation* and sloop *St. Louis* come ashore to reinforce Fort Brooke at Tampa, Florida, in anticipation of a possible Seminole attack.

January 28

NAVAL: As hostilities with the Seminole escalate, Master Commandant Thomas T. Webb departs Pensacola with the sloop of war *Vandalia* and sails to Tampa Bay to assist in the defense of Fort Brooke.

signed in 1823, which granted the Indians the right to remain on existing land. Moreover, the government forced tribal elders to conclude the Treaty of Payne's Landing, whereby the Seminole were obliged to surrender all their Florida holdings and move across the Mississippi en masse. The treaty also mandated the surrender of all escaped African-American slaves who had been coopted into the tribe as members. Because one of Osceola's two wives was a mulatto, he refused to comply. In 1833 Indian agent Wiley Thompson arrived in Florida intending to enforce earlier agreements, but Osceola reputedly drew his knife and defiantly stabbed the parchment in front of the Americans. He was then arrested and held in shackles for several days until, feigning a change of heart, Osceola gained his release.

Once free, Osceola made immediate preparations to go to war. On December 28, 1835, he attacked the Indian agency at Fort King, Florida, and killed Thompson, while other Seminole massacred the army patrol of Major Francis L. Dade near

Wahoo Swamp. This violence precipitated the Second Seminole War, one of the costliest and longest insurgencies ever waged by the United States. For seven years the Americans dispatched hundreds of troops and militia into Florida, waged countless skirmishes, but failed to cow the Indians into surrendering. Osceola, for his part, was tricked into a parley by General Thomas S. Jesup and then treacherously captured on October 21, 1837. He was transported to Fort Moultrie, South Carolina, where he was interned and had his portrait painted by artist George Catlin. Despite public outrage over the manner in which the chief was seized, Osceola remained behind bars and died of illness there on January 30, 1838. He was buried with full military honors, but his Seminole compatriots waged an incessant partisan war until 1842, when a truce was signed. At that time, the exhausted tribesmen decided to depart for new homes in Arkansas, but 300 holdouts, inspired by Osceola's example, defiantly refused. The fact that Seminole still reside in Florida today is his greatest legacy.

February

MILITARY: In light of continuing tensions with Mexico, the 6th Infantry departs Jefferson Barracks, Missouri, and relocates to Fort Jesup, Louisiana, to safeguard American interests.

February 9–22

MILITARY: Brigadier General Edmund P. Gaines lands at Tampa, Florida, with six companies of the 4th Infantry and cautiously marches to the site of the Dade ambush. The remains of several soldiers are interred. Pushing on to Fort King, Gaines arrives to find that promised food supplies are not there.

- During this same period, General Winfield Scott and his staff arrive at Picolata on the St. John's River, although without any troops. Dismissing the presence of General Gaines, he prepares his own plan for dealing with the Seminole.

February 23–March 6

MILITARY: General Antonio López de Santa Anna leads a force of 3,000 soldiers against a motley garrison of 187 Texans under Colonel William B. Travis at the Alamo mission in San Antonio, Texas.

February 25

TECHNOLOGY: Samuel Colt receives a patent for his revolving six-chambered pistol, a weapon that will revolutionize small arms.

February 26–27

MILITARY: A force of 1,000 men under General Edmund P. Gaines crosses the Withlacoochee River, Florida, only to be fired upon by Seminole lurking in the woods. The Americans subsequently construct a log breastwork—christened Camp Izard after a fallen officer—and they are besieged there for several days by a large force of Indians. Short on food and ammunition, General Gaines will appeal to Brigadier General Duncan L. Clinch for immediate assistance.

March 1–8

MILITARY: In Florida, Brigadier General Duncan L. Clinch disobeys a direct order from General Winfield Scott not to assist the beleaguered General Gaines; Clinch marches from Fort Drane with a column of infantry and some supplies to relieve Gaines.

March 6

MILITARY: In a final rush, Mexicans under General Antonio López de Santa Anna capture the American outpost at the Alamo in San Antonio. Among the defenders is the noted frontiersman Davy Crockett, who was apparently taken alive and then executed by firing squad. The only survivors are a mother, her child, and their servant. Instead of cowing Texans from resisting, martyrdom at the Alamo galvanizes resistance.

March 9–28

MILITARY: General Edmund P. Gaines departs Florida for New Orleans, Louisiana, leaving Brigadier General Duncan L. Clinch in charge of his forces. Once back at the city, he finds new orders placing him in charge of western frontier defenses during the Texas War for Independence.

March 13

MILITARY: Alamo survivor Susanna Dickinson is released by General Antonio López de Santa Anna; she returns to Gonzalez, Texas, with a message that further resistance “is hopeless.”

March 16–30

NAVAL: Captain Ezekiel Jones, U.S. Revenue Cutter Service, takes the vessel *Washington* along the shores of Charlotte Harbor (Tampa), Florida, looking for Seminole. Landing parties also go inland 10 miles seeking Indians, without success.

March 22–April 4

MARINES: A combined army/marine column marches from Fort Broke at Tampa, Florida, and sweeps the adjoining area. Several skirmishes ensue.

March 25–31

MILITARY: General Winfield Scott commences his three-pronged offensive against the Seminole, which is intended to converge on their main villages along the Withlacoochee River. Scott accompanies the right column under Brigadier General Duncan L. Clinch, while Brigadier General William Eustis leads the left column. The center column consists of 1,250 Alabama and Florida militia under Colonel William Lindsey. Some heavy skirmishing results, but at length the Americans run low on food and withdraw without accomplishing much.

March 27

MILITARY: Mexican forces under General Antonio López de Santa Anna capture a detachment of 350 Americans under Captain James W. Fannin, then massacre them. The Mexicans also continue to devastate American settlements on their march to Galveston Bay.

March 31–April 27

MARINES: Landing parties from the *Vandalia* join army troops on a sweep up the Myacca River, Florida; little resistance is encountered.

April

MILITARY: Worried that the Cherokee might ally themselves with the Mexicans in Texas, General Edmund P. Gaines orders out volunteers from Louisiana, Alabama, Mississippi, and Arkansas. He remains under orders not to cross the Sabine River unless the Cherokee attack Texas.

- In Alabama and Georgia, militant members of the Creek nation are preparing to resist relocation across the Mississippi River. A force of 1,000 regulars and 9,000 militiamen is being mobilized to deal with the tribesmen and remove them at bayonet point, if necessary.

April 1

MILITARY: Once resupplied, General Winfield Scott renews his sweep of the Withlacoochee River, Florida, in several columns. The elusive tribesmen nonetheless evade the Americans in swampy terrain.

NAVAL: Near Tampa Bay, Florida, Lieutenant Levin M. Powell's boat expedition from the sloop *Vandalia* surprises a body of Seminole in their camp and attacks. Two Indians are killed and several wounded in the ensuing firefight.

April 14

MILITARY: Seminole warriors surprise a burial detail outside Fort Barnwell, Florida; Major William Gates will be court-martialed for not recovering the bodies from the Indians. Though convicted and cashiered, he appeals his sentence and is reinstated a year later.

April 20

MILITARY: Seminole launch a rare night attack against Fort Drane, Florida, but prove unable to storm the fort. It is relieved by American forces four days later.

April 21

MILITARY: A Texan force of 900 men under General Sam Houston attacks and routs the 1,300-strong Mexican army under General Antonio López de Santa Anna at the Battle of San Jacinto. A surprise attack catches the Mexicans off-

guard, and the Texans completely overrun their camp to the fierce battle cry of "Remember the Alamo!" Santa Anna is captured and suffers 630 killed and 730 captured. Texan losses are nine dead and 30 injured. This startling upset virtually assures Texas independence from Mexico.

April 27

MILITARY: In Florida, Alabama militia under Colonel William Chisolm are ambushed by Seminole as they march toward Fort Alabama. After fighting off the attack, Chisolm sets a powder charge that destroys the abandoned fort, along with any Seminole who may have wandered in.

May 18

NAVAL: Congress authorizes the outfitting of the government's first oceanic surveying expedition; ultimately it encompasses six vessels commanded by Lieutenant Charles Wilkes.

Henderson, Archibald (1783–1859)

Marine Corps general

Archibald Henderson was born in Dumfries, Virginia, on January 21, 1783, and he joined the U.S. Marine Corps in June 1806 as a second lieutenant. An efficient officer, he gained promotion to captain and was in charge of the marine barracks at the Charlestown Navy Yard, Boston, when the War of 1812 commenced. In this capacity he was onboard the frigate *Constitution* during its December 29, 1812, victory over HMS *Java*, and also commanded the marine contingent during its February 20, 1815, victory over HMS *Cyane* and *Levant*. Henderson's personal conduct under fire so impressed commanders that he was allowed to personally convey captured British flags to the secretary of the navy. In 1816 Henderson received a brevet promotion to major and a silver medal from Congress. He continued in command at Boston and Portsmouth, New Hampshire, until 1819, when he was summoned to Washington, D.C., and appointed interim Marine

Corps commandant following the death of Lieutenant Colonel Franklin Wharton. Three years later Henderson was himself made commandant, a position he occupied for the next 38 years. This proved to be a pivotal moment in Marine Corps history; prior to his appointment, marines suffered from cutbacks in manpower, poor morale, and lackluster leadership. Henderson devoted all his energies to his marines over the next four decades, paying particular attention to their esprit d'corps and professional deportment. For example, he personally inspected every shore station and held all hands strictly accountable for public property in their possession. Furthermore, he required all new officers to be attached to headquarters in Washington, D.C., where he could observe and instruct them in person.

Nor was Henderson an armchair general. When the Second Seminole War erupted in 1835, he volunteered his ser-

May 21

MILITARY: Secretary of War William Cass, noting General Winfield Scott's lack of success in Florida, orders him north into Georgia to help orchestrate removal of recalcitrant Creek. Scott, frustrated by his elusive foe, is all too happy to comply. Meanwhile, Florida governor Richard Keith Call requests permission to direct military operations in his state.

MARINES: President Andrew Jackson accepts the offer of the Marine Corps commandant, Lieutenant Colonel Archibald Henderson, to lead a marine regiment against the Seminole; he becomes the first commandant to conduct an operation in the field.

May 23

MILITARY: Congress, noting the utility of mounted formations in the Far West, approves funding to create the 2nd Regiment of Dragoons under newly promoted

vices to President Andrew Jackson and was authorized to take two battalions into the field. He then accompanied army forces commanded by General Thomas S. Jesup at the Battle of the Hatcheluskee River in January 1837, becoming the first marine officer to win brevet promotion to brigadier general. Meanwhile, his marines assumed global combat responsibilities by accompanying the punitive expedition to Qualah Battoo in 1832, the capture of Mexico City in 1847, and the mission of Commodore Matthew C. Perry to Japan in 1854. Back in Washington, Henderson also artfully combated every attempt to either reduce or eliminate the Marine Corps as an independent force, and managed to anchor the corps as an integral part of the American defense establishment. In 1857 Henderson's marines were summoned to restore order in the capital when a crowd of political rowdies, so-called Plug Uglies, disrupted local elections. Henderson typically strode up to a cannon they had pointed at his marines, placed himself in front of the barrel, then dared them to fire—order was

Brigadier General Archibald Henderson
(United States Marine Corps)

restored soon after. Henderson died in the Commandant's House on January 6, 1859, having bequeathed to marines the national visibility they enjoy today.

Colonel David E. Twiggs. Congress also appropriate money to secure 10,000 volunteers for either six or 12 months to bolster the war effort in Florida.

May 26–28

MILITARY: Once at Milledgeville, Georgia, General Winfield Scott plans a multi-pronged offensive into the Creek heartland to subdue them as quickly as possible. However, supplies and militia troops prove slow in gathering.

June 1–7

MILITARY: Fort King, Florida, is devastated by illness and fever, so the 166-man garrison abandons its post. Meanwhile, rampaging Seminole continually attack Fort Drane until Captain Lemuel Gates trains a howitzer upon them and then conducts a bayonet charge; the Indians depart.

June 2

MARINES: Lieutenant Colonel and Commandant Archibald Henderson and the 1st Battalion of marines disembark at Columbus, Georgia, after a voyage of 224 miles and 14 days from Washington, D.C.

June 9

MILITARY: At Micanopy, Florida, the 70-man garrison of Fort Defiance sorties against more numerous Seminole while a detachment of the 2nd Dragoons assails the Seminole flank; the Indians melt away into the woods.

June 10–28

MILITARY: In Georgia, General Thomas S. Jesup, fearing that his Alabama militia will desert if not committed to action soon, advances against hostile Creek Indians. He subsequently captures the main Indian camp, but General Winfield Scott is furious that he has twice disobeyed orders to stop. However, it is Scott who will be summoned to Washington, D.C.

June 19–July 27

NAVAL: On the Chattahoochee River, Alabama, the former civilian steamers *American*, *Major Dade*, and *Lieutenant Izard* commence routine patrols against potentially hostile Creek. Their efforts are designed to assist General Winfield Scott's land operations there.

June 20

MILITARY: In Alabama, Inspector General and Colonel John E. Wool is dragged to court by the civilian government for protecting Creek Indians under his control from mistreatment. Wool openly sympathizes with the Indians, and the courts vindicate him. But the Indians are nonetheless relocated.

June 21

INDIAN: The army recruits a Creek Volunteer Regiment for service against the Seminole, led by white officers. However, their regimental major is David Moniac, a native Creek and the first Native American to graduate from the U.S. Military Academy, in 1822.

MILITARY: Secretary of War Lewis Cass authorizes Florida governor Richard K. Call to assume command of military operations against the Seminole, including regular forces, even though he himself is a territorial brigadier general of militia.

July 1

MARINES: The 2nd Battalion, U.S. Marines, under Lieutenant Colonel William H. Freeman, arrives at Columbus, Georgia, to reinforce the 1st Battalion already there. One-half of total Marine Corps manpower is now committed to the Seminole War.

July 2

MILITARY: At Fort Mitchell, Georgia, army troops begin the forced relocation of Creek Indians; those who resist are put in shackles and dragged away—despite the fact that Creek warriors have volunteered to fight the Seminole in Florida and will have to rejoin their families out west.

July 10

MILITARY: As tensions with Mexico increase, General Edmund P. Gaines orders a squadron of the 2nd Dragoons and several companies of the 7th Infantry to occupy Nacogdoches; this is in territory disputed by Mexico, but the garrison is eventually withdrawn.

July 12

NAVAL: In a major development, Charles H. Haswell becomes the navy's first commissioned engineer; over a 16-year career, he will compile the first engineering reference books and other treatises. Technology is becoming of paramount importance to this service.

July 18–22

MILITARY: Colonel Zachary Taylor moves his 1st Infantry from Jefferson Barracks, Missouri, on steamers down the Mississippi River, to Fort Jesup, Louisiana. This is a post he helped to construct in 1822.

July 19

MILITARY: At Micanopy, Florida, a train of 22 wagons escorted by dragoons and artillerymen under Captain William S. Maitland is ambushed by Seminole under Osceola at Welika Pond, near Fort Defiance. The Indians are driven off after relief arrives; the Americans suffer five dead and six injured.

August 21

MILITARY: A mixed force of artillerymen and dragoons under Major Benjamin F. Pierce surprises a body of Seminole in camp near Fort Defiance, Florida, but is driven back with the loss of one killed and 16 wounded. Three days later Fort Defiance is deemed untenable and evacuated.

September 11–20

MILITARY: After a Tennessee brigade arrives, Governor Richard K. Call marches it to the Suwannee River and thence to Fort Drane, looking for hostile Seminole. None are found, but a Georgia volunteer regiment, marching south, encounters hostile Indians in northern Florida and skirmishes with them.

October 2

NAVAL: The sloop-of-war *Vandalia*, assisted by revenue cutter *Washington*, sails from Pensacola, Florida, and makes for Key West to scout for hostile Seminole. Once there, Lieutenant Levin M. Powell is to conduct navy sweeps inland along various waterways, including the Everglades; this is the navy's first experience at riverine warfare.

October 3

MILITARY: In Washington, D.C., General Winfield Scott, expecting that he will be praised for his handling of the Creek uprising, is shocked to find himself under a court of inquiry investigating his difficulties with General Edmund P. Gaines. Scott is eventually cleared while Gaines is censured for unofficer-like behavior.

October 5

MILITARY: President Andrew Jackson appoints Attorney General Benjamin F. Butler—a future Civil War general—to temporarily direct affairs at the War Department.

October 6–November 20

MARINES: A body of 95 marines and 50 bluejackets under Lieutenant Levin M. Powell begins searching the Florida coast between Charlotte Bay on the Gulf coast and St. Lucie on the Atlantic for Seminole; none are encountered.

October 8–19

MILITARY: Governor Richard K. Call's force, strengthened by 200 regulars under Major Benjamin K. Pierce, attempts to cross the Withlacoochee River, Florida, and is forced back by heavy musket fire. Short on supplies, Call orders his men back to Fort Drane.

October 13–December 9

MARINES: At Key West, Florida, the *Vandalia* launches marines and sailors up the Miami River in boats to search for Seminole.

November 4

MILITARY: In Washington, D.C., Acting Secretary of War Benjamin F. Butler informs Governor Richard K. Call that he is being succeeded in Florida by Brevet Major General Thomas S. Jesup as theater commander. The information arrives too late to prevent Call from embarking on another offensive operation against the Seminole.

November 17–18

MILITARY: Returning to the Withlacoochee River, Governor Richard K. Call bests the Seminole in two large skirmishes, losing three dead and killing 25 Indians. He continues pressing ahead, unaware that he has been succeeded by Brevet Major General Thomas S. Jesup.

November 21

MILITARY: American forces under Governor Richard K. Call attack a large Seminole force at Wahoo Swamp, Florida, advancing to within 50 yards before firing muskets and charging bayonets. The Indians fall back across a stream and make a stand, and then the fighting subsides. Among the slain is a native Creek, Major David Moniac of the Creek Volunteers, the first Native American West Point graduate.

December

MILITARY: American forces in Florida are bolstered by the arrival of five companies of the newly raised 2nd Dragoons, who arrive by ship at Savannah, Georgia, then saddle up and ride south.

December 2–9

MILITARY: In Florida, Governor Richard K. Call is finally notified of his replacement by Brevet Major General Thomas S. Jesup. Call protests the move, but Jesup begins planning his own campaign to assault the Seminole strongholds.

December 12

MILITARY: In Florida, General Thomas S. Jesup elects to keep his forces concentrated, rather than disperse them into roving columns. Jesup also appoints an engineering officer, Brevet Brigadier General Walter K. Armistead, in charge of northern Florida, while he takes control of military affairs in the southern half.

1837**January 3–May 18**

MARINES: Lieutenant Colonel and Commandant Archibald Henderson departs Fort Brooke at Tampa, Florida, as part of an army expedition into the Seminole heartland.

January 8

MARINES: Lieutenant Colonel and Commandant Archibald Henderson assumes control of one of two brigades composing the Army of the South. He commands the 1st Marine Battalion, the 4th Infantry, some Georgia volunteers, Creek auxiliaries, and artillery units.

January 10–27

MILITARY: Brevet Major General Thomas S. Jesup continues his offensive, but his ponderously slow columns have trouble engaging the fast-moving Seminole. A handful of Indians are killed in several minor actions in and around Lake Apopka, but otherwise fighting is light.

January 27

MARINES: The 2nd Brigade under Lieutenant Colonel and Commandant Archibald Henderson engages hostile Seminole along the banks of the Hatcheelustee River, Florida. The Americans attack, completely dispersing their adversaries, who scamper back into the swamps. Henderson subsequently receives brevet promotion to brigadier general, becoming the marines' first general officer.

February 3

INDIAN: Brevet Major General Thomas S. Jesup parleys with various Seminole chiefs and arranges a temporary truce, with plans for a major council on the 18th.

February 8

MILITARY: Seminole Indians, ignoring their prior truce, attack a detachment of the 8th Infantry and some dragoons under Colonel Alexander C. W. Fanning near Lake Monroe, nearly overrunning the Americans.

NAVAL: Gunboats on Lake Monroe, Florida, aid a beleaguered army detachment by providing close support fire that beats back a determined Seminole assault.

March 4

MILITARY: In Washington, D.C., Martin Van Buren is sworn in as the eighth president and military commander in chief.

March 6

INDIAN: Three Seminole leaders sign a peace treaty at Fort Dale, Florida, agreeing to peacefully assemble at Tampa for relocation. In a significant concession, Brevet Major General Thomas S. Jesup allows them to take all African Americans living with them, free or slave—a stance that angers local slaveholding interests.

March 7

MILITARY: In Washington, D.C., Joel Poinsett is appointed the 15th secretary of war.

May 19

MILITARY: In a major reorganization, the War Department renames its Eastern and Western Departments as “divisions.” The Mississippi River now serves as the administrative boundary between them.

May 23

MARINES: Lieutenant Colonel and Commandant Archibald Henderson returns to Washington, D.C., while Lieutenant Colonel Samuel Miller remains in command of his troops in Florida.

June 2

MILITARY: At Tampa, Florida, Chief Osceola and 200 warriors rescue all Seminole assembled there for deportation in a daring nighttime raid; this act undoes the recent truce and treaty between the tribe and Brevet Major General Thomas S. Jesup.

July 23

MARINES: The bulk of Marine Corps troops are withdrawn from Florida and return to the Washington Navy Yard; over the next four years, marines drawn from offshore vessels will serve in small boats as part of the “Mosquito Fleet” and conduct riverine warfare.

August 5

MILITARY: In St. Louis, Missouri, Lieutenants Robert E. Lee and Montgomery C. Meigs arrive to commence their careers with the Corps of Engineers. Both Southerners are slated for highly significant roles in the Civil War—on opposite sides.

September

INDIAN: In light of difficulties in subduing the Seminole in Florida, the army begins recruiting Shawnee and Delaware warriors at Fort Leavenworth. These are organized into two companies and assigned to Colonel Zachary Taylor’s command.

MILITARY: Brevet Major General Thomas S. Jesup, determined to break Seminole resistance, appeals to the War Department for 6,000 army troops. These are to be deployed in seven mobile columns that will sweep Florida for hostile Indians and subdue them by force. Given the swampy nature of the terrain, Jesup also requisitions numerous small boats and pontoon bridges.

September 8–10

MILITARY: Brigadier General Joseph M. Hernandez launches a successful night attack on a Seminole camp at Mosquito Inlet, Florida, capturing several tribal notables. He repeats the tactic two days later with equal success, losing one officer killed.

September 24

NAVAL: Lieutenant Levin M. Powell, pleased with his initial expeditions into the Everglades of Florida, writes to the secretary of the navy and requests to conduct similar operations on a much larger scale. Unknown at the time, Powell's suggestion will serve as the basis for combined army-navy operations later this year.

October

MILITARY: In Florida, Brevet Major General Thomas S. Jesup, having brought the 2nd Dragoons up to strength, commences his fall offensive against the seemingly intractable Seminole.

October 21–22

MILITARY: At Fort Peyton, Florida, American forces under General Joseph M. Hernandez treacherously seize Seminole chief Osceola under a flag of truce. Hernandez is acting under orders from Brevet Major General Thomas S. Jesup not to let the chief escape.

November 19

INDIAN: At the Castillo fort in St. Augustine, Florida, 20 Seminole chiefs and warriors escape from prison by prying out some window bars.

December 13

NAVAL: In New York, the newly launched, oceangoing steamship *Fulton* (II) becomes the first seaworthy vessel of its class in U.S. Navy history.

December 14

MILITARY: At Fort Mellon, Florida, Brevet Brigadier General Thomas S. Jesup orders four Seminole chiefs, who came in under a flag of truce, captured and held.

December 25–28

MILITARY: A force of 1,000 soldiers and militia under Colonel Zachary Taylor attacks and defeats the Seminole at Okeechobee Swamp, Florida. Taylor places the untried Missouri volunteers in the front rank and they behave poorly in their first encounter. A bloody three-hour struggle ensues in knee-deep water, and the Americans suffer 26 dead and 112 wounded before the Indians finally quit. Seminole losses are 25 found slain on the field and a further 180 captured. The Indians have fought well but cannot afford such attrition and revert to guerrilla warfare. Taylor wins promotion to brevet brigadier general.

December 26

MILITARY: In northern Florida, a presumably “pacified” area, Georgia volunteers wage a three-hour contest with Seminole along the Wacasassa River. Few casualties are incurred by either side, but the fight demonstrates the far-ranging reach of hostile warrior bands.

1838**January 4–March 21**

DIPLOMACY: General Winfield Scott is sent to the Canadian border to help adjudicate talks with the British over difficulties engendered by the “Patriot War”

being waged by discontented Canadians. Many of the rebels are openly operating from American territory at Buffalo, New York, and Colonel William Jenkins Worth is ordered to arrest them along with any American supporting them. The bulk of the insurgents eventually surrender to Scott.

January 15

NAVAL: Lieutenant Levin M. Powell leads a patrol of 200 soldiers, sailors, and marines up Florida's Jupiter River and penetrates the Everglades, until the patrol encounters a large Seminole encampment. The Americans suffer four dead and 22 wounded—including Levin—in a stiff action; they gradually withdraw downstream, battered but intact.

January 24

MILITARY: Brevet Brigadier General Thomas S. Jesup orders his troops to attack a concentration of Seminole discovered at the Lockahatchee River, Florida. His Tennessee volunteers waver in the face of fierce resistance, so Jesup gallops over and leads them on foot, being wounded when a bullet shatters his glasses. At length the Indians draw off, leaving seven Americans dead and 31 wounded.

February 8–March 21

MILITARY: Brevet Brigadier General Thomas S. Jesup again tries to resolve the ongoing hostilities through diplomacy and invites several Seminole chiefs to parley with him. The Indians agree to a cease-fire if they are allowed to remain in unsettled portions of southern Florida; Jesup informs Secretary of War Joel Poinsett of the demand. The secretary refuses to agree, so on March 21, another deputation of Indians is seized and imprisoned.

March 22–23

NAVAL: A combined naval/military force under Lieutenant Colonel James Bankhead pursues a Seminole party until they reach an island in the middle of the Everglades, Florida. The Indians trade fire with Lieutenant Levin M. Powell's boats, then retreat. Bankhead's operation represents the first deep penetration of previously inaccessible Seminole territory by American forces.

April 24

MILITARY: A force of 100 dragoons and artillerists under Colonel William S. Harney attacks a Seminole camp in the swamps, intending to capture Chief Old Sam. A three-hour battle ensues, but the Indians withdraw and the chief escapes.

May 1

MILITARY: Back at St. Louis, Missouri, newly promoted Captain Robert E. Lee commences extensive work constructing dams along the Mississippi River. Congress refuses to fund the project further, however, so Lee obtains money from city authorities, and a four-mile channel will eventually be opened around the rapids.

May 8

MILITARY: In Georgia, General Winfield Scott issues Order No. 35, which instructs his soldiers to be considerate toward the remaining Cherokee they are forcibly

**Jesup, Thomas S. (1788–1860)***Army general*

Thomas Sidney Jesup was born in Berkeley County, Virginia, on December 16, 1788, the son of a Revolutionary War veteran. He joined the 7th Infantry as a second lieutenant in 1808 and had advanced to captain by the advent of the War of 1812. Jesup accompanied the ill-fated Northwest campaign of General William Hull and was imprisoned after Detroit surrendered in August 1812. Following his exchange, he transferred to the army of General William Henry Harrison and supervised construction of numerous boats at Cleveland, Ohio, which were necessary for Harrison's invasion of Canada in the fall of 1813. The following spring Jesup advanced to major in the 25th Infantry and joined the 1st Brigade of General Winfield Scott at Buffalo, New York. Here his regiment endured a rigorous, 10-hour per day training routine, and Jesup subsequently accompanied General Jacob J. Brown's invasion of the Niagara peninsula that summer. He bore a conspicuous role in the July 5, 1814, victory at Chippewa, whereby he extended the 25th Regiment around the British right flank, enfilading them. Three weeks later Jesup's regiment composed the American right flank at the bloody Battle of Lundy's Lane, July 25, 1814, where he repulsed several British attacks and captured General Phineas Riall, the British second-in-command. Several severe wounds precluded his participation in the siege of Fort Erie the following August, but that fall he was tapped by Secretary of State James Monroe to march his regi-

ment to Hartford, Connecticut, and keep a close watch on the Federalist-dominated Hartford Convention transpiring there. Although secession from the Union was never discussed, Jesup repeatedly stated his preference for using force to stop them if they so dared. Fortunately, his intervention was not required.

After the war, Jesup was retained in the peacetime establishment, and in May 1818, Secretary of War John C. Calhoun appointed him the first quartermaster general of the U.S. Army, with a rank of brigadier general. Here Jesup made indelible contributions to the American military by ending the practice of employing civilian contractors for supplies and stressing complete self-reliance and strict accountability. Furthermore, his 42-year tenure as quartermaster is unrivaled by any other officer in army history. Jesup served no fewer than 11 presidents and was solely responsible for introducing modern logistical administration to the service. He also rose to brevet major general in 1828, and in 1836 President Andrew Jackson appointed him commander of military forces during Florida's Second Seminole War. Jesup's most notorious act was capturing the Seminole leader Osceola through a ruse, for which he was highly criticized. He nevertheless remained a familiar fixture in the national military bureaucracy until his death in Washington, D.C., on June 10, 1860. In terms of longevity and results, Jesup was one of the most adept and far-sighted administrators in American military history.

deporting across the Mississippi River. Due to the harsh weather encountered, this 1,200-mile sojourn will become reviled as the “Trail of Tears.”

May 15

MILITARY: Brevet Brigadier Zachary Taylor, popularly known among his troops as “Old Rough and Ready,” succeeds Brevet Major General Thomas S. Jesup as overall commander in Florida. Jesup returns to Washington, D.C., to resume his duties as quartermaster general.

May 18

NAVAL: Lieutenant Charles Wilkes, a hot-tempered martinet, receives command of the U.S. Exploring Expedition in Washington, D.C. This is the first government-funded attempt to acquire scientific knowledge around the globe.

May 31

NAVAL: Lieutenant John McLaughlin receives command of the former yacht *Wave*, with which he is to patrol Florida waters to keep Spanish traders from supplying the Seminole with firearms and gunpowder.

June 17

MILITARY: A detachment from the 2nd Dragoons skirmishes with Seminole at Kenahapa Prairie in northern Florida Territory.

July 1

NAVAL: In Washington, D.C., James K. Paulding is sworn in as the 11th secretary of the navy.

July 5

MILITARY: With congressional approval, the War Department organizes the Topographical Engineers into a separate corps under Colonel John J. Abert, who commands 36 officers. The 8th Infantry is also resurrected, while the companies of all existing infantry regiments are expanded by 39 rank and file.

August 18

NAVAL: Lieutenant Charles Wilkes, commanding the sloop *Vincennes*, leads a six-ship exploring expedition from Hampton Roads, Virginia, into the Pacific and Antarctic Oceans. This large and impressive four-year endeavor is the first scientific expedition funded entirely by the federal government. The numerous scientists and specialists on board will make reports on hydrography, geology, botany, geography, and related fields.

August 19

NAVAL: Lieutenant John Faunce of the revenue cutter *Campbell* leads 24 men ashore near Cape Florida, where he surprises a party of Seminole, killing three. This is in retaliation for the recent massacre of three boat crews grounded nearby in a gale.

September 18

NAVAL: Lieutenant John McLaughlin and the converted yacht *Wave* explore the east coast of Florida and examine various shipwrecks along the coast. He encounters a body of Seminole while approaching the wrecked brig *Alna*, killing three Indians and wounding three more.

October

INDIAN: Soldiers under General John E. Wool begin rounding up and deporting the few remaining Cherokee from their tribal homes in Georgia; the unseasonable weather will occasion many deaths among the tribesmen, hence its reputation as the “Trail of Tears.”

December

INDIAN: Escorted by U.S. troops under Generals Winfield Scott and John E. Wool, the last of 14,000 Cherokee are forcibly relocated from their tribal homelands in Georgia and marched overland to Oklahoma. Harsh weather conditions will result in the death of 4,000 Indians en route.

December 5–31

DIPLOMACY: General Winfield Scott is again dispatched to the Canadian border when some “Patriots” attack British troops after using Detroit, Michigan, as a staging area. Scott is there to calm jittery nerves and discourage sympathetic Americans from assisting the rebels.

1839

January 1–2

NAVAL: Commander John C. Read directs a landing force from the *Columbia* and *John Adams* to attack pirate forts on Quallah Battoo, Sumatra, in retaliation for recent attacks on American commerce; this is the government’s second response. Five forts are destroyed, two villages completely burned, and the survivors pay reparations and promise to halt all harassment.

February 15

MILITARY: Secretary of War Joel Poinsett approves a plan promulgated by Brevet Brigadier General Zachary Taylor, which mandates dividing northern Florida into 20-square-mile regions, each with its own small fort and 20-man garrison, half of whom will be mounted. Through this expedient, which requires four full regiments to implement, it is hoped that the northern parts of the territory will be pacified.

March 3

MILITARY: In light of heightened tensions along the Maine-New Brunswick border, Congress passes an act authorizing the recruitment of 50,000 volunteers.

March 5–25

DIPLOMACY: Hurrying eastward from Detroit, Michigan, General Winfield Scott heads for Maine to help settle a border difficulty arising from disputed use of the Aroostook region by Canadian loggers from New Brunswick. Once there, he intends to parley with Governor John Harvey, whom Scott last met in combat during the War of 1812.

March 20

MILITARY: A boatload of troops belonging to the 2nd Infantry under Captain Samuel A. Russell is ambushed on the Miami River, Florida; the Americans manage to withdraw intact. Russell is replaced after sustaining five wounds.

March 23–25

MILITARY: War of 1812 veterans General Winfield Scott and Lieutenant Governor John Harvey of New Brunswick agree not to introduce military force into the disputed Aroostook region of Maine. This agreement lays the basis for a peaceful resolution of the conflict.

April 5

NAVAL: Commodore Isaac Mayo takes charge of the steamer *Poinsett*; when joined with the yacht *Wave*, the two will constitute a blockading squadron intended to assist army efforts in southern Florida.

April 26

NAVAL: The pilot boat *Sea Gull*, attached to the exploring expedition of Lieutenant John Wilkes, apparently sinks somewhere in the South Atlantic with the loss of all hands.

May 22

INDIAN: Commanding General of the Army Alexander Macomb signs a peace treaty with the remaining Seminole leaders at Fort King, Florida Territory, and declares the conflict over. The Indians are free to settle along the Kissimmee River if they bring in all their followers by midsummer.

June

NAVAL: The Texas Navy obtains the steamship *Zavala*, among the first warships of its kind.

July 21–23

MILITARY: Unhappy with peace conditions, several bands of Seminole attack a company of the 6th Infantry at Fort Andrews. They subsequently launch a surprise attack on a dragoon encampment under Lieutenant Colonel William S. Harney along the Caloosahatchee River and nearly capture him. The Americans lose 18 troopers killed out of 26 present, with several being tortured to death. Small-scale skirmishing will continue through November as the recent peace treaty unravels.

July 30

NAVAL: Landing parties from the steamer *Poinsett* accost a party of Seminole under Catsha Tustenuggee and arrest them for the murder of 12 whites a week earlier. The killings violate the truce arranged by General Alexander Macomb.

August 26

NAVAL: The Spanish slave vessel *Amistad*, taken over by African slaves in a bloody uprising, is apprehended by the revenue cutter *Washington* off Montauk Point, New York. The slaves are removed to Hartford, Connecticut, where they will become a rallying point for the rising abolitionist movement, win a celebrated trial, and return to their homeland.

December 2

NAVAL: Lieutenant John McLaughlin assumes command of the embryonic “Mosquito Squadron,” a collection of small craft utilized for shallow-water operations in the Everglades.

1840

MILITARY: Captain Gabriel J. Rains, campaigning against the Seminole Indians in Florida, hits upon the idea of buried explosive charges triggered by a passerby; this is the origin of antipersonnel weapons or land mines.

January 19

NAVAL: From the deck of his sloop *Vincennes*, Captain Charles Wilkes spies the continent of Antarctica for the first time, and only a day ahead of a French expedition probing the same area. The region he spots, later confirmed by British explorer Sir Ernest Shackleton, becomes known as Wilkes Land.

March 28

MILITARY: Near Fort King, Florida Territory, a 16-man patrol lead by Captain Gabriel Rains, 7th Infantry, is ambushed by a much larger Seminole force. Rains is badly wounded leading a charge, but his command makes it back to the fort.

April 10

MARINES: The schooner *Otsego* lands a party of marines along the east coast of Florida, where they are ambushed and engaged in a three-hour battle with the Seminole. At length, reinforcements are landed from the schooners *Wave* and *Flirt*, which drive the attackers to retreat.

May 1–6

MILITARY: Ill and worn out, Brevet Brigadier General Zachary Taylor hands his command over to Brevet Brigadier General Walter K. Armistead. At this stage of the war, Armistead can muster a force of 3,400 regulars and 1,500 volunteer militia, many of whom are sick. Nonetheless, Armistead continues Taylor's policy of taking the war to the Indians.

May 2–28

MILITARY: In the Wisconsin Territory, disgruntled Winnebago Indians leave their reservation and terrorize nearby settlers. Their hostilities result in Colonel William Jenkins Worth being ordered to the region from Sacketts Harbor, New York.

May 19

MILITARY: A small patrol of men from the 2nd Infantry is ambushed by Seminole in the Florida Territory, losing five killed.

July 4

MARINES: The marine uniform of green coats and buff facings is ordered back to blue and scarlet again by Lieutenant Colonel and Commandant Archibald Henderson.

July 26

MARINES: The murder of two naval officers attached to the Wilkes Expedition results in a party of marines landing on Malolo, Fiji, where they burn the towns of Sualib and Arro.

August 6–7

NAVAL: A raiding party of Seminole under Chief Chakaika attacks the settlement of Indian Keys, Florida, killing 13 settlers and torching the buildings. This is the only known amphibious assault made by Native Americans, who paddle to their

target by canoe. As the Indians remove their plunder, they are attacked in turn by a party of invalids from a nearby naval hospital who have several small cannon mounted on barges. The warriors retreat to their canoes after a stiff engagement.

September

NAVAL: The schooner *Enterprise* under Lieutenant Louis M. Goldsborough captures a pirate brig off Bahia, Brazil.

September 27

NAVAL: At West Point, New York, future naval theorist Alfred Thayer Mahan is born to Dennis Hart Mahan, an instructor at the U.S. Military Academy.

October

MILITARY: The War Department sends additional soldiers into the Florida Territory in an attempt to end the fighting there. These include several companies from the 3rd Artillery, in whose ranks is a very youthful lieutenant William Tecumseh Sherman and the newly recruited 8th U.S. Infantry.

November

MILITARY: Brevet Brigadier General Walter K. Armistead tries unsuccessfully to negotiate an end to the Seminole conflict. He ultimately decides to divide Florida into three regional commands for better control, and fighting resumes.

December 3–24

MILITARY: Departing Fort Dallas, Florida Territory, Lieutenant Colonel William S. Harney leads a 90-man detachment on a major expedition into the Seminole heartland. Moreover, he moves by canoe and at night, and his men are armed with the latest Colt repeating rifles and are dressed like Indians. He surprises several small encampments, killing Chief Chakaika and several warriors.

December 31

NAVAL: A force of 100 sailors, marines, and 90 soldiers from the 3rd Artillery, all under Lieutenant Colonel William S. Harney, again embarks on a deep penetration mission of the Florida Everglades; once the soldiers depart, the sailors and marines continue on under Lieutenant John T. McLaughlin and will emerge on Florida's west coast 19 days later. They are the first whites to completely traverse that swampy region.

1841

MILITARY: The moniker "Old Fuss and Feathers" is first applied to General Winfield Scott, long renowned for his attention toward military dress and decorum.

January 7

NAVAL: The new steam frigate *Missouri* is launched at the Brooklyn Navy Yard, becoming the first side-paddle warship in navy history. Given the transitional nature of technology at this time, the vessel is also outfitted with conventional sails and rigging.

February 1

NAVAL: The navy issues its first set of uniform dress regulations for enlisted personnel who, until now, have been pretty much at liberty to wear whatever they like.

February 25

MARINES: At Upolu, Samoa, 70 marines from the Wilkes Expedition go ashore and burn several villages in retaliation for the murder of an American sailor.

March 2–4

MILITARY: A company of the 2nd Infantry under Lieutenant William Alburdis ambushes a detachment of Seminole outside Fort Brooks, Florida Territory, routing them. Two days later a bayonet charge disperses Indians attacking a supply train heading to the fort.

March 4

MILITARY: In Washington, D.C., William Henry Harrison, “Old Tippecanoe” of the War of 1812, is inaugurated as the ninth president and military commander in chief. However, he will serve only a month in office before dying of illness.

March 5

MILITARY: President William Henry Harrison appoints John Bell to serve as the 16th secretary of war. His primary concern is reducing the expense of the war in Florida, whose monthly tab is running at \$92,300.

March 6

NAVAL: In Washington, D.C., George E. Badger is sworn in as the 12th secretary of the navy.

April 6

MILITARY: Vice President John Tyler becomes the 10th president and military commander in chief to succeed the recently deceased William Henry Harrison.

April 9

MARINES: The Wilkes Expedition dispatches 80 marines ashore on Drummond Island, Gilbert Islands, to search for a missing sailor; when resistance is encountered, 800 natives are dispersed and two villages are torched.

May 1–June 4

MILITARY: A patrol of 10 soldiers under Lieutenant William Tecumseh Sherman escorts Chief Coacoochee to Fort Pierce, Florida Territory, for peace talks. When no progress is made, the chief and several consorts are suddenly seized, then transported to Louisiana.

May 31

MILITARY: Colonel William Jenkins Worth replaces Brevet Brigadier General Walter K. Armistead as commander of American forces in the Florida Territory, now deemed the Army of the South. He commands a force increased to 4,800 regulars.

June 19

MILITARY: A group of Texas filibusters and military adventurers embarks on a campaign to capture Santa Fe, New Mexico, from the Mexican Republic.

June 25

MILITARY: Commanding General of the Army Alexander Macomb dies in Washington, D.C., and the search begins for a successor.

July 5

MILITARY: In Washington, D.C., an ebullient Winfield Scott is finally tapped to serve as commanding general of the army at the age of 55. He has served with distinction in the army since 1808 and was a hero of the War of 1812. In consequence, Colonel John Ellis Wool, another notable veteran, is promoted to brigadier general to fill the vacancy.

July 7

NAVAL: To enhance national security during a war scare with Great Britain, the House Naval Affairs Committee votes to create a Home Squadron to patrol waters off the American coast and the Newfoundland fishing banks.

July 18

NAVAL: The sloop of war *Hornet* under Lieutenant William L. Hudson wrecks on a sand bar near the Columbia River, Oregon Territory; no lives are lost.

August 5

MILITARY: The hard-slogging 1st Infantry is ordered out of the Florida Territory after three-and-a-half years of a grueling campaign against the Seminole. Hard service here has cost the regiment six officers and 135 dead, mostly to disease.

September 13

MILITARY: John Bell resigns as secretary of war and is temporarily replaced by Albert M. Lea, chief clerk of the War Department.

October 10

MILITARY: At Punta Rassa, Florida Territory, several companies of the 8th Infantry weather a tremendous tropical storm. The ensuing floodwaters wipe out their encampment and 200 soldiers are forced to spend the night in trees, but no lives are lost.

NAVAL: Sailors and marines attached to the “Mosquito Squadron” traverse the Florida Everglades via the Shark River in an attempt to snare Seminole leader Sam Jones. The attempt will be abandoned 17 days later, and the forces return.

October 11

NAVAL: In Washington, D.C., Abel P. Upshur is sworn in as the 13th secretary of the navy.

October 12

MILITARY: In Washington, D.C., President John Tyler appoints John C. Spencer as the 18th secretary of war.

October 17

MILITARY: After several years of fighting in Florida, five companies of the 2nd Dragoons are ordered west to garrison Forts Towson and Jesup along the western frontier. The latter post also functions as regimental headquarters.

November 3–December 23

NAVAL: The “Mosquito Squadron” under Lieutenant John T. McLaughlin completes two more unsuccessful forays through the Florida Everglades; no Seminole are encountered, but the sailors and marines are beset by increasing illness.

December 19

NAVAL: Lieutenant Charles Wilkes, commanding the sloop *Vincennes*, comes upon an atoll consisting of three small islets. This will become known as Wake Island, immortalized as a valiantly defended World War II naval and air station.

December 20

MILITARY: While on patrol, men of the 8th Infantry are ambushed by Seminole in Big Cypress Swamp, Florida Territory, losing two men dead; these are weighed down and sunk in a pond to prevent their mutilation by vengeful Indians.

1842

NAVAL: Pistol manufacturer Samuel Colt begins experimenting with a submarine battery (underwater mines).

January 25

MILITARY: Several companies of the 2nd Infantry under Major Joseph Plympton, after an arduous six weeks of searching in the swamps, surprise a body of Seminole in their encampment and drive them off.

February–March

MILITARY: The army continues to withdraw regular forces from the Florida Territory for reassignment to western posts. In February, the 3rd Artillery is ordered out, followed by the 6th Infantry a month later.

February 11

NAVAL: The “Mosquito Squadron” of Lieutenant John T. McLaughlin begins its latest sweep through the Everglades, Florida, and will continue operations over the next two months. Few Seminole are encountered, and the force suffers heavily from sickness.

March

NAVAL: Commodore Lawrence Kearny arrives in Chinese waters with two vessels in an attempt to prevent the smuggling of opium. Kearny also begins negotiating a comprehensive trade treaty with Chinese officials.

March 14

MILITARY: By Colonel William Jenkins Worth’s computations, only 200 Seminole remain in Florida, whereas several thousand have been deported to new homes west of the Mississippi River.

April 19

MILITARY: Colonel William Jenkins Worth personally directs an infantry assault on the encampment of Chief Hallack-Tustenugge at Pelikakaha, Florida Territory. Detachments of the 2nd, 4th, and 8th Infantries advance frontally and engage the enemy while a part of the 2nd Dragoons sweeps around them from behind; the Seminole break and flee into the swamps.

April 29–May 2

MILITARY: Chief Hallack-Tustenugge arrives at the camp of Colonel William Jenkins Worth and requests to parley; Worth invites his people for extended talks

at Fort King. The Colonel then departs; a few days later, all the Indians in the encampment are seized and taken prisoner.

May

MILITARY: The 2nd Infantry, which has served for five years in the Florida Territory, receives orders to redeploy to the Great Lakes region. The last companies of the 2nd Dragoons are also transferred to the western frontier.

May 10

INDIAN: In Florida, Colonel William Jenkins Worth is notified by Secretary of War John C. Spencer that the Seminole War is concluded and that he is to suspend operations immediately.

May 17

MILITARY: The Second Seminole War, a grueling test of endurance that has lasted seven years, finally sputters out with two small skirmishes near Fort Wacahoota and Clay's Landing along the Suwannee River.

May 18

MILITARY: The so-called Dorr's War breaks out in Rhode Island when disenfranchised male supporters of Thomas W. Dorr try but fail to seize the state arsenal over a constitutional squabble. He flees the state but subsequently returns and is arrested.

June 10

MILITARY: An expedition of 30 men under Lieutenant John C. Frémont departs Kansas City, Missouri, to explore the Oregon Trail as a possible route for immigrants heading to the West Coast. Among those serving is noted scout Christopher "Kit" Carson.

NAVAL: Lieutenant Charles Wilkes returns to New York City after sailing 90,000 miles around the Pacific and Antarctica, visiting 200 islands. This concludes the ambitious United States Exploring Expedition, although work on a published report will continue until 1844 and runs to five volumes.

June 20

MARINES: In Florida, the marine "Mosquito Squadron" is disbanded by order of the secretary of the navy and its personnel are transferred back to Norfolk, Virginia.

June 29

NAVAL: Lieutenant Matthew Fontaine Maury, the future "Pathfinder of the Seas," is assigned to the superintendent of the Depot of Charts and Instruments after a leg injury disqualifies him from sea duty; this is the beginning of an illustrious career wherein Maury lays the foundation for oceanography.

July 4

NAVAL: The gunboat *Boser* is sunk by an electrically detonated "torpedo" (mine) developed by prolific inventor Samuel Colt.

July 20

MILITARY: After three years of hard service, the 7th Infantry is withdrawn from the Florida Territory.

August

MILITARY: With General Order No. 53, Major General Winfield Scott outlines judicial procedures for military offenses and explicitly prohibits arbitrary punishments inflicted by officers and sergeants upon enlisted men.

- In the Florida Territory, Colonel Josiah H. Vose of the 4th Infantry is ordered to transfer his command to Jefferson Barracks, Missouri, thereby ending a tour of duty that stretches back to the 1820s.

August 9

NAVAL: The Webster-Ashburton Treaty, beyond settling an American/Canadian boundary dispute, formalizes anti-slaver patrols by the Royal Navy and the U.S. Navy.

August 14

MILITARY: Colonel William Jenkins Worth formally declares the Second Seminole War to be over, although several hundred Indians still reside in the swampy reaches of the region. Worth also receives brevet promotion to brigadier general as of March 1, 1842. Before departing on a 90-day leave, he appoints Colonel Josiah H. Vose to oversee the final details of dealing with the Seminole.

August 23

MILITARY: With the Second Seminole War ended, Congress votes to cut the size of the standing military establishment by 1,400 soldiers, for a total of 8,600. For reasons of economy, the 2nd Dragoons is converted into a rifle-armed infantry formation.

August 31

NAVAL: In an attempt to modernize naval administration, Congress abolishes the Board of Navy Commissioners and substitutes the five bureaus of Yards and Docks, Construction and Repair, Provisions and Clothing, Ordnance and Hydrography, and Medicine and Surgery. Congress also authorizes creation of an engineer in chief and authorizes deployment of a chief engineer on every steam vessel in the U.S. Navy.

September 11

MILITARY: In a spate of ongoing border hostility, Mexican soldiers invade and capture San Antonio from the Republic of Texas.

October 2

NAVAL: Commander William Boerum wrecks the sloop *Concord* in the Mozambique Channel, Africa, losing three sailors.

October 13

NAVAL: Commodore Lawrence Kearny and his East India Squadron begin arriving at Chinese ports to commence diplomatic and trade negotiations with imperial officials.

October 20–21

NAVAL: Commodore Thomas ap Catesby Jones, commanding the East Pacific Squadron, mistakenly seizes the Mexican settlement of Monterey, California, having been falsely informed that the United States and Mexico are at war. Once correctly informed by the American consul Thomas O. Larkin, he apologizes for the mistake and departs; Jones is subsequently relieved of command.

Worth, William J. (1794–1849)

Army general

William Jenkins Worth was born in Hudson, New York, on March 1, 1794, the son of a successful merchant. He trained as a store clerk until the War of 1812 commenced, then joined the U.S. Army as a lieutenant in the 23rd Infantry. Worth subsequently served on the staff of General Morgan Lewis and witnessed the capture of Fort George and the Battle of Crysler's Farm, Upper Canada, in 1813. After the incompetent Lewis was sent off to a quiet sector, Worth caught the eye of the youthful general Winfield Scott, who appointed him his aide-de-camp. In this capacity he accompanied Scott throughout the bloody Niagara campaign, where he won a brevet promotion to captain at the July 5, 1814, victory at Chippewa. Three weeks later, Worth fought at the horrific Battle of Lundy's Lane, July 25, 1814, winning another brevet promotion to major. He was, however, seriously injured in combat and spent the remainder of the war recu-

perating. Worth was retained in the peacetime establishment as a captain in the 2nd Infantry, and over the next three decades he fulfilled a number of far-ranging assignments. From 1820 to 1828 he functioned as commandant of cadets at the U.S. Military Academy, West Point, where he rose to brevet lieutenant colonel, and subsequently joined the staff of the Artillery School, Fortress Monroe, Virginia, 1829–30. By 1838 Worth was commanding the 8th Infantry, and he performed useful services pacifying the American border region throughout the so-called Patriot War in Canada. Two years later he reported for service in Florida to fight in the Second Seminole War, where he won several small battles but ultimately advised the government to make peace with the Indians.

In 1846 Worth joined the Army of Occupation under General Zachary Taylor and served as his second-in-command in Texas. When Colonel David E. Twiggs arrived to

October 21

MILITARY: In Texas, Mexican troops attack and kill a number of Texans in the so-called Dawson Massacre.

November 1

MILITARY: Brevet Brigadier General William Jenkins Worth returns to Florida to convince the handful of remaining Seminole to depart for new homes. Lieutenant Ethan Allen Hitchcock, 3rd Infantry, is tasked with tracking down any recalcitrant parties, rounding them up, and shipping them west. The seven-year conflict in Florida has cost the U.S. Army 1,466 dead—mostly through disease—and 290 wounded. Various militia formations lost 55 dead and 267 wounded, while the number of Seminole deported does not exceed 6,000.

December 1

NAVAL: The only instance of mutiny aboard a U.S. Navy warship occurs when Commander Alexander S. Mackenzie hangs three individuals for alleged plotting

replace him, Worth angrily remonstrated over his seniority and threatened to resign, but Taylor convinced him to remain in the army. Throughout that year he greatly distinguished himself in combat at Palo Alto, Resaca de la Palma, and Monterrey, winning brevet promotion to major general. He then transferred to the army of General Winfield Scott in anticipation of offensive operations against Mexico City, and fought capably in a series of pitched battles that routed the army of General Antonio López de Santa Anna. Yet, while a splendid battle captain, Worth had by this time become a vain and egotistical individual off the battlefield, and so disrespectful did he act toward his old mentor Scott that he was arrested until their differences could be settled. Worth was reputedly so angered by this treatment that he changed his son's name from Winfield Scott Worth to William Scott Worth. After the war Worth remained with the army, where he assumed command of the Department of Texas. He died in San Antonio on May 7, 1849, from cholera at the age of 55. The forceful Worth was

William J. Worth (*Library of Congress*)

a talented and capable subordinate and is commemorated by the present-day city of Fort Worth.

aboard the brig *Somers*. One individual, Midshipman Philip Spencer, is the son of Secretary of War John C. Spencer. Mackenzie is court-martialed for the executions, but subsequently exonerated.

1843

March 6

MARINES: Commandant Archibald Henderson formally receives promotion to brevet brigadier general for services rendered during the Second Seminole War; he is the first marine officer to reach that grade.

March 8

MILITARY: In Washington, D.C., James M. Porter replaces John C. Spencer as the 18th secretary of war.

March 11

NAVAL: Lieutenant A. E. Downes and the schooner *Grampus* are lost at sea with all hands while sailing from Charleston, South Carolina, to Norfolk, Virginia.

March 13

MILITARY: At Jefferson Barracks, Missouri, the 2nd Dragoons is officially dismounted and retrained as infantry. The transfer goes smoothly but occasions some grumbling from the former troopers.

April 22

MILITARY: After a hard march from Florida, the 3rd Infantry arrives at Jefferson Barracks, Missouri, after two years of combat service. Among the newly joined officers is Lieutenant Don Carlos Buell, a future Civil War commander.

May–June

MILITARY: At Fort Gibson, a patrol of 62 troopers from the 1st Dragoons departs on an extended patrol under Captain Nathan Boone. Boone, son of noted pioneer Daniel Boone, is tasked with striking out along the Arkansas River, then onto the Santa Fe Trail for the purpose of protecting trader caravans.

May 30–June

MILITARY: In St. Louis, Missouri, Lieutenant John C. Frémont begins his second expedition along the Oregon Trail, after which he will explore the Snake and Columbia Rivers.

July 14

MILITARY: Captain Nathan Boone trots back into Fort Gibson after completing an extended patrol to the Santa Fe Trail and back, while also scouting along the Canadian and Washita Rivers en route.

July 24

NAVAL: In Washington, D.C., David Henshaw becomes the 14th secretary of the navy.

August 14

MILITARY: Florida's Second Seminole War finally ends; it has been the most protracted and expensive Indian conflict in U.S. history.

August 25

NAVAL: At Gibraltar, the side-wheel steamer *Missouri* becomes the first steam vessel of its kind to cross the Atlantic Ocean. However, an accidental fire destroys the vessel on the following evening.

September 9

NAVAL: The steam-powered, screw propeller warship *Princeton* is launched at Philadelphia, Pennsylvania, being the first vessel in U.S. Navy history driven by a propeller. The ship was designed by Swedish engineer John Ericsson and is commanded by Captain Robert F. Stockton.

September 30

MILITARY: At Jefferson Barracks, Missouri, Lieutenant Ulysses S. Grant arrives for duty and is assigned to the 4th Infantry. Among the young officers he will befriend there is Lieutenant James Longstreet, a future Civil War adversary.

October 25

MILITARY: The small expedition under Lieutenant John C. Frémont reaches the Indian village of Walla Walla (Washington), thereby completing his reconnaissance of the Oregon Trail.

December 5

NAVAL: The *Michigan*, which is both the navy's first all-iron vessel and the world's first prefabricated warship, is assembled by sections, then launched at Erie, Pennsylvania. The vessel was constructed at Pittsburgh and transported overland to Lake Erie.

December 15

NAVAL: Commodore Matthew C. Perry comes ashore at Little Berebee village on Africa's Ivory Coast, accompanied by 200 sailors and marines. Negotiations with King Ben Krako commence, but fighting suddenly breaks out and the king, along with several natives, is killed. The surviving tribal leaders agree not to plunder or harass missionaries.

1844

January 3–18

MILITARY: The expedition led by Lieutenant John C. Frémont reaches the fringes of the Sierra Nevada Mountains, then turns west to make a dangerous winter crossing of the range into California.

January 30

MILITARY: In Washington, D.C., William Wilkins replaces Peter B. Porter as the new secretary of war; interestingly, he is an attorney with no prior military experience.

February 4–5

MILITARY: A scouting party under Lieutenant John C. Frémont, assisted by noted scout Kit Carson, trudges through the snow-choked passes of the Sierra Nevada; at one point they can see California but cannot reach it.

February 10–24

MILITARY: Forging ahead, the expedition of Lieutenant John C. Frémont runs out of food and is forced to eat its own horses to survive; at length the weary explorers reach California and limp into Sutter's Fort in the Sacramento River Valley to recuperate.

February 19

NAVAL: In Washington, D.C., Thomas W. Gilmer becomes the 15th secretary of the navy.

February 25

NAVAL: The Naval Appropriations Act is signed into law by President John Tyler; it limits manpower ceilings to 7,500 men, which induces the secretary of the navy to begin phasing out the few ships of the line then on active duty.

February 28

NAVAL: On the Potomac River outside Washington, D.C., an accidental cannon burst on the steam frigate *Princeton* kills Secretary of State Abel P. Upshur and Secretary of the Navy Thomas Gilmer, among others. Gilmer had served only nine days as naval secretary. Ironically, the cannon, named "Peacemaker," was designed by Commodore Thomas F. Stockton, who is himself injured.

March 4

MILITARY: Congress, reversing itself, votes to remount the 2nd Dragoons with Colonel David Twiggs still at its head. As American interests along the Western frontier expand, the utility of mounted units is becoming obvious to legislators.

March 26

NAVAL: In Washington, D.C., John Y. Mason is sworn in as the 16th secretary of the navy,

March 29

NAVAL: Uriah Philips Levy, a naval officer of Jewish extraction, is promoted to captain, the first of his religion.

April–May

MILITARY: The expedition of Lieutenant John C. Frémont grows aware that Mexican patrols are looking for them, so they cross the Mojave Desert to eventually encamp at Mountain Meadows. One soldier is killed by hostile Indians.

April 22

MILITARY: The War Department reorganizes itself once again into Eastern and Western Divisions under Generals John E. Wool and Edmund P. Gaines, respectively. The divisions are further subdivided into nine departments, each commanded by a brigadier general.

April 23–27

MILITARY: Brevet Brigadier General Zachary Taylor is ordered to assume command of the 1st Military District, headquartered at Fort Jesup, Louisiana. He also receives secret instructions to form an “Army of Observation” and march it to the Sabine River; this is conceived as an independent command, and Taylor’s commanding officer, Major General Edmund P. Gaines, is not informed.

May–August

MILITARY: American strength at Fort Jesup, Louisiana, is augmented by the arrival of several companies of the 3rd and 4th Infantries, and the newly remounted 2nd Dragoons.

June 18

MARINES: The *St. Louis* disembarks marines at Whampoa Island, 12 miles downriver from Canton, China, to protect American lives and property during a spate of rioting there.

August–September

MILITARY: Several companies of the 1st Dragoons march from Fort Leavenworth to the Platte River to demonstrate American strength to a council of Pawnee, Oto, and Potawatomi Indians. Simultaneously, another dragoon company departs Fort Des Moines for the Iowa country to maintain peace between the Sioux and tribes being forcibly resettled there.

August 6

MILITARY: The expedition under Lieutenant John C. Frémont, having trudged thousands of miles over the past 14 months, ends its journey at St. Louis, Missouri. Much valuable intelligence has been gathered about Mexican holdings in the West.

November 30

MILITARY: With the completion of Fort Wilkins on Lake Superior, the American government has finished erecting a chain of fortifications along its northern periphery. These posts now stretch from Canada to the Texas border.

1845

January 29

NAVAL: The secretary of the navy authorizes the bureau chiefs to examine and evaluate Captain George W. Taylor's plans for diving bells, submarines, and torpedoes (mines).

February 26

NAVAL: A general order is issued by the secretary of the navy that clearly delineates the duties of engineering officers on board navy vessels. In this manner he seeks to clarify the relationship between engineer officers and those of the line.

March 4

MILITARY: In Washington, D.C., James K. Polk is sworn in as the 11th president and military commander in chief.

March 6

MILITARY: William L. Marcy is appointed the 20th secretary of war by President James K. Polk.

March 10

NAVAL: Historian George Bancroft is appointed the 17th secretary of the navy by President James K. Polk.

March 20

NAVAL: The Home Squadron under Commodore David Conner is ordered into Mexican waters to underscore support of a congressional resolution favoring the annexation of Texas.

March 25–29

NAVAL: Lieutenant S. F. Blunt accompanies a joint American/British boat expedition to capture the slave vessel *Spitfire* in the Rio Pongas, West Africa.

March 31

DIPLOMACY: Mexico breaks relations with the United States over the issue of Texas annexation; war appears imminent.

May 18–August 24

MILITARY: Four companies of the 1st Dragoons under Colonel Stephen Watts Kearny depart Fort Leavenworth for an expedition through Indian country. Their sojourn will take them 2,200 miles over the next 99 days, covering both the Oregon and Santa Fe Trails. Kearny is specifically ordered to demonstrate American strength to the locals, and parley with numerous Comanche, Kiowa, and Cheyenne leaders.

May 28

MILITARY: President James K. Polk dispatches American forces under General Zachary Taylor into southwestern Texas to preclude any Mexican invasion. This

is despite the fact that, by the tenets of international law, the region remains Mexican territory. This provocative act is setting the stage for armed conflict.

June 2

NAVAL: The board of the Naval Asylum in Philadelphia, Pennsylvania, ponders the suitability of Annapolis, Maryland, as the site of a new naval academy. Three officers are selected from their ranks to assist in planning for such an establishment.

June 3–August 11

MILITARY: Several companies of the 1st Dragoons under Captain Edwin V. Sumner enter Sioux territory and hold formal discussions with various chieftains for the first time.

June 4

NAVAL: The ship of the line *Columbus* and sloop-of-war *Vincennes* depart New York under Commodore James Biddle. On board is Alexander H. Everett, tasked with delivering a ratified copy of the breakthrough Treaty of Wanghia, which allows the Americans to trade in China.

June 15

MILITARY: Secretary of State James Buchanan assures the government of the Texas republic military protection once it agrees to the terms of annexation. To underscore this point, General Zachary Taylor's "Army of Observation" is ordered to a point "on or near the Rio Grande" River.

June 20–August 12

MILITARY: A third expedition of 55 men undertaken by Lieutenant John C. Frémont departs St. Louis, Missouri, this time to conduct surveys of the Arkansas and Red Rivers.

July 4

DIPLOMACY: The United States formally accepts the annexation of Texas, a move prompting the Mexican government to sever diplomatic relations.

July 25

MILITARY: General Zachary Taylor's army is transported to Nueces Bay, Texas, where it lands on St. Joseph's Island. His presence is planned as a show of force in support of a congressional resolution favoring the annexation of Texas. Prior to ferrying over to the mainland, Lieutenant George G. Meade of the Topographical Engineers is entrusted with finding suitable campsites at Corpus Christi.

July 31

MILITARY: Bolstered to a strength of 3,500 men, General Zachary Taylor marches his army to the Nueces River and assumes defensive positions near Corpus Christi.

August

MILITARY: In New Orleans, General Edmund P. Gaines exceeds his authority and calls up volunteers from Louisiana; he is ultimately repudiated by Secretary of War William L. Marcy.

August 12–16

MILITARY: While reposing at Bent's Fort, Indian Territory, a small detachment under Lieutenant James W. Abert parts from Lieutenant John C. Frémont's expe-

dition and sets out south to explore Comanche and Kiowa territory. Frémont, meanwhile—and probably acting under secret orders—directs his remaining men toward Mexican-held California.

August 15

NAVAL: Once Fort Severn at Annapolis, Maryland, is transferred from the army to the navy, Secretary of the Navy George Bancroft appoints Commander Franklin Buchanan as first superintendent of the U.S. Naval Academy.

August 29–September 2

NAVAL: President James K. Polk's cabinet agrees that, in the event of war, ships of the U.S. Navy will blockade Mexican ports on the Gulf coast. They also decide to treat any foreigners operating under Mexican letters of marque as pirates.

August 31

NAVAL: A general order issued by the secretary of the navy allows naval rank to surgeons—devoid of the corresponding command authority.

September–December

MILITARY: At Corpus Christi, Texas, the Army of Occupation under General Zachary Taylor receives a continual stream of reinforcements of infantry and artillery companies, which raises his total strength to 3,900 men in three brigades. The men are subject to harsh training and discipline, but order lapses once local traders establish brothels outside the camp.

- The expedition of Lieutenant John C. Frémont fords the Colorado River and makes for the Great Salt Lake, where he spends two weeks scouting the Great Salt Desert (present-day Utah).

October 10

NAVAL: Secretary of the Navy George Bancroft attends officiating ceremonies marking the opening of the Naval School (U.S. Naval Academy after 1850) at Annapolis, Maryland. Fifty-six midshipmen are in attendance at the time. Commander Franklin Buchanan, a vigorous, no-nonsense disciplinarian, is their first superintendent, and he effectively lays the groundwork for the first graduating class of 1854. Initially, all midshipmen will serve one year at school, complete a three-year tour of duty at sea, then return to finish a second and final year.

October 30

MARINES: President James K. Polk issues orders to Lieutenant Archibald H. Gillespie to carry a secret message to the American consul, Thomas O. Larkin, at Monterey, California, whereby Larkin is to help incite an insurrection there against continued Mexican rule.

October 31

NAVAL: The squadron of Commodore David Conner is ordered out of Mexican waters before the government will receive Louisiana congressman John Slidell as the new American ambassador at Veracruz.

November 30

NAVAL: The American slaver *Pons* is captured by the sloop *Yorktown* off Kabenda, Africa, becoming the first of three such vessels seized by the navy.

Taylor, Zachary (1784–1850)

Army general

Zachary Taylor was born in Orange County, Virginia, on November 24, 1784, the son of a Revolutionary War veteran. Raised and scantily educated along the Kentucky frontier, he joined the U.S. Army as a lieutenant in the 7th Infantry in 1808, rose to captain two years later, and performed garrison service at various posts in the Indiana Territory. Once the War of 1812 broke out, the frontier erupted into violence and Taylor was attacked at Fort Harrison on September 8, 1812, by 400 warriors. However, his 50-man garrison stoutly defended its post through heroic leadership, and he won brevet promotion to major. In the summer of 1814 Taylor commanded a small expedition up the Mississippi River for the relief of Fort Shelby, Wisconsin Territory. En route, his flotilla was intercepted by a combined British/Indian force at Rock River, Illinois, on September 5–6, and he was driven back downstream by artillery fire. Taylor angrily resigned his commission after being

demoted in the postwar service, but President James Madison, a longtime family friend, ordered him reinstated as a major. Once vindicated, he began a lengthy, far-ranging, and distinguished frontier career. For three decades Taylor commanded a variety of posts throughout the Northwest, rising to colonel, 1st Infantry, in 1832. That year he performed well during the Black Hawk War, and in 1837 he arrived in Florida to fight in the Second Seminole War. In this capacity Taylor defeated the Indians at Okeechobee on December 25, 1837, winning his brevet promotion to brigadier general. By April 1840 he was commanding the Western Division, Second Department, headquartered at Fort Smith, Arkansas. By this time Taylor had become renowned for his sloppy demeanor and complete indifference to proper military etiquette. Nevertheless, his strictness, fairness, and concern for his troops won both their respect and the

December 5–31

MILITARY: The expedition under Lieutenant John C. Frémont moves through the region of the future Donner Pass and descends from the Sierra Nevada into California. They again repose at Sutter's Fort for a few days before pushing on; the fort's owner alerts Mexican authorities.

December 24

NAVAL: Commodore James Biddle drops anchor at Macao, China, then proceeds to Canton to deliver a ratified copy of the Treaty of Wanghia to Chinese authorities. This will lead to the establishment of the first U.S. diplomatic legation in China.

1846

January 13

MILITARY: President James K. Polk orders General Zachary Taylor to increase military pressure on the Mexican government by shifting his 3,500-man Army

appropriate nickname of “Old Rough and Ready.”

By June 1845, tensions along the southern border with Mexico escalated over the U.S. annexation of Texas, and Taylor was ordered to the Rio Grande region to protect American interests. Before war officially broke out, Taylor’s army defeated a larger Mexican force at Palo Alto and again at Resaca de la Palma on the following day, May 6–7, 1846. A few weeks later he won another impressive victory at Monterrey, but President James K. Polk, wishing to deflate Taylor’s presidential mettle, gradually siphoned off his best units and gave them to General Winfield Scott. In this weakened condition, Taylor subsequently defeated a much larger Mexican force at Buena Vista on February 22, 1847, establishing himself as a national hero. The following year he was nominated for the presidency by the Whig Party and defeated Democrat Lewis Cass. Now president, Taylor opposed the expansion of slavery into newly acquired territories and vowed to use force against Southern states if they

Zachary Taylor (*Library of Congress*)

seceded. Unfortunately, he succumbed to illness on July 9, 1850, the second Whig president to die in office after William Henry Harrison.

of Occupation farther south from the Nueces River to the left bank of the Rio Grande. This move is calculated to either induce negotiations or spark an armed conflict.

January 15–27

MILITARY: Lieutenant John C. Frémont explores the region around present-day San Francisco, christening it the “Golden Gate.” Pushing onward, he finally establishes a temporary military headquarters at Monterey with Mexican permission.

January 17

NAVAL: Commodore David Conner takes his Home Squadron to Veracruz, Mexico, in support of operations by General Zachary Taylor along the Rio Grande River.

January 27

MILITARY: Colonel John C. Frémont reaches Monterey, California, with a small body of soldiers. This time, however, his “expedition” is tasked not with exploring but, rather, preparing the region for annexation.

February 3

MILITARY: General Zachary Taylor receives orders to advance his army, numbering 3,900 men, farther down the banks of the Rio Grande and opposite Matamoros, Mexico. This territory is disputed, and his presence there is calculated to produce a strong reaction.

February 22–March

MILITARY: Lieutenant John C. Frémont violates his prior agreement with Mexican authorities by leaving Monterey, scaling Gavilan Peak, and raising the American flag. Mexican soldiers begin assembling nearby to expel him from a log fort he has constructed.

March 3

MILITARY: Mexican general Jose Castro, commanding at Monterey, California, formally warns the small force of Colonel John C. Frémont off Mexican territory.

March 19–20

MILITARY: General Zachary Taylor confronts Mexican forces drawn up on the opposite bank of the Arroyo Colorado lagoon; he orders his engineers to survey various fords under cover of artillery batteries. Colonel William Jenkins Worth then leads several infantry companies across, and the Mexicans retreat.

March 28–April 4

MILITARY: General Zachary Taylor occupies the north bank of the Rio Grande River, internationally recognized as marking the boundary between Texas and Mexico, while Mexican forces at Matamoros directly across from him commence building fortifications.

April 1

MILITARY: Along the Rio Grande River, Mexican forces seize two American dragoons who have trespassed into their territory; they are released.

NAVAL: Commodore John D. Sloat of the Pacific Squadron instructs the sloop of war *Portsmouth* to anchor at Monterey, California, to protect American lives and property there.

April 12

MILITARY: Mexican general Pedro de Ampudia issues an ultimatum to General Zachary Taylor, insisting that he withdraw his forces back beyond the Nueces River, some 100 miles to the north, lest a general engagement result. Taylor refuses.

April 17

NAVAL: Off the Rio Grande River, the brig *Lawrence* and the revenue cutter *Woodbury* intercept several vessels bound for Matamoros, Mexico. This move prevents supplies from reaching Mexican forces operating south of the river.

April 23

DIPLOMACY: The Mexican government declares war on the United States.

April 25

MILITARY: A force of 1,600 Mexican cavalry ambushes two companies of the 2nd Dragoons under Captain Seth B. Thompson at Carricitos Ranch, Texas, killing 10

men, wounding four, and capturing the rest. All are released within three weeks. However, General Zachary Taylor considers that war has started and requests four volunteer regiments from the governor of Louisiana.

April 26

MILITARY: General Zachary Taylor, in light of combat between Mexican and American forces, informs the government that “hostilities may now be considered as commenced.”

April 28

MILITARY: Mexican forces ambush Captain Samuel Walker’s company of Texas Rangers near Point Isabel, Texas, killing five and capturing four.

April 31

MILITARY: The 5,700-man Mexican Army of the North surges across the Rio Grande River, confronting American troops under General Zachary Taylor. He elects to fall back 10 miles to Point Isabel and protect his lines of communication.

May

MILITARY: The U.S. Military Academy graduates 59 new second lieutenants, its largest class to date; four of the class of 1846 will die in Mexico. But, 12 will become Union generals in the Civil War while 10 will serve the Confederacy.

NAVAL: President James K. Polk declares the coastline of Mexico, both on the Gulf of Mexico and the Pacific Ocean, under a state of blockade.

May 1–7

MILITARY: In a major escalation of military tensions, Mexican units surround and bombard American-held Fort Taylor, directly opposite Matamoros, along the Rio Grande. The garrison commander, Major Jacob Brown, returns fire with several pieces of his own until he is mortally wounded on May 6. The garrison refuses all calls for surrender.

May 3–11

MILITARY: Aged general Edmund P. Gaines again violates his authority by calling up volunteer soldiers from four states to reinforce General Zachary Taylor in Texas. The War Department, which lacks the money to pay these 15 new regiments, angrily transfers Gaines to the Eastern Division, far away from the scene of operations.

May 4

NAVAL: As soon as Mexican president Mariano Paredes y Arrillaga declares war on the United States, Commodore David Conner departs Veracruz, Mexico, and makes for the mouth of the Rio Grande River.

May 8

MILITARY: The Battle of Palo Alto ensues when 2,228 American troops under General Zachary Taylor engage 4,000 Mexicans commanded by General Mariano Arista. Taylor clearly prevails in what develops into a protracted artillery duel lasting three hours, and Arista withdraws to better positions at Resaca de la Palma. American losses are nine dead and 47 wounded to a Mexican tally of 320 killed and 380 wounded. Among the dead is the celebrated artilleryman, Major Samuel Ringgold, one of the earliest heroes of the Mexican War and an expert light-artilleryman.

May 9

MILITARY: The Battle of Resaca de la Palma rages when General Zachary Taylor's army attacks a larger Mexican force in a combined cavalry and infantry assault. In a celebrated charge, Captain Charles May of the 2nd Dragoons seizes both a Mexican battery and General Rómulo Díaz la Vega. General Arista's right flank gives way, and the retreating Mexicans are then enfiladed by American artillery. Taylor's losses are 33 killed and 89 injured to a Mexican tally of around 547 dead or wounded.

May 10

MILITARY: At Klamath Lake, Oregon, Lieutenant John C. Frémont meets Lieutenant Archibald Gillespie (U.S.M.C.), who bears secret instructions from President James K. Polk. Frémont is directed to assist in the effort to wrest California from the Mexicans. That evening their camp is attacked by hostile Klamath Indians, who kill three soldiers.

May 13

MILITARY: The Senate approves a declaration of war against Mexico, 40 to 2, and authorizes \$10 million and up to 50,000 volunteers to wage it. The number of privates in each regular infantry company is raised to 100 men apiece. However, this measure proves to be divisive nationally, with Southerners supporting the conflict to gain additional slave states and Northerners opposing it for that same reason.

NAVAL: No sooner does the United States declare war on Mexico than Secretary of the Navy George Bancroft cuts orders for Commodore David Conner, instructing him to blockade Mexican ports and intercept any enemy vessels in the Gulf of Mexico. Commodore John D. Sloat is also ordered to blockade the coast of California and await reinforcements from the warships stationed off of Brazil and China.

May 15

MILITARY: Secretary of War William L. Marcy issues orders to state governors to begin recruiting volunteers for service in the Mexican War. Commanding General of the Army Winfield Scott plans to raise them on a three-to-one ratio, infantry to cavalry, and orders equipment and supplies assembled along their routes of movement.

NAVAL: Secretary of the Navy George Bancroft instructs the Pacific Squadron of Commodore John D. Sloat to capture San Francisco, Monterey, and other ports of note along the California coast.

May 16

NAVAL: All 11 revenue cutters are ordered to support army and navy operations in the war against Mexico.

May 17–22

MILITARY: American forces under General Zachary Taylor cross the Rio Grande River and occupy Matamoros. The first volunteer units also begin arriving; General Zachary Taylor finds them enthusiastic but poorly trained and disciplined.

MARINES: Landing parties from the frigates *Cumberland* and *Potomac* row up the Rio Grande River in support of army units and help establish a beachhead on the southern bank.

May 19

MILITARY: Congress authorizes recruitment of the new Regiment of Mounted Riflemen, with Persifor C. Smith as colonel and John C. Frémont as lieutenant colonel. They are to be armed with Model 1841 rifles and sabers; afterward they are reconstituted as the 3rd Cavalry.

May 19–25

NAVAL: Secretary of the Navy George Bancroft purchases several shallow-draft steamers and schooners, originally intended for the Mexican navy, from the New York firm Brown and Bell.

May 24

NAVAL: The sloop *Falmouth* under Commander Joseph R. Jarvis and the brig *Somers* under Commander Duncan J. Ingraham capture the Mexican schooners *Criolla* and *Amada* in the Gulf of Mexico. They are subsequently released after learning that the Mexican government allowed four American vessels to depart Veracruz, despite a state of war.

May 29

MILITARY: Congress votes to expand the U.S. Army by an additional major general and two more brigadiers.

May 30–June 19

MILITARY: American settlers in California, encouraged by the presence of Lieutenant John C. Frémont's expedition at Sutter Buttes, openly rebel against Mexican authority. His exploration group then disbands, and many choose to operate on behalf of the rebels. Frémont, himself, refrains from any raiding or other military activity.

June 6–July 29

MILITARY: Colonel Stephen W. Kearny departs Fort Leavenworth, Kansas Territory, on an expedition against Santa Fe, New Mexico, and then California. He commands a small, mixed cavalry/infantry column of 1,750 men with the grandiose title "Army of the West." Kearny first marches them to Bent's Fort on the Santa Fe Trail to get them into shape, although several soldiers die from disease and accidents. Once on the West Coast, he is to be supported by naval forces under Commodore John D. Sloat, then stationed off the western coast of Mexico.

- At the Rio Grande, Texas, General Zachary Taylor is ordered by the War Department to capture the Mexican city of Monterrey but decides to first seize Camargo and use it as a supply base before marching south.

June 8

NAVAL: The port of Tampico, Mexico, at the mouth of the Panuco River, is briefly shelled by the sloop *St. Mary's*.

June 11–September 23

MILITARY: Brigadier General John E. Wool is detached from the Eastern Division and ordered to proceed to Texas, form a division, and seize the Mexican town of Chihuahua. Upon reaching San Antonio, Texas, Worth assembles 3,400 regulars and volunteers as the Division of the Center, and marches south to the Rio Grande.

June 14

NAVAL: The sloop *St. Mary's* launches a nighttime boat expedition against several Mexican forts along the Panuco River, but the effort fails when one of the boats runs aground on a sandbar, alerting the defenders.

June 26–29

MILITARY: Congress approves eight new general officer positions; three for the regular army and five for the volunteers. Brevet Brigadier General Zachary Taylor is appointed major general while Stephen Watts Kearny and David E. Twiggs become brigadiers.

June 29

TECHNOLOGY: The Ordnance Department founds the experimental Howitzer and Rocket Company under Major George H. Talcott. This unit employs so-called Hale rockets, which are improved versions of the famous British Congreve rockets used in the Napoléonic Wars. They will prove to be just as inaccurate.

**Kearny, Stephen Watts (1794–1848)***Army general*

Stephen Watts Kearny was born in Newark, New Jersey, on August 30, 1794, and in 1810 he passed through Columbia University in New York City. He was commissioned a lieutenant in the 13th U.S. Infantry shortly before the War of 1812 and fought bravely at Queenston Heights that October. Kearny, wounded and taken prisoner, was exchanged within months but saw no additional combat. After the war he transferred to the 2nd U.S. Infantry and performed garrison duty in Missouri for several years. In 1819 Kearny accompanied General Henry Atkinson on his famous steamboat foray up the Missouri River, initiating an active frontier career spanning three decades. In 1823 he advanced to major, helped direct the Yellowstone River Expedition with Atkinson, and assisted in constructing the famous Jefferson Barracks in St. Louis. He then served at various posts in Wisconsin and the Indian Territory (Oklahoma) before transferring

as lieutenant colonel of the newly raised 1st Dragoon Regiment. In this capacity he assisted Colonel Henry Leavenworth on the ill-fated Pawnee Expedition of 1834, and assumed command after Leavenworth died of illness. Kearny rose to full colonel in 1836, and also penned an important military handbook, *Carbine Manual, or Rules for the Exercise and Maneuvers of the U.S. Dragoons* (1837). He subsequently assumed command of the Third Military District, a region encompassing most of the Great Plains, and in 1845 he shepherded a major expedition west along the Oregon Trail to South Pass.

After the Mexican War commenced in 1846, Kearny was promoted to brigadier general and commander of the so-called Army of the West. He was tasked with conquering New Mexico and installing an American government there, which he accomplished without bloodshed on

June 30

MARINES: Wartime strength of the Marine Corps is 41 officers and 1,126 enlisted men.

July 4

MILITARY: At Sonoma, California, American settlers declare the “Bear Flag Republic,” with Lieutenant John C. Frémont as head of the new “California Army.” He then marches off to Monterey to join the forces of Commodore John D. Sloat already anchored offshore.

July 6–September 19

MILITARY: Major General Zachary Taylor’s army arrives at Camargo, Mexico, on the Rio Grande, which proves unhealthy to his troops. He waits several weeks for additional supplies and reinforcements before pushing ahead with four divisions, two regular and two volunteer, and gradually making his way southwestward to Monterrey with 6,200 men.

August 10, 1846. Kearny then departed on the second part of his mission, the conquest of California. Taking only 300 dragoons, he rode west and encountered the noted scout Kit Carson, who informed him that the region had already surrendered to Commodore Thomas F. Stockton. Kearny unfortunately dismissed 200 of his men and proceeded westward with only 100 troopers. On December 2, 1846, his force was roughly handled by a larger force of Mexican lancers at the Battle of San Pascual. Kearny was severely wounded, but he eventually teamed up with reinforcements arranged by Stockton and subdued the unruly residents. Kearny was next directed to establish a military government, although Stockton, on his own initiative, had already appointed Major John C. Frémont as governor. Kearny ordered Frémont to step down and, when he refused, the noted explorer was arrested and marched back to Fort Leavenworth to face charges of insubordination. Consequently, Senator Jesse Hart Benton of Missouri—Frémont’s

Stephen Watts Kearny (*Library of Congress*)

father-in-law—blocked Kearny’s well-deserved promotion to major general. He died suddenly at Jefferson Barracks on October 31, 1848, a stiff-necked but significant frontier figure.

July 7

DIPLOMACY: Commander Alexander S. Mackenzie confers with Mexican general Antonio López de Santa Anna in Havana, Cuba, as to possible peace talks. President James K. Polk is of the opinion that if Santa Anna were to be returned to Mexico from exile, he could expedite a peace treaty.

July 7–9

NAVAL: Landing parties from the frigate *Savannah* and the sloop of war *Cyane* land at Monterey, California, whereupon Commodore John D. Sloat claims California for the United States.

July 9

NAVAL: Commander John B. Montgomery of the sloop of war *Portsmouth* takes control of the Yerba Buena (San Francisco) area without resistance.

July 15–19

MILITARY: At Monterey, California, Lieutenant John C. Frémont links up with naval forces under Commodore John D. Sloat. Plans are in the works for an amphibious descent upon the settlement of Los Angeles.

July 20

NAVAL: Commodore James Biddle and the East India Squadron arrive at Edo (Tokyo) Bay and unsuccessfully parley with the Tokugawa shogunate to establish diplomatic relations. This constitutes the first visit of American warships to the Land of the Rising Sun, but Japanese authorities rebuff his efforts and he departs.

July 24

MILITARY: At Sonora, Lieutenant John C. Frémont accepts command of the California Battalion with the honorary rank of major.

July 29

NAVAL: Energetic commodore Robert F. Stockton arrives to replace Commodore John D. Sloat as commander of the Pacific Squadron. Stockton intends to capitalize on Sloat's success by campaigning against Los Angeles, California, in concert with army forces under Major John C. Frémont.

MARINES: The sloop *Cyane* puts marines ashore at San Diego, California, occupying that settlement without violence. The Mexican brig *Juanita* is also captured. Men of the so-called California Battalion under Major John C. Frémont also go ashore at this time.

August 2

MILITARY: Brigadier General Stephen Watts Kearny marches his Army of the West from Bent's Fort into the desert of New Mexico.

August 4

MARINES: Landing parties from the frigate *Congress* under Commander Samuel F. Du Pont seize Santa Barbara, California, without violence.

August 6

MARINES: The town of San Pedro, California, falls bloodlessly to landing parties from the frigate *Congress* under Lieutenant Jacob Zeilin.

August 7

MARINES: A force of nine steamers and gunboats under Commodore David Conner maneuvers to attack a Mexican fort at the mouth of the Alvarado River. Strong currents, determined resistance, and the onset of a storm thwart the marine detachment from seizing its objective.

August 10

NAVAL: A bill authorizing an increase in naval strength from 7,500 to 10,000 men is signed into law by President James K. Polk.

August 11–14

NAVAL: Commodore Robert F. Stockton, leading 360 sailors and marines ashore, joins forces with Major John C. Frémont and commences a campaign to seize Los Angeles, which is accomplished without violence.

August 14

NAVAL: The brig *Truxtun* under Commander Edward W. Carpenter runs aground at Tuxpan Reef near Tampico, Mexico. He is forced to surrender, although a party from the *Princeton* will burn the *Truxtun* a week later.

August 17

MILITARY: The Army of the West under Colonel Stephen Watts Kearny occupies Las Vegas, New Mexico, declaring that region part of the United States.

August 18

MILITARY: Having covered 856 miles of searing desert in an epic trek, Brigadier General Stephen Watts Kearny occupies Santa Fe, New Mexico, and establishes a provisional government there without the loss of a man or a single shot being fired.

August 19

MILITARY: The American army under General Zachary Taylor departs Matamoros and marches for Monterrey, capital of Nuevo Leon state. He also declares an eight-week armistice.

NAVAL: Commodore Robert F. Stockton declares the entire west coast of Mexico under blockade.

August 29

NAVAL: In the Gulf of Mexico, Commodore David Conner is instructed by the secretary of the navy to be wary of Mexican privateers off Key West, Florida. He is also tasked with finding geographical information about the Veracruz area for a possible American landing there.

September 2

MILITARY: Commodore Robert F. Stockton appoints Major John C. Frémont as military governor of California and authorizes him to continue recruitment for the California Battalion. Noted scout Kit Carson is dispatched back to Washington, D.C., with information concerning conditions in California.

September 2–5

NAVAL: Commander Samuel F. Du Pont of the sloop *Cyane* drops anchor off San Blas, Baja California, then captures a Mexican sloop and sends landing parties ashore that seize an enemy fort.

September 6–8

NAVAL: The sloop *Warren* takes up a blockading position off Mazatlán, then seizes the Mexican brigs *Malek Adhel* and *Carmelita*.

September 9

NAVAL: In Washington, D.C., John Y. Mason returns to office as the 18th secretary of the navy following the resignation of George Bancroft; Young held the office in 1844–45.

September 10

NAVAL: Lieutenant Neil M. Howison and the schooner *Shark* are wrecked without loss of life at the mouth of the Columbia River, Oregon Territory.

September 12

MILITARY: Secretary of War William L. Marcy denies Commanding General of the Army Winfield Scott a field command. However, to deflate the rising political stock of General Zachary Taylor, the administration will eventually grant Scott his wish.

September 14

MILITARY: The formerly disgraced general Antonio López de Santa Anna is appointed Mexican commander in chief by his countrymen; his appointment will prove disastrous to Mexico.

NAVAL: The sloop of war *Cyane* anchors off La Paz, Baja California, seizing nine Mexican vessels and enforcing a strict blockade.

September 20–24

MILITARY: The Battle of Monterrey erupts as the 6,640-man army of General Zachary Taylor attacks a Mexican garrison of 5,000 men under General Pedro de Ampudia. Among the latter is the San Patricio Battalion, formed from predominately Irish-Catholic deserters from the U.S. Army. Intense house-to-house fighting continues for four days before the Americans finally flush the defenders from their strong points, including the heavily fortified Bishop's Palace. At this juncture, Ampudia requests and receives an eight-week armistice in exchange for departing the city. Taylor agrees and both sides cease fire. American losses are 120 dead, 368 wounded, and 33 missing to an estimated Mexican loss of 430, killed and wounded, along with 28 cannon captured.

September 22–23

MILITARY: In California, Mexicans under Captain José María Flores revolt against American rule, seizing control of San Diego, Santa Barbara, and Los Angeles. Flores is then appointed acting governor in lieu of any other Mexican authority.

September 26

MILITARY: A column of American troops under Colonel Alexander W. Doniphan is detached from the Army of the West by Brigadier General Stephen Watts Kearny, and marches southward to join an army under General John E. Wool. Kearny himself then departs Santa Fe, New Mexico, and heads for California with 300 men.

September 29

MILITARY: A 48-man detachment of the California Battalion under Lieutenant Archibald Gillespie is forced to surrender at Los Angeles, California, by a popular uprising, then allowed to depart.

October 1

NAVAL: The sloop of war *Cyane* anchors off Loreto, on the west shore of the Gulf of California, and captures two schooners.

October 6

MILITARY: Brigadier General Stephen Watts Kearny, en route to California, encounters noted scout Kit Carson, headed back to Washington, D.C., who informs him of the recent conquest of California. This news encourages Kearny to send 200 of his men back to Santa Fe, New Mexico, while he continues ahead with the remaining 100. Major Philip St. George Cooke is brevet-promoted to lieutenant colonel of a newly arrived Mormon battalion.

October 7

NAVAL: Commander Samuel F. Du Pont, commanding the sloop *Cyane*, shells the town of Guaymas, Sonora, Mexico, sinking two gunboats while a landing party seizes a merchant brig.

MARINES: A landing detachment from the frigate *Savannah*, reinforced by a body of California volunteers, advances upon Los Angeles from the town of San Pedro, California.

October 8

MILITARY: At San Luis Potosí, Mexico, General Antonio López de Santa Anna drops his “understanding” with President James K. Polk regarding peace talks and begins rallying dispirited Mexican forces to attack the American invaders.

NAVAL: A landing detachment under Captain William Mervine of the frigate *Savannah* attacks the rebellious settlement of Los Angeles in an attempt to regain control; they are repulsed by local cavalry equipped with cannon.

October 12

MILITARY: The Division of the Center under General John E. Wool crosses the Rio Grande into Mexico. Beforehand, he sternly warns his men to treat all non-combatants and their property respectfully.

October 13

MILITARY: The War Department informs General Zachary Taylor that his suggested eight-week armistice has been disapproved.

October 15

NAVAL: In the Gulf of Mexico, vessels of the Home Squadron under Commodore David Conner make a second attempt to capture Mexican forts near Alvarado, Mexico. Once the steamer *McLane* grounds on a sandbar, the attempt is called off.

October 19

MILITARY: Lieutenant Colonel Philip St. George Cooke departs Santa Fe, New Mexico, with his Mormon battalion and marches west for California. However, he has ordered the wagons full of family members, including women and children, to remain in place.

October 23–26

MARINES: Landing parties from the squadron of Commodore Matthew C. Perry land and capture Frontera, Mexico, southeast of Veracruz. Marines and sailors then row up the Tabasco River to seize the settlement of San Juan Bautista, 70

miles distant. When the garrison fires back in defiance, they are silenced by guns from the steamer *Vixen*, but Perry withdraws with five prizes rather than storm the town.

October 27

MARINES: Detachments from the frigates *Congress* and *Savannah* assist in the recapture of San Pedro, California, which had briefly rebelled and now capitulates.

November 3

MILITARY: The 10th Military District, encompassing the Oregon Territory and whatever parts of California end up in American hands, is created by Congress.

November 5

MILITARY: Commodore Robert F. Stockton receives orders from the Navy Department to recognize Brigadier General Stephen Watts Kearny as governor of California as well as commander in chief of American forces there. This creates an immediate tension with Major John C. Frémont, who is Stockton's own candidate for the office.

November 13

MILITARY: Saltillo, capital of Coahuila, Mexico, is occupied by American forces under General Zachary Taylor without a shot being fired. There he is contacted by General John E. Wool, who feels that a Mexican offensive is pending and suggests he move his division in support; Taylor agrees, and Wool relocates to Parras, closer to Saltillo.

November 15

NAVAL: American sailors and marines from Commodore David Connor's Home Squadron attack and seize the Mexican city of Tampico on the Panuco River. A total of five enemy schooners are also taken.

- The sloop of war *Boston*, sailing to rejoin the Home Squadron in the Gulf of Mexico, encounters a squall off the Bahamas and wrecks itself on Eleuthera Island.

November 18–19

MARINES: A detachment of sailors under Commander Josiah Tattnall and marines under Captain Alvin Edson steams 75 miles up the Panuco River from Tampico and destroys Mexican supplies at the town of Panuco, including several cannon.

POLITICS: President James K. Polk, wary that General Zachary Taylor, a Whig, does not support his policies, wishes to deflate the latter's political capital by approving an amphibious expedition against Veracruz by General Winfield Scott.

November 22

MILITARY: General Zachary Taylor is informed by the government that the truce with Mexico is negated.

November 23

MILITARY: Against his political instincts, President James K. Polk appoints General Winfield Scott commander of a large amphibious expedition intending to land on the Mexican coast and march overland to the capital of Mexico City. Polk

had intended to pick his friend, Senator Thomas Hart Benton of Missouri, but withdrew the suggestion when he could not find political support.

November 25

MILITARY: A small American column under Brigadier General Stephen Watts Kearny advances from New Mexico into California.

November 26

NAVAL: A cutting-out expedition under Lieutenant James L. Parker seizes and burns the Mexican brig *Criolla* under the guns of Fortress San Juan de Ullúa, Veracruz, Mexico.

November 28

MILITARY: The War Department instructs General Robert Patterson, the officer commanding General Zachary Taylor's supply lines, to attack and capture the Mexican settlement of Tampico, which has already been seized by the U.S. Navy.

December 6

MILITARY: The Battle of San Pascual is waged between a force of 50 dragoons commanded by General Stephen Watts Kearny and 200 California lancers under Major Andreas Pico. The Americans rashly charge superior numbers and are handily repelled, although Pico does not use his manpower to any advantage. The Californios attack and withdraw several times until reinforcements arrive; the Americans keep the field with 30 percent losses. Kearny, severely wounded by a lance, subsequently retreats 10 miles.

December 8

NAVAL: The brig *Somers* under Lieutenant Raphael Semmes is caught in a squall and sinks in the Gulf of Mexico, losing 32 sailors and a further seven captured.

December 10

AVIATION: In Washington, D.C., inventor John Wise submits plans to the War Department to construct 100-foot-long balloons armed with bombs and shells for the purpose of leveling Castle San Juan de Ullúa, Mexico. The War Department expresses no interest in either the tactic or the technology.

December 11

MARINES: Lieutenant Jacob Zeilin leads sailors and marines detached from Commodore Robert F. Stockton's squadron on an overland march to reinforce General Stephen W. Kearny at San Diego.

December 13–16

MILITARY: Major General Zachary Taylor sets the division of General David E. Twiggs in motion toward the town of Victoria. Meanwhile, General William Jenkins Worth, occupying Saltillo, is aware of a Mexican offensive brewing and requests reinforcements.

December 14

MILITARY: Colonel Alexander W. Doniphan and 1,000 volunteers from the Army of the West depart Santa Fe, New Mexico, and march south to Chihuahua to rendezvous with General John E. Wool. This involves crossing 250 miles of desolate desert, so the force is split in two to help conserve water supplies.

December 21

MILITARY: Unaware that the U.S. Navy has already seized Tampico, a division of volunteers under General Robert Patterson marches from Matamoros.

MARINES: Commodore Matthew C. Perry detaches sailors and marines to attack the port of Carmen on the Yucatán Peninsula, Mexico; it falls without opposition.

December 25

MILITARY: A column of American volunteers under Colonel Alexander W. Doniphan defeats 1,200 Mexican cavalry under Lieutenant Colonel Ponce de León at the Battle of Brazito, securing New Mexico for the United States. The Americans suffer seven wounded.

December 27

MILITARY: American forces under Colonel Alexander W. Doniphan occupy the town of El Paso, Texas.

NAVAL: Commodore Matthew C. Perry's flagship *Mississippi* captures two Mexican schooners in the Gulf of Mexico, en route to Havana.

December 29

MILITARY: General Zachary Taylor's army occupies Victoria, capital of Tamaulipas state, Mexico.

NAVAL: Commodore Robert F. Stockton leads 600 sailors and marines overland in a bid to capture Los Angeles, California.

1847**January**

MILITARY: A battalion of 300 Mormons, recently recruited in Utah, arrives in California under Major Philip St. George Cooke to bolster the American garrison but will not see any fighting. Instead, they work to improve various roads and trails.

January 2

MARINES: At Mission Santa Clara, California, marines of the sloop *Dale* under Captain Ward Marston defeat local forces in heavy fighting.

January 3

MILITARY: On the Rio Grande River at Camargo, Mexico, General Winfield Scott, preparing for a major amphibious assault against Veracruz, commandeers 9,000 soldiers from the army of General Zachary Taylor. Taylor, whose forces now consist largely of raw and unreliable volunteers, is ordered to maintain the defensive at Monterrey. Taylor is angry over Scott's apparent usurpation of his best troops and disregards his orders to remain in place.

January 8

MILITARY: A force of 607 sailors, marines, and dragoons under Commodore Robert F. Stockton and Brigadier General Stephen Watts Kearny engages a Mexican force of infantry and lancers at San Gabriel, California. The Americans form square and beat back repeated cavalry attacks, then advance up nearby

heights and drive off the enemy infantry. American losses are two dead and nine wounded.

January 9

MILITARY: Combined army/navy/marines under Commodore Robert F. Stockton defeat another Mexican force at the Battle of La Mesa, clearing the way for the recapture of Los Angeles, which will fall the following day without bloodshed.

January 10

MILITARY: Brigadier General Stephen Watts Kearny occupies Los Angeles, ending active resistance to American rule.

January 11

MILITARY: Congress approves legislation granting military rank to ranking medical personnel.

January 12

NAVAL: Lieutenant John A. Dahlgren, an influential cannon designer, is assigned to the Bureau of Ordnance and Hydrography.

January 13

MILITARY: In something of an intelligence coup, soldiers belonging to Mexican general Antonio López de Santa Anna capture American messengers carrying dispatches from General Winfield Scott. Santa Anna now realizes that General Zachary Taylor has been stripped of his best troops and elects to attack him in this weakened condition.

- Mexican forces under Major Andreas Pico conclude the Treaty of Cahuenga with Major John C. Frémont, which formally brings fighting in California to an end. This concludes 25 years of Mexican rule and ushers in an era of American dominance.

January 14

MILITARY: General Zachary Taylor receives new instructions from the War Department ordering him to maintain defensive positions while 9,000 of his best soldiers are siphoned off for a forthcoming amphibious expedition. Taylor correctly deduces that Democratic president James K. Polk is determined to weaken his political mettle as a Whig presidential candidate.

NAVAL: The sloop of war *St. Mary's* anchors off present-day South Padre Island, Texas, to protect transport vessels assembling to convoy General Winfield Scott's army to Veracruz.

January 16

MILITARY: A political storm is brewing in Los Angeles, California. Commodore Robert F. Stockton, still believing that he enjoys civil authority in California, formally appoints Major John C. Frémont as governor. This sets both men on a collision course with Brigadier General Stephen Watts Kearny, who has orders appointing him as governor.

January 19

MILITARY: Governor Charles Bent is killed at Taos, New Mexico, by a home-grown insurgency of Indians and Mexican nationals. News of the revolt induces

Colonel Sterling Price to march from Santa Fe with a column of Missouri cavalry and howitzers to punish the transgressors.

January 22

NAVAL: Commodore Robert F. Stockton is superseded by Commodore William B. Shubrick as head of the Pacific Squadron.

February

MILITARY: In Louisville, Kentucky, Lieutenant Colonel Stephen H. Long supervises construction of the *General Jesup*, the army's first steamboat. This vessel is intended to help clear local river systems of snags and other obstacles.

February 1–27

MILITARY: A 1,000-man column under Colonel Alexander W. Doniphan departs El Paso, Texas, and marches south into Chihuahua, Mexico. Progress is dogged by Apache bands, who hover on the flanks looking for an opportunity to steal horses.

February 3–4

MILITARY: Missouri troops under Colonel Sterling Price recapture Taos, New Mexico, from Mexican rebels. The Americans storm the town after a brief bombardment, suffering seven dead and 45 wounded. New Mexico is finally secured for the United States.

February 5

MILITARY: Defying the orders of both the government and General Winfield Scott, General Zachary Taylor marches southwest from Monterrey and toward Saltillo. His army consists mostly of 5,000 raw volunteers, stiffened by a handful of regular troops under General John E. Wool.

NAVAL: The troop transport *Ondiaka* grounds off the island of Lobos, Mexico; boating parties from the sloop *St. Mary's* burn it to prevent capture.

February 11

MILITARY: Congress authorizes creation of several new units for the U.S. Army, including the 3rd Regiment of Dragoons, the 9th through 16th Infantries, a *voltigeur* (mounted riflemen) regiment, and a regiment of riflemen.

February 13

MILITARY: Brigadier General Stephen Watts Kearny receives orders reiterating his authority, as commander of the 10th Military District, to establish a government in Monterey, California. Major John C. Frémont still considers himself governor at Los Angeles and refuses orders to disband his California battalion.

February 14

MILITARY: The American army under General Zachary Taylor, numbering 4,800 men, advances 17 miles to Agua Nueva, Mexico. Taylor ignores General John E. Wool's advice to assume a strong defensive position at St. Juan de la Buena Vista ranch; he has no idea that a large Mexican army is marching upon him.

February 19

MILITARY: Major General Winfield Scott lands at Tampico, Mexico, and places the region under martial law to subject American soldiers to immediate court-martials for harming Mexican civilians. This is the first time that the Americans have declared martial law on foreign soil.

February 20–21

MILITARY: A cavalry report confirms that an army of 15,000 Mexicans is marching fast upon General Zachary Taylor, a fact inducing him to withdraw to stronger defensive positions at Buena Vista. The American army consists largely of untried volunteers, backed by a handful of veteran artillery companies and dragoons. Overall tactical command is entrusted to General John E. Wool.

February 22–23

MILITARY: The Battle of Buena Vista rages when 15,000 Mexican troops under General Antonio López de Santa Anna attack General Zachary Taylor's force of 4,800 men, strongly arrayed on good defensive terrain. The enemy troops, exhausted after a 250-mile trek through the desert, make several strong but uncoordinated attacks upon Taylor's lines and are beaten back by the adroit tactics of General John E. Wool. A desperate charge by Colonel Jefferson Davis of the Mississippi Rifles saves some American cannon from imminent capture. After two days of fighting, the demoralized Mexicans retreat deeper into Mexico. This is Taylor's finest hour; he has suffered 264 dead and 450 wounded to a Mexican toll estimated at 2,000.

February 28

MILITARY: The expedition of Colonel Alexander W. Doniphan defeats a Mexican force of 3,000 men at Rio Sacramento, then occupies the city of Chihuahua. The Americans lose three killed and eight wounded to an estimated Mexican loss of over 200.

March 1

MILITARY: On Lobos Island, off the Gulf coast of Mexico, General Winfield Scott begins assembling his invasion force of three divisions, drawn from among the very best elements in the army.

March 3

MILITARY: Congress expands the artillery organization table by adding two additional companies to the four existing regiments; as in the War of 1812, most artillery formations lack cannon and horses, so are trained to fight as infantry.

NAVAL: Funding for dry-dock facilities at the Pensacola Navy Yard, Florida, is provided by the new Naval Appropriations Act. This is to facilitate the repair of vessels currently operating in the Gulf of Mexico.

- Transports conveying the invasion force of General Winfield Scott sail from Lobos Island and rendezvous with the Gulf Squadron of Commodore David E. Conner.

March 7–9

MILITARY: The Battle of Veracruz unfolds when the army of General Winfield Scott, covered by American warships under Commodore David E. Conner, storms ashore at nearby Collado Beach with 10,000 men. Once a lodgement is secured, the Americans begin siege preparations to convince the large garrison of Castle San Juan de Ullúa to surrender. This is the first large-scale amphibious operation in American history and proceeds smoothly.

MARINES: Commodore David Conner contributes a battalion of marines culled from his squadron, and it is attached to the division of General William J. Worth at Santa Cruz.

Wool, John E. (1784–1869)

Army general

John Ellis Wool was born in Newburgh, New York, on February 29, 1784, and orphaned at an early age. Raised by relatives in nearby Troy, he trained as a store clerk but also evinced an interest in military affairs and joined the local militia. The onset of the War of 1812 found him a captain in the 13th Infantry, and on October 13, 1812, he distinguished himself at the Battle of Queenston Heights by storming a British battery. Captured and exchanged shortly thereafter, Wool advanced to major in the newly raised 29th Infantry and marched with General Wade Hampton during the ill-fated Chateaugay campaign of 1813. The following summer he served under General Alexander Macomb and bore a conspicuous role in the decisive Plattsburgh campaign. On September 5, 1814, Wool's detachment skirmished and harassed a large British force marching down Beakmantown Road, inflicting many casualties. Six days

later he won brevet promotion to lieutenant colonel for his role in the Battle of Plattsburgh, an American victory. After the war, Wool was retained in the peacetime establishment as a major in the 6th Infantry, and in 1821 Congress appointed him one of two inspectors general of the army. He held this position for more than two decades, longer than any incumbent, and pushed for creation of an Ordnance Department and more modern artillery. He also reluctantly guided the Cherokee out of Georgia on the so-called Trail of Tears, openly sympathizing with the Indians, and between 1837 and 1838 he helped enforce border security during the so-called "Patriot War" in Canada. For all these services, Wool advanced to brigadier general in June 1841.

After the war with Mexico erupted in 1846, Wool was tasked with assembling and training volunteers for the army of General Zachary Taylor. Within a year he

March 10

NAVAL: Commander Josiah Tattnall orders his steamer *Spitfire* to bombard Mexican forces holding the fort at San Juan de Ullúa, thereby diverting their attention from General Winfield Scott's encircling army.

March 15

NAVAL: Commander George P. Upshur becomes the second commander of the U.S. Naval Academy.

March 21

NAVAL: Commodore Matthew C. Perry supersedes Commodore David Conner as commander of the Home Squadron.

March 22

MILITARY: Three large American siege batteries attached to the army of General Winfield Scott commence the bombardment of Veracruz.

had dispatched over 12,000 such troops and joined Taylor's staff that December. On February 22, 1847, he bore a conspicuous role in Taylor's victory over a huge Mexican army commanded by General Antonio López de Santa Anna at Buena Vista, handily repelling 15,000 men with one-third as many troops. Consequently, he received the Thanks of Congress, an elaborate sword, and brevet promotion to major general. Taylor was rotated out of the theater shortly afterward, and Wool assumed command of all American forces in northern Mexico for the remainder of the war. Afterward, he led the Division of the East until 1853, when he assumed control of the Department of the Pacific and helped suppress an uprising by the Yakima Indians. The aged Wool was still on active duty when the Civil War commenced in 1861, and that August he rushed reinforcements to Fortress Monroe, Virginia, to deny it to the Confederates. The following year he directed combined operations that captured the important cities of Norfolk and Portsmouth. Wool finally concluded

John E. Wool (*Library of Congress*)

his half-century of service by resigning in 1863; he died in Troy on November 10, 1869, a venerable hero of three wars.

NAVAL: Off Veracruz, Mexico, the six vessels of the Home Squadron support army operations by bombarding Mexican positions ashore; the Americans incur minor damage from enemy counterfire.

- At Monterey, California, command of the Pacific Squadron passes from Commodore William B. Shubrick to Commodore James Biddle.

March 23

NAVAL: Commander Josiah Tattnall pushes his steamer *Spitfire*, accompanied by several gunboats, to within 600 yards of Mexican fortifications at Veracruz, suffering little damage in return.

March 24–25

NAVAL: A naval land battery of two 32-pounders and three 8-inch guns, partially erected by Captain Robert E. Lee, trades fire with Mexican artillery at Fort Santa

Barbara, Veracruz. The Americans suffer a total of six dead and nine wounded until their ammunition is exhausted the following day.

March 25

MILITARY: After a heated, face-to-face confrontation with Brigadier General Stephen Watts Kearny, Major John C. Frémont relents and agrees to follow Kearny's orders by disbanding the California Battalion.

March 27

MILITARY: The fortified city of Veracruz, Mexico, under General Juan José Landero, surrenders 3,000 troops to American forces commanded by General Winfield Scott, who sustains a loss of only 13 dead and 55 wounded. The city will subsequently serve as a vital supply base throughout the ensuing drive upon Mexico City. Furthermore, Scott insists on proper treatment of all Mexican civilians by his troops and even attends a Catholic service with his staff.

March 30

MARINES: Landing parties under Lieutenant Benjamin F. B. Hunter disembark from the sloop *Portsmouth* and occupy San José, Baja California, without bloodshed.

- Congress authorizes the recruitment of an additional 12 officers and 1,000 men to the Marine Corps.

March 31

NAVAL: Lieutenant Charles G. Hunter of the steamer *Scourge* captures the Mexican town of Alvarado, burning one schooner and seizing three other vessels. However, in so much as this operation interferes with army/navy efforts to capture Mexican horses at the settlement, Hunter will be court-martialed by an irate Commodore Matthew C. Perry.

April 3

MARINES: Landing parties from the *Portsmouth* go ashore at San Lucas, Mexico, seizing that village.

April 8

MILITARY: With Veracruz to its rear, General Winfield Scott's army of 10,000 men commences a march down the National Road toward Mexico City. The Americans depart hurriedly to beat the oncoming yellow fever season, which could potentially decimate their ranks. Meanwhile, General Antonio López de Santa Anna, desperate to save his capital, musters every available soldier to defend it.

April 13

MILITARY: Captain Robert E. Lee of the Corps of Engineers conducts a hazardous reconnaissance of Mexican positions around Cerro Gordo; he is nearly captured but does uncover a hidden trail over which troops and cannon can move.

MARINES: The *Portsmouth* sends marines and sailors ashore under Lieutenant John S. Missroom, seizing the town of La Paz, capital of Baja California.

April 17–18

MILITARY: General Winfield Scott wins the Battle of Cerro Gordo by attacking 14,000 Mexican soldiers under General Antonio López de Santa Anna. In a series

of slashing maneuvers, the Americans inflict several hundred casualties at a cost of 64 dead and 350 wounded. Mexican losses are unknown, but 2,837 captives are taken, along with 83 cannon and Santa Anna's wooden leg. The advance upon Mexico City resumes in earnest.

April 18

NAVAL: The Home Squadron under Commodore Matthew C. Perry, escorting 30 barges crammed with troops, attacks and captures the town of Tuxpan, Mexico. The Americans destroy forts and batteries, then withdraw four days later.

MARINES: Commodore Matthew C. Perry consolidates his marines into a single battalion and orders them to capture the Mexican forts at Tuxpan.

April 25

MILITARY: Colonel Alexander W. Doniphan's Missouri volunteers depart Chihuahua and march for Saltillo, 300 miles distant. Typhoid strikes en route, killing several soldiers.

May 6

MILITARY: Their one-year enlistment terms having expired, the majority of General Winfield Scott's volunteers depart his army for Veracruz, leaving him with only 7,000 regulars.

- American forces under General William Jenkins Worth seize the Mexican city of Puebla; Scott subsequently appoints him military governor.

May 12–13

INDIAN: In Mexico, Apache raiders raid the camp of Missouri volunteers, stealing several horses. Captain John Reid, assisted by friendly Mexicans, tracks them to a water hole and attacks, killing 15 Apache for a loss of several wounded. The raid also frees 18 Mexican women and children, along with 500 horses.

May 17

NAVAL: Landing parties from Commodore Matthew C. Perry's Home Squadron attack and capture the Mexican town of Carmen before steaming 24 miles up the Coatzacoalcos River and capturing the village of Minatitlan.

May 22–June 6

MILITARY: Colonel Alexander W. Doniphan's Missouri force is given permission to return home after completing an epic 2,100-mile march through hostile deserts.

May 31

MILITARY: General Stephen Watts Kearny arrests Major John C. Frémont when he disobeys a direct order to step down as governor of California. Kearny then appoints Colonel Richard B. Mason to serve as commander of the 10th Military District before transporting the unruly Frémont back to Fort Leavenworth, Kansas Territory, to face a court-martial.

June 4

MILITARY: At Jalapa (Xalapa), Mexico, General Winfield Scott begins calling in all rear-area security garrisons. Scott has not yet cut himself off from his main base of supply at Veracruz.

- General William Jenkins Worth, previously appointed military governor of Puebla, has performed poorly in this role; a court of inquiry officially reprimands him.

June 14–16

NAVY: Commodore Matthew C. Perry directs a landing force of 1,713 men in 47 boats up the Tabasco River against the village of Villahermosa; four forts are captured. The Americans will remain until June 22, when an outbreak of yellow fever induces them to evacuate the town.

June 26

INDIAN: At Pawnee Ford, Indian Territory (Oklahoma), a detachment of the 1st Dragoons under Lieutenant John Love is suddenly attacked by Indians, losing five dead and six injured. The raiders, probably Comanche, are not identified, but Secretary of War William L. Marcy will order several companies of infantry out from Fort Leavenworth to garrison the Santa Fe Trail as a precaution.

June 30

MARINES: From Tabasco, Mexico, a detachment of sailors and marines attacks a party of Mexican soldiers at Tamulte, driving them off. They are assisted by supporting fire from the steamers *Scourge* and *Vixen*.

July 16

MARINES: Brevet Lieutenant Colonel Samuel F. Watson assumes command of a battalion of marines, 357 men strong, for the upcoming Mexico City campaign.

July 19

NAVAL: Commodore James Biddle departs the Pacific Squadron, and it reverts to the command of Commodore William B. Shubrick.

August

MILITARY: At Puebla, Mexico, the army of General Winfield Scott is gradually buttressed by the arrival of reinforcements, bringing his total strength up to 14,000. Thus augmented, he is now ready to resume offensive operations and organizes his troops into four divisions, including a battalion of U.S. Marines.

August 6–7

MILITARY: With the collapse of unofficial peace negotiations, General Winfield Scott launches his final drive against Mexico City, the enemy capital. The entire force departs Puebla save for 400 men under Colonel Thomas Childs, who remain behind to guard supplies and hospitals there.

August 11–17

MILITARY: General Winfield Scott's army arrives at Ayotla, Mexico, 15 miles distant from Mexico City, and dispatches teams of engineers to ferret out the best approach. He must act with dispatch, as the army is down to only four days of rations.

August 19–20

MILITARY: The army of General Winfield Scott edges closer to Mexico City by defeating General Antonio López de Santa Anna at Contreras and Churubusco.

The Mexican positions were very strong and included Irish-American deserters from the San Patricio Battalion. The deserters fought manfully, knowing that capture meant execution by hanging, but at length the Americans carry the Mexican position. Scott's losses are 137 dead and 865 wounded, while Santa Anna sustains an estimated 10,000 killed, wounded, and captured. The advance upon Mexico City continues.

August 21–September 7

MILITARY: At Tucubaya, Mexico, emissaries from General Antonio López de Santa Anna arrive with a proposal for an armistice. Scott agrees, although he breaks it off two weeks later after learning that Santa Anna has been building new defenses in violation of their agreement. He will then order General William Jenkins Worth to prepare to storm nearby Molino del Rey.

August 22

MILITARY: Major John C. Frémont is arrested for insubordination at Fort Leavenworth and ordered to report to the Office of the Adjutant General in Washington, D.C.

September 8

MILITARY: The Battle of Molino del Rey unfolds as General Winfield Scott's 8,000 troops attack and carry strong Mexican positions manned by 10,000 soldiers with artillery and cavalry. The initial charge by General William Jenkins Worth, who attacks before his artillery is deployed, is bloodily repulsed, but the Americans regroup and gradually force the defenders back. General Antonio López de Santa Anna suffers more than 2,000 casualties while Scott suffers 117 dead, 653 wounded, and 18 missing. Among the first American officers to enter the captured town is Lieutenant Ulysses S. Grant.

September 12–13

MILITARY: Three miles southwest of Mexico City, the Battle of Chapultepec is waged as 8,000 men under General Winfield Scott attack a like number of Mexicans directed by General Antonio López de Santa Anna. Among the defenders are 60 military cadets, many of whom lose their lives in the fighting and will be enshrined as national heroes. The Americans carry the city after stiff fighting, losing 450 men killed and wounded; Mexican casualties are around 1,800. Victory here signals the occupation of Mexico City, and Scott begins installing a military government, the first in American history.

MARINES: The marine battalion under Brevet Lieutenant Colonel Samuel F. Watson plays an important role in the capture of Chapultepec Castle, losing 39 men killed and wounded. The marines are among the very first troops to enter Mexico City and raise the American flag over the newly captured city. This marks the first instance that the American flag is unfurled over a foreign capital. This is also the origin of the verse "From the halls of Montezuma."

September 13–October 12

MILITARY: Colonel Thomas Childs, commanding 400 men and some hospital invalids, successfully defends the village of Puebla, Mexico, against the large army of General Antonio López de Santa Anna. The siege will finally be broken by the approach of Colonel Joseph Lane's brigade.

September 14

MILITARY: The victorious army of General Winfield Scott occupies Mexico City after a brilliant campaign of maneuvering. In Britain, the famous duke of Wellington pronounces Scott “the greatest living soldier.”

September 16

MILITARY: General Winfield Scott promulgates General Order No. 20, which establishes military rule throughout occupied Mexico. He will eventually assess Mexico \$3 million to support the occupation.

October 1

MARINES: A landing party of sailors and marines from the sloop *Dale* captures the town of Muleje, Baja California. The schooner *Magdalen* is also seized and then burned.

**Scott, Winfield (1786–1866)***Army general*

Winfield Scott was born in Petersburg, Virginia, on June 13, 1786, the son of a Revolutionary War veteran. He briefly attended William and Mary College in 1806, then dropped out to study law. The following year Scott enlisted as a captain in the U.S. Army, where he proved himself capable but overly sensitive toward matters of rank and honor. In 1810 he was court-martialed for publicly criticizing his superior, General James Wilkinson, and received a year's suspension. He passed the time immersing himself in European military literature, so that when the War of 1812 commenced he was among the most professional officers of his grade. Scott was one of a handful of leaders to garner distinction in this conflict, and in July 1814 he served with General Jacob J. Brown's Niagara campaign as a brigadier general. He fought exceedingly well at the battles of Chippewa and Lundy's Lane, being severely wounded but also gathering a national reputation as the army's

youngest general. Afterward, he ventured to Europe and translated several French drill manuals for use at home. By this time Scott had acquired the moniker “Old Fuss and Feather,” owing to his insistence upon proper military decorum. After fighting in Florida's Second Seminole War, then helping to resolve a border dispute between Maine and Canada, Scott rose to commanding general of the army in 1841. In this capacity, he fought in the Mexican-American War, planning and leading the decisive campaign of 1847 against Mexico City. Commencing with an amphibious landing at Veracruz, Scott marched rapidly inland, defeated larger Mexican forces, and occupied the enemy capital in a lightning campaign. The Mexicans sued for peace shortly after, and Scott became a national hero.

Success on the battlefield whetted Scott's appetite for politics, and in 1852 he sought and won the Whig Party nomination for the presidency. However, he badly lost the

October 5

NAVAL: Lieutenant T. A. M. Craven leads a landing party of sailors and marines ashore at Loreto, Baja California, seizing three cannon.

October 20

MARINES: The *Portsmouth* and *Congress* land sailors and marines off Guaymas, Sonora, Mexico, seizing the town after a brief bombardment and occupying it briefly.

November–December

MILITARY: General Winfield Scott settles in for a long occupation of Mexico City, although he is careful to respect local religious and judicial customs. He also uncovers an excess \$100,000 in his accounts and will use it to found a Soldiers' Home for retired military personnel in Washington, D.C.

election to Democrat Franklin Pierce and resumed his military career. Though southern born, Scott was an ardent nationalist, and he unflinchingly sided with the North during the approach to civil war. He was President Abraham Lincoln's senior military adviser before being replaced by General George B. McClellan in the fall of 1861. Prior to this, Scott promulgated his so-called Anaconda Plan, a brilliant strategic ploy that called for an offensive down the Mississippi River to cut the Confederacy in half, while a naval blockade throttled its economy. The plan was initially derided as overly cautious by officials who sought to end the war with a single decisive blow, despite Scott's warnings that newly recruited soldiers were too raw for combat. After the defeat at Bull Run in August 1861, military planners gradually adopted Scott's overarching strategy. Scott himself retired from active duty in the fall of 1861 and relocated to the U.S. Military Academy at West Point. He died there on May 29, 1866, having bequeathed to the U.S. Army traditions of professionalism and victory it had theretofore lacked.

Winfield Scott (National Archives)

November 1

MILITARY: Colonel William S. Harney's dragoons escort the first wagon of sick and wounded soldiers from Mexico City to Puebla.

November 2

MILITARY: The trial of Major John C. Frémont begins in Washington, D.C.; he is charged with mutiny, refusing a lawful command, and conduct prejudicial to military discipline.

- At Agua Fria, Mexico, a detachment of the 2nd Dragoons is ambushed by Mexican guerrillas, losing three dead and two wounded, but also killing the rebel leader.

November 11

MARINES: At Mazatlán, Mexico, a threatened landing by sailors and marines from the *Congress*, *Cyane*, and *Independence* induces the Mexican garrison there to withdraw. The town is then occupied without violence.

- Mexican insurgents under Captain Manuel Pineda unsuccessfully attack the garrison at La Paz, Baja California. Despite the setback, the revolt continues to grow.

November 17

MARINES: In a sharp action, 65 sailors and marines from the *Dale* again land and drive out 300 Mexican soldiers from Guaymas, Mexico. The detachment commander, Lieutenant Thomas O. Selfridge, is seriously wounded in action, and it takes close support fire from the sloop to finally defeat the enemy.

November 19–21

MARINES: Landing detachments from the *Congress*, *Cyane*, and *Independence* seize San José, Baja California, and hold it two nights despite attacks by larger Mexican forces. The garrison, consisting of 24 men under Lieutenant Charles Heywood, resists gallantly from a mission compound.

November 20

NAVAL: Landing parties under Lieutenants George C. Selden and Stephen C. Rowan surprise and scatter a Mexican company at Urias, south of Matzatlán, Mexico.

November 25

MILITARY: General Zachary Taylor departs northern Mexico and begins his voyage back to the United States. General John E. Wool retains command of his forces in the field.

November 29

INDIAN: Marcus Whitman and 13 settlers are killed by Cayuse Indians at their mission in the Oregon Territory.

December 3

MILITARY: General Zachary Taylor arrives at New Orleans to thunderous applause. Rumors abound that the conquering hero intends to parlay his national popularity into a political career.

December 12

NAVAL: A detachment of 43 sailors and marines under Lieutenant Montgomery Lewis attacks a Mexican camp after sunset, scattering the defenders.

December 13

MARINES: Near Mazatlán, Mexico, a marine night patrol under Lieutenant William W. Russell surprises Mexican forces at Palos Prietos, driving them off.

1848

January 12

NAVAL: A landing party from the bark *Whiton* and storeship *Lexington* under Lieutenant Frederick Chatard captures a Mexican battery defending the Pacific port of San Blas; the cannon are taken aboard the vessels.

January 17

NAVAL: Lieutenant Frederick Chatard again goes ashore with a landing party and occupies the Mexican port of Manzanillo, on the Pacific coast.

January 22–February 14

MARINES: The landing detachment holding the mission at San José del Cabo, Baja California, is besieged by superior Mexican forces, but manages to keep its attackers at bay.

January 30

MARINES: Landing parties from the *Dale* under Lieutenant Thomas A. Craven land and march overland at night until they surprise and defeat a Mexican detachment at Cochori, Mexico.

January 31

MILITARY: Major John C. Frémont is court-martialed for disobedience, found guilty, and cashiered from the military. President James K. Polk disapproves of the sentence and eventually restores him to duty in the Regiment of Mounted Riflemen. Frémont, upon further reflection, resigns on March 15 to prospect for gold in the West.

February 2

DIPLOMACY: The Treaty of Guadalupe Hidalgo is signed, which formally ends the Mexican-American War, although skirmishing continues for several weeks.

February 13

MARINES: The *Dale's* marine detachment under Lieutenant Fabius Stanly, reinforced by sailors, marches from Guaymas, Sonora, and seizes the nearby settlement of Bocachicacampo.

February 15

MARINES: A landing detachment from the *Cyane* under Commander Samuel F. Du Pont marches to the rescue of fellow marines holed up in the mission at San Jose del Cabo, Baja Mexico.

February 18

MILITARY: General Winfield Scott is relieved of command by order of President James K. Polk and begins his journey back to Washington, D.C. Previously, he had placed General William Jenkins Worth and several other generals under arrest for alleged disrespect.

February 25

MILITARY: An anti-guerrilla force under Colonel Joseph Lane surprises a large group near Pachuca, Mexico, killing or seizing more than 50 guerrillas.

March 9

MILITARY: Missouri volunteers under General Sterling Price fight the last battle of the Mexican War at Chihuahua. Price dismisses news of the recent peace treaty as a ruse and attacks, losing four dead and 19 wounded to a Mexican tally of 40.

March 15

MARINES: A landing detachment from the *Dale* again forces Mexican troops out of the vicinity of Cochori.

March 21–July 1

MILITARY: General Gideon J. Pillow, in a huff over his treatment by General Winfield Scott in Mexico, demands and receives a lengthy court of inquiry that finds him blameless.

April 8–May 10

NAVAL: Lieutenant William Lynch, assisted by a surveying party, maps the Sea of Galilee and ventures down the Jordan River until he reaches the Dead Sea.

April 9

MARINES: Sailors and marines from the *Dale* under Lieutenant Fabius Stanly land again outside of Guaymas and spike several abandoned cannon after brushing aside a small Mexican covering force. These are the final shots fired by the U.S. Navy in this conflict.

May 1–August 2

MILITARY: The Americans begin the long process of withdrawing their forces from Mexico; most sail from Veracruz to New Orleans, Louisiana, for either redeployment or dismissal.

May 6

NAVAL: Commodore William B. Shubrick relinquishes command of the Pacific Squadron to Commodore Thomas ap Catesby Jones.

May 30

MILITARY: Surgeon General Thomas Lawson becomes the army's first medical officer to become brevet brigadier general for his useful services during the Mexican War.

June 12

MILITARY: General William Jenkins Worth holds a final ceremony in Mexico City, Mexico, whereby the city is officially turned over to civilian authorities.

June 19

MILITARY: Congress votes to reduce military strength back to pre-1846 levels, although officers are allowed to keep their wartime ranks. Moreover, members approve a death plan providing the families of deceased enlisted men a grant of three months' pay.

July 1

MILITARY: Despite the fact that he is the de facto Whig candidate for the presidency, Brevet Major General Zachary Taylor gains appointment as commander of the Western Division, headquartered at Baton Rouge.

July 6

MILITARY: To tighten up standards of military appearance, long hair is ordered cropped, with no whiskers below the ear tip. Moreover, mustaches are allowed only in dragoon units.

July 18

MILITARY: Several companies of dragoon and artillery are ordered west to California in order to garrison and police that vast tract of land.

August 2

MILITARY: Men of the 1st Artillery march from Veracruz, Mexico, and board steamers headed for New York. Total losses for the Mexican War are 1,010 soldiers killed in combat, 4,899 dead from disease, and 2,745 wounded in action. Volunteer forces sustained 711 combat deaths, 6,256 dead from disease, and 1,357 wounded.

August 7

MILITARY: At Jefferson Barracks, Missouri, the Regiment of Mounted Riflemen is reconstituted as a unit, with many former personnel signing up for another tour. They will then resume their patrolling of the Oregon Trail.

August 10

MILITARY: In New York, explosive bullets are patented by Walter Hunt.

August 31

MILITARY: The addition of millions of square miles of new territory requires the War Department to realign the existing military divisions, and the 11th Military Department is created within the existing Oregon Territory.

September 7

MILITARY: General Winfield Scott assumes command of the Eastern Division and relocates his headquarters to New York City from Washington, D.C.

November 7

MILITARY: Brevet Major General Zachary Taylor is elected president of the United States, becoming the first and only standing military officer to occupy the White House. General Winfield Scott, a stickler for military protocol, will temporarily resign as commanding general of the army, feeling that he should not include a president-elect among his subordinates.

1849**February 12–April 12**

MILITARY: A surveying expedition led by engineering Lieutenants Henry C. Whiting and Martin L. Smith completes a perilous trek through the heart of Indian country, covering 1,600 miles between San Antonio and El Paso, Texas.

February 28

MILITARY: In accordance with the Treaty of Guadalupe Hidalgo, an army survey team is created with Major William H. Emory appointed as head astronomer. Its purpose is to fix the boundary line between the United States and Mexico.

March 2

MILITARY: The position of judge advocate general of the army, previously abolished in 1802, is resurrected by Congress.

March 3

MILITARY: In a major development, Congress creates the Department of the Interior and transfers responsibility for Indian affairs from the War Department. However, the military is still responsible for enforcing whatever treaties are signed into law.

- A party under Lieutenant Egbert L. Vale founds Fort McIntosh at Laredo, Texas, to monitor hostile Indians moving between the United States and Mexico.

NAVAL: Lieutenant Charles H. Davis founds the Nautical Almanac Office at Harvard University, establishing him as a leading scientific figure in navy circles.

March 8

MILITARY: In Washington, D.C., attorney George W. Crawford is appointed as the 19th secretary of war.

March 13

MILITARY: A body of troops under Captain Sidney Burbank constructs Fort Inge on the Leon River, Texas. A minor post, it will be occupied by Confederate troops in 1861 and finally abandoned in 1869.

March 18

MILITARY: Lieutenant Charles H. Taylor, 2nd Dragoons, begins constructing Fort Croghan near Burnet, Texas; it is ultimately abandoned in 1853.

March 27

MILITARY: Fort Graham is constructed by Captain Ripley A. Arnold, 2nd Dragoons, on the Brazos River, Texas.

- Captain Sidney Burbank, 1st Infantry, begins construction of Fort Duncan at Eagle Pass, Texas.

April 4

MILITARY: At Fort Smith, Arkansas, an exploring expedition under Captain Randolph B. Marcy and Lieutenant James H. Simpson begins a three-month sojourn down the Santa Fe Trail. They are looking for a potential rail route to Santa Fe.

April 13

MILITARY: A party under Colonel George M. Brooke, 5th Infantry, erects Fort Ripley along the Mississippi River in Minnesota Territory. It is built to keep an eye on the Winnebago reservation and protect them against depredations by the Sioux and Chippewa.

April 17

NAVAL: The sloop *Preble* becomes the first American vessel to drop anchor at Okinawa.

May 10

MILITARY: The newly reconstituted Regiment of Mounted Riflemen departs Jefferson Barracks, Missouri, under Colonel William W. Loring, and gallops off for the Oregon Trail. En route, they are to construct posts and protect settlers moving west.

Brooke, George M. (1785–1851)

Army general

George Mercer Brooke was born in Mantapike, Virginia, on October 16, 1785, and he joined the U.S. Army as a lieutenant of the 5th Infantry in 1808. He proved himself adept as an officer and had risen to captain by the time the War of 1812 commenced. In this capacity he accompanied his regiment to the Niagara frontier and partook in several bloody engagements. In May 1814 Brooke transferred as a major in the 23rd Infantry and marched several companies from Sackets Harbor, New York, to the Niagara peninsula as part of General Eleazar W. Ripley's brigade. In this capacity he was closely engaged in the bloody Battle of Lundy's Lane, July 25, 1814, and succeeded to the command of the battalion following the death of Major Daniel MacFarland. Once the British battery had been heroically stormed by Colonel James Miller, Brooke led the 23rd Infantry up to his support and helped repel several determined British counterattacks. He next distinguished himself during the siege of Fort Erie and fought well during the August 15, 1814, repulse of General Gordon Drummond's night attack, winning a brevet promotion to lieutenant colonel. However, the British siege proved relentless, and they continued building new batteries. One night, Brooke, assisted by two light dragoons, stole to within a few yards of the enemy's new emplacement, climbed the nearest tree, and placed a lantern on the branches. The American cannon at Fort Erie, now guided by Brooke's lantern, inflicted

heavy loss on the British. He subsequently fought well during the successful American sortie on September 17, 1814, and acquired his second brevet promotion to colonel.

After the war, Brooke was retained in service with the 4th and 8th Infantries, rising to brevet brigadier general in September 1824. That year he headed an expedition to Tampa Bay, Florida, where he established Fort Brooke on the site of present-day Tampa City. In 1828 he transferred north to command Fort Howard, Wisconsin, and in July 1831 he advanced to full colonel of the 5th Infantry. Brooke continued his far-ranging western career in August 1844 by becoming commander of the 4th Military Department, encompassing most of the northwestern territories, and two years later he assumed control of the army's Western Division, headquartered at New Orleans. Here he replaced the aged general Edmund P. Gaines, who had been dismissed for illegally raising thousands of volunteers during the Mexican War (1846–48). Brooke fulfilled a critical purpose by funneling men and supplies to the army of Generals Zachary Taylor and Winfield Scott in the field. Brooke performed his tasks so capably that in May 1848 he received a brevet promotion to major general along with command of the 8th Military Department in Texas. Brooke died of illness in San Antonio on March 9, 1851 where, as a final token of esteem, soldiers of his command erected a monument over his grave at their own expense.

- In Washington, D.C., Major General Winfield Scott resumes the post of commanding general of the army; he had relinquished that office while commanding troops in Mexico during the late war.

May 15

MILITARY: In the Oregon Territory, Captain John S. Hathaway takes over an old fort belonging to the Hudson's Bay Company and renames it Fort Vancouver after George Vancouver, an English explorer.

June 6

MILITARY: Captain Ripley A. Arnold and his detachment of 2nd Dragoons establish Fort Worth on the Trinity River, Texas—site of the modern-day city of Fort Worth.

June 27

MILITARY: In Benicia, California, Captain William H. Warner of the Topographical Engineers begins exploring the Sacramento River. His labors will carry him over the Sierra Mountains to the Humboldt River.

July 7

MILITARY: A party of the 8th Infantry under Lieutenant James Longstreet begins building Fort Lincoln on the Rio Seco River, Texas, to protect the nearby settlement of D'Hanis.

August 16

INDIAN: At Santa Fe, Lieutenant Colonel John M. Washington leads a punitive expedition against warring Navajo Indians in the New Mexico Territory. One of his officers, Lieutenant James H. Simpson of the Topographical Engineers, is the first white man to behold the famous Indian pueblos in Chaco Canyon.

NAVAL: A scientific expedition headed by Lieutenant James M. Gilliss departs New York City to demonstrate the utility of astronomical observations as a tool for facilitating navigating at sea. The bulk of his work will be conducted at an observatory he constructs near Santiago, Chile.

August 28

MILITARY: In the Oregon Territory, a party under Captain Bennett H. Hill establishes Fort Steilacoom; this minor post will be abandoned in 1874.

August 31

INDIAN: In the Tunisha Valley, New Mexico Territory, an army expedition under Lieutenant Colonel John M. Washington corners hostile Navajo chieftains, demands the return of all stolen horses, and convinces the Indians to sign a peace treaty. After a brief fight that claims the lives of six Navajo, the majority of chiefs comply.

September

INDIAN: At Goose Lake, California, hostile Pit River Indians ambush the expedition of Captain William H. Warner, Topographical Engineers, killing him.

September 8

MILITARY: In Texas, Fort Bliss is founded by Captain Jefferson Van Horn, 3rd Infantry, to safeguard travelers from hostile Indian raiders crossing the border from Mexico.

September 11

MILITARY: At Mission San Diego de Aleada, California, an expedition under Lieutenant Amiel W. Whipple, 1st Dragoons, departs to begin a survey of the Gila and Colorado Rivers.

October

INDIAN: At Point of Rocks, New Mexico Territory, hostile Ute and Jicarilla Apache massacre the wagon train of J. M. White and capture his wife and daughter. Captain William Grier, 1st Dragoons, sets off in pursuit assisted by noted scout Kit Carson, but the captives are killed before they can be rescued.

October 8

MILITARY: The Regiment of Mounted Riflemen under Colonel William W. Loring becomes the first military unit to ride the entire length of the Oregon Trail as it canters into Oregon City, Oregon Territory—a 2,016-mile sojourn.

October 26

MILITARY: A party of the 8th Infantry under Captain William R. Montgomery founds Fort Gates on the Leon River, Texas, as part of the far-ranging frontier defense system.

1850**March 1**

MILITARY: Captain Samuel M. Plummer constructs Fort Merrill on the Nueces River, Texas.

March 8

NAVAL: In Washington, D.C., William B. Preston becomes the 19th secretary of the navy.

April 12

INDIAN: At Laredo, Texas, two companies of the 1st Infantry fight off an attack by hostile Indians, losing eight dead and wounded.

May 21

MILITARY: On the Columbia River, Oregon Territory, Captain Stephen S. Tucker, Mounted Riflemen, constructs Fort Dalles; it subsequently serves as a quartermaster depot.

May 26

NAVAL: An expedition headed by Lieutenant Edward J. De Haven sails from New York City in the borrowed brigs *Advance* and *Rescue*, and heads to the Arctic region in an attempt to find the missing British explorer Sir John Franklin, who disappeared in the region in 1847. The endeavor is partially underwritten by philanthropist Henry Grinnell, and it will become known as the Grinnell Expedition.

June 17

MILITARY: Congress votes to expand the size of each infantry company to 74 men apiece, giving the U.S. Army an authorized strength of 12,927—the actual tally being much closer to 8,000.

June 27

MILITARY: An expedition under Captain Howard Stansbury completes the first survey of the Great Salt Lake, Utah Territory. His subordinate, Lieutenant John W. Gunnison, makes the first detailed observations of the various Mormon communities there.

July 1

NAVAL: The U.S. Navy School, Annapolis, Maryland, is formally renamed the U.S. Naval Academy, with Commander Cornelius K. Stribling installed as the third superintendent. The student curriculum is extended to four years, but still includes a three-year stint at sea following the first two years of instruction.

July 2

MILITARY: A detachment of the 6th Infantry under Captain Samuel Woods constructs Fort Dodge on the Des Moines River, Iowa Territory; it will subsequently serve as the basis for present-day Fort Dodge.

July 10

MILITARY: In Washington, D.C., Millard Fillmore is sworn in as president and commander in chief.

August 2

NAVAL: In Washington, D.C., William Alexander Graham is sworn in as the 20th secretary of the navy.

August 8

MILITARY: A detachment of the 1st Dragoons under Lieutenant Colonel Edwin V. Sumner constructs Fort Atkinson on the Arkansas River, Kansas Territory. Its purpose is to help defend wagon convoys along the Santa Fe Trail.

August 15

MILITARY: In Washington, D.C., Charles M. Conrad is sworn in as the new secretary of war under President Millard Fillmore.

August 22

MILITARY: On the Canadian River, Indian Territory (Oklahoma), Captain Randolph B. Marcy, 5th Infantry, establishes Fort Arbuckle to protect travelers and the local Chickasaw Indians.

September 6

NAVAL: In the Cape Verde Islands, off the western tip of Africa, the venerable sloop *Yorktown* under Commander John Marston is lost when it wrecks on Isla de Mayos.

September 16

MILITARY: Congress votes to expand the U.S. Military Academy, West Point, by voting to hire additional professors of mathematics, engineering, ethics, and the like.

September 28

MILITARY: In light of higher living expenses in California and Oregon, Congress votes officers serving there an additional \$2.00 per diem while enlisted men serving there receive double their usual pay.

NAVAL: A bill to abolish flogging from the U.S. Navy and merchant marine is signed into law by President Millard Fillmore. However, corporal punishment is still routinely administered in public schools to keep students in line.

November 6

MILITARY: An executive order renders Alcatraz Island, San Francisco Bay, a military reservation. The post will not be formally garrisoned until 1859.

November 27

MILITARY: In California, Captain Samuel P. Huntington establishes Fort Yuma to protect settlers and keep a watchful eye on local Yuma Indians.

1851

January

MILITARY: Chief Engineer Joseph G. Totten, mindful of expanding military commitments in the West, recommends that the total number of fortifications be increased to 186.

April 12

MILITARY: In Baja, California, men of the 2nd Infantry burn two Cocopa Indian villages and capture 150 warriors who are subsequently enlisted in the fight against the Yuma tribes.

May 21

NAVAL: In Lima, Peru, an exploring expedition under the command of Lieutenant William L. Herndon explores the feasibility of navigating up the Amazon River from the Atlantic coast.

June 24

MILITARY: On the Salt Fork of the Brazos River, Texas, a party of the 5th Infantry under Captain Carter L. Stevenson begins construction of Fort Belknap. Its purpose is to protect settlers on the route from Fort Smith, Arkansas, to Santa Fe, New Mexico Territory.

July 6

MILITARY: Captain Hamilton Merrill, 2nd Dragoons, begins construction of Fort Mason on Comanche Creek, Texas, to protect nearby German settlements.

July 16

MILITARY: Colonel William W. Loring conducts his Regiment of Mounted Riflemen back to Jefferson Barracks, Missouri, after an exhausting tour of duty along the Oregon Trail. The regiment is in need of rebuilding and refitting; it will subsequently be deployed to Texas.

July 23

INDIAN: The United States and the Sioux nation conclude the Treaty of Traverse des Sioux, whereby the tribe surrenders all land in Iowa and most of its holdings in Minnesota.

July 26

MILITARY: On the Santa Fe Trail, New Mexico Territory, Lieutenant Colonel Edwin V. Sumner establishes Fort Union to protect travelers along the Santa Fe

Trail from Ute and Jicarilla Apache raiders. As the departmental headquarters, it is the largest federal post in the entire Southwest and also functions as a supply depot for the region.

August 6–7

NAVAL: Commander William C. Pearson, commanding the sloop *Dale*, demands that King Selim of Johanna Island (Grande Comore), Indian Ocean, pay an indemnity for illegally jailing a New England merchant captain. When the demand is refused, Pearson briefly bombards the town and the money is paid.

August 9

MARINES: At the Comoro Islands off Madagascar, marines from the *Dale* help put down a mutiny on board the American bark *Paulina*.

September 14

MILITARY: At Port Orford, Oregon Territory, Lieutenant Powell T. Wyman founds Fort Orford on Trichenor Bay to deter hostile tribesmen living in the area.

September 18

MILITARY: Lieutenant Colonel Edwin V. Sumner establishes Fort Defiance at the mouth of Canon Bonita; this is the first army post constructed in Arizona Territory. After 1868 it will function as headquarters for the Navajo Indian Agency.

September 23

MILITARY: Lieutenant Colonel Dixon S. Miles, 3rd Infantry, founds Fort Fillmore on the Rio Grande River near Mesilla, New Mexico Territory, as part of the over-all frontier defense system; it will be abandoned in 1862.

November 14

MILITARY: Fort Phantom Hill is constructed by Major John J. Abercrombie, 5th Infantry, between the Elm and Clear Forks of the Brazos River, Texas. Its purpose is to guard travelers along the route from Fort Smith, Arkansas, to Santa Fe, New Mexico Territory.

November 15

NAVAL: The U.S. Naval Academy adopts a new regime that keeps midshipmen in class continuously for four years, with midshipmen cruises during the summer months. Previously, cadets were required to interrupt their studies after two years to complete a three-year tour at sea.

1852

February 3

MILITARY: A detachment of the 1st Infantry under Lieutenant Colonel Henry Bainbridge establishes Fort Ferret on the North Fork of the Llano River, Texas.

NAVAL: Commodore Isaac McKeever of the Brazilian Squadron dispatches landing parties ashore to protect American lives and property at Buenos Aires, Argentina.

February 5

MARINES: The sloop *Albany* lands marines ashore at San Juan del Norte, Nicaragua, to help put out a raging fire.

February 6

MILITARY: Apache warriors attack Company K, 3rd Infantry, near the Gila River, Texas, killing three men.

February 26

MILITARY: A military reservation is established at the entrance of San Diego Bay, where an earthwork is constructed. This will become the site of Fort Rosecrans in 1899.

MARINES: The Brazilian squadron lands marines at Buenos Aires, Argentina, during a revolution, to protect American lives and property. They are joined by French and British detachments with similar intent; marines kill four looters before order is restored.

March 14

MILITARY: Major Pitcairn Morrison, commanding a detachment of the 8th Infantry, begins constructing Fort McKavett on the San Saba River, Texas.

April 11

NAVAL: The exploring expedition under Lieutenant William L. Herndon reaches Para, Brazil, after sailing 4,366 miles up the Amazon River.

May 18

MILITARY: The Mounted Riflemen under Colonel William W. Loring begin work on Fort Ewell on the Nueces River, Texas; the post will be abandoned two years later.

May 26

MILITARY: Lieutenant Nelson H. Davis, commanding a detachment of the 2nd Infantry, erects Fort Reading along Cow Creek (Redding), California.

June 6

MARINES: Commodore Matthew C. Perry, escorted by sailors and marines, lands at Naha, Okinawa, and meets with local authorities.

June 16

POLITICS: Commanding General of the Army Winfield Scott accepts the Whig Party nomination for president of the United States; that fall he will be defeated by Democrat Franklin Pierce.

June 20

MILITARY: A detachment of the 1st Infantry under Lieutenant William E. Prince constructs Fort Clark on Las Moras Creek, Texas, as part of the defensive belt protecting the road between San Antonio and El Paso.

June 22

MILITARY: Men of the 1st Dragoons under Major George A. H. Blake begin work on Fort Massachusetts in the Utah Territory, as part of the Department of New Mexico. It is the most northerly fortification in that department and protects travelers moving through the Sangre de Cristo Pass.

July 5

MILITARY: While traveling on the Pacific Railroad across the Isthmus of Panama, several companies of the 4th Infantry contract cholera and lose 107 of their number by the time they are transferred to California.

July 26

NAVAL: In Washington, D.C., John Pendleton Kennedy takes the oath as the 21st secretary of the navy.

August

MILITARY: As a cost-cutting measure, Congress votes to abolish the \$2.00 recruiting bounty, in spite of persistent manpower shortages.

August 14

MILITARY: A detachment of the 1st Dragoons under Lieutenant Robert Ransom begins construction of Fort Burgwin, just south of Taos, New Mexico Territory. Its purpose is to protect wagon caravans along the Santa Fe Trail into Taos.

August 31

MILITARY: Congress, anxious to retain the services of trained officers on the western frontier, votes to grant an additional \$2.00 per diem bonus to those serving there.

September 1

MILITARY: Brevet Colonel Robert E. Lee, Corps of Engineers, is assigned as superintendent of the U.S. Military Academy at West Point, New York. He will train several of the ranking officers who oppose him during the Civil War.

September 8

MILITARY: Major Marshall S. Howe and men of his 2nd Dragoons construct Fort Conrad on the Rio Grande River, New Mexico Territory.

September 17

MARINES: Continuing unrest in Buenos Aires, Argentina, results in marines from the *Jamestown* landing to protect the American consulate.

September 30

NAVAL: The brig *Dolphin* departs New York City under the command of Lieutenant S. P. Lee; his scientific mission is to test the theories of Lieutenant Matthew Fontaine Maury in regard to winds and currents in the Atlantic.

October 16

MILITARY: Fort Jones is built on the Scott River, California, by Lieutenant Joseph B. Collins and men of the 4th Infantry, to protect a gold mining district.

October 28

MILITARY: Fort Chadbourne is built on Oak Creek, Texas, by Captain John Beardsley, 8th Infantry, to protect travelers on the Santa Fe Trail between Fort Smith, Arkansas, and Santa Fe, New Mexico Territory.

November 26

MILITARY: Fort Columbus, New York Harbor, becomes a principle training depot for new recruits.

1853**January 19**

NAVAL: Lieutenant Thomas J. Paige of the side-wheel steamer *Water Witch* sails from Baltimore, Maryland, and begins a three-year exploratory survey of South America's Plate River.

January 30

MILITARY: Captain Robert C. Buchanan begins construction of Fort Humboldt, overlooking Humboldt Bay in northern California.

February 15

NAVAL: A 46-chapter "System of Orders and Instructions" is authorized by President Millard Fillmore, which is supposed to closely govern punishments administered in the U.S. Navy.

March

MILITARY: Commanding General of the Army Winfield Scott relocates army headquarters from Washington, D.C., to New York City after Franklin Pierce, who defeated Scott for the presidency, is sworn into office.

March 4

MILITARY: The Army Appropriation Act passed by Congress contains \$150,000 for a national survey of the best transcontinental railroad route; it is incumbent upon the War Department to select the most viable one.

March 7

MILITARY: After resigning his senate seat in protest of the Compromise of 1850, Jefferson Davis of Mississippi is appointed the new secretary of war by President Franklin Pierce. He proves surprisingly effective in this role.

March 8

NAVAL: In Washington, D.C., James C. Dobbin becomes the 22nd secretary of the navy.

March 11

NAVAL: Marines and sailors are sent ashore at San Juan del Norte, Nicaragua, by the sloop *Cyane* to protect American lives and property.

March 29

MILITARY: Lieutenant Montgomery C. Meigs, Corps of Engineers, begins final construction on the north and south wings of the U.S. Capitol Building in Washington, D.C.

April 29

MILITARY: A detachment of the 6th Infantry under Captain Samuel Woods begins building Fort Ridgley on the Minnesota River, Minnesota Territory. It is designed to protect the settlement of New Ulm from nearby Sioux Indians.

May 17

MILITARY: Fort Riley, Kansas Territory, is constructed by Captain Charles S. Lowell, 6th Infantry, on the Kansas River.

May 30

NAVAL: In New York, naval surgeon Dr. Elisha Kent Kane leads the steamer *Advance* on an exploring expedition toward the Arctic region. This will become known as the Second Grinnell Expedition, being underwritten by financier Henry Grinnell.

June

INDIAN: A skirmish between a band of Miniconjou Sioux and army troops guarding a ferry near Fort Laramie, Utah Territory, results in the death of three Indians, three wounded, and two taken prisoner.

June 11

NAVAL: An exploring expedition headed by Commander Cadwallader Ringgold begins the North Pacific Surveying and Exploring Expedition, first charting the Sandwich Islands prior to sailing for the Aleutians and Japan.

June 21

NAVAL: At Smyrna, Turkey, Commander Duncan N. Ingraham of the sloop *St. Louis* prepares to engage Austrian warships if they fail to release naturalized American citizen and former Hungarian revolutionary, Martin Kostza. After a few tense moments, Kostza is freed and the crisis subsides. Congress subsequently awards Ingraham a gold medal for protecting the rights of American citizens abroad.

June 23

MILITARY: At Fort Leavenworth, several companies of the Regiment of Mounted Riflemen under Captain John W. Gunnison begin exploring a possible railroad route through Kansas, Colorado, and Utah.

July 8

NAVAL: In an ominous development for the Japanese government, the American side-wheel steamers *Mississippi* and *Susquehanna*, accompanied by the sloops *Plymouth* and *Saratoga*, enter Edo (Tokyo) Bay unannounced, much to the consternation of shogunate officials. Commodore Matthew C. Perry is under orders to establish formal diplomatic relations between the two nations. The Squadron also seeks to end the cruel practice of either killing or abusing shipwrecked American sailors who wash up on Japanese soil. The xenophobic Japanese distrust the Americans, but are impressed by their steam-powered warships. Moreover, Perry, a commanding figure, impresses Japanese officials with his dignity and courtesy.

July 14

NAVAL: In Japan, Commodore Matthew Perry presents shogunate officials with a letter from President Millard Fillmore, inviting them to open diplomatic relations. He then departs, granting them several months to deliberate and reply.

MARINES: Commodore Matthew C. Perry arrives to convoy a message from President Millard Fillmore to the government. As a display of strength, the squadron's complement of 100 marines under Major Jacob Zeilin are deployed in dress uniform as an escort. The Americans are seeking direct diplomatic relations, something the Tokugawa shogunate has avoided for nearly two-and-a-half centuries.

July 15

MILITARY: At Fort Smith, Arkansas, Lieutenant Amiel W. Whipple leads a group of soldiers, scientists, and herders while also exploring a possible railroad route as far west as Los Angeles, California.

August 31

NAVAL: The new nine-inch Dahlgren gun, designed by Lieutenant John A. Dahlgren, is recommended for a new class of warships by the Franklin Board. This is the first of many innovative weapons created by Dahlgren, who will become the navy's most talented ordnance designer.

September 11

MARINES: At Hong Kong, a detachment of marines from the steamer *Mississippi* assists a Siamese captain to suppress a mutiny on his vessel.

**Perry, Matthew C. (1794–1858)***Naval officer*

Matthew Calbraith Perry was born in South Kingston, Rhode Island, on April 10, 1794, a younger brother of Oliver Hazard Perry, victor of the Battle of Lake Erie. He joined the U.S. Navy as a midshipman in 1809 and saw some active duty in the War of 1812 under Captains John Rodgers and Stephen Decatur. Over the next three decades, Perry fulfilled numerous positions at sea and ashore, his handling of which established him as one of the foremost naval officers of his generation. The czar of Russia was reputedly so impressed by his commanding mien that he was tendered a commission in the Russian navy. Perry rose to captain in 1837 and assumed command of the USS *Fulton* (II), the navy's first side-paddle steamship. This assignment convinced Perry of the need to modernize the fleet, and thereafter he pushed superiors into wholesale adoption of steam technology. In 1839 Perry assumed command of the navy's first gunnery school off Sandy Hook, New Jersey, handled his responsibilities adroitly, and rose to commodore in June 1841. In this capacity he served as commandant of the Brooklyn Navy Yard and oversaw construction of two superb steam frigates, the *Missouri* and *Mississippi*, which further demonstrated his mastery of new technologies. During the war with Mexico, Perry replaced Commodore David F. Conner as commander of the Gulf Coast Squadron and directly assisted the landing of General Winfield Scott's army at Veracruz. He then sailed back to New York in 1848 before accepting one of the most sig-

nificant diplomatic missions ever assigned to a naval officer.

In 1853 President Millard Fillmore ordered Perry to take a squadron of steam warships across the Pacific and establish diplomatic relations with Japan. That nation had been sealed off from the world by the Tokugawa shogunate and isolated for some 250 years. Perry's orders were to establish friendly relations, open several cities to American trade, and end Japanese mistreatment of shipwrecked American sailors on their shores. Perry's four vessels appeared suddenly in Edo (Tokyo) Bay on July 8, 1853, and the awestruck Japanese christened them the "Black ships" because of their color. The commodore, a tall, dignified figure, then met with panic-stricken shogunate couriers, handed them a letter from President Fillmore, and then departed, promising to return in several months. The American sailed back to Edo in February 1854 and found Japanese officials willing to negotiate with these technologically advanced strangers. Perry was painfully polite to his hosts, showering them with numerous gifts, including a miniaturized steam locomotive; he won them over and laid the foundation for the Treaty of Kanagawa to commence trade and diplomatic relations. Perry returned home to a hero's greeting and served on the navy's efficiency board. He died in New York City on March 4, 1858, one of the most astute naval officers in American history, and the man who opened Japan up to the world.

September 28

MILITARY: Captain Andrew J. Smith, 1st Dragoons, constructs Fort Lane on the Rogue River, Oregon Territory, for the purpose of protecting a nearby Indian reservation.

October

MILITARY: The army's cavalry school relocates from Carlisle Barracks, Pennsylvania, to Jefferson Barracks, Missouri.

October 11

MILITARY: Secretary of War Jefferson Davis, ignoring the advice of academy faculty, directs that the curriculum at the U.S. Military Academy be expanded from four to five years.

October 26

INDIAN: Hostile Paiute Indians attack the exploring party of Captain John W. Gunnison along the Sevier River, Utah Territory, killing him and several members of the Regiment of Mounted Riflemen. Lieutenant E. G. Beckwith, 3rd Artillery, succeeds in command and conducts the survivors to a winter camp near Salt Lake City.

November 1

NAVAL: Commander Louis M. Goldsborough gains appointment as the fourth superintendent of the U.S. Naval Academy.

November 3

MILITARY: A group of American filibusters under former attorney William Walker captures the Mexican town of La Paz, Lower California, which Walker proclaims an independent republic. Officials at San Francisco repudiate his actions and refuse to send the supplies he requests.

December 3

MARINES: A boarding party from the frigate *Constitution* seizes a slave ship off the Congo River, West Africa.

December 27–31

MILITARY: A ship carrying the 3rd Artillery, along with family members, from New York to California is shipwrecked off Cape Hatteras, North Carolina. Nearly 200 people perish before other vessels rescue the survivors.

December 24

MILITARY: A detachment of the 3rd Infantry under Captain Israel B. Richardson constructs Fort Thorn on the Rio Grande River, New Mexico Territory.

December 30

DIPLOMACY: James Gadsden, a former U.S. Army officer, negotiates the so-called Gadsden Purchase with the Mexican government, whereby the United States acquires 45,535 square miles of flatland in southern New Mexico and Arizona—a region ideal for railroads.

1854**January 19**

NAVAL: Lieutenant Isaac G. Strain of the sloop *Cyane* leads a party of 25 officers and men across the Isthmus of Panama, looking for convenient terrain on which to build a possible canal to join the Atlantic to the Pacific.

February 13

NAVAL: The eight-ship squadron of Commodore Matthew C. Perry again anchors off Yokohama, Japan, and awaits the emperor's reply on the matter of establishing trade and diplomatic relations with the United States. The Tokugawa shogunate's inability to effectively deal with foreign "barbarians" in this instance will lead to its downfall in 1868.

February 21

MILITARY: A party of soldiers under Lieutenant Edward B. Beckwith, 3rd Artillery, begins exploring the Sierra Nevada Mountains, looking for a suitable pass for a railroad to California. The route he selects will be initially ignored by the War Department but will end up being the one used by the first transcontinental railroad.

March 5

INDIAN: Near Fort Union, New Mexico Territory, a detachment of the 2nd Dragoons led by Lieutenant Colonel Philip St. George Cooke defeats a band of hostile Jicarilla Apache under Lobo Blanco, killing the chief and several warriors.

March 8

DIPLOMACY: His squadron hovering in the distance, Commodore Matthew C. Perry is rowed ashore to Yokohama, Japan, where he commences treaty negotiations with the Tokugawa shogunate.

March 10

MARINES: A detachment from the *Perry* seizes a slave ship off the West African coast.

March 13

MARINES: In Japan, a company of marines culled from Commodore Matthew C. Perry's squadron is formed into a detail that escorts presents given to the emperor.

March 26–30

INDIAN: Jicarilla Apache under Chief Chacon, angered by the death of Lobo Blanco, ambush a company of the 1st Dragoons under Lieutenant John W. Davidson at Cieneguila (Taso), New Mexico Territory. Outnumbered four to one, the troopers hold off the Indians for three hours before retreating with 22 dead.

March 31

DIPLOMACY: Commodore Matthew C. Perry concludes the Treaty of Kanagawa with officials of the Tokugawa shogunate of Japan. The ports of Shimoda and Hakodate are opened to American trade, and American seamen shipwrecked in Japanese waters will now be afforded protection. Perry then impresses his hosts with several examples of advanced Western technology, including a miniature steam train, which are given as gifts.

April 1

MILITARY: A detachment of the 3rd Infantry under Captain Daniel T. Chandler constructs Fort Craig, New Mexico Territory, along the Rio Grande River.

April 4–5

MARINES: A landing detachment from the *Plymouth* under Commander John Kelly goes ashore to protect American lives and property at Shanghai, China,

during the Taiping Rebellion. They engage in actively defending the city alongside British naval forces; the Americans lose one dead and three wounded.

April 8

INDIAN: Lieutenant Colonel Philip St. George Cooke, spying a Jicarilla Apache ambush waiting for him at Rio Caliente, New Mexico Territory, suddenly attacks with several companies of the 1st and 2nd Dragoons, scattering the would-be ambushers. Cooke loses one dead and one wounded to an Indian loss of five killed and six wounded.

April 14

MILITARY: Congress, in an attempt to assist flagging military recruitment, reverses itself and restores the \$2.00 enlistment bonus for new recruits.

July 11

DIPLOMACY: The Treaty of Naha is concluded between Commodore Matthew C. Perry and the regency of the Loo Choo (Ryukyu) Islands, to promote trade and amity.

July 12–13

MARINES: Sailors and marines from the sloop *Cyane* land at Greytown (San Juan del Norte), Nicaragua, following an armed attack upon the American consulate there. When city authorities refuse to release a captured American, Commander George N. Hollis orders the *Cyane* to bombard the town, demolishing it.

August 4

MILITARY: Congress raises the basic military pay of privates by \$4.00 per month; those reenlisting also receive an additional \$2.00 per month.

August 10

MILITARY: Soldiers of the 1st Dragoons under Lieutenant Thomas F. Castor build Fort Tejon, California, near the Tejon Indian Reservation. They are there to check any hostile impulses on behalf of the tribesmen, and also to protect them from greedy settlers.

August 19

INDIAN: A detachment of the 6th Infantry under Lieutenant John L. Grattan departs Fort Laramie, Wyoming, enters a Miniconjou Sioux village, and demands the arrest of a warrior named High Forehead for stealing a cow. When Chief Conquering Bear refuses to comply, Grattan fires a cannon into his tent, killing him. A shooting spree ensues and all 28 Americans are killed on the spot by vengeful Indians.

September 16

NAVAL: Commander David G. Farragut occupies Mare Island, California, which will evolve into a significant shipyard.

September 21

NAVAL: Shortly after passing through the Formosa Straits, the brig *Porpoise* under Lieutenant K. Bridge is lost with all hands.

September 29

NAVAL: After departing Aspinwall, Panama, for New York, the sloop of war *Albany* under Commander James T. Gerry disappears at sea with all hands.

October 7

MILITARY: Fort Davis, Texas, is constructed by Lieutenant Colonel Washington Sewell, 8th Infantry, to protect commerce along the San Antonio–El Paso road.

November 17

MARINES: A landing party from the sloop of war *Vincennes* goes ashore on the Japanese island of Okinawa to enforce provisions of the Treaty of Naha.

1855

February 1

NAVAL: While surveying down the Paraguay River in South America, the side-wheel steamer *Water Witch* is fired upon by Paraguayan forces.

February 15

MILITARY: A special act of Congress elevates Commanding General of the Army Winfield Scott to lieutenant general; he is the first American officer since George Washington to wear three stars, but it does not become part of the army's ranking system.

March 3

MILITARY: Secretary of War Jefferson Davis suggests that Congress appropriate money for the importation of 333 camels as an experiment in traversing the deserts of the Old Southwest; total cost for the effort is \$30,000. The U.S. Army Camel Corps will test the animals extensively along the western frontier, with some success.

- Congress, wary of increasing security commitments along the western frontier, votes to enlarge the military establishment by adding two infantry (9th and 10th) and two mounted (1st and 2nd Cavalry) regiments. The latter are the first military units to carry the designation "cavalry" in their official title.

March 26

MILITARY: At Fortress Monroe, Virginia, Colonel George Wright organizes the newly instituted 9th Infantry. The new formation is to be deployed to the Pacific Coast to build roads, construct forts, and fight hostile Indians.

- The new 2nd Cavalry is organized at Jefferson Barracks, Missouri, under Colonel Albert Sidney Johnston and Lieutenant Colonel Robert E. Lee. The new officer cadre is so dominated by Southerners that it becomes popularly regarded as "Jeff Davis's Own"—a reference to Secretary of War Jefferson Davis of Mississippi.

April

MILITARY: Captain George B. McClellan is among several young officers returning from detached service to observe the Crimean War and other military developments in Europe.

April 28

INDIANS: Several companies of the 1st Dragoons and volunteers surprise Ute warriors as they dance around a blazing bonfire. The soldiers manage to drop around 40 Indians while the rest flee into the night; the Ute sue for peace shortly thereafter.

May 4

MILITARY: Lieutenant Colonel Dixon S. Miles, 3rd Infantry, begins work on Fort Stanton along the Rio Bonita River, New Mexico Territory.

May 19

MARINES: The sloop *Vincennes* under Captain William J. McCluney dispatches marines ashore at Shanghai, China, during a period of unrest.

May 28

MILITARY: The new 1st Cavalry is formed at Louisville, Kentucky, under Colonel Edwin V. Sumner; among his cadre are future Civil War notables Joseph E. Johnston, John Sedgwick, George B. McClellan, and J. E. B. Stuart.

June 7

MILITARY: A detachment of the 6th Infantry under Major Albermarle Cady begins work on Fort Pierre on the Missouri River, South Dakota.

July 24

NAVAL: The exploring party of naval surgeon Dr. Elisha Kent Kane, having been trapped in Arctic ice for nearly two years, finally escapes on foot and completes an 83-day sledge journey to Upernavik, Greenland.

July 29

INDIAN: At Solomon Fork, Kansas Territory, Colonel Edwin V. Sumner leads elements of the 1st Cavalry and 2nd Dragoons against 300 Cheyenne warriors. Because the warriors are known to have washed themselves in magic water to protect themselves against the white man's bullets, Sumner orders his men to charge sabers, routing his opponents.

August 4

MARINES: The *Powhatan's* marine detachment is joined by British forces in a punitive action against pirates at Ty-Ho Bay, Hong Kong, China. Lieutenant Robert Pegram leads a boat expedition of 100 sailors and marines inland, which accounts for 17 pirate junks burned. The Americans suffer five dead and eight wounded.

August 15

MILITARY: The venerable felt shako worn as headgear by soldiers for nearly 50 years is ordered replaced by a stiff felt hat with the right side distinctly folded up.

August 20

MILITARY: Soldiers of the 1st Infantry under Captain Stephen D. Carpenter construct Fort Lancaster along the Pecos River, Texas, to protect commerce along the San Antonio–El Paso road.

August 24

MILITARY: At Fort Kearny, Nebraska, a punitive expedition consisting of 600 soldiers drawn from the 2nd Dragoons, the 6th Infantry, the 10th Infantry, and the 4th Artillery marches under Colonel William S. Harney. His mission is to avenge the Grattan massacre of the previous year.

August 28

MARINES: A landing detachment from the sloop *Germantown* under Commander William F. Lynch lands at Montevideo, Uruguay, to protect American lives and property during an upheaval there.

September 3

INDIAN: Army troops under Colonel William S. Harney expertly attack the village of Chief Little Thunder along Blue Water Creek (Ash Hollow), Nebraska. In the ensuing firefight 86 Sioux are killed and 70 taken prisoner. Harney's losses are four dead and seven wounded; he subsequently warns the Indians that there will be further attacks in retaliation for any depredations against soldiers or settlers.

September 8

MILITARY: As a precaution against further attacks, Colonel William S. Harney constructs a small earthwork that he christens "Fort Grattan" for the benefit of settlers moving between Forts Kearny and Laramie.

September 22

MARINES: The sloop *John Adams* under Commander E. B. Boutwell sends its marines ashore on Viti Levu Island, Fiji, to halt depredations against American shipping and launch punitive measures against hostile villages. The local monarch is forced to sign an agreement outlawing future attacks and is then released.

September 30

MILITARY: A detachment of the 4th Infantry under Captain Granville O. Haller begins construction of Fort Cascades on the Columbia River, Washington Territory, to protect travelers moving along that waterway.

October 13

MILITARY: At Carlisle Barracks, Pennsylvania, Colonel Edward B. Alexander marches his newly organized 10th Infantry to their deployments along the western frontier.

October 16

MILITARY: At Fort Lane, Oregon Territory, Captain Andrew J. Smith seeks to use his post for the protection of local Indians that are being menaced by angry settlers.

October 28–31

NAVAL: Commander E. B. Boutwell and the sloop *John Adams* return to Viti Levu, Fiji Islands, to find that provisions of the recent treaty signed by the king have not been honored. Lieutenant Louis C. Sartori brings a landing party ashore that burns several villages; he loses one man killed and three wounded.

October 31

INDIAN: Captain Andrew J. Smith, commanding 250 men drawn from the 1st Dragoons, 4th Infantry, and 3rd Artillery, engages in a day-long battle with hostile Indians along Hungry Hill near Fort Lane, Oregon Territory. The engagement ends in a stalemate and both sides withdraw.

November 9

MILITARY: U.S. Army troops arrive at Tacoma, Washington Territory, and arrest many of those involved in anti-Chinese violence.

November 27

MARINES: A landing party from the *Germantown* goes ashore at Montevideo, Uruguay, to protect the American consulate during revolutionary violence.

December 15

INDIANS: Billy Bowlegs, a notable Seminole leader, has his crops vandalized by white settlers at his home in Great Cypress Swamp, Florida; he decides to initiate hostilities against whites.

December 29

MILITARY: Resentful Seminole under Chief Billy Bowlegs attack the army patrol of Lieutenant George Hartstuff at Big Cypress Swamp, Florida, killing several soldiers and precipitating the Third Seminole War.

1856**January 2**

MILITARY: The 2nd Cavalry under Major William J. Hardee founds Camp Cooper, Texas, on the Clear Fork of the Brazos River. It is designed to protect travelers on the El Paso–Red River Trail from marauding Comanche.

January 26

MARINES: A landing party from the sloop *Decatur* under Commander Guert Gansevoort lands at Seattle, Washington Territory, to protect American settlers from Indian attack. Accompanied by a howitzer, they drive off hostile natives in a lengthy night battle.

February 3

NAVAL: After a three-year hiatus on the Plate River, South America, the paddle-wheel steamer *Water Witch* returns to New York under Lieutenant Thomas J. Paige.

February 22

INDIAN: In the Oregon Territory, Yakima Indians kill members of the Geisel family and hold several others hostage.

March 26–28

INDIAN: When warriors from the Yakima, Klikitat, and Chinook tribes attack Fort Cascades, Washington Territory, Lieutenant Philip H. Sheridan takes 40 men by steamboat to the scene, where he is joined by Colonel George Wright and 250 men of the 9th Infantry. Together they drive the besieging Indians away from the blockhouse.

April 29

MILITARY: The first shipment of camels arrives in Texas as part of a U.S. Army experiment to evaluate them as pack animals for desert travel.

May 26–28

INDIAN: Hostile Indians attack a party of the 1st Dragoons under Captain Andrew J. Smith at Big Meadows, Oregon Territory. Smith, who is there to parley with the chief, suspects trouble, so he deploys a small howitzer and awaits developments. When the Indians under Chief Old John do attack, the soldiers resist them for three days until Captain Christopher C. Augur and his company of the 4th Infantry strikes the Indians from behind, scattering them.

June 26

MILITARY: Men of the 2nd Infantry under Lieutenant George H. Paige build Fort Randall on the Missouri River at the boundary of Nebraska and South Dakota.

It is designed to ensure peace among the nearby Sioux and Ponca tribes, as well as ensure the safety of settlers.

June 27

INDIAN: A large party of Coyotera Apache are surprised at Gila River, Arizona Territory, by a company of the 1st Dragoons under Lieutenant Richard E. Ewell; the Indians suffer 40 dead and 45 captured to a loss of nine Americans wounded.

July 4

MILITARY: U.S. Army troops, dispatched from Fort Leavenworth, force the “Free State Legislature” in Topeka to disband.

July 8

TECHNOLOGY: In Washington, D.C., the Patent Office issues Charles E. Barnes a patent for his “improved automatic cannon,” which is actually an early, hand-cranked machine gun. The army will express little interest.

July 26

MILITARY: Captain Christopher C. Augur, 4th Infantry, establishes Fort Hoskins on the Luckiamute River, Oregon Territory, to monitor the nearby Grand Ronde Reservation.

July 28

MILITARY: Men of the 3rd Artillery under Captain Joseph Stewart construct Fort Umpqua on the Umpqua River, Oregon Territory, to help ensure peace on the Grand Ronde Reservation.

July 31

MILITARY: Soldiers of the 2nd Infantry under Captain Nathaniel Lyon begin work on Fort Lookout on the Missouri River, South Dakota. It is located near a Columbia Fur Trading Company to deter local Indians from attacking.

August 8

MILITARY: Major Robert S. Garnett, 9th Infantry, constructs Fort Simcoe in the Simcoe Valley, Washington Territory, to protect local settlers moving into the region.

August 26

MILITARY: Men of the 9th Infantry under Captain George E. Pickett establish Fort Bellingham in the town of Bellingham, Washington Territory, for the protection of its inhabitants.

August 30

MILITARY: A band of 300 pro-slavery militia attack John Brown’s abolitionists in the town of Osawatomie, Kansas, and are repulsed.

- Men of the 4th Infantry under Lieutenant William B. Hazen erect Fort Yamhill on the Yamhill River, Oregon Territory. It is one of three forts built to control activities on the Grand Ronde Reservation.

September 15

MILITARY: Newly appointed Kansas territorial governor John W. Geary calls upon U.S. Army troops to prevent 2,500 “border ruffians” from Missouri from invading the territory.

September 20

MARINES: The *St. Mary's* and *Independence* land seamen and marines ashore on the Panama Isthmus to guard a railroad station at Panama City and protect American lives.

September 23

MILITARY: Major Edward E. Steptoe, 9th Infantry, constructs Fort Walla Walla in Washington Territory to protect local settlers and monitor Indian activities.

October 22–November 12

MARINES: Violence stemming from the Taiping Rebellion forces the *Portsmouth* to send sailors and marines ashore at Canton, China, to protect American lives. The extent of the fighting will induce the *Levant* and *San Jacinto* to do likewise over the next three weeks.

October 26

MILITARY: Men of the 4th Infantry under Captain Granville O. Haller erect Fort Townsend on Port Townsend Bay, Washington Territory, to protect local settlers.

November 16

MARINES: As the *Portsmouth* begins removing its landing detachment from Canton, China, one of the barrier forts opens fire with cannon, wounding a marine. The *Portsmouth* retaliates with several broadsides.

November 20–22

MARINES: In Canton, China, a force of 287 sailors and marines under Commander Andrew H. Foote attacks and captures the barrier forts, planting the American flag. All four stone forts are then destroyed, along with their cannon, at a cost of 42 killed and wounded. Chinese casualties are 400 dead and injured, plus 176 cannon destroyed.

November 27

MILITARY: Major Enoch Steen occupies a former Mexican post at Presidio Calabas, Arizona Territory, with four companies of his 1st Dragoons. The Americans acquired the post with the addition of new territory by the Gadsden Purchase.

1857**February 21**

MILITARY: Congress votes to increase army officer pay by \$20.00 per month.

March 1

NAVAL: In Washington, D.C., Isaac Toucey is sworn in as the 23rd secretary of the navy.

March 4–April 23

INDIAN: Several companies of the 5th Infantry corner a large body of Seminole under Chief Billy Bowlegs at Big Cypress Swamp, Florida, ending the short-lived Third Seminole War. Those apprehended will be deported to new homes in the Indian Territory (Oklahoma).

March 6

MILITARY: In Washington, D.C., former Virginia governor John B. Floyd is appointed the new secretary of war by President James Buchanan. He is the last such official of the antebellum period.

March 7

MILITARY: Major Enoch Steen, 1st Dragoons, founds Fort Buchanan in southern Arizona to protect travelers and repel Apache raids in the region.

May 27–28

INDIAN: Captain Andrew J. Smith's force of 30 infantry and 50 dragoons is attacked at Big Meadows, Oregon Territory, by Takelma and Tututni Indians. The warriors are routed on the second day when reinforcements arrive.

May 28

MILITARY: Colonel Albert S. Johnston commands eight companies of his 2nd Dragoons and several detachments from the 5th and 10th Infantries, assembling at Fort Leavenworth, Kansas Territory, for the purpose of launching an expedition into Utah to suppress unlawful behavior by the Mormons established there.

June 1

MARINES: In Washington, D.C., a company of marines under Commandant Archibald Henderson is called to help restore order after thugs from Baltimore ("Plug-Uglies") riot during elections in the capital. Henderson personally confronts a mob threatening him with a small cannon.

June 11

MILITARY: Men of the 3rd Artillery under Lieutenant Horatio G. Gibson begin work on Fort Bragg inside the Mendocino Indian Reservation, California.

July 17

MILITARY: Camels imported to Texas for the U.S. Army are ridden overland from Fort Davis, Texas, to California as a test of their viability as pack animals. Soldiers of the U.S. Camel Corps are singularly unimpressed, finding them smelly and ill-tempered.

August 28

MILITARY: Soldiers of the 2nd Infantry under Lieutenant Colonel John Abercrombie found Fort Abercrombie at the confluence of the Bois de Sioux and Otter Tail Rivers. This is also the first U.S. Army base in North Dakota; it will safeguard wagon trains and steamboats along the Red River.

September 15

NAVAL: Captain George S. Blake is appointed the fifth superintendent of the U.S. Naval Academy.

October 2

NAVAL: The venerable 74-gun ship of the line *Independence* becomes a receiving ship at Mare Island Navy Yard, California, where it will serve for the next 55 years.

October 4

MILITARY: In Utah, Mormons of the Nauvoo Legion attack a U.S. Army supply train, inflicting no losses but burning several wagons.

October 5

MILITARY: In a major test of civic action, the U.S. Army is called upon to ensure free and safe elections throughout Kansas. This act allows an antislavery legislature to gain power.

October 12

MILITARY: A detachment of the 4th Infantry under Lieutenant George Crook builds Fort Ter-waw on the Klamath River, California. The name, “beautiful place,” derives from the Yurok Indian language.

November 24

MILITARY: Colonel Albert S. Johnston, en route to Utah against the Mormons, dispatches Captain Randolph B. Marcy and a detachment to get supplies from Fort Massachusetts, New Mexico, more than 700 miles distant. This is because the Mormons have raided and burned several army supply trains, leaving Johnston’s force nearly famished.

1858**January 2**

MARINES: A landing party from the frigate *St. Lawrence* goes ashore at Montevideo, Uruguay, and assists British forces during a period of civil disorder there.

January 9

MILITARY: Soldiers commanded by Lieutenant Joseph Christmas begin exploring down the Colorado River and will go through the Grand Canyon until they reach Black Creek. They will become the first recorded party to explore the region.

January 13

MILITARY: The detachment under Captain Randolph B. Marcy has trudged through deep snow and freezing weather to reach Fort Massachusetts, New Mexico Territory; only one man has been lost. Marcy quickly gathers up as many supplies as possible and, escorted by a detachment of the Mounted Riflemen, sets out to join the main expedition in Utah.

March 27

INDIAN: The Third Seminole War formally concludes when Chief Billy Bowlegs visits Washington, D.C., and signs a peace treaty authorizing the removal of his band from Florida to Oklahoma.

May 8

INDIAN: The U.S. government declares its conflict with the Seminole Indians of Florida finally over.

May 11

INDIAN: A force of 100 Texas Rangers under Rip Ford surprises and attacks a hostile Comanche village in Oklahoma, routing the defenders and killing several braves along with Chief Iron Jacket.

May 15–18

INDIAN: In Washington Territory, a large force of Yakima Indians ambushes a small column commanded by Lieutenant Colonel Edward J. Steptoe, 9th Infantry, killing two officers.

May 17

INDIAN: U.S. soldiers are defeated in an engagement with Nez Perce Indians at Rosalia, Washington Territory.

June 18

MILITARY: Congress confers the local rank and pay of colonel on the superintendent of the U.S. Military Academy, West Point, while the commandant of cadets is elevated to lieutenant colonel.

June 24

MILITARY: Fort Garland is established by Captain Andrew W. Bowman in the San Luis Valley, Colorado, to monitor and check any depredations by Ute and Jicarilla Apache.

June 26

MILITARY: A column of 5,500 U.S. Army troops under no-nonsense colonel Albert S. Johnston occupies Salt Lake City, Utah, finding it largely deserted by the Mormons. The large military presence makes negotiations between church leaders and the government possible, and the so-called Mormon War comes to an end.

July 29

NAVAL: The American steam frigate *Niagara* under Captain William L. Hudson, assisted by the British vessel *HMS Agamemnon*, successfully lays down the first transatlantic cable. The cable will fail a month later but prompt a second attempt in 1866.

August 11

MILITARY: Men of the 9th Infantry under Colonel George Wright construct Fort Taylor on the Snake River, Washington Territory. This post will become a base of operations against hostile Spokane and Palouse Indians.

September 1

INDIAN: On the Yakima Plain of Washington Territory, Colonel George Wright and 600 infantry, artillerymen, and cavalry engage a large force of northwestern tribesmen at Four Lakes, routing them with a single mounted charge. The Indians leave behind 60 slain warriors; the Americans incur no losses.

September 2

MARINES: On Staten Island, New York, a mob threatens to burn down buildings quarantining yellow fever victims but is thwarted by 65 marines deployed from the Brooklyn Navy Yard.

September 8–24

INDIAN: At Fort Defiance, Arizona Territory, Lieutenant Colonel Dixon S. Miles leads a punitive expedition against Navajo tribesmen responsible for the death of an African-American servant. Several weeks of campaigning in Canyon de Chelly are inconclusive, and the Americans return.

MARINES: A detachment from the sloop *Marion* captures a slave vessel off the African coast.

September 15–24

MILITARY: A punitive expedition commanded by Captain Earl Van Dorn, 2nd Cavalry, departs Fort Belknap, Indian Territory (Oklahoma), to search out

renegade Comanche and Kiowa tribesmen. Riding with Van Dorn are 125 volunteers from the nearby Brazos Reservation.

September 24

INDIAN: In the Oregon Territory, the Yakima War ends with a treaty signed between Colonel George Wright and several tribal representatives.

September 28

MILITARY: Soldiers of the 8th Infantry erect Fort Quitman on the Rio Grande, Texas, to protect the stage line running along the river.

October 1

INDIAN: The 2nd Cavalry under Captain Earl Van Dorn engages and defeats Comanche warriors under Buffalo Hump at Rush Springs, Indian Territory (Oklahoma). The Americans kill 56 warriors while losing five of their own; Van Dorn is the only trooper wounded.

October 6

MARINES: On Waya Island, the Fijis, sailors and marines from the *Vandalia* defeat a force of hostile natives thought responsible for the murder of two Americans. The natives' village is burned.

October 17

NAVAL: Flag Officer William B. Shubrick, commanding the Brazilian Squadron, leads a 19-vessel convoy against Paraguay in retaliation for that government's firing upon the survey vessel *Water Witch* on February 1, 1855. This is the largest collection of American warships assembled to date, and Shubrick is under orders to extract an indemnity to compensate for the attack.

December 4

MILITARY: A detachment of the 4th Infantry under Captain Edmund Underwood begins construction of Fort Gaston on the Trinity River, California. Its purpose is to monitor Indians on the Hoopa Valley Reservation and protect them from settlers.

1859

January 6

MARINES: Brevet Brigadier General Archibald Henderson dies at the age of 76; he had served as the fifth commandant for nearly 40 years.

January 7

MARINES: Colonel John Harris gains appointment as the sixth commandant, U.S. Marine Corps.

January 25

NAVAL: The 19-ship armada of Flag Officer William B. Shubrick assembles off La Plata, Paraguay, and successfully secures an indemnity for that nation's attack on the paddle-steamer *Water Witch* on February 1, 1855. A new commercial treaty is also concluded.

March 23

MILITARY: Lieutenant Walter Jones, 1st Infantry, constructs Fort Stockton on Comanche Creek, Texas, to safeguard travelers on the San Antonio–El Paso stage route.

April 19

MARCH: Fort Mojave is built on the Colorado River, Arizona Territory, by Major William Hoffman, to check depredations by Mojave and Paiute Indians residing nearby.

April 21–27

MARINES: The detachment on board the *Marion*, Commander F. W. Blunt, captures two slave ships off the Congo River, West Africa; this is the first of five slavers that will be netted this year.

April 30

MILITARY: The 2nd Cavalry under Captain Earl Van Dorn begins combing the Indian Territory (Oklahoma) for a band of Comanche who have been raiding settlements. A small Indian boy is snared by a patrol, brought in, and forced to reveal the location of his camp.

May 13

INDIAN: Captain Earl Van Dorn leads the 2nd Cavalry against a Comanche encampment at Crooked Creek, Indian Territory (Oklahoma). The Americans surprise their adversaries in camp, killing 49 and scattering the rest. The Americans and their Indian allies lose six dead and nine wounded; Lieutenant Fitzhugh Lee is shot through the chest with an arrow but survives his wound.

June 15

MILITARY: A body of the 9th Infantry under Captain Pinkney Lugenbeel constructs Fort Colville on Mill Creek, Washington Territory. It will be used principally as a base for boundary commissions surveying the U.S.-Canadian border.

June 25

NAVAL: Commodore Josiah Tattnall of the East India Squadron, declaring that “Blood is thicker than water,” assists British gunboats attacking the Chinese Taku forts by towing reinforcements to the scene in the chartered steamer *Toey-Wan*. Tattnall loses one man killed and an officer wounded; the State Department subsequently approves of his actions.

July 27

MILITARY: A company of the 9th Infantry under Captain George E. Pickett unilaterally occupies San Juan Island in Puget Sound, Washington Territory, whose ownership is disputed. When a British warship anchors nearby and orders Pickett off the island he refuses to budge, vowing to fight.

July 31

MARINES: Violence associated with the Taiping rebellion will force marines from the side-wheel steamer *Mississippi* under Captain William C. Nicholson to go ashore at Shanghai, China, over the next three days.

August

MILITARY: The standoff between the United States and Great Britain over the ownership of San Juan Island, Washington Territory, intensifies as several companies from the 4th and 9th Infantries and the 3rd Artillery arrive to reinforce Captain George E. Pickett’s solitary company.

Engraving of the Harpers Ferry (as it was then known) insurrection, depicting the U.S. Marines storming the engine house while John Brown and his followers fire through holes in the doors (*Library of Congress*)

October 1

MILITARY: Men of the 1st Cavalry under Major William H. Emory establish Fort Cobb, Indian Territory (Oklahoma), to protect the nearby Wichita Indian Agency.

October 16–18

MARINES: A company of marines under Lieutenant Israel Greene is dispatched from Washington, D.C., to help put down an insurrection at Harpers Ferry, Virginia, launched by abolitionist John Brown. Brown has seized the U.S. arsenal there in the hope of sparking a slave uprising. The marines are subsequently commanded by Colonel Robert E. Lee, U.S. Army, who happens to be home on leave in nearby Virginia. In the brief fight that follows, one marine is killed and one wounded. Brown and his followers are all apprehended and 10 of Brown's men are killed.

October 20–November 10

MILITARY: Lieutenant General Winfield Scott arrives at San Juan Island, Washington Territory, to settle an ongoing confrontation with Great Britain. Until a final, negotiated settlement can be reached, the Americans will occupy the southern half of the island while Royal Marines will garrison the northern half.

1860

March 1–4

MARINES: A landing detachment from the sloop *Marion* goes ashore at Kissembó, Portuguese West Africa (Angola), to protect American lives and property during a period of unrest.

March 6

TECHNOLOGY: In Washington, D.C., the Patent Office issues Christopher M. Spencer a patent for his highly functional repeating rifle. Throughout the Civil War, an estimated 200,000 Spencer carbines are manufactured and issued, signaling the decline of muzzle-loading ordnance.

April 30

INDIAN: At Fort Defiance, Arizona Territory, three companies of the 3rd Infantry are suddenly attacked by more than 1,000 Navajo in a major uprising; the Indians are eventually driven off.

May 3–September

MILITARY: At St. Louis, Missouri, 300 men of the 1st Dragoons under Major H. A. Blake canter off to explore for a possible wagon road between Fort Benton, Indian Territory (Oklahoma), and Walla Walla, Washington Territory.

May 14

MARINES: Detachments from the Washington Navy Yard turn out in full ceremonial uniform to welcome the first Japanese ambassador to the capital.

June 21

MILITARY: In Washington, D.C., Major Albert J. Myer is named the army's first signal officer. Previously, he had been responsible for helping to perfect communication through flag signaling (wigwag). The U.S. Army is the first military establishment in the world to create an independent Signal Corps.

August 6

MILITARY: American filibusters under William Walker attack and seize Trujillo, Honduras, storming a customhouse whose revenues are the property of the British government. Walker is soon after compelled to surrender to a British warship and is taken captive.

September–November

INDIAN: A punitive expedition consisting of 600 soldiers from the 5th, 7th, 8th, and 10th Infantries, the 2nd Dragoons, and the Mounted Riflemen, all under Major Edward R. S. Canby, departs Fort Defiance, Arizona Territory. Over the next two months a few skirmishes will be fought with the elusive Navajo, although more than 1,000 horses and 3,000 sheep are confiscated by the soldiers. Such losses will prompt tribal elders to sue for peace.

September 25

NAVAL: The sloop of war *Levant* under Commander William E. Hunt, sailing to Aspinwall, Colombia, from Hilo, Hawaii, disappears at sea with all hands.

September 27

MARINES: Landing parties from the *St. Mary's* disembark at the Bay of Panama, Colombia, to protect American lives and property during revolutionary unrest.

October 10

NAVAL: The slaver *Bonito*, carrying 622 African captives, is apprehended in the South Atlantic by the screw steamer *San Jacinto*. Over the past 19 months, navy vessels have apprehended 18 such vessels.

November 1

NAVAL: Reaffirming its commitment to modernization, the Navy Department releases plans to convert seven sailing ships to steam power at a cost of \$3 million.

November 6

POLITICS: Abraham Lincoln is elected the next president of the United States, an event that sets in motion a chain of events that will lead to the tragic Civil War, 1861–65.

November 9

MILITARY: Partisans in Charleston, South Carolina, attempt to seize federal arms stored at Fort Moultrie.

November 13

MILITARY: The South Carolina legislature passes measures calling for 10,000 volunteers to muster for the defense of the state.

November 15

MILITARY: Major Robert Anderson, U.S. Army, himself a slave-owning Southerner, is ordered to take command of the federal garrison at Fort Moultrie in Charleston Harbor, South Carolina.

NAVAL: Lieutenant Thomas A. Craven, commanding the naval installation at Key West, Florida, orders landing parties to secure nearby Forts Taylor and Jefferson against possible seizure by “bands of lawless men.”

November 18

MILITARY: The Georgia legislature votes to spend \$1 million for the defense of the state.

November 23

MILITARY: Major Robert Anderson reports on the defensive weaknesses of Fort Moultrie, Charleston Harbor, and suggests transferring his garrison to nearby Fort Sumter, on an offshore island.

December 11

MILITARY: Major Don Carlos Buell arrives at Fort Moultrie, Charleston Harbor, with instructions from the War Department for Major Robert Anderson. Apparently, Secretary of War John B. Floyd, a Virginian, has refused to dispatch reinforcements there to avoid provoking a confrontation.

December 12

MILITARY: President James Buchanan refuses to reinforce the garrison at Fort Sumter, Charleston Harbor, prompting Secretary of State Lewis Cass to resign from office.

- Lieutenant General Winfield Scott transfers his headquarters back to Washington, D.C. Scott had functioned at New York City since 1841, owing to disputes with a number of secretaries of war.

December 26

MILITARY: Major Robert Anderson, commanding the Union garrison at Fort Moultrie, South Carolina, remains cognizant of the dangers facing his command. Hence, under the cover of darkness and upon his own initiative, he surreptitiously transfers his soldiers from the mainland to the more defensible post of Fort Sumter in Charleston Harbor.

December 27

MILITARY: South Carolina State forces occupy Fort Moultrie and Castle Pinckney in Charleston Harbor. This constitutes the first act of overt military aggression against the U.S. government.

NAVAL: South Carolina forces seize the revenue cutter *William Aiken* in Charleston Harbor.

December 29

MILITARY: Angered by President James Buchanan's refusal to order the garrison of Fort Sumter, South Carolina, back to the mainland, Secretary of War John B. Floyd resigns in protest. Floyd himself is under growing suspicion for having deliberately ordered the transfer of arms from Northern to Southern arsenals.

December 30

MILITARY: The U.S. arsenal at Charleston, South Carolina, is seized by state forces. They occupy all remaining federal property in the city save for Fort Sumter in the harbor.

December 31

MILITARY: The eve of civil war finds the U.S. Army's 16,000 personnel completely dispersed: of 197 companies, only 18 artillery companies are deployed east of the Mississippi River. The vast bulk of regiments are scattered in small fortifications throughout the western frontier.

1861**January 2**

MILITARY: The defense of Washington, D.C., is entrusted to Colonel Charles P. Stone, who begins organizing the District of Columbia militia.

January 3

MILITARY: Fort Pulaski, near the mouth of the Savannah River, is peacefully occupied by Georgia State forces upon the orders of Governor Joseph E. Brown.

January 4

MILITARY: The U.S. arsenal at Mount Vernon, about 30 miles north of Mobile, is peacefully occupied by Alabama State forces under orders from Governor Andrew B. Moore.

January 5

MILITARY: Alabama State forces seize Forts Morgan and Gaines, guarding the entrance to Mobile Bay.

NAVAL: The supply vessel *Star of the West* departs New York for Fort Sumter, South Carolina, carrying food supplies and soldiers as reinforcements. The

warship *Brooklyn*, originally intended for the mission, is detained by General Winfield Scott, who feels that the civilian vessel will appear less provocative.

MARINES: A force of 250 marines boards the *Star of the West* but is ordered not to land at Fort Sumter. Another detachment of 40 marines is detailed to garrison Fort Washington, Maryland, against possible attack.

January 6

MILITARY: Florida State forces seize the U.S. arsenal at Apalachicola.

January 7

MILITARY: Hostile preparations continue across the South as South Carolina begins recruiting two regular infantry regiments while Florida State forces seize Fort Marion (St. Augustine), Florida.

January 9

MILITARY: Artillery manned by South Carolina State forces, including cadets from the nearby Citadel Military School, fire upon the transport *Star of the West* as it approaches Charleston harbor. No damage is inflicted, and the vessel retires back to New York unscathed. Technically speaking, these are the first hostile shots of the Civil War, and Major Robert Anderson, commanding Fort Sumter's garrison, protests the action to Governor Francis W. Pickens. But Anderson also orders his men to stand down and makes no attempt to interfere.

MARINES: Fort McHenry in Baltimore harbor, Maryland, receives a detachment of 30 marines from the Washington Navy Yard.

January 10

MILITARY: Federal troops under Lieutenant Adam J. Slemmer, 1st Artillery, garrisoning Fort Barrancas at Pensacola, Florida, spike their cannon and retire offshore to Fort Pickens, on nearby Santa Rosa Island. Local forces soon confiscate the navy yard, but Fort Pickens will remain in Union hands for the duration of hostilities.

- The U.S. arsenal and barracks at Baton Rouge, Louisiana, are confiscated by state forces under Braxton Bragg per orders of Governor Thomas O. Moore.

MARINES: A body of armed Floridians captures the Pensacola Navy Yard, taking 38 marines as prisoners.

January 11

MILITARY: South Carolina governor Francis W. Pickens demands the surrender of Fort Sumter, Charleston harbor; Major Robert Anderson curtly yet politely declines.

- In Louisiana, state forces take control of the U.S. Marine Hospital at New Orleans. However, the U.S. arsenal at Baton Rouge, defended by Major Joseph A. Haskins and two companies of artillery, does not capitulate until it is surrounded by 600 militiamen.

January 12

MILITARY: Florida State forces formally occupy Fort Barrancas, Fort McRee, and the Pensacola Navy Yard, but fail to cow the garrison of nearby Fort Pickens to surrender.

January 13

MILITARY: An unofficial truce emerges between South Carolina authorities and the garrison at Fort Sumter, Charleston Harbor.

January 14

MILITARY: The South Carolina Legislature passes a motion that any attempt to reinforce the garrison at Fort Sumter will be tantamount to an act of war.

- At Key West, Florida, a small body of U.S. Army troops preemptively garrisons Fort Taylor to forestall its capture; in time, it will serve as an important coaling station.

January 15

MILITARY: Major Robert Anderson receives a second summons to surrender Fort Sumter, Charleston Harbor; again he politely refuses.

January 18

MILITARY: In Washington, D.C., Joseph Holt becomes the 25th secretary of war at the behest of President James Buchanan.

- South Carolina officials make their third demand for the surrender of Major Robert Anderson and Fort Sumter in Charleston Harbor, which is again respectfully declined.
- At Dry Tortugas, Florida, a small body of U.S. Army troops hastily occupies Fort Jefferson, which will be used to house political prisoners throughout the Civil War.

January 23

NAVAL: Commander John A. B. Dahlgren removes cannon and ammunition from the Washington Navy Yard in the event of a possible attack, storing much of the latter in the attic of a building nearby.

January 24

MILITARY: In Augusta, Georgia, state forces outnumber and surround a company of U.S. Army troops that refuses to surrender; the company salutes the flag, evacuates the fort, and is allowed to depart.

January 26

MILITARY: In Savannah, Georgia, state forces occupy the Oglethorpe Barracks and Fort Jackson.

January 29

NAVAL: Captain William S. Walker, commanding the screw sloop *Brooklyn*, arrives off Pensacola, Florida, but remains under orders not to land reinforcements to help the garrison of Fort Pickens unless it is attacked by Confederate forces.

- In New Orleans, Louisiana, state forces seize the revenue cutter *Robert McClelland*.

January 31

MILITARY: Louisiana officials orchestrate the seizure of the U.S. Branch Mint and Custom House at New Orleans, along with the revenue cutter *Washington*.

February

MILITARY: The forceful captain Nathaniel Lyon marches his company of the 2nd Infantry from Jefferson Barracks to St. Louis, Missouri, and secures the U.S. arsenal located there.

February 4–8

POLITICS: The Confederate States of America (C.S.A.) is organized at Montgomery, Alabama, confirming the drift toward civil war in the United States.

February 4–14

INDIAN: At Apache Pass, Arizona Territory, Lieutenant George N. Bascom calls Chiricahua chief Cochise to task for the recent kidnapping of a rancher's son. The chief denies any knowledge and offers to help find those responsible, but Bascom attempts seizing him and Cochise escapes. Hostages are then taken and executed by both sides, which marks the beginning of a major Apache uprising.

February 7

INDIAN: In the Indian Territory (Oklahoma), leaders of the Choctaw Nation vote to align themselves with the Confederacy.

February 8

MILITARY: In Little Rock, Arkansas, state forces capture the U.S. arsenal there.

February 9

MILITARY: Former army officer and secretary of war Jefferson Davis of Mississippi is elected president of the Confederate States of America; the appointment completely surprises Davis, who was expecting a commission to lead state forces.

February 13

INDIAN: A detachment of the 7th Infantry under Lieutenant George N. Bascom is trapped at Apache Pass, Arizona Territory, until rescued by units under Colonel Bernard J. D. Irwin; 30 years later Irwin will receive a Medal of Honor for valor under fire.

MILITARY: In Washington, D.C., army troops are called in to disperse pro-Southern mobs attempting to disrupt the counting of the electoral ballots that officially render Abraham Lincoln president.

February 15

NAVAL: Commodore Raphael Semmes, a Southern-born naval officer, resigns his commission from the U.S. Navy. He will gain infamy as captain of the Confederate raider *Alabama*.

February 18

MILITARY: In an act widely condemned as treasonous, General David E. Twiggs surrenders all U.S. Army installations in the Department of Texas.

February 20

NAVAL: The Provisional Confederate Congress passes legislation creating a Confederate Department of the Navy.

February 21

NAVAL: Stephen R. Mallory, the former U.S. senator from Florida and prior chairman of the House Naval Affairs Committee, is chosen as the Confederate secretary of the navy.

February 27

NAVAL: Congress authorizes the Navy Department's request for seven heavily armed steam sloops to augment the existing naval strength of 47 vessels of all kinds.

March 1

MILITARY: In Charleston, South Carolina, Pierre G. T. Beauregard is commissioned brigadier general, C.S.A. The central Confederate government also takes charge of events in the immediate vicinity and begins weighing its options against Fort Sumter.

- Major Robert Anderson alerts the government that the garrison at Fort Sumter, Charleston Harbor, must be either supplied and reinforced or evacuated without further delay. His provisions dwindle rapidly and he will soon have to capitulate by default.

March 2

NAVAL: At Galveston, Texas, state forces seize the revenue cutter *Henry Dodge*.

March 3

MILITARY: President Jefferson Davis appoints General Pierre G. T. Beauregard as commander of Confederate forces in the vicinity of Charleston, South Carolina. He is instructed to prepare for military action against the federal garrison sequestered at Fort Sumter in the harbor.

March 4

MILITARY: In Washington, D.C., Abraham Lincoln is sworn in as the 16th president and commander in chief. His experience in military affairs is limited to several weeks of militia service during the Black Hawk War of 1832.

NAVAL: The Navy Department, which currently operates 42 warships, recalls all but three from foreign stations to assist in the impending crisis.

March 5

MILITARY: President Abraham Lincoln discusses the plight of Major Robert Anderson at Fort Sumter, South Carolina. The major telegraphs him that his supplies are due to run out within four to six weeks, after which he will have little recourse but to surrender. Furthermore, both Anderson and General Winfield Scott concur that the post cannot be successfully held by fewer than 20,000 troops. Time is running out for a peaceful resolution, but Lincoln continues nuancing the delicate situation.

- In Washington, D.C., Simon Cameron gains appointment as the 26th secretary of war.

March 7

MILITARY: Adjutant General Samuel Cooper resigns his commission from the U.S. Army and gains appointment as Confederate adjutant general. He is the highest-ranking member of the Confederate army for the duration of the Civil War.

NAVAL: Gideon Welles, a former Connecticut newspaper editor, is sworn in as the 24th secretary of the navy.

March 13

MILITARY: Captain Nathaniel Lyon, a pugnacious, aggressive officer by nature, is appointed commander of the U.S. arsenal at St. Louis, Missouri.

March 16

NAVAL: The Confederate Congress authorizes creation of the Confederate States Marine Corps, with a strength of 46 officers and 944 men; only half that number is actually recruited.

March 20

NAVAL: Consistent with orders issued by General Braxton Bragg, Confederate forces seize the sloop *Isabella* after it attempts to deliver supplies to the Union garrison at Fort Pickens, offshore from Pensacola, Florida.

March 21

NAVAL: Former naval officer Gustavus V. Fox, pursuant to orders from President Abraham Lincoln, reconnoiters Fort Sumter and Charleston Harbor, South Carolina, with a view toward relieving the garrison there. He ultimately suggests sending two shiploads of troops escorted by the screw sloop *Pawnee* and the revenue cutter *Harriet Lane*; should the Southerners open fire, the warships are to engage the enemy batteries.

March 28

MILITARY: To break the current impasse, President Abraham Lincoln resolves to mount a seaborne expedition to succor the federal garrison at Fort Sumter, Charleston Harbor, and orders it dispatched no later than April 6, 1861. His cabinet divides on the matter, three to two in favor, with Secretary of War Simon Cameron abstaining. In effect, the wily Illinois attorney is subtly maneuvering his Southern counterpart into firing the first shot.

March 31

MILITARY: President Abraham Lincoln orders a second relief expedition, this time to assist the federal garrison at Fort Pickens, Florida, which guards the entrance to Pensacola harbor.

April 3

NAVAL: Confederate artillery on Morris Island, Charleston Harbor, open fire on the Union vessel *Rhoda H. Shannon*, in the second instance of hostile shots.

April 4

MILITARY: President Abraham Lincoln approves the strategy outlined by Gustavus V. Fox and informs Major Robert Anderson at Fort Sumter, Charleston, of an impending relief expedition. However, he still grants that officer discretionary authority to respond to any attack the Southerners may launch.

April 5

NAVAL: Captain Samuel Mercer is directed by the secretary of the navy to take the side-wheel steamer *Powhatan*, the screw sloop *Pawnee*, and revenue cutter *Harriet Lane* to Charleston, South Carolina, for the purpose of relieving the garrison.

April 6

MILITARY: South Carolina governor Francis W. Pickens is advised by President Abraham Lincoln that an expedition is underway to supply—not reinforce—the federal garrison at Fort Sumter, Charleston harbor. Moreover, if no resistance is mounted, he pledges that no additional soldiers will be dispatched.

April 7

MILITARY: To increase pressure upon Major Robert Anderson, General Pierre G. T. Beauregard forbids any further communication between Fort Sumter, Charleston Harbor, and the shore.

April 8

MILITARY: In response to the relief expedition dispatched toward Fort Sumter, Charleston Harbor, Confederate authorities begin undertaking military preparations and planting artillery batteries.

April 10

NAVAL: The steamer *Baltic* departs New York in a second attempt to relieve the garrison at Fort Sumter, Charleston, with naval agent Gustavus V. Fox on board. En route it is joined by the screw sloop *Pawnee* off Hampton Roads, Virginia.

- Captain Charles S. McCauley, commanding the Norfolk Navy Yard, Virginia, is ordered by the secretary of the navy to prepare the steam frigate *Merrimack* for transfer to a northern port should Confederate forces attack his position.
- Lieutenant John L. Worden arrives at Pensacola, Florida, on official business and receives permission from General Braxton Bragg to visit Fort Pickens.

April 11

MILITARY: As a sovereign entity, the South cannot tolerate the impending approach of a Union supply vessel to victual Fort Sumter; such an assist would constitute an egregious affront to their self-proclaimed independence. General Pierre G. T. Beauregard is therefore ordered by Confederate authorities to demand the immediate capitulation of Fort Sumter, Charleston Harbor. Major Robert Anderson again flatly refuses but, as a sop to Southern sensitivities, he informs Beauregard that he is nearly out of supplies and must yield the palm by April 15. The Confederates nevertheless give Anderson 24 hours to strike his colors or they will commence bombarding.

April 12–14

MILITARY: The Civil War, a monumental struggle in military history and a defining moment for the United States, commences. At 4:30 A.M., the shoreline of Charleston Harbor erupts in flame as 18 mortars and 30 heavy cannon, backed by 7,000 troops, commence a withering bombardment. Major Robert Anderson, commanding only 85 men, 43 civilian engineers, and 48 cannon, weathers the storm of steel and waits until daybreak before responding with six cannon of his own. To Captain Abner Doubleday goes the honor of firing the first Union shot of the war.

NAVAL: The screw sloop *Pawnee*, the revenue cutter *Harriet Lane*, and the steamer *Baltic*, all commanded by Gustavus V. Fox, arrive in Charleston Harbor with food supplies for Fort Sumter. Having arrived too late to assist the garrison, they remain passive spectators while the bombardment continues.

- The frigate *Sabine*, sloop of war *Brooklyn* and *St. Louis*, and screw steamer *Wyandotte* land troops and marines at Fort Pickens, Florida, to deny that post to the Confederacy.

MARINES: A detachment of 110 marines is conveyed to the garrison of Fort Pickens, Florida, by the U.S. Navy.

April 13

MILITARY: After 34 hours of continuous shelling, a lucky Confederate shot slices through Fort Sumter's flagstaff at 12:48 P.M., and Major Robert Anderson decides that the wiser course is to surrender. He therefore raises the white flag at 2:30 P.M. and the firing ceases, while surrender ceremonies are planned for the following day. Curiously, the garrison is unhurt despite being hit by an estimated 4,000 shells. Still, the affair is perceived as an overt act of Southern aggression, galvanizes heretofore tepid sentiments throughout the North, and grants President Abraham Lincoln the moral authority necessary for waging war against his countrymen.

NAVAL: Relief ships under Gustavus V. Fox continue loitering outside Charleston Harbor, South Carolina, unwilling to approach closer in the face of hostile fire.

- His mission completed, Lieutenant John L. Worden returns to Washington, D.C., from Fort Pickens, Florida. En route, he is arrested by Confederate authorities near Montgomery, Alabama, and imprisoned.

April 14

MILITARY: Major Robert Anderson formally capitulates at Fort Sumter, South Carolina, to Confederate authorities. The only casualties he has sustained in 24 hours of fighting are two killed and four wounded, who ironically fall when a pile of ordnance accidentally ignites during a 100-gun salute to the American flag. The captives are rowed ashore and subsequently entertained by the cream of Charleston society before departing with the provisional squadron assembled by Gustavus V. Fox. "We have met them and we have conquered," Governor Francis W. Pickens crows as the first act in a long and bloody drama concludes.

April 15

MILITARY: President Abraham Lincoln, faced with open insurgency, issues a call for 75,000 volunteers to serve 90 days. Events at Fort Sumter, South Carolina, have elevated cries for war to a fever pitch.

April 17

NAVAL: The *Powhatan* under Lieutenant David D. Porter arrives at Fort Pickens, Florida, and debarks an additional 600 troops to bolster the sailors and marines already there. Thus, the best harbor on the Gulf of Mexico will be retained by the Union for the remainder of the war.

April 18

MILITARY: The 6th Massachusetts Infantry rides the rails from New York to Baltimore, Maryland, en route to Washington, D.C.

- Colonel Robert E. Lee respectfully declines an offer from Abraham Lincoln to command all Union forces.
- Lieutenant Roger Jones orders his command of 50 men to burn the U.S. armory at Harpers Ferry, western Virginia, thereby preventing its tooling facilities from falling into enemy hands. Fire destroys the building along with 15,000 rifled muskets, but the local population extinguishes the flames before the valuable factory tools, dies, and equipment are effectively destroyed.

April 19

MILITARY: The 6th Massachusetts Infantry, transferring between railroad stations in Baltimore, Maryland, is violently attacked by pro-Southern rioters. Shots are exchanged, resulting in four soldiers killed and 36 wounded. These are the first Union casualties incurred by violence, while 11 civilians are also slain. Seething secessionists also begin cutting rail and telegraph lines leading toward the capital. For several anxious days, Washington, D.C., remains cut off from the rest of the Union.

NAVAL: To interrupt any flow of food or war materiel from abroad, President Abraham Lincoln declares a naval blockade of the Confederate coastline. The task involves covering 3,549 miles of coastline and 180 openings for commerce. This translates into all the ports of South Carolina, Georgia, Alabama, Florida, Mississippi, Louisiana, and Texas, and it so overwhelms the relatively small U.S. Navy that its implementation can only be gradual, by stages. In time, the blockade will intensify to stranglehold proportions and emerge as a major factor in the economic collapse of the Confederacy.

- A small expedition under Captain Hiram Paulding enters the Gosport Navy Yard, Norfolk, Virginia, burns nine vessels, and tows away the sloop *Cumberland*. However, Southern troops arrive and extinguish the flames before the damage is too extensive.
- Steamer *Boston* and ferry boat *Maryland* hurriedly depart Pennsylvania ports to effect the transfer of troops to Washington, D.C., which is now cut off from rail service.

April 20

AVIATION: Balloonist Thaddeus S. C. Lowe makes a record flight from Cincinnati, Ohio, to the coast of South Carolina in only nine hours.

MILITARY: Lieutenant Colonel Robert E. Lee tenders his resignation from the U.S. Army. He also turns down an offer to command all Federal forces, seeing that his native state of Virginia seceded three days earlier.

- To obstruct the passage of Federal troops to Washington, D.C., secessionist mobs burn several railways out of Baltimore. This requires reinforcements to arrive by water and then to rebuild tracks as they proceed on foot, which impedes their progress.

NAVAL: An aged Captain Charles S. McCauley hurriedly and prematurely orders the Gosport Navy Yard in Norfolk, Virginia, burned and evacuated. The resulting destruction is less than complete, and the dry docks will become operative again in a few weeks. The Confederates also retrieve no less than 1,200 heavy naval cannon, which they implant at fortifications as far west as Vicksburg, Mississippi. McCauley's badly botched withdrawal from Norfolk proves a windfall for the Confederacy.

- The U.S. Naval Academy is abandoned and transferred north to Newport, Rhode Island, for the duration of the war while the campus buildings serve as barracks for Union troops.

MARINES: The Washington Navy Yard dispatches 50 marines to reinforce the Gosport Navy Yard, Virginia, on board the sloop *Pawnee*. The local commander surrenders to Confederate authorities shortly afterward, so the marines make a hasty egress by boat to safety.

April 21

NAVAL: Commandants of the Philadelphia, New York, and Boston navy yards are ordered by the secretary of the navy to gather shallow-draft vessels for coastal operations. Four similar vessels are also acquired at Washington, D.C., armed and manned for the protection of the capital.

- Confederate forces occupy Gosport Navy Yard, Virginia, and salvage the old steam frigate *Merrimack*; in a few months this vessel will be reincarnated as the ironclad ram *Virginia*.

April 22

NAVAL: Steamer *Boston* disgorges the 7th New York Regiment at Annapolis, Maryland, for the defense of Washington, D.C.

- Captain Franklin Buchanan, commanding the Washington Navy Yard, tenders his resignation in anticipation of Maryland's seemingly impending secession—he will not be reinstated once his state remains loyal, and Buchanan ultimately joins the Confederacy. He is succeeded by Captain John A. B. Dahlgren, another distinguished officer.

April 23

MILITARY: General Robert E. Lee becomes commander of Virginia state forces.

- In Texas, state militia begin rounding up Federal garrisons at San Antonio and Saluria. However, Lieutenant Colonel William H. Emory manages to assemble 11 companies from various regiments and marches them to safety at Fort Leavenworth.
- Fort Smith, Arkansas, is seized by state forces; being on the margins of Indian Territory (Oklahoma), this base will help project Confederate influence over the region.

April 24

NAVAL: The venerable *Constitution*, “Old Ironsides” of War of 1812 fame, is towed to safety from Annapolis, Maryland, by the steamship *R. R. Cuyler*. The entire faculty and all midshipmen are on board and will be relocated while the academy grounds serve as a military hospital.

April 25

MILITARY: The 8th Massachusetts Infantry under General Benjamin F. Butler parades defiantly through Washington, D.C., following its lengthy march around Baltimore, Maryland.

- In a daring Union raid, Captain James H. Stokes arrives at St. Louis, Missouri, by steamer, where he removes 12,000 rifled muskets from the U.S. arsenal there. The weapons will be deposited at Alton, Illinois, for militia use—a critical blow to Confederate sympathizers gathering in the region.

April 26

MILITARY: General Joseph E. Johnston arrives and receives command of the Confederate forces in Virginia then guarding the capital of Richmond.

April 27

NAVAL: President Abraham Lincoln extends the Union blockade to encompass the coasts of Virginia and North Carolina following their secession. Secretary of

the Navy Gideon Welles also authorizes the interdiction of Confederate privateers at sea.

April 30

MILITARY: Colonel William H. Emory evacuates Fort Washita in the Indian Territory (Oklahoma) and heads north toward Fort Leavenworth, Kansas. His withdrawal renders the nearby Five Civilized Tribes (Cherokee, Chickasaw, Creek, Choctaw, and Seminole) vulnerable to Confederate influence.

May 1

MILITARY: The six soldiers killed in the Baltimore riots are interred with full military honors in Boston, Massachusetts.

- General Robert E. Lee orders additional Confederate forces concentrated in the vicinity of Harpers Ferry, Virginia, presently commanded by Colonel Thomas J. Jackson.
- Governor Samuel W. Black of the Nebraska Territory calls out volunteer forces to assist the Union.

May 3

MILITARY: President Abraham Lincoln issues a call for 42,000 three-year volunteers, with 10 new regiments for the U.S. Army and an additional 18,000 personnel for the navy. This brings existing manpower ceilings to 156,000 soldiers and 25,000 sailors.

- General Winfield Scott, the senior American commander, unveils to President Abraham Lincoln his so-called Anaconda Plan for defeating the Southern rebellion. Basically, it entails a gunboat-supported drive down the Mississippi River by 60,000 troops, commencing at Cairo, Illinois, and ending at New Orleans, Louisiana. Concurrently, the U.S. Navy will tightly blockade the Confederate coast to strangle all trade with Europe. Derided at the time by younger officers favoring a swift and decisive military campaign, Scott's strategy will not be formally enacted until 1864, and then in slightly modified form. Lincoln spends the next three years looking for a general to execute it forcefully.

May 6

MILITARY: The Confederate-leaning Missouri State Guard under General Daniel M. Frost establishes a training camp near St. Louis at the behest of Governor Claiborne F. Jackson. Meanwhile, Captain Nathaniel Lyon, commanding the Federal garrison at St. Louis, refuses all demands to remove his troops from the city.

NAVAL: The Confederate Congress recognizes a state of war with the United States and mandates the issuance of letters of marque and reprisal to privateers.

May 7

MILITARY: President Abraham Lincoln appoints newly repatriated Major Robert Anderson to recruiting duties in his native state of Kentucky.

NAVAL: The U.S. Naval Academy staff, students, and supplies onboard the steamer *Baltic* and the venerable frigate USS *Constitution* arrive at their new home in Newport, Rhode Island.

May 9

NAVAL: Confederate secretary of the navy Stephen R. Mallory orders Commander James D. Bulloch to England as the Confederacy's naval agent. The Confederate Congress also passes a \$1 million appropriations bill for the purchase of steamers, rifled cannon, and other war-related impedimenta. His efforts will result in acquisition of the commerce cruisers *Alabama*, *Florida*, and *Shenandoah*.

May 10

MILITARY: General Robert E. Lee is made commander of all Virginia state forces.

- Violence erupts in St. Louis, Missouri, between Southern sympathizers and U.S. Army troops backed by a large German-speaking population. Around two dozen civilians and two soldiers die in fighting as Captain Nathaniel Lyon energetically rounds up General Daniel Frost and 625 Missouri State Guard troops at Camp Jackson. However, his rashness drives many undecided civilians into the enemy's ranks, and 30 more are killed in subsequent rioting.

NAVAL: The new screw frigate *Niagara* under Captain William W. McKean arrives to strengthen the blockade of Charleston, South Carolina.

- Confederate secretary of the navy Stephen R. Mallory alerts the Committee of Naval Affairs in Congress that the acquisition of a heavily armored steam vessel is "a matter of the first necessity." Such vessels are necessary to challenge the Union blockade of Southern ports.

May 11

MILITARY: Continuing secessionist unrest in St. Louis, Missouri, results in seven additional civilian deaths at the hands of the 5th Reserve Regiment. Colonel William S. Harney arrives back in town and succeeds Captain Nathaniel Lyon as garrison commander.

May 13

DIPLOMACY: Queen Victoria of Great Britain vows to maintain neutrality during the present difficulties in North America and strictly forbids British vessels from running the naval blockade.

MILITARY: Baltimore is secured by Federal forces under General Benjamin F. Butler, who both occupies Federal Hill and imposes martial law without prior authorization. This helps secure the Washington, D.C., area for the Union.

- General George B. McClellan is appointed commander of the Department of the Ohio.

NAVAL: The frigate *Sabine* under Captain N. S. Adams establishes a blockade off Pensacola, Florida.

May 14

MILITARY: John C. Frémont, a popular explorer and one-time presidential candidate, becomes a major general, U.S. Army. Irvin McDowell and Montgomery C. Meigs are also appointed brigadier generals.

- General Benjamin F. Butler consolidates his grip upon Baltimore, Maryland, and arrests noted secessionists, including Ross Winans, who had previously invented a steam cannon. Governor Thomas H. Hicks issues calls for four regiments to defend both the city and the national capital.

- Major Robert Anderson is instructed by President Abraham Lincoln to assist Kentucky Unionists wherever possible, despite that state's avowed neutrality.

May 15

MILITARY: Major Robert Anderson, defender of Fort Sumter and the first Northern war hero, is promoted several steps to brigadier general, U.S. Army.

- General Benjamin F. Butler relinquishes command of the Department of Annapolis and arrives at Fortress Monroe, Virginia, where he gains promotion to major general of volunteers. He is succeeded by General George Cadwalader.
- Colonel William S. Harney, commanding St. Louis, Missouri, implores citizens to ignore secessionist attempts to raise militia. However, he takes no steps to interfere with Confederate activities.

NAVAL: The brig *Bainbridge* under Lieutenant Thomas M. Brasher is ordered to Aspinwall, New Granada (Panama), for the purpose of escorting gold-laden transports from California back to New York.

May 16

NAVAL: In a highly significant move, Commodore John Rodgers, Jr., is ordered to Ohio to commence construction of several shallow-water gunboats intended for use on western waters.

May 17

INDIAN: Chief John Ross declares neutrality for Cherokee throughout the Indian Territory, although the tribe will continue splintering into pro- and anti-secessionist factions.

May 18

NAVAL: The first Union offensive action of the war goes to several small U.S. Navy craft who bombard Confederate batteries at Sewell's Point (Norfolk), Virginia.

May 21

MILITARY: Colonel William S. Harney, commanding Federal forces in Missouri, enters into a convention with the Missouri State Guard commander, General Sterling Price. Harney agrees not to introduce Federal troops into the state if the Southerners can maintain order. Both Francis P. Blair and Captain Nathaniel Lyon condemn the agreement, regarding it as treasonous.

May 23

MILITARY: General Benjamin F. Butler, commanding Fortress Monroe, Virginia, refuses to hand over three runaway slaves to their owners by declaring them "contraband of war." This establishes an important precedent for allowing thousands of slaves to escape to Union lines and freedom.

May 24

MILITARY: General Samuel P. Heintzelman's 13,000 Federal soldiers occupy Alexandria and Arlington Heights, Virginia, bolstering the defenses of Washington, D.C. However, when 24-year-old Colonel Elmer E. Ellsworth of the 11th New York Regiment (Fire Zouaves) removes a Confederate flag from a hotel in Alexandria, he is shot by innkeeper James T. Jackson, who is then himself killed. Ellsworth enjoys the melancholy distinction of becoming the North's first officer fatality.

NAVAL: Commander S. C. Rowan of the Potomac Flotilla directs the screw sloop *Pawnee*, screw steamer *Anacostia*, tug *Resolute*, and gunboat *Thomas Freeborn* on an amphibious assault upon Alexandria, Virginia; the town surrenders without fighting.

May 26–29

MILITARY: General George B. McClellan orders three columns of Union forces to advance on Grafton in western Virginia in order to secure the Baltimore & Ohio Railroad. This rail line constitutes a strategic link between the capital and the western states.

NAVAL: By this date, Union vessels have established blockades of Mobile, Alabama; Savannah, Georgia; and New Orleans, Louisiana along with the mouth of the Mississippi River. The latter station is covered by Commander Charles H. Poor of the side-wheel steamer *Powhatan* while Mobile is handled by Lieutenant David Dixon Porter and the steamer *Union*.

May 27

MILITARY: Union forces near Fortress Monroe, Virginia, capture nearby Newport News to enlarge their staging area for the region.

May 28

MILITARY: General Irvin McDowell is appointed commander of the Department of Northwestern Virginia, including newly acquired Alexandria.

May 29

MILITARY: Dorothea L. Dix approaches Secretary of War Simon Cameron and offers to assist in organizing hospital services for Federal forces.

May 29–June 1

NAVAL: The Potomac Flotilla under Commander S. C. Rowan trades fire with Confederate artillery batteries along Aquia Creek, Virginia.

May 30

MILITARY: Secretary of War Simon Cameron instructs General Benjamin F. Butler at Fortress Monroe, Virginia, that fugitive slaves crossing into Union lines are not to be returned but, rather, fed and given work around military installations.

NAVAL: The steam frigate *Merrimack*, a sunken derelict scuttled and burned by Union forces, is raised by Confederates at the Norfolk Navy Yard, Virginia.

May 31

MILITARY: General John C. Frémont supersedes General William S. Harney as Union commander in Missouri. The latter's agreement with General Sterling Price over the introduction of Federal troops into the region is also abrogated.

June 1

MILITARY: A party of Union cavalry, though outnumbered, charges repeatedly through the streets of Fairfax Court House, Virginia, taking several prisoners. Captain John Q. Marr becomes the first Southern officer and soldier killed in action.

June 3

MILITARY: Indiana troops under General Thomas A. Morris surprise and easily defeat a Confederate detachment under Colonel George A. Porterfield at

Philippi in northwestern Virginia. This “victory,” greatly exaggerated in the press as the “Philippi Races,” clears the Kanawha Valley of Southerners and provides greater impetus for the area to break with the Confederacy altogether. Quick actions by General George B. McClellan, commanding the Department of the Ohio, made this small victory possible, and he begins to garner official attention.

June 9

MILITARY: General Benjamin F. Butler decides to dislodge Confederate forces gathered at Big Bethel, Virginia, only eight miles from his main position at Hampton. The march goes badly, with many units becoming lost. Worse, the 5th New York Infantry (Zouaves), resplendent in gray uniforms, is mistaken for Confederates and fired upon, sustaining 21 casualties.

June 10

MILITARY: Federal troops under General Ebenezer Pierce, numbering 4,400, attack 1,500 Confederates led by General John B. Magruder at Big Bethel, Virginia, eight miles northwest of Hampton. The green, poorly led Union soldiers are committed piecemeal against enemy entrenchments and are beaten back, principally by the well-trained 1st North Carolina Infantry under Colonel Daniel H. Hill. Union losses are 76 dead, injured, and missing; among them is Lieutenant John T. Greble, the first West Point graduate to fall in the Civil War. Confederate losses are around a dozen.

- Captain Nathaniel Lyon (U.S.A.), reappointed to command the St. Louis garrison, storms out of negotiations with pro-Southern governor Claiborne F. Jackson and the Missouri State Guard commander, General Sterling Price. He then “declares war” on Confederate sympathizers and prepares to deal with them by force.
- Secretary of War Simon Cameron appoints Dorothea L. Dix as superintendent of woman nurses to help supervise medical activities within the U.S. Army.

NAVAL: Lieutenant John M. Brooke (C.S.A.), a gifted naval engineer, receives orders to convert the former steam frigate *Merrimack* into the ironclad ram *Virginia*.

June 11

MILITARY: Colonel William W. Loring resigns his commission as commander of the New Mexico Territory and is succeeded by Colonel Edward R. S. Canby. In California, Brigadier General Albert S. Johnston quits the Department of the Pacific and is succeeded by Brigadier General George Wright.

June 12

MILITARY: In Missouri, Governor Claiborne Jackson issues a call for 50,000 Confederate volunteers to protect the state from Federal forces and intentions.

June 13

MILITARY: President Abraham Lincoln agrees to creation of a civilian sanitary commission to assist the military medical corps. It will perform useful work over the next four years and lend credence to the founding of the American Red Cross in the postwar period.

June 14

MILITARY: Robert E. Lee is promoted to full general, C.S.A.

June 15

MILITARY: Federal troops under Captain Nathaniel Lyon forcibly occupy the capital of Jefferson City, Missouri, while 1,500 poorly armed and trained Confederate sympathizers under Governor Claiborne F. Jackson encamp at nearby Booneville.

June 16

MILITARY: Confederate forces under General Robert S. Garnett seize Laurel Hill in western Virginia and subsequently occupy strong positions at Rich Mountain. Badly outnumbered by troops of the nearby Department of the Ohio under General George B. McClellan, Garnett initiates a series of raids to keep larger Union forces off balance.

June 17

MILITARY: General Nathaniel Lyon and 1,700 Federal troops aggressively pursue retreating Missouri State Guard forces under Governor Claiborne F. Jackson up the Missouri River to Booneville. After a 20-minute stand, the Southerners flee to the southwestern corner of the state. More importantly, Union forces now control the lower Missouri River—and Lyon warns inhabitants in the region of stern punishment for possible acts of treason.

- In Springfield, Illinois, former army captain Ulysses S. Grant gains appointment as colonel of the 21st Illinois Infantry.

June 18

AVIATION: In Washington, D.C., Professor Thaddeus S. C. Lowe flies in a hot air balloon named “Enterprise” over the capital and is keenly observed by President Abraham Lincoln. From an altitude of 500 feet, Lowe sends Lincoln the world’s first aerial telegraphic message.

June 19

INDIAN: Cherokee chief John Ross reiterates his neutrality and reminds fellow tribesmen of previous obligations to the United States.

June 23

AVIATION: Professor Thaddeus S. C. Lowe again rises in his balloon, this time to observe Confederate deployments at Falls Church, Virginia, in one of the earliest American reconnaissance flights.

NAVAL: Armored conversion of the *Virginia* (née *Merrimack*) continues apace at Norfolk, Virginia, under the aegis of John Mercer Brooke.

June 25

NAVAL: Intelligence reports reach the secretary of the navy concerning Confederate efforts to construct an “infernal machine” (submersible) at New Orleans, Louisiana.

June 27

NAVAL: A major strategy session unfolds in Washington, D.C., with representatives of the army, navy, and Coast Survey in attendance. The newly created Blockade Strategy Board includes Captain Samuel F. Du Pont, Commander Charles H.

Davis, and other military notables, and it will become a key planning body whose policies remain in effect throughout the war.

- Confederates repel an attempt to land forces at Mathias Point, Virginia, by gunboats *Pawnee* and *Thomas Freeborn*. Commander James H. Ward, a former commandant of midshipmen at the U.S. Naval Academy, dies in action, becoming the navy's first officer fatality.

June 28

NAVAL: The Blockade Strategy Board resolves to seize a port in South Carolina or Georgia to serve as a coaling station and help sustain the blockade effort offshore.

- Confederates under Captain George N. Hollins, disguised as passengers, capture the steamer *St. Nicholas* as it plies the regular route between Washington, D.C., and Baltimore, Maryland. They subsequently capture three merchant vessels.

June 29

MILITARY: Amidst mounting war fever, President Abraham Lincoln is briefed on military strategy by Generals Winfield Scott and Irvin McDowell. However, Scott remonstrates against committing raw soldiers to combat at this stage of the conflict and argues, unsuccessfully, against seeking victory in a single, decisive battle.

June 30

NAVAL: Captain Raphael Semmes (C.S.N.), commanding the *Sumter*, evades the *Brooklyn* off New Orleans, Louisiana, and launches his celebrated career as a commerce raider. His initial cruise will result in 18 prizes.

MARINES: At the commencement of the Civil War, Marine Corps strength is 48 officers and 2,388 enlisted men.

July 1

MILITARY: The War Department decrees that military volunteers will be recruited from both Kentucky and Tennessee, despite the former's neutrality and the latter's secession.

July 2

MILITARY: Aged general Robert Patterson, a veteran of the War of 1812, directs Union forces as they cross the Potomac River and enter the Shenandoah Valley; he is opposed by Confederate forces under General Joseph E. Johnston.

NAVAL: Commander James Alden of the screw steamer *South Carolina* establishes a blockade of Galveston, Texas.

July 3

MILITARY: Union forces under General Robert Patterson occupy Martinsburg, (West) Virginia, after routing a small Confederate force there for the loss of three dead and 10 wounded.

NAVAL: Captain Raphael Semmes, commanding the Confederate raider *Sumter*, captures the vessel *Golden Rocket* in Cuban waters. Over the next three days, the intrepid Semmes nets an additional seven prizes.

July 4

MILITARY: As the magnitude of the conflict looms clearer, President Abraham Lincoln requests Congress to authorize 400,000 three-year volunteers; three weeks later, the amount is raised to 500,000.

July 5

MILITARY: Colonel Franz Sigel, leading a detachment of 1,100 German-speaking volunteers, advances upon a larger force of 4,000 Missouri militia under Governor Claiborne F. Jackson near Carthage, Missouri. The Confederates decide to attack the Union lines, which are posted upon a hilltop, at which point Sigel, badly outnumbered, falls back to Springfield to join Union forces gathering there under Captain Nathaniel Lyon.

July 6

MILITARY: General George B. McClellan, commanding the Department of the Ohio, prepares to order an Indiana brigade under General Thomas A. Morris to advance upon Confederate troops gathered at Laurel Hill in western Virginia. He intends to simultaneously lead the main body of three brigades in a similar movement against enemy forces at nearby Rich Mountain.

NAVAL: Confederate raider *Sumter* under Captain Raphael Semmes docks at Havana, Cuba, with six Northern prizes in tow.

July 7

MILITARY: General Nathaniel Lyon, commanding Union forces at Springfield, Missouri, is reinforced by troops under Major Samuel D. Sturgis. He now possesses 7,000 men, but remains outnumbered two-to-one by the recently invigorated Confederates.

July 8

NAVAL: While cruising the Potomac River, the screw tug *Resolute* spies and retrieves two mysterious looking objects—which turn out to be the first Confederate “torpedoes” (mines) encountered in the war. These devices will become increasingly lethal to warships as the conflict progresses.

July 10

INDIAN: The Creek Nation concludes a peace treaty with Confederate Indian agent Colonel Albert Pike.

MILITARY: Having reconnoitered enemy positions, General George B. McClellan commences his offensive in northwestern Virginia by dispatching General William S. Rosecrans to dislodge enemy troops from Rich Mountain, while another force under General Thomas A. Morris advances upon Confederates gathered at Laurel Hill.

- General Abraham Lincoln assures General Simon B. Buckner, head of the Kentucky militia, that Union forces will not violate his state’s neutrality.

July 11

MILITARY: General William S. Rosecrans and 2,000 Union troops defeat Colonel John Pegram’s 1,300 Confederates at Rich Mountain in northwestern Virginia after marching all night through a heavy downpour. The Northerners suffer roughly 100 casualties. Furthermore, victory here places them astride General Robert S. Garnett’s lines of communication, and Garnett begins withdrawing from Laurel Hill while pursued by the main Union force under General George B. McClellan.

July 12

INDIAN: Colonel Albert Pike arranges treaties between the Confederacy and the Choctaw and Chickasaw tribes residing in the Indian Territory (Oklahoma).

MILITARY: Colonel John Pegram surrenders 555 Confederates to General William S. Rosecrans at Beverly, northwestern Virginia, which is subsequently occupied by the main Union force under General George B. McClellan. Southerners under General Robert S. Garnett, anxious to escape a closing pincer movement, hurriedly march from Kaler's Ford on the Cheat River to nearby Corrick's Ford.

July 13

MILITARY: General Robert S. Garnett's Confederates are defeated at Corrick's Ford (Carricksford) in northwestern Virginia by General Thomas A. Morris's Indiana brigade. Union losses are variously reported as from 10 to 53 in number, while the Confederates admit to 20. Significantly, Garnett is the first general officer on either side slain in action.

July 14

MILITARY: Command of Southern forces in northwestern Virginia reverts to General Henry R. Jackson. Meanwhile, a Union push under General Robert Patterson stalls south of Harpers Ferry after encountering a stiff defense by General Joseph E. Johnston. Patterson's timidity and hesitancy to fight earns him the unflattering nickname of "Granny" from his troops.

NAVAL: Commander Samuel Lockwood and the screw steamer *Daylight* establish a blockade off Wilmington, North Carolina.

July 16

MILITARY: Anxious to maintain the strategic initiative on the heel of good progress in northwestern Virginia, General Irvin McDowell orders his 32,000 men toward Manassas Junction. "On to Richmond!" becomes the national mantra—despite the fact that McDowell's recruits cover only six miles to Fairfax Court House. Another two days are required to reach Centreville, 22 miles from the capital, and such dilatory movement grants Confederate forces under General Pierre G. T. Beauregard a badly needed respite to collect and reposition themselves to meet McDowell.

NAVAL: In a reversal of fortunes, the Confederate prize crew aboard the captured *S. J. Waring* is overpowered by its crew—led by William Tilghman, an African-American sailor. The ship arrives in New York six days later.

July 17

MILITARY: President Jefferson Davis orders General Joseph E. Johnston to reinforce General Pierre G. T. Beauregard in Virginia. For the first time in military history, large numbers of troops are strategically shuttled from one front to another by train, bringing Confederate numbers at Manassas Junction to a near match of Union strength.

July 18

MILITARY: General Irvin McDowell dispatches a reconnaissance in force under General Daniel Tyler toward Confederate forces collected at Centreville, Virginia. These soldiers skirmish with Southerners posted across a creek for an hour before the 12th New York makes an ill-advised charge and is blasted back by heavy rifle fire emanating from the dense woods.

July 19

MILITARY: Newly arrived General John Pope (U.S.A.) warns the inhabitants of northern Missouri that treasonable activity will be punished promptly, "without awaiting a civil process."

- At Manassas, Virginia, the first elements of General Joseph E. Johnston's forces arrive by train from the Shenandoah Valley. This movement is made possible by the lethargy of Union forces under General Robert Patterson, who fail to detect Johnston's transfer.

NAVAL: The captain-general of Cuba orders the release of all the Northern prizes brought into Havana by Captain Raphael Semmes of the *Sumter*.

July 20

MILITARY: General Joseph E. Johnston arrives in person at Manassas Junction, Virginia, with reinforcements and succeeds General Pierre G. T. Beauregard as senior commander, although he allows the latter to retain overall command. General Irvin McDowell, meanwhile, decides that the Confederate right is too strong to assail frontally and seeks an unguarded crossing point nearer to Beauregard's left flank. All told, McDowell conceives a viable enough battle plan but entrusts it to men and officers far too inexperienced to execute it properly.

July 21

AVIATION: The first balloon built to army specifications is delivered by John Wise and includes an iron floor board to protect against small arms fire.

MILITARY: A momentous day unfolds with the predawn movement of General Daniel Tyler's Federal division, which begins groping through the darkness at 2:00 A.M. Four hours later his cannon begin lobbing shells on Confederate positions behind the stone bridge across Bull Run. After two hours of heavy fighting, the Southerners give way in confusion and the Federals resume advancing in the direction of Henry House Hill. A brigade of five Virginia regiments under General Thomas J. Jackson deploys in their path, assisted by several batteries, and ferociously resists a Union onslaught by 18,000 men. Jackson's aggressive defense greatly inspires the Southerners and, sensing victory and the exhausted state of their antagonists, Beauregard orders a sudden advance across the entire line with the trademark "Rebel yell." McDowell's tired, demoralized soldiers withdraw in confusion—headlong into a well dressed throng of civilians gathered by the roadside to witness their anticipated "victory." The first major engagement of the Civil War ends in a tactical triumph for the Confederacy, with Southern losses of 1,982 to a Union tally of 2,896.

MARINES: The U.S. Marine Corps receives its baptism of fire when a battalion of 353 men commanded by Major John Reynolds loses nine killed, 19 wounded, and 16 missing.

July 22

MILITARY: The three-month enlistment of many Union volunteers begins expiring, allowing many of them to be discharged. President Abraham Lincoln counters by signing two bills authorizing 1 million three-year volunteers.

- Congress approves the creation of military boards to review officers of volunteers and remove any found to be unqualified. These are also the army's first efficiency boards.
- General George B. McClellan is ordered to succeed the now-disgraced general Irvin McDowell.

July 24

MILITARY: General Jacob D. Cox engages and disperses Southerners under General Henry A. Wise at Tyler Mountain, northwestern Virginia. The town of Charleston is subsequently evacuated in the face of mounting Union pressure, and the Kanawha Valley is soon free of Confederates.

NAVAL: In an attempt to improve naval administration, Congress authorizes creation of the position of assistant secretary of the navy. It also grants the president authority to impress civilian craft into naval service and appoint regular officers to command them.

July 25

MILITARY: In St. Louis, Missouri, noted explorer John C. Frémont gains appointment as commander of the Department of the West with a rank of major general.

MARINES: As a wartime expedient, Congress raises Marine Corps manpower ceilings to 93 officers and 3,074 enlisted men.

July 26

MILITARY: As Confederate forces from Texas advance through New Mexico, Federal forces abandon Fort Fillmore in Mesilla without a fight.

July 27

MILITARY: President Abraham Lincoln confers with General George B. McClellan, newly arrived in Washington, D.C. The chief executive urges a strategic offensive with advances into Tennessee by way of Virginia and Kentucky. McClellan, who is not as easily stampeded into action as his predecessor, respectfully demurs.

July 28

MILITARY: In light of the deteriorating situation in northwestern Virginia and the death of General Robert Garnett at Carricksford, the little-known General Robert E. Lee is ordered to take command of Confederate forces there.

- Confederate forces march into New Madrid, Missouri, on the Mississippi River and just across from the Tennessee/Kentucky state line.

July 30

POLITICS: The Missouri State Convention votes 56–25 to declare the gubernatorial seat open, thereby deposing Confederate-leaning Claiborne F. Jackson as chief executive.

July 31

MILITARY: President Abraham Lincoln elevates a heretofore obscure army officer, Ulysses S. Grant, to brigadier general of volunteers in Illinois. This will turn out to be one of the most decisive military appointments of the war and a harbinger of victory.

August 1

MILITARY: President Jefferson Davis urges General Joseph E. Johnston to maintain the strategic initiative with further offensive actions against Union forces still in Virginia.

NAVAL: Gustavus V. Fox, a former naval officer, gains appointment as the first assistant secretary of the Federal navy.

August 2

MILITARY: Union forces under General Nathaniel Lyon and Confederates under General Ben McCulloch clash at Dug Springs, Missouri. Lyon, badly outnumbered, orders his men back to Springfield to regroup.

- Union forces abandon Fort Stanton, New Mexico, as Confederate forces advance upon it from Texas.

August 3

AVIATION: In another early application of aerial reconnaissance, John LaMountain lifts off the deck of the steamer *Fanny* in a balloon while anchored off Hampton Roads, Virginia, and observes Confederate gun positions at Sewell's Point. This is the first recorded instance of aerial reconnaissance performed from a naval vessel.

MILITARY: Congress adopts a retirement system for army officers, who can now leave the service with a guaranteed pension after 40 years of good service; the amount given is based on the pay scales received during active duty.

- The surgeon general is authorized by Congress to employ female nurses at army hospitals at a rate of \$12 per month.

NAVAL: Congress directs the Department of the Navy to design and construct three ironclad prototypes. It also institutes an "Ironclad Board" to study and recommend the acquisition and deployment of ironclad warships. To underscore its determination, Congress appropriates \$1.5 million to fulfill this highly significant project.

August 5

MILITARY: Flogging is abolished as an army punishment by Congress; a private's pay also rises from \$11.00 to \$13.00 per month.

August 6

MILITARY: The five regular mounted regiments are sequentially renumbered according to seniority and given identical organizations. The 6th Cavalry is added this month.

August 7

MILITARY: A force of 7,000 Confederates under Brigadier General John B. Magruder occupies Hampton, Virginia, very close to the Union enclave of Fortress Monroe, and burns Hampton to deny its use to the enemy.

- Colonel Ulysses S. Grant is promoted to brigadier general of volunteers and placed in charge of the District of Southeast Missouri.

NAVAL: The U.S. government authorizes construction of seven ironclad gunboats under engineer James B. Eads of St. Louis, Missouri, for riverine service: *Cairo*, *Carondelet*, *Cincinnati*, *Louisville*, *Mound City*, *Pittsburgh*, and *St. Louis*. These vessels, popularly known as "Pook's turtles," prove instrumental in asserting Union naval power along strategic western water routes.

August 8

MILITARY: General Ulysses S. Grant takes command of Union forces at Ironton, Missouri.

NAVAL: Flag Officer Silas H. Stringham, commanding a small but powerful Union naval squadron, posts soldiers and marines ashore near Forts Hatteras and Clark,

North Carolina. The forts are secured the following day, which seals off Pamlico Sound from operating as a privateer haven.

August 9

MILITARY: A force of 12,000 Confederates under Generals Ben McCulloch and Sterling Price converges upon Springfield, Missouri, and encamps near Wilson's Creek, 10 miles to the southwest. But General Nathaniel Lyon, rather than abandon the town without a fight, aggressively musters his 4,200 Federals and prepares to launch a preemptive strike of his own.

NAVAL: The Confederate privateer *York* is accosted by the gunboat *Union*, then beached and burned off Cape Hatteras, North Carolina, to prevent capture.

August 10

MILITARY: General Nathaniel Lyon (U.S.A.) initiates the Battle of Wilson's Creek by storming Confederate campsites at 5:30 A.M. General Franz Sigel, meanwhile, stealthily advances upon the Southern camp from below and routs Confederate cavalry deployed there. General Ben McCulloch, however, reacts quickly to this threat and dispatches troops that drive Sigel off, securing the Confederate rear area. Lyon, unaware of Sigel's debacle, holds his ground as General Sterling Price commits two frontal assaults in superior force, and Lyon is killed in action. The Federals consequently draw off in orderly fashion while the exhausted, battered Confederates decline to pursue. Losses at Wilson's Creek prove nearly equal, with the Union suffering 1,317 casualties to a Southern tally of 1,230.

August 12

NAVAL: Newly constructed gunboats *Conestoga*, *Lexington*, and *Tyler* deploy off Cairo, Illinois, to guard the confluence of the Ohio and Mississippi Rivers.

August 14

MILITARY: General John C. Frémont declares martial law in St. Louis, Missouri, and begins confiscating the property of suspected Confederate sympathizers.

August 15

MILITARY: General Robert Anderson, formerly commanding at Fort Sumter, South Carolina, assumes control of the Department of the Cumberland (Tennessee and Kentucky). However, his health has been compromised by bouts of nervous exhaustion attributed to his recent ordeal, and he will retire from active duty shortly afterward.

- In view of Confederate successes in Missouri, General John C. Frémont pleads with the War Department for immediate reinforcements. President Abraham Lincoln, cognizant of the threat to this vital border state, authorizes an immediate transfer of troops.

August 17

MILITARY: Henry W. Halleck is promoted to major general, U.S. Army.

August 20

MILITARY: General George B. McClellan formally assumes control of the newly constituted Department and Army of the Potomac. This vaunted force becomes a permanent fixture in the struggle for Virginia over the next four years.

August 24

NAVAL: A combined Union expedition assembles at Hampton Roads, Virginia, under Commodore Silas H. Stringham. This powerful force mounts 143 rifled cannon while Stringham, a capable veteran of the War of 1812 and of many years with the Mediterranean Squadron, is well-versed in the latest fort-reducing tactics perfected during the Crimean War.

- Captain Andrew H. Foote is appointed to replace Captain John Rodgers as commander of the gunboat flotilla in western waters.

August 25

MILITARY: In Missouri, General John C. Frémont orders that the word “Springfield” be added to all regimental colors of units that fought at the Battle of Wilson’s Creek. This is the origin of the U.S. Army system of awarding battle streamers.

August 26

MILITARY: General Robert E. Lee, newly arrived in northwestern Virginia, wins a minor engagement at Kessler’s Cross Lanes, then gathers strength for an offensive there.

August 27

MILITARY: Major Isaac Lynde (U.S.A.), outnumbered by pursuing Texas militia forces, surrenders seven companies of his 7th Infantry and three companies of the 3rd Cavalry near Fort Fillmore, New Mexico Territory. He will be drummed out of the military for this tepid performance.

NAVAL: The Union naval expedition under Commodore Silas Stringham anchors off Hatteras Inlet, North Carolina, and prepares to attack and land troops to storm nearby Forts Clark and Hatteras. These are garrisoned by 350 men of the 7th North Carolina under Colonel William F. Mountain; they are poorly situated to resist such a powerful force.

August 28

NAVAL: To seal off Pamlico Sound, an important blockade-running route, a combined expedition of eight warships and two transports under Commodore Silas Stringham takes up bombardment positions off Hatteras Inlet, North Carolina. Around 10 A.M., Stringham forms his vessels into a fast-moving offshore circle, which continuously bombards Confederate positions with a heavy, plunging fire.

MARINES: Landing parties from the frigates *Minnesota* and *Wabash*, and sloops *Cumberland* and *Susquehanna*, are sent ashore to assist soldiers in the seizure of Fort Clark at Hatteras Inlet, North Carolina.

August 29

MILITARY: General Benjamin F. Butler lands 900 soldiers and occupies Forts Hatteras and Clark at Hatteras Inlet, North Carolina. The Union thus secures its first toehold in Southern territory, and the inlet will perform useful service as a coaling station and entrepot for the blockading squadron.

August 30

MILITARY: Without prior authorization, General John C. Frémont declares martial law and then proclaims a conditional emancipation declaration, freeing all

slaves belonging to Confederate sympathizers in Missouri. President Abraham Lincoln, after learning of his actions, declares them dictatorial and potentially alienating for slave-owning Unionists in the region.

NAVAL: A sortie by the Confederate tug *Harmony* of Newport News, Virginia, results in damage to the Union frigate *Savannah*.

August 31

MILITARY: General William S. Rosecrans takes three brigades of Ohio troops, 6,000 strong, and marches south from Clarksburg, northwestern Virginia, intending to attack Confederates under General John B. Floyd at Carnifex Ferry.

September 1

MILITARY: General Ulysses S. Grant arrives at Cape Girardeau, Missouri, and takes nominal command of Union forces throughout southeastern Missouri.

September 3

MILITARY: In a major development, General Leonidas K. Polk orders Confederate forces to violate Kentucky neutrality and preempt any possible Union advances there. General Gideon Pillow responds by occupying Hickham, Clark Cliffs, and Columbus, establishing a continuous war front now stretching from Missouri to the Atlantic Ocean.

September 5

MILITARY: With Kentucky neutrality violated, General Ulysses S. Grant prepares his forces gathered at Cairo, Illinois, for an immediate occupation of Paducah, at the strategic confluence of the Tennessee and Ohio Rivers. The mouth of the Cumberland River is also nearby.

NAVAL: Captain Andrew H. Foote reports for duty at St. Louis, Missouri, eventually replacing the irascible Commander John Rodgers.

September 6

MILITARY: Federal troops under General Ulysses S. Grant advance south from Cairo, Illinois, to Paducah, Kentucky, at the mouth of the Tennessee River, to forestall its capture by Confederates. Grant then appoints General Charles F. Smith to assume command of all Union forces in western Kentucky, and he hastens back to Cairo.

NAVAL: Gunboats *Tyler* and *Lexington* under Commander John Rodgers provide useful support during General Ulysses S. Grant's occupation of Paducah and Smithland, Kentucky, which places the mouths of the Tennessee and Cumberland Rivers under Union control.

September 10

MILITARY: General Albert S. Johnston is appointed commander of all Confederate forces in the West.

- General William S. Rosecrans and 6,000 Union troops attack 2,000 Confederates under General John B. Floyd at Carnifex Ferry in western Virginia. The Federals press forward into a band of the Gauley River and clear a heavily wooded area, capturing many Southern supplies. Floyd hastily shuttles his command across the river under the cover of darkness and destroys the nearby ferry to avoid a pursuit.

- In northwestern Virginia, General Robert E. Lee prepares his command to pass over to the offensive. He formulates a complicated plan to isolate and storm the Union outpost atop Cheat Mountain, for its possession would sever Northern communications along the Staunton-Parkersburg Turnpike.

NAVAL: A Confederate battery is silenced at Lucas Bend, Missouri, by cannon fire from the gunboats *Conestoga* and *Lexington*.

September 11–12

MILITARY: General Robert E. Lee and 15,000 Confederates launch an overly complex and unsuccessful attack upon General J. J. Reynolds and his 2,000 Union troops at Cheat Mountain and Elkwater, northwestern Virginia. The assailants are hampered from the onset by rough terrain and heavy rainfall, and then are misled by prisoners into thinking that they are outnumbered. Lee, alarmed by the supposed approach of Union reinforcements, calls off the attack and unceremoniously withdraws. All told, an inauspicious debut for the Confederacy's premier soldier.

September 13

INDIAN: At Fort Lyon, New Mexico Territory, a dispute between army troops and Navajo Indians over a horse race leads to open fighting, and hostilities commence throughout the territory.

MILITARY: President Jefferson Davis and General Joseph E. Johnston heatedly argue over the Confederate seniority systems respecting generals; this initiates a permanent estrangement between the two men.

- General Sterling Price, seeking to maintain the strategic initiative, marches from Wilson's Creek and besieges Union forces at Lexington, Missouri—midway between Kansas City and St. Louis—with 7,000 Missouri State Guards.

September 14

NAVAL: Lieutenant John H. Russell fights the first pitched naval engagement of the Civil War at Pensacola, Florida, by sailing the frigate *Colorado* past Confederate batteries at night, then leading 100 sailors and marines on a cutting-out expedition that nets several vessels, including the privateer *Judah*.

September 15

MILITARY: General Robert E. Lee, bested at Cheat Mountain, directs the Confederate evacuation from Virginia's northwestern counties. Consequently, he earns the unflattering sobriquet of "Granny." Recent operations have reflected badly upon Lee as a military leader, and plans are afoot to transfer him to a quiet sector in South Carolina.

September 16

MILITARY: Confederate general Sterling Price is reinforced and tightens his grip around Lexington, Missouri, while Union defenders under Colonel James A. Mulligan, 23rd Illinois, await promised assistance from St. Louis. Unbeknownst to him, General John C. Frémont will fail to assist the beleaguered garrison.

NAVAL: The Ironclad Board recommends to Secretary of the Navy Gideon Welles the construction of three new ironclad warships—*Monitor*, *Galena*, and *New Ironsides*. The former is a new and revolutionary turreted design promulgated by Swedish emigré engineer John Ericsson. Moreover, all vessels of this class will profoundly impact the nature of naval warfare.

September 16–17

NAVAL: Landing parties from the screw sloop *Pawnee* go ashore at Beacon Island, North Carolina, destroy enemy cannon, and close off Ocracoke Inlet for blockade runners.

MARINES: The screw steamer *Massachusetts* sends ashore sailors and marines to Ship Island, Mississippi, which will serve as a staging area for the attack on New Orleans, Louisiana.

September 18

MILITARY: Bowling Green, Kentucky, is occupied by Confederate forces under Brigadier General Simon B. Buckner.

- General Sterling Price's Confederates fiercely assail the Union perimeter at Lexington, Missouri, and cut the garrison off from its water supply. At day's end, with few losses to either side, Price calls off the attack and allows the intense heat to do its work.

NAVAL: Flag Officer Samuel F. Du Pont becomes commander of the South Atlantic Blockading Squadron.

September 19

MILITARY: Advancing Confederates under General Felix Zollicoffer attack and drive Union troops from Barboursville, Kentucky. The Southerners then commence erecting strong defensive positions across Cumberland Gap, Bowling Green, and Columbus.

NAVAL: The North Atlantic Blockading Squadron under Commodore Louis M. Goldsborough is ordered to commence operating off the coasts of North Carolina and Virginia.

September 20

MILITARY: Colonel James Mulligan, 23rd Illinois, surrenders 2,800 Union troops at Lexington, Missouri, to General Sterling Price after a nine-day siege. Price's men ingeniously employ dampened bales of hemp as moveable breastworks, which they roll ahead of their advance. General John C. Frémont's unwillingness or inability to lift the siege causes many in St. Louis and Washington, D.C., to question his competence.

September 22

NAVAL: The Gulf Blockading Squadron is entrusted to the command of Flag Officer William W. McKean.

September 23

NAVAL: Flag Officer Louis M. Goldsborough is appointed commander of the North Atlantic Blockading Squadron. The naval blockade of Confederate ports is beginning to assume significant proportions.

September 24–October 1

AVIATION: At Chain Bridge, Virginia, Professor Thaddeus S. C. Lowe takes his balloon aloft and begins relaying artillery coordinates to batteries below. His success lends momentum to the creation of the U.S. Balloon Corps, which sees substantial action in the following months.

September 25

MILITARY: President Jefferson Davis and General Joseph E. Johnston engage in another heated contretemps, this time over Southern strategy and the allocation of resources.

NAVAL: The secretary of the navy instructs Flag Officer Samuel F. Du Pont to enlist African Americans into the naval service, although they are to be paid at the rate of “Ship’s boy.”

September 27

MILITARY: President Abraham Lincoln and General George B. McClellan engage in protracted debate as to resuming offensive operations in Virginia. The general feels that his Army of the Potomac is not yet ready for field operations, whereas Lincoln is taking political heat over its perceived inactivity.

October 1

AVIATION: Inventor and balloonist Professor Thaddeus S. C. Lowe is appointed head of the Union army’s nascent aeronautical section, the U.S. Balloon Corps. It eventually boasts a strength of 50 men and seven balloons.

MILITARY: President Abraham Lincoln appoints General Benjamin F. Butler to command the Department of New England, created largely for the purposes of raising and training new troops for future operations. He also requests action on a large naval expedition to the South Atlantic coast to carve out a coaling station.

- At Centreville, Virginia, President Jefferson Davis and Generals Joseph E. Johnston and Pierre G. T. Beauregard continue arguing over strategy. At length they agree to consolidate their positions and restrain from launching offensive operations into Northern territory until at least the following spring.

NAVAL: Secretary of the Navy Gideon Welles opposes issuing letters of marque and reprisal against the South as they imply de facto recognition of national sovereignty.

- A small Confederate squadron consisting of the side-wheel steamer *Curlew*, the tug *Junaluska*, and the gunboat *Raleigh* attacks and seizes the Union steamer *Fanny* off Pamlico Sound, North Carolina. Many troops are captured along with valuable supplies and some rifled cannon; this is the first Union vessel captured by Southern warships.

October 3

MILITARY: General Joseph J. Reynolds advances from Cheat Mountain with 5,000 men to dislodge a Confederate force gathered at Camp Bartow, along the southern fork of the Greenbrier River, northwestern Virginia. Unable to turn their flank, Reynolds simply withdraws to Cheat Mountain and an impasse settles over the region.

October 4

INDIAN: The Confederacy concludes a treaty with the Shawnee, Seneca, and Cherokee in the Indian Territory, which enables them to recruit volunteer forces to fight in the war.

NAVAL: President Abraham Lincoln approves a contract for constructing the U.S. Navy’s first ironclad warships; among them is John Ericsson’s revolutionary *Monitor*.

October 7

NAVAL: The steam-powered ironclad *Virginia* (née *Merrimack*), completely armored and redesigned by Confederate naval engineer John M. Brooke, makes a brief but ominous debut off Hampton Roads, Virginia.

- President Abraham Lincoln dispatches Secretary of War Simon Cameron with a letter to General Samuel R. Curtis and inquires if General John C. Frémont should be replaced as commanding officer in Missouri.

October 9

MILITARY: General Braxton Bragg orders 1,000 Confederates under General Richard H. Anderson across Pensacola Bay to attack Union-held Fort Pickens on Santa Rosa Island, Florida. The attack stalls in the face of fierce resistance, and a quick sweep by the Federal garrison nets several stragglers as the Southerners withdraw.

October 11

MILITARY: Brigadier General William S. Rosecrans, in light of his exceptional performance, gains appointment as commander of the Department of Western Virginia.

October 12

NAVAL: Newly launched Confederate ram *Manassas* under Commodore George N. Hollins departs New Orleans, Louisiana, and ventures down the Mississippi River accompanied by the armed steamers *Ivy* and *James L. Day*. A stiff engagement develops in which Hollis rams the Union vessels *Richmond* and *Vincennes*, running them aground. The victorious Southerners then depart.

- Confederate agents James Mason and John Slidell evade the Union blockade off Charleston, South Carolina, on board the side-wheel steamer *Theodora*. They are destined for Cuba, there to board the British mail steamer *Trent*.

October 14

MILITARY: To dissuade treasonable activity, President Abraham Lincoln orders General Winfield Scott to suspend writs of habeas corpus anywhere in the region from Washington, D.C., to Maine.

October 16

MILITARY: Men of the 1st Missouri Regiment surprise and capture the Confederate garrison guarding Lexington, Missouri, liberating several Union captives and capturing a quantity of weapons and supplies.

October 17

NAVAL: After some deliberation, Commodore Samuel F. Du Pont informs Secretary of the Navy Gideon Welles that Port Royal, South Carolina, is an inviting target and would constitute an important asset to the blockading effort.

October 18

MILITARY: President Abraham Lincoln meets with his cabinet over continuing dissatisfaction with General in Chief Winfield Scott and his probable retirement. He also experiences problems prying troops from the armies of Generals William T. Sherman and George B. McClellan for the upcoming Port Royal expedition.

October 20

MILITARY: General George B. McClellan, eager to test Confederate responses and pressured by radical Republicans to resume the offensive, orders a politician-turned-soldier, Colonel Charles P. Stone, to dispatch troops from Poolesville, Maryland, and demonstrate along enemy lines near Leesburg, Virginia.

October 21

MILITARY: Acting upon faulty intelligence, Colonel Isaac D. Baker ferries 1,700 men of his Union brigade across the Potomac River at Ball's Bluff, Virginia, beneath a 100-foot-high ledge overlooking that waterway. He does so without proper reconnaissance and remains unaware that strong Confederate forces under Colonel Nathan G. Evans are posted in the woods above him. An unequal battle ensues for three-and-a-half hours until Baker is killed and his command succumbs to panic. The Federals lose nearly 1,000 men, mostly drowned or captured.

- At Wildcat Mountain, southeastern Kentucky, Brigadier General Albin F. Schoepf's Union force of 5,400 men repels a determined Confederate attack against their campsite. Both sides sustain roughly 50 casualties apiece.

October 22

MILITARY: General Thomas J. "Stonewall" Jackson is ordered to lead Confederate forces into the Shenandoah Valley of western Virginia.

October 23

NAVAL: Crew members of the captured Confederate privateer *Savannah* are tried in New York on charges of piracy and threatened with execution. Though convicted, their sentences are never carried out for fear of provoking reprisals against Union naval prisoners.

October 24

MILITARY: President Abraham Lincoln decides to relieve General John C. Frémont of command in Missouri and replaces him with General David Hunter. He also attends funeral services for Colonel Edward D. Baker, a close friend, recently killed at Ball's Bluff, Virginia.

October 25

NAVAL: Swedish inventor and engineer John Ericsson begins supervising construction of his revolutionary, one-turret warship *Monitor* at Greenpoint, New York.

October 28

MILITARY: General Albert S. Johnston arrives and relieves General Simon B. Buckner as commander of the Confederate Army Corps of Kentucky at Bowling Green.

October 29

NAVAL: A huge combined expedition of 17 warships, 25 supply vessels, and 25 transports under Flag Officer Samuel F. Du Pont, conveying General Thomas W. Sherman and 13,000 Federal troops, departs Hampton Roads, Virginia. This force, the largest American armada assembled to date, intends to capture Port Royal, South Carolina, and make a Union lodgement midway between Charleston, South Carolina, and Savannah, Georgia.

October 30

MILITARY: President Jefferson Davis complains to General Pierre G. T. Beauregard about publishing excerpts from his report on the Battle of First Manassas (Bull Run) “to exalt yourself at my expense.” The two leaders are never reconciled.

October 31

MILITARY: The ailing, 75-year-old general in chief, Winfield Scott, once the doyen of his age, voluntarily resigns as head of Union forces. He retires in virtual isolation to the U.S. Military Academy at West Point, New York, for the remainder of the war.

November 1

MILITARY: Thirty-four-year-old George B. McClellan gains appointment as the new general in chief to succeed the ailing Winfield Scott. In light of McClellan’s youth, dash, and reputation for brilliance, much is expected of him.

- General Ulysses S. Grant arrives at Cairo, Illinois, to take charge of the District of Southeast Missouri. Rumpled and nondescript in appearance, he proves himself aggressively disposed and begins formulating plans to evict Confederate forces from their strongpoint along the bluffs at Columbus, Kentucky.

November 2

MILITARY: In Springfield, Missouri, incorrigible General John C. Frémont, who continually ignored direct orders to desist with abolitionist activities, is ordered relieved of command of the Department of the West and is temporarily replaced by General David Hunter.

November 3

MARINES: When the transport *Governor* flounders in a gale off the coast, the marine battalion it conveys is perilously transferred to the frigate *Sabine*; only seven men are lost.

November 4

MILITARY: President Jefferson Davis, frustrated in his inability to reach an agreement with General Pierre G. T. Beauregard over strategy, solicits advice from senior generals Samuel Cooper and Robert E. Lee. He is also increasingly aware of rumors accusing him of political ineptitude.

NAVAL: The huge naval expedition of Commodore Samuel F. Du Pont anchors off Port Royal, South Carolina. Meanwhile, Confederate vessels under Commodore Josiah Tattnall fire upon the Coast Survey ships *Vixen* and *Ottawa* as they reconnoiter the two-mile-wide channel entrance.

November 5

MILITARY: General Robert E. Lee assumes responsibilities as head of the newly constituted Department of South Carolina, Georgia, and East Florida.

- General John C. Frémont, still commanding the Department of the West, orders General Ulysses S. Grant on a diversionary attack against Columbus, Kentucky. He anticipates this maneuver will keep Confederate forces preoccupied and unable to cross the Mississippi River into Missouri.

NAVAL: The screw sloop *Pawnee*, and gunboats *Ottawa*, *Pembina*, and *Seneca*, attack and reduce a Confederate squadron at Port Royal Sound, South Carolina, clearing the way for a major amphibious assault there.

November 6–7

MILITARY: Approximately 3,000 Union troops under General Ulysses S. Grant debark at Hunter's Farm, three miles above his objective at Belmont, Missouri. His opponent, General Gideon Pillow, commands 2,500 men, and Grant's enthusiastic soldiers storm into their camp. Despite entreaties from Grant and other officers, order breaks down and they embark on a headlong plundering spree that allows Pillow to be reinforced by Confederates under General Leonidas K. Polk. Grant has little choice but to cut his way through enemy lines to the riverbank and escape, but the affair demonstrates his willingness to undertake offensive operations.

NAVAL: The South Atlantic Blockading Squadron of 77 vessels under Commodore Samuel F. Du Pont debarks the 16,000 Federal troops of General Thomas W. Sherman off Port Royal Sound, South Carolina, half-way between Charleston and Savannah. The Union thus acquires a second lodging on the Confederate coastline; in time, Port Royal/Hilton Head will emerge as a major entrepot for the blockading squadron.

- The utility of river gunboats is handily demonstrated at the Battle of Belmont, Missouri, when the *Lexington* and *Tyler* help cover the retreat of General Ulysses S. Grant's army to the Mississippi River.

November 8

MILITARY: In Floyd County, Kentucky, Union forces under General William Nelson attack invading Confederates and defeat them at Ivy Mountain; the Southerners withdraw into Virginia.

NAVAL: The screw sloop *San Jacinto* under Captain Charles Wilkes boards the British mail packet *Trent* in Old Bahama Channel and forcibly removes Southern envoys James M. Mason and John Slidell. This is an egregious violation of international law and threatens to embroil the United States in a new war with Great Britain.

MARINES: The marine battalion saved at sea by the frigate *Sabine* deploys at Fort Walker, Hilton Head, South Carolina, as its garrison.

November 9

MILITARY: Federal troops under General Thomas W. Sherman, assisted by gunboats, advance from Port Royal, South Carolina, and capture the city of Beaufort on the Broad River. Confederate department commander, General Robert E. Lee, expresses concern to superiors in Richmond over the Union's ability to land troops anywhere, at will.

- In a major shake-up of command, General Henry W. Halleck becomes head of Federal troops in the newly designated Department of the Missouri (Missouri, Arkansas, Illinois, and western Kentucky), while General Don Carlos Buell replaces General William T. Sherman as head of the Department of the Cumberland.

NAVAL: Union gunboats seize Beaufort, South Carolina, thereby cutting communications between Charleston and Savannah.

November 11

AVIATION: Professor Thaddeus S. C. Lowe, Union chief of army aeronautics, rides an observation balloon launched from the gunboat *G. W. Parke Custis* while anchored in Chesapeake Bay. Meanwhile, a torchlight parade unfolds in Wash-

ington, D.C., in honor of General George B. McClellan, now hailed as the savior of the Republic.

MILITARY: General George B. Crittenden assumes command of Confederate troops in the District of Cumberland Gap, Tennessee. His chief subordinate, General Felix K. Zollicoffer, is assigned to hold southeastern Kentucky but is also ordered not to expose his men by remaining south of the Cumberland River.

November 12

NAVAL: The British-built steamer *Fingal* arrives at Savannah, Georgia, with a store of military supplies. The vessel is subsequently taken into Confederate service as the commerce raider *Atlanta*.

November 13

MILITARY: George B. McClellan contemptuously snubs President Abraham Lincoln, when the latter calls upon his headquarters, by retiring to bed. Henceforth, the general will be summoned to the White House when consultations become necessary.

November 15

INDIAN: A mixed force of 1,400 Texans under Colonel Douglas H. Cooper and allied Cherokee, Choctaw, and Chickasaw Indians arrives at Canadian Creek, Indian Territory (Oklahoma), intending to fight the 1,000 Union-led Creek gathered there under Chief Opothleyahola. However, they discover that the enemy has slipped away, so Cooper orders a pursuit toward nearby Round Mountain.

MILITARY: President Abraham Lincoln and his cabinet begin focusing their attention upon the city of New Orleans, Louisiana, the Confederacy's second largest city and a port of strategic significance. In choosing an experienced leader to spearhead an amphibious expedition and capture it, Secretary of the Navy Gideon Welles selects Captain David G. Farragut, a 60-year-old Tennessean known for his aggressive disposition.

NAVAL: The *San Jacinto* under Captain Charles Wilkes arrives at Fortress Monroe, Virginia, with captured Confederate emissaries James M. Mason and John Slidell. This is the government's first inkling of what had transpired at sea, and Wilkes is hailed in the press as a hero.

November 18

INDIAN: A detachment of the 9th Texas under Colonel Douglas H. Cooper, assisted by allied Indians, skirmishes with Creek warriors under Opothleyahola at Round Mountain, Indian Territory (Oklahoma). The Federal Indians are driven off, yet skillfully extricate themselves and retire.

NAVAL: Commodore David D. Porter is tasked with acquiring and supplying numerous gunboats for the long-anticipated Union campaign against New Orleans, Louisiana.

November 20

MILITARY: General George B. McClellan, a superb organizer and disciplinarian, reviews 70,000 men of the Army of the Potomac near Washington, D.C. In contrast to the amateurish forces hastily gathered the previous summer, visitors favorably comment on the military deportment and martial ardor of all ranks.

November 21

MILITARY: Confederate general Lloyd Tilghman becomes commander of strategic Forts Henry and Donelson on the Tennessee and Cumberland Rivers, respectively. These are lynchpins of Confederate defense in the central theater, and their retention is critical to the Southern war effort.

- The Confederate cabinet is reorganized, with Judah P. Benjamin succeeding LeRoy P. Walker as secretary of war.

November 22

NAVAL: Off Pensacola, Florida, the steam frigate *Niagara* and steam sloop *Richmond*, assisted by several army batteries, commence a two-day bombardment of Confederate-held Fort McRee in the Pensacola Navy Yard.

November 24

MILITARY: Confederate colonel Nathan B. Forrest mounts a prolonged cavalry raid against Caseyville and Eddyville, Kentucky, initiating what will become a spectacular partisan career.

NAVAL: The *San Jacinto* under Captain John Wilkes drops anchor in Boston, Massachusetts, whereupon captured Confederate envoys James M. Mason and John Slidell are imprisoned at Fort Warren.

November 25

MILITARY: Confederate secretary of war Judah P. Benjamin orders pro-Union guerrillas captured in Tennessee to be tried and executed if found guilty of burning bridges.

November 26

NAVAL: A banquet honoring Captain Charles Wilkes is held in Boston as diplomats begin weighing the international ramifications of his actions.

December 2

TECHNOLOGY: Army units based at Fort Defiance, Arizona Territory, begin using the so-called Bain Code (modified Morse Code) in telegraph communications for the first time. As the war grinds on, the telegraph will play an increasingly vital role in relaying instant communications between army headquarters.

MILITARY: A report by Secretary of War Simon Cameron reveals that United States forces comprise 20,334 soldiers and 640,637 volunteers.

NAVAL: Secretary of the Navy Gideon Welles announces the capture of 153 Confederate vessels. Moreover, when the current spate of construction projects is finished, the U.S. Navy will consist of 264 ships mounting 2,557 guns.

December 4

MILITARY: From his headquarters in St. Louis, Missouri, General Henry W. Halleck condones and authorizes all punitive measures against Confederate sympathizers within his jurisdiction. These include the death penalty for any citizen caught assisting rebel guerrillas.

December 7

NAVAL: The *Santiago de Cuba* under Commander Daniel B. Ridgley accosts the British ship *Eugenia Smith* at sea and removes Confederate purchasing agent J. W. Zacharie of New Orleans, Louisiana. Coming on the heels of the *Trent* Affair, this act exacerbates tensions between the two nations.

December 8

INDIAN: Pro-Union Creek leader Opothleyahola and 1,000 warriors arrive at Bird Creek (Chusto-Talasah), Indian Territory (Oklahoma), and assume defensive positions. The chief then dispatches a messenger to the hostile tribes indicating that he does not wish to spill blood, but his determination to fight unsettles many of Colonel Douglas H. Cooper's Indians. The Southern Indians begin deserting Cooper.

MARINES: A detachment of sailors and marines from Savannah captures and garrisons Tybee Island off Savannah, Georgia.

December 9

INDIAN: Pro-Confederate Cherokee, Chickasaw, and Choctaw, assisted by the 9th Texas under Colonel Douglas H. Cooper, attack pro-Union Creek under Opothleyahola at Bird Creek (Chusto-Takasah) in the Indian Territory. Resistance is fierce initially, but gradually the Creek flanks retreat and Opothleyahola's center also falls back. However, the Confederates remain dogged by supply shortages and are unable to pursue the fleeing Creek.

MILITARY: In light of recent military disasters at Bull Run and Ball's Bluff, Congress votes 33 to 3 to establish an oversight committee to monitor military events. This becomes infamously known as the Joint Committee on the Conduct of the War and proves to be the bane of many senior Union leaders.

December 10

NAVAL: Otter Island in the Ashepoo River, South Carolina, is captured by landing parties from the screw steamer *Isaac Smith*.

December 12

MARINES: A detachment of marines from the *Dale* captures a small Confederate steamer on the Ashpoo River, South Carolina, then proceeds to burn a small enemy post.

December 13

MILITARY: Newly appointed general Robert H. Milroy elects to attack Confederate positions atop Allegheny Mountain in northwestern Virginia. Laboring up the heavily wooded slopes, he is handily repulsed, at which point the rebels counter-attack downhill and scatter their Union antagonists.

December 14

MILITARY: General Henry H. Sibley assumes control of Confederate forces along the Upper Rio Grande River, along with the New Mexico and Arizona Territories. He begins military preparations for an offensive to secure the region.

December 17

NAVAL: Union blockaders sink seven old ships filled with stones off the entrance to Savannah harbor, Georgia, initiating what becomes known as the "Stone Fleet"

- Commodore Andrew H. Foote institutes regular Sunday service onboard his fleet of gunboats on the Cumberland River.

December 20

MILITARY: The influential Joint Committee on the Conduct of the War is formally instituted in the Congress following the disastrous rout at Ball's Bluff the previous

October. It is composed mainly of Radical Republicans like Benjamin F. Wade and Zachariah Chandler of Michigan, and tasked with closely scrutinizing the conduct of the president and his senior commanders throughout the war.

- At Dranesville in northern Virginia, a brigade of Pennsylvania troops under Brigadier General Edward O. C. Ord engages Confederate cavalry under Brigadier General J. E. B. Stuart and drives them off with 200 casualties.

December 21

NAVAL: Congress institutes the Navy Medal of Honor as the nation's highest military award granted to that service. Initially it is intended for enlisted ranks, and officers will not be eligible to receive it until 1915. There will be 375 recipients during the Civil War.

December 22

MILITARY: General Henry W. Halleck reiterates orders that any individuals found sabotaging Union railroads or telegraph lines will be immediately shot without civil trial.

December 26

NAVAL: Commodore Josiah Tattnall leads a small squadron of Confederate vessels out of the mouth of the Savannah River, Georgia, and temporarily drives off Union blockaders.

December 28

MILITARY: Colonel Nathan B. Forrest leads a detachment of 300 Confederate cavalry toward Sacramento, Kentucky. En route he encounters a smaller force of 168 Union troopers under Major Eli Murray. The Federals charge headlong into twice their number of Southerners, then are assailed on both flanks and scattered. Triumphant in the first of his many scrapes, the future "Wizard of the Saddle" returns to Greeneville, hotly pursued by 500 cavalry under Colonel James Jackson, 3rd Kentucky Cavalry.

December 31

MILITARY: Noting the inactivity of Union forces in the East, a despondent President Abraham Lincoln anxiously cables General Henry W. Halleck in St. Louis, Missouri, and hopes to hear of offensive operation in that theater at least. "Are you and General Buell in concert?" he inquires.

NAVAL: Gunboats *Ottawa*, *Pembina*, and *Seneca* put landing parties ashore at Port Royal Ferry on the Coosaw River, South Carolina; the move thwarts Confederate attempts to isolate Union forces on nearby Port Royal Island.

- Landing parties from the side-wheel steamer *Water Witch*, the screw steamer *New London*, and *Henry Lewis* attack and capture Biloxi, Mississippi, destroying a Confederate battery and schooner.

1862

January 1

MILITARY: General in Chief George B. McClellan remains sidelined by illness as President Abraham Lincoln frets over his continuing military inactivity.

- General Thomas J. Jackson, eager to secure the lightly defended town of Romney, in northwestern Virginia, orders 8,500 Confederates under General William

W. Loring from their winter abode at Winchester. No sooner do they depart than temperatures plunge to freezing and the men, lacking heavy overcoats, suffer severely.

January 6

MILITARY: President Abraham Lincoln ignores cries by Radical Republicans to replace General George B. McClellan, then ill with typhoid fever, over allegations of military inactivity. Lincoln continues urging General Don Carlos Buell, commanding the Army of the Ohio in Kentucky, to assume an offensive posture.

NAVAL: In response to critical shortages of trained manpower, Commodore Andrew H. Foote suggests drafting soldiers to serve on the Union gunboat fleet. The army proves reluctant to comply, and General Ulysses S. Grant suggests that guardhouses be emptied to assist the navy.

January 7

NAVAL: Lieutenant Samuel L. Phelps, commanding the gunboat *Conestoga*, conducts a reconnaissance of Confederate-held Forts Henry and Donelson on the Cumberland River, Tennessee. A Union offensive is pending.

January 9

NAVAL: Flag Officer David G. Farragut of the screw sloop *Hartford* formally takes charge of the Western Gulf Blockading Squadron. Thus situated, he is tasked with orchestrating the capture of New Orleans, Louisiana, an essential facet of overall Union strategy. Farragut, cognizant of the dire necessity for utmost secrecy, instructs his wife to burn any correspondence she receives from him.

January 10

MILITARY: President Abraham Lincoln expresses alarm to Secretary of War Simon Cameron over the apparent lack of military activity in the West.

- Believing themselves heavily outnumbered, Union forces abandon strategic Romney, in northwestern Virginia, to advancing Confederates under General William W. Loring. Loring also enters into a bitter contretemps with General Thomas J. Jackson over charges he abused his soldiers by marching them during bitterly cold weather.
- Confederate forces recover from their earlier reverse at Ivy Mountain and re-invade eastern Kentucky. They are met at Middle Creek by a brigade of Union troops under Colonel James A. Garfield (a future president) and are pushed back once again; both sides incur relatively light losses.

January 11

MILITARY: Secretary of War Simon Cameron resigns from office amidst charges of corruption and mismanagement. President Abraham Lincoln subsequently nominates former attorney general Edwin M. Stanton, a confidant of General George B. McClellan, as his successor. The appointment proves fortuitous, as Stanton infuses military administration with energy and efficiency.

NAVAL: Flag Officer Louis M. Goldsborough assembles a large naval expedition of 100 vessels off Hampton Roads.

- On the Mississippi River, gunboats *Essex* and *St. Louis* bombard Confederate small craft near Lucas Bend, Missouri; the Southerners are obliged to withdraw.

January 12

NAVAL: The naval expedition of Flag Officer Louis M. Goldsborough sails from Hampton Roads, Virginia, in preparation for an attack upon strategic Roanoke Island, North Carolina. He also conveys 15,000 Union troops under General Ambrose E. Burnside.

January 13

MILITARY: President Abraham Lincoln again urges Generals Henry W. Halleck and Don Carlos Buell to initiate offensive operations in the western theater.

- In Virginia, General George B. McClellan refuses to consult with either the president or other officials as to his impending plan of operations. Moreover, he disagrees with the president's strategy of attacking along a broad front.

NAVAL: Lieutenant John L. Worden, still convalescing from months of Confederate captivity, is appointed commander of the revolutionary new vessel *Monitor*, then under construction on Long Island, New York.

- Commodore Louis M. Goldsborough and his 100-ship expedition arrive off Hatteras Inlet, North Carolina. Once on station, he reiterates orders that gunners must be completely trained and familiar with the new Bormann fuses fitted to 9-inch shrapnel shells.

MARINES: A detachment from the steamer *Hatteras* lands and burns Confederate supplies gathered at Cedar Keys, Florida.

January 15

MILITARY: In Washington, D.C., Edwin M. Stanton is confirmed as the 26th secretary of war, replacing Simon Cameron. His first task is to tackle endemic corruption by reforming contractual procedures.

January 16

MILITARY: General Felix K. Zollicoffer disobeys orders from General George B. Crittenden by positioning Confederate troops north of the Cumberland River, Kentucky, where they must fight with a river at their backs. Shortly after Crittenden arrives with reinforcements, he concludes that the water is running too high to safely recross. He thus intends to make the most of his subordinate's mistake by attacking a nearby Union column at Mill Springs.

NAVAL: The screw sloop *Hartford* dispatches sailors and marines ashore at Cedar Keys, Florida; they destroy a Confederate battery, seven vessels, a railroad depot, and a telegraph office. This action underscores the vulnerability of the Southern coastline to amphibious attack.

- At Cairo, Illinois, Flag Officer Andrew H. Foote announces that seven of the new Eads gunboats have been commissioned and are now in service. These will prove instrumental in turning the tide of the war in the West.

January 17

NAVAL: Federal gunboats *Conestoga* and *Lexington* conduct a preliminary reconnaissance of the Tennessee River past Confederate-held Fort Henry. The detailed information they procure helps formulate plans for its capture.

January 18

MILITARY: General George H. Thomas, having enticed Confederate troops north of the Cumberland River to attack him, encamps 4,000 Union troops at Mill

Springs, Kentucky. Reconnaissance parties dispatched toward the river confirm that General George B. Crittenden's Confederates are approaching and will strike the Federals at dawn.

January 19

MILITARY: A force of 4,000 Confederates under Generals Felix K. Zollicoffer and William H. Carroll attacks the Union encampment at Mill Springs (Logan's Cross Roads), Kentucky. Braving heavy rain and mud, the Southerners overrun the Union pickets at daybreak and drive them headlong into the main defensive line commanded by General George H. Thomas. The Confederates charge one more time but Thomas, expecting the move, has stationed the newly arrived brigade of General Samuel P. Carter obliquely, and they catch the Southerners in a deadly enfilade fire. Zollicoffer then mistakenly gallops toward the Union position in a fog and is shot dead from the saddle. Crittenden's men break and flee back to Beech Grove with Thomas in hot pursuit. Confederate losses are 125 killed, 309 wounded, and 99 missing to 40 Union dead, 207 wounded, and 15 missing. Moreover, the Southerners lose most of their supplies and all their artillery.

January 20

NAVAL: At the behest of Secretary of the Navy Gideon Welles, the Union Gulf Blockading Squadron is reorganized into two distinct formations: the East Gulf Blockading Squadron and the West Gulf Blockading Squadron, with the latter commanded by Commodore David G. Farragut. His fleet consists of 17 steam warships and 19 mortar boats under his foster brother, Commander David D. Porter.

January 23

MILITARY: As General Thomas J. Jackson leads his Stonewall brigade out from Romney, northwestern Virginia, General William W. Loring feels that his own command has been deliberately left in an exposed position only 20 miles from Union lines. Loring and other officers then violate the chain of command by petitioning friends in the Confederate Congress for a change in orders.

January 26

MILITARY: General Pierre G. T. Beauregard transfers from the eastern theater to the West, where he is subordinate to General Albert S. Johnston. Meanwhile, command in Virginia remains with General Joseph E. Johnston.

NAVAL: At Wassaw Sound, Georgia, the gunboats *Ottawa* and *Seneca* escort a convoy carrying 2,400 soldiers under General Horatio G. Wright. The force conducts a reconnaissance of the region surrounding Fort Pulaski, then returns unharmed.

January 27

MILITARY: President Abraham Lincoln, exasperated by the lack of initiative displayed by Union commanders, draws up General Order No. 1. This mandates a general offensive against the Confederacy from various points along the line. February 22—George Washington's birthday—is selected as the deadline to commence combined operations by both army and navy forces.

January 28

NAVAL: Flag Officer Andrew H. Foote advises General Henry W. Halleck to begin riverine operations against Forts Henry and Donelson soon, before the water levels of the Tennessee and Cumberland Rivers begin subsiding.

January 30

MILITARY: General Henry W. Halleck, at St. Louis, Missouri, finally authorizes combined operations against Confederate strong points at Forts Henry and Donelson. General Ulysses S. Grant, eager to assume the offensive, brooks no delay in putting his command in motion.

NAVAL: John Ericsson's revolutionary ironclad *Monitor*, derided by many onlookers as "a cheese box on a raft," is launched at Greenpoint, Long Island, amidst thunderous applause. Trial and acceptance runs begin immediately.

January 31

MILITARY: Confederate secretary of war Judah P. Benjamin orders General Thomas J. Jackson to relocate those portions of his command stationed at Romney in northwestern Virginia, to Winchester. Jackson, now aware that General William W. Loring has violated the chain of command behind his back, sullenly complies—then resigns from the army. Fortunately for the Confederacy, President Jefferson Davis refuses to accept this and, assisted by Virginia governor John Lechter, he persuades Jackson to remain in uniform.

- President Abraham Lincoln finally issues his Special War Order No. 1, which requires an advance on Manassas Junction, Virginia, by the Army of the Potomac, no later than February 22, 1862. General George B. McClellan ignores the directive and continues honing his recruits to a fine edge.

February 1

MILITARY: Confederate forces under General Henry H. Sibley advance from El Paso, Texas, into New Mexico, intending to conquer that region for the South.

February 2

MILITARY: General Ulysses S. Grant departs Cairo, Illinois, on his campaign against Confederate-held Fort Henry on the Tennessee River. He embarks 17,000 troops of his Army of West Tennessee on river transports, accompanied by Commodore Andrew H. Foote's gunboats. Grant intends to land near Panther Creek west of the fort and cut off the garrison's escape.

February 3

MILITARY: President Abraham Lincoln and General George B. McClellan continue at loggerheads over an exact timetable for resuming offensive operations into Virginia. They also differ on strategy, with the president leaning toward a direct, overland campaign while the general wishes to sidestep Confederate defenses by landing on the enemy's coast.

NAVAL: The federal government finally resolves to treat Confederate privateersmen as prisoners of war rather than prosecute them as pirates. This forestalls any chance that Union naval personnel might be hanged in retaliation.

February 4

MILITARY: Congress authorizes President Abraham Lincoln to seize control of all railroads to support the war effort. An effort is next undertaken to organize all such transport into a single, military-administered unit.

NAVAL: The gunboat squadron of Commodore Henry H. Foote begins sounding out Confederate defenses at Fort Henry on the Tennessee River. Several moored Southern mines ("torpedoes") have been worked free by the fast current and are

examined closely by U.S. naval personnel. Nearby Fort Heiman is also quickly abandoned by the Southerners.

February 6

MILITARY: General Ulysses S. Grant commences his strategic flanking movement with a concerted drive against Confederate-held Fort Henry on the Tennessee River. Meanwhile, Southern general Lloyd Tilghman hurriedly evacuates his 3,400-man garrison to Fort Donelson, 10 miles distant on the Cumberland River, before his escape can be blocked. Victory here grants Union forces control of the upper Tennessee River.

NAVAL: Flag Officer Andrew H. Foote leads a flotilla of four ironclads and three wooden gunboats against Fort Henry on the Tennessee River, and opens fire at a range of 1,700 yards. General Lloyd Tilghman remains behind with 100 artillerymen and 17 cannon to mount an “honorable defense” while his Confederate garrison escapes intact. Fort Henry is subsequently renamed Fort Foote.

February 7

MILITARY: General Ulysses S. Grant, having secured Fort Henry, maps out his strategy for attacking Fort Donelson, Tennessee, on the Cumberland River. Unlike Fort Henry, this is a spacious, well-sited position encompassing 100 acres within its outer works, being both amply garrisoned and armed with heavy cannon.

NAVAL: A large naval expedition under Flag Officer Louis M. Goldsborough departs its anchorage at Hatteras Inlet, North Carolina, steams into Croatan Sound, and attacks Roanoke Island. Inexplicably, this strategic point is undermanned and poorly situated to receive an attack of this magnitude.

- The gunboat *Conestoga* engages enemy forces on the Tennessee River, forcing the Southerners to burn three steamers to prevent them from being captured.

February 8

MILITARY: Three Union brigades under Generals Jesse Reno, John G. Parke, and John G. Foster, totaling 10,000 men, advance upon Confederate defensive works on the northern end of Roanoke Island, North Carolina. General Ambrose Burnside is the overall commander. Southern positions crumble under the onslaught, and they surrender 2,500 prisoners. Moreover, possession of Roanoke Island impedes Southern communications with Norfolk, Virginia, leading to that city's eventual abandonment, and renders the North Carolina coastline open to further assaults.

- The recent fall of Fort Henry, Tennessee, prompts General Albert S. Johnston to order Confederate forces under General William J. Hardee to depart the south bank of the Tennessee River and march for Nashville.
- In light of the Roanoke disaster, the Confederate Congress tasks an investigative committee to explore the behavior of General Henry A. Wise along with allegations of incompetence against General Benjamin Huger, overall theater commander. Secretary of War Judah P. Benjamin is also slated for some scrutiny. Moreover, as the administration of President Jefferson Davis reels from the fall of Fort Henry, a pervasive sense of gloom settles upon the new nation.

February 9

MILITARY: General Gideon J. Pillow supersedes Generals Bushrod J. Johnson and Simon B. Buckner as commander of Confederate-held Fort Donelson, Tennessee.

February 10

MILITARY: Union general Samuel R. Curtis, commanding the 12,000-man Army of the Southwest, departs Rolla, Missouri, and marches against the Missouri Home Guard under General Sterling Price. He intends to drive them into Arkansas to preclude any chance of them interfering with the main Union thrust underway down the Mississippi River.

NAVAL: Secretary of the Navy Gideon Welles orders Commander David D. Porter to procure 22 sailing vessels and seven steamers to outfit a mortar squadron he will command during operations at New Orleans.

- Captain Franklin Buchanan (C.S.N.) complains that he still lacks the trained crewmen to render his nearly completed steam ram *Virginia* operational. However, he is being pressured to break the Union blockade of Norfolk, Virginia, as soon as possible.
- Naval vessels under Flag Officer Louis M. Goldsborough pursue Confederate gunboats up the Pasquotank River, North Carolina, and also destroy land batteries in the town of Elizabeth City. During this action, quarter gunner John Davis wins the navy's first Medal of Honor for passing gunpowder to the gun crews during a fire on the screw steamer *Valley City*. A force of five Confederate "cottonclads" is also destroyed by prompt naval action.

February 11

MILITARY: Union forces under Generals John A. McClernand and Charles F. Smith begin marching 15,000 men overland from Fort Henry to Fort Donelson on the Cumberland River, Tennessee, despite heavy rains. The fort's garrison, meanwhile, receives a new commander, General John B. Floyd.

- The U.S. Military Rail Road is established by Secretary of War Edwin M. Stanton. It is placed under the direction of Daniel McCallum, a former railroad executive. This is intended to ensure the safe and efficient coordination of military transport along thousands of miles of track nationwide. The rail-borne Union logistics effort will achieve a degree of effectiveness unmatched by its Southern counterpart. At the time, this is the largest unified railroad system in the world.

February 12

MILITARY: General Ulysses S. Grant directs 15,000 Union troops marching overland to invest Fort Donelson on the Cumberland River, Tennessee, now defended by 21,000 Confederates under General John B. Floyd. The Federals are directed to probe Southern defenses under the watchful eyes of Generals John A. McClernand and Charles F. Smith, in concert with various gunboats offshore.

February 14

NAVAL: At 3:00 P.M., Commodore Andrew H. Foote's gunboat flotilla commences bombarding Fort Donelson on the Cumberland River, Tennessee, at one point closing to within 400 yards. However, the Confederate guns, situated on a 150-foot-high bluff overlooking the river, are well served and subject the Union fleet to a plunging fire. The *Louisville* and *St. Louis* are badly damaged, and Foote receives a foot injury that will force him to retire.

February 15

MILITARY: At 6:00 A.M., Confederate defenders under Generals John B. Floyd and Gideon J. Pillow suddenly sortie from Fort Donelson, Tennessee, in a bid to

escape. Their attack penetrates the division of General John A. McClernand, but then stalls once Confederate leaders begin arguing among themselves what to do next. Meanwhile, General Ulysses S. Grant, who is on the river conferring with Commodore Henry H. Foote, hastily repairs back to camp and organizes a sharp counterattack that drives the Southerners back into their post.

- General Albert S. Johnston arrives in Nashville, Tennessee, to coordinate the rapidly crumbling Confederate line. As a precaution, Governor Isham Harris removes all his state papers and flees south.
- A Confederate column of 3,000 men under General Henry H. Sibley marches from Mesilla, New Mexico Territory, against Union-held Fort Craig. That post is presently garrisoned by 1,000 regulars under Colonel Edward R. S. Canby.

February 16

MILITARY: The Confederate bastion of Fort Donelson, Tennessee, surrenders to General Ulysses S. Grant. Previously, Generals John B. Floyd and Gideon J. Pillow had abandoned their command and ignominiously fled, leaving General Simon B. Buckner to capitulate. The victorious Grant takes 15,000 Southerners captive, along with 20,000 stands of arms, 48 field pieces, 57 heavy cannon, and considerable supplies. For winning the first significant land action of the West, he is lionized in the newspapers as “Unconditional Surrender” Grant, and will subsequently gain promotion to major general.

- The Confederate column of General Henry H. Sibley arrives outside Fort Craig, New Mexico Territory, commanded by his brother-in-law, Colonel Edward R. S. Canby. Sibley considers the position too strong to attack directly and decides to bypass it, possibly to lure the garrison out into the open on nearby flood plains.

February 17

NAVAL: In Norfolk, Virginia, the formidable ironclad ram *Virginia* is commissioned—with the equally redoubtable Captain Franklin Buchanan at the helm.

February 19

MILITARY: The Confederate Congress in Richmond, Virginia, orders the release of 2,000 Federal prisoners.

- Union troops under General Charles F. Smith seize and occupy Clarksville, Tennessee, along with nearby Fort Defiance.
- General Henry H. Sibley orders his Confederate column of 3,000 men across the Rio Grande River at Valverde Ford, five miles north of Union-held Fort Craig, New Mexico. As anticipated, Colonel Edward R. S. Canby sorties his own 2,000-man garrison—mostly untrained New Mexico volunteers—and marches hard to prevent the Southerners from crossing.

NAVAL: The new Union ironclad *Monitor* commences its sea trials in New York harbor.

- Commodore Andrew H. Foote’s gunboats assist in the capture of Fort Defiance and Clarksville, Tennessee, which Confederates hastily evacuate upon his approach. The commodore then urges General William F. Smith to advance quickly upon Nashville while the Cumberland River is running high.

February 20

NAVAL: Aware that the Confederates are planning to unleash the ironclad *Virginia*, Secretary of the Navy Gideon Welles urgently orders the new vessel *Moni-*

tor to sail from New York for Hampton Roads, Virginia. A monumental clash is in the offing.

- Commodore David G. Farragut arrives at Ship Island, Mississippi, and prepares to launch what Secretary of the Navy Gideon Welles deems “the most important operation of the war”—the expedition against New Orleans, Louisiana.

February 21

MILITARY: Union troops under Colonel Edward R. S. Canby engage General Henry H. Sibley’s marauding Confederates at Valverde, New Mexico Territory, five miles north of strategic Fort Craig. After a stout and indecisive fight, Canby disengages and marches back to the fort, which is still a menace to Confederate lines of communication.

- Colonel Charles P. Stone is removed from command and arrested on orders from the Committee on the Conduct of the War. He is charged with betraying troops defeated at Ball’s Bluff, Virginia, the previous October and is imprisoned 189 days without trial.

NAVAL: Newly promoted flag officer David G. Farragut, commanding the screw sloop *Hartford*, arrives to take command of the West Gulf Blockading Squadron prior to operations against New Orleans, Louisiana.

February 22

MILITARY: In Washington, D.C., War Department General Order 19 allows the placement of battle names on the regimental colors of all units engaged.

- The U.S. Military Telegraph is created by Secretary of War Edwin M. Stanton to oversee and coordinate all military telegraphic communications.

February 23

MILITARY: General Benjamin F. Butler is tapped to serve as commander of the new Department of the Gulf.

- General Albert S. Johnston takes command of the Confederate Central Army at Murfreesboro, Tennessee, and begins marshaling his forces.
- General John Pope becomes commander of the Union’s Army of the Mississippi at Commerce, Missouri.

February 24

MILITARY: Union general William Nelson, assisted by the gunboat *Cairo*, bloodlessly occupies Nashville, Tennessee. This is the first Southern state capital, and a significant industrial center, captured by the North. Thereafter it serves as a base of operations and an entrepot for the Army of the Ohio under Don Carlos Buell.

NAVAL: Captain Franklin Buchanan of the *Virginia* is ordered by Confederate secretary of the navy Stephen R. Mallory to sortie his James River Squadron against Union vessels anchored off Hampton Roads, Virginia, as soon as practicable.

February 25

NAVAL: The new Union ironclad *Monitor* is commissioned at Long Island, New York, with Lieutenant John L. Worden commanding. It is a revolutionary design featuring a single, rotating turret housing two 11-inch Dahlgren smoothbore cannon. Being mostly underwater, it also employs a forced-draft ventilation system for the crew.

March 1

MILITARY: General Pierre G. T. Beauregard begins distributing his Confederate troops along an arc stretching from Columbus, Kentucky, past Island No. 10 on the Mississippi River, and Fort Pillow, Tennessee, as far south as Corinth, Mississippi. General Albert S. Johnston also starts moving his command from Murfreesboro, Tennessee, toward an eventual rendezvous with Beauregard at Corinth.

March 2

MILITARY: Confederate forces under General Leonidas K. Polk finally abandon their strongpoint at Columbus, Kentucky, and withdraw south. The garrison and its 140 cannon are subsequently relocated across the Mississippi River to New Madrid, Missouri, and Island No. 10, under General John P. McCown.

NAVAL: Union gunboats *Cincinnati* and *Louisville* make a reconnaissance in force of Confederate positions at Columbus, Kentucky. The Southerners, correctly anticipating a Federal move upon their works, begin evacuating that position.

March 3

NAVAL: A naval expedition under Flag Officer Samuel F. Du Pont attacks and captures Cumberland Island and Sound, Georgia, along with Fernandina and Amelia Islands, Florida. Fort Clinch, seized by a crew from the *Ottawa*, is the first Federal installation retaken during the war.

March 4

MILITARY: General Earl Van Dorn marches 16,000 men from the Boston Mountains, Arkansas, toward the Missouri border. He is determined to engage the smaller Union army of General Samuel R. Curtis somewhere in the extreme northwest corner of Arkansas.

MARINES: Landing detachments from *Wabash* and *Susquehanna* occupy Fernandina, Florida, while others from the sloop *Mohican* capture nearby Cumberland Island, Georgia.

March 6

MILITARY: General Samuel R. Curtis and 10,000 Union troops entrench along Sugar Creek, near Pea Ridge and Elkhorn Tavern, Arkansas, in anticipation of a major Confederate assault. General Earl Van Dorn then arrives and begins testing the Northern position, finding it too strong to be assailed frontally. He orders his men on a night march around Curtis to cut him off from Missouri and to attack him from behind.

March 7

MILITARY: Confederate forces under General Earl Van Dorn conduct a complicated night march around Pea Ridge, Arkansas, to catch the Union Army of the Southwest from behind. However, General Samuel R. Curtis quickly perceives the danger and simply orders his entire command to perform an “about face.” This move immediately negates whatever advantage Van Dorn’s wearying maneuver sought to achieve. Action commences across the line when General Sterling Price’s Missourians launch two desperate charges and are heavily repelled. A final assault at sunset pushes the Union line back 800 yards but fails to break it.

March 8

MILITARY: Fighting resumes at Pea Ridge, Arkansas, once Confederate artillery bombards the position of General Samuel R. Curtis, who then constricts and consolidates 11,000 men. Curtis subsequently deduces that the Southerners are nearly out of ammunition and attacks across the line, driving Van Dorn's 18,000 soldiers off in confusion. Pea Ridge is the first major Union victory in the far West and thwarts Confederate hopes of invading Missouri for another two years.

- President Abraham Lincoln issues General Order No. 2, which reorganizes the Army of the Potomac into four corps. It also stipulates that one of these corps be detached for the purpose of defending Washington, D.C., and the assignment falls upon General Irvin McDowell's command.

NAVAL: The ironclad ram *Virginia* under Captain Franklin Buchanan sorties from Norfolk, Virginia, and engages wooden vessels of the Union blockading squadron

**Buchanan, Franklin (1800–1874)***Confederate admiral*

Franklin Buchanan was born in Baltimore, Maryland, on September 17, 1800, and in January 1815 he commenced his lengthy naval career by becoming a midshipman. He completed several Mediterranean cruises, handled his affairs competently, and by 1841 had risen to the rank of commander. That year he took command of the new steam frigate *Mississippi* until 1844, when Secretary of the Navy George Bancroft tasked him with drafting plans for a proposed naval academy. His resulting scheme so impressed Bancroft that, when the academy opened at Annapolis, Maryland, in 1845, Buchanan gained appointment as its first superintendent. In this capacity he proved himself a strict, no-nonsense administrator and placed the fledgling school on a firm footing. Buchanan then sought out a combat command, and in 1846 he hoisted his flag aboard the sloop *Germantown* throughout the Mexican War. Seven years later he

graduated to the steam frigate *Susquehanna*, Commodore Matthew C. Perry's flagship, and accompanied the expedition to open Japan. Buchanan made captain in 1855 and spent the next several years commanding the Washington Navy Yard. However, in April 1861, fearing that his native state of Maryland would secede and join the Confederacy, he tendered his resignation. Maryland remained loyal to the Union and Buchanan applied for reinstatement, but the Navy Department refused. He dithered for several months before finally visiting Richmond, Virginia, and offering his services to the Confederate States of America.

In September 1861, Buchanan became a captain in Confederate service and was initially posted as chief of the Bureau of Orders and Details. He performed capably as always, but chafed as an administrator and requested a combat command. Then, in February 1862, Buchanan took

off Hampton Roads. Buchanan slams into the sloop *Cumberland*, then riddles the *Congress* at close range with heavy gunfire. A third ship, the *Minnesota*, grounds itself in anticipation of being attacked. Buchanan, who is wounded by gunfire from the shore, then breaks off the action. It has been a fateful day, one sounding the death knell of wooden warships.

- The *Monitor* under Lieutenant John L. Worden, having survived a perilous transit from New York, arrives off Hampton Roads, Virginia, in the evening. All hands prepare for a monumental clash on the morrow.

March 9

NAVAL: Around 9:00 A.M., Lieutenant Catesby ap Roger Jones takes the iron-clad ram *Virginia* out of Norfolk, intending to finish off the grounded *Minnesota* off Hampton Roads. Approaching his quarry, he is startled to see the low-lying and strange-looking *Monitor* sail directly in his path. Over the next four hours,

charge of the Chesapeake Squadron and spent several weeks converting the captured Union steam frigate *Merrimack* into the Confederate ironclad ram CSS *Virginia*. On March 8, 1862, Buchanan made naval history by sailing down to Hampton Roads, Virginia, and sinking several wooden vessels of the Union blockading squadron. The age of modern warfare had dawned, but Buchanan had exposed himself recklessly, was wounded, and consequently missed the dramatic engagement with the Union ironclad *Monitor* on the following day. After several months of convalescence, Buchanan was promoted to admiral and assumed command of Confederate naval forces at Mobile, Alabama, including the giant ironclad CSS *Tennessee*. On August 5, 1864, he bravely waged a losing battle with Admiral David G. Farragut and was captured. Buchanan was subsequently exchanged a few weeks later but saw no more combat. Afterward, he served as president of the Maryland Agricultural College before dying at his home in Talbot County on May 11, 1874. Aggres-

Captain Franklin Buchanan, CSN (Naval Historical Foundation)

sive, hard-hitting Buchanan was an ideal officer to help usher in the age of modern naval warfare.

the iron giants duel at close range before thousands of spectators. Both vessels, heavily armored, fire repeatedly for four hours yet fail to inflict serious damage before the contest subsides. This dramatic but inconclusive engagement heralds the dawn of iron warships in naval warfare. *Monitor* has preserved the Union blockade at Norfolk, but the presence of the still dangerous *Virginia* will deny the James River to Union forces in the upcoming Peninsula campaign.

March 10

NAVAL: President Abraham Lincoln pays a bedside visit to Lieutenant John L. Worden, wounded in the eye during the clash between *Monitor* and *Virginia*.

March 11

MILITARY: General Henry W. Halleck is appointed commander of all Union forces in the West through an amalgamation of the Departments of Kansas, the Missouri, and the Ohio into the new Department of the Mississippi. He now enjoys authority over Union forces in 11 states and three territories, as far west as Colorado.

- President Abraham Lincoln, disillusioned by General George B. McClellan's lack of aggressiveness, issues War Order No. 3. This removes the reluctant leader as general in chief, although McClellan retains command of the Army of the Potomac. Henceforth, all generals are to report directly to Secretary of War Edwin M. Stanton.
- Major General John C. Frémont is cleared of all charges stemming from his abolitionist activities in Missouri; he is subsequently reassigned to the Mountain Department in western Virginia.
- President Jefferson Davis refuses to accept the reports of Generals John B. Floyd and Gideon J. Pillow concerning the fall of Fort Donelson, and he unceremoniously removes both from command.

MARINES: A detachment from the *Wabash* helps accept the surrender of St. Augustine, Florida.

March 13

MILITARY: General George B. McClellan convenes a war conference at Fairfax Court House, Virginia, and finalizes his strategy against Richmond. Rather than campaign overland from Urbana on the Rappahannock River, he elects to shift his Army of the Potomac by boat up the York and James Rivers to outflank strong Confederate defenses. The Army of the Potomac is organized into five corps: I Corps (General Irvin McDowell), II Corps (General Edwin V. Sumner), III Corps (General Samuel P. Heintzelman), IV Corps (Major General Erasmus D. Keyes), and V Corps (General Nathaniel P. Banks).

- General Ambrose E. Burnside lands three brigades of 12,000 Union troops at Slocum's Creek on the Neuse River, North Carolina, supported by 13 gunboats. His objective is New Bern, the state's second-largest city and an important railhead.
- A heavy bombardment from General John Pope's siege guns at Point Pleasant, Missouri, induces Confederate forces under General John P. McCown to evacuate their base at New Madrid for Island No. 10 in the Mississippi River. He abandons tons of valuable supplies in the process.

- President Abraham Lincoln approves plans of operation along the Virginia coast by General George B. McClellan's Army of the Potomac. He urges that leader, "At all events, move such remainder of the army at once in pursuit of the enemy."

NAVAL: As Confederate forces evacuate New Madrid, Missouri, they are covered by the gunboats belonging to Flag Officer George N. Hollins's squadron.

March 14

MILITARY: General Ambrose E. Burnside leads 12,000 Union troops through mud and rain on an advance toward New Bern, North Carolina, the former colonial capital. Confederate defenders under General Lawrence O. Branch resist doggedly for several hours until a militia unit in his center suddenly flees. New Bern is occupied by Burnside's victorious Federals that afternoon. The loss in materiel to the Confederacy proves significant, and the Union gains another base for projecting military strength farther inland.

March 15

MILITARY: General Ulysses S. Grant is exonerated of misconduct by General Henry W. Halleck and resumes command of Union forces in Tennessee.

NAVAL: Commodore Andrew H. Foote's flotilla of six gunboats and 121 mortar boats unleashes a preliminary bombardment of Confederate defenses on Island No. 10 in the Mississippi River.

March 16

MILITARY: Federal troops under General John Pope, in concert with Commodore Henry H. Foote's gunboat flotilla, initiate combined operations against Confederate positions on Island No. 10 in the Mississippi River. This post, well sited and heavily armed, presents a formidable obstacle to all river navigation.

March 17

MILITARY: The Army of the Potomac—105,000 strong in five corps—begins embarking at Alexandria, Virginia, for an amphibious transit to Fortress Monroe on the York and James Rivers. Through this maneuver, General George B. McClellan aspires to outflank strong Confederate defenses guarding the capital of Richmond.

NAVAL: Confederate commerce raider *Nashville* slips past blockading vessels *Cambridge* and *Gemsbok* off Beaufort, North Carolina. The Navy Department is quite embarrassed by its failure to stop the raider, and Assistant Secretary Gustavus V. Fox pronounces it "a Bull Run for the Navy."

- On the Mississippi River, Flag Officer Andrew H. Foote orders the gunboats *Benton*, *Cincinnati*, and *St. Louis* into one large floating battery. They then proceed to bombard Confederate batteries on the Tennessee shore and on Island No. 10.

March 20

MILITARY: General Benjamin F. Butler succeeds to command of the Department of the Gulf at Ship Island, Mississippi, prior to operations against New Orleans, Louisiana.

March 21

MILITARY: Colonel Turner Ashby alerts General Thomas J. Jackson that General Nathaniel P. Banks is withdrawing two divisions of Union troops from Winchester

in the Shenandoah Valley. Jackson, fearing that these soldiers are en route to reinforce the Army of the Potomac's drive against Richmond, determines to lure them back.

March 22

MILITARY: General Manfield Lovell, commanding the Confederate garrison at New Orleans, Louisiana, reports that he has six steamers available for the city's defense, but the inhabitants have been dismayed since the bulk of Confederate naval assets were deployed upriver.

- Confederate cavalry under Colonel Turner Ashby mistakenly report to General Thomas J. Jackson that Union strength at Kernstown, northern Virginia, is about 4,000 strong, the same as Jackson's own. In fact, General James Shields commands at least twice as many men, with most of them hidden in nearby copses.

NAVAL: The future *Florida*, presently disguised as the British *Oreto*, departs Liverpool for Nassau under Acting Master John Low. There the vessel is to be renamed and outfitted with four 7-inch cannon. This is the first such English vessel constructed for the Confederate navy, and it is clandestinely secured through the efforts of naval agent James D. Bulloch.

March 23

MILITARY: General Thomas J. Jackson concludes an impressive two-day march that covered 41 miles by attacking Kernstown, Virginia. However, Union general Nathan Kimball continuously feeds more men into the fray and fights the Southerners to a draw. Once increasing numbers of Federals surge forward, Jackson's entire line falls back in semi-confusion and out of town. Kernstown, while a Confederate tactical defeat, harbors immense strategic implications, for President Abraham Lincoln will order General Irvin McDowell's I Corps detained at Washington, D.C., thereby depriving the Army of the Potomac of I Corps' services in the upcoming Peninsula campaign. It also heralds the start of Jackson's sizzling Shenandoah Valley campaign, one of the Civil War's most legendary undertakings, an event affirming his reputation for tactical wizardry.

- Out west, Union soldiers commence digging a 12-mile-long, 50-foot-wide canal astride the Mississippi River to allow Union gunboats to bypass strong Confederate defenses on Island No. 10.

March 25

MILITARY: Major John M. Chivington of the 1st Colorado Volunteers is ordered to attack Confederate forces lodged near Santa Fe, New Mexico Territory. He arrives at the far end of Glorietta Pass that evening, capturing several sentinels, and prepares to storm the enemy camp at dawn.

NAVAL: Confederate secretary of the navy Stephen R. Mallory orders Commodore Josiah Tattnall to replace the wounded captain Franklin Buchanan at Norfolk, Virginia.

- At Pass Christian, Mississippi, Confederate side-wheel steamer *Pamlico* and gunboat *Oregon* attack the Union screw steamer *New London*; no damage is inflicted in a two-hour battle.

March 26

MILITARY: In an early morning raid, Colonel John M. Chivington, 1st Colorado Volunteers, advances through Glorietta Pass, New Mexico Territory, and attacks Confederates under Major Charles L. Pryon encamped at Johnson's Ranch. A last-minute charge by Union cavalry against the Southern rear guard nets several prisoners; then Chivington orders his men back to Kozlowski's Ranch to regroup.

March 27

MILITARY: Colonel William R. Scurry's 4th Texas arrives at Johnson's Ranch, New Mexico Territory, to reinforce a Confederate detachment under Major Charles L. Pryon. The Southerners then brace themselves for an anticipated Union attack; once it fails to materialize, Scurry assumes the offensive by marching through Glorietta Pass.

NAVAL: Secretary of War Edwin M. Stanton informs naval engineer Charles Ellet to commence building numerous steam rams at Pittsburgh, Pennsylvania, and Cincinnati, Ohio, capable of thwarting a new Confederate ironclad known to be under construction at Memphis, Tennessee.

March 28

MILITARY: Union troops at Johnson's Ranch near Glorietta Pass, New Mexico, are reinforced by a detachment under Colonel John P. Slough. Major John M. Chivington, 1st Colorado Volunteers, leads his force back through Glorietta Pass and happens upon the lightly guarded Confederate baggage train at Johnson's Ranch, which is captured. This spells the end of General Henry H. Sibley's Confederate offensive, and he will withdraw to Texas.

NAVAL: At Jacksonville, Florida, a boat party under Lieutenant Thomas F. Stevens returns from a foray up the St. John's River, having captured the *Memphis*—formerly the famous British racing yacht *America*.

March 29

MILITARY: General Albert S. Johnston assembles his Army of Mississippi at Corinth, Mississippi, by amalgamating the Armies of Kentucky and Mississippi into a single structure, with General Pierre G. T. Beauregard as his second in command and Generals Leonidas K. Polk (I Corps), Braxton Bragg (II Corps), William J. Hardee (III Corps), and George B. Crittenden (Reserve) under them.

- Confederate general William W. Mackall arrives and replaces the disgraced General John P. McCown as commander of New Madrid, Missouri, and Island No. 10 in the Mississippi River.

April 1

NAVAL: A landing party from the gunboat *St. Louis* attacks and spikes a Confederate battery on Island No. 1, Mississippi River. The noose is slowly tightening around strategic Island No. 10.

April 2

MILITARY: Confederate spy Rose Greenhow is expelled from Washington, D.C., by Federal authorities.

- Skirmishing continues between opposing mounted sentinels around Pittsburg Landing, Tennessee, as General Pierre G. T. Beauregard conceives an overly

complex order of battle that places all three Confederate corps in three distinct waves of attack, a tactic exacerbating mass confusion in the swirl of battle.

April 3

MILITARY: President Abraham Lincoln remonstrates with General George B. McClellan over his failure to assign a corps of 20,000 men to man the defenses of Washington, D.C. He reiterates his demand that I Corps of General Irvin McDowell be assigned the task of defending the national capital.

- General George B. McClellan makes final preparations to direct his massive Army of the Potomac on its drive against Richmond, Virginia. A talented disciplinarian and organizer, he commands 112,000 well-trained men.
- Massed Confederate forces under General Albert S. Johnston decamp from Corinth, Mississippi, and begin groping toward Union positions at Pittsburg Landing, Tennessee. Their movement is dogged by driving rain and poor marching discipline that many commanders feel may alert the defenders of their approach.

April 4

MILITARY: With his army of 112,000 men assembled on the York Peninsula, Virginia, General George B. McClellan finally begins his long-awaited campaign against Richmond. In contrast to the slapdash Union forces of the previous year, the Army of the Potomac is well trained, well led, and eager to prove its mettle in combat.

NAVAL: Covered by darkness and rain, the ironclad *Carondelet* under Commander Henry W. Walke dashes past Confederate batteries on Island No. 10 on the Mississippi River. The Southerners are now cut off from reinforcements while Union forces under General John Pope can safely cross the Mississippi River to the Tennessee shore.

April 5

MILITARY: The Army of the Potomac begins marching in the direction of Yorktown, Virginia, then defended by 15,000 Confederates under General John B. Magruder. Magruder constructs elaborate ruses like erecting false “Quaker guns” along his line while continually marching his men around to give an impression of greater numbers. General George B. McClellan is completely taken in by the deception and pauses to commence siege operations.

- Massed Confederates under General Albert S. Johnston prepare to strike Union positions at Pittsburg Landing, Tennessee. Despite entreaties from General Pierre G. T. Beauregard and others to relent, Johnston determines to hit the invaders hard on the morrow, declaring, “I would fight them if they were a million.”

April 6

MILITARY: On this momentous day, the Battle of Shiloh erupts at dawn as 44,000 Confederates under General Albert S. Johnston surprise 39,000 Union troops under General Ulysses S. Grant. Grant is at his headquarters in nearby Savannah, Tennessee, seven miles distant, and actual leadership devolves to General William T. Sherman. However, General Johnston is fatally injured while directing combat from his saddle and bleeds to death at around 2:30 p.m. General Pierre G. T. Beauregard then assumes tactical control of events and orders up 62 cannon to blast Federal defenders in the so-called Hornet’s Nest. Meanwhile, Grant returns

to camp and begins organizing a coherent defense, backed by gunboats on the Tennessee River. Beauregard briefly tests Grant's new position, judges it too well defended to be carried by his exhausted soldiers, and the fighting ceases.

- Medical Inspector Bernard D. Irwin, 4th Division, Army of the Ohio, establishes the army's first field hospitals at Shiloh, Tennessee, using the tents of 300 soldiers captured during the day's fighting. Thereafter, large field hospitals become a permanent fixture of Civil War armies.

NAVAL: Throughout the bloody fighting at Shiloh, heavy and accurate gunfire from Federal gunboats *Tyler* and *Lexington* assists the last-ditch Union defenses. They prove instrumental in blunting the Confederate advance.

April 7

MILITARY: General Ormsby M. Mitchel recruits Union spy James J. Andrews for a clandestine raid behind enemy lines to sabotage railroad track between Atlanta, Georgia, and Chattanooga, Tennessee. Andrews then solicits 22 volunteers from General Joshua W. Sill's Ohio brigade and gradually infiltrates them by small teams to Marietta, Georgia, where the scheme is to commence.

- The struggle at Shiloh resumes at 7:30 A.M. as Union forces under General Ulysses S. Grant, newly reinforced, mount a spirited counterattack to regain ground lost in the previous day's fighting. The Confederates under General Pierre G. T. Beauregard resist gamely but slowly yield to superior numbers. Casualties at Shiloh stun both North and South alike due to their sheer enormity. Grant, with 65,000 men engaged, loses 13,047, while the 44,000 Confederates sustain 10,694. The reality of modern warfare is tellingly realized by the contestants.

NAVAL: At Gibraltar, Commander Raphael Semmes lays up the Confederate raider *Sumter* owing to a boiler breakdown; Semmes has accounted for 18 Union prizes.

- The Federal ironclad *Pittsburgh* under Commander Egbert Thompson slips past Island No. 10 on the Mississippi River and joins the *Carondelet* in covering General John Pope's army as it ferries across to the Tennessee shore. The noose continues tightening around the Confederate defenders.

April 8

AVIATION: The Union bombardment of Island No. 10 is assisted by two artillery officers who go aloft in an observation balloon.

MILITARY: General William W. Mackall surrenders 4,500 Confederates on Island No. 10 in the Mississippi River to General John Pope. Considering the difficult terrain and tricky currents to be surmounted, Pope has performed well. Moreover, his victory constitutes the latest in a series of disasters for the Confederacy in the West. President Abraham Lincoln will subsequently assign Pope to command the newly organized Army of Virginia.

- Federal troops under General Ulysses S. Grant advance from Pittsburg Landing, Tennessee, in pursuit of General Pierre G. T. Beauregard's withdrawing Confederates. General William T. Sherman engages them briefly but is capably contained by the rear guard directed by General Nathan B. Forrest.

NAVAL: Commodore David G. Farragut runs the last of his West Gulf Blockading Squadron vessels over the Southwest Pass sandbar and into the Mississippi

River. He then assembles his 24 warships, mounting 200 large-caliber cannon, along with 19 mortar ships under Commander David D. Porter, and makes for Head of Passes.

- The Confederate vessel *Red Rover*, captured at Island No. 10 in the Mississippi River, is converted into the navy's first hospital ship and partly manned by the Nurses of the Holy Cross, precursors to the Navy Nurse Corps.

April 9

MILITARY: President Abraham Lincoln, flummoxed by General George B. McClellan's lack of aggressiveness, confers with cabinet members over what to do. The chief executive then suggests several lines of attack for the Army of the Potomac and entreats McClellan to attack immediately, insisting, "But you must act."

- The Confederate Congress approves a conscription measure over the protest of many politicians who feel this is a violation of states' rights and personal liberties.

NAVAL: Confederate secretary of the navy Stephen R. Mallory, convinced that the biggest threat to New Orleans, Louisiana, is the Mississippi River Squadron of Commodore Andrew H. Foote, refuses to allow Confederate vessels at Fort Pillow, Tennessee, to shift southward.

April 10

MILITARY: General Joseph E. Johnston assumes command of Confederate forces in the Peninsula district of Virginia, and reinforcements gradually raise Southern manpower to 34,000. Johnston nevertheless waxes pessimistic about resisting the Army of the Potomac, thrice his size, for long.

- After weeks of methodical preparation, Union artillery commanded by Captain Quincy A. Gillmore commences shelling Fort Pulaski on Cockspur Island, Savannah Harbor. This position is considered to be one of the strongest coastal fortifications in North America, but Gillmore's highly accurate, rifled Parrott cannons fire penetrating shells that systematically decimate the fort's defenses. The engagement is the first test of the Union's new ordnance against traditional masonry fortifications.

April 11

MILITARY: Fort Pulaski, Georgia, surrenders to Captain Quincy A. Gillmore following a heavy bombardment of 5,725 shells from nearby Tybee Island. This battle also marks the first employment of long-range, rifled ordnance against older, masonry defenses—with impressive results.

- General Henry W. Halleck supersedes General Ulysses S. Grant at Pittsburg Landing, Tennessee, over allegations of Grant's drunkenness, although he remains in charge of the District of West Tennessee. Command of the Army of the Tennessee temporarily reverts to General George H. Thomas.

April 12

MILITARY: Major James J. Andrews and 22 Union volunteers steal the Confederate locomotive named *General* and three freight cars at Big Shanty, Georgia, then head northward toward Chattanooga, Tennessee. Their mission is to destroy railroad bridges leading to the city, but the plan is thwarted by rainy weather. Once the *General* finally runs out of steam and is abandoned, the spies flee into

the woods, where the majority are captured. Andrews and seven volunteers are executed as spies on June 7, 1862, but eight men eventually escape captivity and the rest are exchanged. The raiders will become the army's first recipients of the Medal of Honor in March 1863. The episode enters Civil War folklore as the "Great Locomotive Chase."

April 14

MILITARY: A high-level war meeting convenes in Richmond, Virginia, whereby General Joseph E. Johnston pleads with superiors to abandon the Yorktown-Warwick River line before General George B. McClellan attacks in overpowering strength. However, President Jefferson Davis and his chief military adviser, General Robert E. Lee, balk at the suggestion, observing that it necessitates the abandonment of Norfolk.

NAVAL: Federal mortar boats under Commodore Andrew H. Foote commence bombarding Fort Pillow, Tennessee, astride the Mississippi River. This fortification lies 60 miles south of Island No. 10 and guards the northern approaches to Memphis. The exchange of fire will be intermittent over the next seven weeks.

April 15

MILITARY: At a special war council held in Richmond, Virginia, President Jefferson Davis breaks the strategic impasse by ordering General Joseph E. Johnston to move his army to Yorktown on the Peninsula and reinforce General John B. Magruder's troops holding the line there.

April 16

MILITARY: With Union forces only 10 miles from his capital and an endless stream of bad news from the West, President Jefferson Davis authorizes conscription to maintain existing Confederate manpower levels. Consequently, all white males aged 18 to 35 become eligible for three years of service. This is the first coercive military conscription in American history.

NAVAL: Commodore David G. Farragut begins massing the 17 warships of his West Gulf Blockading Squadron, including the gunboats of Commander David D. Porter, below Forts Jackson and St. Philip, Louisiana. These aged structures, one on either side of the Mississippi River, are situated 12 miles above Head of Passes, mount 90 cannon, and are further abetted by a "mosquito squadron" of small warships under Captain George N. Hollis.

April 17

MILITARY: Confederate reinforcements bring the strength of General Joseph E. Johnston's force along the Yorktown-Warwick River line up to 53,000 men. He nonetheless remains largely outnumbered by the Army of the Potomac, which fields roughly twice that number.

April 18

NAVAL: Commodore David G. Farragut dispatches Commander David D. Porter with 20 mortar boats to bombard Forts Jackson and St. Philip on the Mississippi River. Porter, convinced he can neutralize these positions through firepower alone, will pelt them with 200-pound mortar shells over the next five days.

- The Confederate Congress, anxious to break the Union blockade of Southern ports, orders the construction of six large ironclads with payment to be made in cotton.

April 20

NAVAL: At night, the Union gunboats *Itasca* and *Pinola* penetrate an obstacle constructed from heavy chains and sunken hulks strewn across the Mississippi River below New Orleans, Louisiana. The path is being cleared for Flag Officer David G. Farragut's squadron.

April 21

TECHNOLOGY: The first recorded instance of a machine gun employed in combat occurs at Yorktown, Virginia, when a so-called coffee mill gun, operated by the 56th New York Volunteers, supports a Union attack. The device proves to be prone to jamming and is soon withdrawn from operations.

MILITARY: To offset manpower advantages enjoyed by the North, the Confederate government authorizes creation of special guerrilla formations by passing the Partisan Ranger Act, then adjourns its first session.

NAVAL: The Confederate Congress authorizes a naval academy on the ship *Patrick Henry*, anchored below Drewry's Bluff, Virginia. It attracts 52 midshipmen for its first class.

April 24

NAVAL: Commodore David G. Farragut, impatient for success and concluding that the bombardment of Forts Jackson and St. Philip has been ineffectual, determines to run his entire fleet past them in the dark. At 2:00 A.M. in the predawn darkness, his 17 vessels steam by the forts in three divisions. Confederate defenders under General Johnson K. Duncan unleash a heavy cannonade but inflict very little damage. With Porter's single, decisive stroke, the fate of New Orleans, Louisiana, is decided. Eight Southern ships are sunk and two captured for a Union loss of the screw sloop *Vauna* sunk and Farragut's *Hartford* beached and partially burned. Union casualties amount to 39 dead and 171 injured.

April 25

MILITARY: Federal artillery under General John G. Parke commence bombarding Fort Macon on Bogue Banks Island off Beaufort, South Carolina. The following day, Colonel Moses J. White surrenders, and his garrison of 300 Confederates passes into captivity.

- In Washington, D.C., Lieutenant William A. Hammond of the Department of Western Virginia gains appointment as the army surgeon general. He is installed with the rank of brigadier general, a decision that infuriates medical officers enjoying greater seniority.

NAVAL: The Union flotilla under Commodore David G. Farragut captures the city of New Orleans, Louisiana, following a brief exchange with Confederate gunners at English Turn. The Mississippi River is running high at the time and thus enables the fleet to point its cannon directly over the levee and toward the city. The Confederacy loses its largest and wealthiest seaport, while the North acquires a splendid base for operations farther upstream.

MARINES: Landing parties from the steamer *State of Georgia* assist in the capture of Fort Macon off Beaufort, North Carolina.

April 27

NAVAL: U.S. naval forces accept the surrender of Fort Livingston on Bastian Bay, Louisiana, and crewmen from the *Kittatinny* hoist the Stars and Stripes over its ramparts. Nearby Forts Quitman, Pike, and Wood capitulate later that afternoon.

April 28

MILITARY: The Confederate garrisons of Forts Jackson and St. Philip, on the Mississippi River, mutiny against General Johnson K. Duncan and surrender 900 prisoners to Union forces under Commander David D. Porter. The unfinished ironclad *Louisiana*, along with gunboats *Defiance* and *McRae*, are burned to prevent capture.

NAVAL: The British steamer *Oreto* anchors at Nassau, the Bahamas, and waits to be manned by Confederate sailors. It is eventually impressed into Southern service as the commerce raider *Florida*.

April 29

MILITARY: In Virginia, a skittish General Joseph E. Johnston, painfully cognizant of the vast array of Union siege artillery before him along the Yorktown-Warwick River line, informs superiors that he is withdrawing inland as soon as practicable, rather than be bombarded into submission.

MARINES: A detachment of 200 marines under Captain John L. Broome occupies New Orleans until army forces can arrive.

April 30

MILITARY: Confederate forces under General Thomas J. Jackson advance from Elk Run, western Virginia, toward Staunton in driving rain. This proves to be one of the war's most impressive forced marches and bequeaths to troops involved the sobriquet "Jackson's foot cavalry."

- General Henry W. Halleck finalizes his reorganization of the Armies of the Mississippi, with General Ulysses S. Grant as his second-in-command, George H. Thomas and the Army of the Tennessee as right wing, John Pope and the Army of the Mississippi as left wing, John A. McClernand as reserve wing, and Don Carlos Buell and the Army of the Ohio acting independently.

May

AVIATION: Pioneering balloonist Professor Thaddeus S. C. Lowe becomes the first man to make military reconnaissance photographs while flying above Confederate lines near Richmond, Virginia. He takes no less than 64 overlapping pictures and is also the first man to transmit military intelligence by telegraph while airborne.

May 1

MILITARY: Union forces under General Butler occupy New Orleans, Louisiana, where he also serves as military governor. It is the beginning of a stormy and controversial tenure.

- Brigadier General William T. Sherman gains promotion to major general of volunteers.

May 3

MILITARY: General Joseph E. Johnston begins withdrawing 55,000 Confederates from Yorktown, Virginia, before heavy Union siege ordnance can commence

Farragut, David G. (1801–1870)

Navy admiral

David Glasgow Farragut was born in Campbell's Station, Tennessee, on July 5, 1801, the son of a U.S. Navy officer. He was orphaned at New Orleans and adopted into the family of Captain David Porter, himself a distinguished naval leader. In the War of 1812, Farragut served with his stepfather on the frigate *Essex* as a midshipman, and accompanied him on its heroic sortie around Cape Horn and into the Pacific Ocean, where it decimated the British whaling fleet. He survived Porter's defeat at the hands of HMS *Phoebe* and *Cherub* in February 1814, then returned to the United States onboard a cartel (exchange) vessel. Over the next 45 years Farragut functioned ably in various grades and capacities, rising to captain in 1855. Among his many assignments was constructing the first naval facilities on Mare Island, San Francisco Bay; he was residing in Norfolk, Virginia, with his family when the Civil War erupted in 1861. His Union sympathies forced him to

relocate to New York City, but, on account of his Southern origins, Farragut was not entirely trusted by the Navy Department. For many months into that conflict he was restricted to supervising a retirement board, and it took the direct intervention of his stepbrother, Captain David Dixon Porter, to have him appointed commander of the West Gulf Blockading Squadron in January 1862. It was in this capacity that Farragut successfully ran past Confederate Mississippi River defenses on the night of April 24, 1862, which forced the important city of New Orleans, Louisiana, to surrender. This decisive victory placed Union forces at the mouth of a strategic waterway leading directly into the Southern heartland, and was a leading cause of the Confederacy's downfall.

Farragut subsequently ran additional Confederate defenses along the Mississippi and bombarded Vicksburg, Mississippi, but was unable to capture it without army

firing. The Army of the Potomac, stalled a month while planting siege guns, can now begin moving up the Peninsula in pursuit.

- The first known use of land mines in the Civil War occurs at Yorktown, Virginia, when Brigadier General Gabriel J. Rains buries artillery shells with their fuses slightly below the surface in an attempt to kill Union soldiers stepping on them.

May 4

MILITARY: General George B. McClellan's Army of the Potomac occupies the Yorktown-Warwick River line recently abandoned by Confederate forces. As the Southerners under General Joseph E. Johnston funnel through Williamsburg in retreat, McClellan advances after them in pursuit and in great number, but cautiously so. Movement on either side is hampered by continual downpours that turn roads into quagmires. General James Longstreet finally consolidates a Confederate rearguard at Williamsburg and awaits the Union onslaught.

troops. After performing additional service in the Gulf of Mexico, Farragut needed rest, and he returned to New York to receive a hero's welcome. He resumed active duty within months and, on August 5, 1864, confronted his greatest naval challenge by attacking heavily guarded Mobile, Alabama, the last remaining gulf port of the Confederacy. To accomplish this, his fleet ran a gauntlet of minefields, took some losses, and heard Farragut's exclamation, "Damn the torpedoes! Full speed ahead!" This advance brought him into conflict with the large rebel ironclad CSS *Tennessee* under Admiral James Buchanan, which was captured after an intense battle. After Mobile surrendered on August 23, 1864, Farragut became the first rear admiral in U.S. history. Because of failing health, he spent the rest of the war performing blockade duty along the James River, Virginia. In 1866 he was promoted to admiral, another distinction, then commanded the European Squadron on a goodwill mission from 1867 to 1868. Farragut died while inspecting the Portsmouth Navy Yard, New Hampshire,

David G. Farragut (National Archives)

on August 14, 1870. He was among the most effective combat officers in all naval history.

- Confederate forces evacuate Tucson, New Mexico Territory, ahead of the "California column" of Colonel James H. Carleton. Meanwhile, the main Southern army under General Henry H. Sibley straggles into El Paso, Texas, following its arduous campaign in the West.

May 5

MILITARY: A Union force of 41,000 men commanded by General Edwin V. Sumner confronts a determined Confederate rearguard numbering 32,000 at Williamsburg, Virginia. The Southerners are ably posted at Fort Magruder under General James Longstreet, in the center of their line, and they rebuff an attack by General Joseph Hooker's division. On the Confederate left, General Winfield S. Hancock's Union brigade suddenly appears behind enemy lines around 3:00 p.m. and begins shelling the surprised Southerners with cannon fire. Confederate brigades under Generals Jubal A. Early and Daniel H. Hill try to outflank the intruders but are repelled in turn. Sumner, however, fails to take advantage of

the situation, and an impasse settles across the battlefield; Longstreet successfully extricates his forces that evening and falls back to Richmond. Williamsburg, the first pitched battle of the Peninsula campaign, proves indecisive and is characterized by heavy casualties: Union losses are 2,239 while the Confederates sustain 1,703.

- President Abraham Lincoln and Secretary of War Edwin M. Stanton board the steamer *Miami* and sail to Hampton Roads, Virginia, to prod General George B. McClellan to greater efforts.

May 6–7

NAVAL: Commander William Smith of the screw sloop *Wachusett*, assisted by gunboats *Chocura* and *Sebago*, convoys army transports along the York River in support of operations ashore at West Point, Virginia.

May 7

MILITARY: General Thomas J. Jackson nudges his footsore host from Staunton, western Virginia, toward the outskirts of McDowell in southwestern Virginia. As the 10,000 Confederates deploy to engage on the morrow, Union reinforcements arrive in the form of General Robert C. Schenk's brigade, giving the defenders 6,000 rank and file.

NAVAL: President Abraham Lincoln visits and examines the ironclad *Monitor* off Fortress Monroe, Virginia.

May 8

MILITARY: At 4:30 P.M., General Thomas J. Jackson leads 10,000 Confederates in an attack against 6,000 Federals under General Robert H. Milroy at McDowell in Virginia's Shenandoah Valley. Union troops charge up a heavily wooded hill, firing into an open copse where the Southerners have deployed, and inflict heavy loss. Confederate general Edward Johnson and his Army of the Northwest grimly repulse every attack as Jackson labors to rush up additional troops. At length, Milroy orders a retreat while Confederate troopers under Colonel Turner Ashby pursue and round up numerous stragglers.

NAVAL: The ironclad *Monitor*, accompanied by the steam sloop *Dacotah*, screw steamer *Naugatuck*, and others, bombards Confederate positions at Sewell's Point, Virginia. The fighting forces two Southern vessels to flee up the James River.

May 9

MILITARY: President Abraham Lincoln diplomatically admonishes General George B. McClellan for not moving more vigorously upon the Confederate capital at Richmond, Virginia, seemingly within his grasp.

NAVAL: The ailing commodore Andrew H. Foote, wounded at the capture of Fort Donelson, is relieved by Captain Charles H. Davis above Fort Pillow, Tennessee.

MARINES: At Baton Rouge, Louisiana, the Stars and Stripes are run up a flagpole by Sergeant Aaron Gilbert of the steamer *Iroquois*.

May 10

MILITARY: The Gosport Navy Yard at Norfolk, Virginia, is occupied by Union forces under General John E. Wool, whose movements are partially directed from

offshore by President Abraham Lincoln. The mighty steam ram *Virginia* is now deprived of a berth; it draws too much water to be sequestered farther up the James River.

- Confederate forces, stunned by the fall of New Orleans to the West Gulf Squadron, hastily abandon Pensacola, Florida, which is promptly reoccupied by Union forces.

NAVAL: The scratch-built Confederate River Defense Fleet of eight converted steam rams under Captain James E. Montgomery bravely sorties at Plum Run Bend on the Mississippi River, just north of Fort Pillow, Tennessee. He fiercely engages seven U.S. ironclads under Commodore Charles H. Davis in one of the few squadron actions of the Civil War. However, once the formidable ironclad *Carondelet* moves into firing range, it punishes the Confederates with rifled cannon fire, and Montgomery withdraws to the safety of Fort Pillow.

May 11

NAVAL: Because the large ironclad ram *Virginia* draws too much water to operate farther up the James River, Commodore Josiah Tattnall unceremoniously scuttles it off Craney Island, Virginia, to prevent capture. The Northern Blockading Squadron now enjoys unfettered access up the James as far as Drewry's Bluff.

May 12

MILITARY: The Army of the Potomac under General George B. McClellan advances to White House, Virginia, within 22 miles of the Confederate capital at Richmond.

NAVAL: Crewmen of the former ironclad *Virginia* gather under Lieutenant Catesby ap Roger Jones at Drewry's Bluff on the James River, where they man an artillery battery. This is a formidable position, rising 100 feet above the river and only seven miles from Richmond, Virginia, so its defense is imperative.

May 13

MILITARY: As an indication of the threat posed by the Army of the Potomac, Varina Davis, wife of Confederate president Jefferson Davis, evacuates Richmond, Virginia, for the safety of the countryside.

NAVAL: Harbor pilot Robert Smalls and eight fellow African Americans abscond with the Confederate steamer tug *Planter*, sail it from Charleston harbor, South Carolina, then surrender to the *Onward* offshore.

May 15

NAVAL: Commodore John Rodgers leads the ironclads *Monitor*, *Galena*, and *Nauguatuck* up the James River until they encounter the formidable Confederate defenses along Drewry's Bluff, seven miles below Richmond, Virginia. The ensuing battle is one-sided as the Union ships, outgunned and unable to circumvent obstacles in their path, take a pounding. Rodgers limps back to Norfolk and Richmond is saved.

- Rude behavior by New Orleans women toward Union occupiers prompts an angry General Benjamin F. Butler to issue his infamous General Order No. 28, the so-called Woman Order. This stipulates that any female disrespectfully disposed toward Federal troops will be arrested and treated as a prostitute. The act

offends Southern sensibilities on such matters and triggers indignation across the Confederacy.

MARINES: At Drewry's Bluff, Virginia, Corporal John Mackie directs marines to take over a gun on the *Galena* after its crew is killed by a shell; he will become the first marine to win a Medal of Honor.

May 17

MILITARY: Union troops under General Jacob D. Cox commence moving across the Flat Top Mountains of western Virginia, with a view toward severing the Virginia & Tennessee Railroad. To prevent this, General Humphrey Marshall plans to attack from the east on the following day while General Henry Heath's division is ordered to strike from the south. Cox, fearing himself outnumbered, withdraws completely.

NAVAL: The *Sebago* and *Currituck* escort troop transport *Seth Low* several miles down the Pamunkey River, Virginia, forcing Confederates to burn or scuttle 17 vessels to prevent capture. However, the river at this point is so narrow that the vessels are obliged to run backward for several miles before turning their bows around.

May 18

NAVAL: Commander Stephen D. Lee demands the surrender of Vicksburg, Mississippi, but Confederate general Martin L. Smith refuses. A year will elapse before the "Gibraltar of the West" succumbs to Union forces.

May 20

MILITARY: General Thomas J. Jackson's rapidly moving command swells to 17,000 men with the arrival of General Richard S. Ewell's contingent in the Luray Valley of northwestern Virginia. Jackson is determined to prevent General Nathaniel P. Banks from reinforcing the Army of the Potomac.

NAVAL: Union gunboats sail into the Stono River, South Carolina, and bombard Confederate positions above Cole's Island in preparation for operations against Charleston.

May 21

MILITARY: Stalled eight miles from the Confederate capital of Richmond, Virginia, and ignoring his numerical superiority over the Confederates, General George B. McClellan calls for reinforcements. To that end, I Corps of General Irvin McDowell prepares to march overland from Washington, D.C., to join McClellan.

- Confederates under General Thomas J. Jackson move northward in the Luray Valley via passes in the Massanutten Mountains and approach the isolated Union outpost at Front Royal. His movements are effectively masked by cavalry under Colonel Turner Ashby, who completely confounds Union general Nathaniel P. Banks.

May 23

MILITARY: A force of 23,000 Confederates under General Thomas J. Jackson bursts upon a rather surprised Union garrison at Front Royal, Virginia. En route, General Richard Taylor is hailed by notorious spy Belle Boyd, who relays useful intelligence as to Union dispositions about the town. Thus informed, Jackson pushes forward men of his 1st Maryland, C.S.A., to clear Front Royal and pre-

vent Union forces from burning two valuable bridges. The town quickly succumbs to the Southern onslaught, and the Federals retreat after losing 1,063 men captured.

May 24

TECHNOLOGY: The army invents the first wagon-mounted telegraph to facilitate military communications between major headquarters throughout field operations. The wagons are initially used by General George B. McClellan, with wires from his headquarters at Williamsport, Virginia, to an outpost at Mechanicsburg.

MILITARY: Pursuing Confederates under General Thomas J. Jackson maneuver to intercept retreating Federals under General Nathaniel P. Banks at Newtown, western Virginia, but are slowed by the delaying actions of cavalry commanded by General John P. Hatch. Jackson's alarming progress induces President Abraham Lincoln to order General Irvin McDowell's I Corps halted at Fredericksburg and redirected into the Shenandoah Valley.

- The defeat at Front Royal stings Union authorities into action, and President Abraham Lincoln orders General John C. Frémont to gather up his forces and drive the Confederates from the Shenandoah Valley. He also advises General George B. McClellan that promised reinforcements are not forthcoming at this time.

May 25

MILITARY: President Abraham Lincoln, chafing over the stalled Union offensive outside Richmond, Virginia, again urges General George B. McClellan to resume his advance. "I think the time is near when you must either attack Richmond or give up the job and come to the defense of Washington," he blithely declares.

- The Army of the Potomac, reduced to a crawl before Richmond, Virginia, becomes divided by the Chickahominy River, with three Union corps lodged on its north bank and two below. This situation prompts General Joseph E. Johnston to contemplate an offensive stroke against the commands of Generals Edwin V. Sumner, William B. Franklin, and Fitz-John Porter, and possibly to defeat them in detail.

- Having prevailed over Union forces below Winchester, General Thomas J. Jackson hurriedly marches his weary men toward another engagement in that town. General Richard S. Ewell's division advances against General Nathaniel Banks's troops on the right, while the Louisiana Brigade of General Richard Taylor simultaneously strikes their right. Banks's tactical ineptitude costs him 2,019 casualties while the Southerners sustain barely 400. Over the past three days, Jackson's command has netted 3,030 prisoners, 9,000 firearms, and such a trove of quartermaster stores that the Confederates jocularly refer to their defeated adversary as "Commissary Banks."

- General Pierre G. T. Beauregard decides to abandon Corinth, Mississippi, to superior Union forces and preserve his own army of 50,000 men. He then concocts a number of clever stratagems to convince General Henry W. Halleck that his Confederates are actually being reinforced and intend to stand and fight.

- Pugnacious Captain Philip H. Sheridan, serving as quartermaster on the staff of General Halleck, is promoted several grades to colonel of the 2nd Michigan Cavalry.

- President Jefferson Davis expresses disappointment that General Joseph E. Johnston has not commenced his offensive battle against the much larger Army of the Potomac. Nonetheless, he insists, “We are steadily developing for a great battle, and under God’s favor I trust for a decisive victory.”

May 27

MILITARY: The Battle of Hanover Court House unfolds as V Corps of General Fitz-John Porter attacks a North Carolina brigade threatening the Union flank; the Southerners are driven off after a stiff fight, taking 300 casualties and losing 700 prisoners. Union forces continue edging ever closer to the Confederate capital at Richmond.

May 28

MILITARY: Confederate cavalry under General J. E. B. Stuart arrive at Richmond, Virginia, with intelligence that the much-feared approach of General Irvin McDowell’s I Corps from Fredericksburg will not transpire. This development further prods General Joseph E. Johnston, commanding Confederate forces in Virginia, to cancel his impending lunge at three Union corps north of the Chickahominy River in favor of attacking the remaining two corps marooned on the south bank.

- Roughly 50,000 Union troops under Generals Irvin McDowell, John C. Frémont, and Nathaniel P. Banks begin concentrating in the vicinity of Harpers Ferry, northwestern Virginia, to cut off and possibly annihilate marauding Confederates under General Thomas J. Jackson. All are encouraged by an anxious President Abraham Lincoln, who urges them to “put in all the speed you can.”

May 30

MILITARY: General Joseph E. Johnston makes a close reconnaissance of Union forces looming within 10 miles of Richmond, Virginia, and observes how they are physically divided by the rain-swollen Chickahominy River. He elects to concentrate 51,000 men against the combined III and IV Corps of Generals Samuel P. Heintzelman and Erasmus D. Keyes, unsupported on the south bank. However, Johnston’s execution is compromised by overreliance on verbal commands, which further complicates matters for his inexperienced officers and men.

- Confederates under General Thomas J. Jackson withdraw from Winchester, Virginia, to avoid encirclement by three converging Union columns. General Ashby Turner’s cavalry is left behind to constitute a rear guard, and the town is subsequently secured by Federal troops under General James Shield.
- Union forces under General Henry W. Halleck secure 2,000 Confederate prisoners at Corinth, Mississippi, following the withdrawal of General Pierre G. T. Beauregard. He thus secures a vital transportation link and severs the vital Memphis & Charleston and Mobile & Ohio Railroads, but is nonetheless criticized for his dilatory pace. In truth, it has taken the glacial Halleck 30 days to cover the 22 miles from Pittsburg Landing.

May 31

MILITARY: Federal troops under General George B. McClellan continue their glacial advance upon Richmond, Virginia, but the topography requires him to further split his forces along either bank of the rain-swollen Chickahominy Creek. This deployment prompts General Joseph E. Johnston to attempt to destroy the

isolated III and IV Corps under Generals Samuel P. Heintzelman and Erasmus D. Keyes at Fair Oaks on the south bank. The impending Confederate onslaught, though well-planned, is hobbled from the outset by poor staff work and over-reliance on verbal orders. Hard fighting manages to evict the division of General Silas Casey from its position and to capture several batteries, but the Federals promptly re-form and establish new lines to the rear.

- Johnston's secondary attack at nearby Seven Pines fares little better. Union troops under redoubtable major general Phil Kearny fiercely resist General W. H. C. Whiting's advance and repulse him. A second attack mounted by Whiting also falters, at which point General Joseph E. Johnston arrives to personally supervise matters. Johnston is then seriously wounded by a ball in the shoulder and is succeeded by a dithering General Gustavus W. Smith, who orders his remaining forces from the field.

June 1

MILITARY: An anxious President Abraham Lincoln telegrams and implores General George B. McClellan to "hold all your ground, or yield any inch by inch in good order."

- Confederate forces resume their offensive by striking the Army of the Potomac at Seven Pines, Virginia. The Southerners make their charges fiercely but in piecemeal fashion, and are driven off in detail. At length General Robert E. Lee gallops up from Richmond to succeed General Gustavus W. Smith and orders the fighting stopped at 1 P.M. The Confederates, who did most of the attacking, lose 6,134 men to a Union tally of 5,031. President Jefferson Davis next assigns Lee to succeed the tottering Smith as field commander. Unknown at the time, a corner has been turned in the military course of events—and a brilliant new chapter is about to unfold.

June 4–5

NAVAL: Prolonged bombardment by Federal gunboats on the Mississippi River convinces Confederate defenders to abandon Fort Pillow, Tennessee. The nearby city of Memphis is likewise poorly garrisoned, save for a weak naval squadron.

June 6

NAVAL: At 4:20 A.M., Union gunboats under Commander Charles H. Davis weigh anchor off Island No. 45, two miles north of Memphis, Tennessee, and make directly for the city. A small Confederate squadron of steam rams under Captain James E. Montgomery sorties to confront them as thousands of spectators line the riverbank to observe. Davis feigns a retreat and Montgomery pursues until he is surprised in midstream by Union rams sailing four abreast. Confederate losses in the ensuing rout total around 100 killed with another 100 captured. Davis, having dispensed with his adversary, brooks no delay in making Memphis his prize. All western Tennessee is now firmly in Union hands, and this latest acquisition, the Confederacy's fifth-largest city, will subsequently function as a vital staging area for operations as far down the Mississippi River as Vicksburg.

June 7

MILITARY: In a controversial move, General Benjamin F. Butler orders William B. Mumford hung for tearing down an American flag from the city mint at New Orleans, Louisiana.

June 8

MILITARY: The main portion of the Army of the Valley under General Thomas J. Jackson reposes at Port Republic, northern Virginia, prior to advancing against Union forces commanded by General James Shield. Seven miles away, General Richard S. Ewell's force of 5,000 men assumes defensive positions at Cross Keys, anticipating a major thrust by General John C. Frémont's forces. At length, Frémont approaches Ewell's position with 12,000 men but, before serious fighting can develop, he suddenly disengages and falls back down the Keezletown Road. As the battle of Cross Keys continues, a Union cavalry raid directed by Colonel Samuel G. Carroll unexpectedly storms into Port Republic, Virginia, taking several of General Thomas J. Jackson's staff prisoner—and nearly bagging the general himself—before being driven off.

June 9

MILITARY: Confederates under General Thomas J. Jackson cross a narrow wagon bridge over the North River to attack General Erasmus B. Tyler's brigade at Port

**Lee, Robert E. (1807–1870)***Confederate general*

Robert Edward Lee was born at Stratford, Westmoreland County, Virginia, on January 19, 1807, a son of famed Revolutionary War hero “Light Horse Harry” Lee. He entered the U.S. Military Academy in 1825 and graduated four years later, second in his class and without a single demerit. Lee received his lieutenant's commission in the elite Corps of Engineers and subsequently served on the staff of General Winfield Scott during the War with Mexico, 1846–48. He ended the war a brevet lieutenant colonel and between 1852 and 1855 also served as superintendent of cadets at West Point. Lee subsequently served in Texas until 1859, but during a furlough home that year, he commanded a detachment of U.S. Marines that captured abolitionist John Brown at Harpers Ferry. By 1861 the gathering war clouds induced General in Chief Scott to tender Lee a ranking position in the Federal army, but he respectfully declined and joined the

Confederacy. By March 1862 Lee was at Richmond, Virginia, as a senior military adviser to President Jefferson Davis. He then launched an audacious series of hard-pounding attacks upon the larger Army of the Potomac under General George B. McClellan, driving him back from the gates of Richmond. Lee then gambled on a daring invasion of Union territory by carrying the war into Maryland, and waged another hard-fought battle at Antietam on September 17, 1862, where he was nearly crushed before the fortuitous arrival of General A. P. Hill's division.

Soon afterward, General Ambrose E. Burnside attacked Lee as he sat in entrenched fortifications at Fredericksburg, Virginia, on December 13, 1862. The result was a lopsided slaughter of 13,500 Union troops killed or wounded to a Southern tally of 5,300. In the spring of 1863, General Joseph Hooker led a reconstituted Union

Republic, northern Virginia. Tyler arrays his 3,000 men in a line anchored by a seven-gun battery, and Jackson orders General Richard Taylor's Louisiana brigade against the Union left. By 11:00 A.M. Tyler, heavily outnumbered, orders a withdrawal that degenerates into a rout. Union losses amount to 1,108, including 558 prisoners, while the Southerners incur roughly 800 casualties, dead and wounded.

- Port Republic is the sixth and final encounter of Jackson's remarkable Shenandoah Valley campaign. Since the previous March, his famous "foot cavalry," whose strength peaked at 17,000 men, have slogged 676 miles and won four pitched battles and several skirmishes, while defying all attempts by 60,000 Federals to snare them. Most importantly, Jackson's endeavors repeatedly siphon off valuable Union manpower that might have been better employed before Richmond. "God has been our shield," Jackson modestly concludes, "and to His name be all glory."

June 10

MILITARY: General Henry W. Halleck authorizes Generals Ulysses S. Grant, John Pope, and Don Carlos Buell to resume independent command of their respective

force across the Rapidan River, but Lee's ensuing attack brilliantly crushed Hooker's left flank and forced him to retreat. Lee then sought to maintain the strategic initiative by invading Northern territory again that summer. However, his plan quickly went awry when General J. E. B. Stuart led all his cavalry on a spectacular raid through Pennsylvania, which deprived the Army of Northern Virginia of its eyes and ears. Consequently, when Lee unexpectedly collided with General George G. Meade at Gettysburg on July 1–3, 1863, he was repulsed—just at the high tide of Confederate fortunes. His next contest of strength occurred in the spring of 1864 against General Ulysses S. Grant, conqueror of Vicksburg. Over the next year, Grant pinned Lee within his fortifications at Richmond while a second army under General William T. Sherman advanced upon him from Georgia. Lee fought magnificently before finally surrendering on April 9, 1865. After the war, he spurned lucrative offers of employment to work as the president of Washington College in Lexington, Vir-

Robert E. Lee (*National Archives*)

ginia. Lee died there on October 12, 1870, an iconic figure of the South and among history's greatest battle captains.

armies. Grant, as the senior officer present, reigns again as theater commander, and the tempo of events in the West once again escalates.

June 12

MILITARY: At 2:00 A.M., General J. E. B. Stuart bursts into his headquarters, declaring, “Gentlemen, in ten minutes every man must be in the saddle.” His 1,200 Virginian troopers then commence their dramatic and celebrated ride from Richmond, Virginia, and around the Army of the Potomac. Stuart is tasked with verifying rumors that General George B. McClellan’s right flank is “up in the air,” which would facilitate an offensive envisioned by new commander, General Robert E. Lee.

June 13

MILITARY: General J. E. B. Stuart’s cavalry reaches a threshold after filing through Old Church, Virginia, on the right flank of General George B. McClellan’s army. No Confederate unit has ever penetrated Union lines this far but, rather than retrace his steps, Stuart plunges boldly ahead and begins his circuitous ride to fame.

June 14

MILITARY: General J. E. B. Stuart’s cavalry destroys the bridge over the Chickahominy River at Forge Site to prevent a Union pursuit and completes its ride around the Army of the Potomac’s left flank. Previously, the Confederates had been pursued by Federal cavalry under Brigadier General Philip St. George Cooke, Stuart’s father-in-law.

June 15

MILITARY: General J. E. B. Stuart gallops into Richmond, Virginia, ahead of his troopers with important military intelligence about the Army of the Potomac. His 100-mile jaunt brings General Robert E. Lee welcome information about the dispositions of the Union’s V Corps under General Fitz-John Porter, presently unsupported on the north bank of the river. Lee, eager to break the impasse near Richmond, begins concocting a plan for Porter’s demise.

- With amazing perspicacity, President Abraham Lincoln informs a worried General John C. Frémont that Confederate reinforcements seemingly headed for the Shenandoah Valley are most likely a ruse to mask General Thomas J. Jackson’s transfer to Richmond, Virginia.

June 16

MILITARY: At 2:00 A.M., Union general Henry W. Benham rouses the divisions of Generals Horatio Wright and Isaac I. Stevens and orders them to attack Confederate emplacements at nearby Secessionville, South Carolina. The local Southern commander, Colonel Thomas G. Lamar of the 1st South Carolina Artillery, is apprised of Benham’s intentions and prepares a two-mile-long position, crowned by heavy cannon, to receive the attack. The ensuing battle is a minor disaster for the Federals, and Benham loses 107 killed, 487 wounded, and 80 captured to a Confederate tally of 52 killed, 144 injured, and eight missing.

June 17

MILITARY: General Braxton Bragg, a close friend and confidant of President Jefferson Davis, succeeds the ailing General Pierre G. T. Beauregard as commander

of the Confederate Western Department. Bragg is a capable strategist and an accomplished logistician, but his garrulous disposition and fits of indecision will alienate all but the most faithful subordinates.

NAVAL: Commander Augustus H. Kilty leads an expedition of ironclads, gunboats, and transports down the White River as far as St. Charles, Arkansas, where he engages Confederate artillery. Troops land and capture the battery, but the gunboat *Mound City* sustains a hit that ruptures its steam lines, killing or wounding 150 crewmen out of 175.

June 19

NAVAL: Commander Matthew F. Maury reports to Confederate secretary of the navy Stephen R. Mallory on mining operations along the James River. He also broaches the use of galvanic batteries by the CSS *Teaser*, the first naval vessel outfitted as a minelayer; *Teaser* also carries the first Confederate observation balloon.

June 23

MILITARY: General Robert E. Lee assembles his commanders at the Dabb's House near Richmond, Virginia, and outlines his offensive against the Army of the Potomac's right wing under General Fitz-John Porter. He plans to concentrate no fewer than 55,000 men against Porter's 30,000-strong V Corps by throwing the combined weight of Generals Thomas J. Jackson, James Longstreet, Daniel H. Hill, and Ambrose P. Hill in a single, coordinated strike.

June 25

MILITARY: The Army of the Potomac edges to within six miles of the Confederate capital at Richmond, Virginia, the closest Union approach for the next three years. General George B. McClellan, desiring to place heavy cannon on the city's outskirts to bombard it, orders Oak Grove, a section of swampy, wooded terrain to his front, wrested from the enemy. Union forces acquire Oak Grove at the cost of 626 men while the Confederates suffer 441 casualties, but no one could have anticipated that the strategic initiative is passing suddenly and irretrievably to the South.

June 26

MILITARY: Throughout the morning, three Confederate divisions under Generals James Longstreet, Daniel H. Hill, and Ambrose P. Hill march and concentrate 47,000 men in the vicinity of Mechanicsville, Virginia. Opposing them are 30,000 Federal troops of General Fitz-John Porter's V Corps, strongly entrenched behind Beaver Dam Creek. The aggressive General A. P. Hill orders a frontal assault against Porter, but Porter's well-positioned soldiers have little difficulty blasting back the enthusiastic Confederates. Lee's battle plan misfires spectacularly, with a loss of 1,484 Confederates to 361 Federals. His sudden pugnaciousness, however, perplexes and unnerves General George B. McClellan who, suspecting he is outnumbered, suddenly directs Porter to abandon his strong position and relocate to Gaines' Mill, five miles distant. McClellan also begins shifting his base of operations from the Pamunkey River to Harrison's Landing on the James River. This is the first stirring of what many participants on either side will ridicule as the "Great Skedaddle."

- In northern Virginia, the new Army of Virginia forms under Major General John Pope. His force is organized into three corps: I Corps (General John C. Frémont), II Corps (General Nathaniel Banks), and III Corps (General Irvin McDowell). Pope has been victorious in the west, but his lack of seniority angers Frémont, who resigns his command. His replacement is General Franz Sigel.

MARINES: Several detachments from various ships accompany gunboats on a raid up the Santee River, South Carolina, skirmishing with Confederate forces along the shore.

June 27

MILITARY: The Union V Corps under General Fitz-John Porter retires five miles southeast from Mechanicsville, Virginia, and establishes a new defensive perimeter along a swampy plateau near Gaines' Mill. Confederates under General Robert E. Lee pursue sharply, and Lee determines to make another concerted attack on Porter's new position. The charge is spearheaded by 4,000 fresh troops, and fighting is intense and bloody before Union forces finally abandon their strong plateau. Porter withdraws in good order toward Chickahominy Creek and closer to General George B. McClellan's main force. Gaines' Mill is the most costly of the so-called Seven Days' Battles (or Battles of the Seven Days), with Confederate losses of 7,993 to a Union tally of 6,837. However, McClellan continues falling back to the James River.

- General Braxton Bragg directs 3,000 men of General John P. McCown's division to transit by rail from Tupelo, Mississippi, to Chattanooga, Tennessee, to join the army of General Edmund Kirby Smith. The movement takes six days and proceeds smoothly, which convinces Bragg that larger transfers of men and supplies can be shuttled before Union forces can respond effectively.
- President Abraham Lincoln formally accepts the resignation of the controversial explorer, soldier, and politician, John C. Frémont.

June 28

MILITARY: General George B. McClellan withdraws from Richmond, Virginia, and bitterly concludes he is losing the campaign for want of promised reinforcements. General Robert E. Lee, meanwhile, having analyzed McClellan's temperament, orders his army on an intricate movement down four different roads in an attempt to surround and possibly cripple his timid opponent.

- In an attempt to boost units' esprit d'corps, Major General Philip Kearny institutes the so-called division patch for his 3rd Division, III Corps, Army of the Potomac. This is a piece of red cloth on the top of all caps.

NAVAL: At 2:00 A.M., Admiral David G. Farragut and Commander David D. Porter slip their respective squadrons past heavy gun emplacements at Vicksburg, Mississippi, suffering 15 killed and 30 wounded—trifling, considering the amount of ordnance poured upon them by Southern batteries.

June 29

MILITARY: General John B. Magruder, advancing east from Williamsburg, Virginia, with 11,000 men, cautiously probes the region for Union forces. Contact with the Federals is finally established at Allen's Farm around 9:00 A.M., where Magruder suddenly finds himself confronting the entire II Corps of 26,000 men

under General Edwin V. Sumner, backed by 40 cannon. Thus far, Magruder's "pursuit" has availed him little beyond 626 casualties. But Sumner's mishandling of affairs costs him 919 men; he also abandons 2,500 sick and injured soldiers to captivity. Overnight, II Corps withdraws to new positions at White Oak Swamp and Glendale.

June 30

MILITARY: General Robert E. Lee, intent upon destroying at least a portion of General George B. McClellan's Army of the Potomac, issues another set of complicated attack plans to catch the fleeing Federals in a pincer at Glendale. By 4:00 P.M. that afternoon, an exasperated Lee can count on only 19,000 men from Generals James Longstreet and Ambrose P. Hill, and they charge the center of the Union line, then strongly posted behind White Oak Swamp Creek. General George A. McCall is captured, but before the Southerners can exploit their breakthrough and seize vital crossroads, they are evicted in savage, hand-to-hand fighting. Combat draws down with nightfall: Lee's losses at White Oak are 3,673 while McClellan sustains 3,797, including Generals George A. McCall and John F. Reynolds taken prisoner.

July

MILITARY: At Harrison's Landing, Virginia, Brigadier General Daniel Butterfield works with Musician Oliver W. Norton, 83rd Pennsylvania Volunteers, to create a solemn piece of music they title "Lights Out." This is the origin of the call "Taps," which is utilized by all modern services.

July 1

MILITARY: Having failed to destroy the Army of the Potomac at White Oak Swamp the previous day, General Robert E. Lee maneuvers to deliver one last and possibly crushing blow against them at Malvern Hill, a 150-foot-high rise flanked by swamps and other obstacles. This imposing position is ably manned by General Fitz-John Porter's V Corps. Moreover, Porter's secure flanks promise to funnel any Confederate attack directly up the center of his waiting line, which is crowned by 100 pieces of field artillery. Lee nevertheless commits his army to several costly and futile assaults and relents only after suffering 5,650 casualties to a Union tally of 3,007.

- The Seven Days campaign reaches its bloody conclusion with Union forces pushed far from the Southern capital of Richmond, Virginia. The Confederacy is thus preserved for another three-and-a-half years, at a cost of 20,141 casualties. The Army of the Potomac, which handled itself well under excruciating circumstances, loses 15,849. Most important of all, the campaign defines General Robert E. Lee as an assertive and offensive-minded battle captain, given to well-prepared, calculated risks. Warfare in the eastern theater now largely revolves around him.
- Union forces under Colonel Philip H. Sheridan engage a large force of 4,700 Confederates under General James R. Chalmers at Booneville, Mississippi, 20 miles south of Corinth. Chambers presses hard against Sheridan's pickets, who are carrying the latest Colt revolving carbines, and is repelled. Sheridan's aggressive handling of troops catches the eye of General Henry W. Halleck, who arranges his promotion to brigadier general.

NAVAL: Warships of Flag Officer Louis M. Goldsborough's squadron cover the withdrawal of General George B. McClellan's army by protecting its flanks and shelling Confederate columns that step into range. The navy is also tasked with safely convoying army transports along the James River, which is performed without serious mishap.

- The Western Flotilla under Commodore Charles H. Davis unites with the naval expedition of Admiral David G. Farragut above Vicksburg, Mississippi. This commingling of fresh and saltwater squadrons represents an impressive effort by both commanders.

July 2

MILITARY: The Morrill Act, which sets aside federal land for engineering and agricultural colleges, is passed by Congress. A major requirement is that military science be part of all school curricula—the origin of today's Reserve Officers' Training Corps (ROTC).

July 4

MILITARY: The post of medical director, Army of the Potomac, is filled by Dr. Jonathan Letterman, who will advance valuable ideas for improving military sanitation, ambulance evacuation service, and the growth and maturation of army field hospitals.

NAVAL: A brief cannon duel between the side-wheel steamer *Maratanza* and the Confederate minelayer *Teaser* on the James River results in the capture of the latter; it is inspected closely by Union officials.

July 5

NAVAL: A reorganization act is passed by Congress that increases the navy's total amount of bureaus to eight: Docks and Yards, Equipment and Recruiting, Navigation, Ordnance, Construction and Repair, Steam Engineering, Provisions and Clothing, and Medicine and Surgery.

July 7

MILITARY: President Abraham Lincoln visits General George B. McClellan at Harrison's Landing, Virginia, to discuss recent events. The general blames his recent setback upon the lack of promised reinforcements, and he also urges the president to adopt a more conservative approach to strategy and abolition.

NAVAL: The schooner *Ariel* transports President Abraham Lincoln and his entourage to Harrison's Landing, Virginia, for talks with General George B. McClellan.

July 8

TECHNOLOGY: The Patent Office grants Theodore R. Timby a patent for his "revolving battery tower"—or turret—the utility of which was amply demonstrated on the ironclad *Monitor* at Hampton Roads, Virginia. However, the navy will not officially embrace the concept for another two decades.

July 10

MILITARY: The newly designated Army of Virginia under General John Pope positions itself in the Shenandoah Valley and reminds inhabitants of their obligation to assist Union efforts. He also promises swift justice for any treasonable or harmful deeds against military personnel.

July 11–17

MILITARY: General Henry W. Halleck, summoned from the Department of the Mississippi by President Abraham Lincoln to Washington, D.C., is appointed general in chief of the army. He proves himself an excellent military administrator, but little else. However, his removal allows General Ulysses S. Grant to resume command of military operations as commander, District of Western Tennessee.

July 12

MILITARY: The Medal of Honor, established in 1861 to honor naval personnel, is expanded to include soldiers; a total of 1,198 are awarded throughout the Civil War.

NAVAL: Faced with falling water levels on the Yazoo River, the large Confederate ironclad *Arkansas* under Lieutenant Isaac N. Brown sorties into the Mississippi River and heads south toward Vicksburg, Mississippi.

July 14

MILITARY: General John Pope exhorts his Army of Virginia by declaring that “the strongest position a soldier should desire to occupy is one from which he can most easily advance against the enemy.” He then deploys his men between Washington, D.C., and Confederate forces to draw their attention away from General George B. McClellan’s Army of the Potomac.

- President Abraham Lincoln approves legislation for a Federal pension system to assist all widows and children of Union soldiers killed in the war. Meanwhile, 20 representatives from border states announce their opposition to the president’s compensated emancipation plan.

NAVAL: After a long struggle for reform, Congress finally outlaws alcoholic rations on board navy vessels; henceforth, all sailors receive an additional five cents per day in lieu of their traditional grog.

July 15

INDIAN: Apaches under Mangas Coloradas and Cochise decide to ambush the “California Column” of Colonel James H. Carleton at Apache Pass, New Mexico Territory (Arizona). They attack the advance guard of Captain Thomas Roberts, who drives the Indians off with well-aimed howitzer fire. Carleton subsequently orders the construction of Fort Bowie to secure the pass.

NAVAL: Union vessels under Commodore Charles H. Davis attack the newly built Confederate ironclad *Arkansas* under Lieutenant Isaac N. Brown as it churns down the Mississippi River. Both sides sustain damage, but the *Arkansas* escapes intact and remains a menace to Union shipping throughout the region. For his part, Brown is promoted to commander.

July 16

NAVAL: David G. Farragut is formally appointed rear admiral by Congress, the first officer in the United States Navy to hold such rank. President Abraham Lincoln also signs legislation conferring similar promotions to all sitting flag officers. The total number of ranking officers allowed is also increased to nine rear admirals, 18 commodores, 36 captains, and 72 commanders.

July 17

MILITARY: The recruitment of African-American soldiers directly into the army is approved by Congress through its Second Confiscation Act. The process

began unofficially in the Department of the South in April 1862, but political pressure had been building among abolitionist politicians to formalize the process.

- Congress also authorizes the creation of national cemeteries to inter the dead; however, it will be five years after the war before the last of 300,000 soldiers can be identified and buried.

NAVAL: An act granting pensions to all navy and Marine Corps personnel disabled in the line of duty is signed into law by President Abraham Lincoln.

MARINES: The *Potomac* lands sailors and marines at Pascagoula, Mississippi, where they skirmish with enemy forces and destroy several schooners and a telegraph office. Communications between that town and Mobile, Alabama, are temporarily disrupted.

July 21

NAVAL: Descending from the Ohio River upon Henderson, Kentucky, landing parties from the gunboats *Clara Dolsen* and *Rob Roy* recapture that settlement from Confederate irregulars.

July 22

MILITARY: Colonel Nathan B. Forrest and 1,000 Confederate cavalry capture Murfreesboro, Tennessee, defeating a Union garrison of 1,200 men. He does so by overrunning the camps of the 9th Michigan and 7th Pennsylvania Cavalries, then bluffing the still-intact 3rd Minnesota into surrendering.

- Confederate raiders under Colonel John H. Morgan return to Livingston, Tennessee, after a spectacular ride through Kentucky. The Federals also learn that a Confederate operative working for Morgan has tapped into their telegraph lines and intercepted army dispatches for the past 12 days.

NAVAL: The *Essex* under Captain William B. Porter, accompanied by the ram *Queen of the West*, resumes attacking the Confederate ironclad *Arkansas* off Vicksburg, Mississippi. Both Union vessels are driven off without seriously damaging their opponent, which defiantly steams past Vicksburg's batteries and challenges the Federals to fight.

July 23

MILITARY: General Henry W. Halleck, newly arrived general in chief at Washington, D.C., discusses the possibility of joint operations between Generals George B. McClellan and John Pope.

- Union cavalry under Colonel Hugh J. Kilpatrick, advancing from Fredericksburg, Virginia, raid Confederate supplies gathered at Carmel Church until driven off by General J. E. B. Stuart.
- General John Pope tightens restrictions upon the inhabitants of the Shenandoah region by insisting that all military-age males take an oath of allegiance or face deportation to the South.
- General Braxton Bragg begins skillfully transferring 31,000 Confederate troops from Tupelo, Mississippi, to Chattanooga, Tennessee—a distance of 776 miles—in one of the largest Southern rail movements of the war. However, Bragg leaves behind two independent and noncooperative leaders: Generals Sterling Price at Tupelo and Earl Van Dorn at Vicksburg, each commanding 16,000 men.

July 24

NAVAL: Falling water levels on the Mississippi River and rising sickness induce Admiral David G. Farragut to remove his squadron from below Vicksburg, Mississippi, to New Orleans, Louisiana, following two months on the river. Moreover, his experience outside Vicksburg convinces him that the city will never be taken by naval forces alone.

July 29

MILITARY: Federal authorities arrest Confederate spy mistress Belle Boyd at Warrenton, Virginia; she is sent to the Old Capitol Prison in Washington, D.C.

- The first elements of the Confederate Army of Mississippi arrive at Chattanooga, Tennessee, concluding a strategic transfer of resources from the Deep South back to the center. General Braxton Bragg skillfully cobbles together a force of 30,000 men for an impending offensive into Kentucky.

NAVAL: Ship “209,” christened *Enrica*, departs Liverpool, England, ostensibly for sea trials. It actually heads for Nassau, the Bahamas, for service with the Confederate navy as the infamous commerce raider *Alabama*.

July 31

MILITARY: Generals Braxton Bragg and Edmund Kirby Smith confer at Chattanooga, Tennessee, and hammer out a strategy for the upcoming Kentucky campaign. The former, while senior, fails to exert his authority over Kirby Smith, who insists upon and receives a virtually independent command.

- President Jefferson Davis directs that any Union officer captured from General John Pope’s Army of Virginia is to be treated like a felon. This is in retaliation for the policy wherein any Southern citizen can be shot for treason under Pope’s draconian administration of the Shenandoah Valley.

August 4

MILITARY: President Abraham Lincoln issues a call for 300,000 drafted militia to serve nine months; this levy will never be enacted. Yet, despite persistent manpower shortages, he declines the services of two African-American regiments from Indiana, suggesting instead that they be employed as laborers.

August 5

MILITARY: General John C. Breckinridge is ordered by General Earl Van Dorn to attack the Union enclave at Baton Rouge, Louisiana, with his 2,600 Confederates and accompanied offshore by the ironclad *Arkansas*. The Union garrison of 2,500 soldiers under General Thomas Williams deploys to receive him, and a sharp action erupts in very dense fog at around 4:30 P.M. Fighting subsides around six hours later when Breckinridge concedes defeat after his naval support is lost, and he retreats back to Vicksburg, Mississippi.

NAVAL: The large Confederate ironclad *Arkansas* under Lieutenant Henry K. Stevens steams down the Mississippi River to assist the expedition against Baton Rouge, Louisiana. His mission is to neutralize Union gunboats, but his craft suffers a broken propeller shaft en route and proves unable to effectively support the military effort ashore.

August 6

INDIAN: A starving band of Mdewakanton Santee (Sioux) tribesmen arrives at the Lower Agency, Minnesota, where Chief Little Crow (Taoyateduta) pleads with

agent Andrew F. Myrick for promised foodstuffs. However, war activities have delayed the arrival of treaty payments from Washington, D.C., and local authorities refuse to lend Little Crow the credit necessary to feed his people. Despite desperate entreaties for help, Myrick rebuffs the Indians, declaring, "So far as I am concerned, if they are hungry, let them eat grass." The chief and his entourage angrily depart, incensed at white indifference to their plight.

NAVAL: A Federal naval flotilla under Commander David D. Porter of the *Essex* attacks and further damages the large ironclad *Arkansas* near Baton Rouge, Louisiana. That vessel has a broken propeller shaft; when it grounds, Lieutenant Henry K. Stevens orders it scuttled to prevent capture.

August 6–9

MILITARY: At Kirksville, Missouri, a force of 1,000 Union cavalry under Colonel John McNeil surprises Colonel Joseph C. Porter's 2,500 Confederate troopers and drives them from the town. This victory helps to secure Federal control of northeastern Missouri.

August 7

MILITARY: A force of 24,000 Confederates under General Thomas J. Jackson decamps from Gordonsville, Virginia, and marches north to Orange Court House. However, because General Ambrose P. Hill completely misinterprets his orders and fails to leave camp, the usually hard-marching Confederates cover only eight miles.

August 8

MILITARY: Federal authorities again release and parole Confederate spy mistress Belle Boyd from the Old Capitol Prison, in Washington, D.C., citing lack of evidence to detain her further.

August 9

MILITARY: Aware that Confederates under General Thomas J. Jackson are converging upon his position near Cedar Mountain, Virginia, General Nathaniel P. Banks deploys 9,000 Federal troops of his II Corps at the mountain's base to receive him. Jackson attacks without proper reconnaissance and with two divisions, but at 4:30 P.M. Banks commits his entire reserves to battle, which outflank the Confederates and threaten to roll up their line. Jackson is rescued in timely fashion as the first elements of General A. P. Hill's division come trudging up the road and his line is stabilized. Banks then withdraws his men, and the Southerners retain possession of the field. Jackson loses 1,334 men to a Union tally of 2,353, a tally that leads participants to dub the engagement "Slaughter Mountain."

August 10

NAVAL: The English-built commerce cruiser *Florida* secretly arrives at Green Cay, Bahamas, where it is received by Lieutenant John N. Maffitt and taken into Confederate naval service.

August 13

MILITARY: General Robert E. Lee begins advancing his Army of Northern Virginia from the Peninsula and toward Gordonsville, Virginia. He begins by dispatching 30,000 men under General James Longstreet by rail; they are scheduled to link up with the corps of General Thomas J. Jackson.

August 16

MILITARY: General Edmund Kirby Smith departs Knoxville, Tennessee, with 10,000 men and plunges headlong through the Cumberland Gap and into Kentucky. This action initiates a concerted Southern effort to reclaim that state for the Confederacy.

NAVAL: Side-wheel steamer *General Bragg*, gunboats *Benton* and *Mound City*, and steam rams *Monarch*, *Lioness*, *Samson*, and *Switzerland* commence an armed expedition up the Yazoo River, Mississippi. Troops they convey will land occasionally, capturing some batteries and vessels.

August 17

INDIAN: Half-starved Sioux tribesmen stage an uprising in southwestern Minnesota by killing five settlers on their farm in Acton Township. Chief Little Crow, when informed of the action, realizes that war with the whites is unavoidable and takes to the warpath. The result is a savage, six-week conflict claiming upward of 600 lives.

August 18

INDIAN: Rampaging Sioux warriors attack the Upper and Lower Indian Agencies, Minnesota, killing 20 people, including Agent Andrew J. Myrick, whose mouth is stuffed with the very grass he told the Indians to eat. A detachment of 46 soldiers under Captain John Marsh, 5th Minnesota, advancing to rescue the workers, is ambushed at Redwood Ferry and nearly annihilated, with the loss of 24 soldiers.

MILITARY: At Veriersville, Virginia, the 1st Michigan Cavalry surprises the headquarters of General J. E. B. Stuart, nearly capturing that vaunted leader and making off with his famous plumed hat.

NAVAL: Four vessels under Acting Lieutenant John W. Kittredge bombard Corpus Christi, Texas, and put landing parties ashore, but are thwarted by the appearance of Confederate cavalry.

August 20

INDIAN: A large gathering of Mdewakanton Santee (Sioux) warriors under Chief Little Crow attack Fort Ridgely, Minnesota, and are repulsed by 180 soldiers and three cannon under Lieutenant Timothy Sheehan. The garrison loses six killed and 20 wounded while Santee casualties are considerably heavier. The Indians draw back but continue the siege while awaiting reinforcements.

MILITARY: Confederate military authorities issue a directive to execute any Northern officers found commanding African-American troops. Generals David Hunter and John W. Phelps, in particular, are likewise to be treated as felons, if captured, for their roles in arming slaves to fight in the Union army.

August 22

INDIAN: Chief Little Crow of the Mdewakanton Santee (Sioux) is joined by another 400 warriors of the Sisseton and Wahpeton bands, for a total of around 800. These warriors make another aborted attack upon the 180-man garrison of Fort Ridgely, Minnesota, and are again repulsed with 100 casualties. Federal troops sustain three killed and 13 wounded.

NAVAL: Rear Admiral Louis M. Goldsborough is ordered to detach ships from his North Atlantic Blockading Squadron and assist in relocating units belonging to the Army of the Potomac.

Little Crow (ca. 1820–1863)

Sioux chief

Little Crow (Taoyateduta) was born into the Mdewakanton (Santee) band of the Sioux nation around 1820, near present-day St. Paul, Minnesota. His father was a hereditary chief, and around 1834 Little Crow assumed control of his band. Contact with white settlers in this remote region was increasing, but the chief appears to have harbored no animosity toward them, and even sought out friendly relations. In 1846, after he was injured in an altercation with his brothers over the use of alcohol, Little Crow approached the Indian Agency at nearby Fort Snelling for missionaries to be sent among his people and dissuade them from drinking. In 1851 he was a signatory to the Treaty of Mendota, whereby the Santee ceded most of their territory to settlers and moved to reservations. Resentful Indians perpetrated the Spirit Lake Massacre of 1857, after which Little Crow offered to help track down those responsible. The following year he ventured to Washington, D.C.,

with a tribal delegation to further negotiate and secure an annuity of goods and food to assist his people. By 1861, however, the government was absorbed in the Civil War, and the Indian Department neglected its responsibilities toward feeding the Sioux as promised. By the summer of 1862 the Santee were reduced to eating their own horses to survive; when Little Crow angrily remonstrated to Agent Andrew Myrick that stockpiled supplies were deliberately being withheld, Myrick told him and his people to eat grass. Tensions flared further when angry Santee braves murdered five white settlers; Little Crow, bowing to the inevitable, began orchestrating an armed uprising.

On August 18, 1862, armed Sioux swooped down on unsuspecting white settlements, killing upward of 400 men, women, and children. The defiant Myrick was among the slain, his mouth stuffed with grass. The Indians continued on a rampage until a force under General Henry

August 23

INDIAN: New Ulm, Minnesota, is attacked by 400 rampaging Mdewakanton Santee (Sioux) under Chief Little Crow. The town, stoutly defended by civilians under Judge Charles Flandreau, is nearly consumed by fire, but the Indians are repulsed and withdraw. The whites lose 36 dead and 23 wounded; Sioux losses are unknown but presumed to be as heavy.

MILITARY: General J. E. B. Stuart attacks Catlett's Station, Virginia, headquarters of General John Pope. He seizes 300 captives, Pope's personal baggage and uniform, and valuable military correspondence. General Robert E. Lee is thereby informed of Union strategy to unite Pope's 51,000-man Army of Virginia with the 100,000-strong Army of the Potomac under General George B. McClellan. Lee begins formulating a plan to crush Pope before the two forces can merge.

MARINES: When drunken army recruits riot in New York City, marines from the Brooklyn Navy Yard are called in to restore order.

H. Sibley could organize a counterattack. The Sioux were decisively defeated at Wild Lake on September 23, 1862, and many prisoners were seized. President Abraham Lincoln spared most of them from the hangman's noose, but on December 26, 1862, 38 braves went to the scaffold in the largest mass execution in American history. For his part, Little Crow escaped capture and made his way into Canada, but British authorities refused his pleas for help. He returned to Minnesota the following year with a small band of warriors and resumed depredations against settlements. On July 3, 1863, he was shot and killed by farmers while picking berries. Little Crow's remains were then flung upon a garbage heap, where they remained for several months, although his skeleton eventually made its way into the collections of the Minnesota Historical Society. In 1971 the bones were turned over to his descendants and interred at a Sioux burial ground in South Dakota. For the time at which it was fought, Little Crow's uprising was one of the bloodiest Indian conflicts

Little Crow (*Library of Congress*)

in American history and initiated removal of the Sioux people from their ancestral homelands.

August 24

MILITARY: In a stunningly bold maneuver, General Robert E. Lee divides the Army of Northern Virginia by detaching 25,000 men under General Thomas J. Jackson's corps on a rapid march to destroy the Orange & Alexandria Railroad, thereby cutting General John Pope's supply line. His remaining 30,000 men under General James Longstreet will remain in place until Pope takes the bait.

NAVAL: Having received its armament, the English-built commerce raider *Alabama* is commissioned into Confederate service off Terceira, Azores, under the celebrated captain Raphael Semmes. Its ensuing 22-month cruise results in the destruction of 68 Union vessels valued at \$5.5 million.

August 25

MILITARY: General Thomas J. Jackson's corps detaches itself from the Army of Northern Virginia and advances to the Rappahannock River. By dint of hard

slogging, the Southerners cover 56 miles in only two days—one of the most impressive performances of the entire war—and arrive behind General John Pope’s Army of Virginia and between Pope and the Union capital at Washington, D.C.

- To placate Radical Republicans and alleviate manpower shortages, Secretary of War Edwin M. Stanton authorizes the recruitment of up to 5,000 African-American soldiers. Orders are then cut for General Rufus Saxton, military governor of the South Carolina Sea Islands, to raise five regiments of black troops for military service in the field. Much is anticipated from this pilot program. The War Department cautiously begins soliciting African Americans for military service, although they place a 5,000-man limit on recruiters, and these will be restricted to guard and labor duties.

August 26

MILITARY: In a surprise move, Confederate forces led by General Isaac Trimble storm into Manassas Junction, Virginia, capturing General John Pope’s main supply base. The usually malnourished Confederates of General Thomas J. Jackson, looking famously more like scarecrows than soldiers, gleefully gorge themselves. **NAVAL:** Captain Franklin Buchanan is promoted to rear admiral for his conduct aboard the *Virginia* on March 8, 1862, the first Confederate naval officer so honored.

August 27

INDIAN: A relief column of 1,400 soldiers under Colonel Henry H. Sibley arrives at Fort Sibley, Minnesota, from distant Fort Snelling. Meanwhile, a detachment of troopers under Major Joseph R. Brown is ambushed at Birch Coulee, losing 16 killed and 44 wounded.

MILITARY: General John Pope, stung by the capture of his supply base at Manassas Junction, hurriedly marches from behind the Rappahannock River in search of Confederates under General Thomas J. Jackson. Jackson, meanwhile, marches along the Warrenton Turnpike to await the arrival of General James Longstreet’s corps. The most perilous part of General Robert E. Lee’s strategy is about to be launched.

August 28

MILITARY: Generals Robert E. Lee and James Longstreet force a passage through Thoroughfare Gap, Virginia, determined to engage the main Union army. In the process, they encounter and brush aside a division under General James B. Ricketts and cavalry forces commanded by General John Buford.

- Two Confederate divisions of General Thomas J. Jackson surprise and attack a force of 2,800 Union troops under General Rufus King at Groveton, Virginia. However, as the heady Southerners advance, anticipating an easy victory, they charge headlong into the “Black Hat” brigade of General John Gibbon at Brawner’s Farm. A fierce stand-up fight of two hours ensues before both sides withdraw exhausted and depleted. Jackson loses 1,200 men out of 4,500 committed while Union forces sustain 1,100 casualties out of 2,800 present.

- General Braxton Bragg’s Confederate Army of Mississippi, soon to be redesignated the Army of Tennessee, proceeds northward from Chattanooga and into

Kentucky proper, several days behind a second column under General Edmund Kirby Smith.

- Fort Ridgely, Minnesota Territory, is relieved to see the blue-coats of Colonel Henry H. Sibley's newly recruited 6th Minnesota Infantry marching into view. As soon as Sibley can gather troops and supplies, he intends to take the war to the Indians.

August 29

MILITARY: General Thomas J. Jackson assumes defensive positions along an unfinished railroad berm near Groveton, Virginia, as Union forces under General John Pope amass 65,000 men for an attack. The Second Battle of Manassas begins as Generals Franz Sigel and Joseph Hooker assail Jackson's line while the V Corps under General Fitz-John Porter detects the approach of General James Longstreet's 30,000 Confederates on Pope's left flank. Porter immediately notifies his superior as to the danger confronting his army, but Pope nonetheless orders him to attack Jackson's position at once. Porter disobeys and prepares to receive Longstreet; this insubordination will cost him his career but probably spares the Army of Virginia from annihilation.

August 30

MILITARY: The Second Battle of Manassas resumes as Union troops, ordered by General John Pope to pursue supposedly defeated Confederates, find the rebels occupying strong defensive positions instead. Regardless, General Fitz-John Porter's V Corps surges forward and assails Jackson's right in waves of blue-coated infantry. Suddenly a massed charge, spearheaded by General John B. Hood's Texan Brigade, begins rolling up the Union left. Jackson, seeing his Federal opponents suddenly waver, orders his own men forward in front, and Pope's army dissolves. Losses at Second Manassas are severe, with Pope reporting 16,054 men lost while Lee sustains 9,197. Moreover, the Southerners are now positioned to take the war northward into Maryland.

- General Mahlon D. Manson, bolstered by the arrival of troops under General Charles Cruft, pours 6,500 Federal soldiers—mostly new recruits—into defensive positions six miles below Richmond, Kentucky. General Patrick R. Cleburne's Confederates attack and dislodge the defenders, who fall back in confusion through the streets of Richmond and toward Louisville. Southern losses are 98 killed, 492 wounded, and 10 missing while Manson suffers 206 killed, 844 wounded, and 4,303 captured. The Confederate invasion of Kentucky is off to a productive start, and they begin advancing toward the Ohio River.

August 31

MILITARY: The Union Army of Virginia under General John Pope regroups and rallies at Centreville, Virginia, as General Robert E. Lee dispatches the fast moving command of General Thomas J. Jackson on a forced march around the Union left to possibly cut any retreat to Washington, D.C.

September 1

MILITARY: Confederates under General Thomas J. Jackson, reposing around Ox Hill and Chantilly, Virginia, are suddenly accosted by Union forces from

General Joseph Hooker's division. Fighting commences around 4:00 P.M. when additional Federals under General Isaac I. Stevens, IX Corps, advance down Warrenton Pike and charge. These are then bolstered by the appearance of General Philip Kearny's brigade, which laces into advancing Confederates and closes a gap in Union lines. However, Kearny, while conducting a personal reconnaissance ahead of his troops, stumbles into Confederate pickets and is shot dead. Losses in this brief but destructive affair are estimated at 500 Confederates and 700 Federals.

NAVAL: Command of the North Atlantic Blockading Squadron passes from Rear Admiral Louis M. Goldsborough to Rear Admiral Stephen Lee.

September 2

INDIAN: A detachment of 150 soldiers is attacked in camp at Birch Coulee, Minnesota, by Santee warriors under Big Eagle (Wambdi Tanka). They manage to keep their attackers at bay for the next 31 hours until General Henry H. Sibley can arrive with the balance of his forces to relieve them. The Sioux simply vanish into the countryside.

MILITARY: President Abraham Lincoln, ignoring the advice of his cabinet, restores General George B. McClellan as head of the Army of the Potomac, a decision widely hailed by soldiers in the ranks. The bumbling and recently disgraced General John Pope, meanwhile, continues on without an official command.

September 3–5

MILITARY: General John Pope remonstrates to General in Chief Henry W. Halleck that his recent debacle at Second Manassas is entirely due to General Fitz-John Porter's refusal to obey orders—and to General George B. McClellan for failing to provide timely support.

September 4

MILITARY: The Army of Northern Virginia under General Robert E. Lee puts 40,000 men across the Potomac River at White's Ford, Virginia, and filters into Maryland. The invasion of the North commences.

NAVAL: The *Florida* under Lieutenant John N. Maffit plunges past Union vessels and enters Mobile Bay, Alabama. His success results in an official rebuke for local commanders and demands for better management of the blockade effort.

September 5

MILITARY: General John Pope is formally relieved of command and ordered back to Washington, D.C., for reassignment. General in Chief Henry W. Halleck then orders that his Army of Virginia is to be consolidated within the Army of the Potomac under General George B. McClellan.

NAVAL: The *Alabama* under Captain Raphael Semmes commences its celebrated raiding career by seizing and burning the Union vessel *Ocmulgee* off the Azores.

September 6

MILITARY: General John Pope accepts the military equivalent of Siberian exile by assuming command of the Department of the Northwest (Wisconsin, Iowa, Minnesota, and the Nebraska and Dakota Territories). There he is primarily concerned with ending a deadly Sioux uprising.

September 7

MILITARY: The Union capital at Washington, D.C., panics as Confederate forces under General Robert E. Lee occupy Frederick, Maryland—within striking distance to the northwest. General George B. McClellan, newly reappointed as commander of the Army of the Potomac, sallies forth from the capital to engage them.

September 8

MILITARY: General Robert E. Lee issues a proclamation to the inhabitants of Maryland, assuring them that “We know no enemies among you, and will protect all, of every opinion.” Regardless, public attitude toward the invaders remains tepid.

NAVAL: Commodore John Wilkes assembles the West India Squadron (a mobile or “flying” squadron) and is tasked with halting depredations by Confederate raiders *Alabama* and *Florida*. The Navy Department also offers a \$500,000 reward for the *Alabama*’s capture.

September 9

MILITARY: As the Army of Northern Virginia passes through Frederick, Maryland, General Robert E. Lee expresses concern about the sizable Union garrison holding Harpers Ferry, Virginia, as it could threaten his rear. He therefore issues Special Order No. 191, which detaches the corps of General Thomas J. Jackson back into the Shenandoah Valley to capture that strategic post while General James Longstreet’s corps advances toward Hagerstown, Maryland. Lee has again daringly—and dangerously—split his army in two.

September 10

MILITARY: The Confederate corps of General Thomas J. Jackson, accompanied by the divisions of Generals Lafayette McLaws and John G. Walker, departs its cantonment near Frederick, Maryland, and executes a converging movement against Harpers Ferry in northern Virginia. Meanwhile, General James Longstreet continues marching toward Hagerstown, Maryland, leaving the Army of Northern Virginia badly dispersed and subject to defeat in detail.

September 12

MILITARY: The Union’s Army of Northern Virginia, formerly commanded by the luckless Major General John Pope, is officially disbanded and reorganized into the new XI, XII, and XIII Corps in the Army of the Potomac.

September 13

MILITARY: Private Barton W. Mitchell of the 27th Indiana accidentally finds a copy of General Robert E. Lee’s Special Order No. 191 wrapped around a discarded cigar. Once informed, General George B. McClellan suddenly realizes that the Southerners are scattered and subject to defeat in detail. Inexplicably, he waits 16 hours before putting the army in motion, letting his golden opportunity ebb.

- Harpers Ferry in northwestern Virginia is being enveloped by a three-pronged Confederate maneuver. General Lafayette McLaw’s division occupies neighboring Maryland Heights across the river while General John G. Walker positions his force on nearby Loudoun Heights. The 12,000-man Union garrison under Colonel Dixon S. Miles is thus speedily trapped by 23,000 Confederates now enjoying superiority in both numbers and position.

September 14

MILITARY: General George B. McClellan sorties his entire Army of the Potomac, intending to catch the dispersed Confederates of General Robert E. Lee before they can regroup. He orders the IX Corps under General Jesse L. Reno and the I Corps of General Joseph Hooker to march their respective ways through Fox Gap and Turner's Gap near South Mountain, but they encounter General James Longstreet's command. Longstreet feeds the brigades of Generals Robert Rodes and John B. Hood into the fray, but they slowly give ground. The Federals clear South Mountain by 10 P.M., with 28,500 men pushing back 17,850 Confederates. Losses in this severe engagement amount to 2,325 Union (including Major General Reno, slain) to 2,685 Confederate. The Union noose is slowly drawing shut.

- Cognizant of General Robert E. Lee's dispersed Army of Northern Virginia, General George B. McClellan dispatches the VI Corps of General William B. Franklin to advance with all haste through Crampton's Gap, Maryland. They encounter a smaller Confederate force, yet their two divisions of 12,800 men take nearly all day to battle their way up a hillside and flush the defenders from the heavily wooded slopes. By 6:00 P.M., the exhausted Southerners begin streaming down the mountainside in confusion, and Franklin is finally positioned to pitch full force into General Lafayette McLaws's division at Harpers Ferry, Virginia. However, he overestimates the size of the Southern forces opposing him and encamps for the night.
- Confederate artillery ringing Harpers Ferry begin bombarding Union positions to force the garrison of Colonel Dixon S. Miles into submission. The shelling is intense and intimidating, but relatively few injuries result. Worse, in light of the Battle of South Mountain, General Thomas J. Jackson must seize the town no later than tomorrow morning, lest General Robert E. Lee be forced to cancel his invasion of Maryland.
- General Sterling Price occupies Iuka, Mississippi, with 15,000 soldiers prior to uniting with General Braxton Bragg in Kentucky. General Ulysses S. Grant, however, sees an opportunity to trap and destroy the exposed Confederates. He therefore orders columns under Generals William S. Rosecrans and Edward O. C. Ord to approach Iuka from different directions and catch the defenders in a pincer movement.

September 15

MILITARY: General Robert E. Lee instructs his Army of Northern Virginia, presently strung out along the hills of Sharpsburg, Maryland, to begin consolidating in order to thwart a possible attack by superior Union forces. He also recalls the army of General Thomas J. Jackson from the Shenandoah Valley immediately.

- After a prolonged bombardment in which Colonel Dixon S. Miles is mortally wounded, General Julius White surrenders the Union garrison at Harpers Ferry, Virginia to General Thomas J. Jackson. For a loss of 39 dead and 247 injured, the Southerners kill 44, wound 173, and seize 12,520 prisoners, and capture a like number of small arms, 73 cannon, tons of supplies and equipment, and innumerable livestock. This is the largest Federal capitulation of the Civil War; Jackson quickly rounds up his prize and proceeds to Antietam, Maryland, with alacrity.

September 16

MILITARY: General Robert E. Lee, buoyed by the recent seizure of Harpers Ferry in northwestern Virginia, determines not to leave Maryland without a fight and positions his army along a series of low hills at Sharpsburg (Antietam). He initially musters only 18,000 troops, but the lethargic movements of the Army of the Potomac allow two divisions of General Thomas J. Jackson's corps to arrive and deploy on the Confederate left. Jackson's third division, under General Ambrose P. Hill, is still at Harpers Ferry, 17 miles distant, but under orders to join the main body at once.

September 17

MILITARY: The Battle of Antietam commences at 5:30 A.M. when 12,000 soldiers of General Joseph Hooker's I Corps advance against the Confederate left under General Thomas J. Jackson. Hooker makes good progress against the first row of defenders in a cornfield until General John B. Hood's Texas brigade bursts onto the scene and drives him back. Jackson then counterattacks across the line and is heavily repulsed in turn. In the Confederate center, General Daniel H. Hill leads 5,000 men slung along the length of a sunken road, which acts as a trench. Heavily pressed, Hill is forced to retire though a deadly enfilade fire that drops men in clumps, and bequeaths to his position the nickname "Bloody Lane." The locus of combat then shifts to the Confederate right, where General Ambrose Burnside's men make repeated and ineffectual attempts to cross a stone bridge over Antietam Creek. He finally succeeds at 3:00 P.M. and advances, but Burnside's own left is suddenly assailed by General Ambrose P. Hill's "Light Division," and the Federals are driven back to their starting point. McClellan, with 75,000 present (although 25,000 are not engaged), suffers 12,410 casualties while Lee, who can ill-afford such attrition, loses 11,172. The combined total of 3,500 dead and 17,100 wounded renders this the single bloodiest day in American military history. McClellan subsequently informs the president of a great victory, but allows Lee to retire without interference.

- General Braxton Bragg's Confederates capture 4,000 Union troops under Colonel John T. Wilder at Munsford, Kentucky, but only after a curious play of chivalry unfolds. Wilder, an amateur soldier, arrives at General Simon B. Buckner's headquarters under a flag of truce and seeks his advice as a gentleman. The general willingly obliges his visitor by taking him on a tour of Confederate lines to highlight their superiority in numbers. Wilder, finally convinced, agrees to lay down his arms.
- The failure of General Robert E. Lee at Antietam grants President Abraham Lincoln the military pretext he has been seeking to announce his Emancipation Proclamation.

September 18

MILITARY: General Robert E. Lee disengages and begins ferrying the Army of Northern Virginia across the Potomac River at Blackford's Ferry, Maryland, and back into Virginia. He departs having sustained thousands of casualties, but the superior forces under General George B. McClellan fail to intervene or even to actively pursue.

- At Fort Union, New Mexico Territory, Brigadier General Edward R. S. Canby is transferred east and replaced by newly promoted brigadier general James Carleton.

September 19

MILITARY: Union columns of 9,000 men each, under Generals William S. Rosecrans and Edward O. C. Ord, march west and south of Iuka, Mississippi, attempting to crush 15,000 Confederates under General Sterling Price between them. However, Price's cavalry alerts him of their approach, and he prepares to attack Rosecrans before the two forces can unite. General Henry Little's division spearheads the Southern assault, which crumples the Union left and seizes nine cannon of the 11th Ohio battery. Ultimately, Price abandons his offensive by nightfall and elects to join up with Confederate forces under General Earl Van Dorn, then planning an attack upon Corinth. Casualties are 86 Southerners killed, 408 wounded, and 200 captured to a Union tally of 141 men dead, 613 injured, and 36 missing.

September 20

MILITARY: A Confederate division under General Ambrose P. Hill advances against two Union brigades crossing Boetler's Ford into Virginia. As he deploys to attack, his men come under severe fire from 70 Union fieldpieces posted across the river. The Confederates nonetheless advance and drive the Federals back across the stream into Maryland.

NAVAL: Admiral Samuel F. Du Pont warns Assistant Secretary of the Navy Gustavus V. Fox of the perils facing any contemplated attack upon Charleston, South Carolina. "It is a cul-de-sac," he declares, "and resembles a porcupine's hide turned outside in than anything else, with no outlet—you go into the bag—no running forts as at New Orleans." His warnings go unheeded by the Navy Department.

September 23

INDIAN: As Little Crow's band of 800 Mdewakanton Santee (Sioux) warriors flee up the Minnesota Valley, they are pursued by 1,600 volunteers and troops under Colonel Henry H. Sibley. Sibley encamps for the evening at Lone Tree Lake (reported as Wood Lake), but at dawn Little Wolf suddenly turns and springs on his pursuers. Fortunately for Sibley, several of his men are trying to desert when they run headlong into the Indians, and the entire camp is thus alerted. The Santee are subsequently repulsed by artillery and Chief Mankato, and 30 warriors are killed. Sibley presses ahead, and the bulk of the Santee surrender en masse. The soldiers rescue 269 white hostages while taking 2,000 Native Americans prisoner, many of whom are slated for execution due to atrocities against settlers. For his part, Sibley becomes a brigadier general of volunteers and is placed in charge of the Military District of Minnesota.

September 25

NAVAL: Screw steamer *Kensington*, assisted by *Henry James* and *Rachel Seaman*, destroys Confederate batteries at Sabine, Texas, while landing parties go ashore to destroy a railroad bridge.

MARINES: The Pensacola Navy Yard, Florida, is reoccupied by marines after being 18 months in enemy hands.

September 26

NAVAL: Rear Admiral Samuel F. Du Pont suggests that a vessel be deployed as a coal hulk capable of carrying 1,000 tons of coal at sea. This is a precursor of modern-day refueling at sea.

September 27

MILITARY: The first regiment of former African-American slaves, the *Chasseurs d'Afrique*, musters into Union service at New Orleans, Louisiana, at the behest of General Benjamin F. Butler. They are renamed the 1st Louisiana Native Guards. There is no shortage of enthusiasm among blacks to serve in the military; within weeks, two additional infantry regiments and one of artillery will also be raised.

September 28

MILITARY: The armies of Generals Sterling Price and Earl Van Dorn unite at Ripley, Tennessee, prior to launching offensive operations against the vital railroad junction at Corinth, Mississippi. Van Dorn, who enjoys seniority over the resentful Price, is regarded as nominal commander.

September 29

MILITARY: At Louisville, Kentucky, a long-standing feud between Union generals Jefferson C. Davis and William Nelson climaxes when the former shoots and kills the latter in the lobby of a hotel. In a controversial move, Davis is released on bail and allowed to serve throughout the war; the murder charge against him will be dropped in 1864.

September 30

MILITARY: A strong detachment of 4,500 Union and territorial troops under General Edward Salomon skirmishes with a small Confederate detachment at Newtonia, Missouri. Newly arrived Southerners under Colonel Douglas H. Cooper are roughly handled by Salomon and are rescued only by the timely appearance of Colonel Joseph O. Shelby's 5th Missouri Cavalry, accompanied by several mounted battalions of Cherokee, Chickasaw, and Choctaw. Salomon consequently orders a retreat in the direction of Sarcoxie, accomplished under close pursuit.

October 1

MILITARY: The 50,000-man Army of the Ohio under General Don Carlos Buell departs Louisville, Kentucky, in four columns; three of these will concentrate at Perryville while a fourth is ordered to demonstrate toward Confederate-held Frankfort. Their movements are complicated by incessant heat and shortages of water.

- In a fateful move, General John C. Pemberton arrives at Vicksburg, Mississippi, superseding General Earl Van Dorn as commander of the Department of Mississippi and East Louisiana.

NAVAL: All army vessels belonging to the Western Gunboat Fleet are formally transferred from the War Department to the Navy Department. Command of the newly designated Mississippi Squadron now devolves upon Rear Admiral David D. Porter, who replaces the scholarly but less aggressive Charles H. Davis.

October 2

MILITARY: In a less-than-subtle hint, President Abraham Lincoln sets up his tent right next to General George B. McClellan's headquarters in an attempt to spur that officer to greater efforts.

October 3

MILITARY: Confederate forces numbering 22,000 troops under Generals Earl Van Dorn and Sterling Price attack 23,000 Union troops commanded by General

William S. Rosecrans at Corinth, Mississippi. The latter deploys his men in several, mutually supporting lines of defense, with all intervals between them covered by carefully sited cannon. The impetuous Van Dorn encounters the first line of Union earthworks around 9:30 A.M., after which the Confederates, with great gallantry and heavy losses, grind the defenders back toward their second line of entrenchments. That night, Van Dorn redeploys his army in a semicircle around the town and its chain of five lunettes (batteries).

NAVAL: A Union flotilla of five warships under Commander William B. Renshaw commences bombarding Galveston, Texas, into submission; the city will capitulate six days later.

October 4

MILITARY: At 4:00 A.M., Confederates under General Earl Van Dorn resume attacking General William S. Rosecrans's defensive works at Corinth, Mississippi. By dint of hard fighting and heavy sacrifice, part of General Martin E. Green's division storms and seizes the Robinson lunette while his remaining brigades actually force their way into the town. But resistance is fierce and Van Dorn finally concedes defeat around 1:00 P.M., ordering a withdrawal to Ripley. Federal casualties are put at 2,520 while Van Dorn sustains 4,233—losses the Confederacy can ill afford in this theater.

- In the Confederate-held capital of Frankfort, Kentucky, Governor Richard Haws takes his oath of office with General Braxton Bragg in attendance. However, the attendant festivities are suddenly cancelled when word arrives of 20,000 approaching Union troops.

October 5

MILITARY: General Earl Van Dorn's Confederates retreat from Corinth, Mississippi, into Holly Springs, but are intercepted by Union troops under General Edward O. C. Ord along the Hatchie River, Tennessee. An intense but indecisive clash erupts and 300 Confederates fall captive, but the Southerners continue retreating.

October 6

MILITARY: A frustrated president Abraham Lincoln orders General Henry W. Halleck to prod dithering general George B. McClellan into action. "The President directs that you cross the Potomac and give battle to the enemy or drive him south," Halleck's telegram read. "Your army must move now while the roads are good." McClellan, true to character, ignores the directive.

October 7

MILITARY: The III Corps of General Charles C. Gilbert's Army of the Ohio trudges down the Springfield Road near Perryville, Kentucky, where his progress prompts the Confederate Army of Mississippi under General Braxton Bragg to begin massing its 16,000 men for an attack. However, due to poor cavalry reconnaissance, Bragg is unaware that two more corps under General Don Carlos Buell arrive that evening, raising Federal totals to 25,000.

October 8

MILITARY: General Don Carlos Buell arranges his 25,000 men for battle near Perryville, Kentucky. At 10:00 A.M., General Braxton Bragg arrives at the front and orders the Confederates forward against the Union left. General William J.

Hardee is also directed to mass his troops along the center to keep Union forces at bay. At 2:00 P.M., General Leonidas K. Polk's command, infiltrating through an unguarded ravine, suddenly turns the Union left and violently drives it back. In the re-formed center, the Union III Corps handily repels a Southern attack by Colonel Samuel Powell's brigade, and troops under General Philip H. Sheridan begin pressing Confederate lines. Fighting rages on until darkness. Bragg wins a tactical victory but finally perceives that he is badly outnumbered and withdraws in good order to Harrodsburg. The Battle of Perryville proves a costly encounter for both sides: Buell records 4,211 casualties while Bragg sustains 3,405.

October 10

MILITARY: General J. E. B. Stuart leads his force of 1,800 Confederate troopers out of Darkesville, Virginia, and fords the Potomac River near Black Creek, Maryland. His orders are to destroy the Cumberland Valley railroad bridge near Chambersburg, Pennsylvania, a major supply artery for the Army of the Potomac.

October 11

NAVAL: Confederate raider *Alabama* under Captain Raphael Semmes captures and burns the Union vessel *Manchester*. He also learns from reading captured New York newspapers the dispositions of several U.S. Navy warships looking for him.

October 12

NAVAL: Confederate commander and noted oceanographer Matthew F. Maury pilots the *Herald* past the Union blockade off Charleston, South Carolina, then sails for England to purchase additional warships for the South.

October 13

MILITARY: President Abraham Lincoln again urges General George B. McClellan to resume offensive operations. "Are you not being over-cautious when you assume that you can not do what the enemy is constantly doing?" he pointedly inquires. McClellan nevertheless refuses to budge and spends several days reorganizing and resting the Army of the Potomac.

- Defeated Confederates under General Braxton Bragg and Edmund Kirby Smith filter back through the Cumberland Gap into Tennessee. Their much-heralded invasion of Kentucky, representing the high tide of Confederate fortunes in the center region, has dismally failed.

October 15

NAVAL: Landing parties from the screw steamer *Kensington* and the schooner *Rachel Seaman* attack and destroy another railroad bridge at Taylor's Bayou, Texas. Confederate schooners *Lone Star* and *Stonewall* are also burned.

October 16

MILITARY: The Department of the Tennessee is resurrected with General Ulysses S. Grant as commander. He begins marshaling men and resources for an immediate campaign against Vicksburg, Mississippi.

October 17

MILITARY: Colonel John H. Morgan takes 1,800 cavalry and departs from his Confederate camp, 25 miles southeast of Richmond, Kentucky, on his second

major raid of the war. He gallops for the lightly defended town of Lexington, intending to take it by storm.

October 20

MILITARY: President Abraham Lincoln instructs former politician-turned-general John A. McClernand to command the newly formed Army of the Mississippi and then to mount an expedition with troops from Indiana, Illinois, and Iowa against Vicksburg, Mississippi. This action complicates and infringes upon efforts already underway by General Ulysses S. Grant.

October 24

MILITARY: General Don Carlos Buell is sacked a second time as commander of the Army of the Ohio for failing to aggressively pursue General Braxton Bragg's defeated army, now safely reposing at Knoxville and Chattanooga, Tennessee.

NAVAL: A rather aggressive landing party put ashore by the gunboat *Baron De Kalb* at Hopefield, Arkansas, tangles with Southern irregulars, then mounts captured horses and pursues the guerrillas nine miles before capturing them.

October 25

MILITARY: President Abraham Lincoln again urges General George B. McClellan to commit the Army of the Potomac to offensive operations in Virginia. When McClellan informs the president of his fatigued horses, an angry chief cables back, "Will you pardon me for asking what the horses of your army have done since the battle of Antietam that fatigue anything?"

October 26

MILITARY: After continual prodding, General George B. McClellan finally crosses the Potomac River back into Virginia, but so cautiously that General Robert E. Lee's Confederates easily interpose themselves between the invaders and Richmond. President Abraham Lincoln is nonetheless "rejoiced" at the news.

- The Union Army of the Mississippi under General John A. McClernand is disbanded and reassigned, largely through the machinations of General Ulysses S. Grant.

October 28

MILITARY: Union forces win a short but intense battle at Island Mounds, Missouri. This is also the first combat action by African-American soldiers of the 1st Kansas Colored Volunteer Infantry, which loses 10 dead and 12 wounded in its baptism of fire.

NAVAL: A Confederate boat party under Lieutenant John Taylor Wood captures and burns the Union vessel *Alleghanian* in Chesapeake Bay.

October 30

NAVAL: The U.S. Navy Department announces a \$500,000 reward for the capture of Confederate raider "290" (*Alabama*). A dozen warships, better employed elsewhere, are necessarily sent off in pursuit.

October 31

NAVAL: To compensate for its lack of warships, the Confederate Congress authorizes a Torpedo Bureau under General Gabriel J. Rains and an embryonic Naval Submarine Battery Service headed by Lieutenant Hunter Davidson. The numer-

ous devices they test and deploy prove menacing to Union vessels at sea, in harbors, and especially on rivers—ultimately sinking 40 ships.

- To support military operations in North Carolina, a force of U.S. Navy steamers, accompanied by the army gunboat *Vidette*, bombards Confederate positions at Plymouth, North Carolina.

November 3

NAVAL: In Berwick Bay, Louisiana, the Confederate steamer *Cotton*, backed by shore batteries, engages four Union vessels and damages several before being forced to retreat.

November 4

TECHNOLOGY: In Indianapolis, Indiana, Richard J. Gatling receives a government patent for his revolutionary, multi-barreled, rapid-fire Gatling gun, a precursor to modern machine guns. Though crude by today's standards, Gatling's device can shoot 200 rounds per minute for sustained periods of time without jamming. Functional models will be developed by the end of the war but only rarely committed to combat operations.

November 5

MILITARY: President Abraham Lincoln, exasperated by General George B. McClellan's dilatoriness, finally orders him replaced as head of the Army of the Potomac by General Ambrose E. Burnside.

November 6

MILITARY: At Chester Gap, Virginia, 1,500 Union cavalry headed by Brigadier General Alfred Pleasonton defeat twice their number of Confederate troopers headed by the redoubtable General J. E. B. Stuart. Consequently, Pleasonton receives a division of cavalry in the Army of the Potomac.

November 7

MILITARY: Major General George B. McClellan is formally dismissed as commander of the Army of the Potomac and is succeeded by a very reluctant major general Ambrose E. Burnside.

November 8

MILITARY: After a stormy and controversial tenure commanding the Department of the Gulf at New Orleans, Louisiana, General Benjamin F. Butler is replaced by General Nathaniel P. Banks. To preempt any celebrations by the populace, Butler peremptorily closes all breweries and distilleries within his jurisdiction.

November 9

MILITARY: General Ambrose E. Burnside formally assumes command of the Army of the Potomac, a position he never sought and tried twice to refuse. Acting upon his instructions, Union cavalry under Colonel Ulric Dahlgren dash spectacularly through Confederate positions at Fredericksburg, Virginia, taking 54 prisoners. This feat proves that the town's defenses are weak and Burnside makes plans for an offensive there.

November 10

MILITARY: General Joseph Hooker replaces General Fitz-John Porter as V Corps commander in the Army of the Potomac. Porter is slated to undergo court-martial proceedings for his role in the Battle of Second Manassas.

November 14

MILITARY: Newly installed general Ambrose E. Burnside, commanding the Army of the Potomac, effects a major reorganization of his charge by placing Generals Joseph Hooker, Edwin V. Sumner, and William B. Franklin as commanders of the Right, Central, and Left Grand Divisions, respectively. These new formations consist of two corps apiece.

November 15

MILITARY: General Ambrose E. Burnside initiates an advance upon Falmouth, Virginia, by first feinting toward Warrenton. An excellent organizer, his troops cover 40 miles in two days of hard slogging and arrive opposite the town of Fredericksburg on the Rappahannock River. Burnside's alacrity leaves the Confederate high command perplexed as to his locale and intentions.

NAVAL: President Abraham Lincoln and several cabinet members narrowly escape injury when an experimental Hyde rocket accidentally explodes during a demonstration at the Washington Navy Yard.

November 17

MILITARY: The Right Grand Division of the Army of the Potomac, under General Edwin V. Sumner, deploys at Falmouth, Virginia, directly across from Fredericksburg on the Rappahannock River. This concludes an impressive, 40-mile march by the usually plodding Army of the Potomac. This maneuver, orchestrated by General Ambrose E. Burnside, proves so stealthy that General Robert E. Lee temporarily loses contact with his adversary's whereabouts.

November 18

MILITARY: The Army of the Potomac under General Ambrose E. Burnside continues occupying Falmouth, Virginia, behind the Rappahannock River and directly opposite the heights of Fredericksburg. However, the general will take no offensive action over the next three weeks, allowing Confederates under General James Longstreet to arrive.

NAVAL: The Confederate raider *Alabama*, briefly blockaded at Martinique by the screw frigate *San Jacinto*, manages to evade its antagonist in bad weather and escapes.

November 19

NAVAL: The gunboat *Wissahickon* and the screw steamer *Dawn* are temporarily diverted from blockading duty at Ossabaw Sound, Georgia, and shell Confederate-held Fort McAlister on the Ogeechee River.

November 21

MILITARY: General Ambrose E. Burnside demands that the mayor of Fredericksburg, Virginia, surrender. When he refuses, Burnside advises him to evacuate women and children from the town.

November 22

MILITARY: General Ambrose E. Burnside reverses himself and assures the mayor of Fredericksburg, Virginia, that he will not fire into the town. In exchange, he expects no hostile actions on behalf of its inhabitants.

November 23

NAVAL: After seizing two schooners at Jacksonville, North Carolina, the side-wheel steamer *Ellis* grounds while being bombarded by Confederate batteries. Its commander, Lieutenant William B. Cushing, orders it burned to prevent capture, and the crew escapes on its prizes.

November 24

MILITARY: President Jefferson Davis elevates General Joseph E. Johnston to commander of Confederate troops in the west, succeeding Generals John C. Pemberton and Braxton Bragg. He is specifically tasked with guiding Pemberton in the defense of Vicksburg, Mississippi.

November 26

MILITARY: President Abraham Lincoln confers with General Ambrose E. Burnside at Aquia Creek, Virginia, over his prospective assault upon Fredericksburg. The general seeks a direct attack while the president argues for a multipronged approach. At length the general's view prevails.

November 28

MILITARY: In a preemptive strike, Union general James G. Blunt and 5,000 men attack 2,000 Confederate cavalry under General John S. Marmaduke at Cane Hill, Arkansas. The Southerners are driven into the Boston Mountains, but Blunt declines to pursue for fear of being surrounded. However, his presence induces General Thomas C. Hindman to attack Blunt's isolated column in turn.

November 29

MILITARY: General John B. Magruder arrives to take charge of the District of Texas, New Mexico, and Arizona. He makes recapturing the port city of Galveston an immediate priority and begins marshaling the requisite men and ships for a surprise attack.

NAVAL: General John B. Magruder orders the Confederate steamers *Bayou City* and *Neptune* outfitted with bales of cotton "armor" and transformed into "cotton-clads." They will figure prominently in the upcoming attack upon Galveston, Texas.

November 30

MILITARY: After incessant delays, pontoons and other bridging equipment requested three weeks earlier by General Ambrose E. Burnside arrive at Falmouth, Virginia. The Army of the Potomac is now enabled to cross the Rappahannock River to Fredericksburg, but during this interval General Robert E. Lee has rushed 35,000 men under General James Longstreet to fortify the heights above the city.

December 1

NAVAL: In his annual report, Secretary of the Navy Gideon Welles states that the U.S. Navy contains 427 vessels mounting 1,577 guns. These are manned by 28,000 enlisted men and officers.

December 2

NAVAL: Confederate steamer *Queen of the Bay* runs aground off Padre Island, Texas, and is attacked by Union boats sent by the gunboat *Sachem*, but the Southerners pick up rifles and successfully defend their craft

December 3

MILITARY: General Thomas C. Hindman marches his Confederate Army of the Trans-Mississippi, 11,000 strong, from Van Buren, Arkansas, in bitter winter weather. His goal is to strike and destroy the outnumbered Union division of General James G. Blunt at Cane Hill. However, Blunt is alert to the danger and appeals to General Francis J. Herron at Springfield, Missouri, for immediate assistance.

- General Joseph E. Johnston arrives to coordinate military operations of General John C. Pemberton at Vicksburg, Mississippi, and General Braxton Bragg at Nashville, Tennessee. This additional level of authority further complicates an already Byzantine command structure.

December 5

INDIAN: President Abraham Lincoln pardons the bulk of 303 Santee (Sioux) warriors slated for execution for their role in a bloody uprising. The final number condemned to be hung is 39.

MILITARY: In one of the most amazing forced marches of the entire Civil War, two Union divisions from the Army of the Frontier under General Francis J. Herron slog 100 miles from Springfield, Missouri, and miraculously arrive at Fayetteville, Arkansas, two days later to reinforce General James G. Blunt at Cane Hill. This remarkable accomplishment preserves the Union war effort in Arkansas.

December 7

MILITARY: General John H. Morgan and 2,400 Confederate cavalry surprise and capture Hartsville, Tennessee, along with 1,800 Union captives under Colonel Absalom B. Moore.

- General Thomas C. Hindman commences the Battle of Prairie Grove, Arkansas, by advancing upon the footsore host of General Francis J. Herron, eight miles from Fayetteville. He possesses 11,000 men and outnumbers his opponent but, having achieved strategic surprise, Hindman inexplicably assumes defensive positions. Fighting commences around 9:30 A.M., when the aggressive Herron attacks what he perceives to be a small Confederate force. He is badly repelled in a series of charges while subsequent Confederate advances are likewise driven back by superior Union artillery. General James G. Blunt's Army of the Frontier then hurriedly marches to Prairie Grove with its own fresh troops and fighting continues until nightfall. Union forces totaling 8,000 men sustain 1,251 casualties while 11,000 Confederates present endure 1,317. Hindman, short on supplies, has little option but to withdraw.

MARINES: The Confederate raider *Alabama* seizes the Union steamer *Ariel* along with 136 Marines headed for Mare Island, California. They are disarmed and paroled, then allowed to continue on their journey.

December 8

NAVAL: President Abraham Lincoln recommends Captain John L. Worden for a congressional vote of thanks for his role in commanding the *Monitor* at Hampton Roads.

December 9

NAVAL: Command of the East Gulf Blockading Squadron passes to Rear Admiral Theodorus Bailey.

December 11

MILITARY: The Army of the Potomac under General Ambrose E. Burnside begins bridging its way across the Rappahannock River to Fredericksburg, Virginia. However, as the fog lifts, the engineers receive heavy sniper fire from General William Barksdale's Mississippi brigade. Burnside then orders his artillery to bombard Fredericksburg in retaliation, which inflicts considerable damage but fails to dislodge the snipers. At length seven boatloads of volunteers row themselves across the river under fire and finally flush the Southerners from the town.

- Confederate General Nathan B. Forrest rides with 2,500 troopers out of Columbia, Tennessee, intending to harass Union lines of communication. His goal is to wreck portions of the Mississippi Central and Mobile & Ohio Railroads. Forrest's first objective, however, is the nearby town of Lexington.

December 12

MILITARY: While vengeful troops of the Army of the Potomac are preoccupied with a looting binge at Fredericksburg, Virginia, General Robert E. Lee hastily summons the corps of General Thomas J. Jackson from positions farther downstream to occupy the right flank of Lee's line. By nightfall General Ambrose E. Burnside has finished crossing the Rappahannock River and deploys 112,000 men below Confederate positions.

NAVAL: The Federal ironclad gunboat *Cairo* under Commander Thomas O. Selfridge strikes a Confederate "torpedo" (mine) on the Yazoo River, Mississippi, and sinks. This is the first of 40 Union vessels that will be lost to the new and submerged Confederate ordnance.

December 13

MILITARY: The Battle of Fredericksburg, Virginia, commences at 10:00 A.M. As a dense fog suddenly lifts, it reveals to Southerners under General Robert E. Lee an awe-inspiring sight of serried ranks of blue-coated infantry advancing up the slopes toward them. The first thrust is committed against Lee's right when General William B. Franklin commits Generals George G. Meade and John Gibbon to strike General Thomas J. Jackson's corps. Despite an early breakthrough, Jackson's riposte proves decisive; he dispatches the divisions of Generals Jubal A. Early and Daniel H. Hill to slash at both Union flanks, and they chase the Federals back down the slope with loss. Burnside's main attack then unfolds against the Southern center, up a steep hill called Marye's Heights, ably manned and defended by General James Longstreet. General Edwin V. Sumner's Grand Division, assisted by part of General Joseph Hooker's command, 60,000 men in all, bravely charge Confederate positions uphill and are mowed down with great slaughter. Fighting eases by nightfall after Burnside sustains 12,653 casualties while the well-protected Confederates endure 5,377. Lee aptly remarks, "It is well that war is so terrible. We should grow too fond of it."

December 14

MILITARY: The Army of the Potomac under General Ambrose E. Burnside begins withdrawing back across the Rappahannock River as Confederates under General Robert E. Lee continue strengthening their defenses. Lee summarily ignores General Thomas J. Jackson's suggestion to counterattack across the line and possibly destroy the entire Union force.

December 15

MILITARY: The Army of the Potomac completes withdrawing across the Rappahannock River, covered by darkness and heavy rainfall. Prior to retreating, General Ambrose E. Burnside sends a flag to General Robert E. Lee requesting a temporary truce to retrieve the Union dead—and those still alive after two days of exposure to the cold. Lee magnanimously grants his request.

December 16

MILITARY: The Army of the Potomac reoccupies Falmouth, Virginia, where General Ambrose E. Burnside issues a directive accepting full responsibility for the disaster at Fredericksburg.

December 17

MILITARY: General Ulysses S. Grant issues General Order No. 11, expelling Jews from his theater of operations. "The Jews, as a class violating every regulation of trade established by the Treasury Department, and also department orders," it reads, "are hereby expelled from the department within twenty-four hours from the receipt of this order." In a few weeks Grant will be ordered to rescind the directive.

December 18

MILITARY: General Nathan B. Forrest and 2,500 Confederates attack a Union cavalry detachment under Colonel Robert G. Ingersoll that is defending the town of Lexington, Tennessee. Forrest's men clatter across an unburned bridge on the Lower Road, flanking a portion of the defenders. Ingersoll manages to repel three headlong charges by the Confederates but is eventually overrun and surrenders.

December 20

MILITARY: The XIII Corps, consisting of 32,000 Union troops in four divisions under General William T. Sherman, embarks on transports at Memphis, Tennessee, and sails down the Mississippi River. Sherman intends to flank Confederate defenses at Vicksburg, Mississippi, and pin down reinforcements at Grenada to prevent them from reaching the city.

- In a spectacularly effective move, Confederate cavalry under General Earl Van Dorn capture a primary Union stockpile at Holly Springs, Mississippi, netting \$1.5 million worth of supplies and 1,500 prisoners. He does so by utilizing superb marching discipline, which keeps Union forces unsure as to his intentions and objective. Van Dorn then orders the bulk of the supplies burned, tracks torn up, and telegraph wires cut. Holly Springs will become one of the most devastating cavalry raids of the war and harbor dire consequences for General Ulysses S. Grant's upcoming offensive against Vicksburg, Mississippi.

NAVAL: At Helena, Arkansas, Rear Admiral D. Dixon Porter confers with General William T. Sherman in anticipation of a combined effort against the Confederate bastion at Vicksburg, Mississippi. Porter's command has grown exponentially in numbers and equals the size of the U.S. Navy at the commencement of the conflict.

December 21

MILITARY: General Ulysses S. Grant, having lost his main supply base at Holly Springs, Mississippi, to rampaging Confederate cavalry under General Earl Van Dorn, evacuates Oxford and marches back to Memphis, Tennessee. This withdrawal terminates his first attempt to attack the Confederate citadel at Vicksburg, Mississippi.

December 26

INDIAN: Federal authorities at Mankato, Minnesota, simultaneously hang 38 Santee (Sioux) Indians for their complicity in a bloody uprising. This remains the largest mass-execution in American history.

MILITARY: The 43,000-man Army of the Cumberland under General William S. Rosecrans begins advancing from Nashville, Tennessee, and toward, General Braxton Bragg's Confederates at Murfreesboro. However, the advance is dogged by cold, wet weather and effective resistance by Southern troopers under General Joseph Wheeler.

- The XIII Corps under General William T. Sherman disembarks 32,000 men at Johnson's Plantation near the mouth of the Yazoo River. This places Union forces on the northern outskirts of Vicksburg, Mississippi, and only six miles from the city proper. However, the 6,000 defenders already present are speedily being reinforced by troops from nearby Grenada to a total strength of 14,000.

NAVAL: Federal gunboats under Commodore David D. Porter, having escorted General William T. Sherman's expedition up the Yazoo River, begins shelling the Confederate defenses on nearby Hayne's Bluff to cover the Army's landing.

December 27

MILITARY: Confederate cavalry under General John H. Logan capture 600 Union prisoners in a surprise attack upon Elizabethtown, Kentucky. He then begins uprooting track and trestles belonging to the Louisville & Nashville Railroad, a vital supply line.

- Union forces under General William T. Sherman encounter increasing Confederate resistance north of Vicksburg, Mississippi. They still press southward, traversing a nearly impassable terrain of bayous and swampland before reaching their objective at Chickasaw Bluffs. Sherman continues probing Southern defenses and discovers only four practical approaches to the bluffs, all of which are amply covered by well-sited Confederate batteries.

NAVAL: Confederate batteries along Drumgould's Bluff, Mississippi, bombard Union naval forces attempting to clear the Yazoo River of mines and other obstacles.

December 28

MILITARY: A column of Confederate cavalry under General J. E. B. Stuart successfully tangles with Federal cavalry near Selectman's Fort on Occoquan Creek,

taking 100 captives. He then gallops off for Burke's Station, only 12 miles from Washington, D.C., and telegraphs a humorous message to Quartermaster General Montgomery C. Meigs as to the poor quality of Union mules.

- General Earl Van Dorn, commanding 3,500 Confederate cavalry, safely slips through Union lines, crosses the Tallahatchie River, and arrives safely back at Grenada, Mississippi. His spectacularly successful raid has covered 500 miles in two weeks and completely crippled the impending Federal attack upon Vicksburg.
- Outside Chickasaw Bluffs, Mississippi, General Frederick Steele's 4th Division makes a preliminary probe of Confederate defenses near Blake's Levee, but is halted by heavy artillery fire and defensive works erected in his path. General William T. Sherman remains determined to attack in force but remains uninformed of the Union disaster at Holly Springs, which has allowed Southern troop strength to rise to 14,000 men.

December 29

MILITARY: The 32,000 Union troops of XIII Corps under General William T. Sherman attack prepared Confederate defenses along Chickasaw Bluffs, six miles north of Vicksburg, Mississippi. They withstand a maelstrom of Southern rifle and artillery fire from the heights but are bloodily repelled. Further attacks serve only to lengthen the casualty lists, so Sherman suspends the action at nightfall. Union losses in this lopsided affair total 1,776 to a Confederate tally of 207. The defeat ends the first Federal attempt to capture Vicksburg.

December 30

MILITARY: General William S. Rosecrans and 43,000 men of his Army of the Cumberland trudge into Murfreesboro, Tennessee, from Nashville, having taken three days to cover 30 miles in bad weather. He then establishes his line running roughly north to south behind Stones River, across which sit 37,000 Confederates of the Army of Tennessee under General Braxton Bragg. Both leaders intend to attack the following day by hitting their opponent's right flank.

December 31

MILITARY: At 6:00 A.M., the Confederate Army of Tennessee under General Braxton Bragg launches an all-out assault against the Union Army of the Cumberland along Stone's River near Murfreesboro, Tennessee. Fleeing Federals withdraw nearly three miles before General Alexander McCook can organize new defensive lines. General William S. Rosecrans then energetically visits all threatened points along his line, brings up new units, and consolidates his defenses. Bragg, meanwhile, remains far behind at headquarters, relying solely on reports to stay abreast of battlefield developments; hence, the fresh division of General John C. Breckinridge remains uncommitted. This proves a grave mistake, for had the division been deployed earlier, it might have tipped the balance in favor of the South. Bragg is nonetheless convinced that he has won the contest and telegraphs word of his "victory" to authorities in Richmond, Virginia. Moreover, he fully expects to find the Federals gone and in full flight from their positions by daybreak.

- General Nathan B. Forrest and 1,200 Confederate cavalry engage the 2nd Union Brigade under Colonel Cyrus L. Dunham at Parker's Cross Roads, Tennessee. Suddenly, Forrest's plans are overturned by the unexpected appearance

of John W. Fuller's 3rd Brigade, which surprises the Confederates from behind. In the ensuing confusion, he orders his men to charge through Union lines and cut themselves an avenue of escape. Both sides suffer roughly 300 casualties apiece. Parker's Cross Roads proves a rare setback for Forrest, and his sheer survival adds further luster to his reputation.

NAVAL: The famous Union ironclad *Monitor*, en route from Hampton Roads, Virginia, to Beaufort, North Carolina, sinks in a gale off Cape Hatteras while under tow. Sixteen crewmen perish and 47 are rescued by the *Rhode Island*.

1863

January 1

MILITARY: Combat at Murfreesboro, Tennessee, is suspended as both sides redress ranks and attend to their wounded. At daybreak General Braxton Bragg is flummoxed to find the Union Army of the Cumberland standing its ground defiantly before him. Both sides gird themselves for renewed combat on the morrow.

- Major General William T. Sherman, thoroughly checkmated at Chickasaw Bluffs, Mississippi, abandons the northerly approach to Vicksburg and withdraws his XIII Corps.

- A surprise attack is mounted by General John B. Magruder upon Galveston, Texas. In the predawn darkness he quickly moves 1,500 men and several cannon onto Galveston Island and attacks a Union garrison consisting of 250 men of Colonel Isaac Burrell's 42nd Massachusetts. The Confederates prevail in stiff fighting and the garrison surrenders.

NAVAL: A sortie by Confederate "cotton-clads" *Bayou City* and *Neptune* under Major Leon Smith pitches into the Union blockading squadron under Commander William B. Renshaw off Galveston, Texas. Both sides lose men and vessels, but Renshaw, perceiving the battle lost, orders his squadron into deeper water. He and 12 other Union sailors perish when demolition charges on his vessel explode prematurely. Galveston will remain a Southern enclave for the rest of the war.

January 2

MILITARY: General Braxton Bragg, after surveying the new line held by General William S. Rosecrans along Stones River, Tennessee, decides to renew the struggle. He then commits his remaining intact formation, the Kentucky division under General John C. Breckinridge, to strike the Union left flank, partially anchored along the river. Breckinridge moves forward, charges directly into the teeth of massed Union artillery posted across the river, and is bloodily repelled with 1,700 casualties. His defeat signals the end of the battle, and many senior Confederate leaders, including General Leonidas K. Polk, implore Bragg to retreat. Rosecrans holds the field and claims a narrow tactical victory, but at the horrendous cost of 13,249 casualties among 41,000 men present. Confederate losses of 10,266 out of 34,739 engaged, while smaller numerically, are proportionately larger and represent attrition that the Confederacy cannot sustain in this theater.

January 4

RELIGION: General in Chief Henry W. Halleck orders General Ulysses S. Grant to rescind his controversial Order No. 11, which expels all Jews from his jurisdiction.

January 9

NAVAL: At St. Joseph's, Florida, landing parties launched by the bark *Ethan Allen* destroy a salt factory. This commodity is of increasing strategic use to the Confederacy.

January 10

MILITARY: In a celebrated court-martial, General Fitz-John Porter is cashiered and dropped from the army list for disobeying orders at the Battle of Second Manassas. Not only does this action deprive the Union army of a highly capable leader, but also the verdict itself will remain in contention until finally being overturned in 1879.

MARINES: A boarding party from the *Waschusetz* seizes the Confederate vessel *Virginia* in Muges harbor, Mexico, and sails off with it.

January 11

MILITARY: A force of 32,000 Union troops under General John A. McClernand and Admiral David D. Porter attacks and captures Fort Hindman (Arkansas Post) under General Thomas J. Churchill. Churchill realizes the hopelessness of his position and capitulates that evening. McClernand captures 4,791 Confederates, who also lose 2 dead and 81 wounded, along with 17 cannon, thousands of weapons, and tons of ammunition.

NAVAL: The paddle-steamer *Hatteras*, cruising 30 miles off Galveston, Texas, is approached at night by a mysterious vessel. It turns out to be the Confederate raider *Alabama* under Captain Raphael Semmes, which sinks the *Hatteras* in a fierce engagement of only 13 minutes. Semmes rescues the entire crew, whereupon Union vessels redouble their efforts to track down this elusive foe.

- Federal gunboats under Admiral David D. Porter effectively shell the strong Confederate works of Fort Hindman (Arkansas Post) on the Arkansas River. Point-blank naval fire proves devastatingly effective at reducing both batteries and fortifications. Porter notes, "No fort ever received a worse battering, and the highest compliment I can pay to those engaged is to repeat what the rebels said, 'You can't expect men to stand up against the fire of those gunboats.'"

January 13–14

NAVAL: The screw steamer *Columbia* is lost after running aground on the North Carolina coast; its crew is captured.

- Army and navy forces operating along the White River, Arkansas, inflict retaliatory damage on buildings at Mound City for a recent spate of guerrilla attacks.

January 16

NAVAL: At Mobile, Alabama, the Confederate raider *Florida* again evades Union blockaders and successfully sorties and escapes under Lieutenant John N. Maffitt.

- The Mississippi Squadron of Rear Admiral David D. Porter completes its work of flushing out Confederate defenses along the White River, Arkansas.

January 18

MILITARY: Acting upon the orders of General Henry Heth, the 64th North Carolina under Colonel James A. Keith sweeps through Shelton Laurel, western North Carolina, looking for Northern sympathizers. At length Keith nets 15 male cap-

tives, most of whom are not involved in bushwhacking operations; these are subsequently executed and buried in shallow graves. Southerners are outraged by the atrocity and an official investigation ensues.

January 20

MILITARY: The Army of the Potomac under General Ambrose E. Burnside begins its infamous “mud march” up the Rappahannock River in order to turn General Robert E. Lee’s left flank. However, no sooner does his maneuvering commence than inclement weather begins, and troops, supplies, and the all-important pontoon bridges bog down on muddy roads.

January 21

MILITARY: The march of the Army of the Potomac under General Ambrose E. Burnside is stymied by heavy rain and inclement conditions during its attempted flank march to the Rappahannock River, Virginia. His columns are bedeviled by roads so choked with mud that supply wagons sink up to their axles.

NAVAL: In a surprise attack, Confederate steamer *Josiah Bell* and gunboat *Uncle Ben* capture Union blockaders *Morning Light* and *Velocity* off Sabine Pass, Texas.

January 22

MILITARY: General Ambrose E. Burnside’s offensive across the Rappahannock River into Virginia stumbles and finally ends on account of heavy rains and impassable mud. After heated consultation with subordinates, Burnside concludes his “master stroke” and orders the men back into camp at Falmouth, Virginia.

January 23

MILITARY: A demoralized—and rather soggy—Army of the Potomac settles back into winter quarters at Falmouth, Virginia, directly across from Fredericksburg. General Ambrose E. Burnside, agitated by the performance of subordinates, issues General Order No. 8, which peremptorily strips Generals Joseph Hooker, Edwin V. Sumner, and William B. Franklin of their respective commands.

January 25

MILITARY: General Ambrose E. Burnside is removed as commander of the Army of the Potomac and replaced by boisterous General “Fighting Joe” Hooker, one of his loudest critics. Generals Edwin V. Sumner and William B. Franklin, however, remain relieved of duty pending a court of inquiry.

- Massachusetts governor John A. Andrew authorizes recruitment of the 54th Massachusetts Infantry, composed entirely of African Americans and led by white officers.

January 27

INDIAN: In response to Shoshone attacks upon settlers and miners in the Great Basin region, Colonel Patrick E. Connor of the 1st California Cavalry leads 300 soldiers on an expedition against the encampment of Chief Bear Hunter on the Bear River, Idaho Territory. After a raging conflict of several hours, Bear Hunter and 224 Indians are slain, with an additional 124 women and children taken prisoner. Federal losses are 21 dead and 46 wounded. Losses of this magnitude induce many local chiefs to arrange peace talks.

NAVAL: The ironclad monitor *Montauk* under Captain John L. Worden spearheads a Federal assault upon Fort McAllister on the Ogeechee River, Georgia. Admiral Samuel F. Du Pont, who orders the attack, is disappointed by the results, especially the inaccuracy and slow rate of fire of his vessels. “If one ironclad cannot take eight guns,” he reasons, “how are five to take 147 guns in Charleston Harbor”? Again, the Navy Department ignores his warning.

January 28

MILITARY: President Jefferson Davis warns General Theophilus Holmes of the dangers confronting his Trans-Mississippi Department. “The loss of either of the two positions—Vicksburg or Port Hudson—would destroy communication with the Trans-Mississippi Department,” he writes, “and inflict upon the Confederacy an injury which I am sure you have not failed to appreciate.”

January 29

MILITARY: A pensive president Jefferson Davis inquires of General John C. Pemberton at Vicksburg, Mississippi, “Has anything or can anything be done to obstruct the navigation from the Yazoo Pass down?”

January 30

MILITARY: General Ulysses S. Grant, officially placed in charge of western operations at Milliken’s Bend, Louisiana, begins formulating a new strategic campaign against Vicksburg, Mississippi.

NAVAL: In an embarrassing reverse, the gunboat *Isaac Smith* under Acting Lieutenant Francis S. Conover is captured by Confederates while reconnoitering down the Stono River, South Carolina.

- Admiral David D. Porter’s squadron begins sweeping the Yazoo River for supplies of cotton to deprive the Confederacy of this valuable commodity. Captured bales are also employed as additional “armor” on his ships.

January 31

NAVAL: Obscured by a thick haze, the Confederate steam rams *Palmetto State* and *Chicora* under Commanders Duncan R. Ingraham and John R. Tucker, respectively, briefly sortie against the South Atlantic Blockading Squadron off Charleston, South Carolina. The Confederate vessels then withdraw to Charleston after a stiff fight, having dented—but not broken—the Union blockade.

February 1

NAVAL: The ironclad *Montauk* under Captain John L. Worden, assisted by *Seneca*, *Wissahickon*, *Dawn*, and mortar boat *C. P. Williams*, again attacks Fort McAllister on the Ogeechee River, Georgia. *Montauk* sustains 48 hits in the four-hour exchange, none of them critical. However, little damage is inflicted on the enemy.

February 2–3

NAVAL: The steam ram *Queen of the West* embarks on a successful foray down the Mississippi River, heavily damaging the Confederate steamer *City of Vicksburg* and capturing three transports loaded with provisions.

February 3

NAVAL: In Tennessee, Commander LeRoy Fitch’s gunboat squadron helps foil a surprise Confederate attack against Fort Donelson.

- Congress votes Captain John L. Worden its thanks for services rendered as captain of the *Monitor* at the Battle of Hampton Roads in 1862.

February 5

MILITARY: General Joseph Hooker reorganizes the Army of the Potomac and dispenses with his predecessor's "grand divisions" scheme. A new nine-corps structure is imposed: I Corps (General John F. Reynolds), II Corps (General Darius N. Couch), III Corps (General Daniel E. Sickles), V Corps (General George G. Meade), VI Corps (General John Sedgwick), IX Corps (General William F. Smith), XI Corps (General Franz Sigel), XII Corps (General Henry W. Slocum), and Cavalry Corps (General George Stoneman). For the first time on the Union side, all mounted forces are unified under a single, centralized command.

February 6

NAVAL: Admiral David D. Porter orders the first of his vessels through the levee at Yazoo Pass, Mississippi, and begins ascending the Yazoo River to attack the bastion of Vicksburg from behind.

February 14

NAVAL: The steam ram *Queen of the West*, accompanied by the screw steamer *Indianola*, ventures up the Black River to attack Confederate vessels reputed to be at Gordon's Landing, Louisiana. However, the pair are attacked by artillery batteries along the shoreline; *Queen of the West* grounds and is abandoned.

February 19

MILITARY: President Jefferson Davis contacts General Joseph E. Johnston, noting anxiously how little confidence General Braxton Bragg solicits from his senior subordinates. "It is scarcely possible in that state of the case for him to possess the requisite confidence of the troops," Davis notes. However, the president is not disposed toward removing his old friend and confidant from command, a reluctance with fatal consequences for the South.

February 24

NAVAL: Confederate vessels *William H. Webb* and *Beatty*, assisted by newly captured *Queen of the West*, attack and repeatedly ram the ironclad *Indianola* below Warrenton, Mississippi. Outnumbered and outmaneuvered by the faster craft, *Indianola* sustains serious damage and Commander George Brown surrenders.

February 25

NAVAL: The *Vanderbilt* captures the British merchant vessel *Peterhoff* off St. Thomas in the Caribbean, sparking a diplomatic row over the disposition of mail found onboard. Eventually, President Abraham Lincoln orders the craft and all confiscated mail returned to their rightful owners.

- Confederates destroy the newly captured screw steamer *Indianola* after being alerted that a large Union gunboat is headed down the Red River; they later discover that this is a ruse conjured up by Admiral David D. Porter and the "gunboat" is nothing but an unmanned barge with trees as guns.

February 26

INDIAN: Upon further reflection, the National Council of Cherokee Indians abolishes slavery, renounces its prior affinity for the Confederacy, and rejoins the Union.

February 28

NAVAL: On the Ogeechee River, Georgia, the ironclad *Montauk* under Captain John L. Worden engages and sinks the blockade-runner *Rattlesnake* under the guns of nearby Fort McAllister. But the victorious vessel also strikes a mine and has to be grounded on a mud bank to conduct repairs.

March 2

MILITARY: Congress authorizes four new major generals and nine new brigadiers for the U.S. Army, with an additional 40 major generals and 200 brigadiers for the volunteers. Conversely, 33 senior military officers are dismissed from the service for a variety of reasons.

March 3

MILITARY: President Abraham Lincoln signs the Enrollment or Federal Draft Act, whereby all able-bodied males from 20 to 45 years of age are eligible for military service. However, prospective candidates are enabled to find substitutes to take their place or can simply pay a \$300 fine to escape the draft altogether. This is the first such legislation enacted by the government; it ultimately accounts for about 6 percent of the army's total manpower.

- The Signal Corps becomes a separate branch of the army with Major Albert J. Meyer, a former surgeon, installed as chief signal officer with a rank of colonel. Also, the Corps of Topographical Engineers, created in 1831, is absorbed into the Corps of Engineers.

NAVAL: The ironclads *Nahant*, *Passaic*, and *Patapsco* bombard Confederate-held Fort McAllister, Savannah, for six hours. Union vessels are fine-tuning their bombardment techniques prior to assaulting Charleston, South Carolina.

March 5

MILITARY: General Earl Van Dorn advances with 6,000 Confederates against the Union position at Thompson's Station, Tennessee. The defenders consist of 2,857 Federal soldiers and cavalry, supported by six cannon, under Colonel John Coburn. A final charge by Colonel Nathan B. Forrest breaks Union resistance and Coburn surrenders.

March 8

MILITARY: A sudden raid by Captain John S. Mosby and his Confederate rangers captures General Edwin H. Stoughton in his headquarters at Fairfax Court House, Virginia, along with 32 prisoners and 58 horses. The general was asleep in his bed only to be rudely awakened by a slap to his backside—delivered by Mosby himself.

March 10

MILITARY: President Abraham Lincoln signs a general amnesty for all soldiers, presently absent without leave (AWOL), if they rejoin their units by April 1, 1863.

March 11

NAVAL: The Mississippi Squadron under Admiral David D. Porter, having cleared the Yazoo Pass, next attacks Fort Pemberton on the Tallahatchie River. Four Union vessels are heavily damaged while dueling with land emplacements at a distance of only 800 yards.

March 13

NAVAL: In North Carolina, gunboats *Ceres*, *Netzel*, *Hunchback*, and *Shawsheen* under Commander Henry K. Davenport help defeat a Confederate night attack against Fort Anderson on the Neuse River.

- The steamer *Chillicothe* and gunboat *Baron de Kalb* make a second attack on Fort Pemberton on the Tallahatchie River; the former vessel receives 38 hits in 90 minutes, then withdraws.

March 14

MILITARY: General Nathaniel P. Banks advances 30,000 men of his Army of the Gulf upon Port Hudson, Louisiana. It is now painfully apparent to Union authorities that this position, second in strength only to Vicksburg, Mississippi, must be reduced by assault in the near future.

NAVAL: Admiral David G. Farragut's squadron of seven ships runs past Confederate batteries at Port Hudson, Louisiana, at 11:00 P.M. His flagship, the screw sloop *Hartford*, is lashed alongside the gunboat *Albatross*, weathers a storm of shot and shell, and makes the final passage intact. But accompanying vessels *Monongahela* and *Richmond* are turned back, and Farragut is cut off from part of his force for several weeks.

- Admiral David D. Porter pushes his gunboats, mortar boats, and four tugs up the Yazoo River to secure Steele's Bayou above Vicksburg, Mississippi. En route, they encounter dense forest and leafy overhang, compounded by obstacles placed in the river by the Confederates.

MARINES: In fighting off Port Hudson, Louisiana, Orderly Sergeant Pinkerton Vaughn becomes the second marine to win the Medal of Honor.

March 16

NAVAL: Federal gunboats of the Yazoo River Expedition engage Fort Pemberton at Greenwood, Mississippi, whereupon the ironclad *Chillicothe* receives another eight direct hits, suffers 22 casualties, and drifts helplessly. Failure here terminates General Ulysses S. Grant's second attempt to circumvent the northern defenses of Vicksburg and the gunboats begin steaming back to the Mississippi River.

March 17

MILITARY: A force of 2,100 Union cavalry and six guns under General William W. Averell advances from Morrisville, Virginia, then crossed the Rappahannock River intending to surprise Confederate cavalry stationed at Kelly's Ford. The startled Southerners advance to meet the intruders with 800 men. Averell lines up his five regiments abreast behind a stone wall, lets the Confederates gallop to within close range, then rakes them with intense artillery and carbine fire. Charges and countercharges ensue throughout the afternoon before Averell ends the contest and withdraws across the river in good order. Though the battle is indecisive, Kelly's Ford alerts Southern horsemen as to the growing proficiency of their Northern counterparts. The youthful Southern gunner John "Gallant Pelham" is also mortally wounded.

March 19

NAVAL: The Steele's Bayou expedition of Rear Admiral David D. Porter reaches Rolling Fork, Mississippi, having surmounted innumerable riverine obstacles and staunch enemy resistance. The effort will be abandoned shortly afterward.

March 21

MILITARY: General Daniel Butterfield is directed to create a system of unit badges and other identifications to encourage unit esprit d'corps for the Army of the Potomac. Hereafter, each corps will possess its own unique design, with different colors designating different divisions.

- General William T. Sherman's expedition to Steele's Bayou gropes along the tree-choked river banks, much harassed by snipers and man-made obstacles in its path. Progress remains slow but determined as the expedition proceeds to rescue Admiral David D. Porter's gunboat squadron, then trapped at Deer Creek, Mississippi.

March 25

MILITARY: General Nathan B. Forrest and his Confederate cavalry column attack Union troops at Brentwood, Tennessee, consisting of 520 men of the 22nd Wisconsin under Colonel Edward Bloodgood and 230 men of the 19th Michigan posted south of the town. Both Federal detachments surrender. As the Southern marauders withdraw they are set upon by a third force of Union cavalry, under Colonel Green C. Smith, and lose some wagons and supplies.

NAVAL: The steam rams *Switzerland* and *Lancaster* make a failed attempt to run past Vicksburg's batteries. The former is struck in the boiler and drifts back downstream while the latter vessel is sunk outright.

April 1

MILITARY: The Draft Act of 1863 legally goes into effect.

NAVAL: The *Tuscumbia* under Admiral David D. Porter hosts General Ulysses S. Grant and William T. Sherman on a grand reconnaissance of the Yazoo River as far as Hayne's Bluff. The nature of the terrain and other imposing natural obstacles convince Grant to turn his attention to operations below Vicksburg, Mississippi.

April 2

MILITARY: General Ulysses S. Grant confers with Admiral David D. Porter to promulgate a final plan of operations against Vicksburg, Mississippi. They decide that while forces under General William T. Sherman mount a large-scale diversion along Hayne's Bluff to the north, the bulk of the army under Grant shall march south down the west bank of the Mississippi River. There they will embark and be carried across to the Confederate shore by Porter's fleet.

April 5

MILITARY: President Abraham Lincoln meets with General Joseph Hooker at Fredericksburg, Virginia, to discuss strategy. Both leaders concur that the object of future military operations should center upon the destruction of General Robert E. Lee's army—with Richmond, Virginia, a secondary concern.

April 7

NAVAL: Admiral Samuel F. Du Pont's ironclad squadron launches its long-anticipated attack against Charleston, South Carolina. His slow-like firing monitor ironclads are able to loose only 139 rounds while 77 well-handled Confederate cannon pour 2,000 shells upon them. Consequently, all nine vessels are struck repeatedly, with the *Keokuk* suffering 90 hits near or below the waterline, which render it nearly uncontrollable. Du Pont, who had anticipated much worse, sus-

pendes the action at nightfall, thankful that the day was “a failure instead of a disaster,” although defeat here will cost him his command.

April 8

NAVAL: The badly battered ironclad *Keokuk* sinks outside of Charleston, South Carolina. However, its signal book is eventually recovered by the Confederates, who can now interpret the squadron’s communications.

April 9

NAVAL: Commander William L. Maury secretly commissions the merchantman *Japan* as the Confederate commerce raider *Georgia* off the coast of France. The vessel proceeds on a cruise to the Cape of Good Hope, Africa.

April 12

MILITARY: General Joseph Hooker informs President Abraham Lincoln that he wishes to swing around General Robert E. Lee’s flank and threaten Richmond, Virginia. The president reminds the general that the destruction of Lee’s army remains his paramount objective.

- The XIX Corps of General Nathaniel P. Banks, numbering 16,000 men in three divisions, marches up the Teche River toward Irish Bend on Bayou Teche, Louisiana, to capture Fort Bisland. Banks moves two divisions overland while directing the 4,500 men of General Cuvier Grover’s division to land north and cut any Confederate retreat.

April 13

MILITARY: At Irish Bend, Louisiana, Confederate forces gird themselves to deliver an early morning strike against superior forces under General Nathaniel P. Banks. General Richard Taylor, rather than be crushed between Banks and General Cuvier Grover, determines to attack and allow the fort’s garrison to escape. His men carefully skirt Union positions along the riverbank, assume an offensive posture, and prepare to strike the Federals at dawn to allow the garrison to escape.

April 14

MILITARY: Confederates under General Richard Taylor abandon Fort Bisland, Louisiana, and then attack the Union encampment of General Cuvier Grover at Bayou Teche. The Southerners get the best of it and manage to escape, while Grover remains in camp and sustains 600 casualties. Taylor then withdraws to safety, although he is forced to scuttle the recently recaptured *Diana*. Fort Bisland, meanwhile, is occupied by General Nathaniel P. Banks.

April 15

MILITARY: Union General John G. Foster sails down the Pamlico River, North Carolina, to relieve the siege of New Bern, forcing Confederates under General Daniel H. Hill to withdraw.

- General Ulysses S. Grant masses 45,000 troops at Milliken’s Bend, Louisiana, 10 miles north of the Confederate bastion of Vicksburg, Mississippi. He then orders General James B. McPherson’s corps down the west bank of the river to New Carthage while additional forces under General William T. Sherman begin demonstrating before Chickasaw Bluff.

NAVAL: Confederate commerce raider *Alabama* under Captain Raphael Semmes captures and burns the Union whalers *Kate Cory* and *Lafayette* off Fernando de Noronha, Brazil.

April 16

MILITARY: Union forces under General John G. Foster advance inland from Washington, North Carolina, and tangle with the rear guard of General Daniel H. Hill at nearby Kinston.

- In Richmond, Virginia, President Jefferson Davis signs a bill authorizing persons aged 18 years to hold military commissions; this is more proof of the Confederacy's ongoing manpower shortage.

NAVAL: A gala ball held at Vicksburg, Mississippi, is rudely interrupted by the river squadron of Admiral David D. Porter, who passes 12 transports past Confederate batteries posted on nearby bluffs. The action lasts two and a half hours but, despite a withering cannonade, Porter succeeds brilliantly. Most of his vessels sustain light damage, but the steamer *Henry Clay* is sunk and the gunboat *Forest Queen* is disabled. The squadron then berths off New Carthage, Mississippi, and prepares to transport the army of General Ulysses S. Grant over to the Confederate shore.

April 17

MILITARY: General Ulysses S. Grant declares that prisoner-of-war exchanges with the South are to be halted unless they are balanced equally between the two sides. This is a ploy to halt the influx of trained personnel to the Confederacy, even if this comes at the expense of longer incarcerations for Union captives.

- Union colonel Benjamin H. Grierson embarks on an ambitious, 16-day diversionary raid from La Grange, Tennessee, down through the heart of Mississippi and thence to Baton Rouge, Louisiana. To complete this 600-mile sojourn, he takes with him 1,700 troopers of the 6th and 7th Illinois Cavalry, the 2nd Iowa, and a horse battery.

NAVAL: Gunboats belonging to Admiral David D. Porter's Mississippi Squadron endure two harrowing hours of bombardment as they escort army transports and coal barges past Vicksburg, Mississippi.

April 18

MILITARY: The Federal gunboat *Stepping Stones* under Lieutenant William B. Cushing, carrying 270 soldiers, suddenly raids Confederate-held Fort Huger on the Nansemond River, Virginia. Before the garrison can react, the Federals charge into the fort, seize 137 prisoners and five cannon, then depart.

April 20

NAVAL: The side-wheel gunboat *Estrella* under Lieutenant Commander A. P. Cooke bombards Confederate-held Fort Burton, Butte a la Rose, Louisiana, into submission with a prolonged bombardment.

April 21

MILITARY: Union cavalry under Colonel Benjamin H. Grierson skirmish with Confederates at Palo Alto, Mississippi. Grierson, hotly pursued by Southerners, cleverly splits his column by sending Colonel Edward Hatch and the 2nd Iowa off to threaten the Mobile & Ohio Railroad. The Confederates, as anticipated, take

the bait and mistakenly chase after Hatch, leaving Grierson to complete his raid through Mississippi almost unopposed.

NAVAL: A convoy of additional army transports passes the batteries at Vicksburg, Mississippi, at night and under fire. They then join the main fleet at New Carthage and prepare to transport the army of General Ulysses S. Grant across the river en masse. This single feat proves one of the most decisive improvisations of the war.

April 24

MILITARY: The combined Army of the Tennessee under General Ulysses S. Grant reaches Hard Times Plantation, Louisiana, on the west bank of the Mississippi River. There he immediately orders the troops embarked on transports and ferried directly across to Bruinsville, Mississippi, on the Confederate shore.

- Colonel Abel D. Streight leads his brigade of 1,700 troopers, many of them mounted on mules, on a raid from Tuscumbia, Alabama, to sever the Georgia Railroad. It is an ill-fated enterprise.
- Colonel Benjamin H. Grierson's Union cavalry storms into Newton Station, Mississippi, seizing a newly arrived ammunition train and tearing up miles of valuable track belonging to the Southern Mississippi Railroad. This places the raiders only 100 miles east of the Confederate bastion of Vicksburg, and General John C. Pemberton orders his reserve force of five Confederate infantry and artillery regiments from Jackson to intercept them.
- President Abraham Lincoln authorizes General Order No. 100, the so-called Liber Code, an early attempt to codify and standardize laws pertaining to the conduct of war.

April 27

MILITARY: At Falmouth, Virginia, the 134,000-man Army of the Potomac is put into motion by General Joseph Hooker. Hooker takes 75,000 men down the banks of the Rappahannock River, intending to deploy them in the region known as the Wilderness, 10 miles behind Confederate lines. No previous Union commander has previously enjoyed such a numerical preponderance over General Robert E. Lee.

April 29

MILITARY: General John Stoneman's Union cavalry division crosses the Rappahannock River into Virginia and commences a major raid. Not only does this endeavor prove largely ineffectual, it also strips the Army of the Potomac of its cavalry and the cavalry's ability to scout and reconnoiter densely wooded terrain.

NAVAL: Admiral David D. Porter's gunboat squadron bombards Confederate batteries on the Mississippi River at Grand Gulf, Mississippi. After five hours of continuous combat, Porter's army transports skirt the remaining batteries without incident and Federal forces bypass Grand Gulf altogether.

April 30

MILITARY: The Army of the Potomac under General Joseph Hooker marches 30 miles down the banks of the Rappahannock River and crosses 10 miles behind General Robert E. Lee's position at Fredericksburg, Virginia. Considering the size

and complexity of the operation, Hooker executes it brilliantly and catches the Southerners off guard.

- General Ulysses S. Grant ferries the XIII Corps of General John A. McClellan and the XVII Corps of General James B. McPherson (23,000 men in all) across the Mississippi River at Bruinsburg, Mississippi. At a stroke, Grant bypasses strong Confederate defenses and carves out a lodgement on the east bank of the river, only 35 miles below the bastion at Vicksburg.

NAVAL: The gunboat squadron and transports of Admiral David D. Porter cover and ferry the army of General Ulysses S. Grant across the Mississippi River at Bruinsburg, Mississippi, 10 miles below Grand Gulf. Confederate defenses at Vicksburg are now laid bare and Grant is now capable of attacking that erstwhile impregnable bastion from the rear. Union army and navy cooperation at the highest levels has never been more manifest and will result in a decisive victory.

May 1

MILITARY: Elements of the Army of Northern Virginia under General Thomas J. Jackson arrive near Chancellorsville, Virginia, and tangle with advanced Union pickets nearby. However, this aggressive display by the Confederates unnerves General Joseph Hooker, who inexplicably orders his Army of the Potomac into the woody morass known as the Wilderness. Meanwhile, Southern cavalry under General J. E. B. Stuart skillfully discern that the Union right flank is “up in the air” and subject to be turned. General Robert E. Lee, sizing up his adversary, next orders Jackson to take 30,000 men—the bulk of his army—on a circuitous, 14-mile end run around Hooker’s exposed right. He is hoping for a decisive attack that will cripple his more numerous adversary.

- Advancing inland from Bruinsburg, Mississippi, General Ulysses S. Grant amasses 23,000 men and attacks 8,000 Confederates under General John S. Bowen at Port Gibson. Stout fighting ensues, but Union numbers prevail and the Southerners are forced from the field. With his bridgehead now secure, Grant’s offensive begins to gather momentum. He also takes the bold and risky expedient of cutting his own supply line, carrying all essential impedimenta on the backs of his soldiers and foraging off the land.

- The Confederate Congress authorizes military tribunals to execute any white Union officers caught commanding African-American soldiers. Black soldiers seized in uniform, if not killed outright, are to be promptly sold as slaves.

May 2

MILITARY: Proceeding all night with celerity and great marching discipline, 30,000 Confederates under General Thomas J. Jackson steal their way around the Army of the Potomac’s right flank at Chancellorsville, Virginia. At 6:00 P.M., Jackson’s men slash into the unsuspecting Federals with a vengeance while they are preparing dinner. The largely German-speaking troops crumble under the Southern onslaught, fleeing two miles. Jackson, ignoring the mounting confusion around him, rides forward on a personal reconnaissance and is accidentally shot by men of the 18th North Carolina.

- Federal forces under General Ulysses S. Grant bridge Bayou Pierre outside Port Gibson, Mississippi, and begin fanning out across the countryside. He next

intends to seize the town of Edwards Station, 16 miles east of Vicksburg, to cut the Vicksburg & Jackson Railroad and isolate the garrison.

- Union cavalry under Colonel Benjamin H. Grierson fight their final skirmish with Confederate forces at Robert's Ford on the Comite River, Louisiana, before clattering into Baton Rouge and safety. He concludes his spectacular raid of 800 miles with a loss of only three dead, seven injured, and nine missing; five ailing soldiers have also been left behind for treatment. Confederate losses are estimated at 100 dead, 500 captured, 2,000 weapons taken, and over 50 miles of railroad track and telegraph lines destroyed.

May 3

MILITARY: At first light, the struggle around Chancellorsville, Virginia, renews. General J. E. B. Stuart mounts 50 cannon atop Hazel Grove and bombards the Union forces of General Joseph Hooker. Hooker, though still outnumbering his opponents two-to-one, clings to his defensive posture; suddenly stunned by a falling column, he orders the Army of the Potomac to retreat back to the Rappahannock River. This act convinces General Robert E. Lee that Union forces lack the stomach to attack, and he unhesitatingly divides his force again and marches off with General Richard A. Anderson's division to meet a new Union threat developing in his rear. Combat at Chancellorsville occasions very heavy losses to both sides: Hooker suffers 17,287 casualties while Lee sustains 12,463. Moreover, Lee and the South are now deprived of General Thomas J. "Stonewall" Jackson, who will die of his wounds shortly afterward. This loss irreparably shatters the most outstanding tactical duo of the Civil War, and Lee's Army of Northern Virginia, while still formidable, will never be quite as devastatingly effective.

- General John Sedgwick's VI Corps, numbering 19,000 men, is ordered by General Joseph Hooker to storm the heights of Fredericksburg, Virginia. Resistance proves stout, and on his third charge Sedgwick orders his men to settle the issue with cold steel alone. The Confederates are forcibly ejected from their works. The VI Corps then proceeds west toward Chancellorsville until it collides with General Cadmus M. Wilcox's brigade on a high ridge, upon which sits Salem Church. Heavy fighting ensues; Sedgwick suffers 1,523 casualties to a Southern tally of 674.

- Colonel Abel D. Streight surrenders 1,500 men of his "Mule Brigade" to Confederate general Nathan B. Forrest at Cedar Bluff, Alabama. Forrest, possessing only 600 troopers, surrounds his opponent and, by constantly parading them and a single battery, gives the impression of a far larger force.

NAVAL: The gunboat squadron of Admiral David D. Porter moves to engage Confederate batteries at Grand Gulf, Mississippi, and finds that the defenders have fled beforehand. "The Navy holds the door to Vicksburg," he writes to General Ulysses S. Grant.

May 4

MILITARY: The Battle of Salem Church, Virginia, continues as General John Sedgwick continues attacking Confederate positions. However, General Robert E. Lee, having boldly divided his army again, dispatches General Richard H. Anderson's division to assist the defenders. Outnumbered and nearly outflanked, the Federals skillfully withdraw toward the Rappahannock River and entrench. Total

Jackson, Thomas J. (1824–1863)

Confederate general

Thomas Jonathan Jackson was born in Clarksburg, (West) Virginia, on January 21, 1824, where he was orphaned in childhood and raised by an uncle. Barely educated, he gained admittance into the U.S. Military Academy, strove diligently to learn, and graduated 17th in his class in 1846. Jackson fought in the Mexican War under General Winfield Scott, where he won two brevet promotions for bravery in combat. However, he resigned his commission in 1852 to teach military science at the Virginia Military Institute (VMI). There his taciturn, overly religious demeanor won him few friends, and students openly mocked him as “Fool Tom Jackson.” When the Civil War commenced in April 1861, Jackson, who supported neither slavery nor secession, threw his lot in with Virginia and joined the Confederate army as a colonel. He first fought with distinction as a brigadier general at Bull Run that July, holding off superior Union forces with such firm-

ness that he gained the moniker “Stonewall Jackson.” Throughout the spring of 1862 he also campaigned brilliantly in the Shenandoah Valley, outmarching and outfighting several large Union forces sent to oppose him. He returned to Virginia by the summer of 1862 and performed well at the Battle of Second Manassas under General Robert E. Lee. Here his fast-marching troops covered 51 miles in only two days, gaining a reputation as “Jackson’s foot cavalry.” That fall, he fought with equal distinction at Antietam in September and Fredericksburg in December, proving himself a master of defensive, as well as offensive, tactics. In fact, Jackson exhibited an almost intuitive grasp of Lee’s orders and invariably positioned himself propitiously before being asked.

Jackson’s military fortunes crested in the spring of 1863, when General Lee confronted a vastly larger Union army under General Joseph Hooker at Chan-

Union casualties for the day number 4,700; Confederate losses are unknown but presumed lighter.

May 5

NAVAL: Pushing up the Red River, Louisiana, Rear Admiral David D. Porter’s gunboat squadron approaches Fort De Russy, which has been abandoned hours before by Confederate forces.

May 6

NAVAL: The Union brig *Clarence*, captured off Brazil by the *Florida*, is impressed into Confederate service under Lieutenant Charles W. Read. He heads north on a spectacular raid into the mid-Atlantic seaboard.

May 7

NAVAL: Admiral David D. Porter pushes his Mississippi Squadron up the Red River and past Fort De Russy, Louisiana; he then holds the town of Alexandria until army forces can arrive to garrison it.

cellorsville. This was a heavily forested region that Lee viewed as the last place where Union generals would expect an attack. Attack he did, and upon learning that the Union right flank was unprotected (or “up in the air”), Lee ordered Jackson’s II Corps on a circuitous night march to surprise the enemy. He skillfully complied and, on the morning of May 2, 1863, his force fell on General Oliver O. Howard’s XII Corps like a thunderbolt, routing them. Jackson, wishing to destroy the enemy in detail, then rode ahead in pursuit of the enemy with his staff until, in the gathering darkness, he was accidentally shot by his own soldiers. Jackson lingered for eight days before dying of pneumonia on May 10, 1863, at Guinea Station, Virginia. Considering his tremendous offensive talents, his death represented a calamitous loss to Confederate military fortunes once Lee could not find a worthy successor. “I know not how to replace him,” he lamented, “I have lost my good right arm.” The Army of Northern Virginia went on to fight heroically for

Confederate general Thomas J. Jackson
(Library of Congress)

another two years with some measure of success, but it was never quite as effective without “Stonewall Jackson” in the van.

May 10

MILITARY: The incomparable General Thomas J. Jackson, publicly renowned as “Stonewall” and admired by soldiers on both sides, dies of pneumonia at Guinea Station, Virginia. His passing proves an irreparable loss to General Robert E. Lee and the Confederate war effort.

May 12

MILITARY: At 9:00 A.M., General John A. Logan’s 3rd Division of General James B. McPherson’s XVII Corps advances upon Raymond, Mississippi, encountering strong resistance from General John Gregg’s Confederates. McPherson then commits his entire corps, 12,000 strong, and cracks the Southern right wing. Gregg subsequently disengages and falls back in good order toward Jackson, Mississippi. General Ulysses S. Grant then alters his strategy toward Vicksburg; rather than be caught between the two fires of General John C. Pemberton to the west and General Joseph E. Johnston to the east, he intends to seek each out individually and defeat them piecemeal.

NAVAL: Union gunboats on the Tennessee River support an army action against Confederate cavalry gathered at Linden, Tennessee. They ferry Union troopers across the wide river and supply fire support during the ensuing action; the Southerners retreat.

May 13

MILITARY: General Joseph E. Johnston arrives at Jackson, Mississippi, to find a small garrison of 6,000 men under General John Gregg and declares “I am too late.” He realizes that two full Union corps are presently marching toward the city and gives orders to evacuate troops and other supplies immediately. Johnston also instructs General John C. Pemberton at Vicksburg to take his 22,000 men and catch the Federals between them.

May 14

MILITARY: General Robert E. Lee attends a high-level strategy conference in Richmond, Virginia, where he advocates a risky but potentially rewarding scheme for invading Pennsylvania and defeating Federal forces on their own soil. Such a move would further discredit the Republican Party and possibly secure European intervention on the Confederacy’s behalf.

- Around 9:00 A.M., the advance guard of General James B. McPherson’s XVII Corps makes contact with Confederate outposts around Jackson, Mississippi. General William T. Sherman also sends his men forward and seizes several poorly guarded cannon. Confederates under General John Gregg then disengage and escape north from Jackson. General Ulysses S. Grant now obtains a strategic railroad junction east of Vicksburg.

May 16

MILITARY: General John C. Pemberton places his 22,000 men along a commanding position known locally as Champion’s Hill, Mississippi, roughly halfway between Jackson and Vicksburg. The 32,000-man army of General Ulysses S. Grant then arrives and deploys the XIII Corps of General John A. McClernand on his right and the XVII Corps of General James B. McPherson on his left. By 5:30 A.M., Pemberton’s battered force is in full flight across Baker’s Creek, burning the bridge behind them. Grant, by dint of rapid marching, prevents two disparate Confederate forces from uniting against him and defeats both in detail. Union losses are 1,838 to a Southern tally of 3,840.

May 17

MILITARY: General John C. Pemberton, routed at Champion Hill the day previously, prepares to defend a bridgehead along the west bank of the Big Black River, 12 miles east of strategic Vicksburg, Mississippi. At 5:00 A.M., the first elements of General John A. McClernand’s XIII Corps encounter Confederate pickets, and by 10:00 A.M. Southern forces are streaming across the Big Black in defeat. Pemberton manages to fire the remaining bridge over the river, but his men do not stop running until they reach the outskirts of Vicksburg, Mississippi. Big Black River is another debacle for the South, which loses 1,751 killed, wounded, and missing, along with 18 artillery pieces. Union casualties come to 279. Moreover, Union engineers quickly throw a pontoon bridge across the Big Black, and the advance toward Vicksburg continues on schedule.

May 18

MILITARY: Union forces under General Ulysses S. Grant cross the Big Black River and take up storming positions outside the Confederate bastion of Vicksburg, Mississippi. Southern defenses appear outwardly hopeless, but General John C. Pemberton declares his intention to fight to the last. That same day, General Joseph E. Johnston frantically wires the general and warns him not to become trapped within the city.

NAVAL: Admiral David D. Porter orders six gunboats from the Mississippi Squadron to bombard Confederate positions along Snyder's Bluff, Mississippi, as a diversionary measure for General Ulysses S. Grant.

May 19

MILITARY: A preliminary attack by General Ulysses S. Grant upon Vicksburg, Mississippi, is repelled with heavy loss.

NAVAL: The Mississippi Squadron commences a close bombardment of Confederate fortifications at Vicksburg, Mississippi, in support of army operations under General Ulysses S. Grant.

May 21

MILITARY: Union forces under General Nathaniel Banks commence the siege of Port Hudson, Louisiana, a 48-day ordeal that costs thousands of Union casualties. On paper, the 30,000 Union troops committed should have had little time dealing with the 6,500 defenders, but Banks's ineptitude bungles what should have been an easy victory.

NAVAL: Six Union gunboats under Commander John G. Walker reach Yazoo City, Mississippi, forcing the Confederates to destroy an uncompleted steam ram and a navy yard.

May 22

MILITARY: President Jefferson Davis implores General Braxton Bragg in Tennessee to come to the aid of Vicksburg, Mississippi, if possible.

- General Ulysses S. Grant again launches a frontal assault upon the defenses of Vicksburg, Mississippi, hitting a three-mile stretch of entrenched positions after a continuous and heavy bombardment. Of the 45,000 Union troops committed, 3,199 become casualties and the assault flounders. Confederate losses appear to be fewer than 500. Grant resigns himself to commencing the formal siege operations he sought to avoid; food shortages, intense summer heat, and civilian discomfiture will all take their toll on the defenders.
- In Washington, D.C., the War Department establishes the Bureau of Colored Troops under Major George L. Stearns to better coordinate recruitment of African Americans from all regions of the country. These units receive the official designation of United States Colored Volunteers and, subsequently, that of United States Colored Troops. All told, the bureau enlists 186,017 soldiers, who are organized into 120 infantry regiments, 12 heavy artillery regiments, one light artillery regiment, and seven cavalry regiments.

May 23

MILITARY: Confederate secretary of war James A. Seddon strongly suggests to President Jefferson Davis that their forces in the Trans-Mississippi Department mount

an offensive to help relieve the pressure on Vicksburg, Mississippi. He cites the capture of Helena, Arkansas, as a possible objective.

May 24–30

NAVAL: On the Yazoo River, Mississippi, five Union gunboats burn several Confederate steamers, laden with supplies, which have grounded on a sandbar. They then sail 10 miles down the Sunflower River, burning several caches of food stocks and shipping.

May 27

MILITARY: At 6:00 A.M., General Nathaniel P. Banks launches his long-anticipated attack upon Confederate-held Port Hudson, Louisiana. The combined assaults on the northern breastworks by Generals Christopher Auger and Godfrey Wetzel become separated in rough terrain and are defeated piecemeal. A subsequent advance by General Thomas W. Sherman is also repelled, and Banks finally suspends the attack. Union losses are 1,995 while the Confederates record 235 casualties. Port Hudson also witnesses the first large-scale employment of African-American troops, who acquit themselves well under fire.

NAVAL: The gunboat *Cincinnati* attacks Confederate rifle pits outside Vicksburg, Mississippi, but is riddled by cannon fire and slowly sinks, colors flying; 25 sailors are killed and wounded while another 15 drown.

May 28

MILITARY: The 54th Massachusetts Infantry, composed entirely of African-American soldiers and white officers, parades through Boston under Colonel Robert G. Shaw, a wealthy Boston Brahmin and devoted abolitionist. The unit then ships out for Hilton Head, South Carolina, to serve in the siege of Charleston.

May 30

MILITARY: General Robert E. Lee reorganizes his Army of Northern Virginia into four corps: General James Longstreet (I), General Richard S. Ewell (II), General Ambrose P. Hill (III), and General J. E. B. Stuart (Cavalry Corps).

May 31

MILITARY: In a high-level strategy session at Richmond, Virginia, President Jefferson Davis openly expresses to General Robert E. Lee his disdain for General Joseph E. Johnston's handling of affairs outside of Vicksburg, Mississippi.

NAVAL: The gunboat *Carondelet* assists Union troops to defeat a serious Confederate attack against Perkins Landing, Louisiana. A transport successfully evacuates the troops, covered by heavy supporting fire.

June 1

AVIATION: The U.S. Balloon Corps is formally disbanded; the army will not experiment with balloons again until the 1890s.

June 2

MILITARY: Harriet Tubman, guiding a force of Union troops up the Combahee River, South Carolina, helps burn a plantation and free 800 African-American slaves. She does so with the blessings of her commander, General David Hunter, himself a noted abolitionist.

June 3

MILITARY: General Robert E. Lee begins his second invasion of the North by moving 75,000 men of his Army of Northern Virginia from Fredericksburg, Virginia, toward the Shenandoah Valley. General Ambrose P. Hill's corps is temporarily detained near Fredericksburg until needed.

June 5

MILITARY: Fighting erupts at Franklin's Crossing on the Rappahannock River as troops of General Ambrose P. Hill's command skirmish with the Union VI Corps under General John Sedgwick. The stiff resistance encountered convinces Sedgwick that the Southerners are still present in force, and he reports his findings to General Joseph Hooker. That leader, unconvinced, next orders several cavalry forays out to ascertain enemy intentions.

June 6

MILITARY: At Brandy Station, Virginia, General J. E. B. Stuart holds a grand review of 8,000 Confederate cavalry for a large army of political dignitaries and spectators gathered onto railroad cars.

June 7

MILITARY: At 5:30 A.M., General Henry E. McCulloch leads 1,500 Confederates on an attack against 1,061 Federals at Milliken's Bend, Louisiana, and withdraws after three hours of heavy fighting. African-American soldiers, who suffered disproportionately high casualties, murder several captured Southerners after learning that they had killed black captives in their custody. Union losses in this affair tally 101 dead, 285 injured, and 266 missing while the Confederates sustain 44 killed, 1,131 wounded, and 10 missing.

NAVAL: At Milliken's Bend, Louisiana, the gunboats *Choctaw* and *Lexington* assist Union troops in defeating a large Confederate assault. Their attack, though closely pressed, is beaten back by heavy concentrations of shell, canister, and grapeshot at close range.

June 8

MILITARY: The Army of Northern Virginia under General Robert E. Lee arrives at Culpeper Court House, Virginia, where General J. E. B. Stuart stages another elaborate cavalry review. Stuart, a jaunty, supremely confident gamecock, delights in displaying his finely honed troopers, but he is nonetheless slated to receive some rather unexpected—and unwelcome—visitors.

- At Falmouth, Virginia, General Alfred Pleasonton musters his Union cavalry corps, two infantry brigades, and six light batteries, 11,000 men in all, to reconnoiter across the Rappahannock River. His mission is to locate the main body of Confederates and ascertain if they are moving north into Union territory.

NAVAL: A Confederate boat party led by Master James Duke surprises and captures the steam tug *Boston* off Pass a l'Outre, Louisiana. Over the next three days, Duke uses his prize to capture two additional vessels before running the blockade around Mobile, Alabama.

June 9

MILITARY: At 4:00 A.M., General John Buford's brigade of Union cavalry splashes across the Rappahannock River at Beverly, Virginia, while, four miles down-

stream, General David M. Gregg's force crosses at Kelly's Ford. General Alfred Pleasonton has thrown two columns against the headquarters of General J. E. B. Stuart in an attempt to catch that wily trooper in a coordinated pincer movement. Stuart, mustering 9,500 troopers scattered over a wide area, immediately dispatches riders to assemble the command at Brandy Station while he organizes defenses along Fleetwood Hill. Stiff and indecisive fighting erupts before Pleasonton, perceiving dust clouds on the horizon, assumes that columns of Confederate infantry are approaching. He then signals his men to withdraw, and the fighting ceases. Brandy Station is the largest mounted action of the war and a tactical victory for the Confederates, who hold the field and inflict 936 Union casualties for a loss of 523 men. However, the 10-hour struggle underscores in bold relief the excellent progress Union cavalry has achieved under capable leadership.

NAVAL: Union mortar boats resume their protracted bombardment of Vicksburg, Mississippi, designed to cut off resupply efforts and undermine civilian morale. On average, they hurl 175 heavy explosive shells into the city every day while its inhabitants cower in nearby caves.

June 12

MILITARY: General Richard S. Ewell, advancing along the Blue Ridge Mountains of western Virginia, detaches General Richard E. Rodes's division and a cavalry brigade of General Albert G. Jenkins toward the town of Berryville to drive out an 1,800-man Union garrison under Colonel Andrew T. McReynolds.

June 14

MILITARY: At 4:00 A.M., General Nathaniel P. Banks hurls another assault against Confederate defenses at Port Hudson, Louisiana. This time, the infantry division of General Halbert E. Payne charges the strong entrenchments at Priest Cap and, despite heroic efforts, is repelled with 1,805 casualties. The well-protected Confederate defenders lose only 22 killed and 25 wounded.

- The Confederate II Corps under General Richard S. Ewell engages a Federal force under General Robert H. Milroy at Winchester, western Virginia. Milroy initially believes that the enemy to his front is simply a large foraging party, but by the time he realizes that the entire Army of Northern Virginia is bearing down on him, it is too late. The general hastily convenes a war council that elects to spike its artillery, burn its baggage trains, and evacuate Winchester under cover of darkness. However, Ewell has anticipated such a move, and he instructs General Edward Johnson to position his men along Martinburg Turnpike at Stevenson's Depot and cut Milroy's retreat.

- President Abraham Lincoln anxiously goads General Joseph Hooker into some kind of action to oppose this latest Confederate incursion. "If the head of Lee's army is at Martinsburg and the tail of it on the Plank Road between Fredericksburg and Chancellorsville, the animal must be very slim somewhere. Could you not break him?"

June 15

MILITARY: Confederates under General Edward Johnson successfully ambush retiring forces under General Robert H. Milroy at Stevenson's Depot, four miles north of Winchester, Virginia. Among the huge haul captured by the Southerners are 2,500 prisoners, 300 wagons, 300 horses, and 23 cannon. Union combat

losses add another 905 dead and 305 wounded to the tally while Johnson suffers 47 killed, 219 wounded, and three missing. This victory clears Federal forces from the Shenandoah Valley and facilitates General Robert E. Lee's impending invasion of Pennsylvania.

- Confederate general Joseph E. Johnston again wires General John C. Pemberton at Vicksburg, Mississippi, that his position is hopeless and that he must evacuate the city immediately and save his army. However, Pemberton never receives the missive owing to cut telegraph wires, and Johnston remains trapped within his works by Federal forces under General Ulysses S. Grant.
- President Abraham Lincoln calls for 100,000 militia to muster in Pennsylvania, Maryland, Ohio, and West Virginia, to thwart recent Confederate advances northward.
- The approach of the Army of Northern Virginia toward Pennsylvania soil causes outbreaks of excitement and panic at Baltimore, Maryland.

June 16

MILITARY: The new Confederate offensive leads to a furious spate of telegrams between General in Chief Henry W. Halleck and General Joseph Hooker as to General Robert E. Lee's intentions. Hooker wants to rush troops north and confront Lee above Washington, D.C., while Halleck insists that he follow the Southerners and relieve the garrison at Harpers Ferry, West Virginia, en route.

June 17

MILITARY: As the Army of Northern Virginia under General Robert E. Lee advances north into Maryland, General J. E. B. Stuart is ordered to screen his right flank from prying Federal eyes. His Union opposite, General Alfred Pleasonton, is determined to uncover Confederate intentions and come to grips with his gray-coated adversaries. Colonel Thomas Munford, 5th Virginia Cavalry, is also scouting in the vicinity of Aldie, Virginia, when he brushes up against Union troopers under General Hugh J. Kilpatrick. Fighting is intense but dies down for the evening; Union losses for the day total around 300 to a Confederate tally of 100.

NAVAL: The Union ironclad *Weehawken* under Captain John Rodgers, assisted by the *Nahant*, engages Commander William A. Webb and the formidable steam ram *Atlanta* in Wassaw Sound, Georgia. *Atlanta* grounds in the channel during its approach and is subsequently worked free, but its rudder is damaged and the ship steers erratically. Rodgers's vessels then slip quickly into point-blank range and pound their adversary into submission after a 15-minute struggle—another serious loss for the struggling Confederate navy.

June 18

MILITARY: General Ulysses S. Grant summarily relieves General John A. McClernand from command of the XIII Corps for insubordination and replaces him with General Edward O. C. Ord. The final straw came after McClernand issued unauthorized, laudatory statements to his men praising them for their role in the failed assault upon Vicksburg, Mississippi, while denigrating the performance of other units.

NAVAL: Union rams *General Sterling Price* and *Mound City* conclude a three-day raid along the Mississippi River that accounts for 60 enemy skiffs, barges, and boats.

June 20

MILITARY: Union cavalry under General Alfred Pleasonton increase pressure on the mounted screen of General J. E. B. Stuart, now left unsupported east of Blue Ridge Mountain. He orders General David M. Gregg's division to attack General Wade Hampton's Confederates at Goose Creek, Virginia, while another force under General John Buford threatens to outflank them.

June 22

MILITARY: General J. E. B. Stuart receives discretionary and somewhat vague instructions from General Robert E. Lee, ordering him to alternately raid Union supply lines while guarding the army's right flank as it advances northward into Pennsylvania.

June 23

MILITARY: The Army of Northern Virginia under General Robert E. Lee nears Chambersburg, Pennsylvania, with several disparate Northern columns groping along in pursuit.

**Stuart, J. E. B. (1833–1864)***Confederate general*

James Ewell Brown Stuart was born in Patrick County, Virginia, on February 6, 1833, and he gained admittance to the U.S. Military Academy in 1850. Four years later he graduated 13th in his class and was commissioned a second lieutenant in the Mounted Rifle Regiment. Stuart saw active duty in Kansas and Texas before transferring to the 1st Cavalry, and partook of several skirmishes against the Cheyenne. He rose to first lieutenant in 1855 and also married the daughter of his superior, Colonel Philip St. George Cooke. Eager to enhance his meager income, Stuart turned to inventing, and he patented a device for fixing swords to belts. In October 1859 Stuart acted as aide to Colonel Robert E. Lee during John Brown's insurrection at Harpers Ferry, Virginia, and helped direct the operation that crushed it. He rose to captain in April 1861, the same month that the Civil War erupted, and resigned his commission to fight with the Confederacy. Stuart first

attracted attention by expertly handling his cavalry in the Shenandoah Valley prior to the Battle of Bull Run, and the following September he advanced to brigadier general. He especially distinguished himself in combat through the Peninsula campaign in the summer of 1862, completely riding around the Army of the Potomac with his father-in-law, now General Cooke, riding in hot pursuit. Stuart gained promotion to major general in consequence, and in August 1862 he conducted several raids behind Union lines, one of which captured the headquarters of General John Pope. His command then rounded the year off by performing capably at the bloody battles of Antietam and Fredericksburg, gaining additional renown for their ability to ride and fight effectively.

In the spring of 1863 Stuart performed his most important scouting activity by discovering that the right wing of General Joseph Hooker's Army of the Potomac was

June 24

NAVAL: Admiral John A. B. Dahlgren is relieved of duties at the Washington Navy Yard and ordered to succeed Admiral Samuel F. Du Pont as the new commander of the South Atlantic Blockading Squadron.

June 25

MILITARY: General J. E. B. Stuart leads three cavalry brigades north from Salem Depot, Virginia, to join the main Confederate army north of the Potomac River. However, Stuart's interpretation of his otherwise discretionary orders ultimately draws him away from the main theater of operations, hindering Confederate intelligence-gathering abilities at a time when the whereabouts of pursuing Union force are unknown.

NAVAL: In Japan, the steamer *Pembroke* is fired upon by cannon belonging to Prince Nagata as it journeys through the Shimonoseki Straits between the main islands of Honshu and Kyushu. The attack provokes a direct American response.

"up in the air" at Chancellorsville. This intelligence allowed the II Corps under General Thomas J. Jackson to slip around the Union flank and rout them on May 2, 1863. At that point, Stuart's self-confidence seems to have gotten the better of his judgment when he was surprised in camp at Brandy Station on June 9, 1863, in the Civil War's largest cavalry clash. Stuart's Confederates held the field, but he was roundly criticized for being caught napping. Stung by these remarks, he resolved to redeem his reputation by some grand maneuver, and later that month he once again rode completely around the Union army in Pennsylvania. However, this move left General Robert E. Lee without cavalry at Gettysburg and, lacking proper reconnaissance, Lee was badly defeated. Stuart resolved never to stray far from headquarters, and throughout 1864 he performed useful service during General Ulysses S. Grant's Overland campaign to Richmond. Union cavalry under General Philip H. Sheridan was finally dispatched to eliminate Stuart, and he fell mortally wounded at Yellow Tavern on May

Confederate general J. E. B. Stuart (National Archives)

9, 1864. He was one of the best and most capable commanders of mounted troops in American military history.

June 26

NAVAL: Admiral Andrew H. Foote dies in New York City of wounds received in the siege of Fort Donelson in February 1862.

- Confederate schooner *Archer* under Lieutenant Charles W. Read boldly attacks and sinks the revenue cutter *Caleb Cushing* at Portland, Maine, but subsequently surrenders to the *Forest City* after expending its last ammunition. This concludes the dashing career of Read who, in the span of only 19 days, has captured 22 vessels despite 47 Union craft on the lookout for him. He had graduated last in his class (“Anchor Man”) at the U.S. Naval Academy in 1860.

June 27

MILITARY: President Abraham Lincoln appoints General George G. Meade to replace General Joseph Hooker as commander of the Army of the Potomac.

- Confederate cavalry under General J. E. B. Stuart clash with Union forces at Fairfax Court House, Virginia, taking some prisoners. He then approaches the town, eager to secure supplies abandoned by General Joseph Hooker, but is surprised and nearly captured in a sudden charge by 86 troopers of the 11th New York Cavalry. Fortunately, Stuart and his suite are rescued in time by the 1st North Carolina Cavalry under Colonel Laurence S. Baker, who abruptly pushes the attackers back. The dashing leader is apparently so pleased that he intends to continue raiding the Union rear—instead of joining the Army of Northern Virginia as planned.

June 28

MILITARY: General Robert E. Lee is startled to find strong Union forces aggregating at Frederick, Maryland, and threatening his rear. Their exact intentions remain hazy, as all of Lee’s cavalry under General J. E. B. Stuart has departed on a deep raid through Union territory. Lee, as a precaution, orders his dispersed command to concentrate in the vicinity of Gettysburg, Pennsylvania, an important road junction.

- General John C. Pemberton, defending the vital Confederate bastion at Vicksburg, Mississippi, is petitioned by his soldiers to surrender rather than see the entire force starve to death. After a seven-week siege, the final curtain is about to fall.
- A disgraced major general Joseph Hooker retires as commander of the Army of the Potomac and ventures to Washington, D.C., to await orders. His replacement is Major General George G. Meade, an engineer by training, who spends several days reorganizing his charge. To invigorate his mounted army, he promotes youthful captains George A. Custer, Elon Farnsworth, and Wesley Merritt to brigadier generals of volunteers.

June 30

MILITARY: General John F. Reynolds is ordered by General George Gordon Meade to occupy the vital road junction at Gettysburg, Pennsylvania. The town is then occupied by a cavalry division under General John Buford who, cognizant of its value, prepares his command to defend it. He briefly skirmishes with part of Confederate general Henry Heth’s division, sent to Gettysburg to forage for shoes, and Heth informs General Ambrose P. Hill of the presence of Federal troops at the junction. Hill blithely dismisses the notion.

- Marauding Confederate cavalry under General J. E. B. Stuart skirmish with Union troopers under General Elon Farnsworth at Hanover, Pennsylvania. An inconclusive fight unfolds as Union reinforcements arrive under Generals Hugh J. Kilpatrick and George Custer, while the Confederates receive General Fitzhugh Lee. Rather than rejoin the Army of Northern Virginia, then concentrating at Gettysburg, Stuart now takes his command on an even wider detour around pursuing Union forces.

July 1

MILITARY: Early this morning, the Confederate division of General Henry Heth forages for shoes in the vicinity of Gettysburg, Pennsylvania, when they unexpectedly encounter dismounted Union cavalry under General John Buford. Sharp fighting commences as the Southerners impulsively charge and are repelled by rapid-firing Spencer carbines. Combat intensifies as Generals Oliver O. Howard and Abner Doubleday arrive with the Union XI and III Corps, respectively, as does the entire Confederate II Corps under General Richard S. Ewell. Quick maneuvering allows the rebels to roll up Howard's line, and soon his troops are streaming through Gettysburg in confusion. Disaster is averted only when General Winfield S. Hancock comes galloping up at the head of his II Corps and occupies the high ground along Cemetery Hill. This act allows the Army of the Potomac to occupy excellent defensive terrain around Gettysburg that evening. Casualties for the day amount to 9,000 Federals and 6,800 Confederates.

- A Confederate staff officer finally locates the elusive cavalry of General J. E. B. Stuart and orders him to repair to the main army under General Robert E. Lee at Gettysburg with all haste.
- General William S. Rosecrans climaxes his successful Tullahoma Campaign by bloodlessly occupying Chattanooga, Tennessee, as Confederates under General Braxton Bragg withdraw. This is one of the most outstanding instances of strategic maneuvering during the Civil War.

July 2

MILITARY: At Gettysburg, Pennsylvania, 75,000 Confederates confront 85,000 Federals, whose defensive line resembles a fish hook with its right anchored on Culp's Hill to the north, then running along Cemetery Ridge to a large hill called Little Round Top on its extreme left. Lee determines to defeat the enemy where he finds him, over objections by General James Longstreet, and orders strong attacks on both Union flanks. At one point the Southern advance nearly carries them through the Union line, but a sharp countercharge by General Winfield S. Hancock pushes them back downhill. A crisis develops on the extreme Union left at Little Round Top as a tremendous firefight unfolds between Colonel Joshua L. Chamberlain's 20th Maine and an Alabama brigade sent to dislodge him. His ammunition having failed, Chamberlain decides the issue with a sudden bayonet charge down the slope that routs his adversaries and saves the Union left. Meade then correctly predicts that Lee, foiled on either flank, will direct the bulk of his efforts at the Union center on the morrow.

- Late in the afternoon, General J. E. B. Stuart stumbles into the headquarters of General Robert E. Lee at Gettysburg, Pennsylvania. An exasperated Lee, who

entered the fight without accurate information for lack of mounted reconnaissance, curtly declares, "Well, General Stuart, you are here at last."

- Brigadier General John H. Morgan leads 2,500 Confederate cavalry on a raid into Kentucky, across the Ohio River, and into Ohio itself.

July 3

MILITARY: At 1:00 P.M., General Alexander E. Porter's 140 cannon commence bombarding the Union line at Gettysburg, Pennsylvania. The Federals respond in kind with 100 cannon of their own, initiating the largest artillery duel in American history. At 3:00 P.M., Confederates from the divisions of Generals George E. Pickett, Johnston Pettigrew, and Isaac Trimble advance from the nearby woods and into what amounts to a killing ground, for Union batteries are carefully sited for interlocking fields of fire. Only a handful of surviving Confederates penetrate Meade's defenses and are quickly swallowed up by the Union reserves. Eventually thousands of wounded and stunned survivors stream back across the field toward Seminary Ridge in abject defeat. General Robert E. Lee, surveying the carnage around him, is heard to murmur "It is all my fault, my fault."

- Confederate cavalry under General J. E. B. Stuart, conspicuously absent during the first two days of fighting, is now ordered to seek out and assail the Union rear. En route he encounters Union cavalry under General David M. Gregg, who fights the Southerners to a standstill in one of the biggest mounted clashes of the war. The overworked brigade of General George A. Custer particularly distinguishes itself with repeated, headlong charges that finally induce Stuart to relinquish the field.

- The debacle at Gettysburg represents the high tide of Confederate military fortune. Three days of ferocious combat with a determined adversary enjoying stark terrain advantages depletes the Army of Northern Virginia by an estimated 20,451 men. The actual loss may have been as high as 28,000—a horrific toll of irreplaceable, trained manpower. The Army of the Potomac is equally savaged with losses of 23,049.

- Generals John C. Pemberton and Ulysses S. Grant arrange an armistice to confer about surrender terms at Vicksburg, Mississippi. Grant bluntly informs his opposite: "You will be allowed to march out, the officers taking with them their side arms and clothing, and the field, staff, and cavalry officers one horse each. The rank and file will be allowed all their clothing but no other property."

NAVAL: The onset of surrender negotiations at Vicksburg, Mississippi, signals an end to the ongoing naval bombardment of the city by Admiral David D. Porter's Mississippi River Squadron. Naval personnel have fired 16,000 rounds from a variety of ships, gunboats and mortar craft, in addition to 13 naval guns hauled ashore.

July 4

INDIAN: Chief Little Crow, who initiated the Santee (Sioux) uprising in Minnesota almost a year earlier, is shot dead by farmers while picking berries.

MILITARY: Despite pleas and entreaties from President Abraham Lincoln, General George G. Meade declines to pursue the fleeing Confederates. In light of the horrific casualties recently sustained by his Army of the Potomac at Gettysburg, and the resultant disorganization, his reluctance is understandable.

- The Army of Northern Virginia under General Robert E. Lee withdraws in good order from Gettysburg, Pennsylvania, and marches for Williamsport, Maryland, to recross the Potomac River into Virginia. Progress is slow owing to incessant rain and a wagon train of wounded stretching 17 miles.
 - The Confederate citadel of Vicksburg, Mississippi, surrenders to General Ulysses S. Grant after a brutal, seven-week siege. Union losses for the entire campaign come to 800 killed, 3,900 wounded, and 200 missing out of 77,000 committed. The Southerners have lost 900 dead, 2,500 wounded, 200 missing, and 29,491 captured. The Confederacy is now completely cut in two along the Mississippi River. “Grant is my man,” an ebullient President Abraham Lincoln beams, “and I am his the rest of the war.” In recognition of Grant’s Herculean efforts, Congress votes to promote him to major general of regulars, his first regular rank since he resigned as a captain in 1854.
 - Union forces defending Helena, Arkansas, under General Benjamin M. Prentiss withstand a determined Confederate attack from Generals Theophilus H. Holmes and Sterling Price. Unable to make any headway and unwilling to withstand a withering cannonade, the Southerners concede defeat and withdraw after losing 380 dead, 1,100 wounded, and 1,100 captured out of 7,600 present. The Federals sustain only 239 killed, wounded, and missing.
- NAVAL:** At Helena, Arkansas, the gunboat *Tyler* under Lieutenant Commander James M. Prichett lends close fire support to Union forces attacked by superior numbers of Confederates, allowing them to escape.

July 5

MILITARY: General William T. Sherman marches from Vicksburg, Mississippi, at the head of 40,000 troops divided among the corps of Generals Frederick Steele, Edward O. C. Ord, and John G. Parke. His mission is to recapture Jackson by driving General Joseph E. Johnston out from behind the Big Black River.

July 6

NAVAL: Admiral John A. B. Dahlgren relieves Admiral Samuel F. Du Pont as commander of the South Atlantic Blockading Squadron off Port Royal, South Carolina. Du Pont’s removal is as much about ongoing friction with Secretary of the Navy Gideon Welles as it is his failure before Charleston.

July 8

MILITARY: General John H. Morgan crosses the Ohio River at Cumming’s Ferry, Kentucky, with 2,500 mounted soldiers and begins raiding Indiana and southern Ohio. His appearance stimulates some anxiety over the rekindling of pro-Confederate “Copperhead” activities throughout that region.

July 9

MILITARY: Confederate general Franklin Gardner surrenders Port Hudson, Louisiana, to the Army of the Gulf under General Nathaniel P. Banks. The Southerners lose roughly 146 killed, 447 wounded, and 6,400 captured, while Union casualties top 708 dead, 3,336 injured, and 319 missing. Victory here removes the last Confederate obstacle on the Mississippi River, now freely navigable as far as St. Louis, Missouri, for the first time in two years.

NAVAL: Union gunboats under Lieutenant Commander LeRoy Fitch are called into action along the Ohio River against the daring mounted raid of General John H. Morgan.

July 10

MILITARY: The siege of Charleston, South Carolina, begins as General Quincy A. Gillmore lands 3,700 Federal troops of General George C. Strong's brigade on Morris Island, overpowering Confederate forces stationed there. Gillmore next begins preparing to carry nearby Battery Wagner, commanded by General William B. Taliaferro.

NAVAL: Admiral John A. B. Dahlgren initiates a second naval siege of Charleston, South Carolina, by bombarding Confederate positions on Morris Island. The ironclads *Nahant*, *Weehawken*, *Catskill*, and *Montauk* are subsequently damaged by Confederate shore batteries, none seriously; *Catskill* is struck 60 times.

- In Boston, Massachusetts, the screw sloop *Shenandoah* and bark *Ethan Allen* depart in pursuit of the Confederate raider *Florida*, which has been sighted in New England waters.

July 11

MILITARY: A determined Union assault upon Battery Wagner, Charleston Harbor, South Carolina, is launched by General Quincy A. Gillmore. Gillmore is unaware that the garrison was recently enlarged to 1,200 men; his attack is easily rebuffed, with losses of 49 killed, 123 wounded, and 167 missing. The Southerners sustain only six dead and six wounded.

July 12

MILITARY: Troops under Generals William T. Sherman and Joseph E. Johnston spar in the vicinity of Clinton, Mississippi. Union forces unleash a prolonged bombardment of Confederate positions when suddenly a brigade commanded by Colonel Isaac Pugh attacks Southern redoubts defended by General John C. Breckinridge. Pugh, his advance unsupported, loses 500 men out of 800.

July 13

MILITARY: Violent anti-draft riots erupt in New York City shortly after the first names are read for induction. At length, a seething mob of 50,000 Irish emigres attacks the draft office, burning it to the ground. Over the next four days, violence will escalate until Federal troops arrive to restore order. Over 1,000 people, principally African Americans targeted by the mob, are either killed or injured.

NAVAL: The Federal gunboat *Baron de Kalb* strikes a mine and sinks outside of Yazoo City, Mississippi, while escorting several transports carrying army troops, which capture the town. The Southerners also scuttle 19 vessels to prevent their capture.

MARINES: A battalion of marines from the Brooklyn Navy Yard is called into New York City to help restore order during anti-draft riots there.

July 14

MILITARY: The Army of Northern Virginia steadily evacuates Williamsport, Maryland, behind two divisions under General Henry Heth that act as a rear guard. However, General George A. Custer's cavalry brigade sweeps into nearby Falling

Waters, rounding up several stragglers. General John Buford's division is also approaching, but General Hugh J. Kilpatrick ignores the others and orders two companies of the 6th Michigan Cavalry to charge the Confederates. The Federals capture 719 prisoners, three battle flags, and two cannon, but Southern losses would have been even greater had Kilpatrick waited until the entire force was massed.

- President Abraham Lincoln, disillusioned by General George G. Meade's lax pursuit of retreating Confederates, indelicately informs him, "Your golden opportunity is gone and I am distressed immeasurably because of it."

NAVAL: Union gunboats under Rear Admiral Samuel D. Lee assist in the capture of Fort Powhatan on the James River, Virginia.

July 15

MILITARY: After the Arkansas River becomes fordable, Union general James G. Blunt assembles 3,000 men (mostly Native Americans and African Americans) and two batteries for a preemptive strike against 6,000 Confederates gathering at Elk Creek, Indian Territory (Oklahoma). He intends to disperse General Douglas H. Cooper's command before it is reinforced by an additional 3,000 Confederates under General William L. Cabell.

- Stricken by news of Gettysburg, Vicksburg, and Port Hudson, a somber president Jefferson Davis intones, "The clouds are truly dark over us."

July 16

MILITARY: General Joseph E. Johnston begins a nighttime evacuation of Jackson, Mississippi, rather than face envelopment by General William T. Sherman. He accordingly falls back across the Pearl River covered by darkness and withdraws 30 miles eastward.

NAVAL: The screw sloop *Pawnee* and the gunboat *Marblehead* help Union land forces repel a determined Confederate attack upon Grimball's Landing on the Stono River, South Carolina.

- In France, Confederate naval agent James Bulloch contracts with Lucien Arman to build two double-turret ironclad rams; one of these eventually emerges as the *Stonewall*.
- At Shimonoseki, Japan, the screw sloop *Wyoming* under Captain David McDougal sinks three of Prince Nagata's warships in retaliation for firing upon an American merchant vessel the previous June.

July 17

INDIAN: General James G. Blunt, leading 3,000 Union troops, attacks 6,000 Confederate Creek, Choctaw, Cherokee, and Texans under General Douglas H. Cooper at Honey Springs, Indian Territory (Oklahoma). The aggressive Blunt outflanks Cooper twice before his Indians mount a whooping counterattack that grants Cooper time to cross the Elk River to safety. Blunt's prompt action saves the Indian Territory for the Union. This is the first time that Native Americans confront and fight large numbers of African Americans.

July 18

MILITARY: A second Federal assault upon Battery Wagner, Charleston Harbor, South Carolina, is courageously spearheaded by Colonel Robert G. Shaw's 54th

Meade, George M. (1815–1872)

Army general

George Gordon Meade was born in Cadiz, Spain, on December 31, 1815, the son of a naval agent. He was admitted to the U.S. Military Academy in 1831 and graduated four years later, 19th in his class. Meade joined the 3rd Artillery as a second lieutenant and served briefly in Florida's Second Seminole War before falling ill and transferring to the army arsenal in Watertown, Massachusetts. He subsequently resigned his commission in 1836 and spent six years working as a surveyor in Mississippi and Texas before rejoining the Corps of Topographical Engineers in 1842. After completing additional work in Maine and Philadelphia, Meade next joined the army of General Zachary Taylor during the Mexican War. Meade performed well at the Battles of Palo Alto, Resaca de la Palma, and Monterrey in 1846, winning a brevet promotion to first lieutenant. He performed similar useful work under General Winfield Scott during the Mexico City Campaign in

1847, and afterward served in Florida and along the Canadian border. Once the Civil War broke out in April 1861, Meade functioned as a brigadier general of Pennsylvania volunteers and spent several months defending Washington, D.C. In the spring of 1862 he took to the field under General George B. McClellan and fought conspicuously in the Seven Days campaign, where he fell severely wounded. Additional hard campaigning followed at Antietam, Fredericksburg, and Chancellorsville, where he handled his men capably, and in the early summer of 1863 President Abraham Lincoln, desperate for competent Union leadership, appointed him commander of the much-battered Army of the Potomac.

Meade had no sooner accepted his new command than General Robert E. Lee commenced his invasion of Pennsylvania. On July 1, 1863, Union and Confederate forces inadvertently collided at Gettysburg, where

Massachusetts Infantry; recruited entirely from African Americans, the 54th clambers up the fort's parapet and plants its flag despite heavy fire. Consequently, Sergeant William H. Carney becomes the first black soldier to win the Medal of Honor. Overall, casualties in Brigadier General George S. Strong's brigade total 1,515 (both Shaw and Strong are killed) while the Confederates sustain 36 dead, 133 injured, and five missing.

NAVAL: Admiral John A. B. Dahlgren's ironclad squadron lends heavy supporting fire during the failed assault against Battery Wagner, Charleston Harbor. His vessels close to within 300 yards of Confederate works, but the moment they cease fire to allow for the Union infantry assault, the battery's defenders suddenly emerge to repel attackers.

July 19

NAVAL: On the Ohio River, Union gunboats attack the Confederate forces of General John H. Morgan on Buffington Island, while army troops attack his rear; 3,000 Confederate prisoners are taken while Morgan escapes.

Southerners had the better of it and chased Union forces up the nearby hills. Meade arrived that evening to sort out the army and, realizing his men occupied ideal defensive terrain, decided to make a stand. Over the course of July 2–3, 1863, Lee's battle-hardened veterans attacked the strongly posted Union line and were bloodily repelled. Both sides took tremendous losses and Lee ultimately retreated, but Lincoln was extremely disappointed after Meade failed to pursue Lee vigorously. In the spring of 1864, General Ulysses S. Grant took charge of events in the East, although Meade continued to command the Army of the Potomac. Additional hard fighting ensued before the Confederates finally surrendered in April 1865, but Meade had performed admirably under very trying circumstances. After the war, he commanded the Department of the East until April 1868, then went south to Alabama for a stint with Reconstruction work. Meade died in Philadelphia, Pennsylvania, on November 6, 1872, an important and generally overlooked Union leader.

Union general George Meade (*Library of Congress*)

July 21

NAVAL: Confederate artillery fire disables the transport *Sallie Ward* on the Mississippi River; it grounds and is burned on Island No. 82.

July 22

NAVAL: Admiral John A. B. Dahlgren orders the deployment of a four-gun naval battery on Morris Island to help bombard Fort Sumter, Charleston Harbor, South Carolina.

July 26

MILITARY: After a continuous running fight of several days, General John H. Morgan and his remaining 364 troopers surrender at Salineville, Ohio. Morgan is slated for confinement at the Ohio State Penitentiary in Columbus.

July 30

POLITICS: President Abraham Lincoln threatens to execute captured Confederate officers and subject Southern soldiers to hard labor if captured Union officers are

harmed in any manner for leading African-American troops, or if former slaves now wearing a Federal uniform are sold back to bondage.

August 1

MILITARY: Noted Confederate spy Belle Boyd is again arrested at Martinsburg, West Virginia, and sent to Washington, D.C., for internment.

NAVAL: Admiral David D. Porter formally succeeds Admiral David G. Farragut as commander of all naval forces and operations along the Mississippi River. Farragut, worn out and ailing, is preparing to go on extended leave to recover his health.

August 5

NAVAL: The side-wheel steamer *Commodore Barney* is heavily damaged on the James River, Virginia, when a 1,000-pound electrically detonated mine is exploded a short distance away, knocking 20 sailors overboard. Confederate underwater ordnance is fast achieving technical sophistication and considerable lethality.

August 7

NAVAL: In light of persistent Union attacks against Charleston, South Carolina, General Pierre G. T. Beauregard inquires if a “submarine boat” being built in Mobile, Alabama, can be transferred overland by rail. This vessel subsequently gains a degree of infamy as the *H. L. Hunley*.

August 8

MILITARY: General Robert E. Lee tenders his resignation to President Jefferson Davis over his recent failure at Gettysburg, Pennsylvania, but Davis refuses to accept.

August 10

MARINES: Major Jacob Zeilin takes a marine battalion to Morris Island in Charleston Harbor to assist army troops in their attack upon Battery Wagner.

August 12

NAVAL: The experimental submarine *Hunley* arrives at Charleston, South Carolina. This novelty is fashioned from an iron steam boiler that has been water-proofed and fitted with tapered bow and stern sections. The *Hunley* is 40 feet long and only 3.5 feet in diameter, being propelled by five men operating a crankshaft-driven propeller. General Pierre G. T. Beauregard, commanding the city’s defenses, is intrigued by the device and seeks to impress it into active service as soon as testing is completed.

August 16

MILITARY: After considerable prodding from the government, General William S. Rosecrans pushes his Army of the Cumberland out of Chattanooga and toward the Georgia border. Due to the mountainous terrain before him, he plans to spread out into three widely spaced columns to cover all three passes, a risky ploy that endangers his command with defeat in detail.

NAVAL: In another ominous development, the screw sloop *Pawnee* sails down the Stono River, South Carolina, until four electrically detonated mines explode nearby, one just 30 yards off. No damage occurs, but the attacks underscore the increasing sophistication of Confederate underwater ordnance.

August 17

NAVAL: Union ironclads under Admiral John A. B. Dahlgren commence a five-day bombardment of Fort Sumter, Charleston Harbor, South Carolina.

August 18

TECHNOLOGY: Intrigued by new weapons, President Abraham Lincoln personally test-fires a new, rapid-fire Spencer carbine at Treasury Park, Washington, D.C. This weapon gives Federal cavalry units a decided edge in firepower over Confederate units still armed with muzzle-loading rifles.

August 20

INDIAN: Colonel Kit Carson commences his “scorched earth” policy against the Navajo in the New Mexico Territory, being further assisted by Ute, Zuni, and Mescalero Apache tribesmen. All captives taken are transferred to a new reservation at Bosque Redondo for resettlement.

August 21

MILITARY: William C. Quantrill and 450 Confederate irregulars and partisans storm into Lawrence, Kansas, a noted abolitionist center and hotbed for Union “jayhawker” activities. Over the next four hours, they systematically round up and execute 180 men and boys, then set fire to 185 buildings. It is the largest single atrocity of the Civil War.

NAVAL: Off Morris Island in Charleston Harbor, South Carolina, the Confederate torpedo boat *Torch* sorties at night and tries to attack the ironclad *New Ironsides*; the mission is aborted due to steering problems.

August 22

NAVAL: In a daring raid, Acting Ensign Joseph C. Cony leads two boats of sailors up the New Topsail Inlet, North Carolina, where he burns the blockade runner *Alexander Cooper* and destroys a salt works.

August 23

NAVAL: A cutting-out expedition by Confederates under Lieutenant John Taylor Wood succeeds in capturing the Union steamers *Reliance* and *Satellite* off Windmill Point, Virginia.

- Confederate commerce raider *Florida* under Lieutenant John N. Maffitt pulls into Brest, France, after an eight-month cruise that netted 22 prizes. However, the raider is in dire need of a refit, and six months will lapse before it can put to sea again.

August 25

MILITARY: General Thomas Ewing, commanding the Union Border District in Missouri, issues General Order No. 11. This controversial measure forces 20,000 residents of Bates, Cass, and Jackson Counties, and parts of Vernon County, long suspected of collaborating with Confederate guerrillas, to abandon their homes. These structures are then peremptorily burned in retaliation for the Lawrence, Kansas, massacre.

NAVAL: Lieutenant John T. Wood uses the captured Union gunboats *Reliant* and *Satellite* to seize three additional schooners at the mouth of the Rappahannock River, Virginia. However, all five vessels are burned and scuttled owing to a lack of coal to operate them.

August 26

MILITARY: Union cavalry under General William W. Averell skirmish heavily with Confederate forces at White Sulphur Springs, West Virginia. His 2,000 troopers dash headlong into a like number of Confederates under Colonel George S. Patton, attack repeatedly across densely wooded terrain, and are finally defeated and driven off.

August 29

NAVAL: The experimental submarine *Hunley* under Lieutenant John A. Payne tragically sinks on a trial run in Charleston Harbor, South Carolina, killing all six crew members. The vessel apparently foundered in the wake of the steamer *Etiwan* after its hatches were opened for better ventilation.

September 1–2

NAVAL: Admiral John A. B. Dahlgren leads his ironclad force in a five-hour night action against Fort Sumter, Charleston Harbor, South Carolina. The vessels steam to within 500 yards of the embattled fortress before firing; they receive a total of 70 hits from batteries at Fort Moultrie before the action ceases at daybreak. Captain Oscar C. Badger become the third senior flag officer wounded in two months.

September 2

SLAVERY: To curtail mounting manpower shortages, the Alabama State legislature considers arming slaves for use in the army.

September 3

INDIAN: Union troops under General Alfred Sully attack a hostile Santee (Sioux) village at Whitestone Hill, Dakota Territory, killing an estimated 200 inhabitants. The Americans then burn the village and withdraw with 156 captives.

September 6

MILITARY: Confederate forces manning batteries Wagner and Gregg on Morris Island, Charleston Harbor, South Carolina, are secretly evacuated by General Pierre G. T. Beauregard. This final act concludes 60 days of near continuous bombardment by Union land and naval forces—one-third of the 900 defenders became casualties.

September 7

MILITARY: A small Confederate battery of 42 men under 20-year-old Lieutenant Richard W. Dowling, 1st Texas Heavy Artillery, engages a 4,000-man amphibious expedition under General William B. Franklin off Sabine Pass, Texas. Dowling allows the Union vessel to approach to within close range before opening fire with his masked batteries at 4:00 P.M. Within minutes, the Union gunboats *Clifton* and *Sachem* are disabled and forced to strike; the remainder dejectedly sail back to New Orleans.

NAVAL: Admiral John A. B. Dahlgren demands the surrender of Fort Sumter in Charleston Harbor, South Carolina; once it refuses, he conducts a personal reconnaissance in force with the ironclads *Weehawken* and *New Ironsides*. After *Weehawken* grounds in the channel, the *New Ironsides* interposes itself between Fort Moultrie and the stricken vessel, taking 50 hits. Both vessels eventually return to safety.

September 9

MILITARY: Confederate general James Longstreet's I Corps of 15,000 veteran troops begins loading aboard trains in Virginia for a nine-day trek to Lafayette, Georgia, to reinforce General Braxton Bragg in Tennessee.

- The strategic city of Chattanooga, Tennessee, surrenders to the Army of the Cumberland under General William S. Rosecrans without a shot being fired. General Braxton Bragg and the Army of Tennessee then fall back 28 miles to Lafayette, Georgia, to await reinforcements from the east.

NAVAL: Admiral John A. B. Dahlgren launches a nighttime assault against Fort Sumter, Charleston Harbor, South Carolina, with 413 sailors and U.S. Marines under Commander Thomas H. Stevens. But the Southerners, having earlier recovered a code book from the sunken *Keokuk*, decipher Union signals and anticipate the attack. The Federals are consequently rebuffed with a loss of 100 prisoners.

MARINES: A large landing detachment of sailors and marines under Commander Thomas H. Stevens participates in a nighttime boat assault on Fort Sumter, Charleston Harbor; they are driven off with a loss of 44 killed, wounded, and missing.

September 10

MILITARY: Confederate forces under General Sterling Price evacuate Little Rock, Arkansas, for nearby Rockport, whereupon General Frederick Steele's Federals advance and establish a pro-Union administration there. This is yet another blow to the Confederacy, still reeling from the loss of Vicksburg, and it imperils the Trans-Mississippi Department under General Edmund Kirby Smith.

September 13

MILITARY: General Braxton Bragg orders General Leonidas K. Polk to attack and overwhelm the isolated Union XXI Corps under General Thomas L. Crittenden at Lee and Gordon's Mills in northern Georgia. Polk dithers and fails to maneuver in a timely fashion, so this part of the widely scattered Army of the Cumberland escapes annihilation. General William S. Rosecrans finally recognizes the danger and orders his army to concentrate near Chickamauga Creek.

September 15

TECHNOLOGY: In Washington, D.C., Brigadier General James W. Ripley, a veteran of the War of 1812, finally resigns as the Army's chief of ordnance. Ultraconservative in outlook, he has frowned upon the adoption of such new and revolutionary technologies as repeating rifles and Gatling guns.

MILITARY: President Abraham Lincoln signs an order suspending writs of habeas corpus nationwide; it applies to wherever military authorities deem it necessary to detain civilians suspected of collaborating with the South.

September 17

MILITARY: Congress votes 12-year-old musician Willie Johnson a Medal of Honor for bravery during the Seven Days Battle of 1862; he will remain the youngest recipient.

September 18

MILITARY: The Army of the Cumberland and the Army of Tennessee confront each other across Chickamauga Creek, Georgia. For once, Confederate forces

outnumber the Federals, massing 68,000 men to a Union tally of 58,000. General Braxton Bragg seeks to impose himself between General William S. Rosecrans and his main supply base at Chattanooga, Tennessee, but skirmishes with Union cavalry along various bridges delay the move a full day.

September 19

MILITARY: The Battle of Chickamauga begins once advanced elements of General George H. Thomas's XIV Corps encounter Confederate cavalry under General Nathan B. Forrest. As fighting escalates, both General Braxton Bragg and General William S. Rosecrans cancel their respective plans for the day and continually feed new units into an ever-expanding fray. The day's combat occasions serious losses to both sides and little else. That evening, following the arrival of General James Longstreet's veteran I Corps, Bragg appoints him to command his left wing while General Leonidas K. Polk leads the right.

NAVAL: A Confederate boat expedition under Acting Masters John Y. Beall and Edward McGuire captures and burns four schooners in Chesapeake Bay.

September 20

MILITARY: General Braxton Bragg intends to renew combat at Chickamauga at dawn, but confusion and delays preclude any Confederate action before 9:00 A.M. The pattern of fighting resembles that of the previous day, and another bloody stalemate appears to be in the offing until fate intervenes. General William S. Rosecrans is mistakenly informed that a gap has developed in the center of his line, so he orders General Thomas J. Wood's division to plug it. Unfortunately, no sooner does Wood redeploy than General James Longstreet's I Corps, arrayed six brigades deep, bursts onto the scene. This unexpected onslaught completely sweeps away the Union center and right, carrying off Rosecrans and several ranking leaders in a tumultuous retreat. Only the XIV Corps of General George H. Thomas, deployed in strong defensive positions along Snodgrass Hill, holds its ground against steep odds before retiring in good order. This is one of the bloodiest days of the war, with Union casualties of 16,179 to a Southern tally of 17,804. Bragg's lackluster leadership will cause further rifts in an already fractious chain of command.

September 21

MILITARY: President Abraham Lincoln repeatedly orders General Ambrose E. Burnside at Knoxville, Tennessee, to reinforce General William S. Rosecrans's shattered army at Chattanooga, but he refuses to budge.

September 22

MILITARY: General William S. Rosecrans continues rallying the Army of the Cumberland at Chattanooga, Tennessee, while General Ulysses S. Grant dispatches three divisions of the XV Corps from Vicksburg, Mississippi, to assist him. Meanwhile, the Confederate Army of Tennessee leisurely occupies the high ground around Chattanooga and commences a siege.

September 24

MILITARY: In a masterful display of logistics, Colonel Daniel C. McCallum of the U.S. Military Railroad organizes and transports 20,000 men of XI and XII Corps, along with all their heavy equipment, by rail from Virginia to Chattanooga, Ten-

nessee. Their speedy arrival helps to offset the recent Union disaster at Chickamauga and underscores the North's industrial and technological superiority over the South. Nowhere in the world will troops ride the rails in such numbers until the Franco-Prussian War of 1870.

NAVAL: A total of eight Russian warships gradually arrive and visit New York City. They are seeking refuge in American ports as Great Britain and France threaten war over the Polish insurrection, but the move is widely interpreted throughout the North as a sign of diplomatic support. Another squadron of six vessels eventually anchors at San Francisco, California, and the Russians are warmly received by the political establishment.

September 25

MILITARY: President Abraham Lincoln castigates General Ambrose E. Burnside at Knoxville, Tennessee, for not reinforcing Union forces besieged at Chattanooga. "Having struggled," he writes, "to get you to assist General Rosecrans, and you have repeatedly declared you would do it, and yet you steadily move to the contrary way." Upon further reflection, the letter is not sent.

September 27

MILITARY: President Abraham Lincoln again implores General Ambrose E. Burnside at Knoxville, Tennessee, to forward reinforcements to assist General William S. Rosecrans at Chattanooga. "My order to you meant simply that you should save Rosecrans from being crushed out, believing if he lost his position, you could not hold East Tennessee in any event."

- General Braxton Bragg, determined to starve out the Army of the Cumberland from Chattanooga, Tennessee, orders General Joseph Wheeler's cavalry to raid tenuous Union lines of communication throughout the 60-mile-long Sequatchie Valley.

October 5

NAVAL: The *David*, a torpedo boat with an especially low silhouette and equipped with an exploding spar, steams out of Charleston Harbor, South Carolina, at night, intending to fatally jab *New Ironsides* below the waterline. That vessel is struck and sustains heavy damage, while the *David*, its boilers extinguished by the blast, drifts helplessly alongside its victim for several minutes before escaping. *New Ironsides* survives the encounter but is forced to put in for repairs.

October 6

MILITARY: Confederate guerrillas under William C. Quantrill attack what they think is an isolated Union outpost at Baxter Springs, Kansas. Dressed in captured blue uniforms, they trot over to a column of 100 men and several wagons before shooting. Only General James G. Blunt and a third of his Union command manage to escape; the remainder are captured and murdered in cold blood.

- General Joseph Wheeler ends his spectacular dash through the Sequatchie Valley by recrossing the Tennessee River at Muscle Shoals, Alabama. In a week he has gutted Union supply lines, inflicted 2,000 casualties, captured more than 1,000 wagons, burnt five bridges, torn up miles of track, and ruined millions of dollars in equipment. This spectacular raid nearly throttles the Army of the Cumberland, already languishing on half-rations.

October 9

MILITARY: At Vicksburg, Mississippi, General Ulysses S. Grant boards a train for Louisville, Kentucky, for discussions with Secretary of War Edwin M. Stanton.

NAVAL: With the American ambassador broadly hinting at war if they are not stopped, the government of Great Britain seizes two very large steam rams being constructed for the Confederacy at Birkenhead, on the Irish Sea. These represent the most advanced naval technology available to any nation.

October 10

MILITARY: President Jefferson Davis arrives at Chattanooga, Tennessee, to confer with General Braxton Bragg over military strategy. He is also there to quell seething unrest between Bragg and many senior subordinates.

October 14

MILITARY: General Ambrose P. Hill, tramping through Warrenton, Virginia, perceives the rear guard of General George G. Meade strung out and fording Broad Run at Bristoe Station. He decides to attack at once, unaware that the entire II Corps of General Gouverneur K. Warren lies in wait behind a railroad embankment at right angles to his approach. The Confederate attack, thoroughly enfiladed, collapses after 40 minutes with a loss of 1,361 men. The Federals suffer only 548 casualties.

October 15

NAVAL: The day before it is to be committed to combat, the experimental Confederate submarine *Hunley* disastrously founders a second time in Charleston Harbor, killing all seven crew members including Horace L. Hunley, its inventor. Nonetheless, General Pierre G. T. Beauregard orders the craft recovered and refitted.

October 16

MILITARY: President Abraham Lincoln, acting through the offices of General in Chief Henry W. Halleck, urges General George G. Meade to attack General Robert E. Lee's forces, but Meade continues resisting such prodding. Lee, meanwhile, falls back and assumes strong defensive positions along the Rappahannock River in Virginia.

October 17

MILITARY: General William S. Rosecrans is formally relieved of command of the Army of the Cumberland and succeeded by General George H. Thomas. The new commander calmly reviews the perilous situation of his army at Chattanooga, Tennessee, declaring, "We will hold the town 'till we starve."

October 18

MILITARY: General Ulysses S. Grant confers with Secretary of War Edwin M. Stanton at Louisville, Kentucky. There Stanton informs Grant of his appointment as commander of the Military Division of the Mississippi, encompassing the Army of the Tennessee, the Army of the Cumberland, and the Army of the Ohio.

October 19

MILITARY: As anticipated, Confederate cavalry under General J. E. B. Stuart are attacked by General Hugh J. Kilpatrick's Union troopers at Warrenton, Virginia.

Just as fighting commences, General Fitzhugh Lee's 2nd Virginia Cavalry suddenly strikes the flank and rear of General George A. Custer's brigade while Stuart leads the 1st North Carolina forward at the charge. The Federals rapidly about face and run, with vengeful Confederates pursuing them hotly. This embarrassing affair becomes jocularly known as the "Buckland Races."

October 23

MILITARY: General Ulysses S. Grant arrives at Chattanooga, Tennessee; accompanied by General George H. Thomas, he advances to within gunshot range of Confederate lines below Lookout Mountain for a peek at enemy dispositions. His curiosity satiated, Grant next orders a new supply route established from Bridgeport to the beleaguered garrison, the so-called Cracker Line. Recently disgraced general William S. Rosecrans, replaced by Thomas as commander of the Army of the Cumberland, departs to assume control of the Department of Missouri.

- President Jefferson Davis relieves General Leonidas K. Polk as corps commander of the Army of Tennessee, to end tensions with his superior, General Braxton Bragg. Polk is replaced by General William J. Hardee.

October 26–December 4

NAVAL: Union ironclads begin a sustained, two-week bombardment of Fort Sumter, Charleston Harbor, South Carolina, dumping no fewer than 9,306 shells on that fortification. Fort Sumter, though defiant throughout this latest ordeal, is reduced to rubble.

October 26–28

MILITARY: General Joseph Hooker commences operations to reopen the Tennessee River and thus facilitate the flow of Union supplies to Chattanooga, Tennessee. During the evening hours, Brigadier W. F. Smith manages to throw a pontoon bridge over a nearby river. That done, Hooker posts a force under General John W. Geary, XII Corps, at Wauhatchie Station to guard his line of communications.

October 28

NAVAL: Commander William L. Maury leads the commerce raider *Georgia* back to European waters after an unspectacular cruise to the Cape of Good Hope, Africa. Only nine prizes have been taken owing to the poor sailing characteristics of the ship, which is then sold.

October 29

MILITARY: A predawn Confederate attack unfolds against Union positions at Wauhatchie Station, Tennessee. General Micah Jenkins's division of four brigades hits the Union camp hard in the darkness, but Federal troops under General John W. Geary rally and, by firing at muzzle flashes, resist stoutly. By 3:00 A.M., Jenkins has retreated back to Lookout Mountain; the all-important "Cracker Line" survives intact.

November 3

MILITARY: At Bayou Bourbeau, Louisiana, three Federal divisions of General William B. Franklin's XIX Corps encamp carelessly and beyond mutual supporting distance. General Richard Taylor, though outnumbered two-to-one, masses his Confederates for a sudden attack upon General Stephen G. Burbridge's exposed

division. Burbridge, unable to re-form his crumbling line, falls back three miles to the camp of General George F. McGinnis for support.

November 7

MILITARY: The Army of the Potomac pushes two bridges over the Rappahannock River, Virginia, and runs into stiff fights at Kelly's Ford and Rappahannock Station. General William H. French, commanding the I, II, and III Corps, proceeds across the river at Kelly's Ford en masse, catching the Confederate division of General Robert Rodes by surprise. North Carolina troops guarding the ford are overwhelmed by the sudden attack and largely captured, while Union forces are now firmly established on the south bank of the Rappahannock.

- Five miles upstream, General John Sedgwick moves his V and VI Corps rapidly against Rappahannock Station, defended by the celebrated "Louisiana Tigers" of Colonel Harry T. Hays and a division under General Robert Hoke. Heavy fighting stops at nightfall, and General Robert E. Lee somewhat naturally assumes that the enemy will not attack further that night, so he declines to reinforce the bridgehead. Yet, that same evening—and through a driving downpour—Sedgwick unleashes his 6th Maine in a bayonet charge that completely startles the "Tigers." Confederate defenders are crushed, with 1,600 prisoners taken, forcing Lee to withdraw to Culpeper Court House.

November 11

MILITARY: President Jefferson Davis, ever concerned about the situation before Chattanooga, Tennessee, cautions General Braxton Bragg to "not allow the enemy to get up reinforcements before striking him, if it can be avoided." Defeat here might lead to another thrust into the Confederate heartland.

November 14

MILITARY: General James Longstreet's 15,000 Confederates begin crossing the Tennessee River at Loudoun, Tennessee, en route to Knoxville. Meanwhile, General Ambrose E. Burnside gallops into Loudoun beforehand to personally evacuate the 5,000 Union troops stationed there and shepherd them back to Knoxville. A curious parallel race unfolds as the two forces, almost within gunshot of each other, slog through ankle-deep mud to reach the city first.

November 15

MILITARY: The I Corps of General James Longstreet and a division of Union troops under General Ambrose E. Burnside march on through driving rain and deep mud to be first to reach Knoxville, Tennessee. Throughout their arduous ordeal, the contestants are separated only by one mile and a bend in the Tennessee River. Burnside, anxious to avoid being trapped outside the city, redoubles his efforts to reach Campbell's Station ahead of the enemy. Longstreet, meanwhile, dispatches General Lafayette McLaws's division to capture the crossroads ahead of him.

November 16

MILITARY: The Confederate corps of General James Longstreet and a retiring Union division under General Ambrose E. Burnside depart Lenoir, Tennessee, in the early morning darkness. Burnside, feeling he is losing the race, orders his baggage burned to pick up speed. The Union column fortuitously reaches Campbell's

Station just 15 minutes ahead of the Confederates and deploys to give battle. Longstreet then dispatches the brigade of General Evander M. Law around the Union position to strike it from behind while another division under General Lafayette McLaws hits Burnside's right. Both attacks are repelled in heavy fighting, and Longstreet finally concedes the race.

NAVAL: After the Union tug *Leigh* is run aground in Charleston Harbor, South Carolina, five members of its crew row a tow line to the ironclad *Nahant* while under enemy fire, which pulls them all to safety. All five members are awarded the Medal of Honor.

November 19

MILITARY: As the Union forces of General Ambrose E. Burnside race to fortify the city of Knoxville, Tennessee, he orders a cavalry brigade of 700 men under General William P. Sanders to contest the Confederate advance under General James Longstreet. Sanders does exactly that and contains his antagonists for several hours before being killed, the only Southern-born Union general to fall. Fort Loudoun is subsequently renamed Fort Sanders in his honor.

November 23

MILITARY: General Ulysses S. Grant, prior to assaulting the main Confederate defenses of General Braxton Bragg along Missionary Ridge, Tennessee, orchestrates a clever reconnaissance in force near the enemy's center. He orders General George H. Thomas to parade IV Corps in full view of enemy positions along Orchard Knob and, at precisely 1:30 P.M., Union forces suddenly lurch forward, completely dispersing their astonished opponents. This easy success allows Grant to deploy his troops at the very foot of Lookout Mountain; he employs Orchard Knob as his headquarters for the remainder of the campaign.

November 24

MILITARY: At 8:00 A.M., General Joseph Hooker masses his three divisions—12,000 men—to the foot of Lookout Mountain, Tennessee, and begins scaling the 1,100-foot summit. Confederates under General Carter L. Stevenson, who can scarcely muster 2,693 men to oppose Hooker, resist fiercely but ultimately yield to the Federal juggernaut. By evening Hooker has achieved all his objectives; the following morning, when a clinging fog finally disperses, Union leaders are relieved to behold the Stars and Stripes flying boldly from the summit.

November 25

MILITARY: At Chattanooga, Tennessee, the final struggle between General Ulysses S. Grant, with 64,000 men, and General Braxton Bragg, commanding 46,000, unfolds. At 10:00 A.M., General William T. Sherman takes 16,000 men on a concerted drive against the Confederate right anchored upon Missionary Ridge, but his lack of progress induces Grant to mount diversions elsewhere to prevent Bragg from shifting reinforcement to his right. General Joseph Hooker's command then attacks through Rossville gap from Lookout Mountain on Bragg's left to threaten the Southern rear, but he is delayed by the necessity of building a bridge. Grant finally orders General George H. Thomas to advance and seize Confederate rifle pits fronting their main position along Missionary Ridge. Thomas quickly overruns the defenders and then—without orders—continues

charging up the slope, driving the enemy before him. The Confederate stranglehold on Chattanooga is decisively and dramatically ended through Grant's bold stroke. Union casualties are 5,335, only marginally lighter than the Confederate tally of 6,687.

November 26

MILITARY: Five corps of the Army of the Potomac under General George G. Meade successfully cross the Rapidan River, Virginia, covered by a fog. Meade is now counting on the speed and stealth of his 85,000 men to crush the widely dispersed right wing of the Army of Northern Virginia before it can concentrate to oppose him. However, events quickly go awry as the marching order breaks down, units become entangled, and valuable time is lost. The Southerners react quickly and effectively to the new threat.

November 27

MILITARY: No sooner has the Army of the Potomac successfully crossed the Rapidan River than General William H. French's III Corps takes the wrong road and spends several hours countermarching about. The delay allows the Army of Northern Virginia to deploy the division of General Edward Johnson at Payne's Farm, Virginia, and heavy fighting erupts. Elements of General Ambrose P. Hill's III Corps and General Jubal A. Early's II Corps also arrive, at which point Meade suspends the action. Confederate losses are 545 while the Union tally is not recorded.

- General Patrick R. Cleburne, mustering only 4,157 men, confronts a Union force twice his size under General Joseph Hooker at Ringgold Gap, Georgia. The attacking Federals are blasted back with heavy loss, while a heavy column is dispatched to ascend the mountain on Cleburne's flank. These stumble headlong into a clever ambush and are sent scampering back down the slope. Cleburne is finally ordered by General William J. Hardee to withdraw, but his stiffly fought rearguard action buys the Southerners four precious hours while inflicting 507 Union casualties. Cleburne sustains 20 dead, 190 wounded, and 11 missing.

November 29

MILITARY: At 6:00 A.M., the Confederates launch a desperate attack against Fort Sanders at Knoxville, Tennessee, despite frightfully cold weather. Three brigades of infantry go forward as ordered but, lacking ladders, prove unable to surmount the deep, ice-filled ditch surrounding the works. General James Longstreet loses 129 killed, 458 wounded, and 226 missing, while the defenders sustain five killed and eight wounded.

November 30

MILITARY: President Jefferson Davis grants General Braxton Bragg's request that he be relieved of command of the Army of Tennessee at Dalton, Georgia; he is temporarily succeeded by General William J. Hardee.

December 1

MILITARY: Notorious Southern spy Belle Boyd, suffering from typhoid fever, is again released from a Federal prison in Washington, D.C., and warned to steer clear of Union territory.

December 3

MILITARY: General James Longstreet's I Corps abandons its siege of Knoxville, Tennessee, and enters into winter quarters at nearby Greenville. From this position he is at liberty to remain in the theater or march to rejoin General Robert E. Lee's main force in Virginia.

December 5

MILITARY: The XIV Corps under Major General William T. Sherman finally reaches the city of Knoxville, Tennessee, ending any further Confederate attempts at capture.

December 6

NAVAL: The ironclad *Weehawken*, Admiral John A. B. Dahlgren's flagship, accidentally sinks in Charleston Harbor, South Carolina, with a loss of 24 sailors.

December 7

NAVAL: In his third annual report, Secretary of the Navy Gideon Welles declares that the Union's naval blockade is covering 3,549 miles of Southern coastline and the strength of the U.S. Navy is up to 588 vessels, 4,443 guns, and 34,000 personnel.

- Confederate sympathizer John C. Braine and 15 associates seize the steamer *Chesapeake* during its regular run between Portland, Maine, and New York City. Several U.S. Navy gunboats begin looking for the vessel.

December 10

NAVAL: Union vessels attack and destroy a Confederate salt works at St. Andrew's Bay, Florida, along with most of the town.

December 14

MILITARY: General James Longstreet attacks Bean's Station, Tennessee, at 2:00 A.M., startling but not dislodging Union cavalry under General James M. Shackelford. At length Shackelford conducts an orderly withdrawal through Bean's Gap to Blain's Cross Roads and entrenches behind a rail breastwork. Fighting in this harsh winter weather inflicts roughly 200 casualties on either side.

December 16

MILITARY: President Jefferson Davis, forgiving past difficulties, appoints General Joseph E. Johnston to succeed General William J. Hardee as commander of the Army of Tennessee. General Leonidas K. Polk is promoted to head of the Army of Mississippi.

December 17

NAVAL: U.S. Navy gunboats *Annie* and *Ella* under Acting Lieutenant Frederick Nichols recover the Union steamer *Chesapeake* near Halifax, Nova Scotia; John C. Braine and 15 Confederate sympathizers escape overland.

December 18

POLITICS: President Abraham Lincoln, displeased with General John M. Schofield's handling of civilian affairs in Missouri, suggests to Secretary of War Edwin M. Stanton that he be simultaneously relieved and promoted to major general, thereby avoiding any ruffled feathers.

December 23

TECHNOLOGY: A patent is issued for the single-shot Remington carbine; this utilizes a rolling breech-block design that can fire the same ammunition as more expensive Spencer carbines; 15,000 will be acquired during the war years and give Union cavalry a tremendous boost in unit firepower.

December 27

MILITARY: General Joseph E. Johnston arrives at Dalton, Georgia, to take charge of the Confederate Department of Tennessee and its attendant and much battered army.

1864

January 1

MARINES: A force of sailors and marines disembarks at Murrell's Inlet, South Carolina, and burns a Confederate schooner before returning safely.

January 2

MILITARY: Irish-born general Patrick L. Cleburne petitions for the arming of African Americans for use in the Confederate army to address endemic manpower shortages. Not only does President Jefferson Davis ignore the recommendation, he also deliberately denies Cleburne his well-deserved promotion to lieutenant general because of it.

January 4

MILITARY: President Jefferson Davis instructs General Robert E. Lee to begin requisitioning food from civilians to feed his troops as it becomes necessary.

January 5

INDIAN: Colonel Christopher "Kit" Carson begins his protracted winter campaign against hostile Navajo in the Canyon de Chelly region of the New Mexico Territory. General James H. Carleton, commanding the department, anxiously wires government officials that his numerous prisoners are suffering from want of winter clothing and requests stocks drawn from the Indian Department.

January 12

INDIAN: Kit Carson, commanding a detachment of 389 soldiers, engages hostile Navajo warriors in the Canyon de Chelly, New Mexico Territory, killing 11.

January 15

INDIAN: The majority of Navajo, half-starved and badly outgunned, begin surrendering to Kit Carson's force in the Canyon de Chelly, New Mexico Territory.

January 18

NAVAL: The defenses of Mobile, Alabama, a significant Confederate port, are closely inspected by Rear Admiral David G. Farragut, who is planning a major offensive against them.

January 28

MILITARY: General Jubal A. Early directs Generals Edward L. Thomas and Thomas L. Rosser on a combined infantry/cavalry raid from New Market, Virginia, toward Union positions in the Allegheny Mountains. Their goal is to secure forage for the horses and cattle to feed the men.

February 1

MILITARY: The House of Representatives resurrects the rank of lieutenant general, U.S. Army, with Ulysses S. Grant in mind.

- General George E. Pickett attacks Union forces under General Innis N. Palmer at Batchelder's Creek, North Carolina, inflicting 326 casualties and forcing the Northerners back into New Bern. However, two Confederate columns under General Seth M. Baton and Colonel James Dearing perceive Federal defenses at Fort Anderson as too formidable, and their attack is canceled. President Abraham Lincoln authorizes a draft of 500,000 men to serve three years or for the duration of the conflict.

February 2

NAVAL: A Confederate cutting-out expedition under Lieutenant John T. Wood captures the steamer *Underwriter* in the Neuse River, North Carolina, then burns it while under fire from land batteries. The Confederate Congress gives him a vote of thanks for the deed.

February 9

MILITARY: In Richmond, Virginia, a band of Union prisoners led by Colonel Thomas E. Rose burrows out of notorious Libby Prison and makes a dash for freedom. This is the largest prison break of the Civil War; only 59 escapees make it to Union lines while 48 are recaptured, including Rose.

February 12

MILITARY: President Abraham Lincoln entertains General Hugh K. Kilpatrick at the White House, whereupon the latter discusses plans for a possible raid against Richmond, Virginia, to free Union prisoners kept under squalid conditions. The president listens intently to the blustering trooper and eventually grants his approval.

NAVAL: Lieutenant Charles M. Morris leads the commerce raider *Florida* out of Brest, France, eludes the blockading screw sloop *Kearsarge*, and will take an additional 15 prizes over the next eight months.

February 14

MILITARY: Meridian, Mississippi, falls without resistance to Union forces of General William T. Sherman, who has covered 150 miles in 11 days. The corps of General Leonidas K. Polk, badly outnumbered, gives ground before it. Sherman then begins systematically destroying all buildings, supplies, and railroads in the earliest application of what becomes known as "total war." Ultimately, 155 miles of track, 61 bridges, and 20 locomotives are laid waste.

February 16

NAVAL: Rear Admiral David G. Farragut begins his campaign against Mobile, Alabama, with a preliminary bombardment of Fort Powell.

February 17

POLITICS: The Confederate Congress expands the draft to include all white males between the ages of 17 and 50. Another act authorizes the employment of African Americans as army laborers.

NAVAL: The Confederate submarine *Hunley* under Lieutenant George E. Dixon sinks the 1,934-man Union screw sloop *Housatonic* under Captain Charles W. Pickering in Charleston Harbor, South Carolina. *Hunley* apparently survives the explosion long enough to signal to shore that it is returning, then inexplicably sinks, killing all hands. *Housatonic* enjoys the melancholy distinction of being the first warship in history lost to a submarine attack.

February 20

MILITARY: The Battle of Olustee, Florida, transpires between Generals Thomas Seymour and Joseph Finnegan, with both sides numbering roughly 5,000 men apiece. The Northerners advance upon Finnegan's force, strongly dug in behind entrenchments, but Seymour orders a charge. The attackers are beaten back with loss, and Seymour uses his remaining brigade under Colonel James Montgomery to cover his retreat. He loses 1,861 men—a staggering loss rate of 34 percent—while Finnegan sustains 946, or 20 percent. Consequently, Florida is secured by the Confederacy for the remainder of the war.

NAVAL: Admiral John A. B. Dahlgren, greatly alarmed by the loss of the *Housatonic* to a Confederate submarine attack, suggests to Navy Secretary Gideon Welles that the government offer a \$20,000 to \$30,000 reward for the capture or destruction of any such craft. "They are worth more to us than that," he concludes.

February 22

MILITARY: Confederate cavalry under General Nathan B. Forrest attack and defeat a larger Union rear guard under General William Sooy Smith near Okolona, Mississippi. However, resistance stiffens as the Southerners engage the main Union body, and several of Forrest's charges are bloodily repelled. Two Union counter-charges fail, with the loss of six cannon, and Smith ultimately retreats in the direction of Pontotoc. Union losses are 319 killed, wounded, and missing; Forrest loses far fewer.

February 25

MILITARY: General John M. Palmer and his XVI Corps continue probing Confederate positions at Buzzard Roost Gap, Georgia, but encounter heavy resistance. After a flanking move by General Jefferson C. Davis along the western side of the imposing ridge, Palmer calls off the attempt and withdraws for the evening. Union losses are 289 casualties to 140 Confederates, but afterward General George H. Thomas divines the strategy of sending Union troops through Snake Gap Creek, 15 miles behind Confederate lines, to outflank the defenders.

February 26

MILITARY: President Abraham Lincoln reaffirms his faith in General Benjamin F. Butler and also commutes all death sentences for desertion to imprisonment for the duration of the war.

February 27

MILITARY: Andersonville Prison, near Americus, Georgia, a 16½-acre log stockade, receives its first Union captives. Crowded and squalid at the outset, it gains infamy as the worst prison site in the Confederacy.

February 28

MILITARY: Brigadier General H. Judson Kilpatrick and 3,500 Union troopers march to free prisoners held in the Richmond, Virginia, area. A second, smaller column is headed by Colonel Ulric Dahlgren, son of the noted admiral.

February 29

MILITARY: The U.S. Congress formally revives the rank of lieutenant general at the behest of President Abraham Lincoln.

NAVAL: Lieutenant William B. Cushing leads two boats ashore at Smithville, North Carolina, intending to capture General Louis Hebert in his tent; unfortunately the general is absent and all that the raiders snare is a Confederate army captain.

March 1

MILITARY: A Union cavalry column under General Hugh J. Kilpatrick, meets resistance as it approaches the Confederate capital of Richmond, Virginia; General Kilpatrick suddenly cancels his raid, veers away, and recrosses the Chickahominy Creek. Colonel Ulric Dahlgren, meanwhile, finding the James River swollen and impassable, decides to shift his attack from the east but then suspends the attack and begins circling back to rejoin Kilpatrick.

- President Abraham Lincoln nominates General Ulysses S. Grant for the rank of lieutenant general.

March 2

MILITARY: The Senate confers upon Ulysses S. Grant the rank of lieutenant general; the last individual to hold such lofty rank was George Washington during the Quasi-War with France.

March 5

NAVAL: Confederate raiders under Commander John T. Wood seize a Union telegraph office at Cherrystone Point, Virginia, along with the unsuspecting steamers *Aeolus* and *Titan*. Wood destroys the vessels, evades Union pursuers, and makes his escape.

March 6

NAVAL: In the North Edisto River near Charleston, South Carolina, the screw steamer *Memphis* is attacked by a Confederate torpedo boat, yet survives when the boat's explosive charge fails to detonate; the attackers escape in the darkness.

March 8

MILITARY: General Ulysses S. Grant formally accepts his commission as lieutenant general in a ceremony at the White House, then meets and confers with President Abraham Lincoln for the first time.

NAVAL: In a major accident, the gunboat *Conestoga* is pierced by the ram *General Sterling Price* and sinks with the loss of two sailors drowned.

March 9

MILITARY: General Ulysses S. Grant succeeds General Henry W. Halleck as general in chief, with the latter being demoted to chief of staff. Furthermore, to maintain good relations with commanders of the Army of the Potomac, Grant retains General George G. Meade as the leader of that force.

March 11

MILITARY: Congress passes legislation founding the Army Ambulance Corps as part of the Medical Department and as a regular military unit.

March 12

MILITARY: Sweeping leadership changes are finalized in the Union army with the issuance of General Order No. 98; henceforth, General Ulysses S. Grant is in overall command of military operations, General Henry W. Halleck serves as chief of staff, General William T. Sherman leads the Military Division of the Mississippi, and General James B. McPherson heads both the army and the Department of the Tennessee.

NAVAL: Admiral David D. Porter leads an armada of 13 ironclads, four tinclads, and four wooden gunboats up the Red River, Louisiana, in concert with the Shreveport Expedition of General Nathaniel P. Banks. Meanwhile, army transports convey the 3rd Division, XVI Corps, of General Andrew J. Smith upstream as an advanced force.

March 16

NAVAL: Landing parties from the ironclad *Osage* under Commodore Thomas O. Selfridge capture the town of Alexandria, Louisiana, and hold it until Union troops can provide a garrison. The bulk of Rear Admiral David D. Porter's squadron arrives later that day.

March 18

MILITARY: General William T. Sherman formally succeeds Ulysses S. Grant as commander of the Military Division of the Mississippi.

March 23

MILITARY: In Virginia, the Army of the Potomac is reorganized by General George G. Meade, who reduces it from five corps to three.

- General Frederick Steele, ordered into the field by the War Department and beset by chronic supply shortages, reluctantly leads 10,400 Union troops out of Little Rock, Arkansas. His mission is to proceed east and link up with the Red River Expedition of General Nathaniel P. Banks. Steele has objected to this campaigning as the roads, such as they are, remain poor while his flanks are vulnerable to attack by hard-riding Confederate cavalry.

March 24

MILITARY: General Nathaniel P. Banks finally arrives at Alexandria, Louisiana—a week behind schedule—and leads the Union drive up the Red River toward Shreveport. He receives additional bad news in the form of declining water levels on the river itself, which jeopardizes continuing naval support from Admiral David D. Porter's gunboats. Undeterred, Banks elects to proceed.

March 25

MILITARY: General Nathan B. Forrest attacks and captures the town of Paducah, Kentucky, with his force of 2,800 troopers. Colonel Stephen G. Hicks, the garrison commander, refuses to surrender and withdraws his 665 men into the safety of nearby Fort Anderson, where he repels a Confederate attack. Forrest then withdraws with 50 captives and 400 horses, some of which are confiscated from civilians.

NAVAL: The gunboats *Paw Paw* and *Peosta* lend effective supporting fire that helps repel a Confederate attack against Paducah, Kentucky.

March 27

MILITARY: Union prisoners begin filing into Camp Sumter at Andersonville, Georgia. Once filled to capacity, it becomes the most squalid and infamous prison camp in the South.

April 1

MILITARY: General Frederick Steele, having waited in vain for cavalry reinforcements under General John M. Thayer, departs Arkadelphia, Arkansas, and begins a march for the Red River, Louisiana. All men and animals under his command are already on half-rations while his progress is dogged by Confederate cavalry under Generals Joseph O. Shelby and John S. Marmaduke.

NAVAL: The transport *Maple Leaf* strikes a Confederate mine in the St. John's River, Florida, and sinks.

April 3

NAVAL: Three transport steamers, escorted by nine gunboats of Rear Admiral David D. Porter's squadron, convey the corps of General Andrew J. Smith up the Red River from Alexandria to Grand Ecore, Louisiana, where they are to disembark.

April 6

MILITARY: The Union army of General Nathaniel P. Banks wends its way along the banks of the Red River and along a narrow trail toward Shreveport, Louisiana. The route is poorly chosen for, as Banks's army approaches Shreveport, it is strung out for miles, in single file, in a bayou wilderness where it is susceptible to attack by General Richard Taylor.

April 8

MILITARY: The Union army of 18,000 men under General Nathaniel P. Banks moves along in single file toward Mansfield, Louisiana, when it is suddenly attacked by 8,000 Confederates led by General Richard Taylor at Sabine Crossroads. Taylor has observed how attenuated the Union forces are and orders his command forward. The rebels crash through two Federal lines, overrunning Banks's artillery and wagon train, which they stop to plunder. Further advances are stopped cold by an effective rearguard action mounted by Brigadier General Robert A. Cameron, and fighting stops at sunset. Banks, soundly thrashed, retreats with a loss of 2,235 men. Taylor, in comparison, captures 20 cannon, 200 wagons, and 1,000 draft animals for fewer than 1,000 casualties.

April 9

MILITARY: Union strategy for an all-out push against the Confederacy is finalized by General Ulysses S. Grant into five major components: General Nathaniel P. Banks is to capture Mobile, Alabama; General William T. Sherman will drive deep into Georgia from Tennessee and seize Atlanta; General Franz Sigel is to advance down into the Shenandoah Valley, breadbasket of the Confederacy; and General Benjamin F. Butler will descend upon Richmond, Virginia, from the south bank of the James River. Most importantly, General George G. Meade's Army of the Potomac is to seek out and rivet its attention upon General Robert E. Lee and his Army of Northern Virginia.

- General Nathaniel P. Banks consolidates 15,000 men of his shaken army, soon reinforced by two veteran divisions from General Andrew J. Smith's XVI Corps, along Pleasant Hill, Louisiana. General Richard Taylor advances upon the Federals at 9:00 A.M. with 12,000 men and attacks. The rebels are soundly repulsed in stiff fighting, and Taylor gradually withdraws, which rescues Banks from his previous defeat at Mansfield. Union losses are 1,506 to a Confederate tally of 1,621. Banks nonetheless orders his army to continue retreating to Grand Ecore, spelling an end to the vaunted Red River Campaign.

NAVAL: The steam frigate *Minnesota* under Lieutenant Commander John H. Upshur is attacked and damaged off Newport News, Virginia, by the Confederate torpedo boat *Squib*, which escapes under heavy fire.

April 10

MILITARY: Union forces under General Frederick Steele encounter stiff Confederate resistance from General Sterling Price at Prairie D'Ane, Arkansas, and a running battle will ensue over the next four days. However, with the Red River campaign of General Nathaniel P. Banks now ignominiously defeated, Steele suddenly finds himself marooned deep behind enemy lines, with few supplies and no prospect of reinforcements.

NAVAL: The squadron of Rear Admiral David D. Porter, having steamed to within 30 miles of its objective at Shreveport, Louisiana, finds that the Confederates have blocked the Red River by sinking a large steamer in his path. Unable to proceed farther and faced with declining water levels, Porter decides to fall back downstream.

April 12

MILITARY: General Nathan B. Forrest leads 1,500 Confederate cavalry in an attack upon Fort Pillow, Tennessee, on the Mississippi River, then guarded by 557 Union soldiers, including 262 African Americans, under the command of Major Lionel F. Booth. The Confederates succeed after a bloody fight, at which point many of the black soldiers are murdered in cold blood. Confederate losses are 14 dead and 86 wounded, a pittance compared to the Federal tally of 231 killed, 100 wounded, and 226 captured—only 58 blacks are taken alive.

NAVAL: As naval forces under Admiral David D. Porter steam up the Red River toward Shreveport, Louisiana, they are shelled by Confederate batteries at Blair's Landing. The gunboat *Lexington* silences the enemy cannon, killing Brigadier General Thomas Green, but Confederate cavalry resist with rifle fire for an hour before retreating.

April 15

NAVAL: In the Red River of Louisiana, the gunboat *Eastport* under Commander S. Ledyard Phelps strikes a Confederate mine and is heavily damaged. The vessel is deliberately grounded eight times in order to make repairs but is ultimately scuttled.

April 16

NAVAL: On the St. Johns River, Florida, the army transport *General Hunter* strikes a Confederate mine and sinks.

April 17

MILITARY: General Ulysses S. Grant suspends all prisoner exchanges until the Confederates release identical numbers of Union captives—an impossible demand,

given their restricted manpower. Confederate authorities strongly disagree with his dictates, and the practice of prisoner exchanges halts altogether, depriving the South of an important source of trained military manpower.

April 18

MILITARY: Confederate cavalry under General John S. Marmaduke detects a party of 1,170 Union soldiers near Poison Springs, Arkansas, and advances to give battle with 3,335 troopers. Southern numbers gradually assert themselves, and the Federals suddenly break in panic and flee to the rear. Poison Springs is a significant Union defeat, for it requires General Frederick Steele's army, at Camden, to remain on the defensive and languish on half-rations.

April 19

NAVAL: The huge Confederate steam ram *Albemarle* under Commander James W. Cooke attacks the Federal blockading squadron off Plymouth, North Carolina, sinking the *Southfield* and killing Commander C. W. Flusser. The surviving Union vessels then draw off, leaving the nearby army garrison unsupported.

April 20

MILITARY: The Union government reduces rations accorded to Southern prisoners of war in retaliation for mistreatment of Union captives.

- General Robert F. Hoke attacks and captures 2,800 Union soldiers and a large quantity of supplies at Plymouth, North Carolina, after a three-day siege. Key to his success was the sudden appearance of the steam ram *Ablemarle*, which bombarded the defenders from offshore. Confederate losses are 163 killed and 554 wounded.

April 21

NAVAL: As Union forces attack Confederate positions at Yazoo City, Mississippi, the Union gunboat *Petrel* is severely damaged by artillery fire and is ultimately captured on the Yazoo River.

April 25

MILITARY: A force of 4,000 Confederate cavalry under General William L. Cabell surprises a Union wagon train at Mark's Mills, Arkansas, catching the armed guard of Colonel Francis M. Drake in a pincer. Cabell seizes 240 wagons and 1,700 prisoners, as only 300 Federals escape back to their main force at Camden. Moreover, the enraged Southerners murder 150 African-American slaves who had attached themselves to the column.

- Outnumbered and nearly surrounded by Confederates under Generals Edmund Kirby Smith and Sterling Price, General Frederick Steele abandons Camden, Arkansas, and retrogrades to Little Rock. He begins methodically evacuating that night and cleverly slips past Confederate outposts without detection.

April 26–27

NAVAL: Union naval forces under Admiral David D. Porter struggle against intense Confederate opposition along the banks of the Red River, Louisiana, but finally reach Alexandria. Two gunboats are disabled and one is captured while Porter's flagship, the *Cricket*, is struck repeatedly

April 28

NAVAL: Admiral David D. Porter's flotilla remains trapped on the Red River by receding water levels. The admiral himself is resigned to the necessity of scuttling

Grant, Ulysses S. (1822–1885)

Army general

Hiram Ulysses Grant was born in Point Pleasant, Ohio, on April 22, 1822, and he gained admission to the U.S. Military Academy in 1839. There his name was mistakenly registered as Ulysses S. Grant and he adopted it. A mediocre student, Grant graduated midway in his class four years later and subsequently saw hard service in the Mexican War under General Winfield Scott. Grant won a brevet promotion to captain for bravery at Molino del Rey, but he viewed the war as an act of aggression and grew increasingly disenchanted with military life. He resigned his commission in 1854, then failed in several business ventures. Grant was living in near poverty when the Civil War broke out, and he secured an appointment as colonel of an Illinois regiment in June 1861. Promotion to brigadier general soon followed, and in February 1862 he gained national renown by securing the capture of Fort Donelson, Tennessee, along with 14,000 prisoners. He also gained the nickname “Unconditional

Surrender” Grant for his refusal to negotiate with Southern commanders. Grant followed up this victory with a landing at Shiloh, on the Tennessee River, where, on April 6, 1862, he was surprised in camp and nearly defeated in a battle that produced heavy casualties. Rumors of heavy drinking resulted in subordination to General Henry W. Halleck, a grossly inept field commander, and it was not until the spring of 1863 that Grant could focus again upon his main objective: the Confederate bastion of Vicksburg, Mississippi. This post he cut off and surrounded following a brilliant series of maneuvers; on July 4, 1863, he accepted the city’s unconditional surrender. Effective campaigning that fall also broke the Confederate siege of Chattanooga, Tennessee.

President Abraham Lincoln prized Grant’s aggressive, no-compromise approach to war and arranged his promotion to lieutenant general and supreme command of Union forces in the spring of 1864. His biggest chal-

his entire squadron to prevent its capture, and he advises Secretary of the Navy Gideon Welles that “you may judge my feelings at having to perform so painful a duty.”

April 29

MILITARY: The Battle of Jenkins’ Ferry, Arkansas, unfolds as Confederate cavalry under General John S. Marmaduke attack a Union rear guard under General Samuel Rice. Meanwhile, General Frederick Steele successfully passes the bulk of his army over the Sabine River and extricates his command. Men of the 2nd Colored Infantry subsequently murder several Southern prisoners in retaliation for atrocities inflicted earlier against them, at Poison Springs, Arkansas.

NAVAL: To assist the gunboat squadron of Admiral David D. Porter, engineer colonel Joseph Bailey begins constructing a dam of logs across the Red River. “Two or three regiments of Maine men were set to work felling trees,” Porter notes. “Everyman seemed to be working with a vigor seldom equaled.”

lenge was confronting the Army of Northern Virginia under General Robert E. Lee, which defeated Grant in several pitched battles that spring. However, rather than retreat, Grant simply sidestepped around Lee and inched toward Richmond, Virginia, forcing Lee to follow. For nearly a year Grant kept Lee pinned within his works at Richmond while illness, malnourishment, and attrition whittled away Confederate strength. The end came in April 1865 when Union forces finally smashed through Lee's defenses and his army was cornered at Appomattox, where it surrendered on April 9, 1865. Victory here ended the Civil War and Grant, whose hard-hitting, relentless approach to war finally crushed the rebellion, was hailed as America's savior. In 1868 and 1872, he parlayed his tremendous popularity into two successful terms as president, although his tenure would be marked by political corruption. He subsequently failed at numerous business ventures before dying at Mount McGregor, New York, on July 23, 1885. Grant was a highly successful general who, next to Lincoln, is most responsible for preserving the Union.

Union general Ulysses S. Grant (*Library of Congress*)

April 30

NAVAL: Confederate secretary of the navy Stephen Mallory affirms the weakness of Southern naval forces by admitting to only 13 ships and one floating battery for service in the east.

May 2

MILITARY: General Franz Sigel leads 6,500 Union troops out of Winchester, Virginia, and down the Shenandoah Valley Pike toward New Market. His goal is to deny the Confederacy any food or cattle grown in this highly productive region.

May 4

MILITARY: Generals Ulysses S. Grant and George G. Meade direct the Army of the Potomac across the Rapidan River, Virginia, toward the heavily forested area known as the Wilderness. They lead a veteran force of 122,000 men, divided into four commands: General Winfield S. Hancock's II Corps, the V Corps under

General Gouverneur K. Warren, General John Sedgwick's VI Corps, and General Ambrose E. Burnside's IX Corps.

- General William T. Sherman advances his force of 110,000 men from Chattanooga, Tennessee, and against Confederate forces under General Joseph E. Johnston. The Union goal is Atlanta, Georgia, an important communications hub.

NAVAL: The steamers *Sunflower* and *Honduras* capably assist an amphibious attack upon Tampa, Florida.

May 5

MILITARY: The Battle of the Wilderness erupts once General Gouverneur K. Warren's V Corps encounters General Richard S. Ewell's Confederate II Corps along the Orange Turnpike Road. Warren is well situated to sweep the Southerners before him, but insurmountable delays grant Ewell time to rush up reinforcements. Two miles south, General Winfield S. Hancock's II Corps engages General Ambrose P. Hill's Confederate III Corps in fierce fighting. An all-out Confederate advance surges ahead initially, but Hill is halted by General George W. Getty's division, from VI Corps, which stands long enough for Hancock to bring up sufficient numbers.

NAVAL: The Confederate ironclad ram *Albemarle* under Commander James W. Cooke, escorted by the smaller *Bombshell* and *Cotton Planter*, steams into Albemarle Sound off Plymouth, North Carolina, to engage the Federal squadron anchored there. However, Captain Melancton Smith keeps the Southerners under a steady bombardment; with *Albemarle* damaged and maneuvering badly, Cooke orders his vessel back up the Roanoke River for repairs.

- On the Red River in Louisiana, the wooden steamers *Covington*, *Signal*, and *Warner* are captured by Confederate forces at Dunn's Bayou.

May 6

MILITARY: The Battle of the Wilderness continues as General Winfield S. Hancock's II Corps, advancing down the Orange Plank Road, smashes into General Ambrose P. Hill's Confederate III Corps, nearly breaking it. Suddenly, General James Longstreet makes a belated appearance with the veteran I Corps and strikes Hancock's left and rear. Longstreet is seriously wounded by friendly fire while General Micah Jenkins, riding alongside him, is killed. The assault sputters, delays ensue, and when the Confederates finally sort themselves out and advance, they encounter entrenched Federal troops backed by artillery and are repulsed. Two miles away, General John Sedgwick's VI Corps renews its struggle against General Richard S. Ewell's Confederate II Corps along the Orange Turnpike. A fresh Confederate division under General John B. Gordon manages to work its way around the Union right and charges, severely disrupting their entire line. The onset of nightfall dampens further fighting, and both sides settle in behind entrenchments. But the dry vegetation and undergrowth have been set ablaze by the fighting, and hundred of wounded soldiers, unable to crawl to safety, perish in the flames. The Wilderness is a dazzling tactical upset for General Robert E. Lee, who tackles an opponent twice his size in an area where he is least expected—and handles him roughly. Grant, who endures the ignominy of having both flanks turned, suffers frightful losses of 17,666; Confederate casualties, though not recorded, are probably in the vicinity of

8,000. Grant, however, is undeterred and maintains the strategic initiative by sidestepping around Lee's left flank, inching ever closer to Richmond, Virginia, and forcing the indomitable Southerners to follow.

NAVAL: On the James River, Virginia, the side-wheel steamer *Commodore Jones* strikes a 2,000-pound mine and is completely destroyed along with 40 of her crew. The Confederates responsible for electrically detonating the device are subsequently captured by sailors and marines who force them to reveal the location of other such devices.

- Confederate flag officer William F. Lynch leads the ironclad ram *Raleigh* on a sortie down the Cape Fear River, North Carolina, and engages the Union blockaders *Britannia* and *Nansemond*. This action allows a Southern privateer to slip out, but *Raleigh* will ground returning up the river and be destroyed to prevent capture.
- Out west, Confederate forces battling Rear Admiral David D. Porter's squadron capture the side-wheel steamers *Granite City* and *Wave* at the Calcasieu Pass, Louisiana.

May 7

MILITARY: The struggle for the Wilderness concludes once General Ulysses S. Grant sets a strategic precedent by ignoring his losses and slipping around the Confederate flank. He then marches 12 miles southeast to Spotsylvania Court House. General Philip H. Sheridan has only the division of General Wesley Merritt available to him, and this is sent trotting down the road to Spotsylvania. En route, General George A. Custer's brigade runs headlong into General Fitzhugh Lee's dismounted Confederates at Todd's Tavern, and skirmishes furiously. Additional cavalry units are fed into the fray, but the Southerners manage to keep their line intact and Spotsylvania remains in their hands. Union losses are around 250, the Confederates sustain possibly half as many.

- The Atlanta campaign begins. General William T. Sherman, commanding the armies of the Cumberland (General George H. Thomas), the Ohio (General John M. Schofield), and the Tennessee (General James B. McPherson), roughly 112,000 men, advances upon Dalton, Georgia. There he confronts the Army of Tennessee under General Joseph E. Johnston, leading 62,000 Confederates. These are organized into two corps under Generals John B. Hood and William J. Hardee, while a third corps under General Leonidas K. Polk is en route from Mississippi. Southern mounted troops are entrusted to the highly capable general Joseph Wheeler.

NAVAL: On the James River, Virginia, Confederate forces surprise and capture the Union side-wheel steamer *Shawsheen* under Acting Ensign Charles Ringot.

May 8

MILITARY: Thousands of soldiers from both sides file into positions along a three-mile front at Spotsylvania Court House, Virginia. General Gouverneur K. Warren's V Corps and General John Sedgwick's VI Corps then charge the Southerners headlong in their fieldworks and are heavily repulsed. That night, General Robert E. Lee instructs his men to continue felling trees and digging trenches to strengthen the entire line.

May 9

MILITARY: General George Crook, riding at the head of 6,155 Union troops, advances into southwestern Virginia to destroy a portion of the Virginia & Tennessee Railroad. En route, he encounters 2,400 Confederates and 10 cannon under General Albert G. Jenkins at Cloyd's Mountain. A bloody impasse ensues for several hours until a Union column suddenly appears on the Southern left and rolls up their line. Colonel Rutherford B. Hayes, commanding a brigade of Ohio troops, greatly distinguishes himself in combat. Crook then burns the New River Bridge, thereby obtaining his objective.

May 10

MILITARY: Determined to test Confederate defenses, General Ulysses S. Grant begins organizing large-scale assaults near Spotsylvania, Virginia. He believes that General Robert E. Lee has weakened his center by reinforcing both flanks and singles out the "Mule Shoe" in consequence. Colonel Emory Upton, who arrays his 12 regiments in a densely packed assault column, charges forward and penetrates the Mule Shoe's left flank, overturning General Robert E. Rodes's division and taking 1,000 prisoners. The lodgement, however, is not properly supported and ultimately fails, but Grant remains highly impressed by Upton's innovation; he vows to try the same experiment with an entire corps on the morrow.

- Three brigades of Confederate troopers under General J. E. B. Stuart arrive at Beaver Dam Station, Virginia, hotly trailing General Philip H. Sheridan's cavalry column. Though outnumbered, Stuart dispatches a brigade under General James B. Gordon to harass the Union rear while deploying Generals William C. Wickham and Lunsford L. Lomax into blocking positions at the junction of Yellow Tavern, only six miles north of Richmond.

- Union general James B. McPherson declines to push ahead through Snake Gap Creek, Georgia, and commences fortifying his position. Unknown at the time, he is opposed by only a single cavalry brigade under General James Canty. McPherson digs in and awaits developments. General Joseph E. Johnston's line of retreat thus remains intact; when apprised of the danger, he immediately shifts his forces to safer ground.

NAVAL: The army transport *Harriet A. Ward* strikes a Confederate mine on the St. Johns River, Florida, and sinks.

- Back on the Red River, the dam constructed by Colonel Joseph Bailey is deliberately breached, and the ironclads *Mound City*, *Pittsburgh*, and *Carondelet* successfully shoot the rapids. Admiral David D. Porter is delighted and informs Secretary of the Navy Gideon Welles that "The passage of these vessels was a beautiful sight, only to be realized when seen."

May 11

MILITARY: Ignoring heavy losses, General Ulysses S. Grant renews the struggle at Spotsylvania Court House by attacking the Confederate center again. This time he instructs the entire II Corps of General Winfield S. Hancock to be drawn up into dense attack columns and to spearhead the assault. Meanwhile, General Robert E. Lee carefully monitors Union movements and concludes that Grant is preparing to slip around his left flank again. He inadvertently orders all artillery removed from the Mule Shoe, rendering it more vulnerable to attack.

- At 11:00 A.M., a tremendous cavalry fight erupts as 4,500 Confederates under General J. E. B. Stuart are attacked by twice their number under General Philip H. Sheridan at Yellow Tavern, only six miles north of Richmond, Virginia. The attackers are repelled, but Stuart is mortally wounded in the stomach, and Sheridan is forced to withdraw eastward down the Chickahominy River. Union losses are 704 men while the Southerners sustain over 300—including the irreplaceable Stuart, who dies the following day.

May 12

MILITARY: The struggle at Spotsylvania Court House, Virginia, continues as General Ulysses S. Grant launches a bruising frontal assault against the center of General Robert E. Lee's line. General Winfield S. Hancock's II Corps, arrayed in dense columns, slams irresistibly into the Mule Shoe and overwhelms General Edward Johnson's "Stonewall Brigade," capturing him, 3,000 prisoners, and 20 cannon. A vicious, point-blank musketry duel breaks out, then degenerates into hand-to-hand fighting, with bayonets rasping and rocks being thrown. The melee occasions such terrible carnage that the area is christened the "Bloody Angle" by survivors. At length, Grant is forced to call off the attack, which affords stark testimony to the power of Confederate fieldworks, which have elevated the lowly spade to the level of rifle and cannon in tactical significance. Union losses are 18,339 men to 10,000 Confederate.

NAVAL: In light of recent losses on the James River, Virginia, Rear Admiral Samuel Lee organizes an "anti-torpedo" squadron of three steamers outfitted to drag the river for mines.

MARINES: Colonel John Harris, the sixth commandant, dies in office.

May 13

MILITARY: At Arlington, Virginia, Private William Christman of Company G, 67th Pennsylvania Volunteers, becomes the first soldier entombed at Arlington National Cemetery.

NAVAL: The *Louisville*, *Chillicothe*, and *Ozark*, last of Admiral David D. Porter's gunboats, dash over a wing dam on the Red River, Louisiana, and float off to safety. The ingenuity of army engineers under Colonel Joseph Bailey has saved an entire squadron from eminent capture or destruction.

May 14

MILITARY: The armies of Generals William T. Sherman and Joseph E. Johnston confront each other in full battle array at Resaca, Georgia. The Federals muster 100,000 men and the Confederates, recently joined by a corps under General Leonidas K. Polk, number 60,000. Union troops manage to storm a line of Southern earthworks along Camp Creek, situated on some low-lying hills—a significant gain that enables them to post artillery pieces and shell the entire Confederate line. Yet the toughest struggle is waged on the Union left, where the aggressive Southern general John B. Hood successfully attacks along the Dalton-Resaca wagon road until a division dispatched by General George H. Thomas drives him back. More hard fighting is anticipated on the following day.

May 15

MILITARY: General Franz Sigel resumes advancing with 6,500 men toward New Market, Virginia, as 5,500 Confederates under General John C. Breckinridge

assume strong defensive positions. Breckinridge suddenly sends forward two infantry brigades linked by a dismounted cavalry force, and they sweep through the town and drive Sigel's men before them. However, when a gap forms in his line, Breckinridge is forced to commit 264 cadets (or "Katydids") from the nearby Virginia Military Institute to fill it. At 3:00 P.M., the Confederates crown the heights and seize two cannon while the defeated Federals withdraw across the Shenandoah River to safety. The disgraced Sigel is subsequently replaced by the venerable major general David Hunter.

- The Battle of Resaca resumes as Union forces under General Joseph Hooker engage the Confederates of General John B. Hood on the Union left. Meanwhile, General William T. Sherman orders a division of the XVI Corps across the Oostanaula River to seize a strategic railroad bridge in the Southern rear. General Joseph E. Johnston, his lines of communication now imperiled, expertly disengages, throws a pontoon bridge over the Oostanaula, and withdraws to safety in the predawn darkness. Losses in the two-day struggle are roughly 6,000 Union and 5,000 Confederates as Sherman continues pushing ever deeper into Georgia.

May 16

MILITARY: General Pierre G. T. Beauregard leads 18,000 Confederates in a sharp attack against General Benjamin F. Butler's Army of the James near Drewry's Bluff, Virginia. General Robert Ransom's Confederates charge and capture General Charles A. Heckman and 400 prisoners before ammunition shortages force him to halt. Meanwhile, Southerners under General Robert F. Hoke hit the Union center, but, becoming lost in the fog, Hoke's attack sputters. Butler then withdraws behind fortifications along Bermuda Hundred. Confederate losses are 2,506 while the Union sustains 4,160 casualties. The Federals are now completely corked into the Peninsula, unable to move.

May 20

MILITARY: General Ulysses S. Grant directs the Army of the Potomac south and east in an attempt to outflank Confederate defenses along the Mattaponi River, Virginia. His objective is Hanover Station, 24 miles north of Richmond, where the Virginia Central Railroad intersects with the Richmond, Fredericksburg & Potomac Railroad, two major Southern supply arteries.

- General Pierre G. T. Beauregard, intending to further pen up General Benjamin F. Butler's Army of the James on the Bermuda Hundred Peninsula, attacks Union positions at Ware Bottom Church, Virginia. Initially, the Union divisions of Generals Alfred H. Terry and Adelbert Ames are hard-pressed before counterattacking and driving their antagonists back to their starting positions. Union losses are roughly 800, to 700 for the Confederates, but Butler remains effectively hemmed in and unable to assist the main drive outside of Richmond, Virginia.

May 21

MILITARY: Bested by Southern fortifications around Spotsylvania, General Ulysses S. Grant begins probing Confederate lines near Milford Station, Virginia. He is surprised by the lack of strong resistance and prepares to sidestep General Robert E. Lee's left flank and appear in force across the Anna River.

May 23

MILITARY: The II Corps of General Winfield S. Hancock deploys on the northern bank of the North Anna River at Chesterfield Ford while the XI Corps under General Ambrose E. Burnside lands at Jericho Mills. Meanwhile, the V and VI Corps under Generals Gouverneur K. Warren and Horatio G. Wright, respectively, fan out into the area west of Jericho Mills.

NAVAL: The tug *Columbine* grounds at Horse Landing, Florida, and fights off Confederate forces for several hours before being captured; the Southerners burn their prize to prevent it from being recaptured.

May 25

MILITARY: The XX Corps under General Joseph Hooker, advancing upon New Hope Church, Georgia, collides headlong into General John B. Hood's Confederates. The Federals are initially repulsed until Hooker masses two entire divisions and charges the troops of General Alexander P. Stewart. Stewart clings tenaciously to his ground, and at length Hooker retires with 1,600 casualties. This encounter places Union troops only 25 miles northwest of Atlanta.

NAVAL: Five volunteers from the gunboat *Mattabesett* unsuccessfully attack the Confederate steam ram *Albemarle* on the Roanoke River, North Carolina; one sailor is captured, but all five will ultimately receive the Medal of Honor.

May 31

MILITARY: General Ulysses S. Grant's overland campaign to Richmond, Virginia, while a costly tactical failure, succeeds brilliantly at the strategic level. In one very bloody month he has forced the redoubtable Army of Northern Virginia from field positions along the Rapidan River to the very gates of the Confederate capital. They will remain there for the rest of the war.

June 2

MILITARY: At Cold Harbor, Virginia, General Ulysses S. Grant prepares his men for a frontal assault against what he perceives are weak Confederate lines. However, he cancels the operation after General Winfield S. Hancock's II Corps, exhausted by marching in hot weather, arrives in poor condition. Grant reluctantly postpones his attack another day, allowing General Robert E. Lee additional time to fortify and dig in.

June 3

MILITARY: The Battle of Cold Harbor unfolds across a continuous, seven-mile front dotted by earthen fortifications and interlocking fields of fire. The Southern position, manned by 59,000 men, confronts 108,000 Federal troops. General Ulysses S. Grant orders his men to charge across open fields in dense columns as the defenders unleash withering torrents of bullets and canister, cutting them down in droves. Within 30 minutes 7,000 Federals are casualties, while the Confederates sustain roughly 1,500 losses. It is the biggest military blunder of Grant's career, and the Northern press begins assailing him as a "butcher."

- General Robert E. Lee has won his final open-field battle, for Cold Harbor marks an end to the mobile phase of the Union's overland campaign to Richmond, Virginia. Since May, both sides have absorbed tremendous losses, with

Union casualties exceeding 50,000. The Southern toll exceeds 32,000, which, while numerically smaller, actually constitutes a higher percentage of their army, 46 percent to 41 percent. General Ulysses S. Grant, moreover, receives a constant and steady flow of reinforcements, whereas Confederate manpower resources continue dwindling.

NAVAL: In Ossabow Sound, Georgia, the side-wheel steamer *Water Witch* is attacked by a 130-man Confederate cutting-out expedition under Lieutenant Thomas P. Pelot, which captures that vessel despite the loss of Pelot.

June 5

MILITARY: Having advanced down the Shenandoah Valley as far as Harrisonburg before turning east, General David Hunter leads 15,000 Union troops against 5,600 Confederates under General William E. Jones at Piedmont, Virginia. Charging through a gap in the Southern line, the Federals capture all of Jones's artillery and his line shatters. Jones is killed while rallying his command, which loses 1,600 men to a Union tally of 780.

June 9

MILITARY: General George G. Meade directs the Army of the Potomac, including an entire division of African-American troops, to begin probing the formidable defenses of Petersburg, Virginia.

MARINES: Major Jacob Zeilin becomes the seventh commandant of the U.S. Marine Corps.

June 10

MILITARY: In a display of tactical virtuosity, General Nathan B. Forrest and 3,500 Confederate cavalry rout a Union force twice their size at Brice's Crossroads, Mississippi. Forrest has anticipated that General Samuel D. Sturgis will commit his cavalry to battle first, followed by his infantry, and he determines to defeat each in detail as they come up. Eager to maintain the battlefield initiative, Forrest next unleashes simultaneous attacks that strike the Union left, right, and center, while a small force maneuvers around Sturgis's rear. The tiring Federals, hit from all sides, suddenly bolt and careen head first into their own wagon and artillery train, overturning both. Forrest, defeating twice his number, suffers 492 casualties and inflicts 2,240. However, the disaster is not enough to deter General William T. Sherman from pressing his offensive deeper into Georgia.

- In light of a growing manpower crisis, the Confederate Congress authorizes military service for all males between the ages of 17 and 50.

June 11

MILITARY: General Philip H. Sheridan rides into Trevilian Station, Virginia, where he encounters the dismounted division of General Wade Hampton waiting for him in the woods. He quickly dispatches the Michigan brigade of General George A. Custer to turn Hampton's flank and slash his rear, which Custer does with aplomb. Custer then dashes in between Hampton and General Fitzhugh Lee's divisions, capturing 50 wagons, 800 prisoners, and 1,500 horses. Lee is tardy in sorting out his command, but then begins pressing the unsupported Custer hard. At the last minute, Sheridan gallops up with reinforcements and the Southerners retire with the loss of an additional 500 prisoners.

- In the Shenandoah Valley, Virginia, vengeful Union forces under General David Hunter capture the town of Lexington. The Virginia Military Academy is singled out for punishment and torched for its participation at the Battle of New Market in May.

NAVAL: Captain Raphael Semmes, commanding the Confederate raider *Alabama*, enters Cherbourg, France, to complete some badly needed repairs. His arrival is noted by the American vice-consul, who alerts naval authorities.

June 12

MILITARY: General Philip H. Sheridan's cavalry renews its clash with Generals Wade Hampton and Fitzhugh Lee at Trevilian Station, Virginia. However, Hampton's well-positioned troopers repel seven Union charges, at which point Sheridan concludes his raid and rides back to the main Union force at Petersburg. Trevilian Station is one of the largest cavalry clashes of the entire war and among the most costly: Sheridan admits to 735 casualties while the Confederate loss is estimated at roughly 1,000.

June 14

MILITARY: In a major feat, Union engineers construct the 2,100-foot-long James River bridge from Windmill Point to Fort Powhatan, Virginia. The feat takes 450 engineers only eight hours to achieve. It enables General Ulysses S. Grant to quickly shift his army across the river and threaten Petersburg. General Robert E. Lee is taken completely unawares.

NAVAL: The screw sloop *Kearsarge* under Captain John A. Winslow arrives off Cherbourg, having been alerted to the arrival of the notorious Confederate raider *Alabama*.

June 15

POLITICS: Congress passes legislation granting equal pay to African-American soldiers. For many months, black personnel have refused to accept less pay than their white counterparts.

June 17–18

MILITARY: The Union army of General David Hunter arrives outside the city of Lynchburg, Virginia, and he launches several ill-fated attacks that all fail. Despite his superiority in numbers, Hunter is convinced he cannot storm the place and prepares to fall back into West Virginia.

June 18

MILITARY: The siege of Petersburg, Virginia, begins in earnest once General Robert E. Lee and 50,000 bedraggled, hungry men begin defending a line 26 miles in circumference while simultaneously guarding the four railroads out of the city that constitute his supply line. In contrast, General Ulysses S. Grant leads 110,000 well-fed, well equipped soldiers, backed by a steady stream of reinforcements that the Confederates cannot match. The past four days of fighting along the city's outskirts have cost the Union 10,586 casualties while the Southerners lost around 4,000.

- General David Hunter's 18,000 Union troops renew their attack upon Lynchburg, Virginia. However, newly arrived Confederates under General Jubal A. Early boost the defenders to 14,000, who resist tenaciously. Hunter concludes

that the enemy has been reinforced overnight and outnumbers him, so he orders an ignominious retreat back up the Shenandoah Valley. Early then recaptures the strategic initiative by energetically pursuing his larger adversary.

June 19

NAVAL: The *Kearsarge* under Captain John A. Winslow engages the *Alabama* under Captain Raphael Semmes off Cherbourg, France. The Union vessel enjoys a slightly larger crew and marginally heavier armament, along with the decided advantage that *Alabama's* ammunition has deteriorated from lengthy exposure to salt air. Both vessels handle their guns well; *Kearsarge* receives 28 hits, including a potentially disastrous strike by a 100-pound shell that fails to explode. Still, Union gunnery is also superb and inflicts tremendous hull damage to its adversary, puncturing the *Alabama* repeatedly. Within an hour, the ship is listing and Semmes, unable to dash for the French coast, abandons ship and is picked up by

Forrest, Nathan B. (1821–1877)

Confederate general

Nathan Bedford Forrest was born in Chapel Hill, Tennessee, on July 13, 1821, the son of a poor frontier blacksmith. Orphaned at an early age, he endured a hardscrabble existence, yet taught himself to read, write, and do mathematics, all the while providing support for his siblings. Forrest, moreover, exhibited a single-minded determination to succeed in all his activities, and he made a fortune trading in cattle, cotton, and slaves in Mississippi. By the advent of the Civil War in April 1861, he was a self-made millionaire, and joined the 7th Tennessee Cavalry as a private. Independent-minded and unhappy at taking orders, he then recruited and equipped a cavalry regiment at his own expense, serving as its lieutenant colonel. Forrest first saw duty at the defeat of Fort Donelson, where he spurred his horses and rode through Union lines rather than surrender. Promoted to colonel, he next saw action at the bloody Battle of Shiloh in April 1862, covering the Confederate retreat

with distinction. Forrest's good behavior resulted in promotion to brigadier general the following July, and he commanded the cavalry assigned to General Braxton Bragg in Tennessee. In this capacity he fought well at the bloody Battle of Murfreesboro that fall, but Bragg, who had little use for cavalry, dismissed him with orders to raise a new mounted force. Forrest, who loathed Bragg, eagerly complied, and he spent the winter raiding General Ulysses S. Grant's supply lines; in May 1863, he captured the entire command of Colonel Abel D. Streight in northern Georgia. He then rejoined Bragg's army in time for the bloody victory at Chickamauga, fought well, then criticized Bragg's handling of the pursuit and was relieved of command. Fortunately, President Jefferson Davis arranged an independent command for Forrest with the rank of major general.

Operating alone in Mississippi, Forrest gained a reputation as the "Wizard in the saddle" for repeatedly confounding

the English yacht *Deerhound*. This action terminates the South's most celebrated commerce raider; only 41 of 149 crew members survive the action.

June 21

POLITICS: President Abraham Lincoln visits Union troops in the siege lines of Petersburg, Virginia, making a conspicuous target for snipers in his tall, stovepipe hat.

June 22

MILITARY: General Ulysses S. Grant, confronting strong Southern defenses before him at Petersburg, Virginia, tries his time-honored tactic of shifting troops around the enemy's flank in a bid to extend and weaken their lines by cutting the Weldon Railroad. General David B. Birney's II Corps and General Horatio G. Wright's VI Corps advance through dense woods to reach their objective, but General

and besting larger Union forces sent after him. The only serious blot on his career was the storming of Fort Pillow on April 12, 1864, where large numbers of African-American prisoners were murdered. However, he followed this up with his greatest victory, Brice's Crossroads, the following June, when he routed a force twice his size under General Samuel G. Sturgis. He next commenced raiding the supply lines of General William T. Sherman with such success that Sherman referred to him as "that Devil Forrest." It was not until April 1865, when Forrest confronted three times his number under General James H. Wilson at Selma, Alabama, that he was heavily defeated. Forrest finally surrendered to Union authorities on May 9, 1865, and returned to his ruined plantation in Mississippi. After the war he resumed his business activities in Memphis, Tennessee, and worked as the president of a railroad company. He also helped found the Ku Klux Klan and served as its grand wizard, but subsequently renounced violence and resigned. Forrest died in Memphis on October 29, 1877, the Civil War's most capable cavalrman.

Confederate general Nathan B. Forrest
(Massachusetts Commandery Military Order of
the Loyal Legion and the U.S. Army Military
History Institute)

Cadmus M. Wilcox's division holds fast while Generals William Mahone and Bushrod R. Johnson assail Birney's flanks. The struggle is savage and routs the veteran division of Union general John Gibbon, which loses 1,600 prisoners.

- General John B. Hood exceeds his orders to extend the Confederate left at Kennesaw Mountain by launching an unauthorized assault with 11,000 men against Union positions at Kolb's Farm, Georgia. General Joseph Hooker, commanding 14,000 troops and 40 cannon, is forewarned of Hood's approach and makes careful preparations to receive him. Concentrated rifle and artillery fire mow down the charging Confederates, and Hood ultimately withdraws with 1,500 casualties to a Union total of 250.

June 23

MILITARY: Union Generals David B. Birney and Horatio G. Wright repeat their attack upon Confederate defenses guarding the Weldon Railroad, Virginia, with their II and VI Corps, respectively. A strong initial advance recovers all ground lost on the previous day, but a stubborn defense mounted by General William Mahone blocks them from reaching the railroad. At dusk the Federals again withdraw below the Jerusalem Plank Road with 2,962 casualties.

June 24

NAVAL: The side-wheel steamer *Queen City* is captured by Confederate cavalry and artillery on the White River near Clarendon, Arkansas.

June 25

MILITARY: Colonel Henry Pleasant's 48th Pennsylvania, composed mostly of miners from Schuylkill County, begins tunneling beneath Confederate defenses at Petersburg, Virginia. The plan is to run a 511-foot-long shaft to a position beneath a South Carolina battery at Elliott's Salient and stock it with 8,000 pounds of gunpowder. Over the next month, General Ambrose E. Burnside specially trains a division of African Americans under General Edward Ferrero to spearhead the assault once the charges have been detonated.

June 27

MILITARY: General William T. Sherman wages the Battle of Kennesaw Mountain, Georgia, against General Joseph E. Johnston. The Confederates are skillfully arrayed along high ground strewn with large boulders and trees—affording a perfect killing ground for troops advancing from below. The first Union wave consists of two divisions from General John A. Logan's XV Corps, Army of the Tennessee. General William W. Loring responds with intense rifle and artillery fire, dropping Federals in bloody clumps. The main thrust against Johnston's line occurs farther south at Cheatham's Hill, stoutly defended by General William J. Hardee's corps. Up the hillside go 8,000 men from divisions under Generals Jefferson C. Davis and John Newton, XIV Corps, heavily raked by a fire from above that depletes their ranks. Sherman finally calls off the attack after losses of 3,000 men, including two generals killed; Johnston sustains about 750 casualties.

July 3

MARINES: At White Point, South Carolina, a small marine detachment mans a howitzer section in a heavy and unsuccessful skirmish with Confederate forces.

July 5

NAVAL: Union ironclads attack Confederate rifle pits and other fortifications along the Stono River, South Carolina, driving the defenders from their positions.

July 7

MILITARY: General Ulysses S. Grant, realizing the seriousness of Confederate thrusts in Maryland, rushes General James B. Rickett's division (VI Corps) to Baltimore by rail; from there it will march on foot to Monocacy Junction. There it will reinforce General Lew Wallace, who holds the intersection with 3,000 men and is preparing for a desperate holding action.

July 8

MILITARY: A hodgepodge collection of Union troops under General Lew Wallace assumes defensive positions behind the Monocacy River near Frederick, Maryland, to defend the national capital from General Jubal A. Early's advancing Confederates. On the day before battle, he cobbles together a force of 6,000 men from various sources, which is all that stands in the way of the rebels and Washington, D.C.

July 9

MILITARY: The Confederate Fabian tactics of General Joseph E. Johnston, which have so infuriated General William T. Sherman, unfortunately draw the ire of President Jefferson Davis. Seeking a possible pretext to relieve Johnston, whom he personally despises, Davis dispatches General Braxton Bragg to his headquarters on a "fact finding" mission. Johnston, meanwhile, continues withdrawing from the Chattahoochee River to Peachtree Creek, only three miles north of Atlanta, Georgia.

- General Lew Wallace, with 6,000 troops, confronts 14,000 Confederates under General Jubal A. Early at Monocacy, Maryland. General James B. Ricketts's veteran division easily repels two charges by General John B. Gordon as the Southerners gradually work their way around the Union left. A final charge by General William R. Terry's Virginia brigade finally dislodges the defenders, and Wallace orders his entire force withdrawn up the Baltimore Pike in good order. Union losses are 1,800 while the Confederates sustain around 700. The road to Washington, D.C., is now wide open, but Monocacy has delayed Early's advance by 24 hours and grants VI Corps sufficient time to arrive at the capital and shore up its defenses.

July 10

MILITARY: Confederates under General Jubal A. Early file through Rockville, Maryland, to confront Union defenders at Fort Stevens, outside Washington, D.C. That post is manned by only 209 inexperienced artillerists, but President Abraham Lincoln blithely exclaims, "Let us be vigilant but keep cool. I hope neither Baltimore nor Washington will be sacked."

NAVAL: Confederate commerce raider *Florida* sinks the bark *General Berry* only 30 miles off the Maryland coast. This same day the screw steamer *Mount Vernon* and gunboat *Monticello* put to sea to stop the elusive *Florida*.

MARINES: A detachment of 124 marines and sailors is dispatched from the Philadelphia Navy Yard to guard the railroad line at Havre de Grace, Maryland, in the wake of Confederate cavalry raids there,

July 11

MILITARY: Confederates under Major General Jubal A. Early begin testing the defenses of the Washington, D.C., area by skirmishing with Fort Stevens. Meanwhile, more than 20,000 of the city's inhabitants, including office personnel, are put under arms to resist any attack. This is the first time that the nation's capital has been threatened by a military force since 1814.

July 12

MILITARY: Confederates under General Jubal A. Early withdraw from the vicinity of Washington, D.C., and are cautiously shadowed by General Horatio G. Wright's Federal forces. For a few tense moments President Abraham Lincoln, visiting the parapets, is under enemy fire, and young lieutenant Oliver Wendell Holmes (a future Supreme Court justice) inadvertently shouts "Get down, you fool!"

July 13–14

MILITARY: A force of 7,500 Confederates under Generals Stephen D. Lee and Nathan B. Forrest gathers to attack General Andrew J. Smith outside of Tupelo, Mississippi. Lee insists that they charge the waiting Federals head on—and they are repeatedly decimated by concentrated rifle and artillery fire. Tupelo proves a surprising Union victory, but Forrest's command survives the debacle intact and still functioning. Union losses are 674 to a Confederate tally of 1,326.

July 15

MILITARY: General Nathan B. Forrest attacks the rear guard of retiring Federals under General Andrew J. Smith outside of Tupelo, Mississippi, and is again repulsed; Forrest is among the wounded.

July 16

MILITARY: A pensive president Jefferson Davis telegraphs General Joseph E. Johnston at Atlanta, Georgia, "I wish to hear from you as to your present situation and your plan of operation so specifically as will enable me to anticipate events." Johnston matter-of-factly replies, "As the enemy is double our number, we must be on the defensive. My plan of operations must therefore depend upon that of the enemy."

July 17

MILITARY: General Joseph E. Johnston is preparing to pounce on the isolated Army of the Cumberland under General George H. Thomas at Peachtree Creek, Georgia. Suddenly, a telegram arrives from President Jefferson Davis announcing his replacement by the impetuous, highly aggressive General John B. Hood. Davis's antipathy for the highly capable Johnston proves a turning point in the course of events.

July 20

MILITARY: No sooner does the 20,000-man Army of the Cumberland under General George H. Thomas cross Peachtree Creek, Georgia (three miles north of Atlanta), than it is set upon by 19,000 Confederates under the newly appointed commander, General John B. Hood. The hardest fighting occurs on the right wing, where General Edward C. Walthall's Confederates lace into the divisions

of Generals Alpheus S. Williams and John W. Geary, XX Corps, whereby the latter is nearly surrounded and hard pressed for over three hours. Still, Hood's gambit ultimately fails, so he suspends further fighting at 7:00 P.M. and orders a retreat. Peachtree Creek is the first of his highly audacious but ultimately futile attempts to save Atlanta, and it costs him 2,500 men to a Union tally of 1,779 killed, wounded, and missing.

July 22

MILITARY: General John B. Hood initiates the Battle of Atlanta by ordering General William J. Hardee's corps to strike at the Army of the Tennessee under General James B. McPherson. However, Hardee errs in not moving troops far enough to the east and, instead of turning McPherson's left flank, he attacks him head on. Tragedy strikes Union forces when McPherson, reconnoitering ahead of his troops, stumbles onto a Confederate picket and is shot dead; he is the only Union army commander to lose his life in combat. Federal reinforcements subsequently storm across the field, driving the gray coats before them and restoring their lines. Hood's second sortie proves another costly failure that depletes his army of 8,000 men while Union losses are 3,722.

- President Jefferson Davis orders General Edmund Kirby Smith to assist the Army of Tennessee under General John B. Hood. In light of the fact that the Mississippi River is full of Union gunboats, this will prove an impossible order to fulfill.

July 23–24

MILITARY: General Jubal A. Early's 14,000 Confederates engage the Union's smaller VIII Corps under General George Crook at Kernstown, Virginia. Crook's 8,500 men initially withstand several charges until they are finally flanked by General John C. Breckinridge and driven from the field with 1,185 casualties. Crook's defeat would have been more costly had Early not mishandled his cavalry. Unfortunately for the South, their success convinces the political establishment in Washington, D.C., that vigorous new leadership is required to finally secure the Shenandoah region for the Union.

July 25

NAVAL: A four-man reconnaissance team led by Acting Master's Mate John Woodman completes a daring mission up the Roanoke River, North Carolina, to pinpoint the exact location of the Confederate ram *Albemarle*.

- Union vessels anchored outside Mobile Bay, Alabama, dispatch boat crews at night that locate and then neutralize Confederate mines blocking the entrance of the bay. The process continues over the course of several nights.

July 28

INDIAN: General Alfred Sully engages a large number of hostile Teton Lakota (Sioux) in their camp at Killdeer Mountain (North Dakota). Sully is looking for remnants of the Santee (Eastern Sioux) responsible for staging a bloody uprising in Minnesota two years earlier, especially their notorious chief, Inpaduta. The latter has sought refuge among his Teton brethren, who prepare to wage battle rather than turn him over. Sully takes the unusual step of deploying his 3,000 men in a hollow square and advancing in this formation upon the camp. This walking

wall of firepower gradually evicts the Teton from their campsite and they flee, losing an estimated 150 warriors. Sully sustains five dead and 10 wounded.

MILITARY: General Oliver O. Howard and the Army of the Tennessee advance upon East Point, Georgia, determined to sever the last remaining rail links to Atlanta. Confederate general John B. Hood then dispatches the corps of Generals Stephen D. Lee and Alexander P. Stewart to hit the Union left flank at Ezra Church and roll it up. The Southerners advance as ordered but, instead of striking Howard's flank, they mistakenly veer into the front of General John A. Logan's XV Corps. By the time the Confederates depart Ezra Church they have lost upward of 5,000 men to a Union tally of only 562. The battle dissuades the Federals from cutting Atlanta's rail lines, but so depletes Hood's army that hereafter he is forced on the defensive.

July 30

MILITARY: The Battle of the Crater unfolds as fuses strung along an explosive-laden tunnel, dug beneath Confederates lines at Petersburg, Virginia, are lit. At 4:45 P.M., the ground beneath Elliott's Salient erupts furiously, destroying an artillery emplacement and killing 278 North Carolina troops. Unfortunately, Union troops pause 15 minutes before charging into the smoking crater, which measures 1,870 feet long, 80 feet wide, and 30 feet deep. The Confederates recover quicker than expected, rush reinforcements to the threatened point, and shoot downward into the milling Federal troops. Union losses are 3,798 while the Southerners sustain 1,491 casualties.

- General George Stoneman's cavalry column departs the outskirts of Macon, Georgia, and attempts circling around the city to cross the Ocmulgee River. He advances as far as Hillsboro before being set upon by General Alfred Iverson and three brigade of Confederate troopers near Sunshine Church. He surrenders with 700 men. This "raid" proves one of the biggest cavalry fiascos of the entire war and nearly paralyzes General William T. Sherman's mounted arm for several weeks.

August 1–4

NAVAL: A raiding party from the sloop *Saratoga* storms into McIntosh Court House, Georgia, seizing civilians intent on forming a coastal guard.

August 4

MILITARY: General William T. Sherman, pursuant to his strategy of circling Atlanta, Georgia, from the west, orders General John M. Schofield's Army of the Ohio, reinforced by General John M. Palmer's XIV Corps, Army of the Tennessee, to storm Confederate earthworks near Utoy Creek. Success here will place Union troops within two miles of the strategic railroad junction at East Point.

August 5

NAVAL: At 6:00 A.M., Admiral David G. Farragut launches an all-out attack against Confederate defenses guarding Mobile Bay, Alabama. Disaster strikes when the ironclad *Tecumseh* detonates a torpedo and sinks 30 seconds later with a loss of 90 out of 115 crewmen, including Commander T. A. M. Craven. "Damn the torpedoes, full speed ahead!" is Farragut's response to the crisis as his flagship *Hartford* plunges directly through the Confederate minefield. He next confronts

the large steam ram *Tennessee* under the equally redoubtable Admiral James Buchanan, which tries repeatedly to ram the *Hartford*. Farragut easily dodges his slower adversary while all 17 ships of his squadron pummel it with intense cannon fire. Buchanan, badly wounded, finally lowers his flag at 10:00 A.M., as Farragut wins another bold gamble and closes the Confederacy's last remaining port on the Gulf Coast.

August 6

MILITARY: General Philip H. Sheridan arrives at Harpers Ferry, West Virginia, to assume command of the Army of the Shenandoah, consisting of the VI Corps under General Horatio G. Wright, the VIII Corps under General George Crook, the XIX Corps under General William H. Emory, and three cavalry divisions led by General T. A. Tolbert.

MARINES: Fort Powell at Mobile, Alabama, is occupied by 25 marines culled from the *Hartford* and *Richmond* under Captain Charles Heywood.

August 6–23

NAVAL: The Confederate steamer *Tallahassee* steams out of Wilmington, North Carolina, under Commander John T. Wood. Over the next two weeks he will net 31 Union prizes, then run the blockade back into Wilmington.

August 7

MILITARY: General Ulysses S. Grant's choice of 33-year-old General Philip H. Sheridan to lead the Army of the Shenandoah causes consternation in President Abraham Lincoln and Secretary of War Edwin M. Stanton. Both men fear that the youthful Sheridan is too inexperienced for so delicate a mission, but Grant seeks to have this aggressive, headstrong firebrand at the helm.

August 9

NAVAL: At City Point, Virginia, Confederate agents John Maxwell and R. K. Dillard plant a time bomb onboard a Union transport; the ensuing explosion devastates a major supply base supporting General Ulysses S. Grant's army.

- The former Confederate ram *Tennessee*, now manned by Union sailors, helps bombard Fort Morgan at Mobile, Alabama, into submission.

August 10

MILITARY: General Philip H. Sheridan leads Union forces out of Harpers Ferry, West Virginia, and into the Shenandoah Valley as Confederates under General Jubal A. Early watch warily.

NAVAL: The agile Confederate raider *Tallahassee* under Commander John T. Wood takes the first of 31 prizes off the coast of New York, forcing U.S. Navy authorities to dispatch several vessels in pursuit.

August 15

MILITARY: General Philip H. Sheridan withdraws toward Winchester, Virginia, inducing Confederates under General Jubal A. Early to follow. Sheridan is acting under orders to move with caution, as he is believed to be facing upward of 40,000 Southerners, and President Abraham Lincoln's precarious political fortunes preclude any embarrassing defeats this close to the national election. Early misinterprets such behavior as timidity.

August 16

MILITARY: Union cavalry under General Wesley Merritt engage General Richard H. Anderson's Confederate division at Front Royal, Virginia. A swirling saber melee erupts between Southern troopers of General William C. Wickham and Union cavalry under General Thomas C. Devlin as the former try to ford the Shenandoah River. A decisive charge by Devlin sends his opponents scampering and he seizes two flags and 139 prisoners.

August 18

MILITARY: General Ulysses S. Grant refuses Confederate requests to resume prisoner exchanges. This act deprives the South of critically needed, trained manpower, but also prolongs the hardships of Union prisoners languishing in poorly maintained Confederate prisons. In truth, the South can barely feed its own soldiers, let alone captives.

- Confederate forces attack General Winfield S. Hancock's II Corps at Deep Bottom Run, Virginia, and are repelled with loss. General Ulysses S. Grant remains nevertheless convinced that Southern defenses north of the James River have not been depleted, so he recalls Hancock's expedition back to Petersburg. Operations in this vicinity cost the Union 2,901 casualties to a Confederate tally of about 1,500.

- At 4:00 P.M., General Gouverneur K. Warren's V Corps attacks and captures Globe Tavern and portions of the Weldon Railroad outside Petersburg, Virginia. But General Pierre G. T. Beauregard, commanding at Petersburg, quickly dispatches General Henry Heth's division to slash at Warren's left flank. Union reinforcements from the divisions of Generals Samuel W. Crawford and Lysander Cutler make a timely appearance and drive the Southerners back into the city. Still, General Robert E. Lee must take the Weldon Railroad back quickly and intact to preserve his supply line.

August 19

MILITARY: General Gouverneur K. Warren's V Corps is reinforced at Weldon Station, Virginia, by three divisions of IX Corps, plus General Gershom Mott's division from II Corps. These arrive and deploy in time to meet a large Southern counterattack orchestrated by General Ambrose P. Hill. By nightfall, Warren's position has been heavily jostled, but control of this section of the Weldon Railroad remains in Union hands. Federal losses for the day are 4,455 while Confederates are thought to have sustained around 1,600.

- A surprise raid by 2,000 Confederate cavalry under General Nathan B. Forrest briefly captures Memphis, Tennessee, and the local Union commander, General Cadwallader C. Washburn, escapes only in his night clothes. Forrest then resumes raiding Federal supply lines, with near impunity, over the next two months. His success elicits backhanded praise from General William T. Sherman, who refers to him as "that devil Forrest."

August 23

MILITARY: Fort Morgan, the largest remaining Confederate fort in Mobile Bay, Alabama, succumbs to Union artillery fire and surrenders after a day-long bombardment.

August 25

MILITARY: At 5:00 P.M., Confederates under General Ambrose P. Hill savagely assault the Union II Corps under General Winfield S. Hancock at Ream's Station, Virginia. Hill's 10,000 men initially rebound off the divisions of Generals Nelson A. Miles and David M. Gregg, until parts of the former suddenly give way. General John Gibbon's veteran division, exhausted from fatigue work, also stumbles badly in combat and runs. Union losses in this embarrassing affair are 2,372 while the Southerners sustain only 700 casualties.

August 26

MILITARY: A convention of African Americans in Philadelphia, Pennsylvania, advances resolutions calling for the commissioning of black military officers.

August 31

MILITARY: General William J. Hardee leads 20,000 Confederates against a similar-sized force under General Oliver O. Howard at Jonesboro, Georgia. The Federals are strongly posted in a semicircle on high ground and enjoy a clear field of fire. Hardee's piecemeal attacks continually disintegrate in the face of concentrated rifle fire, and he finally withdraws after suffering 2,000 casualties. Howard loses a mere 178.

September 1

MILITARY: Confederates under General William J. Hardee are attacked by superior Union forces as the struggle at Jonesboro, Georgia, continues. General William T. Sherman designs an elaborate movement by several corps, but Union attacks are poorly coordinated and beaten off with considerable loss. Sherman's men finally penetrate Southern defenses, taking hundreds of prisoners from General Daniel C. Govin's brigade. Union losses are 1,274 out of 20,460 present; the Confederates suffer 911 out of 12,661 engaged. Hardee's heroic stand allows General John B. Hood sufficient time to slip out of Atlanta before Sherman's noose can close around it.

September 2

MILITARY: "So Atlanta is ours and fairly won," General William T. Sherman telegraphs President Abraham Lincoln, after the city surrenders to the XX Corps of General Henry W. Slocum. This single act rekindles President Abraham Lincoln's sagging election prospects while exerting a distressing effect throughout the South. Over the past four months, Union forces have sustained 4,432 dead and 22,822 wounded while the Confederates endured 3,044 killed and 18,952 injured.

NAVAL: Secretary of the Navy Gideon Welles receives permission to mount a large amphibious assault against Fort Fisher, Wilmington, North Carolina. Success here will close down the South's last remaining seaport.

September 7

MILITARY: General William T. Sherman issues Special Order No. 67 to the inhabitants of Atlanta, Georgia, requiring all 1,600 families to evacuate the city immediately. "War is cruelty and you cannot refine it," he declares to the city's mayor. "When peace does come you may call on me for anything. Then I will share with you the last cracker."

September 9

MILITARY: General Joseph Wheeler, having completed his latest raid against Union supply lines in Tennessee, recrosses the Tennessee River at Florence, Alabama, and gallops home. In fact, his endeavors have achieved very little, for Union repair crews quickly restore damaged sections of track. The net result of Wheeler's activities is to deprive General John B. Hood of excellent cavalry during a critical phase of the Georgia campaign.

September 11

MILITARY: Generals William T. Sherman and John B. Hood conclude a 10-day truce to facilitate the evacuation of citizens and their belongings from Atlanta, Georgia. When petitioned by the inhabitants to reconsider, Sherman states "You might as well appeal against the thunderstorm as against these terrible hardships of war." The age of total war has arrived with a vengeance.

**Sherman, William T. (1820–1891)***Army general*

Tecumseh Sherman was born in Lancaster, Ohio, on February 8, 1820, the son of a judge. Orphaned at an early age, he became ward of Senator Thomas Ewing, who subsequently christened him William. Sherman, with his stepfather's patronage, gained appointment to the U.S. Military Academy in 1836 and graduated near the top of his class four years later. He joined the 3rd Artillery as a second lieutenant and fought in Florida's Second Seminole War until 1841. Sherman next fulfilled a long stint of garrison duty throughout the Deep South, where he thoroughly familiarized himself with the people and geography. Sherman deeply admired Southerners and evinced genuine affection for them, but after the Civil War commenced in 1861 he departed Louisiana for St. Louis, Missouri, and sought to regain his army commission. He commanded a brigade under General Irvin McDowell at Bull Run on July 21, 1865, becoming one of few officers to distinguish

himself in that combat. Sherman next rose to brigadier general the following August and transferred to the District of Cairo, Illinois, where he became acquainted with General Ulysses S. Grant during the campaign against Forts Henry and Donelson in February 1862. The highly strung Sherman and low-key Grant struck up a cordial relationship that lasted the remainder of their lives. He commanded a division in Grant's Army of the Tennessee and fought conspicuously at the bloody Battle of Shiloh, April 5–6, 1862. Sherman, who commanded the outposts that day, had been surprised by Confederates under General Albert S. Johnston, but he effectively rallied his shaken command and contributed to the final Union victory.

Over the next two years, Sherman fought capably under Grant and in the spring of 1864 succeeded him as commander of the western theater. In this capacity, he undertook his most famous endeavor, the con-

September 16

MILITARY: At dawn, General Wade Hampton's cavalry charges a Union force at Coggin's Point, Virginia, completely dispersing elements of the 1st D.C. Cavalry and the 13th Pennsylvania Cavalry. The raiders then abscond with 2,486 head of cattle—and 300 prisoners—in a line stretching seven miles long. Hampton reaches Confederate lines the next day after committing the largest incident of cattle rustling in American history.

- Rebecca West, a Union spy in Winchester, Virginia, observes the departure of General Joseph Kershaw's Confederate cavalry division and 12 cannon from the army of General Jubal A. Early. She manages to relay the information back to General Philip H. Sheridan, then conferring with General Ulysses S. Grant over strategy at Charlestown, West Virginia. After news of the transfer, Sheridan wants to attack Early immediately. Grant concurs fully, laconically stating, "Go in," then departs.

quest of Atlanta, Georgia, by overcoming the skilled defensive tactics of General Joseph E. Johnston and the ferocious onslaughts of General John B. Hood. Atlanta fell on September 2, 1864, after which Sherman embarked on a campaign of "total war" against the Southern populace, burning a 60-mile-wide swath of destruction in his path to the sea. By the time the Civil War successfully concluded in April 1865, his armies had devastated large tracts of land throughout Georgia and South Carolina. Sherman was promoted to lieutenant general in July 1866 while heading the Division of the Missouri. Three years later, newly elected President Grant appointed him commanding general of the army with four stars, becoming only the second individual up to that time so honored. Over the next decade, Sherman worked tirelessly to improve conditions in the military and foster greater professionalism, including wholesale adoption of Prussian staff methods. He finally retired in November 1883 and resisted calls to enter politics as a Republican candidate

Union general William T. Sherman (*Library of Congress*)

for the presidency. Sherman died in New York on February 14, 1891, immortalized by his observation that "war is hell."

September 19

MILITARY: At 2:00 P.M., General Philip H. Sheridan's army, totaling 35,000 men, attacks the 12,000 Confederates of General Jubal A. Early at Winchester, Virginia. Heavy fighting forces Southerners under General Stephen Ramseur to give way, but Generals Richard Rodes and John B. Gordon strike back in a vicious counterattack that stuns the XIX Corps. An equally desperate cavalry charge by General Fitzhugh Lee fails to stop approaching Union troopers under Generals Wesley Merritt and William W. Averill, and Confederate resistance collapses around 5:00 P.M. Union losses are 5,018 to a Confederate tally of 3,611; Early hastily withdraws to Fisher's Hill.

NAVAL: A Confederate raiding party under Acting Master John Yates Beall seizes and burns two steamers on Lake Erie; their objective is to capture the side-wheel steamer *Michigan* and free Confederate prisoners held at Johnson's Island, Sandusky, Ohio. Beall, however, is apprehended and eventually hung in New York as a spy.

September 22

MILITARY: The Battle of Fisher's Hill erupts in the afternoon when 28,000 Union troops under General Philip H. Sheridan begin probing General Jubal A. Early's line. Early, who possesses only 9,000 men, suspects that a ruse of some kind is in play and prepares to retreat. Suddenly, two divisions of Federal cavalry under General George Crook emerge, screaming down the hillside on Early's left flank and sweeping aside the dismounted troopers of General Lunsford L. Lomax. Early's Confederates are thoroughly thrashed, losing 1,235 men and 14 cannon to a Union tally of 456. Sheridan declines to pursue his defeated enemy further, preferring instead to hold back and commence implementing a "scorched earth" policy to devastate the fertile Shenandoah. This begins a chapter in valley history known as "the Burning."

September 24

MILITARY: General Philip H. Sheridan lopes down the Shenandoah Valley but, instead of pursuing defeated Southern troops, he begins burning crops to eliminate the Confederacy's breadbasket. This occurs with the complete approval of General Ulysses S. Grant, who advises, "If the war is to last another year we want the Shenandoah Valley to remain a barren waste." The single-minded Sheridan will not disappoint his superior.

September 25

MILITARY: President Jefferson Davis arrives at Palmetto, Georgia, to confer with General John B. Hood over strategy. Because of personality clashes, Hood transfers the ornery General William J. Hardee to another theater. Davis also approves of Hood's daring strategy for invading Tennessee to strike at Union supply lines, possibly forcing General William T. Sherman to evacuate Georgia in pursuit.

September 27

MILITARY: Confederate forces under General Sterling Price attack the Union outpost at Pilot's Knob, Missouri, but are badly repelled. The Union commander, Brigadier General Ewing, waits until dark, then slips away to safety.

- Confederate guerrillas under William “Bloody Bill” Anderson ride into Centralia, Missouri, and proceed to systematically plunder the town and rob its inhabitants. He next apprehends 23 unarmed Union musicians on a train and has them summarily executed. The tragedy continues when Major A. V. E. Johnson rides into town with 158 newly recruited men of his 39th Missouri Infantry, mounted on mules. Johnson and most of his men die in an ambush outside of town. The guerrillas then return to Centralia to kill off any remaining soldiers. By the time “Bloody Bill” completes his black deed, 116 Federals are dead.

September 28

NAVAL: Rear Admiral David D. Porter yields command of the Mississippi Squadron to Rear Admiral Stephen D. Lee; Porter replaces Lee as commander of the North Atlantic Blockading Squadron.

September 29

MILITARY: Two divisions of the V Corps under General Gouverneur K. Warren strike Confederate positions along the Squirrel Level Road near Poplar Springs Church, Virginia. The defenders and their position are quickly overrun, but delays by General John G. Parke’s IX Corps enable General Ambrose P. Hill to rush up reinforcements and counterattack. Flanked by Generals Henry Heth and Cadmus M. Wilcox, Parke abandons his gains and falls back among Warren’s troops at Peebles’ Farm.

- General David B. Birney’s X Corps of 18,000 men attacks up the slopes of New Market Heights, Virginia, spearheaded by General Charles A. Paine’s division of African Americans. The black troops encounter heavy fire and dogged resistance, losing 800 men in an hour, but they tenaciously forge ahead and carry the earthworks in a tremendous display of courage and sacrifice. Significantly, of 16 Medals of Honor awarded to African Americans in the Civil War, no fewer than 14 will originate here.

- General Edward O. C. Ord’s XVIII Corps surges ahead against Fort Harrison, Virginia, then garrisoned by 800 inexperienced artillerists. The Federals have little trouble in taking their objective and also beat off an attack launched by Confederates retreating from New Market Heights. Union troops begin entrenching and strengthening their lines for the inevitable Southern counterattack the following day.

NAVAL: The Confederate James River Squadron under Flag Officer John K. Mitchell provides supporting fire for Confederate operations near Fort Harrison, Virginia.

- John C. Braine and a party of fellow Confederate sympathizers overpower the crew of the Federal steamer *Roanoke* off the coast of Cuba and sail the ship to Bermuda, where it is burned.

September 30

MILITARY: Eager to prevent Union troops from lengthening his trench lines, General Robert E. Lee arrives at Richmond, Virginia, with eight infantry brigades to recapture Fort Harrison, Virginia. He launches the divisions of Generals Robert F. Hoke and Charles Field in a bid to overwhelm the defenders, but entrenched Federals easily repel four determined charges. Union losses over the past two days top 3,300, while the Confederates have lost approximately 2,000.

October 2

MILITARY: President Jefferson Davis appoints General Pierre G. T. Beauregard as commander of the Division of the West to better coordinate the actions of Generals John B. Hood and Richard Taylor. In truth, Davis regards the banty little Cajun as meddlesome and seeks to end his interference in the critical Eastern theater of operations. Beauregard proves unable to achieve much in the West.

- Confederate forces at Saltville, Virginia, including guerrillas under Champ Ferguson and a Tennessee brigade led by General Felix H. Robertson, repulse an attack by General Stephen G. Burbridge. A detachment of the 5th U.S. Colored Cavalry is involved in the attack and suffers heavily. The following day, vengeful Southerners stalk the battlefield and execute upward of 100 wounded soldiers, primarily African Americans. Several of their white officers are also murdered in cold blood.

October 5

MILITARY: A division of Confederates under General Samuel O. French, numbering 3,276 men, is tasked with capturing a major Union supply depot at Allatoona Pass, Georgia. That post is defended by 2,025 Union soldiers under the recently arrived General John M. Corse, who counts on both rugged terrain and rapid-fire Henry repeating rifles to thwart the enemy. The Southerners attack from the south and west for several hours, but Corse invariably sweeps his antagonists back down the slopes with concentrated firepower. Union losses are 706 while the Confederates sustain 897.

October 6

JOURNALISM: The Richmond *Inquirer* breaks new ground by printing an essay promoting the use of African-American soldiers for the Confederacy. The idea is gaining greater currency, although President Jefferson Davis will never be reconciled to it.

October 7

MILITARY: General Robert E. Lee again determines to recapture Fort Harrison, Virginia, to restore his siege lines outside Richmond. He orders two overworked divisions under Generals Robert F. Hoke and Charles W. Field to drive Union forces from the Darbytown Road. The Confederates encounter stiff opposition from General Alfred H. Terry's division, X Corps, at Johnson's Farm. Hoke makes a tardy appearance and fails to advance, at which point Lee calls off the action. Confederate casualties are 1,350 to a Union tally of 399.

- The army of General Philip H. Sheridan continues its policy of burning crops and confiscating livestock at Woodstock, Virginia. To date, his men have destroyed 2,000 barns, 70 flour mills, driven off 4,000 head of cattle, and killed 3,000 sheep. Sheridan vows that, when he is finished, the region around Staunton "will have little in it for man or beast."

NAVAL: The screw sloop *Wachusett* under Commander Napoléon Collins decides to attack and capture the Confederate commerce raider *Florida* at Bahia, Brazil, after learning that Lieutenant Charles M. Morris and most of his crew are ashore. *Florida* surrenders after a brief struggle, having previously accounted for 37 Union prizes. However, the nature of the seizure, a blatant violation of Brazilian neutrality, results in diplomatic protests.

October 9

MILITARY: Union cavalry brigades under Generals George A. Custer and Wesley Merritt engage the Confederate cavalry division of General Thomas L. Rosser at Tom's Brook, Virginia. As Custer leads 2,500 troopers to confront Rosser's 3,500 men, he recognizes his adversary as an old West Point roommate and doffs his hat before engaging. Merritt, meanwhile, crashes headlong into opposing troops, routing them while Custer ends up chasing Rosser's command for 20 miles. This is the biggest triumph of the Union mounted arm over its vaunted adversary and becomes celebrated as the "Woodstock Races."

October 12

NAVAL: Rear Admiral Cornelius K. Stribling assumes command of the East Gulf Blockading Squadron.

October 17

MILITARY: General John B. Gordon and topographical engineer Captain Jedediah Hotchkiss steal upon the Union encampment at Cedar Creek, Virginia, ascend Massanutten Mountain, and closely examine the Union deployment. They discern that General Horatio G. Wright's left flank is entirely "in the air" and subject to a sudden flanking attack. This intelligence is immediately relayed to General Jubal A. Early.

October 18

MILITARY: Indomitable General Jubal A. Early, upon learning that General Philip H. Sheridan is absent from his army, plans to attack the Union encampment at Cedar Creek. Acting upon General John B. Gordon's advice, he sends three divisions along differing paths that will ultimately converge behind the exposed VIII Corps of General George Crook, on their left. This march, carried out under extreme secrecy, is one of the most audacious turning movements of the entire war.

October 19

MILITARY: Lieutenant Bennett H. Young and his band of 20 Confederate Kentuckians slip across the Canadian border and attack three banks in St. Albans, Vermont, 15 miles from the border. Two citizens are shot, one fatally. After absconding with \$20,000, the Southerners set fire to several buildings and flee toward Canada. Once word of their misdeed spreads, a Union officer forms a posse and chases after them. They catch the raiders on Canadian soil and turn them over to the proper authorities for processing and extradition.

- At 5:00 A.M., the Battle of Cedar Creek erupts as the Confederate divisions of Generals Clement A. Evans, Stephen Ramseur, and John Pegram plunge out of an early morning fog and pitch into the Union camp of General Horatio G. Wright. The Federal VIII and IX Corps, flanked and completely surprised, crumble before the Southern onslaught. Fortunately, General Philip H. Sheridan is returning from his strategy session in Washington, D.C., and encounters refugees as he approaches Cedar Creek. "Little Phil" spurs his horse for 12 miles and rallies the men for a swift counterattack. The exhausted, disorganized Confederates offer little resistance and bolt from the field after suffering 2,810 casualties. Sheridan's losses are put at 5,671, but Southern resistance in the strategic Shenandoah Valley is irreparably shattered.

NAVAL: The British-built vessel *Sea King*, clandestinely purchased by Commander James D. Bulloch, arrives at Las Desertas in the Madeiras, where it is armed and taken into Confederate service as the commerce raider *Shenandoah* under Lieutenant James I. Waddell.

October 22

NAVAL: Confederate secretary of the navy Stephen R. Mallory writes to President Jefferson Davis, defending his decision to deploy the *Tallahassee* and *Chickamauga* as commerce raiders rather than detain them at Wilmington, North Carolina, as part of the local defenses. “A cruise by the *Chickamauga* and *Tallahassee* against the northern coasts and commerce would at once draw a fleet of fast steamers from the blockading squadron off Wilmington in pursuit of them,” he reasons, “and this alone would render such a cruise expedient.”

October 23–24

MILITARY: The Battle of Westport, Missouri, unfolds as Confederates under General Sterling Price fend off numerous Union forces. General James G. Blunt brushes up against Southern cavalry expertly led by General Joseph O. Shelby and is likewise rebuffed. However, Price cannot spare the reserves to mount a pursuit, for General Alfred Pleasonton looms across Big Blue River and begins pressing upon his rear. At length, General Samuel R. Curtis, commanding the Department of Kansas, reinforces Blunt, and the combined Union force pushes its way across Brush Creek just as Pleasonton closes in from behind. Price’s army then bolts the field and flees in confusion toward the southwest. Casualties are roughly 1,500 apiece in this, the last major engagement of the Trans-Mississippi region.

October 25

NAVAL: Rear Admiral Charles B. Bell yields command of the Pacific Squadron to Rear Admiral George F. Pearson.

October 26

MILITARY: Confederate outlaw William “Bloody Bill” Anderson is killed in a Union ambush at Richmond, Missouri,

October 27

MILITARY: An advance by 43,000 Union troops commences against the South Side Railroad, below Petersburg, Virginia, in the early morning rain. General Geoffrey Weitzel’s main thrust is blunted while an African-American brigade under General John Holman slips around the Southern flank and charges. Holman’s progress is subsequently stymied by stiff resistance offered by General William Mahone’s Southerners; Weitzel, seeing further gains as impractical, orders his men withdrawn. Union losses are 1,103 to a Confederate tally of 451.

- Concurrently, an even larger operation unfolds near Hatcher’s Run when II Corps under General Winfield S. Hancock, V Corps of General Gouverneur K. Warren, and IX Corps under General John G. Parke march seven miles southwest of Petersburg through a driving rain. Parke’s command encounters heavy resistance from General Cadmus M. Wilcox’s Confederate division and stops.

Nightfall closes the engagement at Hatcher's Run, and the Federals retire in good order back to their lines. Hancock suffers 1,700 casualties, whereas Confederate losses are estimated at 1,000. General Ulysses S. Grant subsequently concludes offensive operations and settles into winter quarters.

NAVAL: The imposing Confederate ram *Albemarle* is sunk by a spar torpedo operated by 21-year-old Lieutenant William B. Cushing on the Roanoke River, North Carolina. Cushing utilizes two 30-foot steam launches, each outfitted with a 14-foot-long spar torpedo and a crew of 15. The *Albemarle* is fatally damaged and sinks, as does Cushing's own vessel, and he is forced to swim to shore. Only Cushing and one other member of the expedition make it back safely; the remaining 13 fall captive.

October 28

MILITARY: General James G. Blunt's division surprises and attacks General Sterling Price's retreating army at Newtonia, Missouri. However, quick reactions by General Joseph O. Shelby and his "Iron Brigade" allow the bulk of Confederate forces to escape to safety.

NAVAL: Lieutenant John Wilkinson leads the Confederate raider *Chickamauga* past the blockade at Wilmington, North Carolina, taking seven prizes over the next three weeks and returning safely.

October 29

NAVAL: Union naval forces attack Plymouth, North Carolina, bombarding Confederate positions and putting landing parties ashore that ignite powder charges; 37 Southerners are captured along with 22 cannon and considerable supplies. This action effectively closes the Carolina Sounds to the Confederacy.

- The Confederate commerce raider *Olustee* (née *Tallahassee*) under Lieutenant William H. Ward evades Union blockaders off Wilmington, North Carolina, for a week-long cruise that will net seven prizes.

October 30

NAVAL: Confederate commerce raider *Olustee* captures the bark *Alina*, its first prize, south of the Azores.

- After a three-hour struggle, the gunboat *Undine* and two transports are captured by Confederate forces under General Nathan B. Forrest, then operating along the Tennessee River near Johnson City, Tennessee.

November 2

MILITARY: Secretary of State William H. Seward informs the mayor of New York that Confederate agents arriving from Canada are planning a campaign of arson to burn the city down by election day.

NAVAL: Paddle-wheel steamers *Key West* and *Tawah* attack and recapture the former Union gunboats *Undine* and *Venus* on the Tennessee River.

November 4

NAVAL: Artillery under General Nathan B. Forrest attack and sink three more Union paddle-wheelers on the Tennessee River near Johnsonville, Tennessee. His raid disrupts the flow of Union supplies and results in considerable damage: four gunboats, 14 steamers, 17 barges, 33 cannon, 150 captives, and 75,000 tons of supplies ruined. Total losses to the Union exceed \$6.7 million.

November 9

MILITARY: The army of General William T. Sherman organizes itself into two wings under Generals Oliver O. Howard (XV, XVII Corps) and Henry W. Slocum (XIV, XX Corps) prior to marching upon Savannah, Georgia. Sherman then declares that “the army will forage liberally on the country during the march” as he intends to ignore his own lines of communication. All ranks are expected to refrain from destroying private property, if possible, but this march nevertheless marks an even greater application of “total war.”

November 13

MILITARY: General Jubal A. Early is ordered back to New Market, Virginia, and from there to dispatch part of his army from the Shenandoah Valley to the defenses of Petersburg. This concludes his celebrated Valley Campaign of 1864, which involved 1,670 miles of marching and 75 pitched battles of various sizes.

November 15

MILITARY: General William T. Sherman departs a thoroughly devastated Atlanta, Georgia, and begins lumbering toward Savannah and the sea with 62,000 men. Most notoriously, he initiates a 60-mile-wide swath of devastation across the state, destroying anything of use to the Confederacy. His unequivocal object is to “make Georgia howl,” and within 21 days Sherman’s “bummers” inflict damages on the South approaching \$300 million, leaving a twisted, blackened landscape in their wake.

November 18

MILITARY: President Jefferson Davis instructs General Howell Cobb of Georgia to mobilize the state’s entire militia force to oppose the advance of General William T. Sherman. He then entrusts the whole to the command of General William J. Hardee.

November 21

MILITARY: The Army of Tennessee under General John B. Hood advances 31,000 men and 8,000 cavalry from Florence, Alabama, and toward Nashville, Tennessee, to threaten Union lines of communication. However, his timetable has been delayed three weeks by General Nathan B. Forrest’s absence, and during that interval General George H. Thomas has greatly strengthened the defenses of Nashville.

November 25

INDIAN: Colonel Christopher “Kit” Carson leads 200 charging cavalry through a hostile Kiowa encampment near Adobe Walls, Texas. Simultaneously, his Ute and Apache allies steal the warriors’ horses. However, the survivors flee into nearby Comanche lodges with pleas for help, and soon hundreds of angry warriors begin massing to attack the intruders. Carson, suddenly confronted by the largest body of Native Americans he has ever encountered, quickly ducks behind the ruins of Adobe Walls where the fire of two 12-pounder mountain howitzers keeps the milling warriors at bay. Several hours of long-distance fire ensue before the Americans and their allies escape to the safety of New Mexico in the darkness. Carson suffers two dead and 10 wounded; Indian losses are between 50 and 150, due mainly to cannon fire.

November 27

NAVAL: The Union steamer *Greyhound*, functioning as the floating headquarters of General Benjamin F. Butler, explodes and sinks in the James River, Virginia, with a high-level conference in progress. Fortunately, Butler, General Robert Schenck, and Admiral David D. Porter escape unharmed. This accident is most likely the result of Confederate sabotage, whereby an exploding “coal torpedo” was inadvertently shoved into the *Greyhound*’s boiler.

November 29

INDIAN: Colorado militia under Colonel John M. Chivington attack a peaceful Cheyenne camp at Sand Creek, Colorado. The Indians under Chief Black Kettle had been directed there by military authorities with the understanding that they would be safe. Nonetheless, vengeful militiamen sweep down upon the sleeping camp at dawn with artillery and then charge, killing all they encounter. Black Kettle and up to 149 Cheyenne, including women and children, are cut down and scalped. Militia losses are nine dead and 40 wounded.

NAVAL: On the James River, Virginia, monitors *Onondaga* and *Mahopac* trade shots with Confederate batteries for three hours.

November 30

MILITARY: General John M. Schofield arrives at Franklin, Tennessee, with 15,000 men of his IV and XXII Corps, and begins strengthening the city’s defenses. Within hours he is accosted by 23,000 Confederates of General John B. Hood’s Army of Tennessee, approaching from positions south of the town. Hood’s initial charge catches two brigades of General George D. Wagner’s division out in the open, sweeps them aside, and charges directly into Federal trenches beyond. The defenders are obliged to hold their fire until the cheering Southerners are nearly on top of them, then unleash a concentrated fusillade, toppling men by the hundreds. Hood’s men, compacted into a dense mass, resist but are cut down in droves by rifle and artillery fire on either flank. The Battle of Franklin costs Hood 6,252 men and six generals, including the talented Patrick L. Cleburne, while Union losses total 2,326.

MARINES: A battalion of 182 marines joins the 300-man Naval Brigade put ashore by the South Atlantic Blockading Squadron of Rear Admiral George H. Preble; their mission is to link up with General William T. Sherman in South Carolina.

December 3–4

NAVAL: Union gunboats operating along the Cumberland River recapture three transports and duel with Confederate batteries at Bell’s Mills, Tennessee.

December 5

NAVAL: In reporting on affairs at sea, Secretary of the Navy Gideon Welles declares, “The blockade of a coastline, greater in extent than the coast of Europe from Cape Trafalgar to Cape North, is an undertaking without precedent in history.” He states that the navy consists of 671 vessels mounting more than 4,600 guns, and has taken 1,400 prizes.

- The Naval Brigade under Commander George H. Preble supports army operations at Tulifinny Crossroads, Georgia, where an attempt to cut the Savannah-Charleston railroad fails.

December 6

MILITARY: General George H. Thomas is ordered by General Ulysses S. Grant to attack Confederate forces gathering outside Nashville, Tennessee, and “wait no longer for remount of your cavalry.”

NAVAL: Lieutenant Commander LeRoy Fitch attempts to run the ironclad *Neosho* down the Cumberland River and past Confederate batteries at Bell’s Mills, Tennessee, but suffers over 100 hits in a three-hour struggle and concludes that the position cannot be forced.

December 7

NAVAL: In Mobile Bay, Alabama, the tug *Narcissus* under Acting Ensign William G. Jones hits a Confederate mine and sinks in 15 minutes.

December 9

MILITARY: General Ulysses S. Grant, frustrated by the perceived lack of aggressiveness by General George H. Thomas, orders General John M. Schofield to succeed him as theater commander. The directive is subsequently suspended when Thomas informs Grant that his intended attack has been canceled on account of heavy snowfall. The onset of freezing weather may inconvenience Thomas, but it causes the poorly clad and sheltered Confederates under General John B. Hood to shiver in their trenches.

NAVAL: The tug *Bazely* and the side-wheel steamer *Otsego*, operating on the Roanoke River, North Carolina, engage Confederate batteries along Rainbow Bluff, strike mines, then sink.

December 13

NAVAL: An ailing and fatigued Admiral David G. Farragut arrives in New York City onboard the screw sloop *Hartford*, receiving his second hero’s welcome by the inhabitants.

December 14

MILITARY: The weather near Nashville, Tennessee, has moderated, and General George H. Thomas informs anxious superiors of his intention to attack General John B. Hood’s Confederate camp on the morrow. True to form, he begins methodically and unhurriedly arranging his men for battle.

December 14–21

NAVAL: Union gunboats begin stripping away Savannah’s outer ring of defenses by attacking and capturing Forts Beaulieu and Rosedew on Ossabaw Sound, Georgia.

December 15

MILITARY: The Battle of Nashville commences as General George H. Thomas unleashes the XVI and IV Corps against the Confederate left wing under General Benjamin F. Cheatham. Simultaneously, a large diversionary attack by General James B. Steedman’s African-American troops sustains heavy losses but pins down the Confederate right. All the while, General John B. Hood is furiously shifting troops around to support his overextended line, but it crumbles under the weight of the Union assault. Hood is badly drubbed and should withdraw this evening, but he defiantly elects to make another stand nearby.

December 16

MILITARY: The Battle of Nashville resumes as General George H. Thomas, surprised that General John B. Hood's Confederates have not retreated, renews his drive against their re-formed left wing. In the ensuing rout, the Federals capture General Edward Johnson and nearly all Hood's artillery. Only the onset of darkness and the timely arrival of General Nathan B. Forrest's cavalry prevents the Army of Tennessee from completely disintegrating. Hood's losses total 5,962 while Thomas, a methodical pugilist, loses 3,057.

NAVAL: Throughout the Battle of Nashville, gunboats on the Cumberland River under Commander LeRoy Fitch contribute close fire support to Union forces engaged in the battle.

December 17

MILITARY: President Jefferson Davis glumly informs General William J. Hardee that he cannot reinforce the defenses of Savannah, Georgia, with units drawn from the Army of Northern Virginia.

December 18

POLITICS: President Abraham Lincoln pleads for an additional 300,000 volunteers to bolster the Union army's depleted ranks in anticipation of a final, victorious drive.

December 20

NAVAL: Desiring a well-deserved rest, Rear Admiral David G. Farragut lowers his flag from the screw sloop *Hartford* in New York harbor.

December 21

MILITARY: Savannah, Georgia, falls to Union forces under General William T. Sherman, thereby completing his 285-mile "March to the Sea." He telegrams President Abraham Lincoln, "I beg to present to you as a Christmas gift the city of Savannah with 150 heavy guns and also about 250,000 bales of cotton."

NAVAL: At Savannah, Georgia, retreating Confederate forces sink or burn the vessels *Savannah*, *Isondiga*, *Firefly*, and *Georgia* to prevent their capture by Union forces.

December 23

NAVAL: President Abraham Lincoln approves congressional legislation creating the rank of vice admiral; David G. Farragut becomes the first naval officer so honored and he acquires rank equivalent to that of lieutenant general.

December 24

NAVAL: The *Louisiana*, packed with explosives and intended to be detonated under the guns of Fort Fisher at Wilmington, North Carolina, accidentally ignites 250 yards from its objective. When this fails to appreciably damage the defenses, 60 Union warships under Admiral David D. Porter begin a concerted bombardment that strikes the fort with 155 shells per minute.

December 25

MILITARY: An attack upon Fort Fisher at Wilmington, North Carolina, by the Army of the James under General Benjamin F. Butler, transpires. He lands 2,200 men at 2:00 A.M. and advances inland, thinking that the defenders have been

silenced. Suddenly, Confederate gunners unleash a torrent of shot and shell that keeps the attackers 50 yards from their objective. Butler is so nonplussed by the stout defense that he summarily cancels the entire operation and withdraws to the fleet offshore.

December 28

MILITARY: General Ulysses S. Grant admits to President Abraham Lincoln that operations against Fort Fisher, North Carolina, are a complete fiasco and insists that General Benjamin F. Butler be sacked for “gross and culpable failure.”

December 30

MILITARY: President Abraham Lincoln, less politically vulnerable since his landslide reelection, relieves General Benjamin F. Butler as commander of the Army of the James.

December 31

MILITARY: Union forces settle comfortably into their siege lines outside of Petersburg and Richmond, Virginia, constantly reinforced at a strength of 110,000 men and capably led by General Ulysses S. Grant. By contrast, the once formidable Army of Northern Virginia of General Robert E. Lee withers away through illness, desertion, and combat. His 66,000 gaunt, ragged soldiers remain fierce and devoted, but also perish in the cold and mud of trench warfare. The results of Grant’s war-winning strategy—to pin Lee inside his works and bleed him through sheer attrition—are never more apparent.

1865

January 1

NAVAL: The screw frigate *San Jacinto* under Captain R. W. Meade strikes No Name Cay in the Bahamas and is scuttled without the loss of life.

January 2

NAVAL: Secretary of the Navy Gideon Welles contacts Secretary of War Edwin M. Stanton and expresses the dire necessity for capturing and closing Wilmington, North Carolina, “the only port by which any supplies whatever reach the rebels.”

January 3

MILITARY: General Alfred H. Terry receives command of the forthcoming joint expedition against Fort Fisher at Wilmington, North Carolina. At this stage of the war, even General Benjamin F. Butler’s political allies cannot salvage his waning military fortunes.

January 4

NAVAL: Admiral David D. Porter begins laying down his strategy for the reduction of Fort Fisher, Wilmington, North Carolina. He intends to use a naval brigade consisting of sailors and U.S. Marines to hit the fort frontally while army troops work their way around the rear.

January 7

INDIAN: A large body of 1,000 Cheyenne and Sioux warriors, angered over the 1864 Sand Creek massacre, attack the frontier settlements of Julesburg and Valley Station, Colorado Territory. The Indians send a small detachment forward to

lure the garrison out, and a party of the 7th Iowa Cavalry under Captain Nicholas J. O'Brien obliges them. Fortunately, the intended ambush miscarries when it is sprung too early and the troopers scamper back to the fort and safety. The warriors, unable to overcome such strong defenses, subsequently loot and burn nearby settlements.

January 9

POLITICS: President Abraham Lincoln dispatches Secretary of War Edwin M. Stanton to Savannah, Georgia, for discussion with General William T. Sherman. Among the issues raised is Sherman's alleged mistreatment of African-American refugees.

MILITARY: General John B. Hood straggles into Tupelo, Mississippi, with the remnants of the once-proud Army of Tennessee. President Jefferson Davis intends to transfer the bulk of the survivors eastward to contest the advance of General William T. Sherman in the Carolinas.

January 11

MILITARY: Despite freezing weather, 300 Confederate cavalry under General Thomas L. Rosser attack a Union encampment at Beverly, West Virginia. The defenders, comprising detachments from the 8th and 34th Ohio Cavalry, are caught by surprise and overwhelmed before serious resistance is mounted. Rosser secures 5,873 captives, 100 horses, 600 rifles and—above all—10,000 rations to feed his hungry men.

January 12

NAVAL: Admiral David D. Porter arrives off Wilmington, North Carolina, with a fleet of 59 warships and 8,000 men commanded by General Alfred H. Terry. This is the largest Union armada and combined amphibious expedition of the entire war.

January 13

NAVAL: Lieutenant Stephen B. Luce of the gunboat *Pontiac* concludes an informative meeting with General William T. Sherman and, while contemplating the principles of war, becomes convinced that a naval war college needs to be founded.

January 14

MILITARY: Union troops under General Alfred H. Terry land outside Fort Fisher, Wilmington, North Carolina, and move quickly to prevent a Confederate attempt to reinforce the garrison. Nevertheless, 350 soldiers under General H. C. Whiting make it through Union lines, bringing the defenders up to 2,000 men.

NAVAL: The armada of Admiral David D. Porter, mounting 627 heavy cannon, begins its reduction of Confederate defenses at Fort Fisher. Porter moves his ships to within 1,000 yards of the fort and delivers a meticulously aimed fire of 100 shells per minute. Within hours, the bulk of Fort Fisher's armament has been dismounted or made useless.

January 15

MILITARY: General Alfred H. Terry commences an all-out assault on Fort Fisher, Wilmington, North Carolina, with three brigades commanded by Generals Newton M. Curtis, Galusha Pennypacker, and Louis H. Bell. Resistance is fierce, and all three Union brigadiers are either killed or wounded in fierce, hand-to-hand

fighting lasting eight hours. Terry then commits his final brigade under General Joseph C. Abbott, and the defenders are overpowered by 10:00 P.M. Combined Union losses are 1,341 while the Confederates sustain roughly 500 with an additional 1,500 taken.

NAVAL: Admiral David D. Porter orders his ironclad monitors to within point-blank range of Fort Fisher, and maintains a withering bombardment of Confederate defenses. Once the fort's heavy cannon are silenced, the Naval Brigade goes forward in three desperate charges, which are repelled but also distract the defenders from army troops circling from behind. For their role in this significant victory, no fewer than 35 sailors and marines win the Medal of Honor.

- In Charleston Harbor, South Carolina, the ironclad *Patapsco* under Lieutenant Commander S. P. Quackenbush strikes a Confederate mine and sinks within minutes, killing half its crew.

January 16

POLITICS: The Confederate Congress, lacking confidence in President Jefferson Davis's conduct of military affairs, passes a resolution, 14 to 2, to appoint General Robert E. Lee as general in chief and also to restore General Joseph E. Johnston as commander of the Army of Tennessee.

January 19

POLITICS: President Abraham Lincoln inquires of General Ulysses S. Grant about the possibility of finding Robert Lincoln, his eldest son, a staff position. Grant subsequently appoints him assistant adjutant general with a rank of captain.

- President Jefferson Davis, intent upon shoring up support for his flagging reputation as a war leader, convinces a reluctant General Robert E. Lee to serve as general in chief of Confederate forces. Lee consents but cautions, "I must state that with the addition of immediate command of the army, I do not think I could accomplish any good."

January 21

MILITARY: General William T. Sherman begins relocating his headquarters from Savannah, Georgia, to Beaufort, South Carolina. Overall, his march through the Carolinas has been plagued by heavy rains.

January 22

NAVAL: Lieutenant John Low, C.S.N., sails the steamer *Ajax* from Dublin, Ireland, and makes for Nassau, the Bahamas, to receive its armament. However, adroit work by American minister Charles F. Adams dissuades the British from allowing any guns to be shipped there.

January 23

POLITICS: President Jefferson Davis, reacting to pressure from the Confederate Congress, signs the General-in-Chief Act, elevating General Robert E. Lee to supreme military commander.

NAVAL: The Confederate James River Squadron under Commodore John K. Mitchell attacks City Point, Virginia, which functions as the main supply base for General Ulysses S. Grant's army. It stumbles in the face of heavy resistance from Union shore batteries and the ironclads *Massasoit* and *Onondaga* and withdraws after losing three vessels.

January 24

MILITARY: Reversing himself, General Ulysses S. Grant now approves of renewed prisoner exchanges. This influx of new Confederate manpower is calculated to exacerbate existing food shortages.

January 27

NAVAL: A boat party under Acting Ensign Thomas Morgan captures and refloats the Confederate torpedo boat *Scorpion* on the James River, which had been sunk by cannon fire two days previously, and delivers it to Union lines.

January 28

NAVAL: At Colerain, North Carolina, the steam gunboat *Valley City* provides close fire support to Union troops defending their camp against a surprise Confederate attack.

- Lieutenant Commander William W. Low, commanding the Confederate torpedo boat *St. Patrick*, rams the side-wheel steamer *Octorara* off Mobile, Alabama, but its explosive torpedo spar fails to explode, and neither vessel suffers damage.

January 31

MILITARY: General Robert E. Lee is appointed general in chief of Confederate forces in light of continuing dissatisfaction over President Jefferson Davis's handling of military affairs.

February 4

POLITICS: President Abraham Lincoln returns to Washington, D.C., somewhat distraught that nothing has been accomplished through direct peace negotiations. He then assures General Ulysses S. Grant, "Nothing transpired, or transpiring, with the three gentlemen from Richmond is to cause any change, hindrance, or delay of your military plans or operations."

MILITARY: General Ulysses S. Grant orders Union forces to cut off Southern wagon trains near Hatcher's Run, Virginia, along the Boydton Plank Road. The II Corps under General Andrew A. Humphreys, the V Corps of General Gouverneur K. Warren, and cavalry under General John M. Gregg draw the assignment.

February 5

MILITARY: General Gouverneur K. Warren's V Corps launches a renewed offensive along the Boydton Plank Road near Hatcher's Run (Dabney's Mill), Virginia, while General Andrew A. Humphreys's II Corps likewise occupies the nearby Vaughan Road. The Confederates then launch several strong attacks throughout the course of the day but are repulsed, and Humphreys is reinforced overnight by General David M. Gregg's cavalry division.

February 6

MILITARY: Heavy fighting resumes along Hatcher's Run, Virginia, as Confederate forces of General John B. Gordon's division slam into the exposed V Corps of General Gouverneur K. Warren. In the course of heavy fighting, Southern general John Pegram falls in action, but renewed onslaughts by General Clement A. Evans gradually force the Federals off the Boydton Plank Road.

- General and former vice president John C. Breckinridge is appointed the new Confederate secretary of war to replace outgoing James A. Seddon.

February 7

MILITARY: Fighting continues at Hatcher's Run, Virginia, as Union forces finally and successfully extend their siege lines at a cost of 1,512 casualties. Southern losses are unknown but presumed as heavy. Worse, General Robert E. Lee's defensive perimeter is now stretched to 37 miles in length just as General Ulysses S. Grant again prepares to shift his forces farther leftward.

February 9

POLITICS: Upon the recommendation of General Robert E. Lee, general in chief of Confederate forces, President Jefferson Davis enacts a pardon for all deserters who report back to their units within 30 days.

NAVAL: In a stiff exchange, the screw sloop *Pawnee*, the side-wheel steamer *Daffodil*, and gunboat *Sonoma* engage Confederate batteries on the North Edisto River, South Carolina; all sustain several hits before the enemy guns are disabled.

February 10

NAVAL: Captain Raphael Semmes, former commander of the notorious raider *Alabama*, is promoted to rear admiral and placed in charge of the James River Squadron.

February 15

NAVAL: The steam frigate *Merrimack* experiences a failure in its pumps while taking on water and is abandoned off the coast of Florida.

February 16–17

NAVAL: Rear Admiral David D. Porter helps ferry two divisions of General William T. Sherman's army along the Cape Fear River, then bombards Fort Anderson in the ensuing assault. This is the first step in the reduction and capture of Wilmington, North Carolina.

February 17

MILITARY: Union forces under General William T. Sherman accept the surrender of Columbia, capital of South Carolina, from city officials. Meanwhile, General Wade Hampton's cavalry burns enormous stockpiles of cotton bales before departing—sparks from which ignite several uncontrollable fires. Southerners are convinced that the city has been torched on Sherman's orders and mark it as a defining atrocity of the war.

February 18

MILITARY: Charleston, South Carolina, is occupied by Union forces under General Alexander Schimmelfennig. For many Federals, the capture of the "fire eater" center of the Confederacy is sweet revenge. This also ends the 567-day siege of Fort Sumter in Charleston Harbor.

- General Robert E. Lee agrees in principle to the notion of arming slaves to fight for Southern independence, but feels they must be fighting as free men.

NAVAL: Retreating Confederate forces at Charleston, South Carolina, destroy the ironclads *Charleston*, *Chicora*, and *Palmetto State* to prevent their capture by Union forces.

February 19–22

NAVAL: Gunboats under Admiral David D. Porter, having pounded Fort Anderson, North Carolina, into submission, next train their guns on Fort Strong on the Cape Fear River.

February 21

MILITARY: General Robert E. Lee alerts Confederate secretary of war John C. Breckinridge that, if absolutely necessary, he will abandon Richmond, Virginia, and make all haste for Burkeville to maintain communication with Confederate forces in the Carolinas. He also requests that General Joseph E. Johnston be returned to active duty, as the health of General Pierre G. T. Beauregard appears tenuous.

February 22

MILITARY: Union forces under General John M. Schofield occupy Wilmington, North Carolina, closing the last remaining port of the Confederacy from the land side. The Federals are now poised to conduct military operations toward the interior of the state; to facilitate this, Schofield orders all railroad tracks in the vicinity repaired.

February 24

MILITARY: General William T. Sherman vigorously protests to General Wade Hampton the alleged murder of several Union soldiers on a foraging expedition. Hampton replies that his government has authorized him to execute any Federals caught burning private property.

February 25

MILITARY: General Joseph E. Johnston arrives at Charlotte, North Carolina, to resume command of the Army of Tennessee and all Confederate forces extant in South Carolina, Georgia, and Florida. He now leads a skeleton force of 25,000 ragged, hungry men and, “In my opinion, these troops form an army far too weak to cope with Sherman.”

NAVAL: Ensign Allen K. Noyes of the armed tug *Catalpa* directs a landing party that defeats Confederate cavalry at Georgetown on the Pee Dee River, South Carolina.

February 26

MARINES: Georgetown, South Carolina, is occupied and garrisoned by a battalion of marines.

February 27

MILITARY: Generals Philip H. Sheridan and Wesley Merritt take 10,000 cavalry down the Shenandoah Valley toward Lynchburg, Virginia, intending to sever the Virginia Central Railroad and the James River Canal. Their force includes the 1st Cavalry Division of General Thomas C. Devlin and the 3rd Cavalry Division of General George A. Custer.

March 1

NAVAL: Rear Admiral John A. Dahlgren’s flagship, the side-wheel steamer *Harvest Moon*, strikes a mine in Winyah Bay, South Carolina, and sinks.

March 2

MILITARY: The 3rd Cavalry Division of General George A. Custer clatters up to Waynesboro, Virginia, where it observes 2,000 Confederates of General Gabriel C. Wharton's division drawn up on a ridge line, supported by a few hundred cavalry under General Thomas L. Rosser. Custer quickly perceives that Wharton lacks the manpower to cover both his flanks and so dispatches three dismounted regiments to encircle the Confederate left. He then sounds the advance, and his flankers burst through the woods on Wharton's flank while Custer leads his two remaining brigades on a thunderous charge through the Confederate center. The Southerners simply dissolve under the onslaught, and General Jubal A. Early and his staff flee from the field. Custer takes 1,600 prisoners, 17 flags, 11 cannon, and 200 wagons for a loss of nine dead and wounded.

March 3

POLITICS: President Abraham Lincoln, acting through Secretary of War Edwin M. Stanton, instructs General Ulysses S. Grant to ignore any of General Robert E. Lee's intimations toward peace unless he surrenders first.

- The Bureau of Refugees, Freedmen, and Abandoned Lands is created as an autonomous agency within the War Department to handle the pressing issue of emancipated African-American slaves.

March 4

NAVAL: A Confederate force under Brigadier General Philip D. Roddey is captured at Muscle Shoals, Alabama, by the side-wheel gunboats *General Burnside* and *General Thomas*.

March 6

MILITARY: The 600-man expedition of General John Newton encounters Confederate resistance under General William Miller at Natural Bridge, Florida. The Federals make repeated attempts to outflank them but find Southern defenses too strong to storm. When Miller is reinforced to a strength of 1,000 men, Newton falls back and entrenches on an open pine barren. This minor Confederate victory prevents the state capital at Tallahassee from being attacked.

March 7

POLITICS: Admiral David D. Porter testifies before Congress, proffering some salty commentary as to the leadership abilities of Generals Benjamin F. Butler and Nathaniel P. Banks.

March 8

SLAVERY: The Confederate Congress authorizes African-American slaves to bear arms for military service on a vote of 9 to 8.

March 9

MILITARY: General Robert E. Lee warns Confederate secretary of war John C. Breckinridge about endemic supply shortages and declares, "Unless the men and animals can be subsisted, the army cannot be kept together, and our present lines must be abandoned."

- The Battle of Kinston, North Carolina, unfolds as General Braxton Bragg attacks soldiers of General Jacob D. Cox's XXII Corps. He does so by dispatching General Robert F. Hoke's division on a flank attack that dislodges Federals

under General Samuel P. Carter, while General Daniel H. Hill undertakes a similar move against the Union right. However, neither commander can dislodge a second Union line commanded by General Thomas H. Ruger, and the Southern offensive stumbles. Bragg then orders his men across the Neuse River and back into Kinston. Union losses are 1,257 while the Confederates suffer only 134.

March 10

MILITARY: Covered by an early morning fog, Confederate cavalry led by Generals Wade Hampton and Joseph Wheeler successfully attack sleeping cavalry of General Hugh J. Kilpatrick at Monroe's Crossroads, North Carolina. Kilpatrick, surprised and clad only in his undershirt, narrowly evades capture as the Southerners under General Matthew Butler gallop through his camp, sweeping up all in their path. The Federals gradually rally and recapture their bivouac, and Hampton withdraws in good order back to Fayetteville. Kilpatrick insists that his losses are no greater than 190, while killing 80 Confederates and taking 30 prisoners. The affair will become popularly known on both sides as the "Battle of Kilpatrick's Pants."

March 11

POLITICS: President Abraham Lincoln declares an amnesty for all army and navy deserters returning to their units within two months. Failure to do so will result in a loss of citizenship.

March 12

NAVAL: While dredging the Blakely River, Alabama, the tug *Althea* strikes a mine and sinks.

March 13

POLITICS: Desperate to secure additional manpower, President Jefferson Davis reluctantly signs the "Negro Soldier Law," allowing slaves to serve in the Confederate army. The legislation implies that individuals who serve may be manumitted at a later date with the permission of their owner and state legislatures. Had such pragmatic measures been approved earlier, the additional men may have mitigated continual Confederate personnel shortages and wielded a positive impact on the Southern war effort.

March 15

MILITARY: General William T. Sherman orders his army out of Fayetteville, North Carolina, and toward Goldsboro. Meanwhile, Union cavalry under General Hugh J. Kilpatrick advance to Averysboro and headlong into General William J. Hard-ee's division of 6,000 men, strongly posted with a swamp on their right and the Black River to their left. Kilpatrick backs off until additional Federal forces can come up.

March 16

MILITARY: The Battle of Averysboro erupts as General Hugh J. Kilpatrick orders the 8th Indiana Cavalry forward. These push back skirmishers from Colonel Alfred Rhet's brigade. but then are stopped cold by the main Confederate body under General Lafayette McLaws. All four divisions of the Union XX Corps under General Henry W. Slocum then deploy on the field and drive the Southerners back behind their fieldworks. Fighting continues as the Union troops attempt to

flank McLaws, with scant success, and the battle unwinds by nightfall. General William J. Hardee subsequently orders the Confederates to fall back upon Smithville, which they accomplish without incident.

March 17

MILITARY: General Edward R. S. Canby begins his drive toward Mobile, Alabama, with 32,000 men of the XVI and XII Corps; his opponent, General Dabney H. Maury, musters only 2,000 rank and file. Canby intends to catch the city in a pincer, with one column under General Frederick Steele proceeding out of Pensacola to the east as he leads another force from the west along the shore of Mobile Bay. However, progress will be slow owing to the muddy condition of the roads, and corduroy has to be laid to allow the passage of heavy artillery.

March 19

MILITARY: The Battle of Bentonville, North Carolina, commences as General Henry W. Slocum orders General William P. Carlin's XX Corps down the Goldsboro Road toward Cole's Plantation. En route he encounters large numbers of heavily entrenched Confederates and halts. Desperate fighting breaks out along the line as hard-charging Southerners fail to break through Union lines. The conflict winds down with nightfall as both sides bring up additional reinforcements.

March 20

MILITARY: The right wing of General William T. Sherman's army under General Oliver O. Howard marches toward Bentonville, North Carolina, to reinforce the left wing under General Henry W. Slocum. His arrival boosts Union numbers to 60,000—three times the size of his Southern opponent. Confederates under General Joseph E. Johnston, meanwhile, continue strengthening their fortifications and are especially eager to protect Mill Creek Bridge, their only escape route, from being seized.

March 21

MILITARY: The Battle of Bentonville resumes as General William T. Sherman dispatches General Joseph A. Mower's division to turn the Confederate left and rear while the main Union force demonstrates to their front. Mower makes surprisingly good progress and nearly reaches Mill Creek Bridge before being violently assailed on both flanks and driven back. But General Joseph E. Johnston lacks the manpower to follow up his success, and he orders the army to withdraw northwest toward Smithville. Bentonville is the last conventional clash of the Civil War, and both sides perform admirably. Union casualties are 1,646 to a Confederate tally of 2,606.

March 22

MILITARY: General James H. Wilson, at the head of 13,500 Union cavalry, crosses the Tennessee River from Gravelly Springs, Tennessee, and gallops into northern Alabama. His objective is to seize the Confederate munitions center at Selma and command the divisions of Generals Edward M. Cook, Eli Long, and Emory Upton; this is also the largest cavalry force ever fielded in American military history. Wilson, determined to confuse the defenders while en route, divides his command into three columns and takes three separate but mutually supportive routes

March 23

MILITARY: The combined forces of Generals William T. Sherman and John M. Schofield, numbering in excess of 100,000 men, unite at Goldsboro, North Carolina. Thus far Sherman has covered 425 miles from Savannah, Georgia, in only 50 days and without major mishap. It is a logistical and organizational triumph that far exceeds his better known “March to the Sea” in complexity and difficulty.

March 24

MILITARY: General Robert E. Lee, in light of his slowly eroding defenses in and around Petersburg, Virginia, conceives his final tactical offensive of the war. He orders General John B. Gordon to take elements of several Confederate corps and seize a portion of nearby Union lines. A breakthrough would undoubtedly force General Ulysses S. Grant to concentrate his forces near the break, thereby allowing the Army of Virginia to slip out of Petersburg and join General Joseph E. Johnston in North Carolina.

- President Abraham Lincoln arrives at Fortress Monroe, Virginia, prior to meeting with Generals Ulysses S. Grant and William T. Sherman at City Point.

NAVAL: The Confederate ironclad ram *Stonewall Jackson* sails from El Ferrol, Spain, under Commander Thomas J. Page while the out-gunned blockading vessels *Niagara* and *Sacramento* under Commander Thomas T. Craven make no attempt to interfere; Craven will be court-martialed for failing to engage the enemy.

March 25

MILITARY: At 4:00 P.M., the Battle of Fort Stedman, Virginia, begins as Confederate pioneer companies silence outlying Union pickets and remove their abatis. Then General John B. Gordon launches 11,000 Southerners into Union trenches near Fort Stedman, surprising the defenders and capturing the fort and Batteries X, XI, and XII. However, General John Hartranft leads 4,000 men back to the trenches, recaptures Fort Stedman, and forces Gordon’s veterans back. Lacking the manpower necessary to contest the Union advance, the Confederates fall back in disorder, losing 3,500 men, including 1,500 prisoners. Union casualties amount to 1,044; Lee now has little recourse but to prepare to abandon Petersburg.

March 27

NAVAL: Secretary of the Navy Gideon Welles expands the search for the Confederate raider *Shenandoah* by dispatching the screw sloop *Wyoming*, the screw sloop *Wachusett*, and the steam sloop *Iroquois*; their elusive quarry will never be caught.

March 28

MILITARY: President Abraham Lincoln, Generals Ulysses S. Grant and William T. Sherman, and Admiral David D. Porter confer on the steamship *River Queen* to discuss postwar policy toward their former adversaries. Lincoln, fearful of continuing guerrilla activity, instructs them to offer generous terms to the vanquished in order to bring them back into the fold quickly.

NAVAL: The ironclad monitor *Milwaukee* under Commander J. H. Gillis strikes a mine in the Blakely River, Alabama, and sinks in an hour.

March 29

MILITARY: The ironclad monitor *Osage* under Lieutenant Commander W. M. Gamble is sunk in the Blakely River, Alabama, by a Confederate mine.

March 31

MILITARY: Union forces under General Philip H. Sheridan continue turning the Confederate right flank at Dinwiddie Court House, Virginia, when he is suddenly assailed in the left flank by General George E. Pickett's division and violently shoved back. Pickett, cognizant of how dangerously thin his force is stretched, withdraws to Five Forks under cover of darkness. Moreover, General Robert E. Lee fears for the precariousness of his perimeter and explicitly instructs him to "Hold Five Forks at all hazards."

April 1

MILITARY: The Battle of Five Forks, Virginia, begins as General Philip H. Sheridan orders cavalry under Generals George A. Custer and Thomas C. Devlin to slash at the Confederate right flank while his remaining forces engage and pin them frontally. Inexplicably, Confederate generals George E. Pickett and Fitzhugh Lee are absent as the struggle develops, being at a fish bake several miles to the rear. Sheridan orders his cavalry to charge the entire Confederate line, and it buckles and breaks. Victory at Five Forks costs the Union 986 casualties while the Confederates lose 4,400 men in addition to 11 flags and four cannon. Worse still, General Robert E. Lee has no recourse but to abandon Richmond to save his army from encirclement.

- Union cavalry under Generals Eli Long and Emory Upton press 1,500 Confederate cavalry under General Nathan B. Forrest at Ebenezer Church, Alabama, where he waits the arrival of General James R. Chalmers's division. At 4:00 P.M., the first Union wave under General Long gallops forward, crashes into the Confederate center, and is repulsed. Another part of Upton's men hits Forrest's center-left, held by Alabama militia, and they bolt and collapse the entire line. Federal losses amount to 12 dead and 40 wounded versus a Confederate tally of 300, mostly captured.

NAVAL: The tinclad *Rodolph* under Master N. M. Dyer sinks in the Blakely River, Alabama, after striking a Confederate mine.

April 2

MILITARY: General Ulysses S. Grant decisively orders an all-out assault on Confederate defenses ringing Petersburg, Virginia. At 4:30 A.M., General Horatio G. Wright's VI Corps storms the Southern right at Fort Fisher, as far as Hatcher's Run, and fatally ruptures General Robert E. Lee's lines. The XXIV Corps also charges down Boydton Plank Road, routing the defenders while the redoubtable general Ambrose P. Hill is killed rallying his men.

- General Robert E. Lee orders the immediate evacuation of Petersburg, Virginia, and advises President Jefferson Davis to relocate the seat of Confederate governance far from Richmond. Thus the siege of Petersburg, which commenced on June 15, 1864, terminates with Union losses of 5,100 killed, 24,800 wounded, and 17,500 captured; Confederate losses over this same period are variously estimated at between 28,000 and 38,000.

- General James H. Wilson arrives before Selma, Alabama, a heavily fortified city guarded by 5,000 men under General Nathan B. Forrest. Wilson immediately dispatches General Eli Long's division to attack the Confederate right while dismounted; the troopers cross 600 yards of open space, taking heavy losses. Wilson then decides to settle the issue with a thundering charge down the Selma Road, which finally scatters the defenders. Forrest's losses are 2,700 captured and 102 cannon seized; Union casualties are 46 dead, 300 wounded, and 13 missing.
- As Confederate defenses around Richmond, Virginia, collapse, a greatly relieved president Abraham Lincoln telegraphs General Ulysses S. Grant, "Allow me to tender to you, and all with you, the nation's grateful thanks for this additional and magnificent success."

April 3

MILITARY: Union forces under General Godfrey Weitzel, commanding the largely African-American XXV Corps, prepare to occupy Richmond, Virginia. At 5:30 A.M., he sends forward an advance party under Major Atherton H. Stevens, which is received by civil authorities at city hall. Richmond then formally capitulates to Union forces, which promptly raise the Stars and Stripes over the state capitol. President Abraham Lincoln, visiting General Ulysses S. Grant in Petersburg, happily declares, "Thank God I have lived to see this. It seems to me that I have been dreaming a horrid dream for four years, and now the nightmare is gone."

NAVAL: Admiral Raphael Semmes, pursuant to orders of Confederate secretary of the navy Stephen Mallory, scuttles the James River Squadron and collects his sailors into a naval brigade under the command of General Robert E. Lee. They are initially deployed around Danville, Virginia.

April 4

POLITICS: President Abraham Lincoln ventures up the James River to Richmond, Virginia, aboard the *Malvern*. Once ashore, he is escorted by Admiral David D. Porter and 10 sailors to the Confederate White House, all the while being greeted by throngs of former African-American slaves.

April 5

MILITARY: General Robert E. Lee, preparing to depart Amelia Court House, Virginia, is joined by the troops of General Richard S. Ewell, bringing his strength up to 58,000. Lee then determines to attack Union forces under Generals Philip H. Sheridan and George G. Meade directly in his path at Jetersville and cut his troops free. Three divisions under General James Longstreet are readied to march, but Lee cancels the move and instead opts for a night march around the Union left flank, followed by a quick dash to Farmville, where promised supplies should be waiting. Federal forces continue milling around their fortifications until 10:30 P.M., when General Ulysses S. Grant arrives to personally supervise a pursuit.

April 6

MILITARY: The Battle of Saylor's Creek unfolds as the Army of Northern Virginia, retreating from Amelia Court House to Farmville, Virginia, inadvertently separates into three parts. Closely pursuing Union forces are thus able to exploit gaps between the commands of Generals Richard S. Ewell, Richard H. Anderson, and John B. Gordon with disastrous effect. The Southerners initially repulse the

Union advance as they pour over the flooded creek, but the Union division of General George W. Getty effectively flanks the defenders. Ewell's entire line is promptly double-enveloped and he surrenders 3,400 prisoners. A similar drama develops to Ewell's right-rear, where a Union cavalry division under General Wesley Merritt attacks General Richard H. Anderson's corps. Here the weak formations of Generals George E. Pickett and Bushrod Johnson dissolve in the face of a mounted charge by General George A. Custer. As Southern defenses buckle, Anderson's survivors flee into the woods, and Federal troops round up another 2,600 captives, 300 wagons, and 15 cannon. The final act occurs on the Confederate left, where 17,000 men of Union general Andrew A. Humphreys's II Corps engage General John B. Gordon's rear guard, numbering only 7,000. Gordon is protecting a Southern wagon train bogged down in the mud, and Humphreys quickly sends a strong column around his left. Gordon abandons the field to save his command, although an additional 1,700 men are taken prisoner. Saylor's Creek proves a black day for the Army of Northern Virginia, which loses 7,700 men and eight generals—one-fifth of its entire strength. Union losses amount to only 166 killed and 982 wounded.

- An anxious President Abraham Lincoln, upon hearing that General Robert E. Lee might capitulate if cornered, implores General Ulysses S. Grant to "Let the thing be pressed."

April 8

MILITARY: Rather than surrender, General Robert E. Lee seeks to break through Union cavalry under General Philip H. Sheridan blocking his path at Appomattox Court House. At a council of war held late that night, Lee and his generals agree to attack Sheridan in the morning, then press on to Lynchburg.

NAVAL: A sustained naval bombardment forces Spanish Fort and Fort Alexis at Mobile, Alabama, to capitulate, thereby clearing the way for a general assault on Mobile itself.

April 9

MILITARY: Palm Sunday. General Robert E. Lee directs Generals John B. Gordon and Fitzhugh Lee to attack General Philip H. Sheridan's forces at Appomattox Court House, Virginia. The Federal troopers are gradually dislodged from their position when Lee discerns General Edward O. C. Ord's entire Army of the James drawn up in battle formation behind Sheridan. He finally acknowledges the futility of further fighting and parleys with Union authorities to discuss surrender terms.

- At 1:30 P.M., General Robert E. Lee, accompanied only by his secretary, meets with General Ulysses S. Grant and formally surrenders the Army of Northern Virginia at Appomattox Court House, Virginia. The terms proffered by Grant are generous: All of Lee's 30,000 survivors are paroled and allowed to go home, officers are permitted to retain side arms, and all horses and mules remain with their rightful owners. As a final sop, Union forces issue 25,000 rations to the half-starved Confederates. The harsh and bloody Civil War, the most costly conflict in American history, reaches a humane and dignified denouement.

- Fort Blakely at Mobile, Alabama, is besieged by 45,000 Federal troops once General Frederick Steele is joined by the main Union force under General Edward

R. S. Canby. An assault force of 16,000 then attacks the Confederate defenses at noon, covered by the fire of 37 fieldpieces and 75 siege guns. Their efficiency prompts General St. John R. Liddell to surrender after 20 minutes of fighting. Union losses are 113 killed and 516 wounded while the Southerners incur 629 casualties and 3,423 men and 40 cannon captured.

April 10

MILITARY: General Robert E. Lee issues Order No. 9 and thanks the men and officers of the Army of Northern Virginia, who have served him famously over the past three years, in victory and now defeat. “With an increasing admiration of your constancy and devotion to your country,” Lee writes, “and a grateful remembrance of your kind and generous consideration of myself, I bid you an affectionate farewell.”

- No sooner is word received of General Robert E. Lee’s surrender than President Abraham Lincoln, addressing an enthusiastic crowd in Washington, D.C., orders a military band to strike up “Dixie,” declaring it a personal favorite.

April 12

MILITARY: The vaunted Army of Northern Virginia formally capitulates at Appomattox Court House, Virginia, to General Joshua L. Chamberlain. As General John B. Gordon leads a column of 28,000 weather-beaten Southerners along the Richmond Stage Road, completely lined by Union forces, his men present arms to the solemn procession. The salute is returned in kind.

- Union cavalry commanded by Brigadier General James H. Wilson clatter into Montgomery, Alabama, meeting scant resistance.

April 13

MILITARY: Secretary of War Edwin M. Stanton orders the military draft suspended and also reduces supply requisitions.

NAVAL: The armed tug *Ida* under Ensign F. Ellms strikes a Confederate mine near Choctaw Pass, Mobile Bay, Alabama, and is sunk.

April 14

POLITICS: In his final cabinet meeting, President Abraham Lincoln reiterates his call for reconciliation with the South, then repairs to Ford’s Theater in Washington, D.C., to attend the play *Our American Cousin*. At 10:15 P.M., Lincoln is suddenly shot by actor John Wilkes Booth, who escapes. Meanwhile, Secretary of State William H. Seward, recovering in his home from a recent accident, survives an assassination attempt by Lewis Powell. Secretary of War Edwin M. Stanton declares martial law throughout the District of Columbia and initiates a massive dragnet to snare the assassins.

MILITARY: General Robert Anderson hoists the American flag over the battered remnants of Fort Sumter, Charleston Harbor, South Carolina. It is the identical standard lowered by him on April 14, 1861.

NAVAL: Off Mobile, Alabama, the gunboat *Sciota* strikes a mine and sinks.

April 15

POLITICS: President Abraham Lincoln dies at 7:22 A.M., leaving Secretary of War Edwin M. Stanton to sadly declare, “Now, he belongs to the ages.” Vice President Andrew Johnson is then sworn in as the nation’s 17th chief executive by Chief

Justice Salmon P. Chase; Johnson's first request is to ask members of Lincoln's cabinet to retain their offices.

April 16

MILITARY: General James H. Wilson's army occupies Columbus, Georgia, after brushing aside a hodgepodge collection of Confederates and militia, taking 1,200 captive and 52 cannon. The victorious troopers then commence burning several factories, 100,000 bales of cotton, 15 locomotives, and 200 railcars. Another column under General Edward M. McCook seizes West Point, destroying an additional 19 locomotives and numerous railcars.

April 17–25

NAVAL: Suspects implicated in the assassination of President Abraham Lincoln are retained on the ironclads *Montauk* and *Saugus* off the Washington Navy Yard, Washington, D.C.

April 18

MILITARY: Confederate forces under General Joseph E. Johnston agree to surrender 37,000 men to General William T. Sherman at Durham Station, North Carolina. However, terms of their "Memorandum or Basis of Agreement" will be viewed in Washington, D.C., as overly generous and disavowed. Sherman will also be accused of overstepping his authority and ordered to renegotiate the pact with the identical terms used at Appomattox.

April 20

MILITARY: In Washington, D.C., General Henry W. Halleck is removed as chief of staff, owing to a dispute with General William T. Sherman, and is reassigned to the Military Division of the James in Virginia. Here he begins the work of reconstruction.

- The town of Macon, Georgia, falls to a Union cavalry column under Brigadier General James H. Wilson.

April 22

NAVAL: At Mound City, Illinois, the side-wheel steamer *Black Hawk* under Lieutenant Commander James A. Greer catches fire and sinks.

April 23–24

NAVAL: Lieutenant Charles W. Read leads the Confederate side-wheel ram *Webb* down the Mississippi River in an attempt to make for the open sea. He passes New Orleans at night, then encounters the steam sloop *Richmond* and is run aground. Read and his crew are apprehended in a nearby swamp.

April 24

POLITICS: President Andrew Johnson formally rejects the surrender agreement reached between Generals William T. Sherman and Joseph E. Johnston. He dispatches General Ulysses S. Grant to Raleigh, North Carolina, to personally inform Sherman of his displeasure.

April 25

CRIME: Union troops chase assassins John Wilkes Booth and David E. Herold to Bowling Green, Virginia, just south of the Rappahannock River. The two fugitives seek refuge in a barn belonging to farmer Richard H. Garrett.

April 26

MILITARY: Generals Joseph E. Johnston and William T. Sherman meet again at Durham Station, North Carolina, and renegotiate a surrender agreement with identical terms to those offered at Appomattox, Virginia.

April 28

NAVAL: At 2:00 A.M., boilers on the steamer *Sultana* explode with a deafening roar, hurling crew and passengers alike into the frigid waters of the Mississippi River. By the time help finally arrives from Memphis, Tennessee, two hours later, over 1,700 people have perished from burns and hypothermia. Only 600 are fished from the waters alive. *Sultana* is the single biggest disaster in United States maritime history.

- The body of John Wilkes Booth is examined on board the ironclad *Montauk* while anchored off the Washington Navy Yard, Washington, D.C.

April 30

MILITARY: General Edward R. S. Canby holds preliminary talks with General Richard Taylor at Mobile, Alabama, as to the latter's forthcoming capitulation. Afterward, Taylor returns to his headquarters at Meridian, Mississippi, and makes preparations to surrender.

May 1

POLITICS: President Andrew Johnson calls for a board of nine army officers to try the eight individuals accused of participating in Abraham Lincoln's assassination.

MILITARY: The War Department issues General Order 79 to begin demobilizing the 1,052,038 soldiers and volunteers composing the Union army.

May 4

MILITARY: General Richard Taylor formally surrenders all Confederate forces east of the Mississippi River to General Edward R. S. Canby at Citronelle, Alabama. He receives the identical terms proffered to General Robert E. Lee at Appomattox and is allowed to employ steamships to send his men home.

May 6

POLITICS: President Andrew Johnson appoints General David Hunter to head the military commission tasked with trying those implicated in the assassination of President Abraham Lincoln. The accused are prosecuted by Joseph Holt, Judge Advocate General, U.S. Army.

May 10

MILITARY: President Andrew Johnson declares armed resistance "virtually at an end," although sporadic skirmishes persist in rural parts of the South.

- President Jefferson Davis and his wife Varina are captured near Abbeville, Georgia, by men of the 1st Wisconsin Cavalry under Lieutenant Colonel Benjamin Pritchard—part of General James H. Wilson's command. The arrest signals the end of Confederate governance.
- Dreaded Confederate guerrilla William C. Quantrill is mortally wounded and captured in a Union ambush near Taylorville, Kentucky. He dies in prison shortly afterward.

May 12

SOCIETAL: President Andrew Johnson appoints General Oliver O. Howard to head the new Freedmen's Bureau.

May 13

MILITARY: Colonel Theodore H. Barrett arrives in Texas to take command of Union troops under Colonel David Branson. He then leads them into combat at Palmetto Ranch, where they engage a force of Confederate cavalry under Colonel John S. Ford, who deftly outflank the overconfident Federals. Barrett promptly falls back, hotly pursued by the Southerners, who chase him for 17 miles. Union losses are estimated at 130 killed, wounded, and captured; the Confederates are thought to have suffered far less. Palmetto Ranch is the last pitched Civil War encounter west of the Mississippi River.

May 19

NAVAL: Confederate commander Thomas J. Page, having learned that the Civil War has ended, turns over his powerful ironclad vessel *Stonewall Jackson* to Spanish authorities at Havana, Cuba.

May 20

NAVAL: The U.S. Naval Academy falls under the investigatory powers of a board commissioned by Secretary of the Navy Gideon Welles; every aspect of the institution is being reviewed.

May 23

MILITARY: The Grand Army of the Republic parades in a mass review at Washington, D.C., and flags are permitted to fly at full mast for the first time in four years. Sadly, not one of the 166 African-American regiments raised during the war is allowed to participate in the festivities.

- The army of General William T. Sherman, sporting a much looser appearance than the spit-and-polish Army of the Potomac, victoriously tramps its way through Washington, D.C. Sherman still seethes over his contretemps with Secretary of War Edwin M. Stanton and the surrender terms imposed on General Joseph E. Johnston, and so he refuses to shake Stanton's hand.

May 26

MILITARY: General Simon B. Buckner, representing General Edmund Kirby Smith, surrenders to General Edward R. S. Canby's deputy, General Peter J. Osterhaus, at New Orleans, Louisiana. This completely dissolves all remaining Confederate forces west of the Mississippi River. General Joseph O. Shelby, however, angrily spurs 1,000 followers southward into Mexico to help found a military colony.

- Lieutenant Thomas W. Custer is awarded his second Medal of Honor for valor in combat; he is the first person so decorated.

June 2

MILITARY: General Edmund Kirby Smith formally surrenders Confederate forces at Galveston, Texas, to General Edmund J. Davis. The articles of capitulation are signed aboard the *Fort Jackson*.

June 3

NAVAL: The Navy Department reconstitutes the Mediterranean Squadron.

June 9

NAVAL: In a major peacetime reorganization, the East and West Gulf Squadrons are consolidated into the new Gulf Squadron, headquartered at Pensacola, Florida, while the North and South Atlantic Blockading squadrons are joined into the new Atlantic Squadron.

June 22

NAVAL: Confederate raider *Shenandoah* under Lieutenant James I. Waddell fires the last shots of the Civil War while capturing 10 Union whalers in the Bering Sea. From his captives, Waddell hears rumors that the war has ended, but disbelieves them.

June 23

INDIAN: General Stand Watie surrenders his Confederate Cherokee at Doaksville, Indian Territory (Oklahoma). He is the last ranking Confederate officer to lay down his arms.

NAVAL: President Andrew Johnson declares the Union naval blockade of all Southern states officially ended.

June 30

MARINES: At the end of hostilities, Marine Corps manpower is 87 officers and 3,773 enlisted men.

July 6

MILITARY: General Ulysses S. Grant, in an attempt to curb rising racial violence against former African-American slaves by disgruntled Southerners, issues a general order for military personnel to arrest any civilian suspected of crimes against either blacks or soldiers.

July 7

MILITARY: In Washington, D.C., the army hangs Mary Suratt, Lewis Paine, David Herold, and George Atzerodt for their roles in the assassination of President Abraham Lincoln.

July 11

INDIAN: Near Fort Laramie (Wyoming), a detachment of the 7th Iowa Cavalry is attacked by more numerous Sioux, yet repels them after killing 20 warriors.

July 27

INDIAN: Marauding Sioux warriors attempt to overrun the Platte Bridge Station, defended by men of the 11th Ohio and 11th Kansas Cavalry, and are repulsed with loss.

July 31

NAVAL: Commodore Henry H. Bell is appointed commander of the newly reconstituted East Indies Squadron.

August 2

NAVAL: Lieutenant James I. Waddell of the *Shenandoah* learns from the British vessel *Barracouta* that the Civil War has ended in a complete Union victory. Fearing that he and his crew will be charged with piracy, and ignoring protests from many sailors, Waddell orders the vessel to make way for England.

August 12

NAVAL: Rear Admiral Sylvanus Gordon assumes command of the new Brazilian Squadron at Bahia, Brazil.

August 28

NAVAL: Admiral David D. Porter is appointed the sixth superintendent of the U.S. Naval Academy, and he will orchestrate its transfer back to Annapolis, Maryland, from Newport, Rhode Island. Porter will serve four years there, rising to vice admiral.

September 1

EDUCATION: Former general Robert E. Lee becomes president of Washington College, Virginia.

November 3

NAVAL: Secretary of the Navy Gideon Welles instructs all U.S. Navy vessels to render proper honors upon entering English ports. This diplomatic nicety is resumed once the British government retracts belligerent status from the now defunct Confederacy.

November 5

NAVAL: Lieutenant James I. Waddell docks the *Shenandoah* at Liverpool, England, after covering 58,000 miles and seizing 38 Union prizes. His is the final Confederate flag struck. Following a few days of confinement, Waddell and his crew are released by British authorities and allowed to depart.

November 10

MILITARY: Captain Henry Wirz is hung by Union authorities for his role as commandant of the notorious Andersonville Prison, Georgia. Under his tenure, more than 10,000 Union prisoners perished in squalid conditions; he is the only Confederate military officer so punished.

December 4

NAVAL: Secretary of the Navy Gideon Welles reconstitutes the West Indies Squadron under the aegis of Commodore James S. Palmer.

December 27

NAVAL: Secretary of the Navy Gideon Welles issues his final wartime report to the president, declaring U.S. Navy strength at no less than 700 warships of every description—a far cry from the 42 vessels in commission at the start of hostilities. During this same period, manpower levels mushroomed from 7,600 to 51,000 men. Welles also lauds the successful Union blockade, which, while less dramatic than events on land, played a major role in the economic and strategic collapse of the Confederacy.

INTRODUCTION

The United States had no sooner been reunified in 1865 at the end of the Civil War than conflict arose with the numerous Plains tribes of the Far West. Over the next 25 years the U.S. Army engaged in the bloody business of Indian fighting from Texas to North Dakota through the simple expedient that Native Americans living there determined to preserve their ancestral way of life. In the end, superior numbers and technology prevailed, but not without startling upsets, such as the Fetterman Massacre or Custer's Last Stand. The last bloody engagement at Wounded Knee in 1890, in many respects more a massacre than a battle, marked the close of a bloody chapter in American military history that lasted nearly three centuries. Concurrent with the Indian wars, the nation also found itself assuming more and more of an international profile, although its military and naval establishments lagged behind those of the European powers. By the time the country embarked on war with Spain in 1898, the navy had been strengthened and it performed adequately, but the army remained woefully inadequate for the invasion of Cuba. Not only were heavy casualties incurred at the hands of Mauser-armed Spanish soldiers employing the latest smokeless gunpowder, but also outdated medical and sanitary practices led to thousands of deaths through disease. Under more competent leadership, the military performed better against Filipino insurgents and Chinese Boxers in the early 20th century, and the adoption of a German-style general staff also facilitated smoother command functions and badly needed reforms. The dispatch of the Great White Fleet around the world by President Theodore Roosevelt also put the world on notice that America was a rising power on the international stage. Nonetheless, with the onset of World War I a decade later, the United States still remained manifestly unprepared for conflict on so vast a scale. Even in the field of aviation, which the Americans had pioneered, the country lagged far behind European standards in terms of numbers and equipment. Fortunately, the nation overcame these deficiencies in striking fashion by impressively harnessing its industrial output and mobilizing its sizable manpower. It did not seem possible in 1917, but a year later the United States fielded one million men who were well armed, well

supplied, and eager for combat. By dint of hard fighting and superb combat leadership, the enthusiastic, but untested, Americans ultimately tipped the balance of power against Germany, and U.S. forces constituted a major contributor to victory in Europe. A decade earlier such prospects might have been unthinkable.

Victory had been achieved but had the lessons been learned? Over the ensuing two decades the United States again reverted to traditional norms of isolationism. Military preparedness suffered as the nation turned its attention to battling the Great Depression. Considerable technological strides had been made, particularly in the field of aviation, but the onset of world war in 1939 found the nation fielding less than one million men under arms. Worse, when America was directly attacked at Pearl Harbor, Hawaii, on December 7, 1941, the price for this military neglect manifested itself in a string of Japanese victories in the Philippines, on Guam, and elsewhere. But, as in World War I, America's sizable population and enormous industrial base were masterfully marshaled to quickly create one of history's largest military establishments. By 1945 the nation not only possessed vast air fleets of super-modern bombers and fighters, but also radar-equipped warships, sophisticated artillery fire control systems and—in a war-winning trump card—the first atomic weapons. Once again the American military surmounted its traditional unpreparedness and proved a decisive factor in victory over the Axis powers, together with great sacrifices by its Allies Great Britain and the Soviet Union. The end of the war found the United States a military colossus astride the globe, a role it had not sought and had no prior experience in. Victory in World War II was reassuring, but the ensuing cold war with the Communist bloc nations posed an entirely new set of perils that would have to be met and overcome in the interest of national survival.

This volume comprises extensive chronological coverage of U.S. military history from 1866 to 1945, including from the final wars with the Plains Indians through victory in World War II. Thematically, entries are listed by service with *Military* denoting army, militia, and National Guard, *Naval* for navy, *Marines* for marines, and *Aviation* pertaining to individual events in the Army Air Service, Army Air Corps, and Army Air Force. *Technology* highlights important inventions with significant military applications as they appear in the time line. Finally, a handful of topical entries such as *Diplomacy* and *Politics* are proffered when necessary for greater clarification. Given the vast geographical expanse covered, this volume also delineates military events by a strictly ordered geographical region (East, South, then West) while naval events are listed by geography (Atlantic, Pacific, then rivers). For World War II, multiple entries are listed in the order of Europe, North Africa, and Asia. Most entries cover single events, but wherever two or more military or naval events fall under a given date, they are listed in this strict geographical order for uniformity. Also, the exact locale is spelled out

in each entry for clarity. Moreover, the scope of this series is inclusive and an “event” might entail coverage of a battle, a noted person’s activities, a congressional law, or a policy respective some facet of the army and navy, such as the debut of a new military weapon or system. Space constraints limit also most entries to a few lines at best, but significant events may command up to a paragraph according to their importance. The text is enhanced by capsule biographies of 50 major military figures. Finally, a bibliography of the latest scholarship on U.S. military history, with subdivisions, to promote ease of use is included. The text is also replete with numerous illustrations and an appendix of maps.

By perusing these pages even a casual reader can grasp the great complexity and richness of the American military experience, which has done so much to influence the history and politics of the nation and the world at large. I am indebted to my editor, Owen Lancer, for accepting this project at my suggestion; it was an arduous endeavor but also a learning experience for which I am much obliged.

—John C. Fredriksen, Ph.D.

CHRONOLOGY

1866

INDIAN: General Philip H. Sheridan declares there are at least 100 million buffalo presently ranging the western prairies and plains. He feels that killing off the bison will deprive hostile Plains Indians of their ability to feed and clothe themselves, inducing their surrender. It is a cold-blooded but completely accurate assessment.

- Army troops under General George Crook engage in a protracted struggle against the Northern Paiute (Snake) Indians, who have been raiding mines in southern Oregon and Idaho. Nearly 50 battles and skirmishes ensue over the next two years.

January 4

NAVAL: The armed tug *Narcissus* strikes the Egmont Reef off the Florida coast and sinks with the loss of all 32 shipmates.

January 9

MILITARY: Union troops open a school for African Americans in an army barracks at Nashville, Tennessee; it is named in honor of General Clinton B. Fisk, head of the Freedman's bureau and the following year it receives a charter as Fisk University.

January 24

MILITARY: Dr. Mary E. Walker is the first woman to receive a Medal of Honor for her services as a spy during the Civil War in 1864, during which time she spent several months in a Confederate prisoner-of-war camp.

January 28

MILITARY: Army officials post a \$30 reward for the apprehension of military deserters, although they are offered amnesty if they turn themselves in before August 1.

March 21

MILITARY: Congress authorizes the first two national soldiers' homes at Dayton, Ohio, and Togus, Maine, for the relief of disabled officers and men.

April 6

MILITARY: In Decatur, Illinois, Dr. B. F. Stephenson and Rev. W. J. Rudolph, formerly of the 14th Illinois Infantry, organize the first chapter of the Grand Army of the Republic, a veterans' organization that comes to total to 409,498 members.

April 30

MARINES: In the Caribbean, a detachment from the *St. Mary's* assists the captain of the mail steamer *Golden City* to quell a riot and restore order.

May 6

NAVAL: The ironclad *Miantonomoh*, accompanied by the side wheel vessels *Ashuelot* and *Augusta*, becomes the first vessel of its class to cross the Atlantic Ocean under its own power after departing from New York. Assistant Secretary of the Navy Gustavus Fox is also onboard to fulfill a technical mission in Europe.

May 13

MILITARY: Colonel Henry B. Carrington and the 18th U.S. Infantry advance up the Bozeman Trail, Wyoming Territory, to commence construction of Fort Phil Kearny. This incursion is greatly resented by Sioux warriors under Chief Red Cloud, who begins mobilizing his people to take up arms against the intruders.

May 29

GENERAL: Winfield Scott, hero of the War of 1812 and Mexican-American War, and progenitor of the "Anaconda Strategy" that led to victory in the recent Civil War, dies at the U.S. Military Academy, West Point, aged 80 years.

May 31–June 1

SOCIETAL: A gathering of 600 Irish veterans of the Civil War, members of the secret Fenian Society, cross the Niagara River from New York into Canada, where they skirmish with local militia before recrossing and being arrested. However, they are gradually released and Canadian damage claims go unpaid.

June

INDIAN: A peace council is summoned at Fort Laramie, Wyoming Territory, between army representatives and Lakota chiefs Red Cloud, Man-Afraid-of-his Horse, and Spotted Tail. At issue is white encroachment along the Bozeman Trail on the Powder River region, and concurrent attacks against miners and settlers. Government agents ply their guests with many gifts, but when it is made clear that the army intends to construct a series of forts in the region, Red Cloud and his entourage storm out of the meeting, promising war.

June 15

MILITARY: A detachment of the 31st Infantry under Captain William G. Rankin begins construction of Fort Buford on the Missouri River in North Dakota. However, being located in the very heart of buffalo hunting grounds, the local Sioux Indians are upset.

June 16

MILITARY: A column commanded by Colonel Henry B. Carrington, guided by noted scout Jim Bridger, arrives at Fort Laramie, Wyoming Territory. After pausing to rest and refit, Carrington continues onto the Bozeman Trail to construct several forts. The nearby Plains Indians are watching these developments closely and with unease.

June 18

MARINES: The House of Representatives issues a resolution from the Committee of Naval Affairs calling for the abolition of the U.S. Marine Corps. During the Civil War, the marines lost only 150 dead and its reputation reaches an all-time nadir.

June 20

MARINES: At New Chwang, China, Lieutenant John W. Philip leads a boatload of 100 sailors and marines from the screw sloop *Wachusett* ashore to hunt for a robber band who assaulted the American consul there.

June 21

NAVAL: Congress establishes the Hydrographic Office to continue ocean mapping activities previously carried out by the pre-Civil War Hydrographical Office. The architect behind this creation is Admiral Charles H. Davis, who installs the office in the Nautical Almanac Office.

June 28

MILITARY: A column under Colonel Henry B. Carrington trudges into a fortified position along the Powder River, Wyoming, and reinforces two companies of infantry already there. After additional construction, the post is rechristened Fort Reno, and Carrington retains one-fourth of his command there.

June 30

MARINES: The strength of the Marine Corps is listed as 79 officers and 3,258 enlisted men.

July 7

MARINES: A detachment from the Portsmouth Navy Yard, New Hampshire, is sent to Portland, Maine, to help restore order following a fire there.

July 10

MILITARY: Captain Henry R. Miner and men of the 18th Infantry construct Fort Sanders near Laramie, Wyoming, to facilitate protection of the Denver–Salt Lake stage route.

July 13

MILITARY: Congress passes legislation to allow an army officer of any branch to head up the U.S. Military Academy, West Point. Prior to this the superintendent was always an engineering officer.

July 14

MARINES: A detachment of sailors and marines are debarked from the *Wachusett* as an escort for the American consul at Tung Chow Foo, China.

July 15

MILITARY: Colonel Henry B. Carrington, 18th Infantry, begins building Fort Phil Kearny on the Bozeman Trail, Montana Territory. Lakota Sioux and Northern Cheyenne warriors, resenting the intrusion, attack a wagon train along Crazy Woman Creek and are repelled by accompanying soldiers. However, this act signals that Chief Red Cloud's war against the United States has commenced.

July 17

INDIAN: The First Sioux War continues as resentful Oglala braves try to stampede the horses and mules belonging to Colonel Henry B. Carrington's command near Fort Phil Kearny, Wyoming. The soldiers mount a pursuit but are driven back into the fort by superior numbers.

July 25

MILITARY: Congress votes to honor Ulysses S. Grant by promoting him to the rank of five-star "general of the army," becoming the first officer since George Washington to hold such stellar rank.

NAVAL: Congress creates the rank of full admiral and bequeaths it first to Vice Admiral David G. Farragut in tribute to his Civil War service. His step brother, David D. Porter, also become's the navy's second vice admiral.

**Red Cloud (1822–1909)***Oglala chief*

Red Cloud (Mahpiua Luta) was born along the North Platte River in Nebraska in 1822 a member of the Oglala Sioux nation. He matured into a fierce and crafty warrior, and he made a reputation for himself among tribesmen as chief of the Bad Face military society. By 1865 he had risen to prominence as chief, just when the United States was preparing to construct an emigrant road through Nebraska and Wyoming into Montana. The Sioux under Red Cloud angrily departed peace talks at Fort Laramie and declared they would fight rather than allow a violation of their territory. Commencing with the Fetterman Massacre of December 21, 1866, Red Cloud led a devastating guerrilla war over the next two years that flummoxed army attempts to contain it. Consequently, travel along the Bozeman Trail became impossible and garrisoning the Forts C. F. Smith, Phil Kearny, and Reno proved hazardous at best. A new agreement was finally reached at Fort Laramie in November 1868, but Red Cloud

did not formally sign until the three forts had been abandoned and burned. Only then did he agree to lay down his arms and relocate to a reservation, the so-called Red Cloud Agency, in Nebraska. Cognizant of the strength of the U.S. government, he thereafter served as a peace missionary and frequently visited Washington, D.C., to plea for better treatment for his people. Red Cloud also met with white audiences in cities throughout the East Coast and asked them to pressure the government to treat Native Americans more fairly. Consequently, the Fort Laramie treaty was revised by Congress and rendered more favorable toward the Oglala.

Persistent white encroachment of the Black Hills regions of South Dakota, held as sacred land by the Sioux and other tribes, resulted in the large Indian uprising of 1876. Restive warriors under Crazy Horse and Sitting Bull took to the field to fight, but Red Cloud expressly forbids braves living on his reservation from taking

July 28

MILITARY: President Andrew Johnson signs an act fixing the postwar military establishment at 45 infantry and six cavalry regiments, totaling 54,302 men. Provisions are also made to recruit 1,000 Native-American scouts. This is the first time that the army has been kept so large after a war, but it falls short of the 80,000 recommended by the commanding general, Ulysses S. Grant. The new force is expected to play a prominent role in Reconstruction activities.

August 1

MILITARY: The War Department issues orders for the hiring of Indian scouts to work with the army on the frontier. Prospective recruits are to receive the same pay and allowances of regular cavalry troopers; 474 are hired in the first year.

the war path. This was a sagacious decision in light of what followed, but Red Cloud's seemingly timid leadership fell out of favor among younger Indians who preferred bellicosity to peace. He may also have had a hand in the arrest and murder of Crazy Horse, whom he regarded as a threat to his leadership. However, the government also suspected Red Cloud was assisting the rebels and, in 1878, ordered his tribe relocated to the Pine Ridge Agency of South Dakota. There the machinations of agent Trant V. McGillicuddy resulted in Red Cloud's dismissal as chief, which further diminished his reputation among the Oglala. Nonetheless, he adamantly opposed his people participating in the Ghost Dance religion and subsequent fighting at Wounded Knee in December 1890. Red Cloud continued living among his people at Pine Ridge, declining in both health and influence, until his death there on December 10, 1909. In his heyday, he was a peerless warrior who not only defeated the United States, but also dictated the terms of peace to the country.

Red Cloud (*Library of Congress*)

August 9

MARINES: Marines from the *Wachusett* are landed to help fight a fire at Shanghai, China.

August 12

MILITARY: In another alarming development for the Plains Indians, Captain Nathaniel C. Kinney, 18th U.S. Infantry, begins construction of Fort C. F. Smith along the northernmost reaches of Wyoming's Bozeman Trail. This places them 90 miles north of Fort Phil Kearny, another major irritant.

August 16

INDIAN: Near Fort Connor, Wyoming, a party of Pawnee, who had been recruited by the army to serve as scouts, attacks and massacres a party of five Cheyenne who mistakenly approach them.

August 20

MILITARY: In Washington, D.C., President Andrew Johnson declares the insurrection over in Texas, which had been omitted in his earlier declaration because a state government was still being formed. The Civil War is now officially over.

August 21

MILITARY: Lieutenant James M. Kerr begins construction of Fort Bayard, New Mexico, for the purpose of protecting miners working in the Santa Rita Mountains.

September 1

INDIAN: On the Tongue River, Montana, a party of 250 cavalry and 80 Pawnee scouts under Brigadier General Patrick E. Connor attacks an unsuspecting Arapaho village led by Little Horse. They sweep into the village, capturing it, then defend their gains with two howitzers. After the Pawnees abscond with 1,000 ponies, Connor withdraws, having killed 50 Indians.

- Noted Navajo leader Manuelito, tired of being hounded and pursued by superior forces, finally surrenders his 23-man band to army troops. The chief and his followers are promptly relocated to the Bosque Redondo Reservation in the New Mexico Territory.

September 8

INDIAN: A running battle erupts along the Powder River, Montana, as a 2,000-man cavalry column under Colonels Samuel Walker and Nelson Cole encounter a force of 400 Sioux warriors led by Sitting Bull. The Indians, noting the worn out condition of their enemies' horses, decided to attack at once. A series of charges and countercharges ensue, during which the Sioux are content to simply knock troopers out of their saddles to embarrass them, until a sleet storm forces the contestants to quit. Afterward, the Indians find the remains of hundreds of dead horses shot by their soldiers, who continued south on foot.

September 21

MILITARY: Two regiments of African Americans, the 9th and 10th U.S. Cavalries, are activated under Colonels Edward Hatch and Benjamin H. Grierson, respectively. In time they gain renown as the "Buffalo soldiers," the name given them by the Plains Indians who fought them.

December 6

MILITARY: Oglala Sioux warriors under Miniconjou attack a wagon train outside Fort Phil Kearny, Wyoming Territory, hoping to lure the relieving force into a trap. Cavalry under Captain William J. Fetterman attack and pursue the elusive Indians as far as Lodge Trail Ridge, then turn back after losing two dead and several wounded. Afterward, the impetuous Fetterman swears to fight the Indians wherever they are found. "Give me eighty men and I'll ride through the entire Sioux nation," he allegedly boasts.

December 21

MILITARY: A force of 2,000 Lakota (Sioux), Arapaho, and Cheyenne warriors under Red Cloud, angered by the intrusion of white soldiers on their traditional hunting grounds, lure a troop of 80 soldiers under Captain William J. Fetterman into a deadly ambush outside Fort Phil Kearny, Wyoming Territory, and wipes them out. Previously, Colonel Henry B. Carrington had specifically warned Fetterman not to venture anywhere near Lodge Trail Ridge, which order he disobeyed. This is the worst defeat suffered at the hands of Plains Indians to that point and precipitates a two-year struggle for control of the Bozeman Trail, Idaho Territory. Because the majority of soldiers were armed with single-shot weapons, the army begins issuing rapid fire weapons to all hands.

December 22

MILITARY: Soldiers under Colonel Henry B. Carrington arrive from Fort Kearny, Montana Territory, to retrieve the bodies of Captain William J. Fetterman's massacred command. The loss of 80 men leaves the fort minus one-fourth of its garrison. Carrington thereby dispatches a civilian volunteer scout, John Philips, on a 235-mile journey back to Fort Laramie to gather reinforcements. He completes his mission on December 24 just as his horse falls dead while entering the gate.

1867

MILITARY: For the first time since the Mexican War, the army updates its drill manual by adopting Colonel Emory Upton's new *Infantry Tactics*. This year, 50,000 obsolete Springfield rifled muskets are also modified to accept breech-loaded metallic cartridges.

February

MILITARY: Throughout this month, Sergeant George Grant, Company C, 18th Infantry, runs dispatches between Forts Phil Kearny and C. F. Smith despite his close proximity to thousands of hostile Sioux and howling blizzard conditions. His intrepidity garners him a Medal of Honor.

February 9

MILITARY: In Washington, D.C., President Ulysses S. Grant signs legislation creating the U.S. Weather Service as a unit within the army. Observations are to be recorded by 22 observer-sergeants with the Signal Corps.

March

INDIAN: Congress, reacting to the recent Fetterman Massacre, passes a bill to establish peace with the warring tribesmen. It calls for a Peace Commission consisting

of four civilians and three generals and a plan to confine all northern Plains Indians on a great reservation in the Black Hills of western Dakota Territory.

March 2

MILITARY: Senator Thaddeus Stevens forces through Congress the Command of the Army Act, whereby all orders issued by the executive must first pass through the commanding General of the Army Ulysses S. Grant. This act prevents President Andrew Johnson from dealing directly with military governors in his capacity as commander in chief. Congress is determined to politically emasculate their uncooperative chief executive.

- Congress votes to increase the pay of all officers below the grade of major general by 30 percent while privates receive the same pay given to volunteers in the Civil War, although for only three years.
- Congress also creates the Civil Engineering Corps, which is partly drawn from former military personnel with engineering experience.

MARINES: Commandant Jacob Zeilin is promoted to brigadier general.

March 11

MILITARY: President Andrew Johnson, as per the will of Congress, appoints five commanders to the five military districts established by the First Reconstruction Act. They command 20,000 occupational troops, including several hundred black militiamen, and are tasked with both registering former slaves to vote and seeing to it that they participate in elections without violence.

March 22

MILITARY: A large column of troops, including the 7th Cavalry, depart Fort Kansas, Kansas, on an expedition to confront and subdue hostile Cheyenne, who have been raiding settlements. Their first stop is Fort Larned, where a large conference with several chiefs is planned by General Winfield S. Hancock.

March 27

MILITARY: When Alabama fails to ratify the Fourteenth Amendment, military rule (Reconstruction) is imposed on that former Confederate state.

April

MILITARY: Captain J. M. Williams leads several companies of the 8th U.S. Cavalry on an extended raid against hostile Apache along the Verde River near Fort Whipple, Arizona; some 50 Indians are slain.

April 7

MILITARY: Following a failed conference at Fort Larned, Kansas, 1,400 troops under General Winfield S. Hancock advance into the Central Plains region with a view toward intimidating the indigenous tribesmen, then harassing the Kansas Pacific Railroad, into submission. Recalcitrant Lakota and Cheyenne villages are singled out for punishment, but the highly mobile Native Americans easily evade their antagonists and counter by attacking wagon trains and stagecoaches.

April 12

MILITARY: General Winfield S. Hancock unsuccessfully parleys with Cheyenne and Sioux chiefs Tall Bull and Pawnee Killer, at the conclusion of which the Indi-

ans slip out of their village; Hancock vindictively burns it. The enraged Indians regard this act as a declaration of war and begin wholesale raiding of settlers and stagecoaches.

April 19

MILITARY: Army troops under General Winfield Scott Hancock burn abandoned Cheyenne and Sioux villages at Pawnee Fork, Kansas, to underscore his displeasure over their continuing raiding activities.

May 1

MARINES: Landing detachments from the steamers *Wyoming* and *Shenandoah* act as escorts to the American minister to Japan during a period of civil war.

June

MILITARY: In light of the Fetterman disaster, the garrison of Fort Phil Kearny are the first troops to receive brand new .50 caliber Springfield breach-loaders. This quadruples the amount of firepower available for engagements with hostile Indians.

June 1

MILITARY: Lieutenant Colonel George Armstrong Custer leads his 7th U.S. Cavalry from Fort Hays, Kansas, into the area between the Platte and Arkansas Rivers to clear it of hostile Sioux and Cheyenne raiding there. Over the next two weeks, splendidly mounted Native Americans avoid the Americans and Custer grows frustrated from lack of action.

June 11

NAVAL: The latest attempt to establish diplomatic relations with the “Hermit Kingdom” of Korea ends tragically when U.S. Navy lieutenant Hugh W. McKee is fatally speared on Kanghoa Island.

June 13

NAVAL: The screw sloops *Wyoming* and *Hertford* under Commander George C. Belknap conduct a punitive raid on the Chinese island of Formosa (Taiwan) in retaliation for the massacre of the crew of the merchant bark *Rover*, which shipwrecked there. A landing party scattered a party of natives, losing Lieutenant Commander Alexander S. MacKenzie in combat and 14 others to sunstroke.

June 14

MILITARY: A detachment of the 31st Infantry under Major Joseph N. G. Whistler begins work on Fort Stevenson, North Dakota, to protect Indians living on the nearby Fort Berthold Agency.

June 18

MILITARY: To discourage the Sioux from further outrages, Captain George H. Crossman and soldiers of the 10th Infantry construct Fort Ransom on the Cheyenne River, North Dakota.

June 19

NAVAL: The screw sloop *Sacramento* under Captain Napoleon Collins is wrecked on a bar off Madras, India, without the loss of life.

June 24

INDIAN: A band of Pawnee attacks the encampment of Lieutenant Colonel George A. Custer, 7th Cavalry, as the troopers repose along the Republican River. The intruders are repulsed but later on appear in the distance to taunt the troopers. Custer dispatches Captain Louis Hamilton and 50 soldiers to pursue them, but they are subsequently ambushed and fall back to the main camp.

June 29

MILITARY: The 9th Cavalry under Colonel Wesley Merritt advances along Limpia Creek, Texas, intending to reestablish Fort Davis. Like the 10th Cavalry, it is primarily recruited from African Americans, who are known to the Indians as “Buffalo soldiers.”

June 30

MILITARY: Fort Shaw is built on the Sun River by Major William Clinton, 13th Infantry, to protect wagon traffic between Helena, Montana Territory, and Fort Benton.

July 7

MILITARY: Lieutenant Colonel George A. Custer breaks up his encampment along the Republican River and sets out for Fort Wallace, Kansas. En route he is alerted that three soldiers have deserted so he orders them hunted down and shot, which is done. He is also on the lookout for a detachment of cavalry under Lieutenant Lyman Kidder, who is carrying new orders for him from General William T. Sherman.

July 11

MILITARY: A column of the 7th Cavalry under Lieutenant Colonel George A. Custer stumbles upon the detachment of Lieutenant Lyman Kidder, which has been ambushed and massacred by hostile Plains Indians.

July 12

MILITARY: Lieutenant Colonel George A. Custer’s command trots into Fort Wallace, Kansas, thoroughly exhausted from chasing elusive Plains Indians.

July 15

MILITARY: Lieutenant Colonel George A. Custer, disgusted by lack of fighting and unaware of General William S. Hancock’s intentions, summarily decides to abandon the field and march back to Fort Hays, Kansas, from the Platte River region. They arrive in slightly over two days, having covered 150 miles of rough terrain in remarkably good time—then Custer rides on from Fort Hays for an additional 60 miles to Fort Harker, where his wife is staying. He is subsequently arrested for taking leave without absence and is suspended from rank and command for a year.

July 17

MILITARY: Fort Totten is established at Devil’s Lake, North Dakota, by Captain Samuel A. Wainwright, 31st Infantry, to protect settlers venturing from Minnesota to Montana.

July 19

MILITARY: Soldiers of the 4th Infantry under Major William McEntyre build Fort Fetterman on the North Platte River, Wyoming, to protect settlers and monitor Indian movements.

July 21

MILITARY: Colonel John D. Stevenson, 30th Infantry, constructs Fort D. A. Russell near present-day Cheyenne, Wyoming, for the protection of railway workers.

July 22

NAVAL: The ironclad *Miantonomoh*, the gunboat *Ashuelot*, and the side-wheel steamer *Augusta* return to the United States after traveling to 10 nations in Europe and covering a distance of 17,700 miles without mishap.

July 31

MILITARY: Lieutenant Colonel Samuel D. Sturgis, 6th Cavalry, constructs Fort Griffin, Texas, on the Clear Fork of the Brazos River as a supply point for Buffalo hunters and to protect cattle trails.

August 1

MILITARY: A roving force of between 500 to 1,000 Sioux and Cheyenne warriors under Dull Knife and Two Moon attack a party of 20 woodcutters under Lieutenant Sigismund Sternberg outside of Fort C. F. Smith on the Bozeman Trail, Montana, Territory. The Indians try to close and overwhelm the defenders but are repulsed by newly issued rapid-fire Springfield rifles in what becomes known as the "Hayfield Fight." Reinforcements from the fort arrive six hours later and the Indians ride off, their losses unknown; the Americans sustain three dead and three injured.

August 2

MILITARY: A band of 1,500 Sioux under Red Cloud attacks a 30-man army detachment outside Fort Phil Kearny, Wyoming Territory, but Captain James W. Powell, 27th Infantry, manages to circle his wagons and repel his assailants with heavy fire from new, breach-loading Springfield rifles. This skirmish becomes celebrated as the "Wagon Box Fight" and is the last pitched encounter of Red Cloud's war. American losses are six dead and two wounded while the Indians are thought to have suffered as many as 60 dead and 120 wounded. Thereafter Red Cloud avoids direct confrontation with army troops and resumes raiding settlers and supply lines.

August 12

POLITICS: When Secretary of War William M. Stanton bluntly informs President Andrew Johnson that the new military governors must answer directly to Congress and not to him, Johnson demands his resignation. Stanton refuses under the terms of the newly passed Tenure of Office Act. The president then suspends his secretary and nominates General Ulysses S. Grant, commanding general of the army, to replace him. Johnson also summarily dismisses existing military governors and replaces them with men of his own, more lenient persuasion.

August 16

MILITARY: Fort Harney is built in Oregon by Lieutenant Colonel George Crook, 23rd Infantry, to put a check on local Indian hostilities.

August 17

INDIAN: At Plum Creek, Nebraska, a party of cavalry under Major Frank North, assisted by 48 Pawnee scouts, come upon an encampment of 150 Cheyenne

warriors who had been tearing up railroad tracks. The Americans and their allies charge into the camp, routing their opponents, who flee in confusion; 15 Cheyenne are slain with no losses to the victors.

August 27

MILITARY: Fort Ellis is built by Captain Robert S. LaMotte, 13th Infantry, on the Bozeman Trail, Montana, for the protection of settlers and miners.

August 28

NAVAL: The screw sloop *Lackawana* under Captain William Reynolds drops anchor at Midway Island in the Pacific, 1,300 miles northwest of Hawaii, and claims that atoll for the United States. Reynolds does so at the behest of the China Mail Steamship Company, which desires to utilize it as a midoceanic coaling station; the name derives from the fact that it lies midway between the ports of San Francisco, California, and Yokohama, Japan. In World War II this seemingly insignificant speck of land will play a significant role.

October 18

MILITARY: Troops of the 9th Infantry and 2nd Artillery under General Lovell H. Rousseau formally take possession of Alaska from Russia.

MARINES: At Sitka, Alaska, it falls upon a small detachment of marines to officially raise the U.S. flag at ceremonies marking the transfer of that region to the United States.

October 21–28

INDIAN: At Medicine Lodge Creek in southwestern Kansas, nearly 7,000 southern Plains Indians gather to sign treaties with the new Peace Commission authorized by Congress. The signatories are then relegated to new reservations with the Kiowa and Comanche taking up residence between the Red and Washita Rivers, while the Southern Cheyenne and Arapaho are lodged between the Cimarron and Arkansas Rivers. For security reasons, the commissioners are accompanied by 600 army troops.

October 29

MILITARY: Major Charles O. Wood and a detachment of the 9th Infantry are the first American forces to occupy Alaskan soil since its purchase. The detachment arrives at the Russian governor's mansion in Sitka to mark the official transfer of that vast territory to the United States.

November 26

MILITARY: Captain Benjamin T. Hutchins, 6th Cavalry, oversees construction of Fort Richardson, Texas, as part of the ever-expanding frontier defense system in that state that is being built to protect settlers and the cattle trade.

December

MILITARY: The army disbands the 125th Colored Infantry, the last African-American infantry unit in the army. Thereafter the few remaining blacks are transferred to the 9th Cavalry and the 10th Cavalry, the "Buffalo soldiers."

December 4

MILITARY: Fort Chadborne is built by Lieutenant Peter M. Boehm, 4th Cavalry, on the middle branch of the Concho River, Texas, as part of the defensive system between El Paso and the Red River.

December 28

MILITARY: Midway atoll, in the Central Pacific, is formally annexed by Congress; this is the first territory formally acquired outside the continental United States.

1868**January 10**

POLITICS: The Senate Committee on Military Affairs issues a report that clears Secretary of War Edwin M. Stanton of any wrongdoing in his decision to resist dismissal.

January 11

POLITICS: General Ulysses S. Grant, commanding general of the army, requests to be relieved of command rather than violate terms of the Tenure of Office Act.

January 14

MILITARY: General Ulysses S. Grant resigns as secretary of war and turns the office back over to its previous occupant, Edwin M. Stanton. President Andrew Johnson is greatly angered by this action, which he considers a political betrayal by Grant.

January 19

MARINES: At Yokohama, Japan, a detachment of marines surrounds the residence of the American minister during a period of civil war.

February 1

MARINES: A landing party from the *Oneida* goes ashore at Hiogo, Japan, to protect American citizens living there from attacks by rebels trying to oust the Tokugawa shogunate; one sailor is wounded.

February 7–26

NAVAL: Rear Admiral Charles H. Davis, commanding the screw sloops *Guerriere* and *Quinnebaug*, along with three smaller vessels, anchors at Montevideo, Uruguay, to protect American interests there during a local insurrection. They depart three weeks later.

February 8

MARINES: A landing detachment of sailors and marines from the screw sloop *Shenandoah* goes ashore at Nagasaki, Japan, to protect the American consul during a period of civil strife.

February 11

NAVAL: The new screw-powered cruiser *Wampanoag* becomes the navy's fastest vessel with a sustained speed of 17 knots, a record not eclipsed until 1889.

February 19

MARINES: Landing parties are again sent ashore at Montevideo, Uruguay, to protect the American consulate during a spate of revolutionary unrest.

April 4

MARINES: A landing detachment of sailors and marines from the steamers *Monocacy* and *Iroquois* goes ashore at Yokohama, Japan, to protect American lives and property during a period of unrest.

April 16

INDIAN: A war band of Sioux under Two Strikes attacks Elm Creek Station, Nebraska, killing and scalping several railroad workers.

April 29

INDIAN: At Fort Laramie, Wyoming, General William T. Sherman signs the Treaty of Fort Laramie with representatives of the Sioux nation, ending a costly frontier conflict. The victorious Red Cloud demands and gets the government to disband all army posts along the Bozeman Trail, Wyoming. Furthermore, all territory east of the Big Horn Mountains and north of the North Platte River are affirmed as exclusively Indian. Several bands of Sioux and Cheyenne also agree to be relocated to reservations in Montana, Wyoming, and the Dakotas, but this remains a significant victory for the Plains Indians.

May 4

MILITARY: Camp Crittenden is established by Captain Stephen G. Whipple, 33rd Infantry, on the Arizona/Mexico border near the Sonita River to protect settlers from marauding Apache bands.

May 30

MILITARY: Memorial Day is first celebrated and General John A. Logan, commanding the Grand Army of the Republic, calls upon Union veterans to decorate military graves with flowers.

- General Ulysses S. Grant, commanding general of the army, is nominated for the presidency by the Republican Party; Grant will campaign in uniform until his victory the following November.

June 1

MILITARY: John M. Schofield, an accomplished Civil War general and a determined military reformer, gains appointment as secretary of war. He serves a year.

June 30

MILITARY: To protect the Union Pacific Railroad, Major Richard H. Dodge builds Fort Fred Steele on the North Platte River, Wyoming; it is designed to replace posts along the Bozeman Trail, since abandoned.

July 1

INDIAN: The army under Colonel George Crook finally prevails in its three-year struggle with the Northern Paiute (Snake) Indians when Chief Old Weawea surrenders at Fort Harney, Oregon. This two-year conflict occasioned nearly 50 pitched battles and resulted in the death of noted leader Pauline and around 500 tribesmen. However, the Americans prevailed largely because of the vigilance and tracking ability of their Shoshone allies.

July 9

NAVAL: The side-wheel gunboat *Suwanee* founders in the Queen Victoria Sound en route to Vancouver, British Columbia; no lives are lost.

July 27

NAVAL: Congress authorizes legislation to allow Japanese midshipmen to attend the U.S. Naval Academy at Annapolis, Maryland, provided their government

bears the cost. A total of 16 Japanese nationals graduate from the academy between 1869 and 1906, and several reach the rank of admiral in their own service.

August 13

NAVAL: The bark *Fredonia* and the gunboat *Wateree* are struck by a tidal wave outside Arica, Peru, and sunk with a loss of 27 sailors. The force of the water carries both vessels 1,500 feet inland.

August 29

MILITARY: To prevent marauding Cheyenne, Arapaho, and Sioux war bands from raiding along the Saline and Solomon Rivers in Kansas, Major George A. Forsyth departs Fort Hays with 50 mounted volunteers. This is part of an experimental program to employ civilian scouts against the Indians.

September 2

INDIAN: Outside Fort Dodge, Kansas, a detachment of four men under Corporal Leander, 3rd Infantry, are set upon by 50 hostile Indians. The soldiers manage to fight off their antagonists until help arrives from the fort.

September 17–25

MILITARY: A party of 50 civilian scouts under Major George A. Forsyth, sent to protect the railroad along the Smoky Hill Road to Kansas, is attacked by 600 mounted Cheyenne, Lakota, and Arapaho Indians under Chiefs Tall Bull, White Horse, and Bull Bear. The whites hurriedly take up defensive position along Beecher's Island on the Arikara Fork of the Republican River, Colorado Territory. A nine-day siege ensues in which the Americans take significant losses but repeatedly drive their numerically superior opponents through withering firepower from their repeating Spencer rifles. They are finally rescued by a party of African-American troopers, the famed 10th Cavalry, or "Buffalo soldiers" under Captain Louis Carpenter. Forsyth, who sustained three wounds, loses four dead and 15 injured to an estimated 30 to 100 Indian dead. Among the slain are Roman Nose, a celebrated Cheyenne warrior, and Lieutenant Frederick Beecher, nephew of abolitionist Henry Ward Beecher, for whom the battle is named. Forsyth also receives brevet promotion to brigadier general, but hereafter the army abandons the notion of civilian scouts.

September 24

MILITARY: In Michigan, George A. Custer receives a telegram informing him that his one-year suspension is cancelled and that he is hereby ordered to rejoin the army at Fort Hays, Kansas, and resume command of the 7th Cavalry. In light of the dismal performance of the military on the Plains, Custer is again viewed as an effective, hard-hitting commander.

November 11

INDIAN: At Cienega Springs, Utah, a detachment of the 8th Cavalry is attacked by hostile Indians but repels them.

November 12

MILITARY: An army column under Colonel Alfred E. Sully, which includes the 7th Cavalry under Lieutenant Colonel George A. Custer, rides south from Fort

Hays, Kansas, to curtail raiding Cheyenne and Arapaho Indians. The campaign, however, begins almost a month late owing to the tardiness of supplies.

November 13

MILITARY: Colonel Jacob Zeilin, U.S. Marine Corps commandant, proffers the eagle, globe, and anchor emblem as the new symbol of the corps and it is quickly approved by the secretary of the navy.

November 15

MILITARY: In response to recent despoliations by hostile Comanche, Major Andrew W. Evans leads six companies of the 3rd Cavalry, accompanied by infantry and artillery, out of Fort Bascom, New Mexico, in search of the raiders.

November 18

MILITARY: Camp Supply is founded by Captain John H. Page, 3rd Infantry, in Oklahoma, to support General Philip H. Sheridan's anticipated winter campaign in the region.

November 23

MILITARY: General Philip H. Sheridan, commanding the Department of the Missouri, departs Camp Supply, Oklahoma, on a long winter raid to locate and eradicate Indian war bands. His campaign is spearheaded by the 7th Cavalry under Lieutenant Colonel George A. Custer, who is somewhat of a neophyte when it comes to Indian fighting.

November 27

MILITARY: In a terrible atrocity, the 7th Cavalry under Lieutenant Colonel George A. Custer attacks the peaceful Southern Cheyenne band of Chief Black Kettle in their camp at Washita, Oklahoma Territory. Black Kettle, a noted voice for peace and accommodation with whites, desperately tries to surrender and is killed, along with his wife and 103 fellow tribesmen. American losses came to 21 killed, including Captain Louis M. Hamilton, grandson of Alexander Hamilton, and 14 wounded. The soldiers died after nearby Arapaho warriors ride to the assistance of the Sioux and ambush the advance guard under Major Joel Elliott, killing them all. The action amounted to a victory over the Southern Plains Indians, but resentment among neighboring Arapaho, Cheyenne, and Comanche bands triggers a frontier war lasting several years and consuming hundreds of lives on both sides.

December 5

MILITARY: Camp Sherman, Nebraska, is founded by Captain William Sinclair, 3rd Artillery; it is subsequently renamed Fort Omaha.

December 8

NAVAL: Jiunzo Matsumura becomes the first Japanese national admitted to the U.S. Naval Academy, Annapolis, from which he graduates in 1873 and eventually rises to vice admiral in the Imperial Japanese Navy. A total of 16 Japanese nationals are admitted to Annapolis between 1869 and 1906.

December 25

INDIAN: A cavalry column of 300 men under Major Andrew Evans attacks a Comanche camp it discovers near Soldier Spring on the Red River, New Mexico Territory. The settlements carried, then Evans faces a major counterattack by 200 angry Comanche and Kiowa warriors. The Indians are repulsed with a loss

of 30 men, while Evans sustains one killed. Because the soldiers have burned a major supply source of the Comanche, they face an uncomfortable winter ahead of them. Hereafter, the army is quick to resort to winter campaigns against the Plains Indians.

MILITARY: In Washington, D.C., President Andrew Johnson issues a controversial and blanket amnesty for 300 senior leaders of the late Confederate States of America. Congress, then controlled by Radical Republicans, quickly takes legislative measures to nullify this executive clemency.

1869

January

INDIAN: Chief Tochoway of the Comanche, upon meeting a fierce and scowling General Philip H. Sheridan at Fort Cobb, pronounces himself a “good Indian.” Sheridan’s apocryphal and cold-hearted riposte was that the only good Indian he ever saw was a dead Indian. He later denied ever saying those words, but he has been tarred by them ever since.

January 7

MILITARY: Fort Sill, Oklahoma, is founded by General Philip H. Sheridan as a base for supplying operations against the Kiowa and Cheyenne in the region; it remains active as the U.S. Army’s artillery school.

February 18

MILITARY: The School of Instruction for Light Artillery opens at Fort Riley, Kansas, but finally folds in March 1871.

March 4

MILITARY: Ulysses S. Grant is inaugurated as the 18th president of the United States. Much to the disgust of hard-line commanders, he pursues a “peace policy” with frontier Indians to placate frontier tensions.

March 8

MILITARY: President Ulysses S. Grant appoints General William T. Sherman to succeed him as the four-star, commanding general of the army. Philip H. Sheridan also becomes a lieutenant general. In practice, Sherman was studiously neutral toward politics and he also began a system of army schools to enhance military professionalism.

March 9

NAVAL: In Washington, D.C., Adolf E. Borie replaces Gideon Wells as the 25th secretary of the navy.

March 13

MILITARY: President Ulysses S. Grant appoints John A. Rawlins to serve as the new secretary of war; he dies of tuberculosis after only six months in office.

March 15

MILITARY: At Sweetwater Creek, Texas, Lieutenant Colonel George A. Custer, accompanied only by a single lieutenant, rides into the Cheyenne camp of Chiefs Medicine Bow and Little Robe to parley. When several chiefs are induced to visit the American camp they are suddenly taken hostage, at which point Custer threatens to hang them if three white women hostages are not immediately

Sheridan, Philip H. (1831–1888)

Army general

Philip Henry Sheridan was born in Albany, New York, on March 6, 1831, a son of Irish immigrants. After receiving some rudimentary education he clerked at a store in Somerset, Ohio, until he gained admittance to the U.S. Military Academy in 1848. Sheridan, short and fierce-tempered, was suspended for a year for fighting, and he graduated a year late in 1853. He then saw active service as an infantry officer throughout the western frontier and, when the Civil War commenced in April 1861, he was a captain and quartermaster in Missouri. He then embarked on one of that conflict's most meteoric military careers, commencing on July 1, 1862, when he thrashed twice his number of Confederates at Booneville, Mississippi, which brought him promotion to brigadier general. He then fought with distinction at the bloody battles of Perrysville and Murfreesboro. Sheridan subsequently command the XX Corps in

the ill-fated Chickamauga Campaign, but he redeemed himself by a brilliant charge that climaxed the Union victory at Chattanooga in the fall of 1863. Sheridan then accompanied General Ulysses S. Grant east to assume command of all his cavalry, and he continually harassed Confederate supply lines in the Overland drive to Richmond, Virginia. His seminal contribution to the war came in August 1864 when he took charge of Union forces in Virginia's strategic Shenandoah Valley. He immediately attacked Confederates under General Jubal A. Early, routing them three times at Winchester, Fisher's Hill, and Cedar Creek, and he won the last engagement after a 20-mile dash to rally his shaken command. In the spring of 1865 he was active in operations around Richmond and his victory at Five Forks sealed the Confederacy's doom. Shortly after, his cavalry cut off General Robert E. Lee and forced him to surrender at Appomattox, Virginia.

released. The Cheyenne comply and, thoroughly intimidated, promise to return to their reservation as soon as their ponies regain strength.

March 28

MILITARY: Lieutenant Colonel George A. Custer's 7th Cavalry rides wearily into Camp Supply, marking the end of the Washita campaign. Consequently, hostile Indians are removed from or driven off of the Plains between the Platte and Arkansas Rivers.

April 5

MILITARY: Daniel F. Blakeman, the oldest surviving veteran of the American Revolution, dies at the age of 109.

April 6

MILITARY: Lieutenant Colonel George A. Custer shepherds his 7th Cavalry back into Fort Hays, Kansas, ending General Philip H. Sheridan's winter campaign against hostile and recalcitrant Plains Indians.

After the war Sheridan commanded American troops deployed along the Mexican border, which induced French occupying forces there to leave. In 1867 he was ordered to carry out Reconstruction activities in Louisiana and Texas, but his harsh administration led President Andrew Johnson to reassign him to the Department of the Missouri. Now arrayed against Native Americans, Sheridan planned and executed the strategy that drove the hostile Kiowa, Comanche, and Cheyenne into submission by 1869, and he served as an observer during the Franco-Prussian War in 1870–71. Returning west, he helped direct the final operations that brought both the Sioux and the Nez Perce into submission by 1877, and, in November 1883, he replaced William Tecumseh Sherman as commanding general of the army. In this capacity he authorized additional operations that resulted in the capture of the Apache Geronimo by General Nelson A. Miles in 1887. Sheridan consequently received the coveted rank of four-star general prior to

Major General Philip H. Sheridan (*Library of Congress*)

his death at Nonquitt, Massachusetts, on August 5, 1888. He was one of the most pugnacious and aggressive military leaders in American history, and among the most successful.

- Engineering officer Captain Charles W. Raymond departs San Francisco, California, on the first leg of his Alaska expedition, which will take him along the Yukon River.

April 26

NAVAL: The Good Conduct Medal, a Maltese Cross made from nickel, is authorized by Congress for distribution to enlisted naval personnel. In 1892, bronze replaces nickel.

May 10

MILITARY: Major Milton Cogswell and a battalion of the 21st Infantry serve as the honor guard during ceremonies marking the symbolic linking of the Central Pacific and Union Pacific railroads at Promontory Point, Utah. The 21st then continues on to the Presidio in San Francisco, California, to become the first unit to cross the nation entirely by rail.

May 16

INDIAN: At Spring Creek, Nebraska, a scouting party under Lieutenant John B. Babcock is attacked by hostile Indians. Babcock orders his men to dismount and form a skirmish line, while he remains mounted to inspire them. The Indians are repulsed at length and Babcock wins a Medal of Honor for saving his command.

May 24

EXPLORATION: Major John Wesley Powell departs Green River City, above the Colorado River, and leads nine men on the first concerted exploration of the Grand Canyon region.

May 28

INDIAN: Vengeful Cheyenne destroy part of the Union Pacific Railroad along Fossil Creek, Kansas.

June 4

INDIAN: At Picacho Mountain, Arizona, a skirmish unfolds between members of the 8th Cavalry and hostile Apaches. Bugler George Gates kills a brave in hand-to-hand combat and secures his weapons, winning a Medal of Honor.

June 9

MILITARY: Major Eugene Carr leads eight troops of the 5th Cavalry and three companies of Pawnee scouts out of Fort McPherson, Nebraska, in search of hostile Cheyenne bands under Tall Bull.

NAVAL: In Washington, D.C., Secretary of the Navy Adolf E. Borie orders construction of the navy's first torpedo station on Goat Island, Newport, Rhode Island.

June 18

NAVAL: The navy, in transition from sail power to steam, orders ships to rely upon wind power unless circumstances are "most urgent."

June 26

NAVAL: In Washington, D.C., George M. Robeson becomes the 26th secretary of the navy.

June 28

MILITARY: Camp Augur, Wyoming, is established by Lieutenant Patrick H. Breslin, 4th Infantry, to protect miners and settlers from Bannock and Shoshone Indians.

NAVAL: In Washington, D.C., William M. Wood becomes the first surgeon general of the navy.

July

MILITARY: Lieutenant George M. Wheeler departs Camp Halleck, Nevada, on a five-month sojourn seeking the best routes to construct military roads from the Pacific coast to various sites in Arizona and Nevada.

July 3

INDIAN: At Hell Canyon, Arizona, soldiers of the 8th Cavalry engage hostile Apaches in close combat and two soldiers, Sergeant Sanford Bradbury and Corporal Paul Haupt, win Medals of Honor for courage under fire.

July 4

MILITARY: Captain Charles W. Raymond and a small army detachment arrive at British Fort, Lower Yukon, on the Arctic Circle, where they use astronomical observations to prove that the post is on American soil. British traders residing there are then evicted and the post is renamed Fort Hamilton.

July 8

MILITARY: Fort Pembina is constructed by Captain Lloyd Wheaton, 20th Infantry, on the Red River, North Dakota, following a petition by the Minnesota legislature for greater protection there.

- On the Republican River, Kansas, a detachment of three soldiers led by Corporal John Kyle, 5th Cavalry, is attacked by a party of eight hostile Indians. Kyle's Indian scout, Sergeant Co-Rux-Te-Chod-Ish (Mad Bear), breaks ranks to secure an enemy prisoner and is wounded by friendly fire, but he keeps on fighting. He receives the Medal of Honor.

July 11

MILITARY: Major Eugene A. Carr's 5th Cavalry, assisted by Pawnee scouts under William "Buffalo Bill" Cody, surprises and overruns a Cheyenne village at Summit Springs on the South Platte River, Colorado Territory. The Dog Soldiers, an independent military order within the tribe, are routed and suffer 52 dead, including Chief Tall Bull, with 17 women also captured; one American is wounded. This defeat effectively demoralizes remaining Cheyenne war bands, who begin straggling back onto their reservations.

July 12

INDIAN: Near Seymour, Texas, a small group of soldiers engages a larger body of Kiowa under White Horse who have been raiding civilian settlements; they lose three dead and 12 wounded before the Indians withdraw at dusk.

July 16

MARINES: A detachment of 50 marines from the Brooklyn Navy Yard, New York, arrives by revenue cutter at nearby Gardiner's Island, where they arrest 125 filibusters assembling to invade Cuba.

August 19

EXPLORATION: At the lower end of the Grand Canyon, the five remaining soldiers of Major John Wesley Powell's expedition safely emerge. In recognition of his feat, Powell is named head of the U.S. Topographical and Geological Survey the following year.

August 25

INDIAN: At the Agua Fria River, Seneca Mountains, Arizona, the 8th Cavalry battles hostile Apache in close combat. Corporal Michael Corocran distinguished himself in the fighting and wins a Medal of Honor.

September 21

NAVAL: A typhoon strikes near Yokohama, Japan, crippling the sailing vessel *Idaho* and reducing it to a floating hulk, which is finally decommissioned and sold in 1874.

September 23

INDIAN: At Red Creek, Arizona, the 8th Cavalry engages a force of hostile Apache and Sergeant Charles D. Harris distinguishes himself in combat, winning a Medal of Honor.

October 14

INDIAN: The 8th Cavalry continues battling hostile Apache along Lyry Creek, Arizona, where Private David Goodman distinguishes himself in combat and wins a Medal of Honor.

October 20

INDIAN: In the Chiracahua Mountains, Arizona Territory, a detachment of the 8th Cavalry engages a party of hostile Apaches; Corporal Charles H. Dickens and Private Edwin Elwood distinguish themselves in combat, winning Medals of Honor.

October 25

MILITARY: President Ulysses S. Grant nominates William W. Belknap to succeed John M. Rawlins after the latter dies in office. Although a former major general in the Civil War, Belknap's conduct leads to a serious scandal in the Grant administration.

October 28

MILITARY: Fort Sill, Indiana Territory (Oklahoma), is the site of the first post office to serve that remote region.

- At the Brazos River, Texas, a patrol of four soldiers under Lieutenant George E. Albee, 4th Infantry, is attacked by a party of 11 hostile Indians; the soldiers stand their ground and drive them off without loss.

December 1

NAVAL: At Annapolis, Maryland, Commodore John L. Worden replaces Vice Admiral David D. Porter as the seventh superintendent of the U.S. Naval Academy.

1870

MILITARY: Congress fine-tunes the peacetime establishment by reducing it to 30,000 men, approving new pay scales for all ranks, and granting a pension after 30 years of service.

January 2

INDIAN: Fort Berthold, North Dakota, is attacked by a large party of Sioux warriors, who are driven off by artillery fire.

January 22

NAVAL: The gunboat *Nipsic* under Commander Thomas O. Selfridge, Jr., begins surveying the Panamanian Isthmus, looking for a possible route to construct a canal. He subsequently surveys four possible routes and releases an official report in 1874.

January 23

MILITARY: Major Eugene M. Baker directs two squadrons of the 2nd Cavalry to attack a Piegan (Blackfeet) village on the Marias River, Montana Territory, as retribution for past raids. The troopers kill 173 Native Americans and take an

additional 143 captive. However, the public reacts badly to the massacre and forces Congress to scuttle a bill transferring the Bureau of Indian Affairs back to the War Department.

January 24

NAVAL: The screw sloop *Oneida* collides with the British vessel *City of Bombay* off Yokohama, Japan, and sinks with the loss of 117 crewmen, including its three senior officers. The British vessel refuses to stop and render assistance.

February 9

SCIENCE: Congress approves the National Weather Bureau, which initially functions as part of the U.S. Army Signal Corps, and which allows 22 observer-sergeants to record observations. It should be noted that the military first began reporting on weather conditions under U.S. Army surgeon general James Tilton in 1813.

April 15

MILITARY: Command of the Arizona Territory passes to Brigadier General George Stoneman.

May 15

INDIAN: At Little Blue, Nebraska, a detachment of the 2nd Cavalry clashes with a large body of hostile Indians; Privates Heth Canield and Michael Himmelsback win Medals of Honor for valor under fire.

May 16

MILITARY: Major John Green, 1st Cavalry, founds Fort Apache, Arizona, to check hostilities by the Coyotero Apache.

May 19

MILITARY: At Kickapoo Springs, Texas, Sergeant Emanuel Stance, of the 9th Cavalry, becomes the first African-American soldier to win the Medal of Honor in the post-Civil War era. Stance distinguished himself in a surprise attack upon Apache raiders, routing them.

May 25–27

MILITARY: Armed groups of Irish army veterans, the so-called Fenians, begin raiding across the Canadian border in an attempt to provoke hostilities with Great Britain. At length they are detained and arrested by Canadian and American authorities.

- Fort Hall is constructed near the town of Blackfoot, Idaho, by Captain James E. Putnam, 12th Infantry, to monitor the nearby Shoshone and Bannock Reservations.

June 17

NAVAL: Sailors in six small boats under Lieutenant Willard H. Brownson of the screw sloop *Mohican* row up the Teacapan River, Mexico, in search of pirates and burn their vessel, a former British gunboat, at anchor.

June 30

MILITARY: The growth of military professionalism is greatly abetted by the appointment of Lieutenant Colonel Emory Upton as commandant of cadets at the U.S. Military Academy, West Point.

July 12

INDIAN: At Wichita River, Texas, a detachment of the 6th Cavalry engages a large force of hostile Indians with Sergeant George H. Eldridge winning a Medal of Honor for heroism under fire.

August

INDIAN: The army begins recruiting African-Seminole Indian scouts from Florida to serve along the southwestern border, usually in concert with the two black cavalry regiments stationed there.

August 11–13

NAVAL: In Egypt, the gunboat *Palos* is the first American naval vessel to transit through the Suez Canal.

August 14

NAVAL: Admiral David G. Farragut, one of history's outstanding naval commanders and battle captains, dies in Portsmouth, New Hampshire, aged 69 years.

August 20

MILITARY: Fort Stambugh is built by Major James S. Brisbin, 2nd Cavalry, at the boundary of the Shoshone reservation and Sweetwater mining district, Wyoming, in order to maintain peace between the two parties.

August 22

EXPLORING: Lieutenant Gustavus C. Doane leads an expedition of five soldiers from Fort Ellis, Montana, to Lake Yellowstone, becoming the first white men to behold what subsequently becomes Yellowstone National Park.

October 5

INDIAN: Along the Wichita River, Texas, soldiers of the 6th Cavalry engage a large force of hostile Indians; in the ensuing scrape, Corporal Sam Bowden and Private James Anderson win Medals of Honor.

October 11

MARINES: The Philadelphia Navy Yard dispatches marines into the city to quell disturbances arising from African Americans being allowed to vote in consequence of the Fifteenth Amendment to the Constitution.

October 12

GENERAL: Robert E. Lee, celebrated military leader and an enduring icon of the Confederacy, dies in Richmond, Virginia, at the age of 63.

October 29

NAVAL: The side-wheeler steamer *Saginaw* under Commander Montgomery Siccard strikes a reef near Ocean Island in the mid-Pacific, and a boatload of five volunteers under Lieutenant John G. Talbot sails off to Hawaii to obtain help for the survivors—a distance of 1,500 miles.

November 2

MARINES: A force of 245 marines departs the Brooklyn Navy Yard, New York, to aid law enforcement authorities in rooting out illegal distilleries in the area.

December 20

NAVAL: A boatload of five volunteers under Lieutenant John G. Talbot, having sailed for 31 days and covered 1,500 miles to reach Hawaii, reaches landfall.

Tragically, the lieutenant drowns in heavy surf coming ashore, along with four shipmates and only the coxswain, William Halford, survives to get help for his shipmates still marooned on Ocean Island. For his efforts, Halford wins the Medal of Honor.

1871

January 13

MARINES: To assist and protect Revenue Department operations, marines from the Brooklyn Navy Yard raid a nearby shanty town and seize an illegal distillery operating there.

January 19

INDIAN: General George Stoneman commences a winter campaign against Apache Indians who have been attacking settlers in the Arizona Territory.

January 24

INDIAN: In Young County, Texas, marauding Kiowas under Mama'nte and Quitan attack a wagon train, killing and scalping four African-American teamsters.

March 3

NAVAL: The Pay Corps (later Supply Corps) is established by Congress.

April 30

MILITARY: Enraged settlers, angered by a recent spate of Indian scalplings, attack an Apache community at Camp Grant, Arizona Territory, and massacre over 100 inhabitants. This act ignites another Indian war in the Old Southwest that lasts intermittently until Geronimo's capture in 1886.

May 3

EXPLORING: Lieutenant George M. Wheeler, Corps of Engineers, again leads a party of 30 men out of Camp Halleck, Nevada, to continue mapping the area south of the Central Pacific Railroad. He is also charged with providing accurate information relative to Indian tribes in the region, sites for possible military operations, and possible routes for roads or railroad tracks.

May 5

INDIAN: A cavalry patrol led by Lieutenant Howard Cushing, 3rd Cavalry, encounters an Apache camp in the Whetstone Mountains, Arizona Territory, two miles north of the Babocomari River. The two sides snipe at each other and then the Americans sound the charge and gallop down the canyon. A withering volley kills Cushing and many of his men, and the victorious Indians chase the survivors back to Fort Crittenden. However, Private Hermann Fichter distinguishes himself in combat, winning a Medal of Honor.

May 18

MILITARY: At Salt Creek, Texas, a band of hostile Kiowa under Satanta attacks a military wagon train under Captain Henry Warren as it plods along to Fort Griffin, Texas. The Indians kill seven men and abscond with 41 mules. Hours before, they had allowed a smaller caravan to pass, which was carrying General William T. Sherman, then visiting Texas to check on Indian pacification efforts. Sherman subsequently orders the arrest of three Kiowa leaders, namely, Satanta, Big Tree, and Satank.

May 27

INDIAN: Kiowa chief Satanta, having boasted of his role in the Salt Creek Prairie massacre, is confronted at the Fort Sill Agency by General William T. Sherman, who arrests him. When the Indians appear determined to resist, Colonel Benjamin H. Grierson suddenly deploys his 10th Cavalry and three tribal leaders are taken into custody.

May 30

NAVAL: Rear Admiral John Rodgers, commanding the screw frigate *Colorado* and several smaller vessels, ascends the Han River near Chelmpo (Inchon), Korea. He is conducting Frederick Low, U.S. minister to China, to an attempt to establish relations with reclusive leaders of the “Hermit Kingdom.” However, several land forts fire upon the intruders, which Rodgers promptly silences. The commodore then demands a formal apology for the attack, but, when one is not forthcoming, he prepares his force for action.

June 4

MILITARY: Command of the Arizona Territory passes over to Lieutenant Colonel George Crook, soon to be known as one of the army’s premier Indian fighters.

June 10–11

NAVAL: American warships *Monocacy* and *Palos* under Rear Admiral John Rodgers land 700 sailors and marines ashore on the Han River, Korea, where they storm and destroy several Korean forts that had fired on the American squadron a few days previous. The defenders literally resist to the last man before their positions are carried and 243 Koreans are killed. American losses are three dead and seven wounded—no less than 15 Medals of Honor are awarded to sailors and marines for this stout action.

June 29

EXPLORING: Captain Charles F. Hall sails from New York City on the screw tug *Polaris* northward on an ill-fated expedition to the Arctic.

July 2

EXPLORING: Captain J. W. Barlow leads a small party of engineers and explorers from Chicago, Illinois, to Yellowstone Lake, with orders to accurately map the headwaters of the Yellowstone River. The party is astonished particularly by the numerous geysers encountered.

September 4

INDIAN: The Apache under Cochise steal up on the garrison of Fort Crittenden, Arizona Territory, and rustle their herd of 54 horses and seven mules.

September 16

EXPLORING: Lieutenant George M. Wheeler’s exploring party starts up the Colorado River, assisted by a dozen Mojave Indians working as guides.

September 19

EXPLORING: A small party of soldiers and scouts under Major John W. Powell commences the first known raft expedition down the Colorado River to explore the Utah Territory.

October 10

INDIAN: On the Brazos River, Texas, part of the 4th Cavalry under Lieutenant Robert G. Carter is attacked by large numbers of hostile Indians. The troopers form a skirmish line and hold off their antagonists until reinforcements arrive.

October 20

EXPLORING: The small expedition of Lieutenant George M. Wheeler, marooned on the Colorado River near Diamond Creek, Arizona, by leaking boats and nearly out of food, is succored by a rescue party.

1872

MILITARY: After field testing more than 100 types of firearms, the army settles upon the .50-caliber Springfield breech-loading rifle as its principal firearm. This weapon fires at a rate four times faster than Civil War-era muzzle-loading ordnance.

January

MILITARY: Lieutenant Colonel George A. Custer's military routine is interrupted when he is ordered to escort Grand Duke Alexis, fourth son of the Russian czar, on a hunting expedition on the Great Plains. The two men, both a cut larger than life, get along extremely well and Custer is allowed to accompany the duke on his sojourn through the end of February.

March 28

MILITARY: In Colorado Valley, Texas, a body of the 4th Cavalry is ordered to pursue and engage a gang of horse thieves based in New Mexico.

April 3

INDIAN: At Lost River Gap, Oregon, Modoc leader Captain Jack meets with Major Elmer Otis in a failed attempt to induce the Indians to return to their reservation peacefully.

April 20

INDIAN: In Crockett County, Texas, bands of Kiowa under Big Bow and Comanche under White Horse attack a government wagon train, kill 16 teamsters, and skirmish with two companies of cavalry under Captain N. Clooney before riding off; one soldier and one officer are killed.

April 26

INDIAN: Near Loupe Fort, Platte River, Nebraska, part of the 3rd Cavalry engages a large force of hostile Indians and, in the ensuing fracas, Sergeant John Foley and Private William Strayer receive Medals of Honor for bravery.

April 30

MILITARY: Fort Tularosa, New Mexico, is constructed by Captain Frederick W. Coleman, 15th Infantry, to protect a nearby Apache reservation.

May 7–12

NAVAL: The screw sloop *Tuscarora* puts 200 sailors and marines ashore in Panama, during a period of revolutionary activity against Colombia.

May 23

INDIAN: At Sycamore Canyon, Arizona Territory, a detachment of the 1st Cavalry engages a body of the Tonto Apache. Sergeant Richard Barrett wins a Medal of Honor for bravery under fire.

May 27

MILITARY: Captain John Bates and men of the 20th Infantry erect Fort Seward on the James River, North Dakota, for the purpose of protecting workers belonging to the Northern Pacific Railroad.

June 14

MILITARY: Fort Abraham Lincoln is built on the Missouri River near Bismark, North Dakota, by Lieutenant Colonel Daniel Huston, 6th Infantry, to protect personnel of the Northern Pacific Railroad.

June 15

INDIAN: At Fort Sill, Texas, a band of Cheyenne under Tenawerka manages to abscond with 54 mules and horses.

July 6

INDIAN: T. B. Ordental, superintendent of Indian affairs in Oregon, is ordered by the Bureau of Indian Affairs to relocate the Modoc band under Captain Jack back to the Klamath reservation by force, if necessary. The stage is now set for an internecine little war.

July 13

INDIAN: At the Whetstone Mountains, Arizona Territory, a detachment of the 5th Cavalry engages a large body of hostile Indians. Private Michael Glynn single-handedly engages eight braves, disabling five and driving the rest off.

July 26

MILITARY: In another provocative move, Colonel D. S. Stanley takes a large military expedition, supported by Gatling guns and a brass cannon, out from Fort Rice, North Dakota, and begins surveying land east of Bozeman, Montana. There they are harassed constantly by bands of Hunkpapa Sioux.

July 27

MILITARY: War parties of Hunkpapa Sioux, angered by the army's incursion into the region east of Bozeman, Montana, launch a night attack upon the camp of Major Eugene M. Baker, 2nd Cavalry, who is scouting ahead of the main column under Colonel D. S. Stanley. Two soldiers are killed in the so-called Battle of Poker Flat, and the expedition turns back.

August 5

MILITARY: Near Fort Griffin, Texas, a party of soldiers from the 11th Infantry drives off a band of Indians who were attacking a mail train.

August 14

INDIAN: At Arrow Creek, Montana Territory, a party of Sioux warriors under Crazy Horse engages a party of American cavalry under Major Eugene M. Baker, then escorting a survey party. Rather than close, the Indians simply taunted their enemies by riding nearby. Crazy Horse has a horse shot from beneath him at one point, but he escapes unhurt.

August 27

INDIAN: Near Camp Crittendon, Davidson Canyon, Arizona Territory, a small detachment, consisting of Sergeant James Brown and three troopers belonging to the 5th Cavalry, is attacked by a larger party of Indians, but they manage to drive them off.

September 8

INDIAN: At Date Creek, Arizona Territory, Sergeant Frank E. Hill, 5th Cavalry, receives severe injuries in a fight with marauding Apache, but he still manages to subdue and capture a chief; he wins a Medal of Honor.

September 21

NAVAL: James Henry Conyers becomes the first African American admitted to the U.S. Naval Academy as a cadet; he resigns a year later owing to deficiencies in mathematics and French. The first black cadet will not graduate from Annapolis until 1949.

September 25

INDIAN: Troopers of the 5th Cavalry under Colonel J. W. Mason are ambushed by Apache in Muchoas Canyon in the Santa Maria Mountains of Arizona. The Americans promptly turn the tables on their attackers and drive them off.

September 29

MILITARY: Colonel Ranald S. Mackenzie and 220 troopers of the 4th Cavalry, assisted by 20 Tonkawa scouts, surprise a large Comanche encampment at McClellan's Creek off the Red River, Texas. The troopers kill 50 Indians, capture 130 prisoners, and seize 3,000 valuable ponies. American losses are one dead and three wounded. Sergeant William Foster and Private Edward Brannigan win Medals of Honor for bravery under fire.

October 1–11

INDIAN: General Oliver O. Howard, assisted by noted scout Thomas Jeffords, gains an audience with renegade Chiricahua (Apache) leader Cochise in the Dragoon Mountains. Cochise agrees to relocation to a reservation in his Chiricahua homeland, but only if Jeffords, a personal friend, serves as his agent.

November 10

MARINES: The Boston Navy Yard, Massachusetts, dispatches marines into the city to maintain order in the wake of a large fire there.

November 28

MILITARY: Fighting breaks out after a detachment of 38 cavalrymen under Captain James Jackson, 1st Cavalry, enter the camp of Modoc Indians under Kintpuash (Captain Jack) along the Lost River, Oregon. The soldiers are under orders to forcibly relocate the Modoc back to their Klamath Reservation, but fighting breaks out when the Indians refuse to be disarmed. Jackson retreats after losing one dead and seven wounded while the Indians flee into nearby lava beds. These beds prove a natural strong point, and the soldiers will find it difficult to expel the Indians from them.

November 30

INDIAN: A group of hostile Modocs, migrating south from Oregon under Hooker Jim, surprises and kills 18 settlers.

December 21

MILITARY: Lieutenant Colonel Frank Wheaton, 21st Infantry, arrives outside the Tule Lake lava beds, northern California, with reinforcements drawn from Camps Warner, Harney, Bidwell, and Vancouver. He intends to storm hostile Modoc hiding there as soon as it becomes practicable. Beforehand, a Modoc war party ambushed an ammunition train at Land's Ranch, as it marched to join the troops; five soldiers are killed.

December 28

MILITARY: Captains William M. Brown and James Burn, 5th Cavalry, attack a group of Yavapai Apache at Skull Cave on Salt River Canyon, Arizona Territory, killing 76 Indians. The American attack falters initially until Brown orders his men to shoot at the roof of the cave, whereupon bullets ricochet down, striking men, women, and children. The victors round up 20 captives and then depart.

1873

MILITARY: Once Congress grants all Civil War veterans burial rights in national cemeteries, Secretary of War William W. Belknap selects the design for grave markers, which are still in use today.

January 2

INDIAN: At Clear Creek, Arizona Territory, men of the 5th Cavalry engage a large party of Hostile Apache, whereupon Private James Lenihan wins a Medal of Honor for heroism under fire.

January 13

INDIAN: Outside the Tule Lake lava beds, Modoc Indians commence firing at army troops and volunteers gathered in their nearby camp, which convinces them to move farther off.

January 16–17

MILITARY: Colonel Frank Wheaton, 21st Infantry, musters 400 soldiers in an attack upon Captain Jack's Modoc positions in the Tule Lake lava beds of northern California. They are covered by artillery fire from several cannon until a fog settles in and makes firing too dangerous to the troops. Indian resistance is tenacious and the Americans retreat with nine killed and 28 wounded; Indian losses are nil for the defenders were never seen. Considering the disparity of forces, defeat here was a considerable embarrassment for the U.S. Army.

January 22

INDIAN: At Scorpion Point, northern California, Modoc raiders attack a wagon train escorted by 22 soldiers under Captain R. F. Bernard; the soldiers run and the grain-filled wagons are burned.

- At Tonto Creek, Arizona Territory, a part of the 5th Infantry engages a large force of hostile Apache; Private George Hooker fights with distinction and wins a Medal of Honor.

March 25

INDIAN: At Turret Mountain, Arizona Territory, part of the 5th Cavalry battles with hostile Indians and Sergeant Daniel Fisher fights with distinction, winning the Medal of Honor.

March 27

MILITARY: A column under Captain George M. Randall, 23rd Infantry, surprises an Apache Camp near Turret Peak, Arizona Territory, killing 23 Indians. The dispirited survivors begin returning to their reservation. Sergeant William Allen also wins a Medal of Honor for his bravery under fire.

April 6

INDIAN: Colonel George Crook accepts the surrender of 300 Yavapai Apache at Camp Verde, Arizona, who are then dispatched to lead new lives on reservations in New Mexico. A peace treaty is concluded and Crook receives promotion to brigadier general.

April 11

INDIAN: On Good Friday, Brigadier General Edward R. S. Canby, commanding the Department of the Pacific, attempts to placate warring Modoc Indians by meeting tribal leaders at the Tule Lake lava beds of northern California. Here he is treacherously shot and killed while under a flag of truce by Captain Jack (Kintpuash), along with Reverend Cleeson Thomas, a peace commissioner. This treachery leads to renewed efforts by the army to surround and finally crush the insurgents. Significantly, Canby is the only regular army general killed in an Indian war.

April 15

MILITARY: Colonel Alvin C. Gillem, 1st Cavalry, supported by howitzers and Tenino mercenaries, attacks Modoc Indian positions in the Tule Lake lava beds, northern California. Despite intense shelling the Indians suffer no casualties and repulse another American advance with losses of seven dead and 13 wounded.

April 17

MILITARY: Outside the Tule Lake lava beds in northern California, Colonel Alvin C. Gillem launches another attack on Modoc Indian positions; they quickly discover that the fugitives under Captain Jack have since fled.

April 26

MILITARY: Modoc warriors under Scarfaced Charley surprise a company of the 1st Cavalry under Captain Evan Thomas while encamped outside Tule Lake, northern California, killing 18 and wounding 16. The embarrassing defeat leads to the replacement of Colonel Alvin C. Gillem by Brigadier General Jefferson Davis.

May 2

INDIAN: At Scorpion Point near Tule Lake, northern California, a small force of Modocs attack an army wagon train carrying supplies; several soldiers are wounded but they repel their antagonists.

May 4

MILITARY: General Philip H. Sheridan instructs Lieutenant Colonel Ranald S. Mackenzie, 4th Cavalry, to relocate his troops to Fort Clark and pursue marauding Apache bands into Mexican Territory.

May 6

INDIAN: In the Santa Maria Mountains, Arizona Territory, part of the 1st Cavalry engages a large force of hostile Indians and Bugler Sam Hoover wins a Medal of Honor for heroism under fire.

May 7–12

NAVAL: The screw sloop *Tuscarora* lands 200 sailors and marines ashore in Panama, then part of Colombia, to protect American lives and property during a period of insurrection.

May 10

MILITARY: Modoc Indians again sortie from their strong point in the Tule Lake lava beds, northern California, and surprise troops of the 4th Artillery under Captain H. C. Hasbrouck encamped there. Five Americans die and another 12 are wounded, but the Modocs lose five killed, among them Ellen's Man, an important leader. This leads to dissension in the Modoc camp and Hooker Jim breaks off on his own.

May 13

MILITARY: Colonel Ranald S. Mackenzie departs Fort Clark, Bracketville, Texas, at the head of the 4th Cavalry. He heads south into Mexican Territory to attack renegade bands of Kickapoo Indians encamped along the San Rodrigo River.

May 18

MILITARY: A detachment of the 4th Cavalry under Colonel Ranald S. Mackenzie, guided by Seminole scouts, crosses into Mexico and attacks a hostile Kickapoo settlement at Nacimiento. The Americans kill 19 Indians while suffering one soldier dead and two wounded. They then round up 317 survivors and force them back to reservations in Kansas. Mexican government protests over this illegal incursion are ignored.

May 22

INDIAN: At Willow Creek Ridge, northern California, army troops discover and attack the war band of Hooker Jim, who has separated from the large Modoc force. He surrenders and offers to help them capture the elusive Captain Jack.

June 3

INDIAN: Several Modoc bands under Hooker Jim, having sensed the futility of fighting the army long-term, assist in the capture of Kintpuash (Captain Jack) near the Lost River, California. He is subsequently tried and hung on October 3 for the death of General Edward R. S. Canby.

June 12

EXPLORING: A small exploring party under Captain W. A. Jones, Corps of Engineers, departs Fort Bridger, Wyoming, and begins blazing a new trail into the Yellowstone region. Specifically, he is seeking a military route that will connect Yellowstone to the nearby Union Pacific Railroad line.

June 20

MILITARY: Lieutenant Colonel George A. Custer leads 10 troops of his 7th Cavalry as part of a 1,500-man column out of Fort Rice, Dakota Territory, and up the Yellowstone River. His mission is to scour the region for hostile Cheyenne and Sioux who have been harassing the Northern Pacific Railroad. However, when his commanding officer, Colonel David S. Stanley, is removed from command for drunkenness, Custer takes charge of the ensuing campaign.

June 25

MARINES: A detachment from the *St. Mary's* assists an Italian merchant vessel to battle an onboard fire at Callao, Peru.

July 8–11

INDIAN: Near Fort Selden, New Mexico, part of the 8th Cavalry engages in a running fight with hostile Indians, whereupon Sergeant Leonidas S. Lytle wins a Medal of Honor for bravery.

August 4

MILITARY: Lieutenant Colonel George A. Custer, scouting ahead of his main body with only his brother and 20 mounted scouts, is suddenly attacked by 300 Sioux and Cheyenne warriors along the Tongue River, Montana Territory. Custer deploys his men in the grass, then rises suddenly and delivers several point blank volleys into the mounted mass, driving them back in confusion. The enraged Indians then dismount and begin surrounding the defenders, but Custer and his men are rescued in the nick of time by the 7th Cavalry, which rides up to their rescue. His bold and adroit handling of men in combat, coupled with highly aggressive tactics, averts what might have been a minor disaster.

August 11

MILITARY: The 7th Cavalry under Lieutenant Colonel George A. Custer attempts engaging a large Sioux village near the mouth of the Rose Bud River, Montana Territory. His 450 men attempt to wade a river in front of the village when a party of warriors under Crazy Horse outflanks them and begins closing from the rear. Caught between two fires, Custer signals his men to mount, orders the regimental band to strike up “Garry Owen,” and the hard-bitten troopers suddenly change front and charge the enemy forming in front of them. The Indians scatter before the onslaught and escape from the battlefield while Custer recrosses the Yellowstone River at his leisure. American losses are three killed and four wounded to an estimated loss of 40 dead Indians. After this engagement the Sioux fail to mount serious resistance to the intruders.

September 24

NAVAL: Revolutionary violence prompts the screw steamer *Pensacola* and the screw sloop *Benicia* to land 190 men ashore in Panama to protect the all-important railroad.

October 3

INDIAN: At Fort Klamath, Oregon, Kintpuash (Captain Jack) and three other Modoc leaders are hung for the murder of peace commissioners while 150 of their followers are transferred to Fort Quapaw, Indian Territory (Oklahoma). It is not until 1909 that some are allowed back onto the Klamath Reservation in Oregon.

October 9

NAVAL: Fifteen naval officers, seeking an outlet for dissident points of view, form a professional society at Annapolis, Maryland, that is eventually called the United State Naval Institute. They also begin publication of their *Proceedings* to serve as an outlet for the opinions of members.

Custer, George Armstrong (1839–1876)

Army officer

George Armstrong Custer was born in New Rumley, Ohio, on December 5, 1839, and, in 1857, he gained entrance to the U.S. Military Academy, West Point. He proved a rather poor student, was nearly court-martialed for dereliction of duty, and graduated at the bottom of his class in 1861. However, the onset of the Civil War that year led to his commissioning into the cavalry, and Custer first experienced battle at Bull Run that August. He proved himself a dashing trooper, served as aide-de-camp to General George B. McClellan in 1862, and, the following year, rose to brigadier general at the age of 23. Custer was a literal whirlwind in combat, with his long blonde hair flowing while he rode at the front of his command. He lost no less than 11 horses killed under him. On May 11, 1864, he waged one of his most important actions, at Yellow Tavern, Virginia, where legendary Confederate leader General J. E. B. Stuart was morally wounded. That year he also served under the aggressive command of General Philip H. Sheridan, who effectively hounded Con-

federates under General Robert E. Lee until they surrendered at Appomattox in April 1865. Custer was now a national war hero and a brevet major general, but, under the demobilization scheme adopted by Congress, he reverted back to his regular rank of captain in 1866. The following year, in light of his sterling reputation and wartime celebrity, Custer advanced two grades to become lieutenant colonel of the newly formed 7th U.S. Cavalry, and he transferred to Kansas to fight Native Americans there.

Custer's first action in the west came as part of the thoroughly muddled campaign of General Winfield Scott Hancock on the middle Plains in 1866. The following year he faced a court-martial for being absent without leave, but he was reinstated to active duty within a year. In 1868 he teamed again with General Sheridan and, in November 1868, his men surprised and defeated a Cheyenne encampment under Chief Black Kettle at the Washita River, an action that while regarded by many as

October 31

NAVAL: The American steamer *Virginius* is captured by the Spanish warship *Tornado* as it attempts to carry weapons for insurrectionists in Cuba. No less than 30 members of the crew, among them several Americans, are executed by firing squad, including Captain Joseph Fry, a U.S. Naval Academy graduate. Their deaths provoke tremendous indignation and some cries for war in the United States.

November 24

MILITARY: The government issues a patent for barbed wire, which becomes a battlefield fixture in future land warfare.

atrocious, convinced many hostile bands to return to reservations. The army then reorganized. The 7th U.S. Cavalry was disbanded, forcing Custer to serve two years in Kentucky, but the unit was ultimately reinstated in 1873. That year Custer wrote his best-selling memoir *My Life on the Plains*, which further enhanced his national following. In 1874 he conducted a reconnaissance of the Black Hills region, sacred to Sioux and Cheyenne alike, where gold had been discovered. The large influx of prospectors pushed the Indians into open hostility by 1876 and Custer was initially assigned to a cavalry column of General Alfred H. Terry. That June, Terry dispatched Custer to scout the large Indian encampment along the Little Bighorn River, Montana, but he ordered him to avoid a fight. Custer, however, disregarded his instructions and attacked. Surrounded by several thousand mounted warriors, he and all his men were killed on June 25, 1876. The death of the vainglorious Custer and his men shocked the nation and underscored his legacy as one of America's most controversial Indian fighters.

Union general George A. Custer (Library of Congress)

1874

January 24

MARINES: In a rare, battalion-sized exercise, marines from the Atlantic Squadron under Lieutenant Colonel Charles Heywood perform field exercises to facilitate a possible landing in Cuba.

February 12

MARINES: At Honolulu, Hawaii, unrest occasioned by the coronation ceremony of King Kalakaua requires the sloop *Portsmouth* and screw sloop *Tuscarora* to land 150 sailors and marines ashore to restore order.

April 2

INDIAN: At Apache Creek, Arizona Territory, a detachment of the 5th Cavalry engages hostile Apache in close combat; Sergeant George Deary wins a Medal of Honor for heroism under fire.

June 6

MARINES: In light of declining manpower, Commandant Jacob Zeilin is reduced from brigadier general to colonel.

June 8

INDIAN: Cochise, noted warrior of the Chiricahua Apache, dies and is succeeded by his son Taza.

June 16

MILITARY: Congress slashes the size of the army to 25,000 men, forcing it to eliminate all recruiting efforts. Not until personnel levels fall below the assigned strength are recruiting efforts allowed to resume.

June 27

MILITARY: A raiding party of 700 Cheyenne, Kiowa, and Comanche Indians under Quanah Parker and Lone Wolf attacks the fortified trading post called Adobe Walls in the Texas Panhandle. However, the 29 buffalo hunters opposing them, equipped with .50-caliber, long-range Sharps rifles, commence picking off braves at a distance of one mile. Assurance from prophet Isa-Tai that his magic would protect them from the white man's bullets having failed, and unable to overcome this resistance, the discouraged warriors retire after a few hours of one-sided combat; losses are three hunters dead to about 15 Native Americans. However, this action signifies the start of the Red River War.

July

INDIAN: Commanding General William T. Sherman announces the end of President Ulysses S. Grant's "peace policy" toward Native Americans and instructs General Philip H. Sheridan to aggressively pursue and punish all hostile tribes. Sherman himself relocates his headquarters to Chicago, Illinois, after continual disagreements with Secretary of War William W. Belknap.

July 2

MILITARY: To the tune of "Garry Owen," Lieutenant Colonel George A. Custer leads 10 companies of his 7th Cavalry out of Fort Abraham Lincoln, Dakota Territory, and begins exploring the Black Hills region. This was then a part of the Great Sioux Reservation and the intrusion did much to escalate hostilities between both sides. Custer is there to verify the presence of valuable mineral deposits in the region, especially gold, and he is accompanied by civilian specialists in geology, topography, and paleontology. The Americans are also assisted by a large party of Crow scouts under Bloody Knife.

July 3

INDIAN: War bands of Arapaho and Cheyenne attack and burn a wagon train near present-day Hennessy, Oklahoma.

July 17

MILITARY: Lieutenant Colonel Thomas H. Neill, 6th Cavalry, constructs Fort Reno, Oklahoma, for the purpose of protecting the nearby Darlington Indian Agency.

July 22

MILITARY: The cavalry column of Lieutenant Colonel George A. Custer enters the Black Hills region of the Dakotas, which is held as sacred ground to the Sioux and other tribes. At this juncture, his Arikara and Santee scouts, fearing Sioux retaliation if they proceed farther, recuse themselves from the expedition. Undeterred, Custer orders the 7th Cavalry forward.

July 27

MILITARY: At Fort Leavenworth, Kansas, General John Pope orders men of the 6th Cavalry and 5th Infantry to begin marshaling at Fort Dodge and then to start sweeps against hostile Indians on the southern Plains.

July 30

MILITARY: The cavalry column of Lieutenant Colonel George A. Custer wends its way along the banks of French Creek, Dakota Territory, and the soldiers began encountering gold deposits, which verifies the reports of various prospectors.

July 31

NAVAL: The screw steamer *Intrepid*, the navy's first experimental torpedo ram, is commissioned at Boston, Massachusetts, although its service life is unsuccessful.

August 2

INDIAN: General George A. Custer confirms the discovery of gold in the Black Hills region of the Dakota Territory, a tract previously reserved by treaty for the Sioux nation. This news results in an influx of miners and prospectors onto Indian land, which greatly angers the inhabitants.

August 30

MILITARY: The military expedition of Lieutenant Colonel George A. Custer trots back into Fort Abraham Lincoln, Dakota Territory, after exploring the Black Hills region of the Great Sioux Reservation. It had been an impressive jaunt covering 1,205 miles in 60 days and was accomplished without violence. The intrusion does much to exacerbate tensions with tribes claiming the hills as sacred land, but hereafter hungry prospectors continue swarming into the region. Colonel Nelson A. Miles leads the 5th Infantry and the 6th Cavalry in a lengthy pursuit of Cheyenne and Kiowa war parties along the Red River, Oklahoma. The ensuing running skirmish lasts five hours and culminates with a determined stand by the warriors at Tule Canyon, at which point the troopers withdraw due to lack of provisions.

September 9–12

MILITARY: Hostile Kiowa and Comanche under Lone Wolf, Satanta, and Big Tree attack Major William R. Price's supply train along the Washita River, Texas, and are rebuffed after a three-day siege. Sergeants Fred S. Hay and William DeArmond distinguish themselves in action and win Medals of Honor.

September 12

INDIAN: In Hemphill County, Texas, four soldiers and two Indian scouts withstand an attack by over 100 Comanche and Kiowa warriors, who gradually withdraw.

September 22

NAVAL: In Annapolis, Maryland, Rear Admiral C. R. P. Rodgers gains appointment as the eighth superintendent of the U.S. Naval Academy.

September 26

MILITARY: A force of around 250 Comanche warriors attacks the 4th Cavalry bivouac of Colonel Ranald S. Mackenzie and attempts to stampede its horses. The raiders are quickly detected and driven off by alert sentinels.

September 28

MILITARY: A column of the 4th Cavalry under Colonel Ranald S. Mackenzie surrounds and attacks a body of Kiowa, Cheyenne, and Comanche Indians at Palo Duro Canyon, Texas, destroying their winter camp, food supplies, and stampeding 1,500 ponies. This demoralizing defeat forces many of the warriors to surrender at nearby reservation agencies and the Red River War draws to a close. Private Adam Paine also wins a Medal of Honor for heroism in combat.

November 1

INDIAN: Near Sunset Pass, Arizona Territory, part of the 5th Cavalry engages hostile Apache and Sergeant Bernard Taylor rescues an officer from imminent capture, winning a Medal of Honor.

December 4

INDIAN: At Gageby Creek, Oklahoma, the 6th Cavalry wages a battle with hostile Indians and Sergeant Dennis Ryan wins a Medal of Honor for bravery.

December 8

INDIAN: At Staked Plains, Muchague Valley, Texas, the 4th Cavalry pursues and battles hostile Indians, and Private Frederick Bergerndahl distinguishes himself in combat, winning a Medal of Honor.

December 23

MILITARY: Fort Yates is established as the headquarters of the Standing Rock Indian Agency, North Dakota.

1875***January 5***

NAVAL: Commander E. R. Lull conducts an expedition from Norfolk, Virginia, to Panama, looking for a suitable route to construct a canal.

February 3

MILITARY: Men of the 4th Cavalry under Major Henry C. Bankhead erect Fort Elliot at the headwaters of Sweetwater Creek, Texas, to keep an eye on nearby Indian reservations.

March 6

INDIAN: Bested in the brief but bloody Red River War, over 800 Cheyenne under Chief Gray Beard surrender to authorities at the Darlington Agency, Indian Territory (Oklahoma).

April 12

INDIAN: Native Americans Sergeant Alchesay and Corporal Elsatsoou, both of the Indian Scouts, receive Medals of Honor for service rendered against the Apache in 1872–73.

April 23

INDIAN: At Sappa Creek, Kansas, a six-man detachment from the 6th Cavalry steals behind a strong Cheyenne war band and attacks, surprising them and driving them from a strong position as the main body gallops up.

April 25

MILITARY: Civilian geologists, prospectors, and scientists entering the Black Hills, Wyoming, receive an escort of 400 soldiers and 75 supply wagons. They are there to conduct a four-month search for additional sources of gold, much to the resentment of neighboring Sioux.

- At Pecos River, Texas, four Indian scouts attack a larger force of hostile Indians, forcing them to retreat. Their bugler, Isaac Payne, wins a Medal of Honor.

May

INDIAN: Exhausted Comanche war bands under Quanah Parker surrender to military authorities at Fort Sill, Indian Territory (Oklahoma). Parker, who is half white, strikes up cordial relations with Colonel Ranald S. Mackenzie, whom the Indians have dubbed “Bad Hand” because of a Civil War injury.

May 21

INDIAN: The transfer of 72 Kiowa, Cheyenne, and Arapaho Indians to Fort Marion, Florida, is completed. They remain incarcerated for three years to diminish their influence over tribesmen living on the southern Plains.

June 2

MILITARY: Lieutenant Adolphus W. Greely, 4th Infantry and a future explorer of note, runs the first telegraph wire through Indian Territory (Oklahoma) and establishes a direct link between Fort Bliss, Texas, and Fort Sill.

June 12

INDIAN: Taza, chief of the Chiricahua Apache, orchestrates his people’s relocation to the San Carlos Reservation in New Mexico. However, a body of 400 hold-outs, including Geronimo, flee to Mexico rather than move.

June 18

NAVAL: The side-wheel steam sloop *Saranac* under Captain Walter W. Queen strikes a rock in the Seymour Narrows off Vancouver and sinks without loss of life.

November 9

INDIAN: In an event carrying serious consequences, Indian inspector E. C. Watkins identifies Hunkpapa Sioux under Sitting Bull and Oglala Sioux under Crazy Horse, along with hundreds of followers, as potentially hostile. He urges the government to inform them that they must report to designated reservations on or by January 31, 1876, after which matters would be handed to the War Department.

December

INDIAN: In a major escalation of tensions, the federal government orders the Sioux nation to return to its reservations no later than January 31, 1876, or face military action. This is despite the fact that prospectors are presently allowed to work in the Black Hills section of land allotted to the Indians. Sitting Bull and Crazy Horse begin marshaling their warriors for action.

1876

MILITARY: Congress establishes manpower levels for the army at 27,442 rank and file, a number that does not change substantially until the Spanish-American War of 1898. The secretary of war also directs all inspectors general to report to local commanders instead of to the War Department, thereby ending their reputation as spies for higher headquarters.

February

POLITICS: Secretary of War William W. Belknap is accused of suborning a bribe by contractor Caleb P. Marsh; an investigation uncovers that Belknap has received nearly \$25,000 in kickbacks from the Indian trading post lobby.

February 1

INDIAN: In Washington, D.C., Secretary of the Interior Chandler notes that hundreds of Sioux tribesmen under Sitting Bull and Crazy Horse have failed to report to reservations as ordered. He then turns matters over to the War Department for resolution.

February 3

MILITARY: In Washington, D.C., Secretary of War William Belknap assures the secretary of state that the army is being authorized to take immediate action against any northern Plains Indians who have failed to report to reservations in the specified time frame.

February 8

MILITARY: Lieutenant General Philip H. Sheridan issues orders from his headquarters in the Division of the Missouri for the subjugation of the Sioux and their forced return to reservations. Sheridan directs that one column under Brigadier General George Crook proceed north from Fort Fetterman, Wyoming, with 1,000 troopers, while a second column under Brigadier General Alfred H. Terry moves up the Yellowstone River with 1,000 men. A third column under Colonel John Gibbon marches from Fort Ellis, Montana. Sheridan anticipates that the converging forces will trap the Indians and induce their immediate surrender.

March 2

MILITARY: In Washington, D.C., the House of Representatives votes in the affirmative to impeach Secretary of War William W. Belknap on corruption charges; he resigns from office even though his trial in the Senate finds him not guilty.

March 8

MILITARY: Alphonso Taft gains appointment as secretary of war, although he serves only three months before transferring to the position of attorney general. His son, William Howard Taft, is elected president in 1909.

March 17

MILITARY: In a preliminary skirmish, the 3rd Cavalry under Colonel Joseph Reynolds surprises a combined Lakota/Cheyenne village along the Powder River, Montana Territory. The defenders, under Two Moons, are initially stampeded, but they are eventually rallied by Chief Crazy Horse and charge back into battle. Their frenzied approach so unnerves Reynolds that he retreats, abandoning several soldiers' bodies and one wounded trooper to the enraged Indians. General George Crook is furious over Reynold's failure to hold the village, and he files court-martial charges against him. During the withdrawal, formal title on rank blacksmith Albert Glavinski, 3rd Cavalry, fights with distinction and wins a Medal of Honor. This defeat also alerts the tribesmen that the army is bearing down on them in large numbers and they prepare themselves accordingly.

April 28

INDIAN: Near Fort Hardstuff, Nebraska, hostile Indians position themselves strongly for a battle with soldiers. However, a three-man detachment under Lieutenant Charles H. Heyl, 23rd Infantry, steals their way behind the Indians and attacks, driving them into the open. Heyl and his compatriots all win Medals of Honor.

May 16

MARINES: A detachment comes ashore at Matamoros, Mexico, at the behest of the American consul there after civil authority collapses in the face of revolutionary violence.

May 17

MILITARY: General Alfred H. Terry departs Fort Abraham Lincoln, Dakota Territory, with a column of cavalry and infantry, which includes the 7th Cavalry under Lieutenant Colonel George A. Custer. His orders are to march westward as far as the Yellowstone River, then move upstream in a southwesterly direction until the hostile tribes are encountered. Custer was nearly removed from command owing to personal problems and regimental politics, but a last-minute intercession by Terry keeps him in the saddle.

May 22

MILITARY: In Washington, D.C., James D. Cameron is tapped to replace Alphonzo Taft as secretary of war.

May 29

MILITARY: A column of 1,000 cavalry and infantry under Brigadier General George Crook departs Fort Fetterman, Wyoming, and swings north as part of a three-pronged strategy to ensnare hostile Indians in the Little Big Horn Region, Montana Territory. En route, Crook is to rendezvous with 260 Shoshoni and Crow allies who volunteer to fight their hereditary enemy, the Sioux.

June 8

INDIAN: Lakota shaman Sitting Bull is visited by a strong vision of upside down soldiers—symbolic of being dead—that inspires his warriors with confidence for the coming fight.

June 17

MILITARY: General George Crook leads 1,700 cavalry, infantry, and allied Indians into combat against similar numbers of Lakota Sioux and Cheyenne under Crazy Horse at Rosebud Creek, Montana Territory. Rather than skirt the army's flanks and harass it, Crazy Horse changes tactics and unexpectedly charges the troopers head-on. The ensuing struggle lasts six hours and entails scores of casualties on both sides, then ends in a draw. The Americans reportedly lose only 10 dead and 21 wounded, but Crook's column is so incapacitated that it is effectively removed from the campaign for two months; Indian losses are not known but presumed significant.

June 21

MILITARY: On the steamboat *Far West*, anchored in the Yellowstone River, General Alfred H. Terry confers with his principal subordinates, Colonel John Gibbon and George A. Custer, as to their upcoming strategy. Hereafter, Custer is ordered to ride south along Rosebud Creek to the headwaters of the Little Bighorn River while Gibbon and Terry will follow the Yellowstone to the Bighorn River, and then jointly ascend the Little Bighorn. It is hoped they will catch the Indians in a large pincher movement. However, the leaders are unaware of General George Crook's recent retreat after Rosebud Creek.

June 22

MILITARY: Colonel George A. Custer and his 7th Cavalry gambol down the banks of the Little Big Horn River, hoping to rendezvous with Colonel John Gibbon's force and catch hostile Indians in a pincer movement. They are assisted by 35 Arikara, Crow, and Dakota Indians serving as scouts. However, General Alfred H. Terry has specifically ordered the impetuous Custer not to engage the enemy until Gibbon is within supporting distance. Custer, true to form, ignores his instructions.

June 24

MILITARY: A cavalry column under Colonel George A. Custer, moving along the banks of the Little Bighorn River, espies a large encampment of Indian warriors under Gall, Crazy Horse, and Two Moons. Present are members of six different nations, including Cheyenne, San Arc, Miniconjoux Sioux, Oglala Sioux, Blackfeet, and Hunkpapa Sioux, whose encampment stretches three miles and contains upward of 15,000 inhabitants. It is the most formidable collection of Native-American military might ever assembled, but Custer, trusting to luck, immediately makes dispositions to divide up his small force and attack. This is done in direct contravention of orders.

June 25

MILITARY: The seminal Battle of Little Bighorn unfolds as Colonel George A. Custer and 12 small companies of his 7th Cavalry, totaling little more than 250 men, attack an Indian encampment housing an estimated 15,000 Indians, of which roughly 2,000 to 3,000 are warriors. Repulsed, Custer hastily forms a skirmish line on a nearby hilltop while detachments under Major Marcus A. Reno and Captain Frederick W. Benteen are pinned down and unable to assist him. The

**Crazy Horse** (ca. 1849–1877)*Sioux chief*

Crazy Horse (Tashunca-Uitco) was born near present-day Rapid City, South Dakota, around 1849, a member of the Oglala Sioux nation. He first came to the attention of tribal elders during the Red Cloud War by playing prominent roles in the Fetterman Massacre of December 21, 1866, and the Wagon Box Fight of August 2, 1867. He distinguished himself in combat as a warrior, but he was considered unusual for a Sioux brave by his sullen, reserved nature and insistence upon not taking scalps. After 1868 Crazy Horse refused to follow Red Cloud onto reservations established by the American government. He took a band of approximately 1,200 Sioux northward to join the followers of Sitting Bull. Approximately half of these were Cheyenne, owing to his marriage to a tribal woman. Once settled, he resumed his traditional ways of raiding Crow villages, hunting Buffalo, and attacking prospectors looking for gold on Indian land. In 1873 Crazy Horse skirmished briefly with a future antagonist, Lieutenant Colonel George Armstrong Custer, and two years later Custer certified that gold was discovered in the Black Hills region of South Dakota. This land, regarded as sacred to the Sioux, had already been promised to them by government agents and they angrily resented the intrusion. Worse, in December 1875, the Bureau of Indian Affairs issued an ultimatum that any Indian not confined to a reservation by the end of January 1876 would be considered hostile and subject to military

action. This threat prompted the Sioux and other tribes to mobilize several thousand mounted warriors in open defiance and a large-scale uprising broke out. Crazy Horse, the quiet warrior, was destined to play a prominent role in one of the final, defining acts of the Indian resistance.

Crazy Horse assumed command of approximately 1,600 Sioux and Cheyenne warriors. On June 17, 1876, he attacked the mounted column of General George Crook along the Rosebud River, fighting it to a draw and inflicting considerable losses. Consequently, Crook withdrew from the field to regroup and was unable to rendezvous with another column under General Alfred H. Terry. The spearhead of this force, the 7th U.S. Cavalry under Custer, had happened upon the large Indian encampment at Little Bighorn River and attacked before reinforcements could arrive. Crazy Horse, aided by Gall and other chiefs, promptly sallied out of the village, attacked en masse, and killed Custer and all of 268 of his men. The army then renewed its efforts to crush the uprising and another force under Colonel Nelson A. Miles drove Crazy Horse's band all winter long. The chief finally surrendered to authorities on May 5, 1877, and he was interned at the Fort Robinson agency. Red Cloud and other Sioux elders, who resented the youthful chief's influence, alerted General Crook that he may have been plotting a rebellion. Crazy Horse, however, resisted arrest and died after being bayoneted on September 7, 1877.

Indians, surrounding the Americans, gradually whittle down their number before finally settling the issue in a final bold rush. The 7th loses 268 dead—Custer among them—and 50 wounded in less than two hours. Indian losses are not recorded but may have been as high as 100. The fallen soldiers are all horribly mutilated by the victorious Indians—except for Custer, known to them as “Yellow Hair,” who suffers only the indignity of having a fingertip cut off. The defeat stuns public opinion and prompts the government to pursue the war more vigorously. Curiously, this is not the biggest military defeat at the hands of Native Americans—that melancholy distinction remains with General Arthur St. Clair in 1791.

June 26

MILITARY: Despite the disaster before them, the remaining companies of the 7th Cavalry under Major Marcus Reno and Captain Frederick Benteen remain ensconced on their hilltop position; the Indians, unwilling to attack and fearing reinforcements, begin dismantling their camp and dispersing.

June 27

MILITARY: The main body of General Alfred E. Terry arrives at Little Big Horn and rescues the survivors of Major Marcus A. Reno’s detachment. The great mass of victorious Indians, meanwhile, have split up into various groups and dispersed. As the nation prepares to celebrate its bicentennial, word of the disaster of Little Bighorn begins arriving by telegraph, much to the dismay of a shocked public.

July 5

MILITARY: Congress approves a plan expanding the number of army officers allowed to teach at colleges from 20 to 30.

July 7

INDIAN: At the head of the Tongue River, Montana Territory, a band of Sioux and Cheyenne approach a band of scouts attached to the army of Brigadier General George Crook. Unwilling to parley, the Americans open fire, killing a Cheyenne and scattering the rest as they slip away.

July 8–11

INDIAN: Near Fort Seldon, New Mexico, the 8th Cavalry skirmishes with hostile Indians attempting to harass the garrison; in one of many small engagements, Corporal Frank Batting wins a Medal of Honor.

July 9

MILITARY: At Big Horn, Montana, Private William Evans, 7th Infantry, volunteers to serve as a courier and ride through the heart of hostile Sioux country to deliver messages to Brigadier General George Crook. He succeeds and wins a Medal of Honor.

July 17

MILITARY: The 5th Cavalry under Colonel Wesley Merritt engages and defeats a party of Northern Cheyenne at Warbonnet Creek, Nebraska Territory, whereupon Chief Yellow Hair is killed. The chief is then scalped by celebrated scout William F. Cody, who later restages this battle in his Wild West Show under the stage name of Buffalo Bill. The surviving Indians are discouraged and head back to the Red Cloud Agency.

August 2

INDIAN: A party of infantry under Major Orlando H. Moore forms up on a ridge line overlooking Wolf Rapids on the Rosebud River, Montana Territory. He is also armed with a 12-pounder Napoleon howitzer and a Gatling gun, both of which come in handy when a large party of Sioux warriors appear. A soldier and an Indian die in the ensuing skirmish.

August 15

MILITARY: Congress reacts to the Little Bighorn disaster by authorizing an additional 2,500 cavalrymen for the army, but no new units are created to the order of battle. Instead, the recruits are simply added to flesh out existing cavalry companies.

September

INDIAN: Chief Sitting Bull manages to evade pursuing American troops and flees to Canada. The bulk of his fellow Sioux, however, will be mercilessly hounded throughout the winter months until they finally consent to deportation to reservations.

September 7

MILITARY: Brigadier General George Crook details 150 troopers under Captain Anson Mills, 3rd Cavalry, to detach from his main column and proceed 100 miles to Deadwood, Dakota Territory, to procure kindling. En route Anson espies a large Indian village at Slim Buttes and prepares to attack.

September 9

MILITARY: Vengeful troopers under Captain Anson Mills, 3rd Cavalry, engage a band of Oglala and Minneconjou Sioux under American Horse at the Battle of Slim Buttes, Dakota Territory. The Indians scatter and take up defensive positions in a gulch, killing three troopers and wounding 12. However, Chief American Horse, who has taken refuge in a cave, is fatally wounded in the stomach before Crazy Horse arrives with reinforcements. The battle continues nonstop until the main column under General George Crook appears, at which point the Indians disengage and escape. American Horse's death is upheld as appropriate revenge for Custer's death, even though his participation at Little Big Horn has never been confirmed.

October 12

MILITARY: Captain Edwin Pollack, 9th Infantry, constructs Fort McKinney, Wyoming, to support operations by Colonel Ranald S. Mackenzie, 4th Cavalry, against hostile Sioux.

October 21

INDIAN: An inconclusive skirmish unfolds at Cedar Creek, Montana Territory, between Colonel Nelson A. Miles and 500 men of the 5th Infantry and a large force of Sioux under Sitting Bull. When the Indians refuse an order to surrender, Miles advances to attack but the Indians simply draw off and head for Canada.

October 25

MARINES: The Navy Department assigned the service motto "Per Mare, Per Terram" (By Sea, By Land) to the Marine Corps in light of their combined operations with the army in the Mexican War.

November 1

MARINES: In Washington, D.C., Colonel Charles G. McCawley becomes the eighth Marine Corps commandant following the retirement of Jacob Zeilin.

November 14

MILITARY: Colonel Ranald S. Mackenzie, 4th Cavalry, departs Fort Fetterman, Wyoming, at the head of 2,200 men in a search to find and defeat Crazy Horse. His column includes a force of 400 Indian scouts from various allied tribes. He proceeds through deep snow up the Bozeman Trail for the Powder River region.

November 25

MILITARY: General George Crook dispatches a cavalry column under Colonel Ranald S. Mackenzie, 4th Cavalry, and his Pawnee mercenaries, to attack a Cheyenne village along the Red Fork of the Powder River, Wyoming Territory. The troopers, thirsting to avenge the death of Lieutenant Colonel George A. Custer and his men, storm into the sleeping village with a vengeance, killing 40 inhabitants and scattering the rest. American losses are three dead and 26 wounded. Chiefs Dull Knife and Little Wolf escape their pursuers, but they lose their pony herd and village. American losses are six dead and 26 wounded. The tribesmen, especially women and children, endure subzero weather with only the clothing on their backs.

December 18

MILITARY: A force of soldiers under Lieutenant Frank D. Baldwin advances upon a Sioux village at Ash Creek, Montana Territory. A preliminary exchange of fire forces the inhabitants to flee, at which point the Americans seize the encampment and capture 60 horses.

1877**January 8**

MILITARY: General Nelson A. Miles, having captured a number of Cheyenne women and children in a village near Wolf Mountain, Montana Territory, is attacked by 500 Sioux and Cheyenne warriors under Crazy Horse, who are attempting to rescue them. Miles is well prepared to receive them, having artillery with him, and the Indians are repulsed with few losses to either side. The entire engagement transpires in the middle of a raging snowstorm.

January 13

INDIAN: Near Elkhorn Creek, Wyoming, a five-man detachment from the 3rd Cavalry is ambushed by 14 hostile Indians, suffering three wounded. However, they manage to hold off their antagonists and the Indians gradually withdraw.

January 20–22

INDIAN: Parts of the 3rd Cavalry engage hostile Indians near Bluff Station, Wyoming, in a series of running engagements. Sergeant William B. Lewis wins the Medal of Honor for bravery under fire.

January 24

INDIAN: In the Florida Mountains, Arizona Territory, a detachment of the 9th Cavalry is sent to convince a hostile band of Apache to surrender. However,

fighting breaks out once the Indians surround the troopers, who are forced to fight their way out. Corporal Clinton Greaves wins a Medal of Honor for bravery under fire.

February 12

MILITARY: Fort Huachuca, Arizona, is constructed by Captain Samuel M. White-side only 15 miles north of the Mexican border to protect settlers from hostile Apache.

March 12

MILITARY: In Washington, D.C., President Rutherford B. Hayes appoints George W. McCrary his new secretary of war.

March 13

NAVAL: In Washington, D.C., former congressman Richard W. Thompson is sworn in as the 27th secretary of the navy.

April 3

MILITARY: Lieutenant Colonel William R. Shafter leads a column of troops over the Mexican border to Piedras Negras to secure the release of two Mexican nationals held in jail who had previously assisted the army. The episode engenders a diplomatic row between the United States and Mexico.

April 16

MILITARY: A detachment of the 2nd Infantry under Lieutenant Colonel Henry C. Merriam constructs Fort Sherman on Lake Coeur d'Alene, Idaho, to protect nearby settlements.

April 20

INDIAN: Indian agent John P. Clum arrests Apache chief Geronimo on the Ojo Caliente Reservation, Arizona Territory, and transfers him to the San Carlos Reservation.

April 24

MILITARY: President Rutherford B. Hayes orders the last few remaining army troops withdrawn from New Orleans, Louisiana. This act finally ends the period in Southern history known as Reconstruction.

May 3

INDIAN: General Oliver O. Howard orders the remainder of the “non-treaty” Nez Perce Indians off their ancestral homes in the Snake River region of Oregon and onto reservations. Chief Joseph and other leaders seek to comply and avoid violence, but resentment is growing.

May 6

INDIAN: Noted Lakota warrior Crazy Horse surrenders himself, 1,000 warriors, and 2,500 ponies at Camp Robinson, Nebraska. Observers noted he did not appear broken in spirit; rather, he was chanting war songs along with his followers.

May 7

MILITARY: Army troops under General Nelson A. Miles engage and defeat a party of hostile Lakota under Lamé Deer and Iron Star in their camp along Little Muddy Creek, Montana Territory. The chiefs are slain even though they had put

down their weapons and attempted to surrender. Sioux losses are 14 dead while the Americans sustain four killed and seven wounded. This is the final engagement for the Great Sioux War, which was disastrous for the Plains Indians. Farrier William H. Jones wins a Medal of Honor for bravery under fire.

June 1

MILITARY: In Washington, D.C., Secretary of War George W. McCrary authorizes army units to perform “hot pursuit” into Mexican territory to apprehend bands of lawless marauders.

June 13

INDIAN: Youthful Nez Perce warriors, angered by their mistreatment from whites, kill four settlers in the Wallowa Valley, Washington, then flee northward under Chief Joseph. Troops under General Oliver O. Howard are then hurriedly dispatched in pursuit.

June 14

MILITARY: Henry O. Flipper becomes the first African American to receive his 2nd lieutenant’s commission from the U.S. Military Academy, West Point. His deployment options are limited on account of his race and he is posted immediately with the all-black 10th Cavalry, the famous “Buffalo soldiers.”

June 17

MILITARY: The Nez Perce War erupts when tribal leader Chief Joseph’s band engages two troops of cavalry under Captain David Perry, 1st Cavalry, ambushing them in White Bird Canyon, Idaho Territory. Indian fire kills 24 Americans and wounds 10 while Nez Perce losses amount to three wounded. Chief Joseph then flees with 400 tribesmen eastward over the Rocky Mountains before reinforcements arrive.

June 25

MILITARY: Fort Missoula, Montana, is constructed by Captain Charles C. Rawn, 7th Infantry, to suppress a possible uprising by the Salish Indians as they are transferred to the Jocko Indian Reservation.

June 26

MILITARY: A column of 225 soldiers and 20 scouts under Brigadier General Oliver O. Howard enters White Bird Canyon expecting a fight, only to discover that the Nez Perce had long fled. They pause only to bury the dead from the June 17 battle, then press on.

July 4

MILITARY: Lieutenant Colonel George P. Buell, 11th Infantry, constructs Fort Custer at the confluence of the Bighorn and Little Bighorn Rivers, Montana, to exert military control over the Sioux.

July 4–5

INDIAN: At Cottonwood Creek, Idaho Territory, a band of 12 army scouts under Lieutenant S. M. Rains stumbles upon the main camp of Nez Perce Indians and are killed to a man. The tribe then quickly departs the area.

**Flipper, Henry O. (1856–1940)***African-American officer*

Henry Ossian Flipper was born in Thomasville, Georgia, on March 21, 1856, the son of slave parents. After the Civil War, he attended schools run by the American Missionary Association, applied to the U.S. Military Academy, West Point, in 1873 and he gained admittance under the auspices of Republican congressman James C. Freeman. Flipper was not the first minority student to matriculate at West Point; two other African Americans, Michael Howard and James Webster, had proceeded him in 1870, but neither graduated. He then endured rigorous academic demands and intense racial animosity for four years before graduating 50th in his class of 76 on June 14, 1877. Flipper was then commissioned a second lieutenant in the all-black 10th U.S. Cavalry, the famous “Buffalo soldiers,” and served under Colonel Benjamin Grierson on the western frontier. He proved a capable soldier for four years in performing routine duties such as mosquito control at Fort Sill, Oklahoma, and installing telegraph wires in and out of Fort Elliott, Texas. His most significant accomplishment was during the 1880 Indian war against the renegade Apache Victorio, when Colonel Grierson highly commended his conduct as an officer and a soldier. However, while serving as acting commissary of subsistence at Fort Davis, Texas, Flipper was charged with embezzling \$3,000 in government property—a charge he vehemently denied—and was court-martialled. He was eventually cleared of all charges relating to theft but his superior, Colonel William R.

Shafter, found him guilty of “conduct unbecoming an officer and a gentleman.” Flipper was consequently discharged from the service on June 30, 1882, which he bitterly attributed to the prejudice of his peers.

Back in civilian life, Flipper applied the talents he learned in the military to good effect. From 1893 to 1901 he served as a special agent for the Justice Department and also distinguished himself as a cartographer for various Mexican and American mining companies. Fluent in Spanish, he translated several treaties on Mexican laws and, in 1921, Secretary of the Interior Albert B. Fall appointed him his assistant. He joined a commission tasked with the location, construction, and operation of railways in Alaska. Two years later he quit his government post to work for a number of oil companies in the United States and Venezuela, and he published a legal treatise on the latter. Flipper died at Atlanta, Georgia, on May 9, 1940, all but forgotten. However, after the U.S. armed forces were desegregated in 1947, moves were taken to reexamine Flipper’s court-martial proceedings. Officials found it so blatantly racist that they reversed the verdict and granted him an honorable discharge. Moreover, in 1977 a bust of Flipper was formally unveiled at West Point, signifying recognition from the very institution that had once so scorned him. In December 1978, his remains were also reinterred with full military honors, extending to West Point’s first African-American graduate the respect that was denied him in life.

July 11–12

MILITARY: General Oliver O. Howard surprises the Nez Perce encampment of Chief Looking Glass on the Clearwater River, Idaho Territory, attacking with 400 soldiers of the 4th Artillery and 100 volunteers, backed by artillery and Gatling guns. The Indians, however, fight tenaciously and hold their ground long enough for their families to flee eastward toward the perceived safety of the Bitterroot Mountains. American losses are 13 dead and 27 injured to an Indian tally of four killed and six wounded. However, the battle induces Chief Joseph to order the tribe eastward and seek refuge among the Crow Indians.

July 16

LABOR: Violence erupts once President Rutherford B. Hayes orders federal troops and militia to break up a strike of workers on the Baltimore and Ohio Railway in Martinsburg, West Virginia. This represents the first use of troops against workers since Andrew Jackson's time.

July 21

MARINES: Lieutenant Colonel Charles Heywood leads a battalion of marines from the Washington Navy Yard to Baltimore, Maryland, to protect railroad property during violent strike activity.

July 26

MARINES: Another battalion of marines is cobbled together at the Norfolk Navy Yard, Virginia, under Lieutenant Colonel James Forney and dispatched to guard railroad facilities and tracks in Baltimore.

August

INDIAN: A body of 940 Northern Cheyenne are relocated to the Cheyenne and Arapaho Indian Agency, Oklahoma, where they are settled among Southern Cheyenne already living there. The two groups coexist uneasily and a renegade group of 375 Northern Cheyenne under Dull Knife, Little Wolf, and Wild Hog begin planning their escape.

August 9–10

MILITARY: Six companies of the 7th Infantry under Colonel John Gibbon surprise the Nez Perce fugitives at Big Hole River, Montana Territory. However, the Indians quickly regroup and resist tenaciously, driving the Americans off. Gibbon suffers 31 dead and 38 wounded to a Native-American loss of 77, including women and children. Private Wilfred Clark, a sharpshooter, distinguishes himself in combat and wins a Medal of Honor. The Nez Perce successfully disengage and flee their pursuers at night. However, Chief Looking Glass, who insisted that the tribe stop here to rest, loses much of his influence.

August 15

INDIAN: At Birch Creek Canyon, Idaho Territory, a band of Nez Perce Indians capture a wagon train manned by five whites and two Chinese. They break into the stores, get drunk, and then kill all the whites.

August 20

MILITARY: A Nez Perce raiding party surprises army troops at Camas Meadows, Idaho Territory, during the night and absconds with 150 mules. A party of cavalry pursues the marauders for eight miles until they reach a lava bed and are pinned

down for several hours by sniper fire. The Nez Perce escape intact while the Americans suffer one dead, seven wounded—and considerable embarrassment.

September 2

INDIAN: The Mimbreno Apache leader Victorio, fed up with horrid living conditions at the San Carlos Reservation, Arizona Territory, stages a mass escape with 300 followers and begins roaming and raiding across New Mexico.

September 5

INDIAN: Noted Lakota warrior chief Crazy Horse is bayoneted by troops at Fort Robinson, Nebraska, after pulling out a knife and resisting arrest. The commanding officer was apparently unnerved at growing unrest among Indians at the fort and suspected the chief of complicity.

September 9

INDIAN: A band of Northern Cheyenne under Dull Knife and Little Wolf, uncomfortable living on a reservation in close proximity with Southern Cheyenne and Arapaho, stages a mass escape and make for their old homelands in Montana and Wyoming.

September 13

MILITARY: Six troops of the 7th Cavalry, under Colonel Samuel D. Sturgis, attempt to trap the fleeing Nez Perce Indians at Canyon Creek north of the Yellowstone River, Montana Territory. They then launch a slow advance into the canyon under a long-range exchange of rifle fire, but the Indians beat off their antagonists with considerable loss and elude their pursuers once again. Sturgis loses three dead and 11 wounded; he is roundly criticized for his mishandling of affairs.

- As the Cheyenne bands of Dull Knife and Little Wolf flee north toward their ancestral homelands, they are set upon by several hundred soldiers and volunteers along the Cimarron River, Oklahoma. A running fight ensues in which Indian women and children are the principal casualties.

September 30

MILITARY: Following a pursuit of 1,700 miles, troops of the 2nd and 7th Cavalries under Colonel Nelson A. Miles overtake the Nez Perce under Chief Joseph at Bear Paw Mountain, Montana, and a bloody battle ensues. Miles, eager to win the battle before supporting troops under Colonel Samuel D. Sturgis and Brigadier General Oliver O. Howard can arrive, launches a frontal assault and is roundly repulsed by accurate Indian fire, losing 21 killed and 38 wounded, including many officers, in minutes. He then elects to besiege their position and simply starve them out. The two sides continue to exchange desultory fire over the next five days. The Nez Perce, now within 40 miles of the Canadian border, remain pinned down in their position in freezing cold weather.

October 5

INDIAN: Additional fighting at Bear Paw Mountain, Montana Territory, results in the death of Nez Perce chief Looking Glass. Chief Joseph and his half-starved band finally surrenders to Brigadier General Oliver O. Howard within a few miles of the Canadian border. This concludes an epic, 1,300-mile trek while being pursued by four different army columns. At the time the chief eloquently declared, “I am tired; my heart is sick and sad. From where the sun now stands I will fight no

**Joseph** (ca. 1840–1904)*Nez Perce chief*

Joseph was born Hin-mah-too-yah-latkekt (Thunder rolling down from the Mountains) around 1840, in the Wallowa Valley, Oregon. He was the son of a Cayuse father and a Nez Perce mother. His father, a Christian convert named Joseph, had ceded large tracts of tribal land to the United States in 1855 in exchange for the preservation of their remaining homeland. However, once gold was discovered in the Wallowa Valley in 1861, the government began pressuring the tribe to move. Joseph the elder resisted until his death in 1871, at which point the younger Joseph succeeded him. The Nez Perce won a temporary respite in 1873, when President Ulysses S. Grant declared the Wallowa Valley to be a Nez Perce reservation. An uneasy truce existed for six years until 1877, when General Oliver O. Howard gave the Indians an ultimatum to report to a nearby reservation or be deported by force. Joseph, who was not a war chief, advocated passive

resistance until despondent members of his tribe got drunk and massacred some settlers. The army responded by dispatching a force of cavalry, which was defeated by the Indians at White Bird Canyon on June 1, 1877, at which point Joseph and other elders advised that the tribe migrate toward the interior rather than fight. The Nez Perce, numbering about 800 men, women, and children, complied. They withdrew from their ancestral homeland with vengeful troops in hot pursuit.

What followed is considered a Native-American epic. The Nez Perce conducted their retreat skillfully over 1,700 miles of difficult terrain, yet they managed to evade 10 columns of troops looking for them over the next four months. When cornered, the Indians invariably prevailed and defeated the soldiers in 18 pitched battles and skirmishes. Joseph had hoped to find refuge among the Crow Indians until he learned that the tribe was providing scouts to the

more forever.” The surviving 200 warriors and 600 women and children are then dispatched to new homes on a reservation in Oklahoma. However, an estimated 300 men, women, and children under Chief White Bird apparently slip through American lines and reach Canada.

October 17

INDIAN: Chief Sitting Bull and his entourage meets with General Alfred A. Terry in their camp in Canada, whereupon the general urges the malcontents to lay down their arms and return home. Sitting Bull angrily denounces Terry for the hardships inflicted upon his people and tells him to “go back home where you came from.”

November 24

NAVAL: The steam sloop *Huron* under Commander George P. Ryan is shipwrecked in a storm off Nags Head, North Carolina, with a loss of 98 sailors out of 132.

army to track them down. The tribal elders then decided to flee to Canada and seek refuge with Sitting Bull's band in Canada. Unfortunately, as the tribe reposed in the Bearpaw Mountains, they were surrounded by Colonel Nelson A. Miles and 600 soldiers. The Indians fought off their attackers, who employed howitzers and Gatling guns, but they were trapped within a few miles of their destination. After a six-day siege in freezing weather, Joseph surrendered 414 surviving members of his people on October 5, 1877. "Here me, my chiefs, I am tired," he declared to them, "My heart is sick and sad. From where the sun now stands I will fight no more forever." Despite government promises, the Nez Perce never returned to the Wallowa Valley; instead, they were sent to reservations in Oklahoma and Washington. This was done over the protests of General Howard and Colonel Miles, who respected the Indians as worthy adversaries. Joseph nonetheless accompanied them into exile and, resigned to his fate, encouraged education and abstinence from alcohol. He

Chief Joseph, Nez Perce (Library of Congress)

died in Nespelem, Washington, on September 21, 1904, a heroic symbol of Native-American resistance.

1878

January 17

NAVAL: A treaty signed with Samoa reserves the harbor of Pago Pago as a Pacific coaling station for the U.S. Navy.

April 3

MARINES: A landing detachment from the USS *Constitution* lands at Le Havre, France, to serve as honor guard at the American exhibit at the Universal Exhibition in Paris.

May 30

MILITARY: On the Camas Prairie, Idaho, Bannock Indians kill two settlers who allowed their hogs to devour all the camas root essential to their diet. Then 200 warriors take to the war path under Buffalo Horn and commence raiding the

vicinity. In response, the army under General Oliver O. Howard is ordered to round up the entire tribe, regardless of whether or not they participated in attacks against whites. They are deported en masse to the Yakima Indian Reservation in eastern Washington.

June 8

MILITARY: A raiding party of 200 Bannock Indians under Buffalo Horn, having killed numerous settlers, encounters stiff resistance from 60 volunteers at Clark's Fork, Idaho Territory, and is repulsed. Buffalo Horn is among those slain. Nonetheless, the raiders are swelled by additional Paiute Indians under Oyte and Egan, which raise their numbers to around 450.

June 18

NAVAL: Congress establishes the United States Life-Saving Service, the first such organization in the world. It originally functions as part of the Treasury Department. In 1915 it is combined with the Revenue Cutter Service to form the U.S. Coast Guard.

June 23

MILITARY: Troopers under Captain Reuben Bernard, 1st Cavalry, surprise Bannock and Paiute raiders under Chief Egan in the Steens Mountains, Oregon Territory, although the Indians manage to escape and flee at night.

July 1

NAVAL: In Annapolis, Maryland, Commodore Foxhall A. Parker is appointed the ninth superintendent of the U.S. Naval Academy.

July 8

MILITARY: Captain Reuben F. Bernard, 1st Cavalry, encounters a large number of Bannocks and other tribesmen entrenched at Birch Creek, Oregon Territory, but he outflanks their position in heavy fighting, forcing them to flee south. American success here is largely credited to its scouts.

July 13

MILITARY: In Idaho, a party of 500 troopers from the 1st Cavalry under Captain Evan Miles confront a group of hostile Bannock Indians camped outside the Umatilla Reservation. During the ensuing combat, which saw the Bannocks driven off into the mountains, the Umatilla dressed for war and hovered menacingly near the battlefield, but did not attack. However, an Umatilla scout returns to the cavalry bearing Chief Egan's scalp.

July 20

INDIAN: The 1st Cavalry under Brigadier General James W. Forsyth attacks a party of Bannock Indians along the John Day River, scattering them. This is the final action of the so-called Bannock War.

August 28

MILITARY: A detachment of the 1st Infantry under Major Henry M. Lazelle founds Fort Meade, South Dakota, near the town of Deadwood to deter possible Sioux depredations.

September 4

INDIAN: At Clark's Fork River, Montana Territory, a detachment of cavalry defeats a final party of Bannock Indians, inducing them to return to their reservation.

September 9

INDIAN: A body of 300 Northern Cheyenne under Dull Knife and Little Wolf, chafing under reservation life in Oklahoma, break free and begin trekking back to ancestral homes in Wyoming and Montana. Apparently, they cannot live peaceably with the more acculturated Southern Cheyenne residing there. The army pursues them with 10,000 soldiers for six weeks before overtaking the fugitives.

September 12

MILITARY: East of Yellowstone, Wyoming Territory, army troops under Colonel Nelson A. Miles intercept fleeing remnants of the Bannock tribe, then attempting to escape into Canada, and cuts them off. The Indians are defeated and finally sue for peace.

September 29

MILITARY: Northern Cheyenne under Little Wolf and Dull Knife flee to Smoky Hill, Kansas, and pause at Punished Woman's Creek, Kansas, only to be surprised and set upon by pursuing army troops. After some inconclusive fighting, the Cheyenne men, women, and children escape their tormenters and resume retreating north.

October 8

INDIAN: After the Department of Indian Affairs orders Apache chief Victorio and his followers back to the San Carlos Reservation, Arizona Territory, he flees from captivity with 100 followers and begins raiding activities.

October 15

MILITARY: Fort Lewis, Colorado, is constructed by Lieutenant Colonel Robert E. Crofton, 13th Infantry, at Pagoda Springs to protect a nearby Indian reservation.

October 23

MILITARY: A party of Northern Cheyenne under Dull Knife, exhausted and starving, finally surrenders to U.S. cavalry and is taken to Fort Robinson, Nebraska. However, a party of diehards under Little Wolf refuses to give up and escapes.

December 7

NAVAL: Commodore Robert W. Shufeldt sails the screw sloop *Ticonderoga* from Hampton Roads, Virginia, embarking on a global voyage that lasts two years. His is the first American steam-powered vessel to circumnavigate the globe.

1879**January 2**

INDIAN: Despite threats and entreaties from the commander of Fort Robinson, Nebraska, Dull Knife refuses to return his band of Northern Cheyenne to the reservation in Indian Territory (Oklahoma). The officer then cuts off all food and

water to the tribesmen to induce them to return. The Indians, sick of this mistreatment, begin making plans to break free from confinement.

January 9

INDIAN: Cheyenne refugees under Dull Knife and Little Wolf, confined to army barracks at Fort Robinson, Nebraska Territory, for a week without food or water, stage a mass exodus; roughly half escape, and they are hunted down in the snow over the next three weeks.

January 25

MILITARY: Congress passes the Arrears of Pension Act to secure back payment of military pensions retroactively to the day of discharge.

January 29

MILITARY: Congress removes a long-standing statute requiring privates in military companies to serve as cooks for 10-day periods. Commanders now have increased discretion to assign cooking details among their command.

March 6

MILITARY: Fort Cantonment, Oklahoma, is erected by Colonel Richard I. Dodge after nearby settlers demand protection from the Northern Cheyenne.

March 27

MILITARY: A ragged band of Northern Cheyenne under Little Wolf finally surrenders to Lieutenant William Philo Clark, 2nd Cavalry, at the Little Missouri River, Montana. The troopers quickly round up 33 warriors, 43 women, and 43 children, along with 250 ponies and escort them to Fort Keogh. There Little Wolf and several warriors join the U.S. Army to serve as scouts.

May 9

INDIAN: Sitting Bull and his entourage attempt to return to the United States from Canada, but they are blocked by Colonel Thomas H. Rutger, 18th Infantry, who occupies Fort Assiniboine, Montana.

May 29

INDIAN: Detachments of the 9th Cavalry engage Apache war bands in the Mimbres Mountains, New Mexico Territory. In the fighting Sergeant Thomas Boyne receives a Medal of Honor for bravery under fire.

June 14

MILITARY: Lieutenant James A. Moss takes the African-American 25th Infantry Bicycle Corps on a strenuous mobility test from Fort Missoula, Montana, to St. Louis, Missouri, 900 miles distant. The trip is successfully completed in 40 days but bicycles fail to catch on as a means of conveyance.

June 28

NAVAL: The *Jeanette*, formerly of the Royal Navy, becomes the first American vessel outfitted with an onboard electrical lighting system. It subsequently serves as a polar research vessel until it is crushed by an ice pack.

June 30

MILITARY: General E. O. C. Ord, reacting to the defeat at Little Big Horn, places renewed emphasis on the theory and practice of marksmanship by instituting

weekly target practice for troops in his Department of California. The best shots are excused from guard duty for a week.

July 29

MILITARY: A column of 50 mounted infantry and 20 Umatilla scouts is ambushed by Sheepeaters (renegade Bannock and Shoshone), who drive them back. This defeat prompts Brigadier General Oliver O. Howard to reinforce his columns and pursue the Indians more vigorously.

August 2

NAVAL: In Annapolis, Maryland, Rear Admiral George P. Balch gains appointment as the 10th superintendent of the U.S. Naval Academy.

August 7

EXPLORING: Lieutenant George W. De Long sails from San Francisco, California, in the former private yacht *Jeanette*, accompanied by a crew of 28 men. He thus begins his ill-fated attempt to explore waters of the North Pole by sailing through the Bering Strait. The expedition is underwritten by the *New York Herald* publisher James G. Bennett, who also purchased and outfitted the *Jeanette*.

MILITARY: The War Department, taking its cue from General E. O. C. Ord of the Department of California, institutes new target practice regulations by allowing each soldier 20 rounds per month. The best shots are to be rewarded with prizes and furloughs.

September 4

MILITARY: Apache leader Victorio, fearing that he will be blamed for a recent spate of horse thefts and murders near the Mescalero Apache reservation, escapes with a small number of warriors and resumes his traditional raiding activities.

September 10

INDIAN: At the White River Agency in Colorado, Indian agent Nathan C. Meeker becomes embroiled in a dispute with nearby Ute Indians and requests military assistance to preserve order.

September 16

MILITARY: Major Thomas T. Thornburgh departs Fort Steele, Wyoming, with 400 men of his 4th Infantry, and marches south to assist the White River Indian Agency in Colorado.

September 18

INDIAN: Renegade Apache under Chief Victorio ambush a detachment of the 9th Cavalry under Captain Byron Dawson, killing eight troopers and stealing numerous horses. The troopers had wandered into the Apache stronghold in the Black Range of New Mexico, seeking to apprehend him. In the fighting, Lieutenant Matthias Day and Sergeant John Denny both win Medals of Honor. This act precipitates a prolonged cross-border conflict between whites and Apache in the Southwest.

September 19

INDIAN: At Animas Canyon, New Mexico, Lieutenant Robert T. Emmett and five troopers from the 9th Cavalry are surrounded and besieged by hostile Apache for several hours until they can make their escape.

September 27

INDIAN: At the Cuchillo River near Olo Caliente, New Mexico, troopers skirmish with hostile Apache in several small running engagements.

September 29–October 2

INDIAN: Ute Indians under Chief Jack (Nicaagat), angered by a harsh government agent, ambush an army column under Major Thomas T. Thornburgh at Milk Creek, Colorado Territory, killing him and 12 soldiers, while also wounding 43 others. The Indians suffer 23 dead before returning to the White River Agency and massacring agent Nathan C. Meeker and his family. The soldiers remain besieged until a relief column of the 9th Cavalry (“Buffalo soldiers”) under Colonel Wesley Merritt arrives to secure them.

October 6

INDIAN: The Carlisle Indian School opens at Carlisle, Pennsylvania, under the auspices of Richard Henry Pratt, and begins grammar instruction for 82 young Sioux. This is the first such institution not affiliated with a reservation.

October 11

MILITARY: Colonel Ranald S. Mackenzie’s 4th Cavalry arrives at White River Agency, Colorado, and the Ute Indians gathered there are subsequently forced to surrender and release several white hostages. Shortly after the tribesmen are forcibly retired to the Uintah Reservation in Utah.

October 20

INDIAN: At White River, Colorado, a war band numbering 35 braves attacks a reconnaissance party of three men under Lieutenant William P. Hall, 5th Cavalry. Hall fights bravely and long enough for the balance of the regiment to ride up and rescue him.

October 31

INDIAN: Army troops are sent to detain Chief Big Snake of the Ponca tribe for moving onto a Cheyenne reservation 100 miles from his assigned area. Once sent back to the Ponca Indian Agency he resists orders to arrest him and is killed by soldiers.

December 10

MILITARY: In Washington, D.C., Alexander Ramsey is appointed the new secretary of war to replace George W. McCrary.

1880**February 10**

INDIAN: Along Pumpkin Creek, Montana Territory, a detachment of the 2nd Cavalry surrounds and captures a party of hostile Indians.

April 1

INDIAN: At O’Fallon’s Creek, Montana Territory, parts of the 2nd Cavalry engage hostile Indians for several hours until the latter escape under cover of darkness.

April 18

MILITARY: A patrol under Captain Henry Carroll, 9th Cavalry, is surprised by Apache in Dog Canyon, New Mexico, losing several troopers when large boulders are suddenly rolled on top of them.

April 22

MILITARY: A detachment of the 5th Cavalry under Major John J. Upham constructs Fort Niobara, Nebraska, to protect the nearby Spotted Tail Agency.

May 14

INDIAN: Outside Fort Tularosa, New Mexico Territory, Sergeant George Jordan leads a detachment of the 9th Cavalry in repelling an attack by a larger party of hostile Indians.

June–August

INDIAN: Following the massacre of Victorio's Apache at Tres Castillos, Mexico, a handful of survivors rallies under aged chief Nana and resume raiding activities. They enjoy spectacular success over the next two months, covering 3,000 miles while being pursued by 1,000 cavalry, which they defeat in seven engagements. The small band of Apache also manage to kill 35 civilians and steal over 200 horses before Nana felt his vengeance had been satiated, and he rode back to Sonora, Mexico.

June 8

MARINES: When the secretary of the navy creates the office of Judge Advocate General of the Navy, the position is assigned to Captain William B. Remey of the Marine Corps.

July 29

MILITARY: Colonel Benjamin H. Grierson leads the African-American 10th Cavalry out from Fort Quitman, Texas, and begins a long pursuit of Apache raiders under Victorio.

August 6

INDIAN: Skirmishing breaks out at Rattlesnake Springs, New Mexico, between the 10th Cavalry under Colonel Benjamin H. Grierson and renegade Apache under Victorio. At length the Indians draw off and attack a nearby supply train, only to be chased by Grierson's troopers. The battle convinces Victorio to return to his refuge in Mexico.

August 22

MILITARY: Captain Daingerfield Parker, 3rd Infantry, builds Fort Maginnis on Ford's Creek, Montana, for the protection of settlers, cattlemen, and railroad workers.

October 1

MARINES: John Philip Sousa becomes the 14th and most celebrated conductor of the Marine Corps Band. Under his 12-year tenure the band gains national renown and tours repeatedly, and Sousa gains international renown as the "March King."

October 15–16

MILITARY: American forces under Colonel George Buell, assisted by Colonel Joaquin Terrazas and 350 Mexican militia, corner the renegade Apache band of Victorio at Tres Castillos, Mexico. The Americans are then discreetly sent home as the Mexicans attack, killing the chief and 78 Apache, while 62 are captured and interred as slaves.

November 9

NAVAL: The steam-powered sloop *Ticonderoga* under Commander Robert W. Shufeldt returns to Hampton Roads, Virginia, concluding a two-year diplomatic sojourn, which covered 36,000 miles and during which the vessel called upon more than 40 ports worldwide. This is the first global circumnavigation performed by a navy steam vessel.

1881

NAVAL: In New Jersey, school teacher and Irish expatriate John Holland invents the first practical submarine for naval warfare. He had been inspired by Jules Verne's *Twenty Thousand Leagues under the Sea*, and he hopes his invention will one day be used against warships of the Royal Navy. However, the U.S. Navy is slow to develop an interest in it.

January 7

NAVAL: In Washington, D.C., Nathan Goff is appointed the 28th secretary of the navy; he serves only two months.

February 9

MEDICAL: Army Surgeon General George M. Sternberg uncovers the existence of the deadly pneumococcus germ cell, which causes pneumonia; this discovery establishes him as the "father of American bacteriology."

March 5

MILITARY: President James A. Garfield appoints Robert Todd Lincoln, eldest son of President Abraham Lincoln, to serve as secretary of war.

March 7

NAVAL: In Washington, D.C., William H. Hunt is appointed the 29th secretary of the navy. He inherits a tottering force in considerable disrepair as only 52 vessels out of 140 in commission are completely seaworthy.

May 7

EXPLORING: Lieutenant Adolphus W. Greely takes a 25-man contingent to Alaska for the purpose of establishing a meteorological station. He subsequently also founds Fort Conger on Lady Franklin Bay.

MILITARY: In another sign of mounting professionalism in the military, General William T. Sherman establishes the Infantry and Cavalry School at Fort Leavenworth, Kansas. Today it serves as the Army Command and General Staff College.

May 21

MILITARY: Clara H. Barton, who gained renown as the "Angel of the Battlefield" during the Civil War, gains appointment as head of the American chapter of the Red Cross.

June 13

NAVAL: In Annapolis, Maryland, Rear Admiral C. R. P. Rodgers is appointed the 11th superintendent of the U.S. Naval Academy, becoming the first officer to hold that position consecutively.

June 28

NAVAL: Secretary of the Navy William H. Hunt establishes a Naval Advisory Board under Admiral John Rodgers in light of that service's dilapidated condition. The board will recommend immediate construction of several, modern steel-hulled vessels.

July 19

INDIAN: Fugitive Indian leader Sitting Bull surrenders himself to federal authorities at Fort Buford, Dakota Territory, with 45 warriors, 67 women, and 73 children. His capitulation marks the end of the largest and most violent Indian uprising in the West and the captives are initially detained for two years at Fort Randall before being assigned to a reservation.

August 12

INDIAN: At Carrizos Canyon, New Mexico Territory, a body of the 9th Cavalry is forced to retreat, ably covered by a rearguard under Sergeant Thomas Shaw. He successfully holds his ground against superior numbers, allowing the main body to withdraw.

August 16

INDIAN: In the Cuchillo Negro Mountains, a detachment of the 9th Cavalry fights a four-hour battle with a larger body of hostile Apache. In its course, Lieutenant George R. Burnett gallops in under fire to rescue a fallen trooper and returns him to safety; he wins a Medal of Honor.

August 24

SCIENCE: Lieutenant Adolphus W. Greely is chosen to establish a scientific observatory in northern Greenland, assisted by a team of 24 workers.

August 30

INDIAN: Colonel Eugene A. Carr, 6th Cavalry, arrests the White Mountain Apache spiritualist Nakaidoklini at Cibecue Creek, Arizona Territory. The prophet, who preaches Indian supremacy and separation from whites, was going to be imprisoned at Fort Apache to diminish his steadily volatile following. When resentful tribesmen from the nearby San Carlos Reservation begin swarming around Carr's campsite and fighting breaks out, Nakaidoklini is gunned down. Six soldiers and one officer are also slain.

August 31

INDIAN: Colonel Eugene A. Carr's detachment, 6th Cavalry, arrives back at Fort Apache, Arizona Territory, only to be attacked there by throngs of angry White Mountain Apache.

September

MILITARY: In order to control the Uncompahgre and White River Ute following their removal from Colorado to Utah, Captain Hamilton S. Hawkins, 6th Infantry, supervises construction of Fort Thornburgh in the latter territory.

September 11

INDIAN: Numerous Apache war bands, angered by the death of the medicine man Nakaidoklini, attack Fort Apache, Arizona Territory, killing six soldiers.

Greely, Adolphus (1844–1935)

Explorer

Adolphus Greely was born in Newburyport, Massachusetts, on March 27, 1844. He volunteered for military service in 1861 and fought in several Civil War engagements, being wounded three times and promoted in rank from private to major. In 1865 he was one of few volunteer officers allowed to join the regular peacetime establishment as a second lieutenant. He served with the U.S. Army Signal Corps and was busily engaged in erecting telegraph lines from Texas to California and from the Dakotas to the Washington Territory. Greely, however, was a serious student of meteorology and an avid reader of scientific publications, especially regarding polar exploration. In 1881, after Congress authorized American participation in the first International Polar Year, he was appointed to command the first American expedition to the Arctic Circle. In July of that year he sailed with 25 men from Newfoundland aboard the *Proteus*

and disembarked at Lady Franklin Bay on the eastern periphery of Ellesmere Island. Having established a base camp at Fort Conger, Greely dispatched exploring parties that discovered Lake Hazen and Greely Fjord. They advanced to the farthest northern point then achieved. Unfortunately, scheduled provision ships failed to arrive in 1882 and 1883 so his party was confronted with starvation. Rather than face certain death, Greely conducted them southward along a prearranged route 200 miles south to Cape Sabine, where, in June 1884, seven survivors were finally rescued in emaciated condition. Greely was initially criticized for the loss of life but an official court of inquiry exonerated him. All told, it was an extremely heroic, three-year endeavor, and, in 1886, he received promotion to captain.

In 1887 President Grover Cleveland arranged for Greely to be promoted several ranks to brigadier general, whereupon

Private William C. Barnes distinguishes himself in combat, winning a Medal of Honor.

September 12

NAVAL: Members of the *Jeanette* expedition under Lieutenant George W. DeLong, having abandoned their vessel after it is crushed by ice, march in freezing weather to the edge of the Arctic ice pack. DeLong orders the three boats they hauled overland to sail for the mainland.

September 30

INDIAN: Unrest at the San Carlos Reservation, Arizona Territory, never far from the surface, boils over following the death of medicine man Nakaidoklini the previous August. This evening a party of 74 Apache warriors under Juh, Nachise, and Chato escape toward Mexico. Among their number is a little-known warrior named Geronimo.

he became head of the U.S. Army Signal Corps. He was tasked with laying down thousands of miles of telegraph lines and submarine cables across the United States, Alaska, Cuba, the Philippines, and Puerto Rico. He also pushed for the army's adoption of the first wireless technology and served as chief of the U.S. Weather Service until 1891, when its responsibilities were transferred to the Department of Agriculture. In these activities Greely acquitted himself well and he rose to major general in 1906. He then successively commanded the Northern Military Division and Pacific Military Division, and he rendered useful humanitarian service in the wake of the 1908 San Francisco earthquake. Greely retired from service that year, and he turned to writing his memoirs and to composing several widely respected scientific tracts. He also served as a founder and promoter of the new National Geographic Society, which was the recipient of his personal library and scrapbooks. In 1935 his service was officially honored by a Medal of Honor. Greely died in Washing-

General A. W. Greely (Library of Congress)

ton, D.C., on October 20, 1935, one of the most distinguished explorers and soldier-scientists of his day.

November 3

NAVAL: Captain William Devan becomes commander of the first inland station of the U.S. Life Saving Service at Louisville, Kentucky, for service on the Ohio River. He is tasked with assisting shipwrecked passengers and sailors along the Ohio River and makes his first rescue only four days later.

November 14

NAVAL: In Annapolis, Maryland, Captain Francis M. Ramsay is appointed the 14th superintendent of the U.S. Naval Academy.

November 30

NAVAL: The steamer *Rodgers*, scouting in St. Lawrence Bay, Canada, for survivors from the ill-fated *Jeanette* expedition, catches fire and sinks with the loss of one life.

1882

March 7

MILITARY: At Fort Leavenworth, Kansas, the School of Application for Infantry and Cavalry is formally activated; it is the progenitor of today's U.S. Army Command and General Staff College.

March 23

NAVAL: In Washington, D.C., the secretary of the navy establishes the Office of Naval Intelligence (ONI).

- On the eastern side of the Lena River delta, Siberia, a rescue party under chief engineer George W. Melville of the *Jeanette* finds the frozen remains of Lieutenant George W. DeLong, commanding officer of the ill-fated Arctic expedition, and 14 companions. The expedition's records, however, are recovered intact.

April 17

NAVAL: In Washington, D.C., William E. Chandler becomes the 30th secretary of the navy and leads efforts to renew a tottering force of wooden ships and Civil War-era ordnance.

April 19–23

INDIAN: Restive Apache on the San Carlos Reservation, Arizona, kill the local police chief and then recruit among the resident Warm Spring members residing there to join their warrior band. Lieutenant Colonel George A. Forsyth pursues the raiders as far as Horseshoe Canyon, where an indecisive skirmish is waged, then the renegades hightail it into Mexico. Forsyth, reinforced by a detachment of the 6th Cavalry, mounts a cross-border chase until a Mexican infantry unit orders them out of the country.

April 23

INDIAN: A patrol of the 6th Cavalry fights off an attack by Apache war bands at Horseshoe Canyon, New Mexico Territory.

May 16

NAVAL: Samuel Powhatan Carter is elevated to rear admiral in the U.S. Navy. During the Civil War, Carter also served as a major general in the Union army and is thus the only senior military officer to have ever attained the ranks of both general and admiral.

May 19–22

NAVAL: Commodore Robert W. Shufeldt, commanding the screw sloop *Swatara*, comes ashore in the kingdom of Korea and commences diplomatic negotiations that conclude with a commercial treaty.

June 9

MILITARY: Fort Hancock is constructed on the Rio Grande River near the town of Hancock, Texas, for the purpose of deterring hostile Apache and Mexican bandits.

July 6

INDIAN: A party of avenging Apache under Natiotish, still smarting over the death of a medicine man the year before at the hands of army troops, attacks the settlement of San Carlos, Arizona Territory, killing three white men.

July 14

MARINES: The warships *Lancaster*, *Quinnebaug*, and *Nipsic* land sailors and marines ashore at Alexandria, Egypt, to protect American lives and property during a nationalist uprising. They subsequently assist British forces to maintain order and are officially commended by them.

July 17

MILITARY: Captain Adna Romanza Chaffee, leading elements of the 3rd and 6th Cavalries, perceives a White Mountain Apache ambush set for him along the Big Dry Fork, Arizona Territory. Chaffee adroitly outflanks the Indians and attacks, driving them back with 22 dead, including Chief Nationish; two soldiers are killed. Heavy losses convince remaining war bands to return to their reservations; this is also the last clash with Apache in Arizona. Lieutenant Thomas Cruse also wins the Medal of Honor by dashing in on horseback to save the life of a wounded trooper.

July 26

MILITARY: The United States accepts the terms of the Geneva Convention of 1864, which mandates that wounded soldiers receive medical attention, that buildings be spared from destruction, and that prisoners not be abused.

September

MILITARY: General George Crook, an effective but humane leader, assumes command of the Department of Arizona, secures the San Carlos Reservation, then prepares to cross into Mexico with 50 troopers and 200 Apache scouts in order to capture the renegade Geronimo.

October 24–26

INDIAN: In Alaska, the Tlingit Indians demand 200 blankets from the Northwest Trading Company for the accidental deaths of two tribal members. A party of navy sailors, tasked with keeping the peace, decides to punish the tribesmen by demanding a payment of 400 blankets. When the Tlingit refuse, the sailors bring up a Gatling gun and flatten their village, killing six children. The outrage prompts Congress to reorganize Alaskan law enforcement.

November 15

DIPLOMACY: Lieutenant Commander French Ensor Chadwick arrives in London, England, as the first American naval attaché sent abroad. His mission is to keep abreast of naval technological developments in Europe.

November 30

SPORTS: The U.S. Naval Academy football team loses its first ever game to the Clifton Football Club, 8-0.

1883**February 12**

MARINES: In Honolulu, Hawaii, ceremonies marking the inauguration of King Kalakaua are attended by marines from the screw sloops *Lackawanna* and *Wachusett*.

February 18

NAVAL: The gunboat *Ashuelot* under Commander Horace E. Mullan strikes a rock near the mouth of the Swatow River, China, and sinks with a loss of 11 crewmen.

March

MILITARY: Renegade Apache under Geronimo leave their winter quarters in Mexico and begin raiding white settlements across southeastern Arizona and New Mexico.

March 3

NAVAL: In an attempt to completely modernize the U.S. Navy, currently rated as the world's 12th largest, Secretary of the Navy William E. Chandler convinces Congress to authorize the construction of three protected (steel) cruisers, *Atlanta*, *Boston*, and *Chicago*, along with a dispatch vessel, the *Dolphin*. These are the first such modern vessels acquired since the Civil War and initiates what becomes known as the "Steel Navy."

March 21–April 1

MILITARY: An Apache raiding party of 25 warriors under Chato, Chihuahua, and Bonito crosses the Mexican border into the Arizona Territory and kills 26 settlers without interference from the army, which has turned out in force looking for them.

May 1

MILITARY: Captain Emmet Crawford, 4th Cavalry, leads a cavalry column into the central Mexican highlands in order to smoke out the renegade Apache band of Geronimo. In this quest he is ably assisted by 193 loyal Apache scouts willing to work for the army.

May 15

MILITARY: Troopers under Captain Emmet Crawford, 4th Cavalry, surprise an Apache encampment under Chato and Benito at San Bernadino Springs, Arizona, killing 30 warriors and burning nine lodges. This defeat unsettles the Indians and they begin voluntarily returning to the San Carlos Reservation. Success is attributed to large numbers of Apache serving in the army as scouts and guides.

May 22–September 17

EXPLORING: Army lieutenant Frederick Schwatka leads a small expedition that explores the valley of the Yukon, Alaska.

June

MILITARY: General George Crook, assisted by Apache scouts, locates the dissident band headed by Geronimo in the Sierra Madre Mountains. The militant Apache then meet with the general and, after much discussion, finally agree to give up. The event reflects the highest credit upon Crook, a humane man who felt that the Indians had to be dealt with fairly in order to circumvent violence.

June 7–August 21

NAVAL: The screw steamer *Trenton* is the first naval vessel to receive electrical lighting while berthed in New York Harbor. The Edison Lighting Company installs no less than 238 lamps in various parts of the ship at a cost of \$5,500.

August

EXPLORING: Lieutenant Adolphus W. Greely, short on food and never relieved by a promised supply vessel, departs Fort Conger, Alaska, and marches his party south to spend the winter at Camp Sabine.

November 1

MILITARY: Lieutenant General Philip H. Sheridan replaces William T. Sherman as commanding general of the army, although he will not obtain his fourth star until June 1888.

December 4

NAVAL: President Chester A. Arthur vows to Congress that the United States will not become embroiled in a naval arms race such as the one presently unfolding in Europe.

1884

MILITARY: U.S. Army rifles are provided with a rear sight to correct for the natural drift of bullets in flight.

February 28

EXPLORING: Captain George M. Wheeler completes 13 years of topographical surveys of the West today.

March

INDIAN: Militant Apache leader Geronimo voluntarily returns to the San Carlos Reservation, Arizona, but then he begins stirring up unrest among his fellow tribesmen.

April 25–May 10

EXPLORING: Commander Winfield Scott Schley leads the steamers *Alert*, *Bear*, and *Thetis* from New York City northward to search Lady Franklin Bay for any possible survivors from Lieutenant Adolphus W. Greely's expedition, missing since 1881.

May 18

INDIAN: At Fort Apache, Arizona Territory, Lieutenant Britton Davis is informed by Indian scouts that Geronimo has fled the San Carlos Reservation and is on the loose again.

June 22

EXPLORING: A relief expedition under Commander Winfield S. Schley reaches Lieutenant Adolphus W. Greely's scientific observatory on Cape Sabine, Grinnell Land (Ellesmere Island), learning that only six of its 24 occupants have survived on a diet of moss, lichen, and seal skin.

July 7

NAVAL: In Washington, D.C., Professor James R. Soley is appointed by Congress to help reorganize the Office of Naval Records. Soley had administered the Navy Library since 1882.

October 6

NAVAL: The U.S. Naval War College, the world's first graduate-level military establishment, is founded at Newport, Rhode Island, under the aegis of Commodore Stephen B. Luce, who also serves as its first president. Commander Alfred Thayer Mahan, a noted naval theorist, is also appointed one of the first instructors. Its first class consists of eight officers.

**Crook, George (1829–1890)***Army general*

George Crook was born in Dayton, Ohio, on September 23, 1829, and he graduated from the U.S. Military Academy in 1852. He initially assumed frontier duties in the Northwest until 1861, when he was commissioned a colonel of a Ohio volunteer regiment during the Civil War. Crook fought with distinction in a number of important engagements, including South Mountain and Antietam, and in 1863 he transferred to the cavalry and commanded a division in the bloody Battle of Chickamauga. He subsequently joined with General Philip H. Sheridan in Virginia's Shenandoah Valley and saw close action at Winchester, Fisher's Hill, and Cedar Creek, which led to the final defeat of the Confederate army of General Jubal A. Early. Shortly after, Crook was breveted a major general and he commanded cavalry forces throughout the decisive Petersburg Campaign that helped bring the conflict to an end.

Crook was retained in the peacetime establishments at his regular rank of lieutenant colonel and he was posted to the region near Boise, Idaho. He helped end an internecine Indian war here that had raged several years, and, in 1871, he transferred to the restless Arizona Territory. Crook was tasked with pacifying the militant Apache under Cochise, which he accomplished in two years and was rewarded by a promotion of two grades to brigadier general. In 1875 Crook transferred north to the Department of the Platte to keep a watchful eye upon the Sioux and Cheyenne following the discovery of gold in the Black Hills. The following year, large uprising erupted and Crook took command of a column of troops dispatched to help envelop the hostiles. Instead, he was engaged and nearly defeated by Crazy Horse at the Rosebud River on June 17, 1876, and effectively knocked out of the campaign. The Indians were eventually defeated and, by 1882,

December 6

ENGINEERING: In Washington, D.C., Colonel Thomas L. Casey, Corps of Engineers, sets the marble capstone atop the 300-foot tall Washington Monument. This venerated landmark has been under construction since July 4, 1848.

1885

MILITARY: The army arsenal at Watervliet, New York, begins casting its own modern, rifled artillery tubes.

January 18

MARINES: Parties from the gunboat *Alliance* land at Aspinwall, Panama (Colombia), to protect the trans-isthmian railroad against revolutionary violence.

Crook was back functioning as head of the Arizona Territory. His opponent this time was the wily Geronimo, who conceded only after Crook took the unusual expedient of hiring disaffected Apache scouts to track him down. Beforehand, Crook was obliged to chase the fugitive band into the Sierra Madre of Mexico before they surrendered and were brought back to a reservation. In 1885 Geronimo again escaped and Crook pursued him, but authorities decided to appoint General Nelson A. Miles the new regional commander to finish the task. Crook, however, strongly protested when General Sheridan ordered many Apache deported to Florida, an act that ended their friendship. Crook wound up commanding the Department of the Platte again in 1886, and, two years later, he advanced to major general and head of the Department of the Missouri. Crook distinguished himself from many frontier contemporaries by calling for better treatment for Native Americans, and he spoke out publicly on their behalf. He died in Chicago on March 21, 1890,

General George Crook (*Library of Congress*)

acknowledged both as one of the nation's greatest Indian fighters and as an ardent champion of Native-American rights.

February 21

MILITARY: In Washington, D.C., the iconic Washington Monument is finished by the Army Corps of Engineers. It is 600 feet in height and weighs in excess of 90,000 tons.

March 3

MILITARY: Congress authorizes creation of a Board of Fortifications and Coast Defenses to evaluate the defensive status of the American coastline and make recommendations. Congress also passes a measure creating the rank General of the Army, the senior most military officer.

March 4

MILITARY: Former president Ulysses S. Grant is reappointed a general on the retired list, enabling him to receive financial assistance during a period of financial impoverishment.

March 5

MILITARY: President Grover Cleveland appoints attorney William C. Endicott to serve as his secretary of war.

March 7

NAVAL: In Washington, D.C., William C. Whitney is appointed the 31st secretary of the navy.

March 16–May 25

MARINES: Detachments from the steamer *Galena*, sloop of war *Iroquois*, and screw sloops *Shenandoah* and *Swartara* are landed again at Aspinwall, Panama (Colombia), to protect the U.S. consulate and the railroad crossing the isthmus.

March 31

MARINES: Another landing detachment of sailors and marines goes ashore at Panama City, Panama (Colombia), to secure the western end of the rail line from revolutionary violence.

April 3

MARINES: A battalion under Colonel Charles Heywood assembles at New York City prior to embarking and sailing for Panama; this consists of 10 officers and 212 enlisted men.

April 7

MARINES: Another battalion, comprised of 15 officers and 250 enlisted ranks, sails from New York for Panama. This force is stiffened by the presence of armed sailors and artillery pieces.

April 12

MARINES: Lieutenant Colonel Charles Heywood's battalion arrives at Colón, Panama, for the purpose of protecting the all-important rail line in that country. They are eventually reinforced by a battalion of sailors and marines under Commander Bowman H. McCalla.

April 15

MARINES: A second battalion of marines disembarks at Colón, Panama, which, when combined with the force under Lieutenant Colonel Charles Heywood already there, constitutes the first-ever brigade-sized force deployed by the Marine Corps.

May 17

INDIAN: Restless Apache chiefs Geronimo, Nachise, and Nana lead 42 Chiricahua men and 92 women out of the San Carlos Reservation, Arizona Territory, and makes for the refuge of the Sierra Madre Mountains in Mexico. He is particularly angered by reservation rules outlawing the consumption of *tiswin*, a traditional alcoholic drink. Brigadier General George Crook relocates his headquarters to Fort Bowie, New Mexico Territory, to begin an immediate search for him.

May 25

MARINES: All marine personnel are withdrawn from Panama following the arrival of Colombian troops to restore law and order.

June 2

MILITARY: The 6th and 10th Cavalries begin fanning out across the Mogollon Mountains, New Mexico Territory, in search of Geronimo and his elusive band of Apache. Meanwhile, the 4th Cavalry is authorized to enter Mexican territory around the Sierra Madre Mountains in Sonora. Ultimately, Brigadier General George Crook is forced to deploy over 2,000 troopers to corner and catch his elusive quarry.

June 8

INDIAN: A patrol of the 4th Cavalry under Captain Henry W. Lawton is ambushed at Guadalupe Canyon, Arizona Territory, by an Apache war band under Chihuahua. Five soldiers are killed and the Indians abscond with two horses and five mules.

July 7

TECHNOLOGY: G. Moore Peters of Xenia, Ohio, receives a patent for his road table loading machine, which is used for manufacturing rifle cartridges.

July 13

MILITARY: A party of the 4th Cavalry under Captain Wirt Davis, assisted by 100 Indian scouts, crosses the Mexican border in search of the renegade Apache Geronimo and his band. Brigadier General George Crook also sends 2,000 troops to fan out across the countryside but the wily Native Americans easily evade their pursuers.

July 23

MILITARY: Ulysses S. Grant, a former president and one of history's most successful military leaders, dies of throat cancer at his summer cottage. However, with the assistance of Mark Twain, Grant manages to complete and publish his memoirs, which prove a financial boon to his impoverished family.

August 7

INDIAN: In Mexico, Captain Wirt Davis, 4th Cavalry, attacks an Apache camp thought to contain Geronimo; several women and children are killed and 15 captives are taken. However, if Geronimo was present, he escaped.

September 3

NAVAL: In Newport, Rhode Island, the Naval War College convenes its first formal classes.

November 9

MILITARY: At Cajon Pass, California, army troops guard railroad personnel as they drive home the final spikes for the newly finished California Southern Railroad.

November 23–24

MILITARY: Despite the presence of Brigadier General George Crook and 3,000 soldiers patrolling the Mexican border, a band of Apache under Josanie slips past them and raid white settlements in Arizona and New Mexico, killing 38 whites. He also raids a nearby White Mountain Apache reservation where residents had opposed Geronimo, killing 20 Indians. Josanie then returns to his sanctuary in Mexico.

Geronimo (ca. 1829–1909)

Apache chief

Goyakla ("One who yawns") was born near the headwaters of the Gila River, Arizona, around 1829, part of the Chiricahua Apache band. He matured into a man of considerable prowess and intelligence, serving as both a minor war chief and a shaman. In 1856 Mexican marauders killed his mother, wife, and children at Janos, Chihuahua, and he swore to take revenge. He so audaciously raided Mexican settlements that they dubbed him Geronimo ("Jerome") and the name became popularized. Soon after, Geronimo joined Apache raiders under Cochise and began attacking American settlements until General George Crook finally pacified the tribe. They were subsequently resettled onto the San Carlos Reservation, New Mexico, where the Chiricahua were lodged with western Apache peoples and tensions between the two groups ran high. Geronimo by this time had risen in the tribal hierarchy to war chief and, anxious to regain his nomadic

Chief Geronimo (*Library of Congress*)

December 9

INDIAN: Parts of the 8th Cavalry under Lieutenant Samuel W. Fountain attack Apache gathered near Papanosas, New Mexico; the Indians manage to escape.

December 10

INDIAN: In the Arizona Territory, Apache raiders under Josanie strike at a ranch, killing several settlers; they subsequently attack a nearby detachment of soldiers, slaying five and wounding two.

December 27

INDIAN: In the Chiricahua Mountains, Arizona Territory, Apache raiders under Josanie make a temporary refuge after winter storms block most of the passes. To date they have covered 1,200 miles and killed 40 people.

existence, he led a renegade band of warriors off the reservation in 1878. For three years Geronimo conducted his traditional hit-and-run operations, usually against the hated Mexicans, and in 1881 he boldly returned to San Carlos to recruit new members. General Crook was forced to pursue the marauders into Mexico, where, assisted by Apache scouts and Mexican troops, he finally cornered Geronimo in 1886 and convinced him to surrender and be deported to Florida. Two days later the chief and 39 members of his band escaped from the reservation again, at which point the government, angered by Crook's leniency, replaced him with the hard-bitten General Nelson A. Miles.

For 18 months the elusive Apache easily evaded Miles and his forces, totaling 5,000 men, bounty hunters, and a like number of Mexican troops. Finally, in September 1887, Miles cornered the band and induced them to surrender with the understanding that they would return to the San Carlos Reservation after two year's confinement. How-

ever, President Grover Cleveland ignored this arrangement and he ordered Geronimo and his followers deported to military facilities at Fort Pickens, Florida. The Apache were treated as prisoners of war and kept in close confinement until 1894, when they were transferred to Fort Sill, Oklahoma, to learn farming. Geronimo, who had by now converted to Christianity, toured frequently with William "Buffalo Bill" Cody and his Wild West Show, and also attended the Louisiana Purchase Exposition, St. Louis, in 1904, where he signed autographed pictures for an eager populace. The following year he was allowed to march in President Theodore Roosevelt's inaugural procession, although still regarded as a prisoner of war. At this time he also dictated his autobiography to historian S. M. Barrett, which was published in 1906 as *Geronimo's Story of His Life*. The wily and aged Apache raider, who had caused the Mexicans and Americans such grief and turmoil, died quietly at Fort Sill on February 17, 1909, still technically regarded as a prisoner of war.

1886

January

MILITARY: The Endicott Board, headed by Secretary of War William Endicott, promulgates a plan to fortify 28 major harbors in the United States with various fortifications and 2,362 cannon.

January 8

MILITARY: Captain Emmett Crawford, 6th Cavalry, initiates a 48-hour, forced march in an attempt to snare Geronimo in Mexican territory.

January 9

INDIAN: From his sanctuary in Mexico, renegade Apache chief Geronimo sends a messenger to Brigadier General George Crook declaring his intention to surrender within a few weeks.

January 10

INDIAN: Parts of the 6th Cavalry under Captain Emmett Crawford attack Geronimo's Apache in their camp in the Sierra Madre Mountains, Mexico. The camp is overrun and supplies captured, but the elusive Indians all escape. During this fight Lieutenant Marion P. Maus, 1st Infantry, distinguishes himself in combat, winning a Medal of Honor.

January 11

MILITARY: Near the Aros River, Mexico, a detachment of the 6th Cavalry under Captain Emmett Crawford, scouting about for the renegade Apache Geronimo, are attacked by Mexican guerrillas; Crawford is fatally wounded and dies a week later.

March 22

MILITARY: A pack train under noted scout Tom Moore departs Fort Bowie, New Mexico Territory, and heads south toward Mexican territory to rendezvous with Brigadier General George Crook. There the two men will make a concerted effort to meet with Geronimo and other chiefs to secure their surrender.

March 25

MILITARY: At Canyon de los Embredos (Canyon of the Tricksters), Mexico, Brigadier General George Crook again prevails upon renegade Apache chief Geronimo and several other chiefs to return to the San Carlos Reservation.

March 29

INDIAN: The Apache chiefs, having agreed to surrender, are entrusted to a small cavalry troop that will conduct them to Fort Bowie, New Mexico Territory. Upon further reflection, however, they suspect treachery, change their minds at the last moment, and disappear into the Sonoran Mountains of Mexico. This latest escape prompts an angry War Department to sack Brigadier General Crook altogether and replace him with the hard-bitten Nelson A. Miles.

April 2

MILITARY: In the Department of Arizona, Brigadier General Nelson A. Miles replaces Brigadier General George Crook. Crook consequently resigns his commission after the War Department rejects his promise to Apache chief Geronimo that he would be returned to Arizona after a two-year exile. The former Indian fighter now becomes an outspoken proponent of Native-American rights.

April 27

INDIAN: Apache raiders under Geronimo attack the Peck Ranch in the Santa Cruz Valley, New Mexico, killing several settlers and taking hostages. Several corps of cavalry are ordered to pursue the renegades.

May 3

INDIAN: Troopers of the 10th Cavalry under Lieutenant H. P. Clark engage a band of Apache under Geronimo at Pinto Mountain, Sonora, Mexico, but they fail to corner and capture them.

May 5

MILITARY: Captain Henry Lawton, 4th Cavalry, takes a troop of soldiers, and 100 Apache scouts out of Fort Huachuca, Arizona, to begin looking for the renegade Apache leader Geronimo. They spend the next four months searching in vain for the wily leader and his equally agile band.

May 15

INDIAN: Parts of the 4th Cavalry catch up with Geronimo's renegades and engage them in the Santa Cruz Mountains, Mexico, but they are defeated. Sergeant Sam Craig distinguishes himself in combat, winning a Medal of Honor.

May 16

MILITARY: Congress passes legislation authorizing that attendees of the U.S. Military Academy, West Point, be commissioned second lieutenants upon graduating.

July 9

MILITARY: Brigadier General Nelson A. Miles, cognizant that his pursuit of Geronimo has failed, resurrects his predecessor's policy of a negotiated surrender before the Apaches turn themselves over to the Mexicans.

July 20

MILITARY: A column of the 4th Cavalry under Captain Henry W. Lawton, guided by 20 Apache scouts, nearly catches Geronimo's Apache band in camp, but they escape into the desert hills.

August 3

NAVAL: Congress considers acquisition of two ironclads, an armored cruiser, and a motor torpedo boat as part of its ongoing naval modernization program initiated by Secretary of the Navy William C. Whitney. Whitney also reorients the service toward modernity and the latest technology—by the turn of the 20th century the United States will boast the world's third largest navy.

August 6

NAVAL: Congress authorizes construction of two significant warships, the 6,000-ton armored cruiser *Maine* and the battleship *Texas*, with the former mounting 10-inch guns and the latter 12-inch guns mounted in two main turrets, diagonally across from each, on the main deck; these vessels also mark the introduction of battleships to American service.

August 17

MILITARY: Captain Moses Harris, 1st Cavalry, establishes the Fort Yellowstone Guards in Wyoming to protect Yellowstone Park from vandalism and illegal poaching.

August 20

MILITARY: Fort Du Chesne is founded at the confluence of the Du Chesne and Uintah Rivers, Utah, to exert further pressure upon restive Uncompahgre and White River Utes on their reservation.

August 24

INDIAN: At the Bavispe River, Mexico, renegade Apache chief Geronimo confers under a flag of truce with Lieutenant Charles B. Gatewood, and agrees to surrender, but only to Brigadier General Nelson A. Miles in person.

September 4

INDIAN: Renegade Apache Geronimo concludes a 1,600-mile pursuit and surrenders to Brigadier General Nelson A. Miles at Skeleton Canyon, Arizona

**Miles, Nelson A. (1839–1925)***Army General*

Nelson Appleton Miles was born in Westminister, Massachusetts, on August 8, 1839, and he subsequently lived in Boston. There he clerked by day and studied military history at night, and, after the Civil War commenced in April 1861, he used his savings to help raise a company of volunteers for the 22nd Massachusetts Infantry. Miles served capably as a lieutenant in the fierce battles of the Peninsula, Antietam, and Fredericksburg in 1862, after which he transferred as lieutenant colonel of the 61st New York infantry. He was next conspicuously engaged at Chancellorsville in 1863, being seriously wounded and receiving a Medal of Honor in 1892 for heroism under fire. By war's end the 26-year-old Miles was a major general of volunteers in the Army of the Potomac and a veteran of virtually every major engagement fought by it. He subsequently served as commandant of Fortress Monroe, Virginia, and he kept the former Confederate president Jefferson Davis in chains

until public pressure forced the government to relent. Miles was then retained in the peacetime establishment as a full colonel of the 5th U.S. Infantry and posted to the western frontier. Once again, he distinguished himself in combat against Native Americans by helping to pacify the Sioux and Cheyenne under Crazy Horse in 1876, and he also captured heroic chief Joseph and his band of Nez Perce the following year. In 1886 he replaced General George Crook in Arizona and pursued renegade Apache chief Geronimo for 18 months until he too surrendered. Four years later Miles was called upon to settle unrest caused by the Ghost-Dance religion among the Sioux, whereupon his subordinates were involved in the Wounded Knee Massacre of December 29, 1890. This sorry affair terminated three centuries of conflict between whites and Native Americans, and Miles transferred to Governor's Island, New York, to command the Department of the East. There, in 1895,

Territory. Both the chief, his 20-man band, and 13 accompanying women are immediately deported to new homes at Fort Pickens, Florida. A 15-year struggle across the territories of Arizona, New Mexico, and northern Mexico finally draws to a close.

September 9

NAVAL: At Annapolis, Maryland, Commander William T. Sampson is appointed the 13th superintendent of the U.S. Naval Academy.

1887**January 29**

MILITARY: Congress authorizes construction of the Cavalry and Light Artillery School at Fort Riley, Kansas, although five years elapse before the facilities are finished and instruction can commence.

he gained appointment as commanding general of the army.

Despite his rank and reputation, Miles played only a token role in the Spanish-American War of 1898 by orchestrating the conquest of Puerto Rico. He also got himself in trouble by publicly remarking about Admiral George Dewey's report on Admiral Winfield S. Schley's behavior in that conflict. In 1902 Miles toured the Philippine Islands and aroused controversy for comments relating to the treatment of prisoners of war there. It was no secret that President Theodore Roosevelt disparagingly regarded him as a "brave peacock," but nevertheless he promoted Miles to lieutenant general in 1901. Miles roundly criticized Secretary of War Elihu Root for trying to establish a general staff along the German model and to abolish his office altogether. Miles, who harbored presidential aspirations of his own, was also bitterly disappointed when neither party asked him to run. He retired from active duty in 1903 and died in Washington, D.C., on May 15, 1925, one of the foremost soldiers of his age.

General Nelson A. Miles (*Library of Congress*)

March 1

MEDICAL: The War Department issues a general order that establishes the Army Hospital Corps, which employs hospital stewards, acting hospital stewards, and privates.

MILITARY: To provide a professional cadre of enlisted soldiers to assist the medical profession in the field, Congress authorizes the Army Hospital Corps. This relieves line units from having to assign the requisite personnel.

March 3

NAVAL: In Washington, D.C., Congress authorizes construction of the protected cruisers *Philadelphia* and *San Francisco*.

July 26

MILITARY: A milestone of sorts is passed when the 12th Infantry is assembled at Buffalo, New York, and conducts regimental-level exercises as an integrated unit

for the first time since 1866. Previously, the small size of the American army and the vast frontier that it is tasked with guarding requires units to be dispersed in small detachments at various forts.

October 20

MILITARY: Major George K. Brady commences construction of Fort Logan, Colorado, in an attempt to reduce the number of army posts in the west and concentrate their garrisons closer to railways.

November 5

INDIAN: U.S. Army troops under General T. H. Ruger arrive at the Crow Agency, Montana, to put down a perceived uprising. In fact, a party of Crow warriors under Sword Bearer had been celebrating a successful raid on a Blackfoot camp and accidentally fired into the agent's house. A scuffle ensues, unfortunately, and Sword Bearer and eight Crow are slain.

1888

MUSIC: Marine Corps Band conductor John Philip Sousa composes his famous march "Semper Fidelis" for the corps.

April 1

INDIAN: A party of the 2nd Cavalry under Lieutenant Lloyd M. Bennett attacks hostile Indians at O'Fallon's Creek, Montana, capturing their pony herd.

May 17

NAVAL: Massachusetts becomes the first state to authorize a naval militia, which, in concert with other states that follow, spurs creation of a new naval reserve.

June 19

NAVAL: A 25-man landing party goes ashore at Chemulpo, Korea, and marches into the capital of Seoul to protect American citizens living there. This port gains lasting fame eight decades later after it is renamed Inchon—the site of a much larger Marine Corps landing in 1950.

August 14

MILITARY: Major General John M. Schofield succeeds the late Philip H. Sheridan as commanding general of the army. However, he does not receive the grade of lieutenant general.

September 7

NAVAL: The trend toward naval modernization continues when Congress authorizes construction of the steel cruiser *New York*, and six smaller vessels, including the *Olympia* of Spanish-American War fame.

November 5

INDIAN: Army troops arrive at the Crow Agency, Montana Territory, intending to arrest Chief Sword Bearer for shooting his rifle into the agent's house. A shoot-out ensues, leaving Sword Bearer and eight fellow Crow dead.

November 14

MARINES: The outbreak of civil war on the Pacific island of Samoa prompts a landing by marines from the gunboat *Nipsic* to protect American lives and property there.

December

NAVAL: German forces, working to suppress an active uprising in Samoa, briefly seize and hold a small American ship flying the national flag. The U.S. vice consul in Apia wires the matter to Washington, D.C., requesting the presence of a naval squadron.

December 20

NAVAL: In a less-than-subtle hint, the warships *Galena* and *Yantic* drop anchor at Port-au-Prince, Haiti, inducing authorities there to free a wrongfully detained American steamer.

1889**January 1**

INDIAN: Sioux spiritualist Wovoka experiences a series of visions during a solar eclipse, seeing all the buffalo and Indians that ever lived returning to life on the Great Plains. This is the origin of the so-called Ghost Dance religion.

January 12

NAVAL: In response to German actions in Samoa, Admiral Lewis A. Kimberly is dispatched there with the warships *Trenton*, *Nipsic*, and *Vandalia*.

March 5

MILITARY: In Washington, D.C., Redfield Procter is selected by President Benjamin Harrison to serve as his secretary of war.

March 6

NAVAL: In Washington, D.C., former Union army general Benjamin F. Tracy becomes the 32nd secretary of the navy.

March 15–16

DIPLOMACY: The navies of the United States, Great Britain, and Germany deploy several warships in the vicinity of Apia, Samoa, then in the grips of a civil war. Hostility among the various ships seems imminent when most are sunk by a sudden typhoon. The gunboat *Nipsic*, the screw steamer *Trenton*, and the screw sloop *Vandalia* are lost, along with 49 crew members. Three German warships are also lost in the harbor.

April 21

MARINES: A detachment of 30 marines provides security for American exhibits at the Universal Exhibition in Paris, France.

May 11

MILITARY: In Arizona, bandits attempt to seize an army paymaster's wagon but are repelled by soldiers commanded by Sergeant Benjamin Brown. Brown, who is severely wounded, fights heroically, and wins a Medal of Honor.

June 21

TECHNOLOGY: The Maxim machine gun, designed by American-born inventor Hiram Maxim, is successfully demonstrated at Annapolis, Maryland. This self-loading, perpetually firing device has a cyclic rate of 750 rounds a minute; it ushers in a new age of modern firepower.

July 30

MARINES: A detachment of marines from the gunboat *Adams* comes ashore at Honolulu, Hawaii, during a period of civil unrest to protect the American legation located there.

1890

January

MILITARY: Congress authorizes the addition of a pound of vegetables to the daily diet of all soldiers, although it falls upon the secretary of war to determine the exact proportions the new ration will assume.

January 7

NAVAL: The cruiser *Baltimore* under Captain Winfield S. Schley becomes the first American naval vessel rigged specifically as a mine layer.

January 23

NAVAL: The *Cushing*, constructed and launched at Bristol, Rhode Island, becomes the first torpedo boat in American naval history. Due to the experimental nature of the craft, it is assigned to work with the so-called Squadron of Evolution for testing purposes.

February 8

MARINES: A landing detachment from the steam bark *Omaha* goes ashore at Nodogaya, Japan, to assist local authorities in fighting a fire.

March 7

INDIAN: Troops of the 4th Cavalry are attacked in camp by hostile Apache, and Sergeant James T. Daniels distinguishes himself in combat, winning a Medal of Honor.

March 21

MILITARY: Former brigadier general George Crook, a noted Indian fighter, dies in Chicago, Illinois, as he was about to campaign for better treatment of the Apache in captivity.

April 23

NAVAL: The *Cushing* is commissioned into active service as the navy's first torpedo boat. Relatively small at 104 feet in length, it boasts 22 crew members and a top speed of 23 knots.

May

NAVAL: Captain Alfred Thayer Mahan, an instructor at the U.S. Naval War College, publishes his seminal work, *The Influence of Sea Power Upon History, 1660–1783*, which is translated into several languages and becomes a de facto policy guide for several of the world's naval establishments. This classic analysis of naval power holds that nations cannot become world powers without command of the sea lanes, and his precepts become fashionable in naval circles around the globe. Moreover, it forces political and military thinkers in the United States to reevaluate traditional isolationism in an increasingly imperial age.

June 13

NAVAL: In Annapolis, Maryland, Captain Robert L. Phythian is appointed the 14th superintendent of the U.S. Naval Academy.

June 16

MILITARY: To further promote professionalism, Congress modifies the promotion system for all officers under the grade of brigadier general. Officers can now be transferred within a given branch with loss of rank or seniority. Additionally, regimental officers below the rank of major are now subject to examination to ensure minimum levels of competence.

June 30

NAVAL: Secretary of the Navy Benjamin F. Tracy issues his first annual report and calls for the construction of no less than 20 armored battleships to defend the nation's home waters; Congress ultimately votes to pay for only three, the *Indiana*, *Massachusetts*, and *Oregon*. These vessels are one third larger than existing designs and carry their main armament in centerline fore and aft turrets.

July 30

MARINES: Political violence in Buenos Aires, Argentina, results in the side-wheel steamer *Tallapoosa* sending marines ashore to protect the American legation stationed there.

August 8

NAVAL: The cruiser *Baltimore* is detailed to carry the body of Swedish naval engineer John Ericsson, father of the famous Civil War ironclad *Monitor*, back to his homeland for burial.

September 10

MILITARY: A depot in San Antonio, Texas, is christened Fort Sam Houston in honor of the great Texan patriot.

October

RELIGION: Daniel F. Royer, agent of the Pine Ridge Reservation, South Dakota, is worried about the Lakota's embrace of the new Ghost Dance religion, fearing that it might spark an uprising. He therefore urges the government to dispatch army troops to the reservation to maintain order.

October 1

MILITARY: In an move to spur greater economy, Congress transfers the Weather Service from the U.S. Army Signal Corps to the Department of Agriculture. Congress also enlarges the Signal Corps by one major, four captains, and four lieutenants.

November 20

INDIAN: At Pine Ridge, South Dakota, newly appointed Indian agents perceive the so-called Ghost Dance religion preached by the prophet Wokova among fellow Sioux as the prelude to a potential uprising. Upon their instigation, Brigadier General Nelson A. Miles sends army troops and Apache Indian police in their employ onto the Pine Ridge Agency, South Dakota, to restore order. Ultimately, 100 troopers of the 8th Cavalry arrive.

November 29

SPORTS: The first Army-Navy football game is played at the U.S. Military Academy, West Point, and Navy wins the “battle” decisively, 24 to 0. Thereafter the game—and its concomitant rivalry—becomes an annual fixture in the sporting world.

December 12

INDIAN: A party of cowboys ambush a Sioux war band as it attempts to pass through Daly’s Ranch, South Dakota; the Indians are driven off with a loss of three dead.

December 15

INDIAN: Apache tribal police under Lieutenant Bull Head and Sergeant Red Tomahawk are sent to the Standing Rock Reservation, South Dakota Territory, to arrest Sitting Bull. A struggle ensues and the police end up killing him, at

**Sitting Bull (ca. 1831–1890)***Hunkpapa chief*

Sitting Bull (Tatanka Iyotake) was probably born around 1831 along the Grand River in modern South Dakota. As part of the Hunkpapa Sioux nation, he distinguished himself as a warrior early in manhood and by 1856 headed the Strong Heart military society. Sitting Bull first skirmished against the U.S. Army during Little Crow’s uprising in Minnesota in 1862; however, he became more highly prized among his people as a shaman, or medicine man, for the great number of visions he conjured while dancing. By 1866 he had emerged as a leader of the Hunkpapa and their nominal allies, the Lakota Sioux. He also became closely identified with noted war chief Crazy Horse of the Oglala. As a leader, Sitting Bull strongly resented and resisted white encroachment on Indian lands, and he repeatedly warned numerous white representatives that he would resist any attempt to relocate his people to a reservation. The Sioux managed to coexist in an uneasy relationship with fron-

tier settlements until 1874, when gold was discovered in the Black Hills region of South Dakota. The discovery triggered an influx of miners and prospectors, whom the Indians harried. Tensions crested in the fall of 1875 when General Alfred H. Terry warned all Indians to relocate to reservations by the following January or be considered hostile and subject to a military response. “You won’t need any guides,” Sitting Bull responded, “You can find me easily, I won’t run away.” In time his encampment was swollen by 2,500 to 4,000 warriors and, under enlightened leadership from Crazy Horse, Gall, and others, they turned back General George Crook’s column at Rosebud Creek, then destroyed part of Colonel George A. Custer’s 7th Cavalry at Little Bighorn. The Indians then dispersed for the winter with vengeful army troops in hot pursuit, and Sitting Bull’s band sought safety in Canada by May 1877.

After months of deprivation in Canada, Sitting Bull and 187 Hunkpapa finally

which point the enraged tribesmen open fire; 13 Native Americans are killed in the exchange. Chief Big Foot escapes from the reservation with his band and makes for the Pine Ridge Agency to seek protection from Red Cloud. This marks the outbreak of the “Ghost Dance War,” the final conflict between the U.S. Army and the Plains Indians.

December 27

MILITARY: A detachment of the 7th Cavalry under Major Samuel M. Whiteside overtakes Big Foot’s fleeing band of Miniconjou Sioux and orders them to the cavalry camp at Wounded Knee, South Dakota Territory. Big Foot, ill with pneumonia, peacefully submits along with his followers, then Whiteside kindly dispatches his surgeon to tend to the ailing chief. The troops issue rations to the hungry Indians but also train four rapid-fire Hotchkiss cannon on them.

returned to the United States and surrendered to authorities in July 1881. Following two years of confinement at Fort Randall, he was released and relocated to the Standing Rock Reservation. Much to his surprise, Sitting Bull had become a legendary and popular figure among whites and he toured a year with William “Buffalo Bill” Cody’s Wild West Show to thunderous applause. Despite this newfound fame, Sitting Bull insisted that he was still chief of his people and sought to return to them. He continued living a quiet life until 1890 when the new “Ghost Dance” religion took root among the impoverished Indians, which promised to deliver them from their white oppressors. Sitting Bull looked askance at these developments and did not endorse them, but army officials suspected he was secretly fomenting an uprising and dispatched Apache reservation police to arrest him. Fighting ensued and Sitting Bull was mortally wounded on December 15, 1890, possibly the most famous symbol of Native-American resistance.

Sitting Bull (National Archives of Canada)

December 28–29

MILITARY: Ongoing tensions between the Lakota Sioux and the 7th Cavalry under Colonel James W. Forsyth explode at Wounded Knee Creek, South Dakota. Forsyth arrives with the balance of the regiment and begins disarming and detaining several Indian leaders associated with the Ghost Dance religion, particularly the Miniconjou Sioux chief Big Foot, but the tribesmen refuse to give up their weapons. Fighting breaks out when an angry brave apparently fires upon the soldiers, who returned fire into the crowd. A one-sided slaughter ensues for the Native Americans with 84 men (including Big Foot), 44 women, and 18 children slain and a further 51 wounded. American losses are 19 dead and 33 wounded—most likely from friendly fire. This is the final, bloody act in the long war against the Plains Indians and it elicits an outpouring of public sympathy for their plight.

December 30

MILITARY: Hostile Sioux ambush a patrol of the 7th Cavalry under Colonel James W. Forsyth at White Clay Creek, South Dakota Territory, forcing a detachment of the 9th Cavalry to march to its relief. Brigadier General Nelson A. Miles begins deploying 3,500 men around the Pine Ridge Reservation to crush the “rebellion.”

December 31

MILITARY: Following the encounter at Wounded Knee a patrol of the 7th Cavalry under Major James Forsyth is dispatched to Drexel Mission Church on White Clay Creek, 15 miles north of the Pine Ridge Agency, South Dakota. While investigating a burning shed near the mission, the troopers are attacked by hostile Sioux and pinned down in a valley until elements of the 9th Cavalry arrive to drive the hostiles off.

1891

MILITARY: Lieutenant John J. Pershing is assigned to work as professor of military science and tactics at the University of Nebraska, while also taking classes toward a law degree.

January 1

INDIAN: Army burial crews inter the frozen corpses of 146 men, women, and children killed at the Wounded Knee massacre. A further 300 were also wounded and are presently in the care of friends and relatives on the reservation.

- Angry Sioux war bands attack the encampment of Captain John B. Kerr, 6th Cavalry, along Little Grass Creek, White River, South Dakota Territory. The fight goes on until the soldiers are rescued by a party of cavalry under Lieutenant Colonel Eugene A. Carr; the Americans lose one dead and wounded while six dead Indians are found on the battlefield.
- As a party of the 6th Cavalry under Lieutenant Benjamin Cheever attempts to ford the White River, South Dakota, they come under fire by hostile Sioux; Cheever sounds the charge and scatters his opponents, winning a Medal of Honor.

January 6

INDIAN: A band of Sioux warriors, enraged by the massacre at Wounded Knee, attack a wagon train in one of the last acts of Native-American hostility.

January 15

INDIAN: Army troops under Brigadier General Nelson A. Miles surround the Pine Ridge Reservation and demand the surrender of Chief Kicking Bear, a Ghost Religion advocate, and 5,000 of his tribesmen. The chief, mindful of the slaughter at Wounded Knee, capitulates peacefully in the last formal surrender of the Plains Indian Wars and 400 years of internecine conflict between whites and Native Americans draws to an end.

January 30

MARINES: In Washington, D.C., Lieutenant Colonel Charles Heywood becomes the ninth Commandant of Marines following the retirement of Charles G. McCawley.

February

MILITARY: Congress passes a law requiring army officers to retire at 64 years of age.

March 1

MILITARY: The War Department, eager to deflect Native-American attention from their usual warlike preparations, authorizes the recruitment of 26 companies of Indian scouts—one per each regiment in the army. A total of 1,071 scouts are enlisted over the next six years. The army, however, considers them as skilled in scouting but generally unreliable as soldiers.

March 3

NAVAL: The post of assistant secretary of the navy is reactivated and James Russell Soley, a former Naval Academy professor, is tapped to fill it.

March 5

MILITARY: In Washington, D.C., Stephen B. Elkins gains appointment as the new secretary of war.

March 9

MILITARY: The army adjutant general issues Order No. 28, authorizing recruitment of eight troops of Native-American cavalry scouts and 19 companies of Indian infantry. Cohorts from allied tribes such as the Crow and former enemies such as the Sioux are all solicited.

May 1

MARINES: In Washington, D.C., the Marine Corps establishes the School of Application at the Marine Barracks, launching its first formal training program for newly commissioned second lieutenants.

June 2

NAVAL: In the Caribbean, Marines from the screw sloop *Kearsarge* land on Navassa Island, between Jamaica and Haiti, to restore order.

June 26

MARINES: A new base is established near the Charleston Navy Yard, South Carolina; it later becomes known as Parris Island.

July 2

MARINES: In Alaska, a force of 113 marines and officers are assigned duties relating to the prohibition of seal hunting.

July 4

NAVAL: The warship *Charleston* seizes the Chilean rebel vessel *Itata* in the port of Iquique, Chile, after allegations that it violated American neutrality by purchasing arms at San Diego, California.

August 28

MARINES: A detachment from the cruisers *Baltimore* and *San Francisco* are landed at Valparaíso, Chile, to protect the U.S. consulate during an ongoing civil war there.

October 3

MILITARY: New drill and modernized regulations are issued by the War Department for the infantry, cavalry, and artillery.

October 16

DIPLOMACY: War looms when two American sailors from the *Baltimore* under Captain William S. Schley are killed by a mob at the True Blue Saloon in Valparaíso, Chile, and 16 others are injured. The locals are apparently angered by the recent seizure of a boat carrying arms for local rebels.

1892**January**

AVIATION: Lieutenant William A. Glassford ventures to Paris, France, to purchase a balloon for the Signal Corps. It is later christened the *General Myer* and shipped to Fort Riley, Kansas, for use by the Signal Corps.

MILITARY: In a sign of increasing military professionalism, the Artillery School commences publication of the *Journal of the United States Artillery*.

January 21–27

DIPLOMACY: President Benjamin Harrison demands an apology and reparations for the deaths of two American sailors in Valparaíso, Chile, under threat of war; after some reflection, the Chilean government complies.

April 23

MILITARY: Congress authorizes construction of Fort Logan H. Roots near Little Rock, Arkansas, which remains in service today as a Veterans Administration hospital.

July 14

LABOR: U.S. Army troops arrive to end a strike by silver miners at Coeur d'Alene, Idaho, and enforce order by establishing martial law.

July 19

NAVAL: Congress authorizes construction of a sixth battleship, the *Iowa*.

September 1

MARINES: In Washington, D.C., the first class for noncommissioned officers begins at the School of Application.

September 14

MARINES: A Marine battalion helps quarantine a camp of immigrants at Sandy Hook, New York, to contain an outbreak of cholera.

1893

MILITARY: The army adopts the Danish .30 caliber Krag-Jorgensen rifle, the first American firearm possessing a five-round clip. It replaces the single-shot Spring Model 1873 rifle.

January 9

MILITARY: In Fort Riley, Kansas, the School for Cavalry and Light Artillery, authorized by Congress in 1887, opens for instruction after its facilities are finally completed. Units are rotated through a year-long course emphasizing practical training and instruction.

January 16

MARINES: A detachment from the cruiser *Boston* goes ashore at Honolulu, Hawaii, to restore order after the queen is deposed by American sugar planters; planters go on to form a provisional government and request the American government to approve annexation.

March 5

MILITARY: In Washington, D.C., President Grover Cleveland appoints Daniel S. Lamont to serve as his secretary of war.

March 7

NAVAL: In Washington, D.C., Hilary A. Herbert, a former Confederate officer, is sworn in as the 33rd secretary of the navy.

May 6

MARINES: A detachment is assembled to provide security at the World's Columbian Exposition in Chicago, Illinois.

June 24

MEDICAL: The Army Medical School opens under the auspices of General George M. Sternberg, surgeon general, to insure proper instruction for all Medical Corps personnel. Among its most distinguished alumni are Walter Reed and Josiah Gorgas.

August 1

NAVAL: The newly commissioned, 8,150-ton cruiser *New York* joins the fleet, being both heavily armed and armored, and possessing a top speed of 21 knots. It is the navy's first such modern warship.

August 27

MARINES: After a tidal wave strikes the South Carolina coast, marines from the Port Royal barracks are detailed to assist in rescue operations.

October 7

MARINES: Landing parties are detached from the cruiser *Chicago* and land at La Guaira, Venezuela, to protect the U.S. consulate during a period of unrest.

November 3

MILITARY: Congress instructs the War Department to detail up to 100 officers for the purposes of teaching military science at colleges.

1894

AVIATION: The Signal Corps balloon detachment transfers from Fort Riley, Kansas, to Fort Logan, Colorado, in search of better weather conditions.

MILITARY: Congress passes legislation requiring that all recruits enlisting in the army be citizens, less than 30 years of age, and fluent in English.

January 29

NAVAL: In Rio de Janeiro, Rear Admiral A. E. K. Benham uses American warships to break up a blockade established by Brazilian monarchist rebels attempting to subvert the republic. The Americans are joined later by British vessels and together they save the tottering regime of President Morales Barros.

February 2

NAVAL: The venerable screw sloop *Kearsarge*, victor over the Confederate commerce raider *Alabama* in 1864, strikes the Roncador reef off the West Indies and sinks. However, its illustrious name is subsequently transferred to a new battleship under construction, becoming the only vessel of its class not christened after a state.

March 25

MARINES: The Chinese viceroy pays his first official visit to the U.S. consulate in Tientsin, while marines dispatched from the gunboat *Monocacy* provide an honor guard.

July 3

MILITARY: Army troops are deployed in Chicago to enforce a court injunction against the railroad strike there against the Pullman Company. Illinois governor John P. Atgeld protests the move on constitutional grounds, insisting that the problem is local and does not merit federal intervention. In any event, the American Railway Union strikers, agitated by Eugene V. Debs, are unmoved.

July 6

MARINES: Sailors and marines from the cruiser *Columbia* land at Bluefields, Nicaragua, to protect American lives and property against civil unrest.

July 8

MILITARY: Army troops fire upon an unruly mob of strikers at Hammond, Indiana, killing one and wounding a dozen more.

July 20

LABOR: Army troops are withdrawn from the Chicago area, but rampaging strikers manage to set fires and burn \$3 million in property.

July 24

MARINES: The outbreak of the Sino-Japanese War, whereupon Japanese troops invade the Korean Peninsula, results in the landing of 50 marines from the cruiser *Baltimore* to protect the American legation at Seoul.

July 31

MARINES: The detachment guarding property at Bluefields, Nicaragua, is reinforced by marines from the cruiser *Columbia*; all are withdrawn within a week.

September 17

NAVAL: During the Battle of Yalu, fought between the Japanese and Chinese navies, Philo McGiffen, who graduated from Annapolis in 1882 and is serving with the Chinese, becomes the first American to command a battleship when he takes charge of the *Chen Yuen* from its Chinese captain.

November 15

NAVAL: In Annapolis, Maryland, Captain Philip H. Cooper is appointed the 15th superintendent of the U.S. Naval Academy.

December 6

MARINES: A detachment of 60 marines marches overland from Taku, China, to Tientsin to protect the American legation during a period of unrest.

1895**March 1**

MARINES: A detachment from the gunboat *Yorktown* lands at Seoul, Korea, to serve as the legation guard.

March 2

NAVAL: Congress continues its modernizing trend by authorizing construction of the battleships *Kearsarge* and *Kentucky*.

March 4

MARINE: A detachment goes ashore at Port of Spain, Trinidad, to assist in fighting a fire.

March 8

MARINES: Proof of expanding American interests on a global scale is evinced today when marines from the cruisers *Baltimore* and *Atlanta* are sent ashore at Chenfoo, China, and Boca del Toro, Colombia, to protect American lives and property during intervals of unrest.

March 13

NAVAL: The John P. Holland Company of New York contracts with the Navy Department to construct that service's first submarine.

April 17

MILITARY: Japan's sweeping victory over China in the Sino-Japanese War is finalized by the Treaty of Shimonoseki, whereby the Korean Peninsula becomes independent and the island of Formosa and the Pescadores are ceded to the victors. The war puts the world on notice that Japan, which had been living in feudalism only three decades before, has become a regional power to reckon with.

August 15

NAVAL: The *Texas* is commissioned, becoming the first armored battleship to serve in the navy. However, because its armament is designed off-center, the ship is quickly classified as a second-class warship after more modern designs with centerline main batteries and turrets arrive.

September 17

NAVAL: The *Maine*, originally built as an armored cruiser but now reclassified as a second-class battleship, is commissioned into service. The ship serves for only three years before being destroyed by an accidental explosion that brings on a war.

October 5

MILITARY: Major General Nelson A. Miles replaces John M. Schofield as commanding general of the U.S. Army.

November 20

NAVAL: The *Indiana*, the first modern American battleship sporting a centerline turret armament, is commissioned. Two other vessels, the *Massachusetts* and *Oregon*, will constitute the class.

1896

MILITARY: The 14th Infantry and detachments from other regiments arrive in Alaska to help map and survey land routes and minerals resources in that largely uncharted wilderness.

May 2

MARINES: The gunboat *Alert* dispatches a landing party ashore at Cortino, Nicaragua, to protect American lives and property during an interval of unrest.

May 12

MILITARY: The African-American 25th Infantry Bicycle Corps is formed at Fort Missoula, Montana, under 2nd Lieutenant James A. Moss, a white officer. This is the only such unit in the world, and it seeks to test the viability of such light and reliable transportation for military applications.

June 6

MARINES: In light of increasing global commitments, Congress authorizes an increase in manpower to 93 officers and 3,574 enlisted men.

June 10

NAVAL: An experimental ship-model testing tank to facilitate the construction of modern warships is authorized by Congress; it is built at the Washington Navy Yard.

- The new battleship *Massachusetts* is commissioned.

July 15

NAVAL: The new battleship *Oregon* is commissioned.

July 20

MARINES: In Washington, D.C., Congress authorizes the Marine Corps Good Conduct Medal for enlisted men; it has been personally designed by Brigadier General Commandant Charles F. Heywood.

July 31

INDIAN: In Jackson Hole, Wyoming, white settlers kill three Bannock Indians, including a child, and the government orders Major Adna R. Chaffee with cavalry and troops to restore order and prevent an outbreak of fighting.

1897

March 5

MILITARY: In Washington, D.C., Russell A. Alger is appointed secretary of war by President William McKinley.

March 6

NAVAL: In Washington, D.C., John Davis Long, former governor of Massachusetts, becomes the 34th secretary of the navy.

April 22

NAVAL: Inventor Simon Lake constructs and tests the submarine *Argonaut*, which is both fully submersible and manageable under water. This craft, 36 feet long and powered by a 30-horsepower gasoline engine, depends on a hose floating from the surface to provide both crew and propulsion with air.

April 27

MARINES: Ceremonies marking the dedication of Grant's Tomb, New York City, are attended by the Marine Band and two battalions of marines.

May 31

MILITARY: The army discharges the last of its Indian scouts, although many Native Americans continue serving in the ranks as regular soldiers.

June 16

NAVAL: The newly commissioned battleship *Iowa* constitutes the only vessel of its class.

December 28

MARINES: The Pensacola Navy Yard, Florida, establishes its own marine barracks.

1898

January 1

NAVAL: Admiral Montgomery Sicard positions his North Atlantic Squadron near the Dry Tortugas, Florida, in anticipation of war with Spain.

MARINES: Various detachments begin assembling in the Gulf of Mexico for possible use in a war against Spain.

January 24–25

NAVAL: The battleship *Maine* under Captain Charles D. Sigsbee drops anchor at Havana Harbor, Cuba, ostensibly on a goodwill call, but it is actually present to assist in protecting American lives and property.

February 7

MARINES: Sailors and marines are landed at San Juan del Sur by the gunboat *Alert* to protect American lives during a period of revolutionary turmoil.

February 8

MILITARY: Due to the onslaught of prospectors during the Alaskan gold rush, the army establishes a safety zone to protect private property deposited there. Four companies of the 14th Infantry are dispatched to preserve law and order.

February 15

NAVAL: The 6,700-ton battleship *Maine* under Captain Charles D. Sigsbee explodes and sinks while anchored in Havana Harbor with the loss of 260 sailors out of a total complement of 358, apparently from an internal explosion. However, this costly accident is treated in the American press as an act of sabotage or the work of a hostile mine, exacerbating anti-Spanish and pro-war sentiments nationwide. In time, “Remember the Maine!” becomes a stirring battle cry and a pretext for intervention in Cuba.

MARINES: No less than 28 marines are killed in the explosion onboard the battleship *Maine*.

February 18

MILITARY: In Alaska, the 14th Infantry begins operating as a military peacekeeping force to protect miners and public property during the ongoing gold rush there. The soldiers are tasked with patrolling this “safety zone” in order to root out criminals and troublemakers.

February 23

NAVAL: Anticipating hostilities with Spain, the Navy Department orders additional warships to be concentrated at Key West, Florida.

February 25

NAVAL: Assistant Secretary of the Navy Theodore Roosevelt, anticipating war with Spain, secretly orders Commodore George Dewey at Hong Kong to attack

The U.S. battleship *Maine* (Library of Congress)

the Pacific Squadron of Admiral Patricio Montojo in the Philippines if war is declared, and then to capture Manila.

March 6

NAVAL: The 10,200-ton battleship *Oregon* is dispatched from Puget Sound, Washington, to Key West, Florida, under Captain Charles E. Clark. The move is undertaken in anticipation of war with Spain. More importantly, the fact that it takes 67 days and 14,760 miles to round Cape Horn and deploy underscores the need for a Central American canal to connect the Atlantic and Pacific Oceans. The vessel is accompanied by the 1,000-ton gunboat *Marietta*.

March 8

MILITARY: Congress expands the army by adding the 6th and 7th Artillery Regiments to the regular army establishment.

March 9

POLITICS: In a fit of bellicosity, exacerbated by the loss of the battleship *Maine*, Congress approves \$50 million in defense appropriations, with half earmarked for the navy; at present it is well prepared for strife but the army is undermanned, underequipped, and needs to be filled out by enthusiastic volunteers.

March 11

MILITARY: As President William McKinley wavers over the issue of conflict, the War Department begins mobilizing its forces for war with Spain.

March 14

NAVAL: In Spain, Admiral Pascual Cervera hoists anchor in Cadiz and sails for the Cape Verde Islands in an ill-fated attempt to reinforce Cuba.

March 17

NAVAL: The *Holland*, the navy's first commissioned submarine, is launched at the Crescent Shipyard, New Jersey, under the command of Lieutenant H. H. Caldwell.

March 18

NAVAL: A "Flying Squadron" consisting of the battleships *Texas* and *Massachusetts*, along with the cruisers *Brooklyn*, *Columbia*, and *Minneapolis*, is entrusted to acting commodore Winfield S. Schley. It is entrusted with guarding the Atlantic coastline against possible attack by Spain.

March 19

NAVAL: In Washington, D.C., the report of the court of inquiry regarding the loss of the *Maine* is completed.

March 24

NAVAL: Captain William T. Sampson replaces Rear Admiral Montgomery B. Sicard as commander of the North Atlantic Squadron while his own promotion to admiral is still pending.

March 25

AVIATION: In Washington, D.C., Theodore Roosevelt, assistant secretary of the navy, recommends to the secretary of the navy that several "scientific officers" be appointed to investigate possible military applications for Dr. Samuel P. Langley's purported "flying machine," then under development.

March 28

NAVAL: The official report on the loss of the *Maine* is finally presented to Congress. Ignoring the evidence, the report concludes that the vessel was sunk by an underwater explosion, possibly from a mine. It declines to state whose mine it was, possibly that of Cuban rebels, which in itself is additional proof that Spain had failed to maintain order in the islands.

April 11

POLITICS: In Washington, D.C., President William T. McKinley asks Congress for a declaration of war against Spain.

April 15

MILITARY: The War Department orders troops and equipment concentrated in several ports along the Gulf of Mexico, although the order is quickly countermanded when facilities there are found lacking. Eight corps are planned with each commanded by a major general, but one, the VI Corps, is never raised.

April 19–20

DIPLOMACY: In Washington, D.C., Congress votes to authorize President William McKinley to commence offensive operations against Spanish forces in Cuba and the Philippines. He signs the order the following day.

April 22

MILITARY: Congress passes the Volunteer Army Act to recruit a force of 125,000 men, including recruitment of the 1st Volunteer Cavalry, command of which is handed to Colonel Leonard Wood. Assistant secretary of the navy. Theodore Roosevelt resigns from office to serve as its lieutenant colonel. The army almost doubles in size from its current strength to 65,000 for the duration of hostilities.

NAVAL: A naval blockade is declared around the island of Cuba by the North Atlantic Squadron under Rear Admiral William T. Sampson, who goes on to block the ports of Havana, Mariel, Matanzas, Cardenas, and Cienfuegos; the gunboat *Nashville* draws the first blood by capturing the Spanish steamer *Buenaventura* in the Gulf of Mexico, the war's first prize. Over the course of the war, the navy acquires 128 vessels and expands in size from 12,500 men to 24,123.

MARINES: Commandant Charles Heywood orders that a unit of marines be assembled for possible duty overseas. The unit is to be commanded by Lieutenant Colonel Robert W. Huntington.

April 25

DIPLOMACY: The United States declares war on Spain, retroactive to the 21st when the Spanish cut diplomatic relations. However, the attached Teller Amendment mandates that the United States will make no attempt to seize control of Cuba. This is the first major conflict waged by America since the Civil War.

NAVAL: Commodore George Dewey's squadron, anchored off Hong Kong, China, is ordered into action against the Spanish fleet in the Philippines by Secretary of the Navy John D. Long.

April 26

MILITARY: Congress reorganizes army infantry regiments by authorizing a third battalion to each, along with two additional companies per unit. All companies extant are also increased to a strength of 100 men each.

April 27

NAVAL: Admiral George Dewey sorties his squadron, consisting of the modern steel cruisers *Olympia*, *Boston*, *Baltimore*, and *Raleigh*, and the gunboats *Petrel* and *Concord* from Hong Kong. He then steers directly toward Manila Bay to seek and destroy the Pacific Squadron of Admiral Patricio Montojo.

- The fleet under Rear Admiral William T. Sampson shells and silences Spanish batteries at Point Rubalcava, northwestern Cuba, with fire from the cruisers *New York* and *Cincinnati*, assisted by the monitor *Puritan*.

April 28

NAVAL: The Spanish Atlantic fleet of Admiral Pascual Cervera departs San Vicente, Cape Verde Islands, and sails for Cuba with the antiquated cruisers *Infanta Maria Theresa*, *Vizcaya*, *Almirante Oquendo*, and *Cistobal Colon*, plus destroyers *Furor*, *Pluton*, and *Terror*. Its exact whereabouts remains a complete mystery to the American fleet looking for it, prompting fears of an attack on the U.S. coastline.

April 29

AVIATION: A report issued by the first joint Army-Navy aeronautics board enunciates its findings relative to Dr. Samuel Langley's so-called flying machine. This device, which only sports a 12-foot wingspan, is a developmental model with no practical military application; however, the board recommends funding for additional experimentation.

NAVAL: The American cruiser *Marblehead* and armed yacht *Eagle* briefly exchange fire with the Spanish gunboats *Galacia* and *Vasco Núñez de Balboa* at Cienfuegos, with little damage inflicted.

April 30

NAVAL: The battleship *Oregon* and the gunboat *Marietta*, having rounded Cape Horn from San Francisco, put into Rio de Janeiro to recoal. They remain on the lookout for the Spanish destroyer *Temerario*, which is reported in local waters.

- The Asiatic Squadron under Commodore George Dewey arrives off Subic Bay, Philippines, and looks for its Spanish opposite, which is nowhere to be found.

May 1

NAVAL: Intelligence is received that the Spanish fleet of four cruisers and three destroyers has departed Cape Verde under Rear Admiral Pascual Cervera. Once informed, Rear Admiral William T. Sampson is convinced it is headed for the Caribbean.

- The Battle of Manila Bay ensues as the American squadron under Admiral George Dewey enters Manila Bay to find the Spanish force under Admiral Patricio Montojo waiting for him anchored in line abreast formation. He then barks "You may fire when ready, Gridley," to the commander of his flagship, *Olympia*, and it joins cruisers *Boston*, *Baltimore*, *Raleigh*, *Concord*, and the gunboat *Petrel* in a shooting spree against the obsolete Spanish vessels, sinking all seven of them in five passes. Montojo loses both his fleet and 371 killed and wounded while Dewey sustains nine wounded. The lopsided nature of this decisive victory also makes the admiral a national hero and the expression "Let George do it!" becomes a popular slogan.

May 1–30

MEDICAL: The threat of disease to concentrated soldiers, brought about mainly through poor planning, nonexistent sanitation, and tainted food, becomes painfully apparent when 80 officers and 2,520 enlisted men die before a shot is fired.

May 2–3

NAVAL: The gunboat *Petrel* dispatches a landing party to seize the Spanish naval arsenal at Cavite, Philippines, while other troops disembark from the cruisers *Baltimore* and *Raleigh* to capture Corregidor Island in Manila Bay.

MARINES: To a detachment from the cruiser *Baltimore* goes the honor of raising the Stars and Stripes over Cavite in the Philippines.

**Dewey, George (1837–1917)***Admiral*

George Dewey was born at Montpelier, Vermont, on December 26, 1837, and he attended Norwich University before transferring to the U.S. Naval Academy, Annapolis, Maryland. Dewey graduated in 1858 and rose to lieutenant in 1861 in time for active service during the Civil War. In 1862 he accompanied the squadron of Captain David G. Farragut and rendered useful service at the capture of New Orleans and during operations along the Mississippi River. Dewey finished the war performing blockade duty and he remained in the peacetime establishment, successively rising to commander in 1872, captain in 1884, and commodore by 1896. The navy at this time was undergoing a period of transition from sail to steam and Dewey immersed himself in the nuances of modern propulsion and ordnance. His expertise landed him a post as president of the Board of Inspection and Survey in 1895, chief of the Bureau of Equipment in 1889, and

president of the Board of Inspection and Survey in 1895. In all these posts he helped to establish criteria for the newest class of battleships. In 1897 Dewey requested sea duty and Assistant Secretary of the Navy Theodore Roosevelt appointed him commander of the Asiatic Squadron based at Hong Kong. He held this post when the Spanish-American War erupted in 1898. Roosevelt immediately ordered him to destroy the Spanish naval force at Manila in the Philippines.

On May 1, 1898, Dewey led his force of four modern cruisers and two gunboats into Manila Bay to engage an older but similarly sized Spanish force. Addressing the captain of his flag ship, he said, “You may fire when ready, Gridley.” The Americans completely outgunned their adversary, sinking all the Spanish ships with only eight injuries on the American side. The lopsided nature of his victory rendered him a national hero. Dewey lingered in Philippine waters long

May 4

NAVAL: Congress authorizes construction of three additional battleships, 16 torpedo boat destroyers, 12 torpedo boats, and one gunboat. This is the largest crash construction program for the navy since the Civil War.

MARINES: Congress authorizes a wartime increase in manpower by adding 473 men to the standing establishment plus an additional 43 officers and 1,580 men for the duration of the war. The commandant's rank is once again fixed at brigadier general.

May 8

MILITARY: Major General Nelson A. Miles is ordered to begin preparing his 70,000 regulars and volunteers for an amphibious descent upon Havana.

enough to assist General Wesley Merritt in capturing the city of Manila before returning to the United States in triumph. Previously, he had received promotion to rear admiral and he obtained the thanks of Congress. Dewey's reception in New York was a thunderous one, and the Democratic Party openly courted him to run as its presidential candidate. Dewey, who cared little for politics, toyed with the offer and then declined. In 1899 he received the special rank of admiral of the navy, the highest grade ever held by an American naval officer. The post required him to remain on active duty for life, and he also gained appointment as head of the General Board of the Navy. As its chief Dewey helped guide and orchestrate the ongoing naval construction program, which resulted in the acquisition of fleets of modern warships in time for World War I. Dewey published his memoirs in 1913, which were well received. He died in Washington, D.C., on January 26, 1917. His smashing victory at Manila Bay in 1898 secured his

Admiral George Dewey (*Library of Congress*)

reputation as a famous naval commander and set the stage for America's emergence as a global power.

NAVAL: The torpedo boat *Winslow* is driven from Cárdenas Bay, northwestern Cuba, by heavy fire from the Spanish gunboats *Ligera*, *Alerta*, and *Antonio López*.

May 11

NAVAL: The torpedo boat *Winslow* reenters Cárdenas Bay, Cuba, supported by the cruiser *Machias* and gunboats *Hudson* and *Wilmington*. The vessels are then ambushed by a masked Spanish battery using smokeless powder, which kills five and wounds five on the *Winslow* in an hourlong duel. Ensign Worth Bagley becomes the navy's first and only officer fatality in this war, while fireman first class George B. Meek is the first enlisted fatality. On the bright side, gunners mate George F. Brady and chief machinist mate Thomas C. Cooney receive Medals of Honor for bravery under fire. Spanish losses amount to two dead and 12 wounded, along with the gunboats *Ligera* and *Antonio López* severely damaged.

- The cruiser *Marblehead* and the gunboat *Nashville* shell the beach at Cienfuegos, Cuba, and also launch several boatloads of sailors in an attempt to sever communication cables between Havana and Madrid, but the Americans are driven off by heavy artillery fire from the shore after two and a half hours. The revenue cutter *Windom* races close to shore and brings down the local lighthouse with fire from its four-inch gun. Four Americans die and five are wounded while 54 Medals of Honor are awarded.

- Assistant Secretary of the Navy Theodore Roosevelt resigns from office to join a volunteer cavalry unit; he is replaced by Charles H. Allen.

May 12

NAVAL: The American fleet under Admiral William T. Sampson bombards San Juan, Puerto Rico, with the battleships *Indiana* and *Iowa*, cruisers *Detroit* and *New York*, and several monitors and gunboats. Enemy counterfire proves ineffectual, but once Sampson learns that the main Spanish squadron is not anchored there, he sails for Key West.

May 13

NAVAL: Captain C. F. Goodrich orders his armed auxiliary *Saint Louis* to dredge the seabed east of San Juan de Puerto Rico to cut the underwater cable to St. Thomas.

- Off Manila Bay, Philippines, Admiral George Dewey cables the Navy Department and appeals for a force of 5,000 army troops to capture the city.

May 14

NAVAL: As the gunboats *Vicksburg* and *Annapolis* patrol the waters outside Havana Harbor, they perceive the small Spanish vessels *Conde del Venadito* and *Nueva España* attempting to run their blockade. Shots are exchanged as the American auxiliaries *Mayflower*, *Wasp*, *Tecumseh*, and *Osceola* arrive to help, and the Spanish turn hard about and make for the safety of the harbor.

- The Spanish squadron under Admiral Cervera puts briefly into Willemsted, Curacao, to recoal, and departs hours later. He is last seen steering for Puerto Rico, then alters his course northwest for Santiago, Cuba.

May 16

NAVAL: American cruisers *Saint Louis* and *Wompatuck* enter shallow water near Santiago, Cuba, to find and cut the telegraphic cable leading to Jamaica. Heavy

fire from shore batteries drives them back out to deep water and the two ships enjoy better success on the following day.

May 17

NAVAL: Admiral William T. Sampson's flagship *New York* sails rapidly to Key West, Florida, frantically searching for the Spanish fleet, and intercepts the vessel *Carlos F. Rosas* off Havana. His straggling fleet gradually joins him over the next two days.

- American cruisers *Saint Louis* and *Wompatuck* reenter Santiago Bay and succeed in cutting one of the underwater telegraph cables before being driven off by shell fire.

May 18

NAVAL: The battleship *Oregon* drops anchor at Bridgetown, Barbados, to recoal, having covered 14,000 miles around Cape Horn in two months' sailing time.

- At Key West, Florida, Commodore William T. Sampson learns that the Spanish fleet under Rear Admiral Pascual Cervera had coaled at Curacão, Netherlands West Indies, and then sailed in the direction of Cuba.

May 19

MILITARY: President William McKinley authorizes Brigadier General Adolphus W. Greely, chief of the Signal Corps, to take control of the nations's telephone and telegraph systems. He is also tasked with intercepting Spanish communications for intelligence purposes—and on this day a dispatch is received announcing the arrival of the Spanish fleet at Santiago, Cuba.

- The Americans transport Filipino guerrilla leader Emilio Aguinaldo from Hong Kong to help fight the Spanish in the Philippines.

NAVAL: Badly outgunned, Spanish admiral Pascual Cervera takes his fleet of four cruisers and three destroyers within the confines of Santiago Harbor, Cuba, where it joins the 19,000-man garrison of General Arsenio Linares. Meanwhile, the Americans remain ignorant of Cervera's whereabouts and suspect he is actually positioning himself to bombard the U.S. coastline. Commodore Winfield S. Schley is thereby ordered to take his "Flying Squadron" and blockade the port at Cienfuegos.

May 20

NAVAL: While cruising international waters, the *Wompatuck* finds the underwater cable connecting Guantánamo, Cuba, to Cape Mole, Haiti, and cuts it.

May 21

NAVAL: Rear Admiral William T. Sampson departs Key West, Florida, and begins patrolling the Nicholas Channel along the northern coast of Cuba in the event that the main Spanish fleet is making for Havana.

- Off Cavite, Manila Bay, the boiler room on the *Concord* catches fire, imperiling the entire vessel. Seamen William A. Krause and John Walter receive Medals of Honor for extinguishing the flames and saving the lives of their shipmates.

May 23

NAVAL: Clara Barton sails onboard the Red Cross ship *State of Texas* to Tampa, Florida, awaiting the American invasion of Cuba.

May 24

NAVAL: The battleship *Oregon*, having sailed 14,000 miles from Puget Sound, Washington, and around Cape Horn, reaches Jupiter Inlet, Florida, following a 67-day transit and just in time to rendezvous with the main American fleet under Admiral Winfield S. Schley. Their sojourn highlights the strategic need for an isthmian canal to obtain a shorter passage through Nicaragua or Panama.

- Admiral William T. Sampson departs Cienfuegos, Cuba, and sails his squadron toward Santiago, then decides his fleet is in need of coaling, so he orders it to return to Key West, Florida.

May 25

MILITARY: American troopships depart San Francisco, California, with 2,000 army troops under General Thomas M. Anderson, destined for Manila. This is the vanguard of a 14,000-man force assembling under General Wesley Merritt, the VIII Corps. They depart upon the recommendation of Major General Nelson A. Miles, who feels that a land base should be acquired to prevent a second Spanish fleet from arriving.

- President William McKinley asks for an additional 75,000 volunteers to fight in the war.

May 26

NAVAL: Commodore Winfield S. Schley shepherds his squadron, consisting of battleships *Massachusetts* and *Texas*, cruisers *Brooklyn* and *Marblehead*, plus three armed auxiliaries, to within 20 miles of Santiago Harbor, Cuba. That evening he is reinforced by the cruiser *Minneapolis* and two more armed auxiliaries. He remains unaware that the Spanish fleet is already anchored there.

May 26–June 14

MILITARY: General William R. Shafter is ordered by the War Department to prepare his invasion force of 25,000 men, presently located at Tampa Bay, Florida, by collecting the requisite supplies and loading them on transports. However, the fleet is delayed several weeks awaiting supplies.

May 27

NAVAL: The squadron of Rear Admiral William T. Sampson is informed by the auxiliary vessel *Harvard* that he is to proceed to Santiago, Cuba, to possibly intercept the main Spanish squadron. Sampson accordingly turns away from Key West, Florida, and sails east.

May 28

MILITARY: To maintain rank seniority in the military, Congress mandates that all officers transferring from the regulars to the volunteers do so without the loss of any of their accumulated seniority.

NAVAL: The cruiser *Marblehead*, under Commander Bowman H. McCalla, scouts ahead of Commodore Winfield S. Schley's squadron by entering Santiago Harbor, Cuba, and discovers the Spanish squadron of Admiral Pascual Cervera anchored there.

- Cannon fire from the armed tugs *Uncas* and *Leyden* flatten a Spanish blockhouse outside Cardenas, Cuba.

May 29

NAVAL: An American fleet under Commodore Winfield S. Schley, having inadvertently discovered the fleet of Admiral Pascual Cervera anchored in Santiago Harbor, assumes blockading positions, and waits for the Spanish to sortie. Meanwhile, the squadron under Rear Admiral William T. Sampson hastens to the spot from Key West, Florida.

May 31

NAVAL: Admiral Winfield S. Schley tests the defenses of Santiago Harbor, Cuba, by sailing his squadron close to land, where the battleships *Massachusetts* and *Iowa* exchange fire with shore batteries. Little damage results to either side and the Americans withdraw leisurely while the Spanish stretch a boom across the harbor entrance.

June 1

MILITARY: A chartered vessel of Signal Corps men arrives off the Cuban coast and begins cutting Spanish communication cables until being driven off by artillery fire.

NAVAL: Rear Admiral William T. Sampson arrives off Santiago, Cuba, with the battleship *Oregon*, the cruiser *New York*, and the torpedo boat *Porter*. He then assumes command of all American naval forces from Commodore Winfield S. Schley. A stalemate ensues as the Americans dare not enter the narrow harbor channel guarded by powerful land batteries, while the Spanish cannot sortie without encountering the superior American fleet.

June 3

NAVAL: Lieutenant Richmond P. Hobson attempts to scuttle the collier *Merrimac* and trap the Spanish fleet at Santiago Harbor, but his vessel is thwarted by artillery fire and sinks near the edge of the channel. Hobson is captured along with seven volunteers, but they all receive the Medal of Honor for the attempt.

- Congress authorizes receipt of the Dewey Medal to all officers and men who fought in the Battle of Manila Bay. This is also the first official American campaign medal.

June 6

NAVAL: The American squadron under Admiral William T. Sampson enters Santiago Harbor and begins shelling the defenders. After several hours they withdraw intact, having inflicted casualties of three Spanish dead and 14 injured ashore. A further five were killed and 14 wounded onboard the antiquated Spanish cruiser *Reina Mercedes*.

MARINES: The cruisers *Marblehead* and *Yankee* are dispatched with marines to secure Guantánamo Bay, Cuba, as a naval base.

June 7

NAVAL: Commander Bowman H. McCalla directs the cruiser *Marblehead* to the town of Caimanera, Cuba, where it bombards and destroys a Spanish battery at Playa del Este. The cruiser *St. Louis* then runs the boom in the harbor and anchors off Fisherman's Point to receive two Cuban guerrillas with intelligence about Spanish defenses. Sampson decides that the 7,000-man garrison is too large to tackle until the arrival of additional forces.

June 9–14

MARINES: The invasion of Cuba commences when American cruisers *Marblehead* and *Yankee* under Commander Bowman H. McCalla anchor off Playa del Este, Guantánamo Bay, and disembark 647 marines under Lieutenant Colonel Robert W. Huntington from the transport *Panther*. The Spanish garrison of 7,000 men under General Felix Pareja Mesa begins preparing to attack the intruders.

June 10

NAVAL: The gunboat *St. Louis* intercepts the British collier *Twickenham*, which is carrying 3,000 tons of coal for the Spanish fleet at Santiago, Cuba.

June 11

MARINES: Spanish snipers begin peppering the marine garrison of Guantánamo, Cuba, and Lieutenant Colonel Robert W. Huntington instructs a party of 75 Cuban guerrillas under Captain George F. Elliot to destroy Spanish water supplies two miles away in the Cuzco Valley. They are to be assisted by gunfire from the dispatch vessel *Dolphin*.

June 12

MARINES: Spanish forces counterattack the American beachhead at Guantánamo, Cuba, and are handily repulsed by the marine contingent. Two Americans die and seven more are wounded.

- Guerrilla leader Emilio Aguinaldo proclaims a new Philippine insurrection with a view toward driving out the Spanish if possible—and the Americans, if necessary.

June 13

NAVAL: When the Spanish torpedo boat *Galicia* mistakenly approaches the converted cruiser *Yankee* off Cienfuegos, Cuba, it is hastily driven off by heavy cannon fire.

June 14

MILITARY: An invasion force of 17,000 regulars and volunteers sails in 32 transports from Tampa, Florida, under the command of Major General William R. Shafter and makes for Santiago, Cuba. Though they are ill due to sultry heat and poor sanitation, morale is high and many troops strike up the popular tune, “They’ll be a Hot Time in the Old Town Tonight.” This is also the largest expeditionary force dispatched from the United States to date.

NAVAL: The American squadron is strengthened by the arrival of the experimental, 930-ton cruiser *Vesuvius*, which is armed with high explosive gun-cotton ordnance. For this reason it is nicknamed the “dynamite cruiser.”

MARINES: A small force of marines under Captain George F. Elliott, assisted by Cuban guerrillas, outflanks and drives off a Spanish detachment at Cuzco Well, Guantánamo, killing 60 and taking 18 prisoners. Sergeant John H. Quick wins a Medal of Honor for signaling fire support from the beach while under heavy fire.

June 16

NAVAL: The cruiser *Marblehead* under Commander Bowman H. McCalla, the auxiliary cruiser *Suwanee*, assisted by the battleship *Texas*, shell and destroy a

Spanish fort at Cayo Toro, Guantánamo Bay, Cuba. This action helps marines ashore consolidate control of this vital port, which serves as the principal coaling station for the main fleet off Santiago and also the major entrepôt for the invasion of Puerto Rico. Journalist Stephen Crane, author of the *Red Badge of Courage*, comes ashore with the marines and publishes a vivid account of their activities.

June 17

NAVAL: German warships under Admiral Otto von Diedrichs, disregarding blockade rules established by Commodore George Dewey, sail into Manila Harbor, apparently intending to lease bases in the region.

June 18

MILITARY: Congress streamlines the system of military justice by allowing enlisted personnel to be tried by a courts-martial headed by a single officer and restricted to a specific list of punishments.

June 20

MILITARY: The naval expedition carrying the 17,000-man V Corps under Major General William R. Shafter arrives off Santiago, Cuba. Shafter then confers with Rear Admiral William T. Sampson as to strategy.

June 21

NAVAL: A small task force under Captain Henry Glass of the cruiser *Charleston* hails the Spanish garrison at Guam with a gunshot, then sends a messenger ashore to find out why they fail to retaliate. The Spanish commander apologizes for his seeming rudeness, but explains his complete lack of ammunition. Moreover, his 60-man garrison has not been informed as to the state of war.

June 22

MILITARY: The main expeditionary force of 17,000 men under Major General William R. “Pecos Bill” Shafter disembarks at Daiquiri, only 15 miles east of its main objective at Santiago. Because of the lack of boats and other landing craft, the men are forced to jump into the surf and wade ashore. Scattered fighting costs the invaders one killed and four wounded but the bulk of the 200,000 Spanish defenders are quiescent.

NAVAL: At San Juan, Puerto Rico, a sortie by the Spanish cruiser *Isabel II* and destroyer *Terror* is rebuffed by heavy fire from the American auxiliary *Saint Paul* under Captain Charles D. Sigsbee. *Isabel II* withdraws back to port, but *Terror* is heavily damaged and ends up beached.

June 23

MILITARY: American troops seize Siboney, Cuba, and prepare to use it as a base to attack Santiago, eight miles distant. Their approach is assisted by Cuban rebels, who pin down Spanish troops along their line of march.

June 24–25

MILITARY: An American cavalry division under impetuous leader General Joseph Wheeler pushes forward and defeats Spanish forces under General Antero Rubin in a minor action at Las Guasimas, Cuba, and drives them back to Santiago. Losing himself momentarily, Wheeler, an ex-Confederate, blurts out, “We’ve got the damned Yankees on the run!” Among the 1,000 troops engaged are the

so-called Rough Riders under Colonel Leonard Wood and Lieutenant Colonel Theodore Roosevelt, who receive their baptism of fire, and the veteran 10th Cavalry (African-American “Buffalo soldiers”). The Americans lose 16 killed and 52 wounded while Spanish losses approach 250. Assistant Surgeon James Robb Church, 1st Volunteer Cavalry, wins the Medal of Honor for rescuing wounded men under fire. The Americans also encounter German-made Mauser rifles, firing smokeless ammunition, for the first time.

June 27–29

MILITARY: At San Francisco, California, army troops commanded by Brigadier General Arthur McArthur begin steaming for the Philippines. Two days later Major General Wesley Merritt also departs on the cruiser *Newport*.

June 28

MILITARY: Major General William R. Shafter is alerted by Cuban spies that the 8,000-man Spanish garrison of Manzanillo has broken through guerrilla lines and is hurrying toward their main position at Santiago. This intelligence prompts Shafter to attack Santiago immediately before the reinforcements arrive.

NAVAL: In Washington, D.C., President William McKinley declares the entire southern coast of Cuba under a naval blockade.

- Off San Juan, Puerto Rico, the auxiliary cruiser *Yosemite* attacks and drives the Spanish transport *Antonio López* ashore, then destroys it by shelling. This is despite covering fire from two Spanish cruisers and a torpedo boat accompanying the hapless vessel.

June 30

MILITARY: Private Dennis Bell, 10th Cavalry, wins a Medal of Honor for rescuing wounded comrades at Tayabocoa, Cuba.

- General Thomas M. Anderson’s 2,400 troops come ashore at Cavite, south of Manila.
- The Americans are also transporting guerrilla leader Emilio Aguinaldo back from Hong Kong to rally his people and fight the Spanish.

NAVAL: The American armed yachts *Hornet* and *Hist* engage and sink a small Spanish gunboat at Niquero Bay, Cuba, and are joined by the armed tug *Wompatuck*. The three vessels venture into Manzanillo Harbor and sink the Spanish vessel *Centenila*, but they are driven back by artillery fire from surviving gunboats.

- Outside San Juan, Puerto Rico, the Spanish steamer *Antonio López* is intercepted by the American auxiliary vessel *Yosemite* and driven aground on Salinas Point.

July 1

MILITARY: The Battles of El Caney and San Juan Hill unfold as the Americans seek to surround Santiago, Cuba. In the former engagement, two brigades under Generals Adna R. Chaffee and William Ludlow attack 650 dug-in Spanish commanded by General Joaquin Vara de Rey, who enjoy the advantage of superior Mauser rifles and smokeless ammunition. The defenders are outnumbered ten-to-one but put up a valiant defense that holds the Americans at bay for seven hours. General Henry Lawton’s 2nd Division finally carries the heights at a cost of 81 killed and 360 wounded; the Spanish lose 248 killed and wounded along with

300 captured. In light of his losses, Shafter briefly entertains retreating while the Spanish, now commanded by General José Toral, fall back to a second line of trenches. Eight American soldiers receive the Medal of Honor for heroism under fire.

- The balance of General William R. Shafter's V Corps is committed to storming San Juan Hill, overlooking Santiago. A division under Jacob F. Kent moves forward to brush aside the 500 Spanish defenders from the hill side, only to be shot down in large numbers by Mauser-wielding snipers. The "Rough Riders" under Lieutenant Colonel Theodore Roosevelt gave way under the fusillade and are saved by the timely intervention of the 9th Cavalry, the famous "Buffalo soldiers." The Americans then regroup and charge, finally swamping both San Juan Hill and nearby Kettle Hill. The victors lose 140 killed and 940 wounded and Santiago is now on the verge of being captured. Privates George H. Warton and Dennis Bell both receive Medals of Honor for leaving the safety of their ships to assist wounded soldiers ashore.

NAVAL: The American gunboats *Scorpion* and *Osceola* pay a return visit to the harbor at Manzanillo, Cuba, to knock out any surviving Spanish land batteries, but they encounter heavy fire and withdraw after several hours. On the *Scorpion*, Seaman Frederick Muller wins a Medal of Honor for conspicuous bravery under fire.

- The American Expedition Force, with 115 officers and 2,386 men, disembarks outside Manila Bay in the Philippines, escorted by the cruiser *Charleston*.

July 2

MILITARY: Major General William T. Shafter, disturbed by heavy casualties sustained at El Caney and San Juan Hill, urgently implores Admiral William T. Sampson to attack and reduce the city of Santiago, Cuba. Sampson, alarmed by the request, agrees to confer with Shafter at Siboney, east of the city, on the following day.

NAVAL: Spanish authorities, unwilling to allow the squadron of Admiral Pascual Cervera to be captured or scuttled at Santiago, Cuba, order him to sortie immediately and give battle, if only to salvage their honor. Cervera complies and withdraws 1,200 sailors, who have been manning the city's defenses, back aboard his ships and prepares to make way.

July 3

MILITARY: At Santiago, Cuba, the garrison is reinforced by 3,500 exhausted men under Colonel Frederico Escario, which constitutes the long-anticipated Manzanillo garrison.

NAVAL: No sooner does Admiral William T. Sampson depart the American fleet for consultations with Major General William T. Shafter than Admiral Pascual Cervera sorties his fleet from Santiago, Cuba, and attempts to run for the open sea. However, the American "Flying Squadron" under Commodore Winfield S. Schley intercepts him with the battleships *Indiana*, *Iowa*, *Oregon*, and *Texas*, plus the cruiser *Brooklyn*. Cervera, who possesses only four cruisers and two destroyers, is badly outgunned and his force is mauled, being either sunk or driven ashore with a loss of 474 killed and wounded, along with 1,800 captured. The Americans lose only one dead and 10 injured. Credit for this lopsided victory

proves controversial for Admiral William T. Sampson, who appears toward its close, insists that it be considered his. Much controversy and acrimony ensues.

July 4

MILITARY: American forces en route to the Philippines pause briefly to occupy Wake Atoll in the mid-Pacific; it is claimed for the United States but not yet occupied.

NAVAL: Americans sink the captured Spanish cruiser *Reina Mercedes* at the mouth of Santiago Harbor and stop it from blocking the channel. The vessel is subsequently raised after the war and becomes a receiving ship at the U.S. Naval Academy at Annapolis, Maryland.

- The Spanish mail steamer *Alfonzo* is run aground and burned by the American armed yacht *Hawk* and the gunboat *Castine* seven miles west of Havana. It is then shelled and burned to the waterline by cannon fire.

July 7

DIPLOMACY: Congress passes a joint resolution whereby the Hawaiian Islands are annexed by the United States. It is anticipated that they will provide the navy with a strategic harbor and a staging area for the expanding American presence in the Pacific.

July 8

NAVAL: Admiral George Dewey seizes Isla Grande near Manila, Philippines, prior to moving on the city. American naval units force the German gunboat *Irene* out of the immediate vicinity.

July 9

MILITARY: With the Spanish fleet destroyed, General William R. Shafter orders a general advance upon Santiago and closes off all possible escape routes. This is accomplished once his force reaches the western shores of the bay.

July 10

MILITARY: American forces begin probing the Spanish defenses of Santiago, Cuba, assisted by shell fire from the cruisers *Brooklyn*, *New York*, and *Indiana*. Casualties are light on both sides.

July 11

MILITARY: A convoy arrives off Siboney, Cuba, with army reinforcements under Major General Nelson A. Miles.

MARINES: At Washington, D.C., the secretary of the navy marks the 100th anniversary of the founding of the U.S. Marine Corps.

July 12

NAVAL: The *Eagle* chases the Spanish blockade-runner *Santo Domingo* aground onto Piedras Point, southwestern Cuba, burning it.

July 13

NAVAL: To forestall any German attempt at occupation, Commodore George Dewey orders the ships *Raleigh* and *Concord* to seize Grande Island in Subic Bay. The German vessels retire upon their approach, but their presence underscores the desire by European powers to annex the islands if the Americans fail to do so.

July 14

MILITARY: Sixty volunteers from the largely African-American 24th Infantry perform nursing duties for thousands of soldiers and volunteers afflicted with malaria and yellow fever; roughly half perish from the maladies.

July 15

MILITARY: In a move similar to one enacted during the Civil War, the army authorizes corps and division patches in an attempt to bolster unit esprit de corps.

NAVAL: In Annapolis, Maryland, Rear Admiral Frederick V. McNair gains appointment as the 16th superintendent of the U.S. Naval Academy.

July 16

NAVAL: The cruiser *Nashville* assists Cuban rebels to seize the northeastern port of Gibara, Cuba.

July 17

MILITARY: Santiago, Cuba, under General José Toral surrenders to General William R. Shafter, who takes 24,000 prisoners and 97 cannon. The flag of Spain is hauled down for the first time in 382 years and replaced by the Stars and Stripes. The conquest of Cuba has cost the United States 243 dead and 1,445 injured; General Leonard Wood is installed as the town's military governor.

NAVAL: The surrender of Spanish forces at Santiago caps seven days of nonstop naval bombardment and concludes with an additional eight vessels captured.

**Wood, Leonard (1860–1927)**

Physician, Army general

Leonard Wood was born in Winchester, New Hampshire, on October 9, 1860, and he graduated from Harvard University with a medical degree in 1884. He then joined the U.S. Army as a contract physician in 1886 with the rank of lieutenant and served in the Arizona Territory under General Nelson A. Miles. Wood, although a doctor, fought in several pitched battles against renegade Apache under Geronimo, for which he received a Medal of Honor. He subsequently returned to more routine duties along the frontier before transferring to the Department of the East as personal physician to Presidents

Grover Cleveland and William McKinley. He also struck up cordial relations with Theodore Roosevelt, then assistance secretary of the navy. When the Spanish-American War broke out in 1898, Wood gained appointment as colonel of the 1st U.S. Volunteer Cavalry, the noted "Rough Riders," in which Roosevelt served as lieutenant colonel. He was mostly sidelined with administrative tasks but, in 1898, he gained appointment as military governor of Santiago, Cuba, with a rank of major general of volunteers. Wood distinguished

(continues)

(continued)

himself and subsequently served as military governor of the entire island until a new government was organized in 1901. Two years later he arrived in the Philippines as governor of volatile Moro Province, reestablished order there, and was made a major general in the regular army at the behest of now president Roosevelt. From 1906 to 1910, Wood commanded the Philippine Division capably, then returned to the United States where President William H. Taft appointed him chief of the general staff. Thus empowered, Wood struggled to bring the army's various and nearly autonomous departments under his control, and he arranged for the retirement of Adjutant General Frederick C. Ainsworth when he resisted change. By the time Wood stepped down in 1914, the General Staff had become a centralized strategy-making body, well prepared for the rigors of modern warfare.

As the United States drifted toward entry into World War I, both Wood and Roosevelt expressed dismay over the lack of military preparedness nationwide. They initiated citizen training camps at Plattsburgh, New York, to encourage volunteers. Wood was also less than candid in his criticism of President Woodrow Wilson, and consequently command of the American Expeditionary Force (AEF) went to General John J. Pershing, an officer of great merit but far less seniority. Wood also found himself exiled to command of the obscure Camp Funston, Kansas, for the duration of the war. Nonetheless, he remained a popular national figure and, in 1920, Wood dabbled in politics by vying for the Republican Party presidential nomination. Warren G. Harding won the nomination after eight deadlocked ballots, and Wood was deployed back to the Philippines as governor general. He remained there until 1927. Returning to the United States for medical treatment, he died in Boston, Massachusetts, on August 7, 1927.

July 18

MILITARY: In an attempt to sort out the organizational chaos, the Quartermaster Department creates the Division of Transportation to oversee all matters pertaining to rail and water transport for men and materiel.

NAVAL: American gunboats *Wilmington*, *Helena*, *Hist*, *Hornet*, *Wompatuck*, *Scorpion*, and *Osceola* enter Manzanillo's harbor and begin shelling Spanish vessels anchored there; six enemy gunboats and two steamers are either sunk or crippled by accurate gunfire.

July 19

MILITARY: The second contingent of army troops arrives by boat at Manila Harbor, Philippines.

July 21

MILITARY: At Guantánamo, Cuba, Major General Nelson A. Miles embarks his 3,400 volunteers onboard a dozen transports and sets sail for Puerto Rico. His force consists of the 6th Massachusetts and 6th Illinois Volunteer Infantries, stiffened by five regular army batteries.

Lieutenant Colonel Theodore Roosevelt (center, with suspenders) and the Rough Riders (*Library of Congress*)

NAVAL: Transports sail from Guantánamo, Cuba, with 3,400 volunteers and make for the island of Puerto Rico, escorted by the battleship *Massachusetts* and cruisers *Columbia*, *Dixie*, *Gloucester*, and *Yale*.

- American gunboats *Annapolis* and *Hunter* approach Nipe Bay, on the northeastern coast of Cuba, and sink the dispatch vessel *Jorge Juan*; this is one of the last hostile encounters of the war.

July 23

NAVAL: Of the mouth of the Manimai River, Bahia Honda, Cuba, the vessel *Wanderer* comes under Spanish artillery fire and is disabled. The vessel eventually reaches safety through the intercession of Lieutenant John Heard, 3rd Cavalry, who remains on deck and shouts instructions to the engine crew.

July 25

MILITARY: American forces capture Guanica, Puerto Rico, meeting little resistance; Major General Nelson A. Miles is present and this is the last time that a senior military commander accompanies his troops in the field.

- General Wesley Merritt arrives at Cavite, Philippines, with 10,700 reinforcements of VIII Corps for the conquest of Manila. The Americans are to be assisted by Filipino guerrilla leader Emilio Aguinaldo, who apparently has designs of his own.

July 27

MILITARY: At Guanica, Puerto Rico, Major General Nelson A. Miles is joined by an additional 3,300 volunteers under Major General James H. Wilson, and he makes preparations to advance on the settlement of Ponce. The men are ordered to remain on their vessels and proceed directly to their objective by ship.

July 28

MILITARY: American forces under General G. Garretson easily occupy the city of Yauchó, Puerto Rico, with minimal Spanish resistance. The general then pronounces the inhabitants as free from Spanish rule, which ensures a friendly reception.

NAVAL: The Puerto Rican city of Ponce surrenders to the auxiliary cruiser *Dixie* without a shot.

July 29

MILITARY: In the Philippines, men of General Wesley Merritt's VIII Corps move through guerrilla lines and take up siege positions around the city of Manila.

July 31

MILITARY: American forces on Puerto Rico are reinforced by the arrival of 2,900 regular soldiers of the 11th and 19th Infantries with cavalry and artillery under Brigadier General Theodore Schwan.

- General Francis V. Greene and his men repulse a Spanish attack at Malate, outside Manila, losing 10 dead and 33 wounded.

August 1

MEDICAL: The War Department is advised that of 17,000 soldiers committed to Cuba, no less than 4,200 have contracted illness, principally yellow fever. The unhealthy soldiers are then ordered into quarantine at Montauk Point, Long Island, to keep them from public view. By war's end, 90 percent of American casualties are the result of disease and poor sanitation, not combat.

MILITARY: American troops under General Nelson A. Miles move inland on Puerto Rico, capturing the settlements of Arroyo and Guayama with little struggle.

NAVAL: The conquest of Guayama is assisted by supporting fire from the cruisers *Cincinnati* and *St. Louis*.

August 3

MILITARY: Major General Nelson A. Miles is reinforced by 3,700 volunteers under Major General Peter C. Hains at Arroyo, Puerto Rico. With 17,000 men in hand, Miles begins directing a four-pronged advance against the 8,000-man Spanish garrison still holed up on the island.

August 4

MILITARY: Colonel Theodore Roosevelt composes a letter to General William R. Shafter stating that the U.S. Army is completely riddled with malaria and stands a real chance of ceasing to be an effective force. He demands that the soldiers be relocated to a healthier climate as soon as possible.

August 6

NAVAL: A naval landing party from the *Amphitrite* captures a lighthouse outside of San Juan, Puerto Rico, assisted by gunfire from the cruiser *Cincinnati*.

August 7

MILITARY: Major General Wesley Merritt, commanding VIII Corps, issues an ultimatum to General Fermín Jáudenes y Alvarez to surrender the city of Manila, Philippines, or face attack. Jáudenes agrees, but demands a minimum battle of some kind to assuage Spain's honor. He also insists that the rebels not be allowed to enter the city as a face-saving expedient.

August 8

MILITARY: In light of rampaging malaria and yellow fever outbreaks, Colonel Theodore Roosevelt and his "Rough Riders" board ship at Santiago Harbor and sail for Montauk Point, New York, for quarantine.

- In a series of mopping up operations, American forces under General Theodore Schwan probe the outlying defenses of San Juan, Puerto Rico, before military activity on the island ceases. Spanish resistance quickly crumbles.

August 9

MILITARY: General James H. Wilson defeats Spanish forces in a smart action at Coamo, Puerto Rico, then moves on to capture several towns. The Americans lose six wounded to a Spanish tally of 40 killed and wounded and 170 captured.

- Admiral George Dewey and General Wesley Merritt formally demand the surrender of Manila's Spanish garrison. They refuse and fighting commences.

August 12

DIPLOMACY: In Washington, D.C., diplomats from the United States and Spain conclude an armistice, thereby ending the Spanish-American War. Spain also agrees to free Cuba while ceding Guam and Puerto Rico to the United States.

NAVAL: An American task force appears off Manzanillo, Cuba, and silences several Spanish batteries while Cuban guerrillas harass the garrison. This is the last fighting on the island before word of peace arrives short afterward.

August 13

MILITARY: The Spanish garrison of Manila resists combined forces under Commodore George Dewey and Major General Wesley Merritt, unaware that the war has ended. They capitulate the following day, surrendering 13,000 prisoners and 22,000 stands of arms. American losses are five killed and 38 wounded. However, the victors are hard-pressed to maintain order among Filipino nationalists, who demand immediate access to the city, yet are kept out. In sum, the Spanish-American War cost \$250 million, 5,462 American lives (overwhelmingly through disease) with an additional 1,604 wounded. The United States acquires an overseas empire and settles into its new role as a global power. This war ends a century of Filipino resistance to Spanish rule.

NAVAL: In Manila Bay, Philippines, the cruiser *Olympia* and gunboat *Petrel* bombard Spanish-held Fort San Antonio into submission; the transport *Zafiro* subsequently disembarks 600 troops, which seize the post.

August 14

NAVAL: The armed lighthouse ship *Mangrove* under Lieutenant Command D. D. Stuart engages two Spanish gunboats off Caibarien, Cuba, but learns of the armistice after a white flag is raised. These are the concluding shots of the Spanish-American War.

August 26

MILITARY: Major General Wesley Merritt is ordered out of the Philippines to Paris, France, to partake of peace negotiations. He is succeeded by General Elwell S. Otis, an unpopular leader, and many officers request other assignments.

August 31

MILITARY: Volunteer troop strength crests at 216,029 officers and men, which, when combined with the army regulars, amounts to a total military establishment of 275,000—the largest since 1865.

October 5

INDIAN: The army wages its final pitched battle with Native Americans near Leech Lake, Minnesota, when a band of Chippewas opens fire on a detachment of the 3rd Infantry under Brevet Major Melville C. Wilkinson, who has been sent there to maintain order. A two-day siege ensues until reinforcements arrive; American losses are six dead, including Wilkinson, and 14 wounded. Private Oscar Burkhard becomes the last soldier of the Indian Wars to receive a Medal of Honor for bravery under fire.

October 7

MILITARY: The Civil War–era, two-tone blue woollen army uniform is replaced by a khaki-colored field uniform. The lethal potential of modern weaponry mandates better camouflage for infantry units.

October 26

MARINES: The naval station at San Juan, Puerto Rico, establishes its own marine barracks.

November 4

MARINES: A detachment drawn from the cruisers *Baltimore*, *Raleigh*, and *Boston* are landed and marched overland to Peking, China, to guard the American legation. The region is convulsed by antiforeign hostility.

November 14

NAVAL: The cruiser *Potomac*, en route to Nassau from Cat Island in the Caribbean, experiences dangerous problems in its boiler room that could sink the vessel. Prompt action by Lieutenant Thomas Cavanaugh resolves the crisis and he wins a Medal of Honor.

November 16

MILITARY: The Transport Corps is established by the secretary of war and placed under the aegis of the quartermaster general of the army. San Francisco, California, and New York City are designated official home ports.

November 23

NAVAL: A study issued by a paymaster, W. B. Wilcox, and a cadet, Leonard R. Sargent, who have visited the interior of Luzon, accurately predicts that the inhabitants will resist any attempt by the United States to impose a new colonial regime. Their findings are reported to Admiral George Dewey but they fail to alter the course of American policy.

December 10

DIPLOMACY: The United States and Spain conclude the Treaty of Paris, whereby the Philippines are ceded to the United States for a sum of \$20 million, along with Puerto Rico, Guam, and—by annexation—Hawaii. Cuba is declared independent and the Spanish pledge to pay \$400 million for all Cuban debts. The treaty concludes nearly four centuries of Spanish rule in the Western Hemisphere and what newspapers have touted as “a splendid little war.” America acquires an overseas empire at relatively little cost.

December 23

NAVAL: Responsibility for administering newly acquired Guam is delegated to the Navy Department.

December 26

MILITARY: Army troops under Brigadier General Marcus P. Miller arrive off the island of Mindoro, Philippines, but they prove unable to negotiate a peaceful landing with heavily armed locals. The men eventually sail back to Manila.

1899

MILITARY: The new, enlarged military establishment contracts to 155,772 officers and men, and finds itself deployed in two different theaters at opposite ends of the globe.

January 5

DIPLOMACY: Filipino guerrilla Emilio Aguinaldo, disturbed by the lack of independence in the recent peace treaty, summons a revolutionary assembly at Malolos to discuss what to do next. He is prepared to fight the newly victorious Americans, if necessary.

January 9

DIPLOMACY: The Senate ratifies the Treaty of Paris, ending the Spanish American War.

MILITARY: General Elwell S. Otis meets with guerrilla leader Emilio Aguinaldo in an attempt to circumvent an outbreak of hostilities, but he lacks the authority to grant Filipinos the right to vote or any similar attribute of independence.

January 17

SETTLEMENT: The gunboat *Bennington* under Commander Edward D. Taussig claims Wake Island for the United States.

February 4

MILITARY: Filipino guerrillas under Emilio Aguinaldo, angered that the Philippines have not been granted immediate independence, attack American outposts along the San Juan River at Manila. A protracted and frequently bloody struggle now ensues as the United States is embroiled in its first Asian land war.

February 5

MILITARY: Brigadier General Arthur MacArthur’s brigade sweeps north of Manila, driving Filipino guerrillas before him and capturing a fortified ridge overlooking the city. American losses are 44 dead and 194 wounded.

NAVAL: The cruiser *Charleston*, the monitor *Monadnock*, and the gunboats *Callao* and *Concord* provide supporting fire for army operations outside Manila.

February 10

MILITARY: Army troops under Brigadier General Arthur MacArthur attack Filipino guerrilla forces at Caloocan, Philippines, supported by naval gunfire. The town falls quickly, along with a railroad station and several hundred cars, and the American perimeter is extended up to six miles from the center of town.

February 11

NAVAL: The gunboat *Petrel* bombards a rebel fort at Iloilo City, Philippines, after which a landing party is sent ashore to capture the position.

February 14

MARINES: A detachment from the cruiser *Philadelphia* goes ashore at Apia, Samoa, during a dispute between two political factions.

February 22

NAVAL: The gunboat *Petrel* dispatches a landing party, which seizes the island of Cebu, Philippines.

February 24

MARINES: Marines and sailors from the gunboat *Marietta* deploy at Bluefields, Nicaragua, to protect American lives and property.

March 2

MILITARY: An additional 35,000 two-year volunteers are authorized by Congress to help suppress an ongoing insurgency in the Philippines led by former ally Emilio Aguinaldo. However, in a major change, their officers are tended federal, not state commissions—a complete break from the traditional state militia practice. The army is also enlarged by 3,000 men to fill out existing regiments.

NAVAL: Congress authorizes creation of the rank of admiral of the navy for Admiral George Dewey; he is the only officer in American naval history so honored. This is also the first military rank to waive the mandatory retirement age.

March 3

NAVAL: To better project American power abroad and show the flag, Congress authorizes construction of three new battleships, three armed cruisers, and six protected cruisers.

- The Naval Personnel Act of 1899 merges line and engineering officers equally to end intractable hostilities among the navy's officer corps. It also requires the curricula at the U.S. Naval Academy to include more courses on engineering.

MARINES: Congress authorizes an increase in Marine Corps strength to 211 officers and 6,000 enlisted personnel.

March 25–31

MILITARY: Kansas and Nebraska volunteers under Colonel Frederick Funston overcome desperate Filipino resistance and capture their first capital at Malolos, suffering 500 casualties in the process. However, insurgent leader Emilio Aguinaldo escapes and his followers withdraw rapidly upon Tarlac to renew the contest.

- At the Tukiahan River, Philippines, a four-man team led by Surgeon George F. Sheils rescues two native Filipinos from rebel captivity.

April 1

MARINES: A combined American/British naval force is landed on the island of Upolu, Samoa, to protect Americans living there from tribal warfare, but it is attacked and suffers seven dead (including Lieutenant Philip Van Horn Lansdale) and seven wounded. Three marines are awarded the Medal of Honor for heroism under fire.

- Sergeant Bruno A. Forsterer displays great courage during a fire fight with rebels on Samar, Philippines, winning a Medal of Honor.

April 12

MILITARY: Rebel forces attack an American outpost at Paete, Luzon, Philippines, but they are repulsed single-handedly by the actions of Private Thomas Sletteland.

April 15

MILITARY: At Catubig, Samar, Philippines, rebels attack an American outpost in overwhelming strength but they are finally beaten back by the actions of Corporal Anthony J. Carson, 3rd Infantry, and a handful of survivors. Reinforcements arrive two days later and rescue them.

April 21

MILITARY: The army adopts a forked-lightning insignia for all military electricians.

April 21–October 31

EXPLORING: In Alaska, Lieutenant L. R. Abercrombie undertakes a new exploration of the Valley of the Yukon to expand upon the previous surveys of 1863 and 1869.

April 27

MILITARY: Colonel Frederick Funston leads his 20th Kansas Volunteer Infantry into action against a superior force of Filipino guerrillas at the Rio Grande del Pampanga River, routing the defenders. Consequently, Funston and two of his men win the Medal of Honor.

MARINES: The new naval base at Guantánamo, Cuba, receives a detachment of 80 marines to guard it.

April 28

MILITARY: Major General Elwell S. Otis rejects Filipino rebel peace terms and insists on unconditional surrender.

May 13

MILITARY: At San Miguel de Mayumo, Luzon, Philippines, a body of 300 rebels is attacked and dispersed by a 13-man contingent under Captain William E. Birkhimer, 3rd Artillery. Both Birkhimer and Corporal Frank L. Anders, 1st North Dakota Volunteer Infantry, win Medals of Honor.

May 16

MILITARY: Near San Isidro, Luzon, Philippines, a force of 22 American scouts charge across a burning bridge and drive away a larger force of rebels.

May 23

MARINES: Admiral George Dewey organizes a marine battalion of 15 officers and 260 enlisted men to protect the naval installation at Cavite, Luzon, from resentful Filipino rebels.

June 10–13

NAVAL: Filipino insurgent positions at Cavite, Philippines, are bombarded by navy monitors and gunboats, in concert with army sweeps intending to uproot them from the Zapote River.

June 13

MILITARY: At the Zapote River, Luzon, Philippines, a 10-man detachment under Captain H. Sage, 23rd Infantry, holds its ground and repeatedly repulses a much larger guerrilla force.

June 30

TECHNOLOGY: The army acquires several electrically driven trucks as potential transport vehicles but abandons the effort two years later when their batteries prove incapable of holding their charge for sufficient periods of time. Gasoline-powered vehicles, still in their infancy, are now the key to the future.

July

MILITARY: In the Philippines, the VIII Corps of General Elwell S. Otis loses 8,000 volunteers when their enlistments expire and they are shipped home; the Americans are thus forced to wage a guerrilla war with only 20,000 men until reinforcements can arrive in the fall.

July 19

MILITARY: The poor performance of the army and volunteer troops in recent hostilities, which showed them to be ill-prepared and ill-equipped, results in the resignation of Russell A. Alger as secretary of war. For every soldier killed in action, no less than 13 have died of illness.

- Captain Bernard A. Byrne leads two companies of the 6th Infantry against bolo-wielding tribesmen occupying the village of Bobong, Negros Island, Philippines. The defenders are driven off after heavy fighting.

July 26

MILITARY: As American troops engage guerrillas along the San Juan River near Calamba, Luzon, Philippines, Captain Hugh J. McGrath and Lieutenant Matthew A. Batson swim the river and flank the enemy. The rebels are driven back in confusion.

July 29

NAVAL: At Catbalogan, Samar, Philippines, guerrillas tangle with naval infantry. Gunner's mate Andrew V. Stoltenberg fights with distinction, winning a Medal of Honor.

August 1

MILITARY: In Washington, D.C., Elihu Root is appointed the new secretary of war by President William McKinley. Root is a determined reformer and is inspired partly by the writings of the late general Emory Upton.

August 7

MARINES: At Agana, Guam, a force of marines lands to garrison the new navy base there.

September–October

MILITARY: American forces in the Philippines take advantage of the dry season and push several columns forward into the central plains of Luzon to clear out any remaining pockets of guerrillas.

September 3

MILITARY: A scouting party from the 36th infantry is ambushed by a larger guerrilla force in the vicinity of Porac, Luzon, Philippines. The Americans manage to drive off their antagonists. Corporal James R. Gillenwater and Private Cornelius J. Leahy win Medals of Honor.

September 9

MILITARY: A minor skirmish unfolds at Porac, Luzon, Philippines, as a detachment of the 36th Infantry under Colonel Franklin J. Bell attacks a small force of guerrillas. Three of the enemy are taken in a quick action at close quarters and both Colonel Bell and Lieutenant Colonel William R. Grove win Medals of Honor.

September 18–23

NAVAL: The cruisers *Charleston* and *Baltimore* join navy gunboats and monitors in a bombardment of Filipino insurgents at Olongapo, Luzon, at the head of Subic Bay. The transport *Zafiro* then lands troops, which storm ashore and take their positions.

September 21

MARINES: In light of continuing Filipino unrest, a second battalion of 16 officers and 362 enlisted men under Lieutenant Colonel George F. Elliott lands at Cavite, Luzon, to guard naval facilities.

September 25

NAVAL: Filipino guerrillas ambush the armed boat *Urdaneta* under naval cadet Welborn C. Wood along the Pampanga River, Luzon. Wood and four crewmen die, four are captured, and his naval vessels becomes the only one lost in the Philippine insurrection.

September 28

MILITARY: A sweep by the 33rd Infantry against enemy positions at Porac, Luzon, Philippines, drives guerrillas from their positions with several prisoners taken.

October 4

MILITARY: Ongoing difficulties in the Philippines result in the dispatch of additional ships and troops at the behest of Admiral George Dewey. A total of 30,963 men are ultimately garrisoned there.

October 8

MARINES: A detachment under Lieutenant Colonel George F. Elliott goes ashore at Noveleta, Philippines, assisted by gunfire from the gunboats *Callao* and *Petrel*; they capture that position after suffering 11 men killed and wounded.

October 17

MILITARY: Patrols of the 36th Infantry again return to Porac, Luzon, Philippines, where Captain Harry Bell dislodges a strong force of guerrillas, scattering them.

October 19

MILITARY: The bridge at San Isidro, Luzon, Philippines, is held by a small detachment of men from the 22nd Infantry when it is attacked by superior numbers of guerrillas. The soldiers nonetheless hold out until the main body arrives to rescue them. Sergeant Charles W. Ray and Private Charles H. Pierce receive Medals of Honor for heroism under fire.

October 29

MILITARY: Filipino guerrillas attack a military hospital at Labo, Luzon, Philippines. Surgeon George G. Matthews grabs a rifle and bravely assists the defenders to repel their antagonists.

November 2

NAVAL: The cruiser *Charleston* under Captain C. W. Pigman hits a reef near Camiguin Island, Philippines, and is shipwrecked without the loss of life.

November 5

MILITARY: In the vicinity of Malalong, Philippines, a force of 15 rebels attacks Sergeant Amos Weaver, 36th Infantry, who single-handedly fights them off, killing four and driving the rest away.

- A detachment from the 3rd Artillery attacks rebel positions at Calulut, Luzon, Philippines, carrying it in a single charge. Sergeant Clarence M. Condon receives a Medal of Honor for heroism under fire.

November 7

MILITARY: Once landed at the Lingayen Gulf, General Wheaton begins advancing upon the insurgent capital at Dagupan.

NAVAL: Commander Henry Knox directs six vessels as they land 2,500 army troops on the Lingayen Gulf Coast, Luzon.

November 9

MILITARY: At Bamban, Luzon, Philippines, a company of the 36th Infantry engages rebel forces and drives them off in furious battle. Private Sterling A. Galt wins a Medal of Honor for heroism in combat.

November 11

MILITARY: When the 33rd Volunteer Regiment is ambushed by Filipino guerrillas at San Jacinto, Major Peyton C. March turns the tables on the guerrillas, defeating them. American losses are 21 dead and wounded.

November 13

MILITARY: American troops of General Arthur MacArthur's division storm into Tarlac, the last capital of Filipino guerrillas. Among those participating is Brigadier General Joseph Wheeler, a dashing Confederate leader of the Civil War years. The insurgents subsequently melt away into the jungle to conduct small-scale raids and ambushes.

Soldiers prepare for an attack in the Philippine Islands. (*Library of Congress*)

November 24

MILITARY: A sweep by American forces through the Luzon region under General E. Stephen Otis nets the renegade president of the Philippine Congress, their secretary of state, and treasurer. The main island of the Philippines is now in American hands but the occupiers are dogged by fanatical Muslim guerrillas farther south.

November 26

NAVAL: The battleship *Oregon* and the cruiser *Baltimore* dispatch landing parties ashore who seize and occupy Vigan, north of the Lingayen Gulf, Luzon; they are relieved by army troops two days later.

December 4

MILITARY: At Vigan, Luzon, Philippines, a patrol of the 33rd Infantry is surrounded by superior numbers of guerrillas and besieged. At length, Lieutenant Colonel Webb Hayes arrives with reinforcements from his 31st Infantry and

relieves them. At one point, Private Joseph L. Epps steals upon a group of rebels behind a wall, surprises them, and single-handedly captures the entire band.

December 9

MILITARY: Lieutenant Colonel Robert L. Howze directs his 34th Volunteer Infantry in a sizable victory over Filipino insurgents on the island of Luzon. The three-hour engagement destroys a brigade-sized unit of guerrillas.

December 10

NAVAL: Landing parties dispatched from the battleship *Oregon* and the cruiser *Baltimore* seize the former Spanish navy yard at Olongapo on Subic Bay, Philippines.

December 15

MARINES: A third marine battalion of 340 men under Major Littleton W. T. Waller arrives at Cavite, Luzon, to bolster the garrison there.

December 18

MILITARY: Major General Henry W. Lawton, a very tall individual made even more conspicuous by his white raincoat and pith helmet, is shot by a sniper and killed on the firing line near San Mateo, Philippines. He is the highest-ranking fatality of the insurgency.

December 19

MILITARY: A fierce skirmish breaks out between men of the 7th Infantry and guerrillas operating in the vicinity of San Mateo, Philippines. At one point, Sergeant Edward H. Gibson ignores heavy enemy fire, swims across the river to his front, and captures a canoe. The canoe is used by the Americans to cross downstream and outflank their adversaries.

December 21

MILITARY: Heavy fighting ensues between rebels and American forces at Alos, Zambales, Luzon, during which surgeon Paul Straab so distinguishes himself assisting wounded soldiers that he receives a Medal of Honor.

1900

MILITARY: Army manpower in the Philippines rises to 64,000 men, and operations are expanded to include Samar, Leyte, and Jolo.

January

NAVAL: In the Philippines, navy gunboats support army troops attacking and seizing the Batan Islands from Filipino insurgents.

January 1

MARINES: The various marine detachments in the Philippines are grouped together into a force of two battalions of four companies each and redesignated the 1st Regiment of Marines.

January 4

MILITARY: In the Philippines, army troops begin a concerted campaign to root out insurgents in Cavite, which lasts for an entire month and is attended with considerable success.

January 6

MARINES: An insurgent signal station is uncovered by marines near Olongapo, Luzon, and burned.

January 7

MILITARY: The 38th Volunteer Infantry handily defeats a larger body of Filipino irregulars at Patol Bridge, Cavite, killing over 100 insurgents in a two-hour battle. American losses are eight wounded.

- Meanwhile, the 2nd and 3rd battalions of the 28th Volunteer Infantry engage enemy forces at Barrio Lumim, Luzon, driving them off in a three-hour engagement.

January 11

NAVAL: The gunboat *Princeton* under Commander Harry Knox lands parties that seize the Batan Islands, northern Philippines.

January 17

NAVAL: The cruiser *Bennington*, under Commander E. D. Taussig, claims Wake Island for the United States, which is viewed as an important cable station between Hawaii and the Philippines.

February

NAVAL: Navy gunboats enjoy an active month supporting army operations by participating in the captures of Biniktigan village, Perez, and Pasacao from Filipino insurgents.

February 4

MILITARY: Near Mount Amia, Cebu, Philippines, a detachment of the 19th Infantry is attacked and nearly overpowered by a superior force of guerrillas. Despite fierce combat, Private Louis Gedeon manages to rescue his fatally wounded captain, winning a Medal of Honor.

February 10

NAVAL: Commodore Seaton Schroeder gains appointment as the first naval governor of American Samoa, whose administration falls under the Navy Department authority.

February 16

MARINES: A body of marines searching for water near Olongapo is ambushed by insurgents and rescued by a column dispatched for their relief. In the course of heated combat, Sergeant H. Harvey receives a Medal of Honor for bravery under fire.

February 20

NAVAL: The new battleship *Kearsarge* is commissioned; it is the only such vessel of its class not named after a state.

February 23

MARINES: The village of Benectican is burned by marines in retaliation for an earlier ambush near Olongapo.

February 27

MARINES: A landing detachment rescues prisoners held by insurgents at Perez, Luzon.

March 4

MILITARY: In a swift action, men of the 9th Infantry charge and disperse a guerilla force at Tinuba, Luzon, Philippines. By now the Americans control southern Luzon and the Visayan Islands.

MARINES: A landing detachment from the gunboat *Nashville* lands at Calapacuan, Philippines, and assists army troops in its capture.

March 13

NAVAL: The secretary of the navy, reluctant to copy the army and adopt a general staff that would control naval planning, instead founds a General Board of senior admirals, which functions in an advisory capacity only. Admiral George Dewey is called upon to initially head the board.

March 15

NAVAL: In Annapolis, Maryland, Commander Richard Wainwright is appointed the 17th superintendent of the U.S. Naval Academy.

March 24

MILITARY: The army guides creation of the Puerto Rico battalion at San Juan, Puerto Rico, to assist in security matters.

March 29

MARINES: The General Board of the Navy is constituted to give high-level advice to the secretary of the navy. Colonel George C. Reid, adjutant and inspector of the Marine Corps, is among those appointed to serve.

April

NAVAL: The gunboat *Paragua* seizes the Filipino insurgent vessel *San Jose*, and it supports operations culminating in the capture of the towns of Bailer and Calaguaquin.

April 11

NAVAL: The *Holland* becomes the first submarine commissioned into the U.S. Navy. This vessel is 53 feet long, slightly over 10 feet at the beam, and can operate submerged for two hours.

April 15–19

MILITARY: At Catubig, Samar, Philippines, a detachment of the 43rd Infantry is attacked by superior forces of insurgents and nearly overwhelmed. However, the defenders manage to hold out for two days until reinforcements can arrive.

April 26

MILITARY: A detachment of the 23rd Infantry engages a body of guerrillas in battle at LaPaz, Leyte, Philippines, during which Private George M. Shelton exposes himself to heavy fire to rescue a wounded soldier; he wins a Medal of Honor.

May

NAVAL: Gunboats *Pampanga* and *Paragua* assist in the captures of Masing and Santa Margarita, Leyte, as part of the ongoing reduction of Filipino insurgent bases. Four enemy vessels are also captured or sunk.

May 6

MILITARY: Parts of the 43rd Infantry clash intensively with guerrilla forces at Hillongas, Philippines, and they carry enemy positions in hand-to-hand fighting.

Navy coxswain William Thordesen and Private William P. McClay win Medals of Honor for extreme heroism in combat.

May 15

MILITARY: The unpopular general Elwell S. Otis, derided by the troops as “Granny,” is replaced as governor general of the Philippines by Brigadier General Arthur MacArthur, who now commands 63,000 soldiers and is determined to crush the rebellion.

May 18

MARINES: Minister Edwin Conger of the U.S. consulate at Beijing, China, expresses great concern over mounting antiforeign hostilities from secret revolutionaries known as the Righteous Society of Heavenly Fists (or “Boxers” due to their martial arts) and requests that the legation be bolstered by additional marines from the Asiatic Fleet.

May 24

MARINES: The first contingent of marines under Captain John T. Meyers departs Taku, China, and heads for Tientsin to assist in quelling the so-called Boxer Rebellion.

May 26

MILITARY: In Alaska, the U.S. Army Signal Corps begins constructing a telegraph cable to connect that remote region to Washington, D.C.

- The War Department issues Order No. 155 for establishing an Army War College for regular commissioned officers. This is a graduate-level institution for regularly commissioned officers and General Samuel B. Young serves as its first president.

May 29

MILITARY: At Labo, Luzon, Philippines, a company of the 45th Infantry is pinned down by enemy fire until Private Joseph A. Nolan volunteers to run through enemy lines and summon a relief detachment. He succeeds and the infantry are rescued.

May 31

MARINES: A contingent of 48 marines and sailors from the battleship *Oregon* and cruiser *Newark* form part of an international contingent numbering 337 soldiers marching from Taku, China, to Beijing for the purpose of protecting diplomatic legations from rampaging Chinese rebels, or “Boxers.” By bringing badly needed ammunition to the defenders in a timely fashion, seaman George Rose and coxswain John McCoy win Medals of Honor.

June 5

MILITARY: A small patrol of soldiers of the 28th Volunteer Infantry engages guerrillas at Payapay, Philippines, killing 14 insurgents; the American company commander is slain in action.

June 6

MILITARY: Congress resurrects the title of lieutenant general for the present commanding general of the army, Nelson A. Miles.

June 8

MILITARY: Chinese Boxer rebels up the ante by cutting the telegraph line from Beijing (Peking), China, to Tientsin, thereby isolating the diplomatic legations.

**MacArthur, Arthur (1845–1912)***Army general*

Arthur MacArthur was born in Chicopee, Massachusetts, on June 2, 1845, and raised in Milwaukee, Wisconsin. He failed to gain an appointment to the U.S. Military Academy when the Civil War commenced in 1861, so he joined the 24th Wisconsin Infantry as a second lieutenant. Despite his youth, being only 16 at the time, MacArthur went on to compile a brilliant war record. He fought heroically at the bloody 1862 battles of Perryville and Murfreesboro, winning promotion to captain. But his greatest feat was during the Union victory at Missionary Ridge on November 25, 1863, when the 24th Wisconsin stalled in the face of enfilade fire and he seized the regimental flag, charged up the hill, and planted it on the enemy's ramparts. For this act MacArthur was awarded a Medal of Honor in 1890. He fought well throughout the campaign of 1864, winning promotion to lieutenant colonel and taking command of his regiment at the age of 19. For this reason, MacArthur was hailed throughout the Union army as the "Boy Colonel," for having led his men forward in nine pitched battles, sustaining two serious wounds, and winning four promotions. He was the youngest regimental grade commander on either side to direct actual combat operations. MacArthur mustered out after the war to study law, but he rejoined the army as a lieutenant in 1866 and remained a captain for nearly two decades. He served throughout the Southwest and in 1885 received a campaign medal for operations against the renegade Apache Geronimo. He subsequently transferred to the new

Cavalry and Infantry School at Fort Leavenworth, Kansas, before being billeted with the Adjutant General's Office in Washington, D.C. MacArthur's biggest contribution here was instituting mandatory examinations for promotion of any officer below the rank of colonel.

During the Spanish-American War of 1898, MacArthur gained promotion to brigadier general and sailed to the Philippines to command volunteer forces. After helping to secure the capture of Manila, he employed a deft combination of swift military action and humane civic programs to help suppress the rebellion of guerrilla leader Emilio Aguinaldo. In 1900 he rose to brigadier in the regular army, advanced into central Luzon, and captured a succession of rebel outposts. With the rebellion crushed, MacArthur later served as governor of the islands and he instituted many democratic reforms. He was subsequently promoted to major general, but he also quarreled with President William Howard Taft and was replaced by General Adna R. Chaffee. In 1904–05 MacArthur was detailed as an observer of the Russo-Japanese War and he advanced to lieutenant general commanding the Division of the Pacific in September 1906. He was the army's senior officer at the time but stormy relations with President Theodore Roosevelt precluded his appointment as army chief of staff. MacArthur concluded 47 years of service by resigning in June 1909, and he died in Milwaukee on September 5, 1912. General Douglas MacArthur was his son.

June 10

MILITARY: British vice admiral Sir Edward Seymour leads an international force of 2,219 soldiers (including 111 Americans) from Tientsin to Beijing for the purpose of reinforcing the diplomatic legations besieged there. The American contingent consists of 48 marines and six sailors under Captain Bowman H. McCalla of the cruiser *Newark*. Skirmishing en route costs four American dead and 28 wounded among the 290 casualties sustained.

June 13

MILITARY: Chinese Boxers attack a train carrying an international force of 2,129 men under Vice Admiral Sir Edward Seymour, including American sailors and marines, bringing it to a standstill outside Tientsin. The enemy are nonetheless beaten back before they can seize the valuable ammunition.

June 15

MILITARY: The international diplomatic legation in Beijing, China, is besieged by several thousand Chinese rebels. They are defended by a force of 2,400 Russian troops.

June 16

NAVAL: The gunboat *Villalobos* captures its 22nd Filipino insurgent craft in two months of operations in Philippine waters.

June 17

MILITARY: Heavy attacks by Chinese Boxers force an international relief force under Admiral Sir Edward Seymour to withdraw from the relief of Beijing.

NAVAL: At the Chinese port of Taku, the gunboat *Monocacy* is shelled by Chinese army forts but is ordered not to return fire along with allied vessels for fear of precipitating a war with the government.

June 18

MARINES: The gunboat *Nashville* makes a high-speed transit from the Philippines with 140 marines, which it lands today at the port of Taku. Once ashore, the contingent marches hastily to Tientsin.

June 19–20

MILITARY: In China, an international force is cobbled together for the relief of diplomats trapped in Beijing. Outside the city, angry Boxers kill a German minister, creating an exodus of foreigners toward the “Forbidden City.”

- General Adna R. Chaffee takes charge of an American contingent in the Philippines, consisting of the 9th and 14th Infantries, two troops of the 6th Cavalry, and a battery from the 5th Artillery, and prepares to sail to China.

MARINES: A detachment of 140 marines under Major Littleton W. T. Waller assist 440 Russian troops in an attack on Chinese positions outside Tientsin, only to be repulsed.

June 21

MILITARY: In China, nationalist, xenophobic factions exacerbate the so-called Boxer Rebellion, trapping diplomatic delegations at Beijing and drawing a multinational expeditionary force to their rescue. The ailing Manchu dynasty under

the Dowager Empress T'zu Hsi, also wishing to rid itself of foreigners, belatedly throws imperial forces behind the rebels; scores of Christian missionaries, along with thousands of converts, are massacred. However, they are unable to overwhelm the diplomatic legations in Beijing, which are defended by 409 legation guards and 125 civilian volunteers.

June 21

- Brigadier General Arthur MacArthur, determined to undermine guerrilla resistance, offers an amnesty to Filipino insurgents.

MARINES: A company of marines under Major Littleton W. T. Waller, assisted by 450 Russians, attempts to seize Tientsin, but they are repulsed once Chinese government forces join the Boxer rebels.

June 22

MILITARY: The international relief force under Vice Admiral Sir Edward Seymour captures the Hsi-ku Arsenal, six miles from Tientsin, China. They then halt to await reinforcements and evacuate 250 casualties. The more numerous Boxers, however, envelop the city and surround them.

June 25

MILITARY: The international column of Vice Admiral Sir Edward Seymour is relieved outside of Tientsin, China, which then returns to the city.

June 27

MARINES: At Beijing, China, a detachment of marines under Captain John T. Meyers repulses a heavy Chinese attack against the Tartar Wall.

July

NAVAL: Navy gunboats support army operations in and around Samar and Mindanao, Philippines, sinking or capturing 12 more insurgent craft.

July 8

MILITARY: The 9th Infantry under Colonel Emerson H. Liscum arrives at Taku, China, from the Philippines, then marches 40 miles to join allied forces concentrating at Tientsin.

MARINES: At Nantucket, Massachusetts, a specially trained marine unit disembarks from the battleships *Kearsarge*, *Alabama*, and *Massachusetts*, in a first test of advance base operations.

July 10

MARINES: The international garrison at Tientsin, China, is reinforced by the arrival of the 1st Marine Regiment, 318 strong, under Colonel Robert W. Meade.

July 13–14

MILITARY: American troops from the 1st Marines and 9th Infantry, totaling 1,021 men under Colonel Emerson H. Liscum, assist allied forces in storming the walled Chinese city of Tientsin. Liscum's losses are 18 dead and 22 wounded, while two officers and one private soldier win the Medal of Honor. The overall effort is directed by British brigadier general A. R. F. Dorward. It is the first occasion that Americans have cooperated with a foreign military power since 1779.

MARINES: Sergeants Alexander J. Foley and John M. Adams, Corporal Harry Adriance, and Private James Cooney all receive Medals of Honor for fighting outside Tientsin, China.

July 15

MARINES: At Beijing, China, Marine Corps legend is established after Private Dan Daily single-handedly defends his barricade against an overwhelming Chinese force.

July 16

MILITARY: A detachment of the 28th Volunteer Infantry attacks and drives 400 Filipino insurgents from their stronghold at Barrio de Talaug, Luzon, Philippines.

July 17

MILITARY: Soldiers of the 28th Volunteers, backed by the gunboat *Villalobos*, rout a larger detachment of insurgents at Taal, Batangas, the Philippines.

July 20

MARINES: Four marines under Corporal Edwin N. Appleton cross the Tientsin River under enemy fire, then alight and burn several buildings of use to the Boxers. The men escape safely back to allied lines.

July 21–August 14

MILITARY: American troops are closely engaged by Boxers as they advance from Tienstin to Beijing, China. Despite heavy fighting, the force pushes onward.

July 26–29

MILITARY: The balance of General Adna R. Chaffee's American Expeditionary Force arrives at Taku, China, consisting of elements from the 14th Infantry, the 6th Cavalry, and the 5th Artillery. Once ashore, they immediately set out overland to join allied forces inland at Tientsin.

August 2

MILITARY: The diplomatic legations besieged in Beijing are heartened by the arrival of a letter from Lieutenant Colonel J. S. Mallory, who declares that a column of 18,000 soldiers is marching to their relief.

NAVAL: The gunboat *Pampanga* enjoys an active month hunting down Filipino insurgent craft, destroying no less than nine *bancas* (coastal craft) this month alone.

August 5–6

MILITARY: Allied forces under Brigadier General Sir Alfred Gaselee storm across Chinese defenses along the Pei-Ho River and in the city of Yangtsun; the victory costs the Americans seven dead and 65 wounded.

MARINES: The 1st Regiment distinguishes itself in action at Yangtsun, China, by assisting an army battery to repel a massed attack by Chinese cavalry.

August 13–14

MILITARY: A force of 2,500 Americans under Major General Adna R. Chaffee batters its way past Chinese rebels, storms the gates of Beijing, and secures all foreign dignitaries sequestered in the city for the past three months. He does so in conjunction with 12,000 German, British, Austrian, Russian, and

Japanese soldiers. In action, musician Calvin Titus, 14th Infantry, clambers up the city's high walls, and plants the American flag under fire, winning a Medal of Honor.

August 15

MILITARY: A two-gun battery under Lieutenant Charles P. Summerall, 5th Artillery, blasts open the gates to Beijing's inner Forbidden City, and troops rush in to disperse all remaining Boxers. Battery commander Captain Henry J. Reilly dies in battle.

August 23

MILITARY: Near Sariaya, Luzon, Philippines, a small detachment of the 30th Infantry is attacked and nearly overwhelmed by superior numbers of insurgents, but they are repelled after a stiff engagement.

August 28

MILITARY: Men of the American Expeditionary Force under General Adna R. Chaffee participate in the allied victory held in Beijing's Forbidden City.

September

MEDICAL: Army doctor Colonel Walter Reed begins researching the cause of yellow fever, which has killed thousands of soldiers in the Spanish-American War, and concludes that the disease is spread by mosquitos. His work at controlling the pest completely eradicates the disease from Cuba within a year.

September 8

NAVAL: The gunboat *Panay* sweeps the Philippine coast of insurgent craft, sinking four small vessels.

September 14

MILITARY: Near Carig, Philippines, a 23-man detachment commanded by Sergeant Henry Schroeder, 16th Infantry, surprises and routs a much larger force of guerrillas, killing 36 and wounding 90.

September 17

MILITARY: Troops of the 15th Infantry and 37th Volunteers storm a fortified insurgent village on Luzon, although taking considerable casualties.

October

MILITARY: In the Philippines, General Elwell S. Otis leads 12,600 American soldiers in a concerted sweep north of Manila. His mission is to root out guerrillas under Emilio Aguinaldo, then fighting to obtain complete independence from the United States. An intense bush fight erupts with hundreds of soldier casualties and thousands of Filipinos killed or wounded.

NAVAL: The gunboats *Panay* and *Callao* support several army operations resulting in the capture of Carles, Balsem, Estabcia, and Malabung, Philippines, along with two insurgent vessels.

MARINES: At Cavite, Luzon, the 1st Marine Brigade is created after the 1st and 2nd Regiments are drawn together.

October 3

MILITARY: The American Expeditionary Force under General Adna R. Chaffee is withdrawn from China and sails back to the Philippines, although 2,100 soldiers remain behind to guard railroads.

Chaffee, Adna R. (1842–1914)

Army general

Adna Romanza Chaffee was born in Ashtabula, Ohio, on April 14, 1842. After the Civil War commenced in 1861, he left home in order to join an Ohio volunteer regiment but en route encountered a recruiting party from the 6th U.S. Cavalry and signed on as a private. He rode with the regiment for the next 27 years. Chaffee proved himself a capable soldier and served with distinction at such bloody battles as the Peninsula, Antietam, Brandy Station, and Gettysburg. He fought so well that Secretary of War Edwin M. Stanton had him commissioned a second lieutenant and he ended the war a captain after participating in 54 major battles and skirmishes. Chaffee continued in the peacetime establishment, and he fought under Generals George Crook and Nelson Miles in campaigns against Comanche and Apache in the Old Southwest. He helped orchestrate the army victory at Painted Creek, Texas, in March 1868, and he won a brevet promotion to major. In 1888 he transferred to the 9th U.S. Cavalry, the famous African-American "Buffalo soldiers," as brevet lieutenant colonel and, in 1897, he took up teaching responsibilities at the Cavalry School at Fort Leavenworth, Kansas. When war with Spain commenced in 1898, Chaffee gained appointment as a brigadier general of volunteers in General Henry Lawton's Second Division, and he fought with distinction at the July 1, 1898, battle of El Caney, Cuba. Faced with dug-in defenders, he adroitly brought up his artillery, then led a charge by the 12th Volunteer Infantry, which clinched the victory. For his efforts, Chaffee received brevet promotion to major general and performed occupation

General Adna R. Chaffee (*Library of Congress*)

duties after the war as chief of staff under General Leonard Wood.

In 1900 Secretary of War Elihu H. Wood directed Chaffee to lead American forces throughout the so-called Boxer Rebellion in China. Landing with his troops from the Philippines, he marched them overland to Beijing, helped storm the city gates on August 14, 1900, and rescued those in the diplomatic legations besieged there. His tactful treatment of the inhabitants and the good behavior of his men were widely

(continued)

praised by the Chinese. He then advanced to major general in 1901, relieved General Arthur MacArthur as commanding general of the Philippines, and conducted closing operations against the militant Moro rebels. Once home, Chaffee pinned on his third star as a lieutenant general and became the first-ever chief of staff in the U.S. Army in 1904. This was a new position, patterned after the German army model, in order to

streamline military administration and better harmonize relations with the president, the commander in chief. In this office, he also ventured to Europe to observe military maneuvers, then concluded his military career by resigning on February 1, 1906. Chaffee subsequently settled in Los Angeles, California, to serve as president of the Board of Water Works, and he died there on November 1, 1914. He remains the only American soldier to have risen to lieutenant general from the rank of private.

October 10

MARINES: The 1st Marine Regiment is withdrawn from Taku and heads back to the Philippines.

October 12

NAVAL: The *Holland* (SS-1) deploys as the navy's first commissioned submarine.

October 21–23

MILITARY: A 20-man patrol from the 28th Volunteers is ambushed by 400 Filipino rebels at Loac, Luzon, Philippines, and successfully defends itself, killing 75 insurgents for a loss of four wounded. Their commander, Captain George W. Biegler, wins the Medal of Honor.

November 5

DIPLOMACY: The Cuban constitutional convention approves a document that fails to declare the special relationship between that country and the United States, so General Leonard Wood, who heads the military government there, rejected it as unacceptable.

November 12

NAVAL: The gunboat *Bennington* supports army troops in the capture of rebel positions at Borongon on Samar Island, Philippines. Fire from the warship drives off the insurgents before they can burn the town down.

December 8

MILITARY: A small detachment of the 1st Cavalry defeats a body of 200 insurgents at Lake Taal, Philippines.

December 13

NAVAL: The station ship *Yosemite* sinks and five sailors are lost in a typhoon that strikes at Apra Harbor, Guam.

1901

MILITARY: Congress is alarmed after the adjutant general reports that there is not one regiment of the regular army in the continental United States—all have been deployed in either the Caribbean or the Pacific.

January 2–3

NAVAL: Navy gunboats under Lieutenant F. R. Payne are particularly active in Philippine waters, capturing no less than 18 insurgent vessels along the Imus River near Cavite.

January 17

NAVAL: The unarmored cruiser *Don Juan of Austria* under Commander T. C. McLean assists in the reduction of three villages on Luzon, Philippines.

January 28

NAVAL: The village of Maringondon, Luzon, Philippines, falls to a detachment of army troops covered by gunfire provided by the gunboat *Don Juan of Austria*.

January 31

MEDICAL: In Cuba, a detachment of the U.S. Army Medical Corps under Major Walter Reed concludes its first yellow fever experiments to identify and isolate the cause, which turns out to be mosquitos.

February 2

CIVIL: Lieutenant Benjamin O. Davis, Sr., becomes the first African American to receive a regular army commission from the ranks.

MILITARY: The Army Reorganization Act is approved by Congress, which fixes the standing establishment at 30 infantry regiments, 15 cavalry regiments, an artillery corps of 50 batteries, and 126 companies of coastal artillery. Total manpower ceilings are now 88,619.

- Congress creates the U.S. Army Dental Corps and the U.S. Army Nurse Corps with 202 members. They also approve legislation creating the Philippine Scouts, which come to number 7,000 men and are regarded as an elite military formation within the military.
- Congress also establishes the Philippine Scouts to enroll Filipinos directly into military units, where they serve under army officers. In World War II, they are among the best units fighting in defense of the Philippines.

February 6

MEDICAL: Major Walter Reed of the U.S. Army Medical Corps reports to the Pan-American Medical Conference in Havana, Cuba, that the dreaded malady is spread by the striped mosquito *Stegomyia calopus*.

February 21

MILITARY: Vice President-elect Theodore Roosevelt officiates at groundbreaking ceremonies for the U.S. Army War College at the barracks in Washington, D.C.

February 24–March 3

NAVAL: Army troops operating at Loorg Bay and Lubang Island, Philippines, receive fire support from the gunboat *Villalobos* under Lieutenant Henry P. Huse.

February 26

MILITARY: A body of the 28th Volunteer Infantry, backed by the gunboat *Calamines*, ventures up the Agusan River, Philippines, and storms insurgent strong-points at Bacona and San Mateo.

March 2

MILITARY: Congress passes the Army Appropriations Act, which includes an amendment by Senator Orville Platt of Connecticut, stipulating that American forces will not depart Cuba until the island is capable of self-rule. They also establish a protectorate over the island and obtain the right to lease naval stations.

March 18–23

NAVAL: Army operations on Palawan Island, Philippines, are supported by the gunboat *Vicksburg* under Commander E. B. Barry.

March 23

MILITARY: Macabebe scouts allied with American forces under Colonel Frederick Funston capture guerrilla leader Emilio Aguinaldo at Palawan, Luzon. The colonel was posing as a prisoner of war and was led directly to his intended quarry by the unsuspecting rebels. The capture basically ends fighting in the north but the Americans now face a Muslim-based insurgency on the southern Philippine islands of Samar, Mindanao, and Jolo.

NAVAL: Efforts to capture insurgent leader Emilio Aguinaldo are assisted by the gunboat *Vicksburg*.

April 2

MILITARY: Now a captive, Filipino guerrilla Emilio Aguinaldo finally admits defeat, takes an oath of loyalty to the United States, and urges all remaining guerrillas to lay down their arms.

April 19

MILITARY: The Philippine insurrection is formally declared over. Curiously, American public opinion feels that the conflict was unnecessary and that the islands should have been granted their independence.

May 1

MILITARY: A troop from the 1st Cavalry defeats a larger body of holdout insurgents around Mount Solo, Philippines.

July 1

MILITARY: Indigenous forces in Puerto Rico are again reorganized as the Provisional Regiment of Infantry and placed on the regular army roster.

NAVAL: No less than 60 new warships are under construction for the navy, reflecting America's new awareness of global responsibilities.

July 2

MILITARY: In the Philippines, Lieutenant Allen J. Greer, 4th Infantry, storms an enemy outpost with his soldiers, killing or capturing the entire garrison; Greer wins a Medal of Honor.

July 3

MILITARY: Four years after the Spanish-American War, Sergeant Major Edward L. Baker, Jr., receives the Medal of Honor for heroism at Santiago, Cuba, while under fire.

NAVAL: The armed vessel *Basco* trades fire with Moro (Muslim) insurgents on the Gandara River, Samar Island, Philippines.

July 4

MILITARY: The military administration in the Philippines is replaced by a civilian government under William H. Taft, a future president.

July 19

NAVAL: Gunner's mate Frederick T. Fisher is awarded a Medal of Honor for bravery onboard the cruiser *Philadelphia* during an action off Samar, Philippines.

September 14

MILITARY: Theodore Roosevelt assumes the presidency following the death of President William McKinley; he turns out to be a surprisingly effective commander in chief.

September 16

NAVAL: The new battleship *Illinois* is commissioned and serves in various capacities until 1956.

September 23

MILITARY: A body of 400 Moro guerrillas surprises and overruns Company C, 9th Infantry, under Captain Thomas Connell, at Balangiga, Samar Island, Philippines. Forty-eight Americans perish while 36 manage to escape to the river and flee; the extent of the massacre triggers retaliatory harsh measures from General Jacob M. Smith.

October 24

MARINES: Elements of the 1st and 2nd Regiments, organized into a provisional battalion under Major Littleton T. Waller, arrive on the island of Samar, Philippines, to fight fanatical Moro insurgents.

October 26

MARINES: A force of marines under Major Littleton T. Waller engages Moro insurgents along the Quinapundan River, Samar, Philippines, driving them off.

November 2–16

NAVAL: The gunboat *Vicksburg* bombards Moro insurgents near Nipanipa on Samar, Philippines, and subsequently lands sailors in support of Marine Corps operations there.

November 16

NAVAL: Lieutenant William S. Sims, an outspoken junior officer, writes directly to President Theodore Roosevelt to complain about the poor quality of American naval gunnery and suggest that the service adopt the British system first articulated by Captain Percy Scott of the Royal Navy. Roosevelt, impressed by his audacity, later appoints Sims to be inspector of target practice.

- The gunboat *Vicksburg* under Lieutenant Commander J. H. Glennan lands three boat parties in support of an expedition against Moro insurgents along the Basey River, Samar, Philippines.

November 17

MARINES: A detachment under Major Littleton T. Walker scales cliffs along the Caducan River, Philippines, and storms into nearby Moro guerrilla headquarters. The marines employ ladders made of bamboo to reach the fortifications, which are subsequently destroyed.

November 23

MILITARY: Near Nasugbu, Batangas, Philippines, a detachment of the 4th Infantry under Lieutenant Lewis Van Schaick charges into a canyon and routs rebel defenders.

November 24–December 4

MARINES: The battleship *Iowa* and three gunboats contribute marine detachments at Panama City and Colón, Panama, during a period of unrest to protect American lives and property. They are joined shortly thereafter by additional troops from the gunboats *Machias* and *Marietta*.

November 27

MILITARY: Secretary of War Elihu Root establishes the Army War College in Washington, D.C., for postgraduate training of military officers. The school is an outgrowth of concerns arising from the army's relatively poor performance in the recent war with Spain.

December 13

NAVAL: The ongoing contretemps between Rear Admirals William T. Sampson and Winfield S. Schley crests with the final report of a court of inquiry requested by the latter. It criticizes Schley over his supposedly slovenly search for the Spanish fleet, yet credits him for the victory at Santiago. The verdict does little to end feuding between the two men or their respective factions in the naval high command. To smooth ruffled feathers, President Theodore Roosevelt declares the case closed.

December 28

MARINES: Major Littleton W. T. Walker is dispatched from Lanang, Philippines, on a punitive expedition across Samar to retaliate for the Balangiga massacre of September 28. He takes with him only 56 marines, two scouts, and 33 porters, but he quickly becomes lost in the dense foliage.

1902**January 1**

MILITARY: The traditional blue uniform of the U.S. Infantry, which, during the recent war with Spain, proved too inviting a battlefield target, is formally replaced by one made of olive drab.

- In another indication of rising military professionalism among the officer corps, the *Coast Artillery Journal* begins publication.

January 6

MARINES: Parts of the small punitive expedition of Major Littleton W. T. Waller straggles into Basey, Philippines, after wandering in the dense jungle for a week. The exhausted half-starved survivors are incapable of further exertions, and they await an army relief expedition.

January 15

MARINES: The final elements of Major Littleton W. T. Waller's Samar expedition struggle into camp; the expedition costs 10 marine lives.

January 20

MARINES: Eleven Filipinos are executed by Major Littleton W. T. Waller for alleged treachery during his ill-fated expedition of the island of Samar; he is subsequently charged with murder but is tried and acquitted.

February 18

MILITARY: Army forces capture the rebel outpost at Lukban, Samar, Philippines, which effectively crushes all organized resistance on that island.

February 24

MARINES: In Washington, D.C., 2,000 marines turn out in dress uniforms as the honor guard for Prince Henry of Prussia.

March 3

MILITARY: The new Corps of Artillery is founded by merging the coastal, light, and heavy artillery. At the time it constitutes the largest single branch in the U.S. Army.

March 17

MILITARY: The U.S. Army Corps of Engineers receives a new full-dress uniform, which is so favorably received that it stimulates adoption of new uniforms for all branches in the military.

MARINES: In Manila, Philippines, Major Littleton T. Waller is tried by court-martial on murder charges arising from his campaign on Samar; he is acquitted.

April 16–19

NAVAL: Numerous landing parties are dispatched from the gunboat *Machias*, the cruiser *Cincinnati*, and several lesser vessels, which restore order in Boca del Toro, Panama. Bolstered by this sizable contingent, Admiral Silas Casey promotes a truce between local rebels and the Colombian troops fighting them.

May 1

NAVAL: In Washington, D.C., former Massachusetts congressman William H. Moody becomes the 35th secretary of the navy.

May 2

MILITARY: In response to recent Moro attacks against working parties constructing a road to Lake Lanao, Philippines, Colonel Frank D. Baldwin, 27th Infantry, leads a large-scale attack against a Moro fort at Pandapatan, Bayang, Mindanao. After a devastating artillery barrage, the Americans advance at bayonet point, forcing the Muslim warriors to surrender. Baldwin loses 10 dead and 40 wounded to some 300 to 400 Moros killed and wounded. Lieutenant Charles G. Bickham receives a Medal of Honor for heroism under fire.

May 18

MARINES: A detachment from the screw steamer *Ranger* lands at Panama City, Panama, to protect American lives and property.

May 20

MILITARY: Military governor and Major General Leonard Wood begins withdrawing the last of his troops from the newly independent island of Cuba, now led by President Tomas Estrada Palma. His action indicates recognition that the Cuban people are ready for self-governance, but the Americans insist on retaining the right to return under provisions of the Platt Amendment. Prior to departing, Wood proved instrumental in modernizing Cuban schools and helping to establish a new constitution and other laws.

June 2

MILITARY: The Adjutant General's Office issues regulations for the Army Nurse Corps.

June 30

MILITARY: Foreign service pay rates are established for the U.S. Army at 20 percent of usual rates.

July

MARINES: Congress elevates Brigadier General Commandant Charles T. Heywood to major general; he is the first marine to hold that rank.

July 1

DIPLOMACY: In Washington, D.C., Congress passes the Philippines Government Act, whereby the islands will be temporarily governed by a civilian commission.

July 4

MILITARY: The Philippine insurgency is declared officially over, having taken the lives of 4,000 Americans and over 20,000 Filipinos in 2,811 recorded actions. Expenditures are calculated at \$170 million. However, in the southern island of Mindanao, Muslim Moros continue fighting for independence.

July 14

MILITARY: The War Department introduces new, russet-colored footwear in the military, hence the birth of the old "Brown shoe" army.

September

AVIATION: Brothers Orville and Wilbur Wright construct a third glider with better flight characteristics, and they complete nearly 1,000 nonpowered flights of up to 600 feet in distance.

MILITARY: For the first time, army and militia troops hold joint exercises with navy battleships along the New England coast.

September 17

MARINES: A landing detachment from the cruiser *Cincinnati* lands again at Colón, Panama, as a rebellion against Colombian rule spreads.

September 18

MARINES: The survey ship *Ranger* dispatches sailors and marines to Panama City, Panama, to protect American lives and interests.

September 23

NAVAL: Rear Admiral Silas Casey, commanding American naval forces off Panama, refuses to grant Colombian forces right of passage across Panama to attack rebel forces and arranges a temporary truce.

MARINES: The transport *Panther* lands a battalion of marines under Lieutenant Colonel B. R. Russell, which occupies Colón, Panama.

November 6

NAVAL: In Annapolis, Maryland, Captain Willard H. Brownson gains appointment as the 18th superintendent of the U.S. Naval Academy.

November 17

MARINES: Various marine detachments are withdrawn from Colón, Panama, following the arrival of Colombian troops.

November 24

NAVAL: The *Bainbridge* (DD-1) is commissioned as the navy's first torpedo boat destroyer and forerunner of an entirely new class of warships. These high-speed vessels are specifically designed to outrun and destroy smaller torpedo boats, hence their name.

December 22

NAVAL: A new battleship *Maine* is christened to replace the one lost in Havana Harbor in 1898; the two other vessels in this class are *Missouri* and *Ohio*.

1903**January 17**

NAVAL: German warships shell Fort San Carlos, Venezuela, in an attempt to wrest back payments out of the government. However, President Theodore Roosevelt considers this action a violation of the Monroe Doctrine. He files an official complaint with the German government, and he orders Admiral George Dewey to conduct maneuvers in the Caribbean with a fleet of 50 warships.

January 21

MILITARY: Congress passes the Dick Act, which completely revitalizes the old Militia Act of 1792 to provide state troops with the same training, discipline, and weapons as the regular establishment. The new organization is called the National Guard.

NAVAL: The vessel *Leyden* wrecks. Chief machinist Michael Walsh wins a Medal of Honor for bravery in attempting to save his ship.

February 14

MILITARY: To facilitate greater centralization of the army along German lines, Congress, upon the urging of Secretary of War Elihu Root, authorizes creation of a General Staff Corps in order to insure harmonious activity among the infantry, cavalry, artillery, and other branches of the service as well as to promote better liaison service between the top military brass and the secretary of war, who is a civilian. The actual staff consists of 45 officers under the aegis of the Office of the Chief of Staff of the Army.

February 23

NAVAL: President Theodore Roosevelt signs the lease for utilizing Guantánamo Bay, Cuba, as a naval base; it is spacious and strategically located, affording speedy access to the Windward Passage.

March 21–April 16

MARINES: Landing detachments from the cruisers *Olympia*, *San Francisco*, and *Raleigh* arrive at Puerto Cortez, Honduras, to protect the U.S. embassy during a period of revolutionary unrest.

April–May

MILITARY: Captain John J. Pershing leads army troops to suppress the militant Moro sultan of Bacolod, Philippines, destroying several fortifications.

April 1–19

MARINES: The cruiser *Atlanta* lands a party ashore at Santo Domingo, Dominican Republic, to protect the American consulate during a political upheaval.

April 7

MILITARY: Captain John J. Pershing attacks strong Moro positions at Bacolod, Philippines, with a massed artillery bombardment and then moves in with the bayonet to finish off the defenders. The position falls but Pershing allows many Moros to escape to tell their compatriots about the power of the American army and so discourage further outbreaks.

May 4

MILITARY: On Mindanao, Philippines, part of the 27th Infantry assaults the Moro stronghold at Fort Pitacus. Several Americans on the parapet are killed, but Lieutenant George C. Shaw maintains his position until reinforcements carry the position.

May 22

MILITARY: A treaty signed between the United States and Cuba grants the former the right to intervene with troops and restore order and to protect the island's independence against an invading force.

June 11

MILITARY: Secretary of War Elihu Root is on hand at the U.S. Military Academy, West Point, to present 64 diplomas to the graduating class of officers. Lieutenant Douglas MacArthur heads the list.

June 23

TECHNOLOGY: The army adopts the Springfield M-1903 rifle, itself an adaptation of the famous German Mauser rifle, as its first semiautomatic infantry weapon. This durable and highly accurate .30-caliber weapon remains a frontline weapon through the advent of World War II.

August 8

MILITARY: Lieutenant General Nelson A. Miles, commanding general of the army, retires from active service after 42 years in the field. He is replaced by the equally capable General Samuel B. M. Young.

August 15

MILITARY: In a bid to improve military intelligence gathering, the Division of Military Information is transferred to the Office of the Chief of Staff from the Adjutant General's Office.

August 16

MILITARY: In Washington, D.C., Lieutenant General Samuel B. M. Young, the commanding general of the army, is installed as the army's first chief of staff; he serves only six months in this capacity. Under the new organization scheme advanced by Secretary of War Elihu Root, the general staff is tasked with three distinct missions: to organize, administer, and equip the field army; to collect, analyze, and disseminate information (military intelligence); and to undertake war planning, military education, and coastal defense. It is patterned after the highly successful Prussian/German model.

September 7–13

MARINES: A party from the cruiser *Brooklyn* lands in Beirut, Lebanon, to protect students on the campus of the American University during a period of insurrection. This is also the navy's first intervention in one of the world's most volatile trouble spots.

October 3

MARINES: Colonel George F. Elliott becomes the 10th commandant of the Marine Corps following the retirement of Major General Charles T. Heywood.

October 17

NAVAL: In Washington, D.C., the General Board issues a secret plan advocating the construction of 48 battleships and auxiliaries by 1920. The blueprint remains hidden from public scrutiny for a decade, but it does influence naval funding for nearly two decades.

- Landing detachments from the cruiser *San Francisco* go ashore at Beirut, Lebanon, during a period of renewed civil strife.

November 4

MARINES: The warship *Nashville* and its complement of marines are prepositioned in the Panama region to preclude any possibility of intervention by Colombian forces as rebels there declare their independence. Commander John Hubbard orders his marines to seize the Panama Railroad at Colón to deprive Colombian authorities of its use.

November 5–6

MARINES: Landing parties at Colón, Panama, are reinforced by additional marines from the transport *Dixie* under Major John A. Lejeune; all are withdrawn following the departure of Colombian forces the next day.

December 17

AVIATION: The world's first powered flight takes place at Kitty Hawk, North Carolina, when a heavier-than-air craft piloted by Orville Wright flies 120 feet during a 12-second sojourn. He won the honor to make history through a coin toss. His brother, Wilbur Wright, then takes the machine up for a second flight

lasting 59 seconds and covers 852 feet. From this modest and somewhat rickety debut the new aviation age is launched.

December 18–January 15, 1904

MARINES: Captain George C. Thorpe and 19 marines escort a U.S. diplomatic mission across Ethiopia to the capital of Addis Ababa and the court of Emperor Menelik II.

1904

January 3

MARINES: The cruiser *Detroit* sends its detachment of marines ashore at Puerto Plata, Dominican Republic, to protect American lives and property during an insurrection and to preclude intervention from European creditors.

- A total of four marine battalions in Panama are organized into a brigade under Brigadier General commandant George F. Elliott. They are there to guarantee the independence of that nation from Colombia. This is also the last time that a commandant takes to the field with his troops.

January 5

MARINES: The transport *Zafiro* disembarks 103 sailors and marines to serve as legation guards in Seoul, Korea, after the Russo-Japanese War erupts.

January 7

MARINES: The cruiser *Detroit* orders its marines ashore at Sousa, Dominican Republic, during continuing revolutionary violence.

January 9

MILITARY: Civil War veteran Major General Adna R. Chaffee is installed as the second army chief of staff to replace outgoing Samuel B. M. Young.

January 11

MILITARY: In Washington, D.C., William Howard Taft is appointed secretary of war by President Theodore Roosevelt.

January 17

MARINES: The new cruiser *Detroit* and the Civil War-era screw sloop *Hartford*—Admiral David G. Farragut's former flagship—put landing parties ashore at Puerto Plata, Dominican Republic, in response to recent outbreaks of revolutionary violence.

February 11

MARINES: Insurgents in the city of Santo Domingo, Dominican Republic, fire upon the American steamer *New York*. This act draws a sharp response from the cruisers *Columbia* and *Newark*. A total of 300 sailors and marines come ashore, and they provide covering fire as the rebels are driven from the city.

February 25–27

MARINES: Continuing violence in Santo Domingo, Dominican Republic, along with perceived threats to the U.S. consulate there, leads to the landing of marines from the training ship *Yankee*.

February 29

POLITICS: With the United States now able to project strength in both the Atlantic and Pacific regions, construction of a Central American canal becomes a project of strategic importance. To that end, President Theodore Roosevelt appoints a seven-man Panama Canal Commission to help expedite the task.

March 7

MILITARY: A force of 800 soldiers and Philippine Constabulary under Colonel Joseph Duncan assault the Moro strongpoint on the crest of Bad Daju, a volcanic peak. After hard fighting, the allies stand on top of the bloodied slope with 21 killed and 75 wounded. The Moros, who resist fanatically, are mowed down by machine gun and artillery fire and suffer hundreds of casualties.

March 12

MARINES: The outbreak of the Russo-Japanese War results in marines being landed from the cruiser *Cincinnati* for the purpose of evacuating American civilians from Seoul and Chemulpo (Inchon), Korea.

April 13

NAVAL: During a gunnery exercise onboard the battleship *Missouri*, a powder accident results in the suffocation death of 36 sailors. Robert Edward Cox, Mons Monssen, and Charles S. Schepke win Medals of Honor for extinguishing the resulting fire.

April 23

MILITARY: In Washington, D.C., the Adjutant General's Department undergoes a major revamping in being redesignated the Military Secretary's Department. The Adjutant General's Office is also combined with the Record and Pension Office to become the Military Secretary's Office.

April 24

MILITARY: Congress introduces a new Medal of Honor policy, which requires that all claims must be accompanied by official documents outlining the deed for which the medal is to be awarded.

April 27

MARINES: A native constabulary under a marine NCO is established at Tutuila, Samoa.

May 4

MILITARY: The canal works in Panama, previously owned by France, are taken over by Lieutenant Mark Brooke, Corps of Engineers. A decade elapses, however, before an operating canal is realized.

May 30

MARINES: The cruiser *Brooklyn* lands its detachment of marines under Captain John T. Meyers ashore at Tangier, Morocco, in response to the kidnapping of Ion Perdicaris, an American citizen, by the bandit Raisuli. He is eventually repatriated.

June 27

MILITARY: The War Department directs that the seven army service schools at Fort Leavenworth, Kansas, be consolidated into a single entity. They do so at the

behest of Colonel Arthur L. Wagner, an influential proponent of military education. Subsequently, a Staff College is created as a liaison between the existing War College and the Infantry and Cavalry School.

July 1

NAVAL: In Washington, D.C., Paul Morton becomes the 36th secretary of the navy.

August 3

AVIATION: At Oakland, California, Captain Thomas S. Baldwin conducts the first American dirigible flight by flying his airship in a complete circuit.

September 20

AVIATION: At Dayton, Ohio, Wilbur Wright again makes aviation history by performing the first circular flight of a heavier-than-air craft by flying around Huffman Prairie.

October 7

NAVAL: In Seattle, Washington, the battleship *Nebraska* becomes the first capital ship constructed on the West Coast for the navy.

December 6

DIPLOMACY: President Theodore Roosevelt, determined to stop an aggressive German Empire from expanding into the Western Hemisphere, announces the “Roosevelt Corollary” to the Monroe Doctrine, which commits the United States to military intervention to prevent local political unrest. The stage is now set for recurring deployments of marines in Haiti, the Dominican Republic, and Nicaragua over the next three decades.

December 20

MARINES: A permanent base for marines opens at Camp Elliott, Bas Obispo, near the future Panama Canal Zone.

1905

January 11

MILITARY: The new Certificate of Merit medal is authorized by Congress for army privates who have distinguished themselves in combat or other risky endeavors since 1854.

January 12

MILITARY: The War Department issues General Order No. 5, which mandates service medals for the China and Philippine campaigns.

January 18

AVIATION: The Wright brothers offer the army priority negotiations for purchasing their new airplane device, but General G. L. Gillespie subsequently declares the government’s lack of interest and unwillingness to finance inventors.

NAVAL: Naval and Marine Corps personnel, backed by the cruiser *Detroit*, land in the Dominican Republic to begin assuming control of that nation’s finances.

January 20

NAVAL: Navy and marine personnel officially assume control of the Dominican Republic’s customs service in an attempt to stabilize the collection of revenues and help pay off that nation’s debts.

January 27

MILITARY: The U.S. Army Corps of Engineers begins construction activities as part of the Alaskan Road Commission.

March 3

NAVAL: Congress approves funding to construct the battleship *South Carolina*, the final vessel in the first stage of President Theodore Roosevelt's naval expansion program. To date, he has authorized 10 battleships, four armored cruisers, and 17 lesser vessels for an aggregate of 250,000 tons.

April 7

NAVAL: In France, U.S. ambassador Horace Potter discovers the unmarked grave of Revolutionary War hero John Paul Jones in Paris. Preparations are made to transport the remains back to the United States under a guard of honor.

May 1–24

MILITARY: The Moros, a radical Muslim tribe living on Jolo Island, the Philippines, revolt against American attempts to end slavery and tribal feuding there. Army troops will require three campaigns to finally quell their fanatical resistance.

May 13

MILITARY: Hiram Cronk, the oldest surviving veteran of the War of 1812, dies at the age of 105.

July 1

NAVAL: In Annapolis, Maryland, Rear Admiral James H. Sands gains appointment as the 19th superintendent of the U.S. Naval Academy.

July 6

MARINES: Detachments from the cruisers *Tacoma*, *Brooklyn*, *Galveston*, and *Chattanooga* arrive in Cherbourg, France, as an escort for the remains of Captain John Paul Jones.

July 7

NAVAL: In Washington, D.C., Maryland attorney Charles J. Bonaparte, a grand nephew of French emperor Napoleon Bonaparte, becomes the 37th secretary of the navy.

July 21

NAVAL: The gunboat *Bennington* suffers a boiler explosion while docked at San Diego, California, whereby 60 sailors die and 40 more are injured. Congress awards no less than 10 Medals of Honor for heroism in saving lives on board.

July 22

NAVAL: The exhumed remains of Revolutionary War naval hero John Paul Jones are escorted from France to Annapolis, Maryland, by Rear Admiral Charles D. Sigsbee and a squadron consisting of the cruisers *Brooklyn*, *Chattanooga*, *Galveston*, and *Tacoma*, plus the French cruiser *Jurien de la Gravière*. Rear Admiral Robley D. Evans provides an additional escort of eight battleships from the North Atlantic Fleet once they reach Nantucket Shoals.

July 24

NAVAL: Amidst pomp and ceremony, the remains of John Paul Jones are laid to rest in the crypt below the U.S. Naval Academy Chapel in Annapolis, Maryland.

August 25

MILITARY: Secretary of War Elihu Root orders creation of a new Army Signal Corps School for junior officers at Fort Leavenworth, with courses in photography, electricity, and acoustics.

September 12

MARINES: A detachment of 100 marines arrives at Beijing to serve as the permanent legation guard, relieving a detachment of army troops.

October 5

AVIATION: In a circular flight ranging 24 miles, Wilbur and Orville Wright solve a difficult equilibrium (balance) problem in their nascent airplane, the Wright Flier III. Aeronautics has made considerable progress since the first halting flights of two years previous.

October 9

AVIATION: The War Department is again contacted by Wilbur and Orville Wright, who feel their new flying device has potential military applications. The Board of Ordnance, mistaking their letter as a request for funding, once again turns them down.

October 16–22

MILITARY: Captain Frank R. McCoy's company of the 22nd Infantry, assisted by Philippine Scouts, surprises and defeats a notorious Moro chief in his camp along the Malang River, killing him and numerous supporters.

1906

MILITARY: A military study of American coastal defenses judges them unfit to repel a large amphibious invasion. Chesapeake Bay, astride the nation's capital, is found to be completely undefended.

January 16

MILITARY: Lieutenant General John C. Bates is installed as the new army chief of staff; he is also the last Civil War veteran to occupy the post and serves only three months.

February 12

MUSIC: The graduating class of the U.S. Naval Academy is serenaded by a new march entitled "Anchors Aweigh" by Bandmaster Charles A. Zimmerman. When lyrics are adopted in 1907 it becomes the official navy theme song.

March 6–8

MILITARY: A detachment of the 6th Infantry under Lieutenant Gordon Johnson attacks and destroys a Moro fort at Bad-Dajo, Jolo, Philippines, routing the defenders. One of the final actions of the Philippine insurrection, it earns Lieutenant Josephus S. Cecil a Medal of Honor for valor under fire.

March 8

NAVAL: A landing detachment from the gunboat *Pampanga* led by Ensign H. D. Cooke, Jr., assists army troops in storming a Moro position at Bad-Dajo, Jolo Island, Philippines.

April 13

NAVAL: A turret fire strikes the battleship *Kearsarge* off Cape Cruz, Cuba, killing eight sailors and injuring four. Sailor George Breeman and chief boatswain Isidor Nordstrom win the Medal of Honor for saving shipmates.

April 16

MILITARY: In Washington, D.C., Major General James Franklin Bell becomes the new army chief of staff; he is not promoted to lieutenant general.

April 18

MILITARY: Brigadier General Frederick Funston organizes California National Guard troops and his own 22nd Infantry and 6th Cavalry to form an extensive relief effort following the San Francisco earthquake. Fort Mason and the Presidio, within the city limits, become refugee camps.

NAVAL: Navy and marine personnel from the Mare Island Navy Yard come ashore at San Francisco to assist survivors of the earthquake there.

April 21

NAVAL: Commander Robert E. Peary, Civil Engineer Corps, reaches latitude 87 degrees 6 minutes north, the closest any man has yet come to reaching the North Pole.

May 7

NAVAL: The new battleship *Virginia* is commissioned; it is the first of five such vessels in its class.

May 22

AVIATION: After three tries, aeronautical pioneers Wilbur and Orville Wright win their first government-issued patent on their so-called flying machine with its three-axial control system.

May 26

NAVAL: In New York City, Lewis Nixon claims to have invented sonar, a device that will allow submersible craft to “see” and “hear” while under water.

May 29

MARINES: A battalion commanded by Major John A. Lejeune arrives in Panama to enhance security within the Canal Zone.

June 25

MILITARY: Congress expands the U.S. Army Ordnance Corps with a brigadier general for its new chief. In Dover, New Jersey, the Picatinny Arsenal opens as the first army-run gunpowder production facility.

June 29

MILITARY: In accordance with congressional law, the War Department issues General Order 124, creating a medal for soldiers who served in the Philippine campaign.

July 25

MILITARY: On Samar Island, African-American soldiers from the 25th Infantry, assisted by troops of the Philippine Constabulary, defeat Pulahane fanatics armed with razor-sharp bolo knives.

August 3

MILITARY: The “Army of Cuban Occupation” is organized around five infantry regiments, two cavalry regiments, and several artillery batteries. The whole is then dispatched from the mainland by President Theodore Roosevelt to restore law and order on that island; they remain in place until February 1, 1909.

August 13–14

CIVIL: Civilians in Brownsville, Texas, accuse members of the African-American 25th Infantry of nighttime gunfire near the town. All three companies present are then arrested, court-martialed, and dismissed from the army.

September 3

MILITARY: Secretary of War William Howard Taft is dispatched to Cuba with army troops to assist the government there in curtailing an insurrection and restoring order.

September 13–18

MARINES: The cruiser *Denver* arrives in Cuban waters under Commander John Caldwell and lands marines in Havana to restore public order and protect American lives and property.

September 14

NAVAL: The gunboat *Marietta* under Commander William Fullam drops anchor off Cienfuegos, Cuba, and sends half its crew ashore to protect American sugar mills from rebel extortion threats.

September 18

MARINES: A battalion of marines under Major Albertus W. Catlin lands at Cienfuegos, Cuba, to protect American interests.

September 20

MILITARY: In light of his sterling service against the Moros, Captain John J. Pershing becomes a brigadier general over the heads of 862 officers enjoying more seniority.

September 26

NAVAL: The General Board of the Navy, faced with the prospect of fighting a Pacific war with the rising empire of Japan, conceives the Orange War Plan. This basic strategy calls for, among other things, a surface fleet three times larger than the one presently in hand—48 capital warships—that would make it the largest such force in the world. Only then could the United States engage the Japanese navy across a vast and distant arena with any prospects for success. The basic tenants of this strategy remain in place until the advent of World War II.

September 29

DIPLOMACY: Cuban president Estrada Palma resigns from office, and a provisional government is installed in Cuba by Secretary of War William Howard

Taft; Taft also serves as acting governor. He is backed by 2,000 marines from the battleship *Louisiana* and accompanying vessels.

NAVAL: The new battleship *Connecticut* is commissioned, the first of five such vessels in its class.

October 1

MARINES: Colonel Littleton W. T. Waller assumes command of the six battalions of marines deployed in Cuba; these are organized into a brigade of two regiments mustering 97 officers and 2,795 enlisted men. It is subsequently dispersed across 24 strategic posts and also operates an armored train.

October 6

MILITARY: Brigadier General Frederick Funston arrives at Havana, Cuba, with advanced elements of a 6,000-man occupation force. Resistance from rebels fighting the government fails to materialize.

October 10

MARINES: With the arrival of the Army of Cuban Pacification, the marine battalion under Colonel Littleton W. T. Waller disbands and returns to the fleet.

November 1

MARINES: By this date, all but 1,000 marines have been withdrawn from Cuba; these are then organized into the 1st Provisional Regiment.

November 9

NAVAL: President Theodore Roosevelt boards the battleship *Louisiana* and sails on an inspection tour of the Panama Canal. He is the first chief executive to travel abroad on a naval vessel.

December 5

MILITARY: At LaPaz, Leyte, Philippines, a group of 40 Pulajanes attacks a constabulary patrol; they are rescued by a patrol from the 8th Infantry headed by Corporal Seth Weld, who was wounded by a bolo.

December 17

NAVAL: In Washington, D.C., former secretary of commerce Victor H. Metcalf gains appointment as the 38th secretary of the navy.

December 30

MILITARY: The War Department issues a general order for all soldiers to be issued metal identification, or “dog tags,” with individual serial numbers.

1907

January 8

NAVAL: President Theodore Roosevelt directs that all American naval vessels be prefixed with “United States Ship” (USS) for the first time.

January 15

MILITARY: President Theodore Roosevelt discharges 167 African-American soldiers from the ranks after three of their number had engaged in a shooting spree in Brownsville, Texas. The president—and others—feel the men are maintaining a conspiracy of silence to protect them.

January 17

MARINES: Detachments from several American vessels land at Kingston, Jamaica, to assist earthquake survivors.

January 25

MILITARY: After further reflection, the Coastal and Field Artillery are separated and reconstituted as individual branches of service.

February

MILITARY: President Theodore Roosevelt selects Lieutenant George Goethals, Corps of Engineers, to direct the new Panama Canal project. He will be assisted by Colonel William C. Gorgas of the Medical Department, who is enlisted to eliminate yellow fever from the region.

March 2

MILITARY: Congress abolishes the rank of lieutenant general but reconstitutes the Adjutant General's Department.

March 18

MARINES: A detachment is sent ashore from the *Marietta* to Truxillo, Honduras, to protect the U.S. consulate during an outbreak of violence.

March 21

MILITARY: Marines are deployed to Honduras to help suppress a rebellion there and to protect American citizens and property, especially profitable banana plantations.

April 28–May 23

MARINES: A small detachment from the gunboat *Paducah* lands at Laguna, Honduras, to protect American property during hostilities between that nation and Nicaragua.

May 24

MARINES: The detachment from the gunboat *Paducah* marches from Laguna, Honduras, overland to Choloma, to protect American lives and property during a border war with Nicaragua; they remain in place until June.

June 1

NAVAL: The Committee on Imperial Defense in London, cognizant that a future war with the United States would prove self-defeating, abolishes its military bases in the Caribbean, along with the venerable naval base at Halifax. This is done in recognition that Imperial Germany, with a large, modern navy under construction, is Britain's greatest security threat. Royal Navy assets are transferred back to home waters.

July 1

AVIATION: The Army Signal Corps founds its Aeronautical Division to assume control of all observation balloons and any aviation equipment the military subsequently acquires.

July 15

NAVAL: At Annapolis, Maryland, Captain Charles J. Badger gains appointment as the 29th superintendent of the U.S. Naval Academy.

August 1

AVIATION: Army aviation is born when the Office of the Chief of the Signal Corps directs that an “Aeronautical Division” be formed to study and acquire balloons, heavier-than-air machines, and all matters pertained to the military applications of manned flight. Captain Charles D. Chandler gains appointment as head of the new agency.

October 17

AVIATION: Signal Corps Balloon No. 10 flies 475 miles in 20 hours, moving between St. Louis, Missouri, and Walton, West Virginia. The pilot, Captain Charles D. Chandler, wins the Lahm Cup for ballooning.

December 5

AVIATION: In a letter to the Board of Ordnance and Fortification, Wilbur Wright proposes to build a military aircraft for \$25,000. The board subsequently asks the Signal Corps for detailed specifications for such a craft.

December 16

NAVAL: President Theodore Roosevelt, eager to signal to the world that the United States is determined to defend its interests by force if necessary, dispatches Rear Admiral Robley D. “Fighting Bob” Evans with his “Great White Fleet,” of 16 modern battleships. Roosevelt observes their departure from Hampton Roads, Virginia, from the presidential yacht *Mayflower*. Evans subsequently conducts his charge on a 15-month, round-the-world excursion to South America, Australia, and—above all—Japan, viewed as a rising and potentially rival naval power. This trip is also undertaken to dispel notions that such global endeavors are technologically unfeasible.

December 23

AVIATION: Specification No. 486 is issued by General James Allen, the army’s chief signal officer, outlining requirements for acquiring a military airplane. Prospective bids are to be accompanied by a check for 10 percent of the purchasing price of \$25,000. The new machine is expected to be capable of carrying two passengers aloft for one hour while flying at 40 miles per hour.

1908

MILITARY: Carl M. Wheaton of Newtonville, Massachusetts, declares that his formula for poison gas, which he developed in private, will be an effective weapon in some future war.

January 21

AVIATION: The chief of the Signals Corps issues specifications for a lighter-than-air dirigible capable of carrying two passengers at 20 miles per hour for a minimum of two hours.

February 1

NAVAL: The battleship *Mississippi* is commissioned; it is destined to become the first ship of its class to launch and handle airplanes onboard.

February 10

AVIATION: Wilbur and Orville Wright win the nation’s first contract to build a military aircraft for the army. At a cost of \$30,000, the finished craft is expected

to be delivered no later than August 1909, and carry two people at 40 miles per hour over a distance of 125 miles. Two other individuals also receive contracts but they fail to produce the airplanes.

February 24

AVIATION: Captain Thomas S. Baldwin signs a contract to construct an army airship at the fixed price of \$6,750.

March 1

MILITARY: In another sign of growing military professionalism, the new Quartermaster School is established at Philadelphia, Pennsylvania.

March 8

AVIATION: The secretary of war approves a bid by the Wright brothers to construct a viable military aircraft within 200 days.

April 1

NAVAL: The new battleship *Idaho* is commissioned, the last of the older, pre-dreadnought class of battleships employed by the navy. President Theodore Roosevelt also asks Congress to provide funding for an additional four battleships.

April 11

AVIATION: Responsibility for the Aeronautical Division, U.S. Army Signal Corps, is assumed by Lieutenant Frank P. Lahm.

April 23

MILITARY: Congress establishes the Army Medical Reserve Corps to support the standing force with a steady pool of medically trained personnel as needed. Such officers are accorded lieutenant's rank but they serve below line officers of the same grade.

April 25

NAVAL: The *Chester* is commissioned as the navy's first turbine-powered vessel; it subsequently performs diplomatic functions.

April 30

AVIATION: The earliest known participation by National Guardsmen in aeronautics occurs when several enthusiasts in the 1st Company, Signals Corps, New York National Guard form an "aeronautical corps" to study ballooning.

May 11

MILITARY: Congress approves a military pay increase for the first time since 1876; the base pay of privates is set at \$15.00 per month, while corporals receive \$21 and sergeants \$45.

May 13

NAVY: The U.S. Navy Nurse Corps recruits its "Sacred Twenty," the first women to officially serve in that capacity. They are employed at the Naval Hospital in Washington, D.C., and enjoy military status, but they are considered neither officers nor enlisted personnel.

May 14

MEDICAL: The army adopts new fitness regulations requiring that infantry officers be capable of riding 30 miles a day on horseback for three days. Coast Artillery

officers must be able to walk 50 miles in three days, and all regimental officers must submit to an annual physical exam. Those individuals failing the exam are to be referred to a retirement board.

May 19

AVIATION: At Hammondsport, New York, Lieutenant Thomas E. Selfridge is the first U.S. Army officer to fly solo, in this instance while piloting a machine called the *White Wing* designed by F. W. Baldwin.

May 21

MARINES: The position of commandant, Marine Corps, is fixed at the rank of major general for the first time.

May 28

MARINES: To discourage violence during national elections, a battalion of 400 marines is landed in Panama until July 6.

July 1

MILITARY: In Washington, D.C., Luke Edward Wright is appointed the new secretary of war by President Theodore Roosevelt.

July 6

EXPLORING: An Arctic expedition under Commodore Robert E. Peary departs New York on the icebreaker *Roosevelt*, intending to reach the northernmost point possible.

July 7

NAVAL: The destroyer *Decatur* under Ensign Chester W. Nimitz runs aground at Batangas, Philippines; he is subsequently court-martialed and found guilty of "neglect of duty," although he is allowed to remain on active duty without further recrimination.

July 23

AVIATION: Signal Corps Dirigible No. 1 arrives for testing at Fort Myer, Virginia.

August 4

AVIATION: The Signal Corps begins testing Dirigible No. 1 at Fort Myer, Virginia.

August 15

NAVAL: The battleships *Illinois* and *Rhode Island*, along with the transport *Prairie*, are the first naval vessels to have onboard post offices.

August 28

AVIATION: At Fort Myer, Virginia, Captain Thomas S. Baldwin successfully flight tests Dirigible No. 1 for army officials and it is accepted into service.

September 3–17
